## ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.'

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitteed to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp-Fire Flickering Vote." Such popular vote will be quite distinct from the award by the committee.

## *FAMILIAR ACQUAINTANCES.*

### III.—THE RED SQUIRREL.

A HAWK, flashing the old gold of his pinions in the face of the sun, flings down upon you a shrill, husky cry of intense scorn; a jay scolds you like a shrew; from his safe isolation in the midwater, a loon taunts you and the awakening winds with his wild laughter; there is a jeer in the chuckling diminuendo of the woodchuck's whistle; a taunt in the fox's gasping bark as he scurries unseen behind the veil of night; and a scoff on hunters and hounds and cornfield owners is flung out through the gloaming in the raccoon's quavering cry. But of all the wild world's inhabitants, feathered or furred, none outdo the saucy red squirrel in taunts, gibes and mockery of their common enemy, man.

He is inspired with derision that is expressed in every tone and gesture. His agile form is vibrant with it when he flattens himself against a tree-trunk, toes and tail quivering with its intensity of ridicule as fully expressed in every motion as in his nasal snicker and throaty chuckle or in the chattering jeer that he pours down upon you when he has attained a midway or topmost bough and cocks his tail with a saucy curve above his arched back.

When he persistently retires within his wooden tower, he still peers out saucily from his lofty portal, and if he disappears you may yet hear the smothered chuckle wherewith he continues to tickle his ribs. When in a less scornful mood, he is at least supremely indifferent, deigning to regard you with but the corner of an eye while he rasps a nut or chips a cone.

Ordinarily you must be philosophical or godly, to suffer gibes with equanimity, but you need be neither to endure the scoffs of this buffoon of the woods and wayssides. They only amuse you as much as they do him, and you could forgive these tricks tenfold multiplied if he had no worse, and love him if he were but half as good as he is beautiful.

He exasperates you when he cuts off your half-grown apples and pears in sheer wantoness, injuring you and profiting him only in the pleasure of seeing and hearing them fall. But you are heated with a hotter wrath when he reveals his chief wickedness, and you catch sight of him stealthily skulking along the leafy bypaths of the branches, silently intent on evil deeds, and plotting the murder of callow innocents. Quite noiseless now, himself, his whereabouts are only indicated by the distressful outcry of the persecuted and sympathizing birds and the fluttering swoops of their futile attacks upon the marauder. Then when you see him gliding away, swift and silent as a shadow, bearing a half-naked fledgeling in his jaws, if this is the first revelation to you of such wickedness, you are as painfully surprised as if you had discovered a little child in some wanton act of cruelty.

It seems quite out of all fitness of nature that this merry fellow should turn murderer, this dainty connoisseur of choice nuts and tender buds, and earliest discoverer and taster of the maple's sweetness, should become so grossly carnivorous and savagely bloodthirsty.

But anon he will cajole you with pretty ways into forgetfulness and forgiveness of his crimes. You find yourself offering in extenuation of his sins, confession of your own offenses. Have not you, too, wrought havoc among harmless broods and brought sorrow to feathered mothers and woodland homes? Is he worse than you or you better than he?

Against his sins you set his beauty and tricky manners, and for them would not banish him out of the world nor miss the incomparable touch of wild life that his presence gives it.

## *AN ERRATIC.*

FROM a high hill which gives a wide outlook may be seen, far off, on the very verge of the horizon, where the sky bends down to meet the earth, a tiny speck. Traveling onward, it grows clearer and nearer. At first it seems a haystack, then a cabin, then a wagon, at last a buffalo; but it is none of these.

Still riding on over the yellow, rolling plains, where the short stems of the prairie grass quiver with a constant motion, where little ground squirrels flash across the horse's path and hide behind tufts of grass, and shore larks rise with sweet, soft notes and swing away with undulating flight, where dainty antelope slowly walk to the tops of the hills on either side and look about with curious eyes, the object draws nearer. Sometimes from the crest of a hill it seems close at hand, again, descending into a little valley, it is lost to view behind a swell of the prairie. At length it is close by and its nature can be seen.

In those ancient days when the vast ice sheet was melting, a great mass of stone was floated from the distant mountains. Carried on some huge berg, parted from the glacier which gave it birth, this rock journeyed from the west, and at length, falling from its long-time resting place, sank to the earth, and when the waters disappeared, remained here, a landmark on the prairie.

Here for ages it has stood, steadfast, immovable. The winds of winter buffet it; the heats of summer scorch and bake it. Behind it the storm piles up a long white drift of snow; spring floods collect about it in a little lake, soon dried up. Under its lee, perhaps, the chilled Indian, returning alone from his unsuccessful war journey, has stopped to seek shelter from the bitter blasts which sweep over the prairie, bearing death on their icy wings; or in summer the panting wolf has stretched himself for a moment in its grateful shade. The birds have visited it. Eagles and hawks have perched here and with watchful eye surveyed the prairie, alert to see the slightest movement of grouse or hare or ground squirrel. The little birds, too, have rested here for a moment; sparrows and the titlark with sedate walk and gravely turning head. A mountain rat has made it his home, and in the crevice of the rock has built his nest.

Though it has traveled far on the ice the boulder shows little wear. Its knobs and roughnesses are still sharp, but each protuberance and angle is polished and covered with a bright brown gloss, like the corners of fence posts in a barn yard, against which cattle have rubbed their sides.

For ages this great erratic has been the buffalo's scratching post. Here in passing, the dark herds have turned aside and halted, and mighty bull, sleek young cow and playful yearling have sidled up to this massive rock, and with grunts of contentment have pushed their rounded bodies against it, and been jostled and crowded and struck by the horns of others, eager to take their turn. About this stone they have walked to and fro and cut up the soil with their hoofs and made it fine dust, which the unceasing wind has carried away and scattered far over the prairie. So, after the lapse of centuries of time and the passing away of many generations of buffalo, a deep trench has been worn about the erratic, and it stands on a pillar of the soil, the top of which is level with the prairie.

Never again will the boulder witness the sights that it has beheld in the past. It stands in its old place as firm and steadfast as of yore, but the friends that used to visit it have passed and are passing away. In these latter days no Indian crouches behind it for shelter from the storm, nor do buffalo crowd about it. No graceful antelope sweep by in rapid flight, seldom does a wolf approach it, or an eagle from its top look with unblenching eye toward the sun.

The life of the old prairie has passed away.

## *SNAP SHOTS.*

How to get the better of the "Yorker" appears to be the chief aim of some of the New Jersey game protective societies. The Plainfield society exacts a tax of $2, for which it gives a membership certificate entitling him to shoot and fish anywhere in the State. But there is another society at Fort Lee, which refuses to recognize the Plainfield certificate, and calls for $10 more before a New York man can shoot or fish in the Fort Lee territory. And up to a late period—if not now—there was no shadow of authority under heaven for either one of these societies collecting a dollar from a non-resident of the State of New Jersey. Every dollar they ever exacted from a non-resident, who paid it under the belief that the law demanded it, was secured from him by false pretenses.

Ontario has a law limiting the fishing of the "tourist" or "summer visitor," these terms being defined to include "all persons who may, during the spring, summer or autumn months, be temporarily visiting, boarding or lodging in any locality at a distance of over five miles from their usual place of residence other parts of the year." This, it will be seen, includes Canadians as well as Americans. The restrictions forbid a tourist or summer visitor taking more than twelve black bass in one day, or any bass of less than ten inches in length; or more than fifty speckled trout (or fifty pounds), or any trout of less than five inches in length.

One who writes history that amounts to anything—that pictures the life, the men, the human nature of the past—must write with a certain gift of imagination by which he puts himself among the people and in the times whose deeds are recorded. So the writer of natural history must in a sense possess the same sympathetic insight into his subject. It is this quality which explains in part the charm of such a chronicle of bird life as is Dr. Morris's paper on the ruffed grouse.

And now the Delmonico case—illicit sale of woodcock in July—has gone over to next October. That is what they tell you down in the City Hall; but whether District Attorney Nicoll honestly intends to have the Fifth avenue July woodcock purveyor tried in October is something nobody can tell anything about. The public has learned not to take much stock in Mr. Nicoll's promises in a woodcock case.

You may measure a man's interest in the rod and gun by the thoroughness with which he reads the advertising pages of the FOREST AND STREAM.

# The Sportsman Tourist.

## CAMPS OF THE KINGFISHERS.—II.

### GREEN LAKE, MICHIGAN.

#### Old Hickory Tries It.

THE next morning, after an early breakfast, ten minutes' work put the canvas boat together: and two of us carried it down the bank and launched it for its first cruise. It was a new Osgood folding boat 15ft. long, and sat so lightly on the water that it seemed but a feather at the whim of the light morning breeze that was amusing itself in fitful flurries and cat's-paws along the shore.

I could not have been more pleased had I been a boy again with my first pair of red-topped boots, for it just about filled my eye, and besides, it was a present from the Colonel; may his shadow never grow less.

I waited nearly an hour for Mason, chafing with impatience at his tardiness, and at last decided to start without him. I was eager to test the sea-going qualities of the new boat and feel the spring of the old rod again; the same "old reliable" that had stood by me for nine years in many a hard-fought battle with the bronzebacks and the pike tribe of low and high degree: and with a lunch, a minnow bucket with three frogs in it, a rod for minnows and a bait box full of Kentucky worms, the canvas was headed down the lake for the mouth of the little stream connecting Green and Duck lakes, where Sam and Charley had caught some fine minnows the day before.

Knowing from experience the weakness of the bass and pickerel of northern Michigan for speckled frogs, I hooked on one of the three in the bucket, and fished slowly along outside of an occasional patch of grass and bulrushes, patiently and expectantly, clear down to the mouth of the stream, without hearing a single note of music from the click of the reel to start the blood to quicker flow. This would have given Old Sam a serious backset, but as the water did not look very fishy along that shore I was not much disappointed, and maybe frogs were not the bait the fish were hankering after that day, and they would likely take more kindly to minnows when I got some.

I pushed the boat up the shallow, rapid stream a few rods till I found a deep hole scooped out under a root, where I got a few minnows; but they were too small for anything but goggles eyes; I wanted some that would fill the eye of a 5lbs. bass.

I got a few of the right size at another hole, and went on up till I came to the mouth of a little stream coming in from the left that was barely wider than the boat and nearly overlapped with long swamp grass. I had started to push the boat into the narrow opening on an exploring expedition, when I was startled with "Hello, there, old Kingfisher!" and looking down stream from whence the hail came, there were Aleck and his brother, my old friend Jim in Aleck's little tip-over-on-the-slightest-pretext dugout, which he had left at the camping place a few days before, as much at home apparently as though standing on the deck of a steamer. Jim had come from Leland the day before for a couple of days' visit to his brother, and finding him at the son-in-law's, where he had first gone, he had come over to the camp with him to see "old Hickory" and the boys, and finding me gone, had followed down the lake according to directions given them by the Colonel. As I was not in sight on the lake they had pushed up the stream, slipping up so quietly that I was not aware of their presence till Jim hailed.

They pushed alongside and after a hearty shake with Jim he said, "Knowin' the general habits o' kingfishers, he 'lowed he'd find the old bird settin' on a dead limb somewhere up the crick lookin' for minners."

Aleck said if I was not in a hurry to get back on the lake, to push on up the little stream a matter of twenty-five or thirty rods and he would show me the prettiest little lake in the country, and besides, we might get a bass or two out of it.

Jim got in my boat to lessen the draught of the dugout, and standing up and using an oar each as a pole—the stream was too narrow to use them in the rowlocks—we were soon in the solitude of the dense cedar swamp, through which the winding, twisting stream found its tortuous way.

It was so narrow that it was touch and go with the boat in some of the short kinks, and it required the sharpest kind of a lookout to avoid a shipwreck by ripping a hole in the canvas on some of the numerous roots and snags and limbs infesting the bottom of the stream, some parallel with the banks, others crosswise, "catawampus" and all other directions.

At times we had to stoop low to pass under some small tree or limb that reached clear across: and it was shallow, too, in places only three or four inches deep, and several times Aleck had a hard tug to push the deeper-draught dugout over places where the canvas had gone clear. At last we turned a kink in the stream and pushed the boat out through a dense mat of lily pads fringing the shore into as lovely a little sheet of water as the eye could wish to rest on. It was irregular in outline, something longer than wide, and, as near as a guess could make it out, about 500 or 600ft. across, with the evergreen woods, dense, solemn and silent, growing to the very water's edge clear around.

The water was clear and much colder than that in Green Lake, as I found on dipping up a cupful for a "cooler" after the trip through the hot woods from the other stream; and it looked so deep and gloomy that a cold chill chased up my back as I leaned over the side of the boat trying to get a sight of the bottom.

Aleck came alongside in the dugout from out of the stream and accounted for the clearness and coldness of the water by explaining that the lake was fed and kept full by a big cold spring a short distance back in the swamp at the upper end, nearly opposite the outlet.

When we had admired the little gem till well rested we prepared to fish it awhile, and Aleck took his way around to the right with a troller out, while Jim and I started to make the entire circuit to the left with live bait, thus giving our intended victims a chance to choose between two styles of "comin' to grief." I hooked on a good shiner and Jim pulled the boat slowly along a few feet outside of the narrow belt of lily pads and bulrushes that fringed the shore nearly all the way around. We fished around to a sandy point 100yds. away without a symptom, and around that with extra care and caution into a little rush-lined bay, and around to a small naked sand bar near where the spring came in, still without the encouragement of a single nibble.

Here we met Aleck and held a short meeting of condolence, his luck having been equally as good as ours. The water pitched off deep at the sand bar and looked fishy, which moved us to tarry awhile and still-fish, but it amounted to nothing, although we could see some blue-gills and big goggle-eyes "profligatin' 'round" the bar, just to tantalize us it seemed, but as we were not fishing for blue-gills nor big goggle-eyes, we passed a few resolutions bearing on the case and passed on.

We kept slowly on around to the outlet and took a turn back over 100yds. of good-looking water and back again to the outlet, where we waited for Aleck, who was taking another run over to the sand bar and back.

When he came alongside we compared notes and found that

"We hadn't ketched a single bass,
Nor nary pick-er-el."

And if there were any in that little lake we failed to find it out.

We picked our way back down the stream, carrying a load of discouragement that settled the canvas at least a half inch deeper in the water, and Aleck came near not getting through at all with his dugout. But after all I am not sorry to have wet a line in the beautiful little lake in the woods, and if I ever go back to Green Lake again I shall certainly pay it another visit and not count the time wasted, even if I don't get a nibble.

We stopped at a deep hole before we got out to the lake and caught a few more shiners, to make sure we would not run out of bait when the fun began.

When we pulled out at the mouth of the stream we found the wind had risen, blowing straight down the lake with a force that curled up a few white caps a mile below. This decided Aleck to hide his tottery little dugout in the bushes near the water and get in the canvas with Jim and me, and at the same time we were not sure how it would behave in rough water, but we concluded to take the chances, whatever the outcome. If it would not carry three men in a mild blow it was "no good," and the sooner I found it out the better, and, being good swimmers, we wouldn't growl much at such a trifle as a ducking, if a mishap overtook us.

I hooked on a shiner and with Aleck at the oars we struck out for the foot of the lake, hoping the luck would take a turn and we could go back in the evening with a string of bass that would cheer up the camp and shorten old Sam's face at least a foot. A quarter of a mile down we got out from under the shelter of the wooded shore around the mouth of the stream and into the wind and rough water; but the "iron clad" (old Sam had in a spirit of ridicule christened the canvas boat the "iron clad") behaved very well, except for a decided undulating motion that made the joints of the bottom boards creak as it rose and fell on the waves that went rolling by, for Aleck was holding the oars in the water as a drag to keep from going too fast to fish.

A half mile further down we met a jolly family party coming up the lake in a big ungainly skiff—father, mother and seven children, ranging from a toddler of two or three years to a couple of well grown boys at the oars. They had two lines trailing astern and two more winged out on either side on short rods, "spooning it;" and appeared to be out for a good time, as we were, and as we exchanged the greetings and civilities of the day, we learned they were having as good luck as we, and we hadn't been blessed with a nibble since leaving the little river—nor before.

The water got rougher as we neared the lower end of the lake, but it was a matter of small concern, as the iron clad was behaving admirably and the fish biting equally as well as at the beginning of the cruise. We saw our two boats from the camp across the lake, a half mile apart, too far away to recognize the occupants, and as they were headed up lake and pulling sturdily against the white-capped seas, we figured it out that they had caught all the fish they wanted and were going back to astonish the Colonel.

We were now near the foot of the lake, and on turning a point to our right, were in a sort of narrow pocket, in smooth water, and within a few rods of the outlet, the head of the Betsy River. We concluded to go down to the "Chute," a matter of a hundred yards or so down the stream, and get some good big minnows to tempt the bass with on our way back, for they would surely bite along toward evening, and we didn't feel quite safe to go back to camp without a single fin to show after a whole day's fishing.

Just before entering the river we passed another happy family of fishers anchored three or four rods to our left in a boat at the edge of the rushes and lilypads. This time it was an Indian family, Mister Lo and his wife and a couple of small brown youngsters that stared at us stolidly as we went by, wondering doubtless what manner of queer water craft the ironclad was anyhow. Mister Lo was equipped with a pole cut from the woods, not an inch under 18ft. long and of a weight that we could only guess at. Even as we wondered how much that pole would weigh, the cork went under, and almost at the same instant a hapless goggle-eye was yanked 30ft. in the air, and describing a circle overhead and shoreward, came down and swung back and forth two or three times like a pendulum till Lo caught the line, released the hook from the mouth of the paralyzed goggle-eye and tossed it over in the stern of the boat, where it was promptly pounced on by the suddenly alert youngsters. By the time we were well by Lo had adjusted his bait and cast in again and stood waiting for another victim, as fixed and motionless in his attitude as one of his wooden brethren that stand guard at cigar stores, without once deigning a glance at us before, during or after the performance. We smiled a stealthy smile at the amusing "episode," which we had no right to do, for the Indian had proved himself the better angler, as we hadn't even a paralyzed goggle-eye to our credit.

We landed at a convenient place a few rods above the chute and walked down to the lower end of it, where we rigged a couple of extra minnow rods, and in a few minutes were flipping out as fine a lot of big shiners as ever tempted a bass to his downfall.

The chute, or sluiceway, was a contrivance to raise the water in the lake; and when a sufficient head, 5 or 6ft., had accumulated to run logs through it on the flood and on down the river below. It was strongly built of heavy squared timbers, banked up solidly from both sides of the stream, and had two gates at the upper end like an old-fashioned forebay to a mill, which were hoisted out when the water was backed up in the lake and logs ready to run through. Just now the gates were out and only the water from the lake at its natural stage was running through like a streak four or five inches deep on the floor. The torrent rushing through at log-running times had scooped out a deep hole below, near 100ft. long and a matter of three or four rods wide, and it looked so provokingly "fishy" that I was moved to get the old rod and try for a bass. It was not perhaps the right time in the season to look for bass in such a place, but in the spring there are no doubt plenty of them seeking the upper waters and resting in the pool before making their way up the rapid current in the chute.

A choice shiner was hooked on and dropped in the swift water just below the timbers and the reel allowed to run as the current carried the bait nearly to the riffles below. When it floated off into the quieter water at one side it was reeled back with sundry alluring "out-curves and in-shoots" to the foot of the chute, where the swirl sucked it under the sheet of quick water and away down stream again to the riffles. I fished with great industry for half an hour without any sign of a bass being in the pool, but I was no worse off than two or three natives fishing along the bank below.

Long before I gave up the hope of capturing a bass out of the pool, Jim and Aleck had filled the bucket with a choice lot of shiners and a few chubs, and we went back to the boat and took our way out of the river and up the lake, under a settled conviction that it was a mighty poor day for bass or any other kind of fish except shiners.

#### Trout Stream and Camp Site.

The trout stream Aleck had mentioned in one of his letters was, he said, about a quarter of a mile away, flowing into the lake from a great spring; and we headed for the mouth of it with a lingering hope that we might take back a mess of trout for the boys, if nothing else.

As we paddled out from behind the shelter of the point we caught the wind square abeam; and as it was considerably fresher than when we came down, and the water whiter and rougher, we felt surer of a ducking before reaching the stream than we did of a trout supper; but we were pleased to find that a course parallel to the rollers, in the trough of the waves, was the ironclad's best point. Had we been in a skiff of the same dimensions, we would have been rolled over before going ten rods, but that odd-looking canvas "contraption," fashioned after no other model on the earth or seas, just rose and fell on the white-capped waves with as little roll as a raft. The only trouble was to keep the curling seas from breaking over the low, insloping windward side; but with care in meeting an occasional big one at the proper instant, we held our course without shipping more than a half pint of water.

When off the mouth of the stream it looked bad for making a landing, for here the wind had a full sweep for nearly the whole length of the lake, and the rollers were tumbling square on the beach with a crash that boded ill for the ribs of the ironclad; but we picked out a spot on the smooth strip of sand free of stones or pebbles, and went at it "sideways, like a hog goin' to war." When three or four yards from shore we stood up and let the wind blow us broadside on; and as a comber lifted the boat and was about to dash it on the beach, we made a preconcerted jump, landing in four or five inches of water, and when the next wave brought the boat back Jim and I grabbed it stem and stern and lifted it bodily out on the sand before another incomer had time to "get its work in" on us.

We sunk the bucket of minnows under a root in the stream, hid the boat in the bushes to be out of sight of any chance passers that might take a notion to it, and under Aleck's guidance took our way up the beach for a hundred yards to some higher ground to avoid the dense tangle along the stream near its mouth, out over the open country to its source, from whence we would fish back to where we had hidden the boat.

The way led along not far from the stream over a scope of country that had been ravished by fire except in the ravine through which it found its winding way thirty or forty feet below us, and we went floundering through loose sand, ashes and patches of tall ferns, over charred and blackened logs and prostrate trunks of limbless trees lying in all conceivable directions along the high rolling ground overlooking the ravine, till I found myself making a mental calculation of how many trout it would take to compensate us for all the labor and sweltering discomfort we were undergoing, and wondering if I would ever get forgiveness for all the subdued but none the less vehement cussin' it required to keep the somewhat rheumatic old starboard leg from failing me at a critical time when straddling over an extra large fallen tree, which extra large fallen tree seemed to obstruct the way with frequent regularity.

When less than a quarter of a mile from the lake we halted a minute or two on a knoll from whence we could look down on the stream, the most desolate and God-forsaken looking spot, doubtless, in northern Michigan; a lump of disappointing possibilities, sandy and bare except for three or four blackened, branchless stubs of trees pointing skyward, a few scattering, sickly ferns, and a patch of stunted, puny-looking quaking aspen bushes that fluttered feebly with every breath of wind, and *this*, Aleck informed me with a burst of enthusiasm, was the place he had originally selected for our camping place because it would be handy to the "beautiful spring and trout stream."

After a careful survey of the surrounding country and the approaches to this lovely spot, it occurred to me that we might possibly have transported the camp outfit to it in a balloon, but not in a wagon.

I said nothing to Aleck, only that I was very glad he had finally decided on the place where the camp then was, but I swore a silent but comprehensive oath right there on the spot that had he lured us to the cheerless, comfortless out-of-the-way region of wretchedness, without one solitary redeeming feature to it—not even a leaf for shade—and a quarter of a mile or more from the lake, over a road, or rather the lack of a road, that would have started a church deacon on the downward parth in five minutes, he would never have lived to return to the bosom of his family. At the same time I was satisfied

that his intentions were good, and that from the outset he wanted to do the very best he could for us, and did; but his judgment about the requisites for a good camping place was badly warped, in the case of this desolate knoll at least.

### Educated Trout.

A few rods further on, he led the way down the hill and through a narrow strip of cedars and willows that had escaped the fire, and we were at the fountain head of the trout stream, a mast remarkable spring of exceedingly cold water, and so clear that it looked as transparent as a drop of dew. The water seemed to come from some where under the hill, up from under the roots of some cedars at the head of a basin 50 or 60ft. across, that looked to be 8 or 10ft. deep, but it was no doubt deeper in places, for the water was so very clear that it was hard to judge the depth. There were few places in it clear of fallen trees and old logs, some of which looked to have lain there a hundred years. Their roots had lost their grip in the loose swampy soil bordering the basin, and they had fallen across it from nearly every point of the compass, filling the pool with a maze of tree trunks large and small—a wilderness of spikes and leafless limbs that looked almost too intricate for a trout to make his way through.

But there were trout there as we saw; but they were so wary and shy that the slightest move of a bush, or the least quiver of a half submerged tree trunk caused them to dart into hiding among the spikes and limbs. Their shyness was in a measure accounted for, however, by the dozen or more old and freshly cut fish poles lying around, which had been used by Tom, Dick and Harry when they "went a troutin' to the big spring," which Aleck said was almost a daily occurrence, so that hardly a day in the week did the pool get a full rest.

Jim and Aleck selected a pole each from the assortment, and my pocket "calamity box" completed the outfit. Then from the bait box strapped around my waist the "inducements" were produced, and we went carefully to the work of furnishing the boys a trout supper. Jim and Aleck worked around to the further side, while I mounted the fallen trunk of a good sized hemlock, reaching nearly across the pool, and stepped gingerly and cautiously out on it a few feet, where I could reach and drop the baited hook alongside the nearly submerged trunk, where there was a space of a yard or two clear of limbs.

Instantly three good sized trout flashed out from under the body of the tree and out of sight in the tangls over in the direction of Jim and Aleck. A minute or two after Aleck from his log yanked out an 8in. trout, may be one of the three I had scared over to him; and before Jim or I got a nibble—albeit we were expecting one every quarter of a second—he hoisted out another, a little larger than the first, this time undoubtedly one of my two.

In the next ten minutes he didn't get another, neither did Jim or I, which was a trifle discouraging to us. I moved down to another log, and after a few minutes quiet fishing flipped out a fingerling, which was tossed back in the water, to be yanked out next day, it might be, and "counted" by some hoodlum who had no respect for the trout law nor peradventure any other. The little fellow was under the limit of 6in., which I could tell to a nicety by the width of my hand, including the extended thumb.

Just as Aleck missed another one, the third probably of my trio, Jim lifted one out from among the limbs and exulted, for it was a little bigger than Aleck's best one, Not to be left, I got a nibble and missed, but at the next cast I swung one out over the edge of the bank, where he dropped off the hook, and with two flops was back in his native element and out of sight under a sunken log, wondering no doubt what had hit him. This one was even smaller than my first, at which I rejoiced and changed logs for one further down toward the outlet.

Meeting with no success on this log, I went on down near to the outlet, a matter of five or six rods from where I first made a cast, or rather drop, and finding just as good fishing there as at the last log, I concluded to fish along down the stream to the boat, leaving Jim and Aleck to follow at their will.

After leaving the basin of the spring the stream had a width of 8 or 10ft. for most of its length, with water enough flowing in it to run an average country sawmill.

This was the "beautiful spring and trout stream near by," and in truth it was a most wonderful spring, but to see it was hardly worth the trouble of getting to it, at least not more than once.

A hundred yards or more down the stream I came to a place where it spread out to a width of about 10yds. for 30yds. or more, and here I caught one trout of 9in., and lost another of about the same size by getting foul in some roots.

Soon after Jim and Aleck came meandering down on the other side, and stopping near the head of the widening took out three or four good trout in a few minutes; and it occurred to me, after a thoughtful survey of the surroundings, that I was on the wrong side of the stream—the "left" side, as it were.

I moved down to where the stream narrowed again, falling over a couple of logs on the way, on account of a hitch in the working gear of my starboard knee joint, and caught a small trout that I figured out was astonished twice. First, at the uncermonious manner in which he was persuaded to leave the water, and second, that he escaped with his life, by being thrown back in the stream.

I went on down, over logs and through the tangle, fishing a little here and there—which resulted in one more trout that crowded the limit, but I kept him—till at last I came out on the beach at the mouth of the stream, tired, hot and chock full of a feeling of "general cussedness" and disappointment. It wasn't a good day for trout; I made up my mind to that, or I had lost my cunning, which amounted to the same thing as far as my catch was concerned.

I went back over the ground in my mind. I had seen a dozen or more trout on the way down from the widening, but they were wilder than bucks and stood not on the impulse of going, but got. I had caught five measly trout, two only of which were above the lawful length of 6in.—which law is a farce and dead letter, because eight in ten pay not the slightest regard to it. I had barked both shins and carried away on my clothes a goodly portion of the black off numerous charred tree trunks and logs that infested the way. I had scattered along the route a good many new cuss words, some plain and some with "scroll work on 'em," that were wasted on the desert air. I had fished in the "beautiful spring and stream" and I struck a balance and called it square. I had enough.

### Cedar Root Meditations.

I sat down on a cedar root near the boat and cogitated on the day's experiences in general and on the "onsartinty o' trout fishin' as a satisfyin' pastime," and waited for Jim and Aleck to come. I was hungry and got out the lunch (for one), and dividing it in three equal portions ate my share and felt in a better frame of mind; in fact, I felt so much better that I involuntarily whistled the first eight measures of "Gettin' out o' the Wilderness" with such moving effect on the audience—a dejected looking kingfisher perched on a dead limb a few rods up shore and a couple of little teeter snipe bobbing and bowing along the beach and dodging the incoming rollers—that I felt called on to repeat it, with the chorus hitched on. Then I wished Barney had put up a heap bigger lunch, and waited some more for Jim and Aleck.

If any brother reading this has at some time sat waiting on a root or log, wondering what in the name of "old scratch" was keeping a comrade loitering and fooling away time along a stream that he had just fished over himself with poor results, he will understand the situation and maybe not blame me too much for the few remarks I made, some of them bordering on the profane.

After waiting two solid hours—it seemed so long, at least—the bushes parted near the boat and the two laggards stepped out on the beach with fourteen good-sized trout strung on a forked twig; and then it was plainer than ever that I had been fishing the wrong side of the spring and stream, a lame excuse, doubtless, but it was the best I could think of at the time.

They finished the remainder of the lunch in short order; and we got ready to launch the ironclad and try our luck again with the bass. This was not quite as easy as "fallin' off a log," for the wind was stronger and the lake even rougher than when we landed; but we placed the minnow bucket, trout and rods in the boat, and picking it up by the gunwales shoved it into the surf bows on, where I held it steady, keeping the sternpost from pounding on the beach till Jim and Aleck got in and shipped both pair of oars; and then as they let fall I rolled into the stern somehow with wet feet, and we were afloat again without a mishap. When four or five rods out we turned up shore and followed it around with the wind first abeam, but as we held a course corresponding to the curve of the shore line at the lower end of the lake we were soon pulling straight in the wind's eye. We found this to be the boat's worst point, but it was so buoyant that only once in a while would a bigger wave than usual dash a pint or so of water and spray in over the low bow, which was readily "sopped up" with a big sponge and squeezed out over the side.

Had the lake been much rougher we doubtless would have swamped and had to swim for it, but the little canvas shell climbed the waves like a water snake, without the least roll, and we felt as easy in her as though seated in the Traverse City boat with her high sides and 54in. beam. I was much pleased with the performance and seagoing qualities of the ironclad, and would not have swapped her for the best corner lot in Interlochen; however, even with Jim and Aleck each pulling a pair of oars we made little headway against the wind and sea, but we were in no hurry, for we were "goin' slow fur a bass."

I had hooked on a good lively shiner soon after leaving the mouth of the trout stream, and as I have found that the bass of these northern lakes usually bite better when the wind is blowing hard and the water is rough than when there is no wind and a smooth sea, I was looking every moment to feel the spool of the reel make a few rapid turns under my thumb from the "strike" of some bronzed warrior of the tribe; but as we had worked over a mile or more of fairly good water without a note from the click, it began to look as if all the signs were turned upside down, and the bass of Green Lake were not to be fooled by white caps, wind, or anything else as far as we were concerned.

We began to feel a trifle discouraged, but kept on up along the shore to the point, where Aleck felt tolerably certain we would get a bite or two, as that point was, he said, the best bass grounds in the lake. The water here was not nearly so rough as below, as the shore, looking toward Interlochen, afforded a partial shelter from the wind, and we fished quietly and carefully around the point and back, and then off it for 50yds., and right at the point for nearly an hour altogether, but not a click of the reel greeted our expectant ears from strike of bass, pickerel or other fish.

### Green Lake Voted a Fraud.

It was a backset of large proportions, and Aleck was busy most of the time inventing reasons and excuses for the poor fishing, or rather the lack of fishing around the best point in the lake for bass. At last even he gave it up as a waste of time and we pulled around the point and up to the rush-grown bar where the boys had done their first fishing the day before. We found most excellent looking bass water all around it, but with the most careful and painstaking work we were not rewarded with even the sign of the existence of bass, pickerel, or "muskylong," and as the sun was getting well down below the treetops, we struck across to camp, about as completely disgruntled over the day's experience as it was possible to be, and I was ready to wager the old rod against a dead minnow that there were not bass enough in the whole lake to make a good smell in a fryin' pan.

The boys had rowed for me carefully and patiently over not less than eight miles of water; I had fished with diligence and understanding, knowing in a general way by the "signs in the water" where would likely be the feeding and loafing places of the bass and pickerel, but the experience of years had availed not; all the signs meant nothing. I had started out in the morning gay as a meadow lark and filled with hope of a day of good sport, and I was returning in the evening without strike from fish of any kind (leaving out the five measly trout), wilted and humbled and bowed down with disappointment and a sense of utter "wuthlessness." Green Lake was a barren fraud, to the best of my knowledge and belief.

We climbed the bank up to the camp wearily and with drooping chins—like olp Sam's the evening before—with our tails between our legs (which may be taken as a "figger o' speech"), tired from sitting so long cramped up in the boat and hungry as pickerel (no reference being intended to the pickerel of Green Lake.)

While Barney dressed the trout and got supper under way, we talked the situation over and swapped lies about the happenings of the day with the other boys, who had pulled in an hour or two ahead of us. When we saw them in the forenoon they had been down to the foot of the lake looking for the mouth of the trout stream, but not finding it they had fished back, and finished up the day round the upper end nearer camp, where the wind was not so bad nor the water as rough as below.

Their experience had been the same as ours with the bass and pickerel; not a bite or an indication of one the whole day, but they had brought in another lot of bluegills and goggle-eyes, as Sam said, "to pervide agin another contingency, fur I don't believe there's a bass or snake in the whole confounded no 'count pond."

Old Sam was depressed in spirit, and sore over nearly two days of fruitless fishing; and the rest of us were much in the same frame of mind; but Barney put us in better humor by serving up an excellent supper, of which the sixteen trout formed a toothsome part; and it may be noted that the bones left from the entire lot would not have filled a pocket match-box.

We built a big camp-fire near the edge of the bank; and sat around it till a late hour, smoking and consoling ourselves with tales of old camps—always a fruitful mine of reminiscences and fish lore—and discussing the advisability of moving to some other lake where better fishing, certainly no worse, could be found. It was agreed that should no bass be taken next day we would break camp and go to some other locality, but it was not to be decided where till the next camp-fire conference the following night.

KINGFISHER.

THE CAMP KEEPER.—ADIRONDACKS.

## MOOSE HUNTING.

*Editor Forest and Stream:*

Doubtless a good many sportsmen are thinking as the season approaches of that bull moose they have been counting on killing on many of the trips they have made.

I have made three trips to Maine in the late fall and early winter, killing caribou and deer, but seeing no signs of moose, although I was told I should be quite sure of finding them. Last winter I went to the headwaters of the Aroostook. I killed two caribou one morning before 9 o'clock, and could easily have shot six at the time, as there were six in the drove and none of them offered to run until I walked toward them after killing the two. I also killed on this trip a very handsome deer, a buck with ten points, his body being nearly all pure white, a patch of gray on back near shoulders, and some gray on neck and head, the rest entirely white.

I have also been on three trips to Nova Scotia, twice in calling time and once still-hunting in December. Twice there were two in the party, and once three besides our Indians. We killed six moose and four bears. I killed two of the moose and the four bears, and could easily have killed another moose. As for signs, I never expected to see so many moose, so many tracks, beds and signs of browsing, or to hear so many bulls and cows calling. I have had three bulls answer our call at once; three times I have had them within from 50 to 100yds., when it was too dark to see them. In fact sometimes there seemed to be too many, there were so many tracks, I couldn't tell where they went, and in calling some would be sure to come up to leeward and spoil all chances of a shot.

Last fall when on the way to Nova Scotia I met a young man who was going on his second trip moose hunting. He told me about his first, saying he got three shots at three bulls, wounding them all, but failing to get any of them, although he followed them long distances. He said he was getting discouraged, he could not get a bullet in the right place. However, he got a shot at a fourth, which he killed. I had some letters from him telling of his hunt last year. He said they had been calling one morning without getting an answer, and had decided to give it up for that day and return to the main camp. He was lying down reading, while his men were packing up the things; happening to look up he saw a large bull standing on the edge of some timber about 300yds. away looking at them. He shot at and hit him somewhere, followed him two miles and lost him. It seemed like the same old experience of the previous year. A few days later they were crossing a barren when his man saw something sticking up out of the brush, which he thought looked like the tips of a moose's horns. They stopped and watched, and after a while a very large bull got up and walked out on the open ground. The hunter shot at him at about 200yds. and put a bullet through his lungs; the moose ran some 200yds. and dropped dead. He was an exceptionally large one with a first-rate set of antlers. My correspondent said he was satisfied and did not want to kill any more moose.

Again I have talked with men who have been to Nova Scotia, who said they found moose very scarce. I do not know what part of the Province they went to or what sort of guides they had. What I have stated regarding my experience are facts.

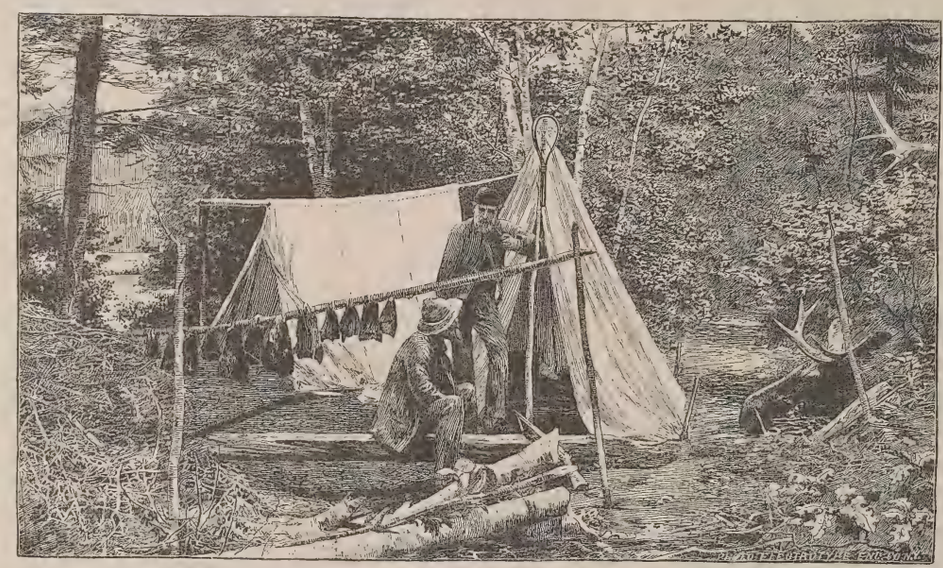
Now, as to the guides and callers in the Province, most of them are Mic-mac Indians. A few of them are good, the majority are not. Many of them are very unreliable, and if you engage them in advance you are very likely not to find them when you arrive. Many of them will take you out for so much a day, and will not try to get you shots; their main object will be to keep you in camp for as many days as they can. They are shiftless and lazy about camp, and if you leave it to them to provide an outfit and things necessary for a camp, you will find they have forgotten about every thing you will need. If you take a supply of liquor along they will be sure to take that and do their share of drinking it.

There are exceptions, however. Personally I know three Indians who are first-rate callers and good still-hunters, and who will try their best to get shots for the party. One of them has been in our party on all the trips, and in any part of the country that he knows I wouldn't ask for a better caller or still-hunter. Such Indians as these I refer to are scarce, and they must be engaged some time in advance, and if you know how to handle them you will get along all right. The Indian I refer to particularly told me about a man he had out on a hunting trip. He was very anxious to get a good caribou head (caribou at that time being quite plenty in Nova Scotia). He got several easy shots at moose and missed them all. The Indian had some doubt about his being able to hit a caribou, but as he was promised quite a sum of money extra if his man killed one, he worked hard to get him a shot. One day when traveling up a bog they came suddenly on a caribou with a fine set of horns. He was about 30yds. away looking at them. The Indian whispered, "Now is your chance." His man fired three shots and missed every time, and away went the caribou. That night in camp the Indian said: "How much longer do you want to stay?" "Two weeks," said the man. "All right," said the Indian, "I stay two weeks longer, but I will not go hunting any more; you promise me big money if you kill caribou; you no hit that caribou to-day, you can't hit one at all."

There is one thing more about hunting in Nova Scotia. You need to take out a hunting license for each sportsman in the party. Licenses cost $30 each. A few years ago parties could go without getting a license and were reasonably safe. At present it is very risky to do so, and you are very likely to have a game warden after you. My advice is buy your license or don't go. C. M. STARK.

DUNBARTON, N. H., June 27.

## IN A WISCONSIN CAMP.



*[From a Staff Correspondent.]*

THE WOODS, Wisconsin, July 1.—A study of camp life will establish many simple truths which have not yet become axiomatic in popular philosophy. Thus, there are many ways of washing table knives, many of them ingenious, most of them troublesome; yet it seems to have escaped general knowledge that the only way to clean a greasy knife is to stick it in the ground and then wipe it upon one's trousers leg. Take it also in the matter of coffee. There are many cook books in the land, and each of these will give several ways of making coffee. Your wife's folks will have their way, and every lady visitor will give you her recipe. How singular that the only correct way of making good coffee has never been announced publicly! A few days in camp will teach it. In the first place, you must never, under any circumstances, wash the coffee-pot. Every other vessel about the camp should be kept scrupulously clean, but the coffee-pot should never be washed. After each meal the coffee grounds should be emptied out into the end of the fire, and the coffee-pot should be knocked gently against the side-log, in order to disengage to the proper extent the adherent grounds. After this the coffee-pot should be left inverted, about 6ft. from the fireplace, with the lid resting upon the bottom of the pot. This position should be maintained till the next meal, without variation from day to day.

I am disposed to think that a careful observance of the directions up to this point have most to do with the success of the coffee, and am certain that the instruction not to wash the coffee-pot is essential. The size of the coffee-pot, contrary to common impression, has nothing whatever to do with the amount of the coffee to be used, neither has the number of persons at table anything to do with it. You always have a drinking cup about your camp, for instance the porcelain lined or blue granite sort. You take this cup, and pour it full of the ground coffee, so that the top of the heaped up coffee is just level with the rim of the cup. This rule should be followed in all cases, a cup full of ground coffee for each meal, be the drinkers two, four or more. You can put this into the full pot of water before you put the pot on the fire, and so bring it to a boil, or you can boil the water first, then put in the coffee and bring it to a boil again. There seems to be no difference about this. The main skill in making coffee seems to lie in the knocking out of the grounds on the fire log. An unpracticed hand may knock out the grounds too clean or not clean enough, or may leave the pot right side up, for the sun to shine into, in any of which cases failure must be the result. By the observance of the above plain and easy rules, I have never known poor coffee to be made in camp.

The right kind of coffee-pot is made of sheet iron, riveted, and is wider at the bottom than at the top, so that it is not always tumbling over when you set it on the fire. A proper coffee-pot must be set square down upon the fire. I always have my doubts about the man who suspends his coffee-pot over the fire by means of a gypsy fork, or allows it to depend from a chain or wire. Nine times out of ten that man is a tenderfoot, and builds too big a fire. I used to have a round-bottomed coffee-pot which liked to be treated that way, but it is no more in my kit. It was a first-class nuisance, always spilling at the critical moment, and needing besides a bonfire to boil it. The old-timer has a nice, narrow little fire between two side logs, and at this he will boil his coffee, cook a spiderful of bacon and eggs, and broil a bass or a bird, all at the same time, or so nearly synchronously that no one at the table will kick. For "table," read place where the dishes are. The old-timer never burns his hands, either, nor gets red in the face, nor swears while cooking. He does it just as easy, because he knows how.

The problem of rain in camp is one that occasionally comes up for quick solution. No one can be good-natured when the bedding is saturated. I have seen a great many tents which lacked an appliance as needful as the roof or sides of any tent; that is, a floor cloth, or rather a double floor cloth. We have been in camp about a week and have had very heavy rains often, and rain every day but one, yet our tent is dry, sweet and clean. First, we have it made with a sad-cloth to spread inside of the edge a little way. Most tents have this sad cloth, and all should have. Lapping over this sad-cloth is the bottom floor cloth, in our case made of waterproof tarred canvas, though it can be made of rubber. This is just as large as the bottom of the tent. On this lower cloth we spread a foot or so of hay (we have few pine feathers in Western camping), and over all this we strain the upper floor cloth or tent carpet, made of stout duck, and also just as large as the tent floor. On top of this come the blankets, which are always dry and clean. No taking cold in this sort of tent. No hay in the bed clothing, and no muss in the tent. I do not know whether this is anything of a pointer to anybody; but we have found the system exceedingly comfortable and useful.

A MOOSE HUNTERS' CAMP.

From a Photograph by Col. Cecil Clay.

An actual week in camp is apt to take the edge off the keenest sportsman, unless he be a very young one. I mean that he will not care so much to hunt and fish, but will begin to find more of the pleasures which are hidden in the life itself. This morning early one of our party went down to the spring for a pail of water, and in the lake just off the cold water, he saw 18 bass, which probably had a lien on the school of minnows which is a fixture near the spring. He sat on the bank and watched the graceful antics of the bass, and the thought of his rod never crossed his mind. The other evening we went out for a while with the fly-rods, and caught 13 strawberry bass and one black bass, but now we lie on the bluff at sundown and watch the rises which dot the lake, and comment on the big fellows and enjoy the panorama and the play of nature without a wish to act a part therein other than that of those who wait in passiveness.

This morning everybody left camp but myself, and I had a little house-cleaning time, after which I set forth, without a scruple of conscience, to transfer to our woodpile a few hardwood rails from a certain ancient fence I had discovered back in the woods. It seems to come sort of natural to a fellow to steal rails for camp wood, and they certainly do burn better than hit-or-miss fuel from the woods.

I was well up the hill from my second journey when I noticed a little motion high up in a tree, and presently made out a fine red fox-squirrel, with a gallant tail. He saw me at the same time, and we concluded to watch each other for a while. The watching lasted probably an hour, and for my part I enjoyed it hugely. On the part of the squirrel it was plainly defensive, and it is a question whether he liked it so well. If I had been obliged to hang head downward from a limb, in imitation of a dried branch or a bump upon a tree trunk, ten minutes at a time, I probably would not have thought it an unmixed pleasure. The squirrel did this, and did it perfectly. He never quivered in a muscle. It was his method of defense and it was well planned, for had I not watched him take this attitude, I could never have detected him at all, away up in the tree. As a courtesy to the squirrel, I moved a little bit, and in a flash he was gone. I lay flat on my back and searched the tree over for five minutes before I found him. His curiosity had been too much for him. He had gone higher up in the tree and had concealed even his tell-tale tail, but he must have an eye on the intruder. I could just see his head sticking out from a crotch, motionless as before, and seemingly part of the tree, with which the gray of the upper body color blended perfectly.

Who has not seen and wondered at this fine provision of nature for her helpless children, which makes them take on the semblance of the environing objects? Who has not marveled at Bob White, lost near by in the dry leaves, or wondered that the prairie chicken could hide in the scanty stubble almost at the hunter's feet? My squirrel aroused admiration in my heart. It was only his sharp, erect little ear that betrayed him. It is the large and prominent eye of the hare which reveals it when it

seeks to hide motionless, and it is the ear of the squirrel which is often its undoing; that and the uncontrollable squirrel curiosity. I allowed my friend to gaze for some moments at a rather ill-clad lounger, and then I tossed a twig at him. Presto! He had vanished again. This time I could not find him at all, and finally concluded that he had gone into an old nest which lay high up in the tree. I went a little closer and did something which made him run out of the nest. Just what this something was J. B. H., who showed me how to do it, tells me I must not tell, as it would enable too many hunters to overcome one of the best natural defenses of the squirrel, and so work harm to the family. Anyhow, the squirrel ran out. This time he was frightened beyond the pitch of curiosity, and ran over the boughs to another tree, where he got behind a limb, head and all, and lay there, I doubt not, in a state of abject terror. At this I took pity on him, explained that I would not hurt him for the world, being already so largely in his debt, and so set on my way, a little the wiser in squirrel ways and the ways of nature for the benefit of squirrel kind.

When the wind blows hard we go down to the old mill pond and rarely fail to take a big bass or so, over 4lbs. in weight, usually losing about three to every one we get into the boat. I never saw so many big bass in such a limited area of water as there are among these floating islands. They have a lot of fun with us, scare us nearly out of the boat by the savage splash they make when they jump on our frogs, run down in the weeds, break our lines, tear loose, cavort, rear, pitch and raise trouble generally. It is very hard fishing water, and although we have the best tackle that can be bought it is not good enough for these big bass in this weedy water.

The fact is, a bait-casting line which is even decently good does not yet exist, so far as I know. Before starting on this trip we visited every tackle store in Chicago and got an example of each firm's idea of a bait-casting line, the whole covering, as I suppose, the entire list of such lines now manufactured. A good one does not exist in the lot. We have them costing up to $2.50 for 50yds. The best one of the lot, strange to say, is a 50-cent line which we stumbled across in a department store and bought for a joke. This line withstood the wear and tear of heavy bait-casting for several days and was still strong, though not coarser than some of the others. The life of the other lines ran from one to three or four days. All the lines were dried each evening and reversed daily on the reel.

Tackle dealers who sell anglers a casting line at 75 cents or $1, knowing that the line will rot or wear to worthlessness before the end of the second day, have got plenty of nerve along with them. Still I do not know that they can do much better. This is a question for the manufacturers, not the dealer. Who is the raw silk line maker who can give a bait-caster a practical line which will last a week, and not rot so that a heavy fish will break it at the first sharp strain? Yesterday we lost two magnificent bass, furious, big fellows, which just simply walked on off with the line. One broke a line by twisting it in the weeds, a favorite game of the bass tribe, and the other broke the line at the leader knot square on the spring of the rod in clear water. The lines seem to cut themselves at the knot, but when tested develop flaws and break almost anywhere. They are strong when new, and they are strong when shrunken and dry, but you can't fish with a dry line, and the best of those offered break after a few days' wetting. The fish that escapes by his own skill or strength, or through fault of the angler is not to be mourned; but to lose a good fish through defective tackle, when that tackle is the best purchasable in its class, is something which grieves an angler's heart beyond possibility of explanation or comforting. We have lost seven big bass through broken lines this week, and the raw silk men have our bitterest thanks for it.

A wonderful country is this lake region of Waukesha, Racine and Walworth counties of Wisconsin. Some of the sheets of water we have discovered in our wanderings have been simply delightful in their beauty. Gillard's Lake, a couple of miles across the wood from us, is apparently untouched and wild, girt all about by forest, and headed by a somber tamarack swamp. Lake Beulah we visited for a day, a vast inland sea, 20 miles of shore line, and all encircled with summer cottages and choice building lots for sale for a consideration. They say this is second to Lake Geneva. Better looking fishing water we have not found, but it was sadly disappointing, for our two boats only took 5 bass. The deadly bullfrog brought in one 4-pounder, and this seemed to occasion some surprise.

In short, man has done all he could to tear down what nature has wrought. Continuous ice fishing for the market has ruined all these lakes. It takes expert work, and plenty of it, of the hardest kind, to get a decent string of game fish together. The lakes are regularly worked each winter, though the summer resort men on the larger lakes will tell you that no winter fishing is done. One man regularly fishes the mill-pond at Mukwonago in the winter, and they tell me he often catches 100lbs. a day. Others fish with more or less regularity, and not a lake is free from it. Summer and winter the fish are given no rest. In the last ten years the falling off of the supply has been very great. The farmers tell me that the fishing is no longer good, but eight or ten years ago they "could catch all they wanted." Somebody has wanted too much.

A special law of the last Assembly of Wisconsin makes the close season for all kinds of fish open March 1 and close June 15, and permits only fishing with the hook and line. If this law could be made to cover the winter also, say beginning at Nov. 1, it would mean money to the people of this region and preservation of the fish in a lake system which for beauty and natural productiveness in fish life is not to be surpassed in all this section.

It may be asked, how can any one know and how do I know that more money would follow a better law? That is easy to answer under proof. This morning a boat pulled up at our spring, and a young lady paused for a cup of water. Later inquiry developed that this was a lady stenographer from Chicago, boarding for two weeks at a farmnouse over the hill. This single specimen of a genus is enough. The lady stenographer will not be denied, and God bless her, who would shorten her all too short vacation, or wish her away from the pleasantest lake on earth? Still, this single specimen means that Chicago will now go 86 miles north for its modest, common-people vacation, instead of stopping at 55 miles.

The index of the flood does not purely betoken the full character of all to follow. There are all sorts of vacation people. Most of those who go North to the woods and lakes want a little fishing, where they can catch some fish without becoming past masters in the art of angling. Shall this be in lovely Waukesha county, or shall it be further north, or east, or west? This is the question for Waukesha county to answer, and to answer quickly, for it is not the habit of Chicago to wait. One lazy market fisher, and a lot of farmers who fish in the winter because they can catch more fish then—just what value does their catch represent to the commonwealth, or what principle do they uphold? Offset that against Chicago summer dollars, Lake Beulah men, Mukwonago men, and add to that the dearer and more beneficent policy of protection, which now is wise and needful, and then see how it looks when you come to look at it. E. HOUGH.

## A SIDE ISSUE, BUT NO TROUT.

"Across the window pane
It pours and pours;
And swift and wide,
With a muddy tide,
Like a river down the gutter roars
The rain, the welcome rain."

—*Longfellow.*

BUT it was not welcome to Stephens and I that May morning as we sat in the dining room eating our breakfast at 4:30 o'clock, because as Whittier sings:

"Four weeks the clouds have raked the hills
And vexed the vales with raining,
And all the woods were sad with mist
And all the brooks complaining."

And we were up thus early to start on a two-weeks' outing east of Ely, in northwestern Minnesota, and the rain did not even stop to give us a fair start. But start we did, and all that forenoon, as the cars carried us toward Duluth, the rain streaked across the windows and beat upon the roof of the coach, and we emerged from the Union depot at Duluth into a regular downpour. After dinner we went to make inquiry about the guide and some other men who were going in on the Iron Range east of Ely with us. We learned that the guide was not there and would not be down from the Nesaba Range for three days. What should we do? "Let's go over in northern Wisconsin for a couple of days and try for some trout," said Stephens. "I'm with you," I replied. "Then let's go and dig some worms, we have just about time before the train goes," he said. In a few minutes we were at work in a vacant lot on First street, with the rain beating down, digging bait with a shovel we had borrowed from a livery barn.

By the time we had enough worms we were both pretty well wet through, but we were in time for the Ashland train and in a few minutes were whirling away through the Superiors, across the Nemadji which was at flood tide and the color of a very muddy mud puddle, in the strong current of which a young lad had accidentally found a watery grave the day before; on we went into the pine woods, crossing the American, the Poplar and many lesser streams, while the rain still came down, and the low hung clouds seemed to sweep the tops of the trees. The famous Brulé was left behind and here it dawned upon us that our ax was left behind also. It was wrapped up with our canvas boat, which we had left in the baggage room at the depot in Duluth, only taking our tent, blankets and some provisions with us. What were we to do? We would be left at a siding with not a house within miles, in a heavy rain and without an ax to cut a tent pole, drive a peg or cut a stick of wood. We discussed the situation, and concluded we would get along somehow—we always do manage to get along somehow. We just came to this conclusion as Iron River was reached. A boom has recently struck this place. Last fall when we were through it, three or four houses and a hotel comprised the town; within six weeks over half a hundred buildings have been put up and the plants for three large sawmills brought in, and this is but the beginning. The main street is lined for quite a distance on either side with brand new business blocks—some finished, others nearly so, and all untouched as yet by paint. The street is so thickly studded with stumps that no vehicle, unless it were a wheel-barrow or a hand cart, could get along.

Upon the depot platform we found the roadmaster of the division, who said "a few trout were being caught, or rather were before the rain, and some fishing was done in the Brulé in defiance of the law, some in Iron River, and several pretty good catches had been made in Pike Creek."

"Have you an ax?" was our anxious inquiry.

"No, all of our axes are in the section house at Topside, but if you get off at Ino get into the pump house if you can, and make yourselves comfortable."

Ino was soon reached, and in the gathering darkness and pouring rain, surrounded by the sighing, moaning pines, with "Good luck to you," "Success," and "Hope you'll fill your creels with trout," from the trainmen wafted to us as the train moved away, we took a look at our surroundings. There stood the water tank and here the little pump house; the former full of water, the latter securely locked. We tried the door, we tried the windows, but all in vain, and the rain just came down in sheets of wet. At length we did get a window open, and putting our dunnage inside, crawled through after, and found ourselves within a dry room, still warm from the fire left by the pump man. This was unexpected good luck, and with a roaring fire in the stove supper was soon ready and eaten, a bed made alongside the stove, and two would-be trout fishers were lying side by side fast asleep, from which they were awakened several times by squirrels running about overhead, and by the rushing wind and angry swish of rain upon the roof and against the windows.

Morning dawned bright and clear, with song of bird, whisper of breeze among the pines, and air fragrant with the odor of the pine trees. After breakfast, while Stephens put our dunnage outside and cleared up the room, I wrote a note to the pump man and laid it where he would see it the first thing when he came in. The note was as follows:

DEAR MR. PUMP MASTER—You will see that some one has been in your house. We came in to get out of the rain. We should not have done so if the road master had not told us to. We have done no harm save loosening the fastenings to one window. We are very much obliged for the shelter, and if it is ever in our power will do as much for you. Very sincerely,

TWO TROUT FISHERS.

In high spirits, we set off, going down the track a ways, then turning directly south through the woods toward Pine Creek. The dampness under our feet ought to have dampened our high spirits a little, but it did not. Here and there we came upon patches of snow, and occasionally I saw some trailing arbutus, with clusters of buds, but no flowers as yet. Our first feeling of discouragement came when we reached the creek and stood in dismay, wondering at what we saw. Was this our beautiful little trout stream, from which we had lured so many of the bejeweled, rainbow-tinted beauties? Was this roaring, muddy torrent, reaching high up the banks, and in many places overflowing them, covering rocks and stumps and logs that to us were landmarks, witnessing to some triumph of skill on our part over the wary trout? Was this the stream where

"Cool summer winds our heated brows;
Blue river through the green
Of clustering pines, refreshed the eyes
Which all too much have seen;"

where

"Fringing the stream at every turn
Swung low the waving fronds of fern;
From stony cleft and mossy sod
Pale asters sprang and golden rod."

Even so, but our hopes died with us, for no trout would we get in that maddened and surging stream; and none did we get. We faithfully tried, but all in vain. Neither worm nor fly had any effect. The only trout seen were two that Stephens saw trying to leap the rapids at the old dam where we ate our lunch. We wended our way through the grand old woods back to the water tank, packed up our dunnage and sat down to wait for the Pacific express. While we were waiting three tramps came along, eyeing us sharply as they passed. A short distance down the track they stopped, and after a consultation one of them came back and asked "If we were going to stop the train?" "Yes," said Stephens, and the fellow rejoined his comrades. "Those fellows are going to try and steal a ride on the train," remarked Stephens. And sure enough they did, for at Iron River we saw one of them standing in the crowd on the depot platform. We reached Duluth in time for an eight o'clock dinner. We put in the next forenoon along the shore and out on the light house pier watching the big steamers come through the ice which covered the lake for a long distance outside of Minnesota Point. The lake at Duluth had been free of ice for two weeks, and it was supposed that it was gone for good, but two days before our coming a heavy east wind had brought a great field of ice back, nearly blocking the port.

The day before a ghastly find had been made—a sail boat with a broken mast was observed out in the ice. A tug went to it and found the bodies of three men lying in the boat frozen stiff. They were from some port on the north shore, but how they came to be caught in the ice and meet their deaths will never be known on earth. As we came along the canal we saw two boys in a boat trolling.

"Do you catch fish here?" asked Stephens.

"Yes."

"What kind?"

"Pickerel."

"Big ones?"

"Yes, sir. Last Sunday I caught one as long as I."

The speaker was about 3½ or 4ft. long, so I had grave doubts as to his truthfulness. He was a stocky little fellow with ragged clothes and a torn hat, and between his lips he held a cigarette at which he was puffing with great vim, a character study for a Dickens or Miss Murfree. After a sumptuous dinner we put in the time as best we could until a quarter past 3, when we boarded the train for Ely and the Iron Range, intending to take a canoe at Ely, or rather our canvas boat, and go seventy-five miles east to Gun Flint Lake. Thus ended our "side issue" after trout. MYRON COOLEY.

DETROIT CITY, Minn.

## OLD PETE.

A FIELD MEMORY.

BY tangled brier and grasses dun,
With willing and untiring feet,
No more you course the fields with me
To flush the quail, Old Pete.

No more we skirt the stubble dry,
Nor track the brood through nodding wheat;
Our path across the yellow rye
Is grown with weeds, Old Pete.

Our dew-kissed footsteps come no more
To mark the woodcock's damp retreat,
Nor follow up the reedy shore
Behind the snipe, Old Pete.

The partridge in his hemlock bed
No longer wakes in fear to meet
Our faultless eyes and winged lead,
That seldom failed, Old Pete.

The spring beneath the leaning oak
At noon still bubbles, cool and sweet,
As when I rested there to smoke
And you to drink, Old Pete.

There's something whispers, trusty friend,
Your brown eyes waiting yet shall greet
Me when my lonely hunt's at end,
Dear faithful dog, Old Pete.

HARRY PRESCOTT BEACH.

### Mahomet and the Mountain.

THERE are a good many Mahomets who cannot go to the mountain, but who can do what the original Mahomet could not, have the mountain come to them, simply by subscribing for that charming periodical, FOREST AND STREAM. Its pen pictures of sylvan scenes and sports are the next best things to the real enjoyment of nature itself.—*Baltimore Methodist.*

## A DISASTROUS TRIP TO THE PARK.

*Editor Forest and Stream:*

For the benefit of persons who may in some future June be hoodwinked into visiting Yellowstone Park, I should like to have you print the following statement.

We were in Portland, 2,500 miles from home. Yellowstone Park was right in our path, and after much debate and counting of pennies we went to the agent of the Northern Pacific. "Certainly the Park is open," said he. "You will have no trouble in getting in!" On the strength of this assurance we invested $100 in tickets and started.

Arrived at Livingston Friday, June 3, we set out for Cinnabar in a chilly wind that speedily brought snow, and the landscape from Cinnabar to Mammoth Hot Springs was entirely invisible. We could see the nearest span of horses, and occasionally the leaders. We had on two suits of woolens, and wished we had on a third when, arrived at the Mammoth Hotel, we tried to warm ourselves by the machine which passed for a steam-heater in our room.

"We can take you to the Upper Geyser Basin, but the roads are not open to the cañon and the lake," coolly explained the manager of the transportation company that evening, when we had returned from scrambling through the snow about the springs.

"But," we exclaimed, "we have come here under promise to see the whole, and the Upper Geyser Basin is but fifty miles of the way. Pray, what are we to get for the part we cannot see: and if the roads are unsafe to the lake and the cañon, are they safe to the Upper Basin?"

"Oh, the roads are perfectly safe. As for rebate," the manager scratched his head, "well, we'll allow you $3; the hotels will probably allow you something for the unused tickets."

"But fifty miles is but one-third of the way, and we lose the grandest sights. Moreover, we were promised that should we be unable to use any part of our tickets the money would be refunded," we expostulated.

At last the manager agreed to give us $5. The hotel management promised to refund dollar for dollar on unused meal tickets, and on Saturday, June 4, we set out for Norris's. The hotel is burned, and we were to reach there for dinner, and start on as soon as possible for the Lower Basin. There were two Concord coaches. Each one had ten passengers. Your correspondent sat beside the driver on the box. On my right was a lady friend; on my left the iron bar separated me from the driver.

It was bright and beautiful, but the sunshine had this drawback, it speedily revealed the fact that "the perfectly safe roads" were a series of quagmires. The melting snow heaps and the rivulets trickling from the heights above us had furrowed and guttered in every direction. The coach lurched and plunged from one hole to another until we were about two miles from Norris's, when we went over. How the driver sprang over me I do not know. I clung desperately to the back of the seat not to fall upon my companion, and I contrived to drop into a huge mud puddle on one foot and one knee, with no worse hurts than a sprained back and wrist. As the coach went over, of course, the passengers fell forward and across the neck of one and along the heads of the two others, the top of the coach lay pinning them to the earth. Had the four spirited horses moved a foot, held as they were by the weight above them and the edge of the coach top, they would have been terribly lacerated, if not killed. My companion had been held by the boot, and unable to help herself, had fallen heavily, and when, shaking like a leaf myself, I got her on her feet, one mass of mud, she turned violently ill. Three of the party were unable to go on to the geysers. One of the ladies in the coach was a mass of frightful bruises, and my companion and another lady suffering from nervous fever.

On our return to the Mammoth Hot Springs Hotel the manager said blandly, "How unfortunate," and he stoutly refused to give more than $5 to those visitors unable because of the accident to go beyond the Fountain.

"This place isn't fit for a human being to enter until after July 1," said a U. S. officer to me at the Fountain. "The appropriation for the repair of the roads does not take effect until about that time, and our ride yesterday into the Park was the hardest one I've had since I was a soldier. Even the cavalry horses were mired."

We met a party from Yosemite on the train going east from Livingston. One of them was regretting she had not taken in Yellowstone Park. "You wouldn't a got in," said a young fellow who till then had been silent. "A hotel clerk in Portland warned me not to try it. He said the company were selling tickets, though the Park was not all open and the roads unsafe," "That cannot be so!" exclaimed the young lady. But we put an effectual end to her unbelief.

Before separating our party wrote a letter to Secretary Noble calling his attention to the fact that the Yellowstone Association were selling tickets which they knew could not be used in whole, and in part only at risk of life and limb, and begging that in future the company shall be restrained from permitting tickets to be sold when to peril from cold is added risk to bones; that in fact since the Park is National property, its lessee's rapacity be held in check by the National Government.

For reply we have just received an assurance that "the roads are being rapidly put in good condition." How consoling this would be to the friends, had one or more of our party been killed! As the snow makes the roads impassable each year, how safe will travelers be the first of next June?

"I'm a pretty good sleeper," said an old gentleman, who, with his daughter, daughter-in-law and two grandchildren traversed the road the day after we did, and returned to the Mammoth Hot Springs at the same time. "But," here he shook a slim fore-finger in the red face of the manager, "I laid awake all night at the Fountain House, thinking how glad I'd be to walk the forty miles back if I could see you hung! Yes, sir, hung! A man who will permit women and children to enter the Park with the roads in their present condition, is an old scoundrel!"

We were thankful some one was able to find words expressive of our feelings, and we sincerely trust that so long as the present greedy management continues, all persons reading this letter will remember that they enter the reservation June 1, with the possibilities we have set forth. Mountain roads will always be mountain roads, and Mammoth Hot Springs lie high up on the eastern slopes of the Rockies. ELIZABETH CUMINGS.

TERRE HAUTE, Ind., June 28.

# Natural History.

## BONASA UMBELLUS, REX.

KING by courtesy of all game birds and subject to no authority whatsoever is the proud ruffed grouse of our North American forest.

Named by Linnæus after the wild ox, *bonasus*, for his roaring, and specified as *umbellus* because of the arrangement of neck ornaments, he has received down through cyclefuls of generations a strength and beauty undegenerate. From the pines and hemlocks of the ravine he inhales the spirit and the energy of his moods. The wintergreens and birches furnishing provender give spicy life to his nerves and muscles. From the crags he adopts the suggestion of ruggedness, and from the winter gale cons music for his symphony by wings. The crash of the falling dead tree involves an idea of death, and by opposites he rushes upward with startling roar to liberty and life when found by the hunter.

### The Romance of a Grouse Family.

Through a small south-facing valley in western New York there runs a spring trout brook. Several years ago the choppers cleared off the arm of woodland that extended from the main forest up along the stream, and then the swale was quite barren except for the crooked alders that had not been worth cutting, and for the fireweeds that always come to the temporary assistance of newly cleared land.

Gradually the sheep and cattle began to find pasturage there, and two or three years later clumps of beech and poplar saplings sprang up. Patches of briers then crowded out the sparse grass, and here and there a thrifty green hemlock arose near the stump of its deposed ancestor, so that the barren ground that had become pasture land was transformed into a brush lot.

One Sunday morning in May the sun shone warmly in upon the budding saplings of the swale. The naiads of the brook murmured with hushed voices and the trailing arbutus which overhung the bank gave out a rarer fragrance than it would have done on any rude week day. Hardly a sound was heard save the wandering tones of the church bell in the far-off village, and the only appreciable motion of the air was in the gentle breaths that rise almost imperceptibly from the warming soil of quiet glades.

With almost noiseless footsteps a demure hen grouse walked from the edge of the thick moist woods and stopped for a moment a little way out in the brush lot. Again she went on and again paused, looked about her and listened, with one foot daintily lifted from the ground. So by degrees she advanced out among the saplings, her head gracefully moving back and forth in unison with her footsteps and the pretty brown neck feathers gliding so softly over each other that they seemed like one warp and woof of silk. Stepping upon the gnarled root of a rough lichen-covered stump she glanced over her own smooth outlines and the bright hazel eye looked the satisfaction of the comparison, but yet she could not resist the feminine impulse to rearrange several feathers that were already perfectly in place.

All at once she gave a start, and with upstretched neck and elevated crest assumed an attitude of strictest attention, for from a distant point in the forest there had come to her ears a low sound like muffled drum beats, the strokes first slow, then faster and ending finally in a long tattoo.

Poised upon the root with partly opened wings, she seemed almost ready to fly in the direction from which the sound came, but suddenly remembering herself the wings were closed again and her head dropped bashfully until the echoless drum beat once more sounded through the woods. It was the love call of Old Ironsides, a noble cock grouse that we had so named because of his seeming impenetrability to the shot that had been fired at him time and again in the lower ravine where he chose to spend most of his time. Day after day the hen grouse had listened for that call knowing that Old Ironsides would come in the spring time to find her, and now should she fly impetuously to him and let him know her impatience at his delay? Oh no! The annals of feminine nature contain no history of such rash action, so taking an easy running jump into the air she flew very quietly among the trunks of the big trees of the woods and then on curving wings sailed slowly near the ground to a point somewhere in his vicinity, and alighting waited for further summons. The roll call sounded again, and she the only musterer walked half hesitatingly in the direction from which it came, sliding quietly as a mouse behind boulders and thick kalmia bushes, and looking as unconcerned as you please.

At last he was in sight. High upon the prostrate trunk of a huge storm-riven pine he was pacing slowly to and fro with martial bearing, his proud crest raised, his broad tail partially spread, and all his feathers glinting in the lights of the woods.

The hen grouse was not many rods away, gliding stealthily from one hiding place to another, hoping that he would discover her and yet not daring to lose any of her reserve. How she did want to pull his black ruffs though, and strike him petulantly with her bill and pretend to be real angry at him for rough play!

For a moment Old Ironsides stopped his incessant pacing, glanced into the thicket on one side and on the other, and then drawing his feathers tightly together and standing perfectly erect upon the log, his sturdy wings were struck repeatedly against his sides, sending forth the long vibrations of a tone so low that it seemed to roll along the ground rather than penetrate the upper air, but with such initial velocity, nevertheless, that it rolled half a mile out of the woods before losing itself in the grassy fields. How grand the old warrior looked to the hen grouse. But what if he should become impatient and fly elsewhere to seek her and not return for a long week? No one will ever know whether she purposely stepped upon the small dead stick that snapped and revealed her presence just then, but who is prepared to deny a motive for the seemingly accidental movement of a dumb animal on such an occasion, the wished for result being obtained?

She was discovered and he was by her side. Coyly she stepped away from him, and then to gain further admiration, which was all unnecessary, he spread his great barred tail widely over his back, unfolded the iridescent black ruffs until they concealed his shoulders, dropped his curved wing tips to the ground, elevated his pointed crest, and with curved neck circled and pirouetted about her, nodding his head, fixing his strong, bold eye upon her modest one, and stepping in front of her to head off retreat, in such an exasperating way that it seemed as though she certainly would scream.

He would not have made any such pretentious movements if other cock grouse had been about to criticise him, and how the other hen grouse would have been amused at her assumption of simplicity and gentleness. She who was the boldest of all when associating with others of her own sex, and who could roar as loudly with her wings as any cock grouse when trying to unnerve an enemy.

But who could doubt that all of this display on his part meant that he was assuring her that he would be, oh! so true and loyal forever and forever? She believed in him most sincerely, and loving and respecting tried hard to avoid being annoyed at his overplus of attention.

It was not long afterward, however, that he acted in a rather independent manner and took little interest in family affairs, so that when in June there was a nest of ten eggs by the side of a clematis-covered stump out at the edge of the brush lot, Old Ironsides was either drumming again in another woods altogether, or he was associating with two or three chummy reprobates of his own sex during the livelong day.

The hen grouse took great comfort with her eggs though. Six of them were plain buff colored, and four of them were marked with light brown spots, and all were smooth and snug-fitting in the nest. Around about the nest she scratched some dry, loose beech leaves which could be whisked over the eggs in an instant with one movement of her wings in event of surprise by a marauder, and then being almost of the color of dead leaves herself, she could hardly be seen when she snuggled cosily down over the eggs and drew her head in closely. It seems too bad to think that after all this pains the mother bird might be discovered in her hiding place, alone and unprotected as she was. One evening a red fox trotted past, and when near the nest he stopped and sniffed the air, twisting the sharp tip of his nose from one side to the other, and alternately spreading and closing his whiskers, but he could not quite locate the gentle prey, and his attention was finally attracted elsewhere by a little squeaking evening mouse that had fallen from the soft cedar bark nest in the wild grapevine near by.

The noiseless swoop of a great ogre-eyed horned owl gave the mother grouse a cruel heart thumping one moonlight night just as she had almost dared to take a little nap; but the owl had dived for a gray rabbit, and did not suspect that a grouse was within easy reach. Why it was that the minks and skunks and weasels and raccoons and box turtles and blacksnakes did not find the nest is a mystery; but there is some strange protection afforded by nature for ground-nesting birds. Perhaps there is a certain sense of honor among predaceous animals. Hounds are disinclined to chase a nursing she-fox, and it may be that minks know better than to destroy the eggs that make the golden geese, although we do know that they are sometimes absent-minded in their morals. The only enemy that found the nest after all was a farmer's boy, and he did it quite accidentally by stepping so near the old bird on his way home from the trout brook that she was forced to fly out. The boy's first impulse was to leave the eggs undisturbed except for the turning that was absolutely necessary for an accurate count, but suddenly remembering that there was a "settin' hen" under the old wagon in the woodshed at home, he smiled a salute of thanks to his memory, and with well-meaning but rather thick-fingered caution that would have made most of us a little nervous if they had been our eggs, he rolled up two of the precious oval treasures in a youthful fisherman's Saturday afternoon handerchief, and tucking them carefully away in a side pocket trudged rather unsteadily over the stones as his mind became occupied with the thought of having two live grouse at home that would respond to his kindly efforts to tame them. At intervals he regretted that he had not taken two more of the eggs; but his conscience was quieter at knowing that the mother bird could bear two pangs more easily than four when she returned to the nest again.

For sixteen long days the mother grouse had been sitting, and she anxiously awaited the welcome sound of a little one tapping at the shell for release. While she had been waiting the blood roots and dog-tooth violets had dropped their petals, the white cornel flowers had turned to a feeble fading pink, the hepaticas and anemones become dingy, and in their places the azaleas and trilliums came out in full sponsal array. The ferns, which fought their way through the resisting cold ground with clenched fists, had now unfolded a generous wealth of fronds under the influence of a spring-time sun which brought harmony for all nature with its presence.

The patient bird had seen the hosts of warblers proceed bush by bush and tree by tree from the southland toward the northland, and it was time for her brood to appear. When at last she heard a faint tip-tapping and saw a movement through a long crack in one egg, it was not long before the gentle aid of her bill had released a cunning little yellow and brown head. Then a small struggling wing appeared, and out tumbled a dear downy chick of a grouse. One after another the eight young birds escaped, and one of them in his hurry to be in the world with us ran around as soon as his legs protruded; and comical enough he looked with the broken shell clinging to his back.

At about this time the old hen over at the farmhouse found under her feathers two chickens that were smaller than any that she had ever seen before, and they were ahead of any calculations that she may have made as to time; but she felt fully responsible for them, nevertheless, and was disturbed because they ran away from her sheltering wings and only returned to her most persistent clucking. The boy, who had been attracted by the solicitous calls of the hen, caught one of the agile scampering balls of down in his hand and held it up to admire the bright eyes and tiny bill that were thrust through between his fingers; but the little feet clutched his fingers so tightly, and the small heart throbbed so fast, that in pity he put the grouse chicken quickly down by the old hen again. What transformation a little warmth had wrought in the cold sense-

less yolk and white of the egg of a few days before, changing it into a beautiful warm little creature endowed with hopes, and fears, and longings, and knowing its friends from its enemies.

But what strange instinct was it that kept leading these two babes of the wood away from the motherly barnyard hen? What did they seek so persistently? Scarce an hour had elapsed since their escape from the shell, and they had wandered out of hearing of the good foster mother to seek a wild mother that would train their wild little natures in full sympathy and understanding. Down into the garden they ran, then out across the lane and into the grass in the meadow. Whither they were going they knew not, but go they must. They were hungry, but there was no mother to teach them to eat, and thirsty without knowing what water was. All day long they ran through the grass and under the rail fences—first brother ahead, then sister—the strange impulse urging their tiny pattering feet ahead as fast as they could go. It was chilly in the evening and their soft down was all wet and bedraggled with dew, and when it became too dark for them to see the way, they stopped by a sheltering stone and snuggled up close to each other with plaintive peeps, but they were too tired to sleep and every now and then the drooping eyelids opened with a start and the chicks pushed closer still to each other and lisped their longings for a mother's warm feathers. On the following morning they could not run nearly so fast, and very often they stumbled and fell over the sticks and weed stalks that seemed to them to offer more and more opposition. The pretty down was roughened so that it stuck together every which way, and all forlorn they were indeed. If one lagged far behind or chirped pathetically when caught in a tangle of grass the other would toddle back and wait, for even such mites of birds felt the desire for companionship in misery. Every few minutes they had to stop and rest, and again on they would struggle, but with such weak, uncertain steps that it was evident that their trifling energies were almost expended long before the cold dew had again soaked and chilled them. They were not so very far from the brush lot where their real mother was, but that night when the two tender little wanderers tried to comfort each other there was not a bit of warmth for them to exchange and they shivered and trembled so that they could not have kept very close together anyway. The morning sun looked down upon two wee wet grouse babies lying side by side in the field. Their eyes were closed, their yearnings had all ceased and no one would have distinguished them from the quartz stones of the field. Such a short experience with life!

All of this while the mother grouse was having care enough with her brood of eight, even if two were missing. They would eat nothing but insects, and it kept the old bird pretty busy scratching over the leaves to find enough for them. In one corner of the brush lot there was a large red ants' nest, and there the chickens had great fun when they had grown to be nimble of foot. The mother would scratch away a part of the loose heap of soil, and then when the ants bustled out, some devoted to angry passions and others hurrying to carry off the long white eggs that had been exposed, the little chickens became so expert at snapping them up that in the conceit born of successful experience they even chased a fly in the absurd expectation of catching it, and the fly was so much surprised at their assurance that it allowed itself to be caught, for such is often the relation of ambition to seeming impossibilities. One needs only to be stupid enough to obtain everything.

The young birds grew rapidly and became experts at avoiding their natural enemies. If a sharp-shinned hawk flew over, the mother gave a warning note, and instantly each chick dropped so flat against the ground that it was impossible for the very best eyes to see one of them. When the farmer's boy again had occasion to cross the brush lot the hen bird had advised the chickens to hide long before he came near them, for even if he had not cared to disturb the little ones, such a boy may accidentally tread directly upon angels if he does not see them, and to lead him away the mother fluttered and limped along the ground, pretending to be lame and unable to fly. The boy knew well this trick of the bird, but she pretended to be so really in distress this time that he floundered after her through the briers. When he was far enough away, however, she took to her wings as usual, and circled by a long route back to the brood again. One cluck was sufficient to cause the ground to spring into life about her, and the chickens were all safe.

A hooded adder that was sunning himself in the dry sheep path one day suddenly awoke and found a chicken quite near him, and although the little thing was too much frightened to run very fast it nevertheless got out of the dangerous vicinity in time and the adder had to console himself with a fat cricket. What luck for the chicken that it was a slow adder instead of a black racer, for the latter would have followed it at any necessary rate of speed, and after mesmerizing it by the cruel charming of cross glides and super-ambient head and fulgurating tongue would finally have ended the vicious play by creeping an ugly gullet over the soft prey.

There was one enemy, though, that came so insidiously that the mother gave no warning note, and it would have availed nothing if she had done so. A great harmless blue heron had just sagged along over the brook in awkward flight, when from his wake came a winged tick, the dreadful lipoptena, buzzing in eccentric lines until he espied the grouse. With devilish precision of aim the uncanny harpy of a thing struck the soft feathers of her back and disappeared among them with an eerie sidewise glide. The very thought of harboring such a parasite was enough to make the grouse shudder, but she feared more for the little ones than for herself. Follow the tick as she would with her bill when a wriggling feather disclosed its locality she could not find the horrible thing, until at evening, when the chicks were gathered about her it huskily buzzed from her breast. She caught it quickly, but could not swallow it, for the tough elastic legs had encircled the edge of her bill, nor could she crush it because the leathery body expanded in any direction when she brought all her strength to bear upon it. Finally the foul tick in the most unconcerned manner deliberately crawled from her bill and with its fiendish directness struck the neck of one of the handsomest of the brood and fastened itself there firmly in the intention of remaining in spite of all remonstrance. On the following day the tick, swelling with the life blood of the chicken, discarded its wings as an evidence of determination to remain, and a few days later it gave birth to a single offspring, full-winged and ready for attack. The young imp fastened itself to the chicken's neck close by its parent, and no matter how hard the mother grouse pulled at them she only succeeded in stretching out their rubber-like bodies and in pulling her little chick off from his feet. Day by day the poor chick grew thinner and scrawnier, while his sturdy brothers and sisters went steadily along in development, and the brood would soon have numbered only seven had not the mother bird fortunately led them far into the dank, cool swamp on one torrid day, where much to their delight was found a patch of skunk cabbage with its heavy fruit. How the mother did enjoy tearing open the green fleshy balls for the seeds, and the little fellows feasted upon the pulp like veritable gluttons, not knowing that at the same time the life of the invalid in their family was to be saved. The pungent aroma had only just begun to circulate through their veins when the young tick loosed his death-like grip and buzzed from one chicken to another, trying to find one that was agreeable, but they were all alike and so it sidled up to a passing rabbit and there found lodgment. In a few days it had discarded its wings and then there was no danger of its troubling the young grouse again. The old tick had tumbled off overpowered at the same time that the young one flew, and that night she was picked up on the sticky end of a toad's long tongue and successfully swallowed. Glory be to the toad!

In July the chickens began to feast upon huckleberries, and when the August blackberries were ripe they ate so many and grew so fast that it soon became time for them to throw off their short suits of soft brownish chicken feathers and to take on the finer colors and stout quills of real grouse. With their change in dress came a change in tastes, so that they no longer cared for insects, but sought instead the ripened seeds and berries and tender leaves, unconscious of the fact that the shooting season was near at hand and that such diet was making them perilously fat and luscious.

As their wings became stronger and their tails grew longer, pride began to appear in different members of the family and quarrels were frequent among the youngsters. They were disobedient, and stayed away from home at night whenever it pleased them to do so. The mother grouse was not much disturbed at this demonstration of independence, for she knew that she had raised a brood of the wildest birds of the forest, and now in September she was willing to leave them to their own resources, satisfied that she had trained them all properly in ways of self-protection.

DR. ROBERT T. MORRIS.

## SNAKES.

IN any publication the heading "Snakes," always attracts attention, and more readers are sure to peruse an article of this nature than those of any other department. It matters not how far the truth is stretched or if there is not a particle of sense in the story or account, nearly every person reading the heading will follow the relation to the end. It is even fair to say that there will be more believers if the tale smacks of the marvelous than where only plain truths are presented; however, there are so many points of a surprising nature, yet founded on absolute facts, that even the simplest biography of one of our scaled, legless friends calls up a degree of wonderment not equaled from recitals regarding any other class of animals. Should any person, prepared to speak, give his tongue range, relative to the many ridiculous notions held about reptiles, the scoring he would get from the ignorant would quickly cause him to learn that believers in the mysterious and ridiculous were still in large force.

It would illy become the writer to cast a reflection on the integrity of the natural history editor of this paper, for I doubt not his ability to determine many facts, and yet readers have seen items hardly consistent with plausible snake lore. Let us say, then, that inaccuracies have crept into this, as they do into all papers, and without reference to them, for we do not wish for a discussion or to be in any way personal, we will proceed to detailing a few observations taken with a view to a study of snake habits. The desire with me to answer many communications in different papers relative to habits of snakes has often been so strong that I could hardly restrain myself, but these remarks are intended to convey knowledge on the subject, and not as a criticism of others' views. All the insight I have had into the subject has resulted from personal observation, and the discoveries thus made have often been so surprising that I have largely forgiven many writers for exaggeration, and I am aware that it is not fair to assert that all persons who write improbable snake stories are snake liars.

Here in Michigan there is but a single species of poisonous snake among twenty-five or more kinds that I know. The dangerous one is the common massasauga or prairie rattlesnake (*Caudisona tergemina*, Say). Many times have I been called upon to decide on a specimen supposed to be poisonous, but always have found that the so-called copperhead or moccasin resolved itself into an innocuous water snake or harmless milk snake. I do not think that there exists another poisonous species in Michigan besides the common massasauga, although the northern or banded rattlesnake (*Crotalus durissus*) is found within fifty miles of our southern boundary in Indiana, and may, for ought I know, occasionally be found within our confines. It is common in Pennsylvania and Illinois.

The common massasauga is far from rare at present in southern Michigan, and in the early days of this (Kalamazoo) county was very abundant. To believe the stories of the early settlers, a low meadow could not be mowed without encountering from ten to a hundred of these poisonous serpents. They grew to an enormous size at that, few being killed less than 4ft. long, and a length of 5 or 6ft. was common; while the smallest number of rattles adorning a tail of this monster (?) species was sixteen, and from that up to forty odd. It may not be best to dispute the stories of the old settlers, for many of them are still vigorous and have their own ways of "argyfyin';" but if their mighty tales cannot be believed, it is best to go into the woods and fields and capture specimens, measure them and note peculiarities. This work, followed more or less assiduously since 1872, has proved and disproved many theories and also given me many reliable facts. I have yet to find an individual of this species 40in. long, and fully doubt if one ever did or ever will exceed that length in our State. The usual length is from 20 to 24in., and not one out of ten will reach a length of 28in. The greatest number of rattles found by me is eleven, and they were on a very large specimen. I did not wonder, as I gazed on its proportions as it lay coiled in an attitude of defense, that the timid should entertain rather strong stories as regards size. Science was to be benefited by a measurement of the animal, and a tap on the head followed by a dislocation of the vertebral column quickly silenced its noisily vibrating tail. This serpent—the most hideous specimen of its kind I have ever met with—measured only 36in. from tip to tip, less by 6in. than I had judged as she lay coiled. It was 6¼in. in circumference.

The number of rattles has never exceeded eleven, and six or seven is the usual number, many specimens being found possessed of only three or four. One that came near biting me was only 10in. long and sported a single rattle. It must not be supposed that the largest snakes possess the most rattles, for although this obtains in the majority of cases, very often shorter snakes have the greater number of adornments, and again the entire danger signal, or a portion of it, is removed by some means. It is an error to suppose that the rattles are shed each year as are the horns of the deer, or that a new rattle is added each time the skin is shed. A friend of mine owned a massasauga over one year, and while the skin was exfoliated the rattles remained intact and without additions. Men who owned rattlesnakes of the diamond species in Florida informed me that an adult might add one or two rattles, that is, sections to the rattle, in a year, or again not any, and that the changing of the skin exfoliation had nothing to do with the new formation. All agreed that the older rattlers of the South were provided, as a rule, with a longer rattle than the younger ones. Said one man, pointing to the six specimens of the diamond rattlesnake, *C. adamanteus*, about 16in. long and possessed of a single rattle and button, as the terminal and growing portion is called, "Those little rattlers were born in this house, and when they were a few weeks old I mounted them as you see them."

Once the pleasure of witnessing the shedding of a massasauga's skin was accorded me in a whortleberry swamp on a hot summer's day. The swamp was full of Indians, mainly squaws and pappooses, and bloodthirsty mosquitoes. In my efforts to keep the mosquitoes at a living distance and the redskins away from the snake in the regular path, the reptile sensed me or something, although as blind as a bat, and wormed into a hole, opening below into numerous ramifications made by the roots of scrub ash and tamaracks. His snakeship again made his appearance, having in the meantime increased the rent in his raiment. Twice more he disappeared during the following hours, and each time reappeared with more new bright skin visible, evidently showing that he made use of his underground retreat to assist in the removal of his external habiliments. The movements of this snake were so peculiar that they are described for the benefit of my readers, as very few will ever have the opportunity of witnessing a wild snake shedding his skin in its haunts. When the ugly fellow was first seen he was totally blind, as could be readily told by the white opaque appearance of his eye, caused undoubtedly by the separation of the external or sloughing cuticle. This covering of the eye is connected with the rest of the exfoliated tissue. As soon as the massasauga had liberated his head from the opening in his external skin a singular performance was enacted, the knowing fellow wormed himself around among the roots and against the bark of trees. One peculiar movement I noticed particularly; it consisted in backing up the base of a small tree tail first, till it was at an angle of nearly eighty degrees, and then suddenly squirming down in its natural way and again circling about among the roots. Occasionally it would apparently endeavor to distend the outer enveloping membrane by swelling its sides with air, and this was more noticeable when the skin was massed over the greatest diameter of its body. As soon as this portion of the body was passed, the process was quickly completed. In this case the operation did not occupy quite three hours in completion, and when finally the wand of Æsculapius came forth bright and shining and entirely free from his external or overcoat, he left that last year's article of wearing apparel lying directly across the hole where I had first beheld him. I have seen snakes in confinement which did not get entirely free from their old clothes for weeks, and then only in sections; and it is not unusual to observe wild individuals running about with various tatters hanging to them, giving a decidedly vagabond air to a naturally graceful creature.

While we are discussing the skin-shedding process it may be well to mention a few observations on the subject, although not directly dealing with the species under discussion. I am satisfied that in the unconfined state, snakes, as a rule, crawl out of their skins, leaving them nearly perfect, but of course inverted and with an invariable rent on the head. So exact are the impressions of every scale in the body and plates of the head, marked on the exfoliation, that one who is used to identifying specimens by this means can readily tell the species from which it came. Although the skin is generally entire, or that is intact at least, it is not always so; for, though it is a natural seasonal condition, it may be modified by some cause. This was noticeable in a gopher snake in the South, where an old wound on the side failed to admit of complete inversion, and consequently the skin clung to it and came away in patches. The skins may be found in June and July and sometimes in late May, and of course indicate by their identity the period of exfoliation of the species to the ophiologist. The skin is at first somewhat moist and may be drawn into shape and sometimes made into quite a fair representation of the original by the use of proper stuffing; but there is no coloring to the exfoliation, showing that the pigment cells lie deeper and that this mask corresponds to the human epidermis or scarf-skin. One use that discarded snake skins are put to, and in fact the only one which I have ever been able to learn of, is that of forming a part of the nest construction of a bird, quite abundant in these parts, known as the *Myiarchus crinitus*, great-crested flycatcher. This bird, which builds its nest in a hollow of a dead limb, telegraph pole or occasionally fence-rail or equally odd place, invariably, in constructing its nest, so far as my observations go, employs a cast-off snake skin. There may be only a piece of skin employed or several pieces,

and occasionally a whole skin, from which the identity of its former possessor may be secured. Two nearly complete skins have been taken, and I have found sections of three skins. It is said that these nests are occasionally found without the customary skin, but I have never found them so. To what deep law this peculiar feature is subservient would be difficult to demonstrate, but that there is a reason for this as in all other selected cases is plain to the thinker, and as a peculiar relation to our subject it may be an excuse to my readers for this digression.*

In tropical countries serpents are known to shed their skins at least twice a year, and I have heard that some exfoliate four times. In the United States the further south we go the earlier we find the period, and in Florida I found some species shedding in March; at a time when Michigan snakes had not left their winter retreats. North of the forty-second parallel the innocuous snakes generally shed in June, but some individuals get rid of their old overcoat and come forth in spring style in the month of May. All of the non-poisonous species change before the breeding season, and I presume the massasauga does also, but cannot assert positively, as I have yet to find an old one accompanied by young. As near as I can ascertain, our massasauga always exfoliates in July, at least during the heated term.

KALAMAZOO, Mich. DR. MORRIS GIBBS.

[TO BE CONTINUED.]

*The ancients invested the serpent with marvelous powers both as to wisdom and as a possessor of ability in divination, and dignified the medical profession by ascribing it to Æsculapius. A bird which habitually makes use of a serpent's mask would undoubtedly have ranked high as a promotor of human weal or woe, and they would have assigned it special powers and attempted an explanation of the peculiar habit.

### Rat and Weasel.

The boldness of a rat mentioned by R. J. T. in a June number of the FOREST AND STREAM suggests an account of the experience of T. J. Thuma, of this city, with one of these animals, which, being cornered, leaped upon the arm of Mr. Thuma and sank its teeth into the wrist. And what is most remarkable, it kept its hold with the tenacity of a thoroughbred bulldog, and could not be shaken or pulled off. An assistant was called, who had to pierce the rat's brain with a knife, giving it its death wound, before it would release its hold. Mr. T. came very near losing his life as a result of the bite.

The weasel often exhibits extraordinary boldness. A lady of Highland, N. Y., had her attention arrested by the cry of a hen with chickens, one of which a weasel was dragging into a stone wall. She thrust her hand into the hole and succeeded in taking the chick from the weasel. But the saucy little thing came partly out of the wall as if to say, "Give me back my supper." Several attempts were made to strike the weasel, but with his proverbial vigilance he avoided the blows. The woman then held a stone just above the hole, and when he poked his head out she quickly pushed the stone down upon his leng neck and pinned him to the ground. N. D. E.

HUNTINGTON, W. Va.

## Game Bag and Gun.

*New Editions: The Gun and its Development, $2.50. The Modern Shotgun, $1. For sale at this office.*

### THE ALMIGHTY DOLLAR.

*Editor Forest and Stream:*

No instance of Indians dealing in wildfowl eggs has come to my notice. Perhaps they find sale for them in some of the larger towns, and from my knowledge of his character he would not hesitate to supply such a demand if it brought him money from the white man—provided the proceeding was not laborious. He has no solicitude for the hereafter in this world or the next—judged by any civilized standard. It is too bad that dealing in illegitimate game, fish, hides and furs, etc., cannot be prevented. The almighty dollar of unprincipled traders has been, and, it seems, will continue to be the main incentive to the destruction of wild fin, fur, flesh and feather of the country.

As long as it is profitable to evade them, our game laws, in localities where game chiefly is, will be evaded. Especially do these facts apply to the destruction of deer and elk. After fifteen years of observation on this coast I am certain that more deer are killed in California and Nevada for hides alone than for any other purpose. Wagon loads of deer skins, representing in their colors every month of the year, especially summer months, come from all parts of the mountains. Any one familiar with the subject can tell by a deer skin when the animal was killed. Why should it not be as illegal for a trader to have in his possession these as well as other stolen goods?

If there were no sale for the hides of deer killed in the spring, at least does with fawn and sucklings would escape. It is illegal to kill spotted fawn, but the traffic in spotted skins is not affected by this circumstance. In Nevada beaver are protected except that Indians are allowed to take them. The Indians bring in the pelts in large numbers and always seem to have captured entire colonies, from quarter-grown kittens up. The Indian gets 10 per cent. for the furs and the trader 90 per cent. The State or the government would make a good investment by by buying the beavers of the Indians before they are taken. But I have gone off at a tangent on this worn subject. A good many ducks nest hereabouts (at the head of Humboldt Valley), but I have learned of no traffic in the eggs. ESAU.

NEVADA.

### Adirondack Notes.

NORTHWOOD, N. Y., July 4.—The prospects for good sport with the gun about here are very encouraging, for numerous broods of young partridges are seen about the clearings and several deer are running about the fields in this vicinity. One was seen less than 200yds. from the post-office one day last week, while a very large buck crosses the creek above Northwood several times a week.

A guide remarked to me not long ago that if the hunters of this place were prevented from going into the woods of the Adirondack League this fall a party of them will go crusting on the league's land during the winter.

Mr. Wm. Lee Fowler, of Holland Patent, N. Y., has three albino squirrels mounted. One is of the gray squirrel family and the other two are of the red squirrel family. Two of them, a "red" and a "gray," are snow white; the other chickeree is of a pinkish hue.

RAYMOND S. SPEARS.

### "IS THIS GOOD TO EAT?"

THE picture of that blue heron is above criticism. It brings to me, however, just a little twinge of conscience, just such a little twinge as all should have who wantonly destroy life. In confessing I may perchance "lay the ghost."

It was my first evening in the "houseboat blind" on Lake Champlain, last October, at the witching hour of twilight, and Elmer and myself were waiting for the last shot before taking in our decoys. No pen can adequately describe the beauty of those twilights on the lake, one has to live them in order properly to appreciate their charm.

'Twas absolutely still, the skimming swallows had long since disappeared, and even the live decoy on its little platform seemed lost in contemplation. The Adirondacks, silent and sphinx-like, flanked the western shore, and while the shadows gathered about their sides, the summits were fringed with gold, that shone like a "halo" through the purple haze of sunset. It was lovely! so tranquil! so restful! Like spirits the herons were winging their way toward their night camps near the march. Elmer used to say "that sometimes he felt too much to speak," and evidently the spell held him on this occasion, for though the gun stood ready to his hand, he heeded not. Suddenly a heron, unperceived till now, loomed close at hand in the dusk.

To fire at the ungainly silhouette was the work of an instant with me. A spurt of flame—the souse of the awkward bird in the calm water—and the foul deed was done; while rolling echoes from the hills seemed to taunt me a moment later.

The after glow in the sky was still sufficient for me to catch the look of disgust which overspread the countenance of Elmer, as with extended hand he congratulated me, in an ironical stage whisper, "Well b'gosh! 'tain't everyone can hit a barn a flyin'." All this I live again at sight of your faithful reproduction of the heron in your issue of to-day.

One word more. Kindly caution that sweet lady who holds the bird in regard to the danger of standing with her gun in the position shown. Accidents will occur, and "a gun is dangerous without lock, stock or barrel." For instance: I shudder to think of the tragedy a frisking dog might possibly precipitate under the circumstances as depicted in the photograph. Of course there are no cartridges in that gun? But it is the unexpected that always happens. WILMOT TOWNSEND.

BAY RIDGE, N. J., July 1.

### UNCLE AIK'S WOODCOCK.

MR. AIKEN GADSBY, of Washington, D. C., although an expert shot, does not always kill his bird, as will appear from the following remarkable capture. About the middle of June Uncle Aik, as we style him, was exercising his young dog on Georgetown Heights and saw him making a beautiful point about twenty or thirty yards away in the brush. Approaching the dog carefully he stepped into a little clearing when suddenly a flushed bird came into the opening so close to Uncle Aik that he made a spasmodic grab for it and caught in his hands a young but vigorous woodcock. The result was a double surprise—it astonished the captor as thoroughly as it did the bird. Mr. Gadsby took his prize home and placed it in a box covered with wire cloth. In the bottom of this simple cage he bored a number of holes. In feeding the bird he puts a lot of worms in a moist spot where the ground is soft and sets the box on top of them. It did not take the woodcock long to solve the puzzle, and it was soon taking worms through the holes as naturally as if it had always got them in that way. When Uncle Aik is making preparations to feed his pet the bird watches him intently, with his head turned first to one sid and then to the other, as if to catch on to the proceedings from all sides. It is a question now which gets more enjoyment out of the feeding, for Uncle Aik watches the boring as eagerly as the woodcock studies the details of preparation. The bird is contented and thriving. Its owner always takes it along when practicing the dog and says the dog makes most beautiful points on the hidden game.

Uncle Aik was the hero of the Virginia deer hunt described in FOREST AND STREAM Feb. 27, 1890, and brought home a whole shirt as a testimony of his prowess in escaping buck fever and the jokes of his mountain companions by killing his first deer. He is well known in Washington as a remarkable fancy shot with the rifle, and while the boys like to speak of him as Uncle Aik, few of them care to venture a trial of skill with him.

CLIFF.

WASHINGTON, D. C.

### Ontario Game and Fish Commission.

As a result of the recommendations made to the Ontario Legislature by the Commissioners appointed in November, 1890, to report upon the game and fish of the Province with a view of protecting, preserving and propagating the same, a permanent Board of Game and Fish Commissioners has just been established. The Commissioners appointed are as follows: Dr. G. A. MacCallum, Danville, Chairman; W. B. Wells, Chatham; Harvey P. Dwight, Toronto; John H. Willmott, Beaumaris, Muskoka; W. G. Parrish, Athens, Leeds county; A. D. Stewart, Hamilton, Secretary. As the above-named gentlemen are all practical sportsmen and inveterate haters of the poacher, pot-hunter and law breaker, some good results are confidently expected.

THE four full-page pictures, Young Mountain Sheep, American Elk, Group of Elk, and FOREST AND STREAM'S Grizzly, from the "*Forest and Stream Animal Series*," handsomely printed on heavy paper suitable for framing. The set of four (in tube) will be sent for ten cents (stamps will do).—*Adv.*

## Sea and River Fishing.

### SALMON FEEDING IN FRESH WATER.

*Editor Forest and Stream:*

Probably no other living man has more earnestly, thoroughly and methodically studied the salmon and trout of the Pacific Coast than Dr. David Starr Jordan, President of the Leland Stanford, Junior, University. Luckily for us, too, he has been able to consider the subject from the standpoint of the thoroughly educated and equipped ichthyologist, supported by the power of the United States Commission of Fish and Fisheries and supplied with such essential if not indispensable facilities for the proper consideration of the subject as only the Commission can furnish. Luckily too, Prof. Jordan seems to be blessed with the happy faculty (so unusual with scientific men) of putting the results of his studies, observations and experience in plain English, as is evidenced by "Salmon and Trout of the Pacific Coast," being Bulletin No. 4 issued by the Board of Fish Commissioners of the State of California. I have just finished the third reading of this Bulletin, and would respectfully suggest to my brother anglers that we might all advantageously study the same until we know it by heart. It is certainly the plainest, most thorough exposition of the subject ever published.

But there is one thing that has not yet been made plain to me; and that is the claim, assertion or assumption that none of our salmon feed after entering fresh water. Dr. Jordan, on page 12 of Bulletin No. 4 says: "When the salmon enter the river they refuse to take bait, and their stomachs are always found empty and contracted. In the river they do not feed, and when they reach the spawning grounds their stomachs, pyloric cœca and all, are said to be no larger than one's finger.

They will sometimes take the fly, or a hook baited with salmon roe, in the clear waters of the upper tributaries, but there is no evidence known to us that they feed when there." Livingston Stone (another eminent authority) at page 479 of "The Fisheries and Fishery Industries of the United States," published in 1884, expresses a like opinion. He says: "After entering fresh water they do not feed, and they continue their ascent until the season for spawning actually overtakes them."

Again on page 480 he says: "The salmon take no food in fresh water. In the headwaters of the rivers, in the clear water, they (at least the males) will take an artificial fly. Even at the time of first entering the rivers in spring the stomach is found empty and contracted." It is known that the salmon ascend the Columbia river at least 800 miles, and it seems that their maximum rate of travel per day is about four miles. I quote from page 14 of the Bulletin: "On first entering a stream the salmon swim about as if playing. They always head toward the current, and their appearance of playing may be simply due to facing the moving tide. Afterward they enter the deepest parts of the stream and swim straight up, with few interruptions. Their rate of travel at Sacramento is estimated by Stone at about two miles per day; on the Columbia at about three miles per day. Those that enter the Columbia in the spring and ascend to the mountain rivers of Idaho, must go at a more rapid rate than this, as they must make an average of nearly four miles per day." Taking four miles as the maximum rate of travel per day, and 800 miles as the limit of their pilgrimage, we find that the salmon has been battling against the currents, leaping falls and putting in full time for two hundred days without a mouthful to eat.

Doubtless it is true that they do not spend much time feeding after entering fresh water, for they are on, to them, an important mission.

While in the ocean they have nothing to do but feed and grow fat and prepare for the great, and to many of them, last journey of their lives.

But the apparent truth of the assumption that they do not feed at all while in fresh water is such a strain upon our credulity that we may be excused for resorting to what may appear to be unreasonable methods of supplying the salmon with the necessary food to sustain them in their long pilgrimage. At Willamette Falls, something more than a hundred miles from the ocean, thousands of salmon weighing from 4 to 50lbs. have been taken with the hook. The lure is generally either spoon or salmon roe, although the fly is sometimes taken, particularly in the Clackamas river, which empties into the Willamette but a short distance below the Falls. It seems that Mr. R. L. Ogden has caught many in the Navara river, California, with the fly. In this country they strike hard, almost viciously, and fight to the last. The great majority of those we catch are doubtless males, and it is possible that they are prompted to attack by the masculine combative proclivity so observable in the male of nearly every species of life during the period of procreation. It has been demonstrated by Dr. Jordan, Livingston Stone and other eminent ichthyologists that no solid food is ever found in their stomachs while in fresh water. But this ought not to estop us from claiming that the salmon may feed while in fresh water upon food as nutritious and strengthening, although not of so substantial an appearance as that of their fattening yards in the ocean; and the fact that the calls of nature demand food for all living things should warrant us in claiming the benefit of the doubt. We know that a human being can live for months if not years on liquid food, and that life can be sustained by even external absorption of nourishment for a considerable time. The first run of salmon, those that are bound for the headwaters, undertake their pilgrimages at a season of the year when they are likely to find a good supply of larvæ and other soft or gelatinous substances that would be very nutritious, while leaving little if any excrementitious substance. Those who follow would have the advantage of the spawn of their predecessors, and we know that they would not be at all backward about appropriating it, which itself, I presume, is very nutritious, for all the various kinds of salmon and trout are very fond of it. They cannot afford to expend the energy necessary to secure active, living food, for they need all that nature has supplied them with and often more to reach their spawning beds, and therefore, under the circumstances, they may be excused for resorting to the food of suckers and other plebian fish, with now and then a royal-coachman, silver-doctor or Jock-

Scott for dessert and as a reminder of their heritage of royalty.

Again, it has been stated by both gentlemen above referred to that salmon have been taken perfectly matured at 4lbs. It is not claimed, I believe, that they are of the same age as the 50-pounders, however, and it is hardly reasonable to suppose that they are. As they spawn at least every second year it would follow that no great proportion of them die after their first procreative effort, for here in Oregon streams you will always find the great big fellows fully as numerous as the small matured fish. Comparatively nothing is known by even the best informed persons about the habits or habitats of the salmon in the ocean, and I believe that much may yet be learned of their habits in fresh water.

Far be it from me to assume to criticise anything contained in Bulletin No. 4. I am "sitting at the feet of Gamaliel" asking knowledge; but I do know that we have great sport at Willamette Falls and in other fresh waters with the salmon by exciting their bumps of alimentiveness with tempting morsels of lazy tinsel; and I know that when once hooked they are active and gamy. A twenty-pounder on the hook in the foaming rapids at the Falls is very entertaining until brought to gaff, as dozens of Oregon sportsmen can testify from actual experience. Only last Friday a friend of mine hooked and properly landed a forty-two pounder, and [illegible] ready to lift both hands under oath that he was occupied by busy with both hands in making the [illegible] and S. H. GREENE.

PORTLAND, Oregon, [illegible]

[illegible]d how they became [illegible]
[illegible]ou that can be give
ANC[illegible]equire much im[illegible]S.
[illegible]and spaniel top
Local [illegible]ou of the spa[illegible]ish.

IT is sometimes a diff[illegible]be remember[illegible]to identify an American fish by a local com[illegible]more compre[illegible]alone, for its country is vast and the local n[illegible] of the Clu[illegible]he different fishes are many and confusing, an[illegible] the same[illegible]ne is asked to identify a European fish by a loc[illegible]ee or [illegible]non name as the only guide it may become a tain Brita more difficult, particularly if the name is the [illegible]o thican pronunciation, expressed on paper, of a foreign word. A gentleman from Pennsylvania who had fished in Germany asked to have a fish that he had caught in a tributary of the Rhine identified by a local German [illegible]ad be. As he was a German himself I assumed that he [illegible]orcpelled the name to give the German sound to the w[illegible]rd. I could not find the name or anything like it in German ichthyological works, and applied to the author of "Fischzucht" for information and failed. The president of the Deutscher Fischerei Verein knew nothing of the fish, neither did Director Haack, but they sought information for me at the very place where the fish were caught and no fish was found that even locally filled the name given to me.

Early this spring I was having a little visit with Dr. Edward Eggleston, the author of "The Hoosier Schoolmaster," etc., when he said that the most delicious trout of all the different kinds of trout was one that he ate in Galway, Ireland, last year. He said that it was caught in the rapids of Corrib within the town limits. That it was not a sea trout, and that it would not, as a rule, take a fly. This information he secured from an English gentleman, who presented a fish to him and called it a "Lenwog" trout. That, at least, was the pronunciation, although it might not be the spelling. Of course I was unable to distinguish the fish unless it might be the British lake trout, *Salmo ferox*, which had run into the stream from Lake Corrib, as our lake trout does in some cases. Mr. Marston submitted the matter to the author of "Where to Fish in Ireland" ("Hi Regan"), but from the name alone he was not entirely clear as to the identity of the fish. Mr. Richard Bradford, of Clonmel, however, is able to throw light on the subject. The name should be spelled "Len Og," *og* being Irish for young or small, and *len* meaning eels, thus "eel-fry trout" or "elver trout," also called "slob trout." They are the ordinary *fario* or brown trout which have been to sea and in returning follow up the elvers or young eels from salt to fresh water. It is an easy matter to have "len og" trout in this country, as the brown trout which we already possess has only to be planted in streams that will give them access periodically to salt water, and the salt water and the young eels, etc., will do the rest, as they now do to our common brook trout when it runs down to the rich pasture of the sea. Upon returning to fresh water the brown trout takes the fly [illegible]rily.

### The Lost Fish.

With a friend I was fishing for black bass in Lake Champlain, and having very good success, too. My friend had a strike, and for a moment the tip of his rod bent downward until it almost touched the water, then the bare hook came back to him, and he sat down on the boat seat with a most lugubrious expression on his face and mourned the loss of the largest black bass that he ever saw. He said he saw the fish plainly, and holding up his hands he indicated its length. I told him such a fish would weigh over 15lbs; but he stuck to his measurement. He sat perfectly dejected, making no effort to resume his fishing, as I [illegible]reached over for his hook to see if it was intact, and with the point of the hook was a fish scale and the scale [illegible]front le[illegible] the body of a big pike, generally called pickerel [illegible]front part [illegible]end was not convinced of the species of his l[illegible]ace are al[illegible]il a scale from a black bass was placed besid[illegible]nstead of a[illegible]le scale on the hook, when he smiled and said [illegible]ould stick to the length anyway.

### Fish Scales.

One hears or reads very little about the scales of fishes, except tarpon scales, and scales for the wings of trout flies, but they are worthy of study if for no other purpose than to find the difference in scales worn by different fishes. Mr. O. Greig, in the *Fishing Gazette*, tells how he is studying scales for a far different purpose. He is of the opinion that the scales of *Salmonidæ* may indicate the age of the fish. That portion of the scale which is free has numerous lines conforming in direction to the shape of the scale, and very like the concentric circles shown in the cross section of a tree, and which in the case of the tree represents its yearly growth. The lines in the scale are very fine and must be counted under a microscope. Of course no result will be obtained that is of value unless the lines in scales of fishes the ages of which are known, are constant. For instance, quoting from Mr. Greig's examples, brook trout, *fontinalis*, of 18 months had 12 lines on scales from the median line; scales from a trout, *fontinalis*, 29 months old, had 18 lines; scales from a trout 33 months old had 31 lines. These figures were obtained by counting the lines on several scales from the same fish. The lines may differ in number when taken from other fish, so that very many examinations must be made to arrive at satisfactory results.

### Thomas Jefferson Vindicated.

I am more and more convinced that it is not wise on all occasions to question a tall fish story—a story that on its face seems, to put it mildly, very improbable. Thomas Jefferson, of Stillwater, N. Y., was fishing in the Hudson River and returned home wet to the skin and said that he hooked a big fish which pulled him into the water from the boat, and very promptly the man with the historic name was classed as an A1 fish liar. A day or two ago a pike of 27lbs. weight was found dead or dying in the river, and in its mouth was found Thomas Jefferson's spoon hook, and attached to his hook was his line. The fisherman had told the truth. He was standing up in his boat and the fish caught him off his balance and pulled him in.

I personally knew of a fishing companion being pulled into the water in something the same way by a lake trout of less than half the weight of the pike. The angler hooked the fish and attempted to stand up in the boat. He was cold and cramped from sitting and the lake was rough, and over he went. The funny part of it was that his boatman who was looking ahead did not see him go overboard, nor did he hear him. The boat felt lighter and looking around the oarsman found himself alone in the boat and it was more than a mile to shore. The boat was backed up and the angler caught the gunwale with one hand and clung to his rod with the other, and fish and fisherman were both saved.

A guide at Schroon Lake told me on one occasion a she came in from fishing, that with a hook baited with crayfish he caught a black bass by hooking it through the eyeball. As he had a reputation for embroidering cold facts when relating his fishing experience, the eyeball story was received with allowances, and I was perhaps the chief of his inquisitors, yet the very next day I caught a black bass hooked in the same manner through the eyeball.

### Lake Trout.

The season for lake trout fishing, when the fish are at the surface of the water, is in the spring, directly after the ice disappears from the interior lakes. At such time it requires but little skill to find the fish if one knows where the deep water of the lake is, and the trout may be taken by trolling a bait without a sinker. The trout remain at the surface but a short time, and if one should continue to fish as the season advances it would be found that more and more lead must be added to the line to get it nearer and nearer to the bottom, until, to be successful, the trolling must be done at the very bottom with a heavy sinker. No longer does every "yank" on the line mean a bite and a trout, for it may mean that the sinker has struck grass, rocks and the other things that go to make up the bottom of a lake. One must know not only where to find trout, but when found must be able to detect the difference between a bite on the hooks and the sinker striking the bottom. I believe there are men who never learn the difference and so condemn deep trolling, or condemn it because it is harder work than surface fishing, and to be successful requires strict attention to business. Just now deep trolling for lake trout in Lake George is rewarded with great catches of fish.

### Lake George Trout.

On the east side of Green Island, Lake George, passengers on the steamers plying through the lake may see a battlemented stone tower rising in the trees above a castle-like structure, which the owner, Mr. E. B. Warren, of Philadelphia, calls a cottage, and which he has named Wapanak. On the south side of the island is an equally pretentious "cottage," called Belleview, which is occupied by Gen. Robert Lenox Banks, of Albany. General Banks and Mr. Warren are president and vice-president respectively of the Lake George Association for the Protection of Fish and Game. It is quite the fashion to troll for trout in summer from a small steamboat, and this year Mr. Warren has a new steamer, Cyric, to replace the Wapanak of last year, and Gen. Banks also has a new steamer, Cricket. For some years the respective boats of these gentlemen have been credited with the finest catches of fish (trout and black bass) made at the lake during the summer season. A letter from Mr. Warren, under date of June 26, says: "We are having a very fair catch of lake trout for this season of the year. Wednesday Robt. L. Banks, Jr., on his steamer the Cricket, caught 21 trout weighing 68lbs.; the largest 9¼lbs. The same day Aleck Taylor and I caught the same number on the Cyric, weighing 70lbs.; the three largest, 6, 7 and 8lbs. Thursday Alec and I caught 11 weighing 42lbs.; the largest, 6, 8 and 10lbs. Friday we caught 9 weighing 46lbs.; largest 8lbs, and the other eight were from 3¼ to 5lbs., which is a large average. From the 10th or 15th of July to the 1st of September we find that the trout bite better and average larger in size. If you can come up Friday and Saturday, I wish to give you a share of the sport." Mr. Warren's guide and fisherman is Alec Taylor, and there is none better at Lake George. Capt. Lee Harris, on the Cricket, also knows the trout grounds from one end of the lake to the other, and is a first-class fisherman in every respect. It must not be understood that because steamers are used for trolling they are a necessity, as a rowboat with a man at the oars answers every purpose.

### Lake George Seasons.

For a few years past there has been a special law for Lake George which provided a close season of four and a half months for pike—the so-called pickerel. Under this provision of the law, and rigid enforcement of all fish and game laws at Lake George, the pike have increased very rapidly and big catches of the fish have been made. Really there seems to be no good reason why a close season should be provided for a fish that increases so rapidly as the pike, for the average number of eggs deposited by a female pike is 100,000, and a big one will furnish 600,000 eggs, when if confining the means of capture to hook and line at all seasons they will increase further than any other hook and line fish in the lake. Many people regard the pike very highly both on the rod and on the table, and this fish should have suitable protection to keep up the stock, and if it is caught only with hook and line I believe there will be no marked falling off of the pike. To be seen it is a mere matter of taste which each one must exercise for himself whether or not he will catch and eat a fish that has just spawned, but it is not the catching with hook and line at all seasons that reduces the pike, it is the spearing and shooting and clubbing when they run into the creeks to spawn. The law which was passed last winter repealed the close season for pike in Lake George, and now they may be caught at any time with hook and line. Week before last George Fish of Locust Grove Hotel, near Bolton, caught eighteen pike at odd times during five days from the dock in front of the house. The fish were in good condition and fit for the table. Some weeks before that time two men stood on a bridge over a creek flowing into Dunham's Bay and caught about 70lbs. of pike in part of a day and their bait gave out before they could catch more. The fish had been up the creek to spawn and were returning to the lake. Here is where the question of taste comes in. When the close season for pike was in force fishing began July 1, and it is now good for those who care for it in spite of the fact that fish have been caught for several weeks. A. N. CHENEY.

## TEXAS TARPON AND JEWFISH.

*Editor Forest and Stream:*

Being a constant reader of FOREST AND STREAM, and noticing the frequent reports of tarpon fishing on the other side of the Gulf, I have concluded to send you the inclosed clippings from our local daily paper of last week, not necessarily for publication, but for your own information and edification, and to use as you see fit. From these reports you will see that we have some opportunities for sport on this side of the Gulf also.

There is very little "scientific" fishing for tarpon here, the general plan being to use a very heavy hook and line, a whole mullet for bait, and, when you have hooked your tarpon, haul him ashore by "main strength and awkwardness." The jewfish is caught with a shark hook and line. They have been more plentiful this year than usual, and have proved a considerable source of revenue as well as sport for the lucky fishermen, as the dressed fish retails here readily for 25 cents per pound, ordinary fish (redfish, sea trout, sheepshead, etc.) being worth here only 5 or 6 cents per pound.

The tarpon are eaten by our Mexican population and considered by them excellent eating.

I hope, before many years, to see this portion of the Gulf coast the favorite resort of the lovers of the rod and gun, particularly those who live in the West and Northwest, it being much nearer and more accessible than the south Florida coast, offering equal, or, as I believe, superior advantages for hunting, fishing, boating and yachting, and being entirely free from the insect pests which are the bane of the sportsman's life in Florida, as I know from experience. J. S. PETER.

CORPUS CHRISTI, Texas.

[From the newspaper clippings referred to we learn that both tarpon and jewfish are caught from the city wharves. On June 14 a jewfish weighing 110lbs. was captured at Sidbury wharf, and on the 19th two individuals of about 90lbs. each were taken at the same place, while on the 15th a fine specimen weighing 75lbs. was "yanked out" at Central wharf. From the same wharves three tarpon were captured on June 14 and 15. On the 17th Perry Lege and Bob Hill caught a tarpon 5ft. 3in. long at Miramar wharf. Tarpon have been plentiful in Corpus Christi Bay and are biting more freely than usual.

The big jewfish may be the one illustrated in our Florida Supplement of Jan. 9, 1890, or the black grouper of Dr. Goode's "American Fishes," page 47. Both of these are giants and both are called jewfish; but the latter has the spiny back fin very high, the longest spine nearly one-half as long as the head, while the former, as shown in FOREST AND STREAM, has very low spines, less than one-sixth as long as the head. The colors are very different, too, at all ages. Perhaps Mr. Peter will tell us which of the two is found at Corpus Christi.

Another source of amusement in Texas waters is the great spotted ray or calico fish, which we think must be the bishop ray. A specimen of this fish weighing 347lbs. was taken in Aransas Bay, June 14; its tail was 13ft. long and its disk 6½ft. wide.

The leaping powers of the tarpon were forcibly illustrated in Aransas Bay, when a 5-foot fish boarded the pleasure boat Alice, flounced into the cabin to the great detriment of the glassware, returned to the deck in a few awkward somersaults, and then escaped overboard before its mad progress could be stopped. How a similar feat was performed in King's Channel was graphically told by E. M. Bryant in the Corpus Christi *Caller*, June 18:

"Capt. Tom Roberts's adventure with the tarpon on board the yacht Alice recalls to mind a similar experience of myself and two other Mustang Islanders some years ago, that was rendered all the more thrilling on account of my enfeebled condition, I being an invalid at the time and so weak that I could scarcely stand. I took passage for Padre Island on the old schooner Highland, bound down Corpus Christi Channel.

"Nearing the quarantine station we entered (close-hauled on the wind) a tortuous narrow cut known as 'King's Channel.' Just then I was standing near the companionway, watching the schooner's course, steadying my weak body by holding on to the mainboom, when all of a sudden a monster tarpon came on board, slightly grazing my left shoulder, turning me half round with the velocity of the touch, and nearly throwing me overboard. Striking the starboard side of the cabin with great force, the glancing blow launched the tarpon swiftly forward, where he brought up against the starboard hatch combing. My brother, Martin Bryant, immediately seized a hand spike and engaged the tarpon in battle.

"Capt. Jas. Grant, Sr., being closely occupied steering the vessel, took no part in the spirited action, while my weak condition rendered me a non-combatant. The violent struggles of the fish threw him into the hold down the hatchway, where he was speedily dispatched. He measured over 8ft., and his large silvery scales surpassed in size and brilliancy a brand new silver dollar. His scales were secured by Mr. Peter Benson, the quarantine officer, and are, I believe, still possessed by his good lady in Corpus Christi as a relic of the adventure."]

## PIKE COUNTY STREAMS.

THE sketch of "Tom's Creek," in FOREST AND STREAM of June 23 is locally interesting, says the Port Jervis *Gazette*, but the writer is all wrong in saying, or intimating, that trout fishing in the brooks of Pike county is not as good now as heretofore. There is no better trout fishing in the streams of any part of Pennsylvania, or any other State in the Union, than there is, this year, in those of our neighboring county of Pike. The writer hereof has had ample opportunity, during a number of weeks past, to see and experience proofs irrefragable that as many of the "speckled beauties" have been caught in the streams of Pike county, this season, as there have been for many years past, within a like number of weeks. He has been there and has seen and tasted the lovely trout, from time to time, and seen the "catches" of friends, during the season, as in former seasons, and knows whereof he affirms.

Several times this season has FOREST AND STREAM published paragraphs and letters in which it has been asserted that trout fishing is not as good in Pike county this season as heretofore, and we hope that this excellent sporting journal will permit us to convince it of its error and that it will hereafter do justice to that favorite resort of fishermen and hunters.

We fully concur with the FOREST AND STREAM contributor in what he says in praise of Mr. Fauchere's inimitable cooking of trout and of his excellent dinners. Mr. Fauchere has few, if any, peers in his line in these parts, or anywhere else for that matter. And we cordially agree with our lively sporting contemporary in all its praises of the charms of the Upper Delaware Valley—its fine drives and beautiful birds, lovely scenery, etc. But we object to our esteemed contemporary's disparagement of the trout fishing in Pike county, or its intimations that such fishing is not as good there as formerly, and we hope that popular paper will publicly acknowledge its error in this respect.

We are not certain who "Harry Hudson" is, but we suspect that he is our friend, Russel Headley, Esq., of Newburg, and that his friends, "John" and "Mac" are John W. Lyons, Esq., of Port Jervis, and Norman Maclean, Esq., late of Godeffroy, now residing temporarily in British India and amusing himself in the cultivation of coffee.

## SALE OF TROUT IN CLOSE SEASON.

*Editor Forest and Stream:*

I notice Mr. A. C. Collins of Hartford, Coun., has criticised my paper read before the American Fisheries Society in reference to Connecticut, having modified her law in relation to the sale of artificially raised trout. I give the law as furnished me by my Connecticut attorney:

SEC. 2499. Revised Statute of 1888 of Connecticut. Every person who shall catch any brook trout except with a hook and line, or shall sell, expose for sale, purchase, catch, or have in his possession any trout except from the first day of April to the first day of July, shall be fined not more than $50, or imprisoned not more than thirty days or both; provided that any person may take trout in waters owned by him, for the purpose of stocking other waters or take and sell any trout reared in such waters.

If the above is correct I think our friend will have his hands full in preventing the sale of cultivated trout in Connecticut at any season of the year, either dead or alive. If I have been misinformed I shall be happy to be set right in the matter.

I think our friend can find little consolation in the opinion of Chief Justice Shaw and others of the U. S. Supreme Court, which he has cited, for it must be acknowledged by every fair-minded man that the public would be greatly benefited to have 500,000lbs. of brook trout raised annually and sold in the markets as a food product after Jan. 15, thirty days after the spawning season has passed, and all objections that have been raised are purely sentimental, or as one sportsman expressed himself to me, that he did not want any trout sold in the market before the opening day, as it would take the romance from trout fishing. The estimated 500,000lbs. of trout to be raised annually in Massachusetts or Connecticut is certainly a large amount; but it is within the possibilities to do. I know of facilities in this town for raising 100,000lbs., and in what are now waste waters, not yielding 50lbs. of trout yearly.

Trout raising is to-day in its infancy, and only asks for a fair chance to become an important industry in many of the States. W. L. GILBERT.

PLYMOUTH, Mass., July 2.

## OHIO RIVER MASCALONGE.

*Editor Forest and Stream:*

At last I am able to exclaim with Archimedes, "Eureka!" For nearly ten years I have been trying to obtain a specimen of the mascalonge of the Ohio River basin, locally known as "pike," and have only recently succeeded in getting one through the zealous exertions of Mr. J. H. Newton, of Newark, O., a member of the Ohio Fish Commission.

Early last April I had a conversation with Mr. Newton on the subject, and he promised to use his best endeavors to secure a specimen. He was more successful than I dared hope for after the repeated failures on the part of others.

In the latter part of April Mr. Newton and Mr. Chas. Heipley, of Newark, proceeded to the mouth of Wills Creek on the Muskingum River, where they met, by previous arrangement, Messrs. John P. and Claude Sturtz, of Adamsville, all of whom were experienced anglers. After a day's fishing on the part of the four gentlemen, Mr. John P. Sturtz had the good luck to hook and land a fine mascalonge.

Mr. Newton packed it in ice and shipped it to me at Washington, where a mold and cast were made of it for the World's Fair. It measured 42in. in length and weighed 18lbs. In coloration it could not be distinguished from the typical St. Lawrence River mascalonge. Its back was dark olive green, a little lighter on the sides, and the belly of porcelain whiteness. The body and fins were marked by numerous dark, roundish spots, almost black.

I had previously seen the heads of some half dozen mascalonge of the Ohio Valley, and expected that the coloration would be similar to that of the same species in the upper Mississippi, or northern Michigan, that is, of almost uniform grayish green, and without the characteristic and well defined black spots usually seen in St. Lawrence River examples. JAMES A. HENSHALL.

### Susquehanna River Fishing.

MR. W. L. POWELL informs us that fishing in the vicinity of Harrisburg, Pa., has not been very good on account of continuous high and muddy waters, but a good many fish have been caught at Newport. Fish appear to be plentiful about Harrisburg, but the conditions are unfavorable for catching them. There has been a good deal of agitation, writes Mr. Powell, regarding the propagation of the rainbow trout; he assures us that a great many Pennsylvania streams have been successfully stocked with this species. In one stream to which he has given particular attention, and in which only mature fish were planted, a good many small ones, five or six inches long, are now being caught, which demonstrates the fact very forcibly that they will thrive in some of the waters of the State.

### The Yankee Fish Hook.

THE "Yankee" fish hook, advertised elsewhere in our columns, although only put upon the market a few months, has already achieved a great success. From trout streams and mountain lakes, as well as from tide waters and the deep sea, come reports of its achievements, and it is safe to say that no more practical or effective device for filling the angler's basket has ever been invented. The fact that it is endorsed by men who earn their daily bread by fishing is the strongest possible recommendation, but if further proof is wanted the reader is advised to send to the manufacturers for sample hooks and become convinced of their merits by personal experience.—*Adv.*

# Fisheulture.

## EASTERN FISH IN CALIFORNIA.

WE are indebted to Hon. Marshall McDonald for permission to publish the following extracts from a letter addressed to him May 16, by Mr. Ramon E. Wilson, secretary of the California Fish Commission, about the progress of landlocked salmon, brook trout and other fish introduced from the East.

The landlocked salmon at the Bear Valley Station "seem to be doing well, and the loss is exceedingly small, but the fry do not seem to grow very fast. They have not yet commenced to take food given to them, although the sac has left them for some time. We intend to put them into a small lake from which we will be able to take them for distribution."

The Country Club planted some brook trout "in one of its lakes one year ago last month. The club received from Mr. Mills, Fish Commssioner of Nevada, 14,000 fry. Nothing was heard of them after they were planted until last month, when some members visited the lake to investigate. They were surprised by catching fish measuring 12in. and weighing 12oz. Since then a few have been caught measuring 13in. and weighing from 13 to 14oz. There is no mistake that the fish caught were the ones planted, as before the planting there were no fish of any kind in the lake. The females are full of spawn, as large as No. 6 shot, and from present appearances it would seem as if they would spawn late in August or in the first part of September. We have had excellent luck with the spawn taken from Nevada and have distributed about 3,000 *fontinalis*, most of them in the streams on the coast. Ir is an experiment and we are afraid they will find their way to the sea and not return.

"We are now taking spawn of the rainbow, and up to date have secured about 500,000 eggs, and hope to raise this to 1,500,000 or even more.

"It has been reported to us that lobsters, which were planted here some years ago, have recently been caught in Monterey Bay. We are now at work trying to confirm the story.

"Our striped bass are increasing wonderfully. One was netted recently weighing 25lbs. Many experiments have been made, especially recently by, skillful sportsmen to take them with hook and line, but thus far without success."

The growth of the brook trout above referred to is certainly remarkable, and probably cannot be equalled in Eastern waters; the average weight of yearlings under domestication is only about 2oz.

The spawning season of the rainbow trout mentioned above is later than usual, on the McCloud River the season usually closed before May 1.

---

Eugene G. Blackford, who was for nearly thirteen years a member of the Commission of Fisheries of the State of New York, and for a great part of that time president of the Commission, is in the city, says the San Francisco *Chronicle*. Mr. Blackford, who is the largest wholesale fish dealer in the Fulton Market, New York city, was appointed by Governor Lucius Robinson, and he held office until Dec. 31, 1891, the appointment of his successor, David Hackney, of Fort Plain, N. Y., who is said to have acknowledged that he "did not know a sucker from an eel," being the last official act of Governor Hill. Mr. Blackford has made a handsome fortune in the fish business, and he is now president of the Bedford Bank, of Brooklyn, N. Y., and a director in three or four other financial institutions in New York and Brooklyn. He has been making a tour of California, spending two or three weeks in the southern part of the State, but for the past week he has been in San Francisco. He leaves here in a day or two for Portland, Seattle and Tacoma, and on June 6 he will sail on the steamer Queen from Tacoma on a tour of Alaska.

Mr. Blackford is an enthusiast on the subject of fish and fishculture. In conversation with a *Chronicle* reporter yesterday, he said: "During the week that I have been in this city I have been getting up early and making a tour of your wholesale fish markets at 5 or 5:30 in the morning. I did that because I wanted to get a view of your fish when they are fresh and before they are distributed to the retail trade, and I have in that way seen a good many things that interested me.

"What did I see that most interested me? Shad. The shad here not only interested but surprised me. Fifteen years ago the United States Fish Commission procured from New York and sent here 80,000 young fry less than half an inch in length in charge of Seth Green. They were planted in the Sacramento River and were the first shad ever seen in Pacific waters. To-day I should say, judging from the price, that shad are more plentiful here than in the East. Within the week the price has been one and a half to two cents a pound wholesale for shad of an average weight of five pounds. I have seen many shad here weighing twelve pounds and one exceptionally large one weighing fifteen pounds. Now I think that is remarkable when you consider that the average weight of our Connecticut River shad in the East is four and one-half pounds, and that the largest of which there is any record is eleven pounds.

"Then, too, I would like to say a word about your striped bass. Only nine years ago there was not a striped bass in your waters. At that time I was president of the New York Commission, and at the request of the United States Commissioners I procured 1,500 small fry about one inch in length. They were sent out here and planted, I think, somewhere near the mouth of the Sacramento River. Now I find them in your markets in such quantities that they are sold as low as fifteen cents a pound. They would probably bring a higher price if your people were as well acquainted with the merits of the fish as we are in the East, where they readily bring from thirty to forty cents a pound when the supply is at all light

"And right here I do not think that it is possible to give too much credit to the United States Fish Commission, and especially to the late Spencer F. Baird, who was so long at its head. In the introduction of the shad and striped bass alone they have given to the Pacific coast a food supply which more than repays the whole expenditure of the Commission since its establishment.

"How does the quality of the fish here compare with the same kind in the East? That depends. I have eaten as fine a piece of shad here in California as any that ever came out of the Connecticut River; but I got it fresh from the water, and it was handled and prepared according to my own directions. The fish, however, as it generally comes to the table of the consumer here is not in as good condition as we get it in the East, and that, probably, is why, as a food, it is not as popular here as it ought to be. Yes, I have heard complaints that the meat of the shad here is soft and mealy and that it has not that firmness which is its characteristic in the East. The complaints are perhaps just, but the fault does not lie with the fish but with the manner in which it is handled. Perhaps it is the high price of ice, or perhaps the unwise economy of those who control the wholesale trade here which operates to prevent the fish reaching the consumer in as good condition as it might and ought to. I notice that little or no ice is used in your fish markets. Now, shad should be laid in fine ice as soon as caught, and should be kept there until out on the stalls for sale to the consumer. It is the most tender-meated of all fish. The fish should be handled as tenderly as a baby and stacked up in boxes in the ice on their backs, edgewise, so to speak. Instead of that I see them here slammed around and thrown into the boxes one on top of another, flat side down and in all sorts of confusion. The result is that [illegible] is broken up and it reaches the consumer soft and [illegible] thing that has [illegible]ntly with the roe, which is the most [illegible] that is the claim, [illegible]e fish, all broken up.

"Halibut? Yes, your salmon fee[illegible] kind of halibut on the Pacific coast, [illegible]an, on page 12 [illegible]t comes mostly from Tacoma and Seattle, [illegible]n enter the ri[illegible]e now getting in New York a large portion o[illegible]aches are al[illegible] from those places. The first shipment we rece[illegible] river they [illegible]e year and a half ago, came in poor condition [illegible] the business for a time, but now we are getting [illegible]ing groun[illegible]arload in improved refrigerator cars, and it [illegible]d to be no[illegible]aper and better than the halibut from Gloucester[illegible] take t During the past winter, up to the time I left New[illegible]e clearwelve carloads had reached us from Seattle and Tac[illegible]o ev[illegible]e carloads averaging 22,000 pounds including ice, or a[illegible]t 12,000 net. The fish sells in New York for about 15 cents a pound wholesale."

Mr. Blackford concluded his remarks by reiterating his belief that in its fish the Pacific coast had an inexhaustible supply and that all that w[illegible]careeded to make our fish more popular as food was more [illegible]anful handling by those who are engaged in the trade.—*San Francisco Chronicle, May 24.*

## MINNESOTA PROTECTIVE WORK.

THE Fish and Game Commissioners are again after the law breakers, and the millers and proprietors of dams who have failed to comply with the requirements of the law providing for fishways over dams. A meeting of the Commission was held at the State capitol yesterday forenoon, at which were present W. S. Timberlake, Vice-Pres.; W. P. Andrus, of Minneapolis; A. F. Ferris, of Brainerd; and Capt. William Bird, of Fairmont. The Commissioners have become aware of the fact that very few mill owners have complied with the State law providing for the construction of fishways over dams. Their excuse has been that the water has been too high to allow such work on the dams. The Commissioners are determined to have the law obeyed and have instructed the game warden to see that its provisions are complied with.

The game warden submitted his report, covering a period from Dec. 1 to May 1. During these months he had conducted a number of prosecutions for illegal fishing and shooting game out of season. In several instances the parties were either fined or imprisoned. He called the Commission's attention to the fact that the law was being violated on Lake Pepin by parties using nets to catch fish. The city markets are largely supplied from this lake and the amount of fish taken in the course of a year is something astounding.

The game warden said that he was unable to enforce the law from the fact that the Wisconsin warden had failed to co-operate with him in the enforcement of the law although requested to do so. Whenever he had attempted to arrest the poachers they would cross to the Wisconsin side. Vice-President Timberlake was instructed to communicate with Gov. Merriam in reference to this matter, requesting the Wisconsin authorities to assist in the enforcement of the fish laws on that lake. The neglect of the Wisconsin game warden to co-operate in this affair is regarded simply as an oversight on the part of that official.

The committee appointed to confer with railroad officials to secure their refusal to transport game and fish out of season reported that the majority of the lines had agreed to this. They considered it [illegible] to their interest to preserve the game and fish on acc[illegible] of the additional traffic they received during the hunting and fishing season. Petitions were received asking that the lakes of the State be stocked with small-mouthed bass, of which the Commission has a large stock at the hatchery below St. Paul. The request of the petitioners will be complied with.—*St. Paul Pioneer Press.*

Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

## SPANIELS USED FOR FIELD SPORT.

[*Continued from Page 83.*]

THE IRISH WATER SPANIEL.

THE origin of the water spaniel has been a source of considerable speculation, each variety having characteristics foreign to the other kinds of spaniels, and there being no great resemblance between the three or four breeds of water spaniels at one time found throughout England and Ireland.

It is scarcely likely that the Spanish pirates, who occasionally landed on the west coast of Ireland, had sporting dogs with them, although sometimes the serenity of things generally and the attractions and hospitality granted to them very frequently turned foraging expeditions into friendly visits.

Besides the Irish varieties of water spaniels did not more nearly resemble spaniels of the orthodox kind, than those found in England. There was no dog common to Ireland that could be crossed with the land spaniel for the production of a new variety, such as the present Irish water spaniel, and hence there is no alternative but to revert to the introductory remarks regarding the difference of type and character and the probable cause for such in the land spaniel.

If we look to those countries through which the spaniel passed before getting to England we find that there is a curly water dog called the Barbet, which has many points in common with the water spaniels. The first point of resemblance is the unkempt appearance. Then there is the inclination to curl in coat, the same instinct and overpowering fondness for the water, and one feels disposed to ask why there should have been any question as to the origin of the water spaniel. Still the two kinds are not entirely alike and it may be asked how they became classed as spaniels? The best explanation that can be given to the former query is that it does not require much imagination to conceive that the Barbet and land spaniel together are responsible for this multiplication of the spaniel family. As to the latter question it may be remembered that the word spaniel was at one time far more comprehensive than it is at present, and as in the case of the Clumbers, it did not require the marriage of two of the same family, for the transmission of a name.

When there were three or four kinds of water spaniels struggling for existence in Britain, Mr. MacCarthy took in hand those more common to the south of Ireland, and succeeded in establishing a uniform variety, which is now the only one worthy of attention.

Mr. Justin McCarthy was very much attached to his kennel of water spaniels, and nearly fifty years ago had so far succeeded in securing a sporting dog suitable for the boggy districts, whose liking for the water, hardihood, hunting instinct, and intelligence of no ordinary nature, were just as essential as the foundation, as retrieving and other points were necessary accomplishments.

In striving for the production of a strain unrivaled in these respects, he did not overlook uniformity, and he was soon able to insure a dog, about 22in. at shoulder, with a thick-set sturdy build, supported by legs as straight as gun barrels, and larger than other dogs of his size, a coat of a dark liver, with a short curl, not exactly like the negro's head or that seen on one kind of French poodle, nor yet similar to the tagging of the other variety, but more of a crinkle. The ears were pendulous and rather well feathered like other spaniels, but not excessively so, like the poodle. The feet were webbed to the fullest extent, and the tail a few inches from the stern, was not covered with more than sufficent hair to cover the skin, and tapered to a fine point. The face and the front part of hind legs were simply covered with short hair, and as the eyes were a bright amber color, the McCarthy spaniel presented almost a grotesque appearance, but sportsmen of those days were sportsmen indeed, and though they were ever admirers of beauty, it was utility which they chiefly secured in adopting this strain, that soon proved its fitness to survive.

Some of the chief patrons of the breed were Capt. Edward Montresor. Mr. J. S. Skidmore, Sir W. Verner, Mr. Tallico Macarthy, Mr. J. M. O'Neil, Dr. Tuffnel, Capt. Keyes, Mr. Tollemache, Sir H. Mark, Lieut. Cole, Sir H. Massey, Mr. Philip Hill and the Earl of Howth.

After a time there was an attempt to improve this dog to make him more attractive for bench show purposes, when a cross with the French poodle was tried, which resulted in what might have been expected in attempting to caricature the grotesque. It soon became necessary that the coat should be ragged, and unless there was the necessary amount of poodle blood this was unnatural, and could only be imitated by allowing the growth of coat to remain, till at last vermin collected, and as exhibitors dared not clean their dogs properly without risk of spoiling their chances at the shows, it became an evil which the Spaniel Club of England was asked to remedy, and as Colonel the Honorable Le Poer-Trench championed the cause, matters have been much improved.

To detect the poodle cross it is only necessary to examine the parts which should only be covered with short hair, for unless the dogs are tampered with they are found to be about evenly covered on the front legs, which is not right; to be thickly covered on the front part of the hind legs, and less clean on the tail and face are also wrong, besides the eyes are often a dark hazel instead of an amber.

The Irish water spaniel, like all kinds of spaniels, is an excellent general purpose dog, good on all kinds of game, all conditions of land, whether in marsh or upland. He is, par excellence, a duck dog and a retriever, and in sport or as a companion, he is very sagacious and obedient. It is not surprising that in a country like America his usefulness should soon be appreciated, and there is no doubt that as the Eastern States get "cleaned up" and sportsmen have to seek other grounds, a still greater value will be attached to this variety of the spaniel family.

---

HUNTING DOGS, when they grow old, become rheumatic, or at least debilitated with pains. We know, too, that they crave heat, and get as near the fire as possible—a craving which increases as they grow older. One such dog, older than the others, and slower in getting into the lodge on returning from the hunt, was often crowded away from the fire by the other livelier dogs getting all the best places before him. Finding himself thus turned out in the cold, he would dash toward the door barking, when the others, supposing it was an alarm, would rush away too, while the old rheumatic went to the fire and selected a place to suit him.—*Revue Scientific.* A similar experience occurs to us on reading the above. Toy spaniel fanciers will remember Duchess, that capital little Blenheim spaniel that went the round of shows a few years since. She was of course a great pet and fancied herself entitled to all the luxuries of this life. We

CHAMPION SHAWN (K. C. S. B. 26725).

had a fox-terrier, unknown to fame, still none the less a pet. Sunny mornings in winter, because of a sunbeam that came through the curtains on a certain spot on the hearth rug, the sitting room was a favorite lounging place for the dogs, and

CHAMPION HARP (K. C. S. B. 23578), AFTER A DIVE.

the Duchess usually appropriated this sunny foot of space for herself. The fox-terrier also had an eye to its soothing influences, and should he by chance be first on the spot and Duchess find him there, she would walk round him a few times pretending not to notice him, when all of a sudden she would rush to the front door, barking vociferously until Dick came out to see what was up. Then the Duchess trotted quietly back to the sunbeam, and it would have taken two fox-terriers and a host of possible beggars or tramps to fool her out of the vantage ground. This did not happen once, but many times, and the terrier never seemed to grasp the situation.

## "THE DOG IN HEALTH AND IN DISEASE."

THIS is the title of Dr. Wesley Mills's new work. In this book the author explains that for the student or breeder to form a correct idea of treatment in disease they should have a knowledge of the dog in health, and to this end he deals very extensively and minutely with the standards of the different breeds of dogs and explains all their physiological characteristics. The standards of nearly every breed of dog are given with intelligent explanations. From this the author passes to the care and management of dogs in health, breeding, rearing, and in fact everything that pertains to the dog from puppyhood to old age.

In describing the different diseases the dog is heir to, the Doctor has treated the subject very elaborately, but at the same time more with the view of its being a guide to the breeder rather than the students of veterinary surgery.

In glancing cursorily through the work there are several points in which we would differ from the Doctor in general treatment. On page 143 Dr. Mills says the bitch may be washed the first week after whelping, but even "if all goes well" we should say this is risky, especially with long-haired dogs. In dealing with foster mothers the author hardly lays sufficient stress on the foster mother being healthy; attention should be drawn to the fact that she must be free from mange and distemper, and there should be no risks of her carrying the contagion to the latter. There is no mention made of cats as foster mothers. They are very useful, especially for the smaller breeds of dogs. Attention should also be drawn to the fact that the foster's puppies should be as near as possible of the age of those to be adopted. In treating of diseases of the respiratory organs the Doctor recommends at the moment of chill, among other things, an ounce of whisky; this we should say is too much, and would very likely cause vomiting. In treating the diseases of the genital organs the author might have mentioned chronic balanitis, a common affection accompanied by a constant slight discharge from the sheath.

Regarding rabies, Dr. Mills omits the first and an important symptom—loss of appetite. In diseases of the skin several prescriptions for ointments are given, two of which contain morph. sulph.; but we should question the advisability of their being freely applied. Ointments containing morphia should be very sparingly applied. In speaking of the causes of rickets, the author upholds the heredity theory, but this is far from being the generally accepted cause; it is largely a matter of diet, and to be cured by dieting. Regarding distemper, Dr. Mills remarks that the disease is apt to break out in kennels during wet or cold, or during muggy weather. This weather has little if anything to do with it, no matter what the weather is distemper will not break out in a kennel unless the contagion has been carried there by some means or other. In dealing with anæsthesia, the author asserts that "dogs are extremely liable to die under chloroform—so much so that it may be laid down, as a rule, that its administration is contra-indicated." This position we beg to question. Our experience has been that dogs are not so extremely liable to die under this anæsthetic, but rather the opposite. It is preferable to ether, as the latter is more irritating and also causes more struggling before anæsthesia takes place. We quite agree that both should only be administered by an expert. There is little else to criticise in the work. Most of the principal diseases are accompanied by illustrations showing the parts under discussion. Altogether, the illustrations of the different breeds of dogs are better than anything that we have yet seen in any similar book as they represent dogs that are now winning on the bench either in England or this country, and of course go far to enhance the appearance of the book. Altogether the work is one of great use to the breeder and the veterinary student, and one that should find a place in every dog man's kennel shelf and library. The price is $2.25.

## JUDGE, REPORTER, EDITOR, SUPERINTENDENT

*Editor Forest and Stream:*

"And still the wonder grew that one small head could carry all he knew."

The quotation rises unbidden to the lips as we regard the fourfold combination in our title and see one fallible mortal attempt to fill all these offices. There is much discussion now in the papers anent shows, so it may be a good time to touch on what is a veritable abuse of office, an anomaly, almost an impossibility.

The judge's work needs no detailed explanation. His reasonable knowledge of the classes under his charge is a foregone conclusion—or should be. The reporter's province is simple, if he will let it be what it should, but he is apt to complicate it by acting critic also, and in place of giving us an intelligible account of the awards, and description of the dogs and their surroundings, he makes himself a judge of the judges and stabs with his pen their "mistakes," knowledge of which too often he gleans from disappointed exhibitors or interested spectators.

How else should the reporter know them unless he be a man learned in all classes of dogs, thoroughly posted on "points" of the possible forty breeds represented at a large show? By the time he has accumulated all that knowledge his span of life must have stretched into one longer than that usually represented by the brisk knights of the pen whom we see about the judging rings.

But never mind knowledge, let us be critics, say they; so the confiding public is bewildered to learn that the beauteous bulldogs it has admired as first prize winners are unworthy of notice and that quite the worst pointers have been given the best places. If Cato is present in the catalogue, though absent from the exhibition, it sometimes happens to that happy canine to be described and criticised all the same, while the catchy word, the meaningless phrase, does duty repeatedly, until we wonder why "well-defined" applies to a St. Bernard's skull as well as to a ring on a turtle's back or a limit of a boundary fence.

If the reporter has also acted as judge it is hardly in human nature not to exalt his own awards, if not to decry those of other judges. When he is judge, reporter and editor altogether the climax is reached and he must be a remarkable "all-round" man who can fairly, intelligently and ably conduct himself in the affairs of each.

To be judge and superintendent at once demands the impossible and in the effort to achieve it disaster must ensue somewhere. To perform two different sets of duties at the same time, to be in two places at once, to do and undo simultaneously, he must be more than mortal who succeeds in this.

The club so poor as not to afford a superintendent to superintend and nothing else may presently find none so poor as to do it reverence.

Who points out failings should at least suggest a remedy. Some aids to present ills may be in having each judge write his own report of his classes briefly, but explaining difficult decisions as space allows, and noting good and bad points for the instruction of the inquiring reader. Signed with his name it carries the weight of the writer's character.

That this adds to his labors is true, but it would be worth its cost in many ways. Let the reporter report, and also sign his articles, that the public may know of his knowledge and write, or not write, him down a Dogberry.

And when the critic sharpens his pen and attacks the error or misjudgment that stirs his reason rather than his personal feeling, let him too name his own name, that his criticism may stand in full strength, and if "offense be took" it may be in the right quarter. OBSERVER.

---

The Sheffield (Eng.) show is said to have been a great success. Many of the best known dogs were on hand. The entries numbered 1,053, an increase of 277 over the last show held in the "Cutlery" town in 1885. Mr. James Mortimer was present and we are pleased to hear that Mr. George Helleswell, the well known and deservedly popular English judge, had so far recovered from his severe illness as to take part in the judging. Among the specials given was one for the "fattest fox-terrier." This is a novelty and hardly one to be encouraged. It was won by a poor brute that could scarcely toddle.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—Mr. Mercer in last issue of FOREST AND STREAM seems to doubt the correctness of the cause I assigned for Mr. Middleton's resignation as a member of the Ottawa committee. The following letter should satisfy him: "OTTAWA, June 7.—H. B. Donovan, Esq., Sec'y C. K. C., Toronto: Dear Sir—Mr. W. H. Middleton has tendered his resignation as a member of our bench show committee, and at a meeting held Friday afternoon it was laid over until an answer had been received from the C. K. C. executive as to whether the disqualification of his partner, Mr. Mercer, affected him. I have been instructed by the committee to say that in their opinion Mr. Middleton knew nothing whatever of the Little affair and that it was done without his knowledge or consent. Will you kindly bring the matter up at the next meeting and let me know the decision. Yours truly, ALFRED GEDDES, Sec'y." Is further proof necessary?

A bench show will be held at Winnipeg, Me., July 25 to 29. The following classification is provided: First prize of $5 to both dogs and bitches in mastiffs, St. Bernards (rough and smooth), Newfoundlands, pointers, English setters, Irish setters, Gordon setters and collies. In the following dogs and bitches have to compete together for one prize of $5: Great Danes, greyhounds, deerhounds, cocker spaniels, retrievers (smooth and curly), bulldogs, pugs, fox-terriers (smooth or wire) and toys. A prize of $5 is offered for the best kennel of foxhounds, not less than two couples; diploma for best kennel of sporting dogs (either setters, pointers or retrievers), also diploma for kennel of non-sporting dogs. Entrance fee is but 50 cents and judging commences Tuesday, July 26. The name of the judge is not announced. The show will not be held under kennel club rules. More's the pity!

A resolution on the books of the C. K. C. says that a mail vote of the executive committee shall be taken when requested and necessary. This is being done for the first time in the case of clashing of dates of Kingston and Montreal shows. The voters are asked, in a circular sent out by the secretary, to vote yes or no as to whether Kingston or Montreal should have the dates claimed, or both hold a show the same week under C. K. C. rules.

I had a long interview with Prof. Wm. Saunders, commissioner for the Dominion to the World's Fair. I went into matters pretty fully with him regarding Canadian dogs at the fair, and one result, I am glad to say, is that the Dominion government will bear the expense of the $1.50 entry fee on all dogs sent from Canada. A knotty point is the selection of fitting representatives of each breed—as the commission desire quality much more than quantity. This selection will probably be referred to the C. K. C., and that body will be asked to propose a plan whereby representative exhibits may be selected by competent men from all over Canada, though it is probable the entry will be largely if not entirely confined to Ontario and Quebec.

Mr. H. W. Fores, Toronto, leaves for San Francisco this month to occupy a position in the Western Assurance Company, with which corporation he is identified. He takes a brace of his fox-terriers with him, the dog Pickles, a winner here, and the brood bitch Kismeth.

A meeting of the executive committee of the Canadian Kennel Club will be held here at the Queen's Hotel on July 8 at 8 P. M.

At a meeting of the Toronto Kennel Club, held June 29, it was decided to apply for incorporation to the local government. A club room will be rented in a new uptown building to be ready in August, a "Question and suggestion box" inaugurated, etc. The subject for debate at the next meeting will be: "*Resolved*, That the dog is more deserving of admiration than the horse." A lively time is expected.

H. B. DONOVAN.

## POINTS AND FLUSHES.

CHICAGO, July 2.—In the past few weeks there have been several cases reported in the daily papers here of mad dogs, dog bites and hydrophobia, newspapers apparently developing epidemics quite as much as communities of individuals, the Chicago daily papers having at present the mad dog scare. Not that it requires a real and genuinely mad dog to serve for the basis of a sensation—a dog in a fit; a dog so teased that he becomes angry or bites to defend himself; a dog in ill temper—any of these furnishes ample material for the reporter in search of a sensation. As to whether the dogs are mad or not, the reporter does not care. To simply write that John Smith's son was bitten by a dog would be only of local interest; but to publish that John Smith's son was bitten by a rabid dog which was last seen running up the street biting at people and horses promiscuously commands the earnest attention of everybody. The particulars are generally collected from people who know nothing whatever of the symptoms of rabies, or the symptoms of any disease which afflicts the dog, and no small part is collected from hearsay.

The following is taken from a Chicago daily paper of June 30 and refers to a recent event of the kind under consideration: "The Cook county hospital authorities have not yet decided whether or not the case of Joseph Schwager, who was bitten by a dog some weeks ago and died in terrible agony, was really one of hydrophobia. A post-mortem has been held, but no satisfactory conclusion could be reached from it. 'In order to settle the question,' said one of the hospital authorities, 'it has been determined to inoculate some rabbits with virus from the body of the dead man. If he really suffered from hydrophobia the poison will get in its work and in fifteen or sixteen days the rabbits will unmistakably show the evidences of the disease.'"

While the uninformed spectator feels competent to diagnose the case of any dog at a glance, the skilled physicians can only determine the matter by the most elaborate tests.

I once saw a dog running about blindly and wildly, on Madison street, this city, he having just recovered from the worst stages of a fit. His jaws were frothy, eyes wild and actions unnatural. He ran in erratic lines to and fro in the street. A crowd soon gathered, the cry of "mad dog" was raised, missiles were thrown at him and excitement was general. In his sickness and bewilderment he ran under a passing street car and was crushed to death—a lamentable ending, but perhaps more merciful than the policeman's club or uncertain bullets. The event was considered a lucky ending of a mad dog, yet the dog was not mad.

The Pearl of Pekin—Chicopee Lass case appears to drift further away from final action, and to become more complicated as time passes. There is a lamentable want of backbone displayed by the committee, as well as tiresome procrastination. Either Pearl of Pekin was run over or was not; yet, after nearly nine months have passed and after profound official evasion of the matter, the case is more complicated than at first, and still unsettled.

Mr. Bartels' letter of last week shows a remarkable phase of the case. It would seem that an executive officer of the club, if he performed his duty properly, would devote his energies and influence to the welfare of the club; and that he would in particular, in his official capacity, do his duty conscientiously as such officer. According to the quotation by Mr. Bartels from Mr. Lowe's letter, the latter gentleman being a member of the executive committee, the main idea pervading the letter was not so much an answer to Mr. Bartels' inquiry as it was an earnest effort to suppress everything pertaining to the matter till it could appear in his favorite journal. He sacrificed his duty as an officer to further a personal motive. His duty to his club, to the parties directly at interest and to the public from whom the club must look for its support and success, required that he should make the matter public through all the recognized channels, instead of suppressing it for weeks to accomplish a personal favoritism entirely apart from the issue and from his official capacity.

Will such a policy develop the coursing interests at large and in the best manner?

Is an officer of the executive committee supposed to carry his personal likes and dislikes into the club's affairs, and give them prominence over important club business?

The whole course of the executive committee in this matter has been one of shilly-shallying inefficiency and evasion. Not that there are not able men on the committee, but that in respect to this matter they have not acted. They are able men, for they are quite as able not to act as to act if it so pleases them.

The whole matter should have been settled within a day after the close of the meeting. So far as the executive committee is concerned, that committee's special strong point appears to be in referring the matter to some one else.

B. WATERS.

## DOGS AND DOG SHOWS IN ENGLAND.

THE interviewer is said to be an essentially American production, but has also now become a necessary adjunct to journalism on the other side, and *Stock-Keeper*, with its usual enterprise, succeeded in interviewing Mr. Mortimer as to how things dogly strike him in old England. The scene was the Harlow show in Essex. After the usual taffy the writer gets down to business, and as Mr. Mortimer is generally credited with a level head, his remarks on the English side of the question may be of interest. After touching on the duties on dogs exported to this country, and expressing the conviction that the A.K.C. will still be able to have the restrictions materially modified, Mr. Mortimer was asked what he thought of English shows, and we are glad to see that in the case of the Kennel Club show he gives good advice, for instead of having the sporting appliances on the ground floor and the dogs upstairs, he would have reversed the order of things and so done away with "all the tramping upstairs" and the dogs have been more comfortable.

The manager of the New York show also gave them a wrinkle on getting the public up to show fever heat through the aid of the daily press, which we well know over here can pretty well make or mar a show. Asked as to his opinion of the English dogs at the shows he had attended, he remarked, "What has struck me so far are the large classes of collies and fox-terriers you have here, and the St. Bernards are also good, and bob-tail sheepdogs wonderfully so; indeed, I don't think they have yet seen anything like them over with us. We have so many of the lurcher type, you know." This remark may not have been quite as Mr. Mortimer put it, as a bob-tail of any description is a rarity at our shows nowadays.

About sporting dogs in England, he said:

"I have seen some very good ones of those since I've been over, and I think they are ahead of ours by a long way; that is to say, they are a more even lot than we have."

"How do you, as an old pointer man, like champion Saddlebags?"

"Well, I have seen him before, you know, when I was over in the Jubilee year. Of course he was got by Naso of Upton, a son of Naso of Kippen, whom we had over in our kennels when I was at the Westminster Kennel Club. I I think Saddlebags a grand dog, and a better pointer than Graphic ever was, and I tell you why. You see, he has a better loin, and he beats Graphic in hindquarters, stern and carriage of stern."

"And any others?"

"Oh, yes! You have several others excelling in character, legs and feet. Devonshire Nero is another one I thought a very good little dog."

"How did you like the Gordon setters at the Hall?"

"We could a few years back have showed as good a lot in America, but they are getting them too coarse now, and breeders there could with advantage take a leaf out of Mr. Chapman's book, for I see he is getting a lot of quality in them."

"And the Irish setters?"

"Well, I thought several of them very small, which I fancy is to be regretted, although there were some exceptions, and I liked the winning dog." (Harlech.)

"And how do our setters compare?"

"Well, you see, it is like this; our setters are so mixed up in America. They—the Americans—pay more attention to shoulders, legs, feet, and style than they do to coat in England. The Llewellyn setters have proved themselves excellent dogs in the field, and that is the reason they are so very popular with us."

"And in judging them?"

"To tell you the truth, our great trouble is that we have a job to make our judges understand they are judging according to a standard. They often lose sight of this fact altogether, for they have seen the dogs work in the field, or know they are good ones there, and therefore become prejudiced."

"Our fox-terriers, what do you think of them?"

"I think they have improved vastly, so far as I can see since I was over last. There are more good ones about, and they certainly appear workmen, too. I fancy they are on the leg more, but shoulders, fronts, legs, feet, and heads have come on greatly. Most of them, however, are inclined to be leggy, but that good and real terrier head is coming back again, and breeders are to be congratulated."

"Have you any shows like this—Harlow?"

"Oh, yes! Of course we call them fairs, and dogs are being gradually taken in as one of the attractions, not only in America, but Canada. It's growing at a great rate, I can tell you."

And then we are told a little news about Mrs. Mortimer, who it seems takes a great interest in Sealyham terriers, those game little dogs from South Wales that Captain Edwards makes a specialty of. Mrs. Mortimer came from Fishguard, Pembrokeshire, which is near the old mansion of Sealyham, and the least Mr. Mortimer can do now is to bring a "Sealyham" back with him and incidentally allow Americans to see what they are like. Mr. Mortimer afterward was to spend some time in Devonshire among the pointers of that famed county, and from there intended to take in the Sheffield show, which took place June 22 and 23.

## DOGMATICS OF DOGDOM.

Many dogs work well regardless of any standard.

—§—

Dogs differ from men and mules in that they are not kickers.

—§—

Some men never discover how pretty, intelligent and well bred your dog is till they want to borrow him.

—§—

What does blue blood mean as applied to a dog?

—§—

Some people will blame a dog for barking all night without reason, yet the same people will thump a piano all night regardless of the dog's feelings.

## NEW ENGLAND FIELD TRIAL CLUB.

A MEETING of the board of governors of the New England Field Trial Club was held at 266 Washington street, Boston, Mass., Tuesday, June 28, at 2 P. M., president W. A. Power in the chair. Present, Messrs. Power, Hayward, Lovell, Tucker, Wells and Osborne.

In the absence of the secretary Mr. Lovell was appointed secretary pro tem. Minutes of last meeting read and approved.

Chairman Hayward for the committee on judges reported the formal acceptance of Messrs. N. Wallace, of Farmington, Conn., and Washington A. Coster, of Saratoga Springs, N. Y.

This report was accepted.

The report of the committee on advertising was accepted. Mr. A. M. Tucker, for the committee on game, reported progress. The resignation of Mr. George E. Stickney, as secretary, was read, and on motion accepted. Voted to proceed to ballot for Secretary to fill the vacancy caused by Mr. Stickney's resignation. Ballots were cast and counted, resulting in the unanimous election of Mr. E. Knight Sperry, of New Haven, Conn. Voted that all the existing committees be discharged and the following committees be established:

Finance.—President W. A. Power, Dr. J. W. Hayward, A. M. Tucker.

Auditing.—Dr. J. W. Hayward, J. C. Sharp, Jr., Wm. C. Davenport.

Publication.—President W. A. Power, C. P. Curtis, Jr., Geo. W. Lovell, E. Knight Sperry.

Transportation and Accommodation.—President W. A. Power, A. M. Tucker, Dr. J. W. Hayward, Geo. W. Lovell.

Membership.—E. Knight Sperry, John C. Sharp, Jr., F. W. Whitlock.

Prizes and Specials.—F. W Whitlock, Arthur R. Sharp, A. M. Tucker.

Legislation.—Dr. J. W. Hayward, A. Tucker, C. P. Curtis, Jr., W. C. Baylies.

Grounds and Game.—D. A. Goodwin, Jr., Dr. J. W. Hayward, A. N. Tucker, Geo. W. Lovell.

Rules.—E. O. Damon, Arthur R. Sharp, C. P. Curtis, Jr., A. M. Tucker.

The meeting then adjourned.

The next meeting of the board will be held at 266 Washington street, Boston, Tuesday, July 12, at 2 P. M.

## RETRIEVING AT FIELD TRIALS.

*Editor Forest and Stream:*

You ask for my views on retrieving by pointers and setters in the field. I do not think that the act of taking up in the mouth and fetching a bird can be any more injurious to a dog than being allowed to find a dead or crippled bird without retrieving. The actions required in both instances are precisely the same, excepting the mere act of fetching. Any one who has ever hunted dogs in the field knows that the anxiety to find dead birds is just as great in the dog that does not retrieve as in the one who does, if the former has been used and encouraged to find the game killed as the latter has been. The great objection in both cases is that so many birds are flushed in the search and anxiety to find the dead or cripples. Every dog used by a good shot thinks there is something always killed when the gun goes off and is never satisfied until he finds out, and consequently in his search often puts up birds that under other circumstances he would have pointed. I think, however, that any sportsman would rather see ten birds flushed and go away unharmed than lose one dead or crippled bird, therefore when I have no other retriever I prefer a pointer or setter to retrieve. Had I a proper retriever I then would not want the others to move from their position until the retriever's duties were over.

I have seen setters quite equal to the best retriever I ever saw, both on land and water, and in no way injured in their field work by retrieving everything killed over them, even to wild turkeys and geese.

Where so many different opinions exist as to what constitutes a high class dog, like many others I have also an opinion—that is, the best gentleman's shooting dog is precisely the dog the old-time market-shooters (or pot-hunters, their more modern name) delighted to own. Speed, nose, dash, intelligence and endurance were the qualities sought after With these men it was a business, and as in all businesses of to-day they wanted to make the most out of the least investment; the fast, dashing, intelligent dog was the favorite, other qualities being equal. Then as to-day the fastest dog always found the most game by getting there first, and if he failed in doing so then he was lacking in some more useful quality than speed which another less speedy possessed. Life was considered too short to trifle it away in watching a dog run that could find nothing; we were out for the frequency of the occurrence, rather than the quality of the performance.

A gun that made a remarkable target and went off once a day would soon have been cast aside for one that went off on every opportunity, making a regularly fair target. We never knowingly left a country abounding in game to go into one where game was scarce, because the scenery was a little prettier in spots a long distance apart, our eyes always got tired and our guns heavy when the loads were carried too long. We had no colored boys to carry them, nor wagon to meet us with fresh relays of dogs. A man and dog that could not stand one full day through and through at a moderate rate was considered as belonging to the effeminate order. We wanted our dogs to cut out an open country at a slashing rate, ranging far and fast, and always hunting to the gun. When taken on to marked birds or into cover, to hunt as close and active as spaniels under full control. The proper use of pointers and setters is to find and point game, and the one possessing the greatest combination of qualities to enable him to do this to the advantage of the shooter, in the least time and with the least exertion to the sportsman, is the best dog for my use.

JOHN DAVIDSON.

MONROE, Mich., June 27.

We have received a charming photograph of some pointer puppies owned by Henry Matern, Jr., of Sandusky, O. We wonder breeders do not use the camera to a greater extent than they do. It is educational as well as a good business move. Educational because we are not all blessed with good memories, and should the puppy grow into a prize winner it is an advantage to be able to turn over the leaves of one's scrap book and see how the dog looked as a puppy, so that in future litters one may be in a measure guided as to which to dispose of and which to keep. A business move because the picture of a quaint little puppy may often sell it to a wavering customer when any amount of description and assertions that it will be a champion, sure, are unavailing.

The Canadian Government seem to be taking the greatest interest in the coming World's Fair, and anxious that the live stock of the Dominion shall be creditably represented. The Canadian Kennel Club has, however, a task before it that will task its resources to the utmost when it essays to determine which dogs of the different breeds shall uphold the honor of the country at the big show next year. Such selections will, however, considerably lessen the labors of the selection authorities on this side who are to decide what dogs are worthy of being placed before the judges and those that are not.

## DOG CHAT.

FROM a private letter from a well-known member of dogdom in England we learn that the Psovois are quite the breed in England, but the strength of one kennel, the Duchess of Newcastle's, will, it is thought, ultimately choke off competition. This hardly seems possible in such a country of sportsmen and wealthy fanciers as England; but we have had a similar lesson in America, when the continued success of Mr. Harrison's Chestnut Hill Kennel of collies did much to dishearten other breeders, or rather prevent them from exhibiting, and so meeting almost certain defeat. This the proprietor of the Chestnut Hill Kennels was wise enough to find out in time and sensibly profiting by the discovery withdrew his kennel from the ring till the fall of this year. Almost at once the effect was apparent, and our collie classes were filled by representatives from other kennels, while a number of smaller kennels sprang into existence, so that this handsome and intelligent breed will in all probability become even more popular.

We have received a pleasing picture of Messrs. Bartels' now very noted greyhound bitch, Pearl of Pekin. She seems to be a well formed animal, especially from the shoulder to quarters.

Mr. James W. Whitney is in London, and feeling himself among the heads of the fancy. He lunched with the editor of the *Stock-Keeper* at the Kennel Club soon after his arrival, so evidently he has fallen into good hands, and when under proper guidance he has had a look round the mastiff kennels, may return with a mastiff or two that will help to boom the breed along a bit, for it needs it bad enough.

A meeting of the executive committee of the Irish Setter Club is called to meet at 634 Race street, Philadelphia, Monday July 11, at 5 P. M.

Mr. T. G. Davey is getting quite English in the make up of his kennel which now numbers no less than sixty dogs. He has just imported an English retriever bitch from Mr. S. E. Shirley and a dog from Mr. John Morrison. He has now on the ocean a pair of pointers, a dog and bitch, that are said to be clinkers. A bitch out of his Ightfield Madge by Lad of Kent will still further strengthen the Brighton Kennels. By the way, Lad of Kent seems to be doing his full share of good to the breed in this country, he is evidently that *rara avis*—a good dog himself and equally good as a stock getter. Mr. Davey tells us that his purchase from the Westminster Kennel Club some time back, Westminster Drake, is showing up well in the stud. Tom Hallam will have his hands full as Mr. Davey has entered his dogs in all the trials, and thinks he can pull something off and mutters something about "The people." Time will show.

Dr. Wesley Mills writes another letter for publication this week, but in accordance with our resolve that the controversy between Mr. Wade and the Doctor should end as far as FOREST AND STREAM was concerned, we only publish Dr. Mills' answer to that part of Mr. Wade's letter in which the latter accuses him of cuffing his greyhound's ears in the ring. Dr. Mills writes: "I therefore challenge Mr. Wade to prove that I ever unmercifully cuffed the poor beast's ears. If Mr. Wade will prove this I will donate the sum of $25 to any public charity in the United States, provided Mr. Wade will agree to donate a like amount to any charity I may name in this country should he fail. The evidence to be received and adjudicated upon by such person or persons as shall be mutually agreed upon. I did believe till recently that Mr. Wade was above this sort of writing, but as he has resorted to it I must now ask him to keep to this charge, and this alone, and to prove his case."

It is our sad task to chronicle the death of one of the most energetic workers at the late Denver dog show. This was Mr. Robert W. Isenthal, the show secretary of the Continental Kennel Club. He was a native of Pittsburgh, Pa., and went West, we believe, in search of health, being afflicted with consumption. He died July 1 at St. Luke's Hospital, Denver, Col. It will be remembered that FOREST AND STREAM at the time of the show published a capital portrait of the deceased secretary.

A meeting of the National Greyhound Club will be held at Mr. L. C. Whiton's office, July 11, at 4:30 P. M. The matter of the Pearl of Pekin protest will be fully discussed, as the letters from which we published extracts last week are now in the club's possession, and we trust that those who can in any way throw any light on this now celebrated case will aid the club in every way.

Mr. Calvin S. McChesney has sent us a capital picture of a litter of pointer pups by Pedro out or Jill II. If the puppies only develop as well in after life as they have done on the plate their owner will be a fortunate man.

The quarrel in the California Kennel Club grows warmer. In denying the charges against him which Mr. Schell published recently, Mr. Truman produces the following statement from the officers and members of the executive and managing committees of the club:

"We, the undersigned officers and members of the executive and managing committees of the California Kennel Club, desire to state that at no time during the existence of the California Kennel Club has a protest been entered by E. P. Schell or any other person against A. B. Truman assuming control of the financial affairs of the bench shows. We also deny that A. B. Truman disbursed or received money for this club without the full knowledge, authority and consent of the secretary and treasurer, also of the executive and managing committees. In fact, a motion to that effect was passed by the managing committee and approved by the executive committee authorizing Mr. Truman to act as chairman of the managing committee and business manager of the show. As such he secured a great number of valuable special prizes and gave his entire time to the success of the show. At a meeting held upon May 23, 1892, Mr. Truman presented a report of his management, including a report of moneys received and expended. This was accepted and referred to the financial committee. Mr. Schell officiated as presiding officer at this meeting and made no objection to the report. We have never heard Mr. Truman's honesty questioned in these matters, and have felt secure when placing this trust upon him, Mr. Schell's statements to the contrary notwithstanding. J. B. Lewis, President; E. T. Hervey, Treasurer; F. J. Silvie, Secretary; Robert Liddle, Joseph King, John de Vaull, J. J. Jamison, R. Ringrose, Dr. James Stanton, James W. Orndoff and Dr. John Gallwey."

Relative to the charge of Mr. Schell, that Mr. Truman without authority took charge of funds, Mr. Truman presents a check on the Hibernia Bank for $300, signed by Mr. Schell on May 6. This, Mr. Truman holds, should be proof of the fact that Mr. Schell did not, as he stated, protest against the handling of money by Mr. Truman.

Those who have followed reports of dog shows and field trials on the Pacific slope will remember Mr. Thos. Higg's English setter Lady Trippe (Mingo—Lady Thunder). She died June 27 at the kennels at West Berkeley. She was an excellent field dog, having won the All-Age Stake of the P. C. F. T. January 1892, and was also a winner on the bench her last win being at the late San Francisco show. He death is a severe loss to her owner, especially as she was due to whelp July 5, to Lee R. (Rodney—Phyllis), winner of the P. C. F. T. Derby, 1891.

Dropping into the "Rendezvous" where every one knows that current dog cases are continually being heard *in camera*, we found old champion Black Prince snoring on the office chair. Calling him down we saw that the old dog, who will be 11 years old on the 15th, was looking as well as many a one with only half his years. There are few field spaniels on the bench to-day that have better legs or a more typical head than he has, and that he is none too old to rouse a woodcock from his seclusion is vouched for by Mr. Wilmerding, his owner, who, with friends, shot several of the longbills over him last Monday near Morristown.

A correspondent writes us asking whether, in the event of the social club being formed, the A. K. C. will still continue to provide a reading-room with all the papers as at present. This is a very fair question and should receive attention. While there are, no doubt, many dog men and others who will not be inconvenienced by the dues demanded for the social club and who will of course be entitled to its varied privileges, there are also many poorer dog men who will visit New York, perhaps once or twice a year, to whom the club, as a club, will be useless. These men, however, belong to local clubs and no doubt do their share of sending in SI registration fees, and who, therefore, in a sense, make the A. K. C. possible. These should certainly not, in the event of the A. K. C. taking up its quarters in a club house, be deprived of the privilege of reading all the kennel papers, as at present, and the chance of meeting fellow-fanciers for an exchange of dog chat. The social department idea is all right as long as it does not interfere with the present rights of the dog men, but do not let us run the danger of having the A. K. C. called a rich man's club.

Paris, France, is experiencing the terrors of the dog catchers. The "machine" is run on the same principle as in New York, with the difference that, until brought to government notice, the dogs were at once hustled into the death chamber. Now, however, the dogs will be kept twenty-four hours after being caught. The Paris dog taxes amount to $100,000 during the year.

We once thought that the celebrated bulldog Forceps would find a home in America, but the latest is that Dr. Bennison has sold him to the owner of British Monarch, S. Woodiwiss.

There is a rumor in English show circles of a new St. Bernard star but it is kept very dark and nothing is known as to his breeding. The same thing happens over here continually, with this difference, that we are told every particular even to how long it will take for it to get into the challenge class.

Mr. Reick has not been able to devote much time to his St. Bernards last month, as the Minneapolis and Chicago conventions have demanded his undivided attention. He has returned to find his dogs well and puppies almost all sold out, shipping one to Maine yesterday; of course Mr. Reick advertises in the FOREST AND STREAM, *verb sap.* Princess Florence is well, but short of coat just now. She will probably be bred again to Refuge II.

Both *Stock-Keeper* and *British Fancier* publish interesting accounts of the Duchess of Newcastle's kennel this week, with pictures of the kennels, the principal Psovois and the Duchess herself. The former journal's pictures of the three most noted Psovois and the group of Clumbers are especially good, and the same may be said of the colored frontispiece of the Duchess and Ivan III. in the *British Fancier.* When Mr. Huntington was building his kennels at Lawrence, L. I., he would scarcely believe us when we remarked that one of Mr. Hanks' Psovois had leaped a 10ft. fence round its kennel; nevertheless, Mr. Huntington made preparations to keep his own dogs within bounds. According to *Stock-Keeper* the Duchess of Newcastle has one of these dogs called Peter that often jumps the 10ft. boundary fence of the kennel. Speaking of the Clumber kennels, it is unfortunate for the breed of spaniels of that name that the dogs seen at the kennels are not by any means representative specimens. No attention has been paid to the proper mating and consequently the breed has deteriorated considerably. Running round with the wolfhounds is a tame wolf that seems to be quite at home except when he, like the Psovois, takes it into his head to clear the 10ft. fence.

Joe Lewis, manager of the Oak Grove Kennels of Irish setters, called on us on his way to his old home at Canonsburgh, Pa., last Friday. He reports the Oak Grove dogs as in full bloom and quite ready for the fall shows, where they expect to take a leading part. "Joe" will sell nearly all his dogs at Canonsburgh, but brings back with him his well-known setters Tony Gladstone, Fanny and a promising Roderigo pup which he will retain for himself.

The National Greyhound Club will after all hold its show for all breeds of dogs on the dates originally intended—Nov. 22 to 25—at the Claremont Rink, Brooklyn, N. Y. It is expected that the prizes will be on a basis of $15 and $10; and there is no reason why the club should not hold a rattling good show.

There are several new advertisements of dogs this week. Among them H. Northwood offers his imported fox-terrier Painter and another for sale; James L. Little, Scotch terrier pups; Matern Pointer and Setter Kennels, pointer pups; Edward Brooks, Dandie Dinmont and Chesapeake Bay dog puppies; J. R. Pawling, Irish setter; M. A. Dorwart, English setter pups; Dr. Leo, great Danes; Rochelle Kennels, three Newfoundland pups. Wants: Dr. Treat, several dogs to break; The Gables, great Dane pup. In the stud: E. Brooks offers his well-known prize winner King o' the Heather. We also draw notice to Dr. Glover's "Book on Dog Diseases."

We draw the attention of our readers to the letter by "Observer" in another column. There is much food for thought in its perusal and we are not breaking any confidences when we say "Observer" is a very "fair" writer.

Mr. A. C. Bradbury, who has for some time managed the College Dairy and Poultry Farm, Findley, England, sailed on the Missouri last week for New York. He brings with him, according to *Stock-Keeper*, a St. Bernard, of which breed he is said to be a good judge, by champion Pouf out of Lady Curzon, who is by Lord Bute.

### A Foreign Opinion.

PRIZES for the best sporting photographs are being offered by FOREST AND STREAM, 318 Broadway, New York, and should attract a great many amateur competitors. The only conditions are: That the work must not have been exhibited or published; and that it must relate to game or fish, alive or dead; to shooting and fishing; to campers, camps and camp life; or to sporting travel by land or water. There are ten prizes, ranging from a first, of £5, to six of 25s. each. To a photographer who is interested in sport, the pleasure of having his work reproduced in a leading sporting paper is in itself a sufficient reward, even if he fails of the prizes.—*Practical Photographer (England).*

## WOLF COURSING IN RUSSIA.

(Translated from *Nòvoye Vremya.*)

THE 17th (29th) May at Kolomyágui (near St. Petersburg) were the last greyhound coursings. After the adjudication of prizes for fleetness (*rèzvost*, literally frskiness, playfulness), began the competition of Borzois in fighting (*zlóba*—literally wrath). The wolves replaced the hares. Truth requires it to be said that the wolves were stalwart enough this year, fresh and powerful, not starving and enervated wretches as in former years.

The prize was 250 roubles (about £26) for a couple of Borzois of any age and breed. The coursing commenced by the start of Mr. Ditz's couple Hvatai and Molodetz.

Dexterously set on a robust two-year-old wolf, the dogs collared him in the most brilliant fashion. One of the dogs was slightly bitten, and during the muzzling of the wolf the hunter was bitten in the hand. This first successful course proved to be also the last one, the following were quite unsuccessful. The dogs could not master the wolf. One of the wolves safely scampered away to the nearest forest, to the great terror of the inhabitants of Kolomyágui. The last of the wolves was attacked by four dogs, and notwithstanding this the brute was not mastered. They were obliged to let another couple loose on him, and only then the six dogs mastered the wolf with great difficulty. The prize was adjudicated to the couple of Mr. Ditz, Hvatai and Molodetz.

A. W. POLTOZATZAY, Chronicler of *Prizòda i Okhòta.*
—*Stock-Keeper (Eng.).*

## KENNEL NOTES.

### NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

*Golden Star and Golden Rose.* By J. B. Martin, San Francisco, Cal., for black, white and tan fox-terrier bitches, whelped May 11, 1892, by Woodale Rustic (Warren Jim—Warren Torment) out of Blemton Rapture (champion Regent—champion Rachel).

### BRED.

☞ **Prepared Blanks sent free on application.**

*Fairhill Queen—King Regent.* J. F. Hall's (Philadelphia, Pa.) St. Bernard bitch Fairhill Queen to Swiss Mountain Kennels' King Regent, April 9.

*Thelma—King Regent.* Edward Dudley's (Camden, N. J.) St. Bernard bith Thelma to Swiss Mountain Kennels' King Regent, Feb. 29.

*Harmony—King Regent.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Harmony to their King Regent March 7.

*Benita—King Regent.* O. W. Volger's (Buffalo, N. Y.) St. Bernard bitch Benita (Tristan G.—Mountain Queen) to Swiss Mountain Kennels' King Regent, March 21.

*Nanciebel—King Regent.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Nanciebel to their King Regent, Feb. 4.

*Gladys—Spokane.* Eberhart & Kinnie's (Cincinnati, O.) pug bitch Gladys (Sir Loris—Phyllis II.) to their Spokane (champion Kash—Lady Thora), June 26.

*Fairy—Eberhart's Cashier.* Miss H. Bell's (Milford, O.) pug bitch Fairy (Sir Victor—Topsy, Jr.) to Eberhart Pug Kennels' Eberhart's Cashier (champion Kash—Lady Thora), July 1.

*Maud Noble—Antonio.* N. Wallace's (Farmington, Conn.) English setter bitch Maud Noble (Rowdy Rod—Pearl Noble) to Blue Ridge Kennels' champion Antonio (Roderigo—Bo Peep), May 16.

*Countess W.—Rod's Whim.* N. Wallace's (Farmington, Conn.) English setter bitch Countess W. (Count Noble—Jennie III.) to E. A. Damen's Rod's Whim (Roderigo—Florence Gladstone), May 26.

*Loraine—King Regent.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Loraine to their King Regent, May 16.

*Lady Gay—Cop.* Swiss Mountain Kennels' (Germantown, Pa.) cocker spaniel bitch Lady Gay to John Evan's Con, May 13.

*Dixie Bess—Ben Ormonde.* A. W. Albright's (Chattanooga, Tenn.) St. Bernard bitch Dixie Bess to Swiss Mountain Kennels' Ben Ormonde, May 4.

*Lady Blanca—Ben Ormonde.* F. E. Hege's (Salem, N. C.) St. Bernard bith Lady Blanca to Swiss Mountain Kennels' Ben Ormonde, May 14.

### WHELPS.

☞ **Prepared Blanks sent free on application.**

*Flora A.* F. A. Anderson's (Chicago, Ill.) great Dane Flora A (Schultz's Cæsar—Schult's Daisy), May 7, eleven (five dogs), by J. C. Lineman's Fritz.

*Bonnie Bondhu.* L. Rausch's (St. Louis, Mo.) English setter bitch Bonnie Bondhu (Count Wakefield—Pearl Bondhu), June 6, ten (seven dogs), by Blue Ridge Kennels' Gath's Hope; two bitches since dead.

*Princess Hepsey.* Swiss Mountain Kennels' (Germantown, Pa.) rough St. Bernard bitch Princess Hepsey, June 9, eight (three dogs), by their King Regent.

*Broconie S.* Swiss Mountain Kennels' (Germantown, Pa.) cocker spaniel bitch Broconie, May 30, seven (one dog), by their Snowball.

*Hornell Lady.* Rev. L. Bradley's (Philadelphia, Pa.) cocker spaniel bitch Hornell Lady, March 24, five (four dogs), by Swiss Mountain Kennels' Snowball.

*Florette.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Florette, May 12, nine (three dogs), by their Scottish Leader.

*Benita.* O. W. Volger's (Buffalo, N. Y.) St. Bernard bitch Benita (Tristan G.—Mountain Queen), May 22, eight bitches, by Swiss Mountain Kennels' King Regent.

*Harmony.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Harmony, May 6, thirteen (nine dogs), by their King Regent.

*Nanciebel.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Nanciebel, April 11, four (two dogs), by their King Regent.

*Ida P.* V. Petrola's (Washington, D. C.) St. Bernard bitch Ida P., April 15, fifteen (eight dogs), by Swiss Mountain Kennels' King Regent.

### SALES.

☞ **Prepared Blanks sent free on application.**

*Busy Bee.* Black cocker spaniel bitch, whelped Sept. 21, 1890, by champion Jersey out of Chip K., by Swiss Mountain Kennels, Germantown, Pa., to J. P. Willey, Salmon Falls, N. H.

*Jerry Jarvis—Lady Bess whelps.* Dark red Irish setter bitches, whelped May 17, 1892, by F. L. Abbey, Detroit, Mich., one each to B. W. Parker and S. F. Fuller, both of same place.

*Columbian Cordova.* Maltese and white great Dane dog, by Hock's Cæsar out of Seiler's Bella S., by F. S. Anderson, Chicago, Ill., to Mr. Mosherpaugh, same place.

*Claremont Heather.* Red Irish setter bitch, whelped July 23, 1889, by Claremont Patsy out of Nino, by H. G. J. Hallowell, Conshohocken, Pa., to Seminole Kennels, Chestnut Hill, Pa.

*Golden Star.* White, black and tan fox-terrier bitch, whelped May 11, 1892, by Woodale Rustic out of Blemton Rapture, by J. B. Martin, San Francisco, Cal., to G. W. Debenham, same place.

*Golden Rose.* White, black and tan fox-terrier bitch, whelped May 11, 1892, by Woodale Rustic out of Blemton Rapture, by J. B. Martin, San Francisco, Cal., to W. R. Jost, same place.

*King Regent—Flora whelp.* Orange and white St. Bernard bitch, whelped Nov. 9, 1891, by Swiss Mountain Kennels, Germantown, Pa., to Thos. Delaney, Providence, R. I.

*Cherry Boy—Lady Gay whelp.* Buff cocker spaniel bitch, whelped Dec. 24, 1891, by Swiss Mountain Kennels, Germantown, Pa., to Henry Jarrett, Chestnut Hill, Pa.

*King Regent—Dart whelp.* Orange and white St. Bernard bitch, whelped Dec. 9, 1891, by Swiss Mountain Kennels, Germantown, Pa., to W. B. Vandergrift, Pittsburgh, Pa.

## ANSWERS TO CORRESPONDENTS.

---

The timely article on the ownership of the America's Cup which we publish this week presents a view which will be new to many, but which is in all probability the correct one. The writer, Mr. Jarvis, is an old yachtsman and a lawyer by profession, though better known as a writer on yachting subjects. The question of its legal rights as the temporary holder of the cup is one that has always been treated very lightly by the New York Y. C.; the first change of the conditions, in 1882, was made in the face of the opinion of an eminent lawyer that the club had no power to alter the conditions of the original trust, but as this action of the club received the tacit endorsement of yacht clubs at large in challenging under the new conditions of the second deed, the question of the legal right to make still another change was hardly considered at all in 1887. If our correspondent is correct it should be a very easy matter for the New York Y. C. to declare the new deed null and void and to recognize only the original terms of the trust. As we go to press a rumor is current to the effect that a new challenge from the Royal Yacht Squadron is now in New York, to be delivered if the new deed of gift be rescinded by the club.

---

The Boston *Herald* quotes a portion of our remarks concerning designers and dimensions as applying exclusively to British designers, and calls attention to the fact that the dimensions of the American yachts are published in the various club books. As a matter of fact, there is little to choose between the two nations, soaped windows, locked doors and "cooked" dimensions are quite as well known about New York and Boston as on the Clyde and Solent; and if more news is published on this side, it is due to the push and enterprise of American newspaper men rather than the desire of American designers to impart information. It is true that certain dimensions appear in the club books, but so many are plainly incorrect that they are all unreliable. The official measurements of length, sail area and rating of all British racing yachts are published through the season; and that the corresponding measurements, waterline and sail area, are usually known in this country is due solely to the courtesy of the club measurers, as they are not officially published.

## The America's Cup.

THE CUTTING OF THE GORDIAN KNOT.

At the late meeting of the Yacht Racing Association of England, which was called to consider the advisability of permitting the use of weighted centerboards, the celebrated yacht designer G. L. Watson, after speaking of the speed which might be developed by the innovation, and its influence on international yacht racing, went on to say: "This part of the question, however, in the present state of matters connected with the America's Cup, is not pressing. Now, this meeting of the Y. R. A. was attended by the most prominent and influential yachtsmen from all parts of the United Kingdom; and knowing how careful English artisans are to retain the good will of their patrons, it is clear that Mr. Watson was aware that he voiced the unanimous sentiment of the delegates from all the clubs which were there represented. And the incident indicates this—and it is openly stated in England—that no yacht club in either England, Scotland or Ireland will by any further challenge agree to the terms of the last deed of gift of this cup to the New York Y. C.

This means that the supreme interests and excitement of international yachting contests are apparently at an end until, as Mr. Dixon Kemp cheerfully suggests, "the present committees of yacht clubs die off, when possibly their successors may wish to challenge again."

Of course everybody is aware that the cause for the present deadlock is the conditions in the last deed of gift, in particular that which calls upon the challenger for the Cup to furnish a statement of the rig, the load waterline length and beam, the extreme beam and also the draft of the challenging vessel, together with ten months' notice of challenge. It is not the intention of this article to express the smallest opinion as to whether the English are justified in objecting to this last condition or whether the N. Y. Y. C. were right in seeking to attach this condition to the Cup. I deal with the matter in a different way. On this side of the water it is claimed that information as to length, breadth and depth of a yacht give but very little idea of what her sailing qualities may be. But as an Englishman said to me last week, "We know that these dimensions do not tell everything, but they tell more than you have a right to ask. Under the original deed to the club we could race on a six months' notice after supplying length, rig and Custom house tonnage; and we have a right to put our tonnage into any shape we like. If we manage to whittle out a model more speedy than any yet known, we have a right to win on it without disclosing any hint as to its shape."

Whether or not there be any truth in this, there is no question about one fact, that the Cup has been "deeded off the course as far as sport is concerned.

It was stated not long ago in a New York paper that "when Mr. William Henn, owner of the Galatea, was here last winter he was given to understand by members of the New York Yacht Club that the dimension clause could and would be waived." And the article continues. "But in England this generosity does not have much effect." As to this it may be said that the Royal Yacht Squadron, in whose name the Earl of Dunraven challenged in 1889, and which refused to recognize the deed, would not probably consent to be allowed through "generosity" to compete in a matter where its own rights as one of the many beneficiaries under the original trust gift are firmly established.

While carefully avoiding any expression of opinion about this clause, the ground I take and what I propose to show is this: That out of the conveyances of the Cup to the club the last two are void: that the only trusteeship the club possesses in this Cup is under the first trust gift; and that the only conditions under which it can be held are those therein set out.

The owners of the yacht America, which in 1851, at Cowes, England, won the Cup at the regatta of the Royal Yacht Squadron, were Messrs. J. C. Stevens, J. B. Finley, Hamilton Weeks, Edwin A. Stevens and George L. Schuyler. Apparently the cup came to them as their own property and not as a challenge Cup; and in July, 1857, it was conveyed by all the owners of it to the New York Yacht Club, in trust to carry out the following conditions:

"Any organized yacht club of any foreign country shall always be entitled, though any one or more of its members, to claim the right of sailing a match for this Cup, with any yacht or other vessel, of not less than thirty or more than three hundred tons, measured by the Custom House rule of the country to which the vessel belongs.

"The parties desiring to sail for the Cup may make any match with the yacht club in possession of the same that may be determined upon by mutual consent; but in case of a disagreement as to terms, the match shall be sailed over the usual course for the annual regatta of the yacht club in possession of the Cup, and subject to rules and sailing regulations; the challenging party being bound to give six months' notice in writing, fixing the day they wish to start—this notice to embrace the length, Custom House measurement, rig and name of the vessel.

"It to be distinctly understood that the Cup is to be the property of the club, and not of the members thereof, or owners of the vessel winning it in a match, and that the condition of keeping it open to be sailed for by yacht clubs of all foreign countries, upon the terms above laid down, shall forever attach to it, thus making it perpetually a challenge cup for friendly competition between foreign countries."

In this conveyance the owners of the America parted absolutely and forever with the whole of their right, title and interest in the Cup, and it is clear that not until ownership in the same was legally conveyed back to them could they, or any of them, make any further conveyance of the slightest validity. There was in the original trust gift no reservation, condition or proviso by which the Cup could in any event revert to the grantors of 1857.

Subsequently, in 1882, it was thought desirable to alter the conditions regarding the trusteeship of the Cup. As they have been superseded, it is not necessary for this article to quote the alterations supposed to be made at this time. In the notice of same printed for distribution among foreign clubs, the secretary of the N. Y. Y. C. states that the Cup "having been *returned* to Mr. G. L. Schuyler, the only surviving donor, has been *re-presented* to the New York Y. C. subject to the conditions expressed in the following letter." Then follows the letter, signed by Mr. Schuyler, dated Jan. 4, 1882, which, I am informed, is the only writing supposed to be a conveyance which deals with this alleged transfer; but which, however, contains no words of transfer or assignment; merely saying that the Cup is again "offered" to the club on the conditions and for the trusts as therein stated.

Then, after the Thistle's contests with the Volunteer, it was again thought desirable to alter the trusts and conditions under which any club entitled to the possession of the Cup should hold it. And this time, by an instrument under seal, much more regular in appearance than the previous writing, and dated Oct. 24, 1887, Mr. Schuyler purported to again convey the Cup to the club "in trust for the following uses and purposes":

"The Cup is donated upon the condition that it shall be preserved as a perpetual challenge cup for friendly competition between foreign countries.

"Any organized yacht club of a foreign country, incorporated, patented or licensed by the Legislature, Admiralty or other executive department, having for its annual regatta an ocean water course on the sea, or an arm of the sea, or one which combines both, shall always be entitled to the right of sailing a match for this Cup, with a yacht or vessel propelled by sails only and constructed in the country to which the challenging clubs belong, against any one yacht or vessel constructed in the country of the club holding the Cup.

* * * * * * *

"Should the club holding the Cup be for any cause dissolved, the Cup shall be transferred to some club of the same nationality, eligible to challenge under this deed of gift, in trust and subject to its provisions. In the event of the failure of such transfer within three months after such dissolution, said Cup shall revert to the preceding club holding the same, and under the terms of the deed of gift. It is distinctly understood that the Cup is to be the property of the club subject to the provisions of this deed, and not the property of the owner or owners of any vessel winning a match."

Now, the grounds I take are as follows: Firstly—If the reader reperuses the conditions of the first conveyance of 1857 he will see that "it is distinctly understood that the Cup is to be the property of" any club whose representative yacht shall win it; and also "that the condition of keeping it open to be sailed for by yacht clubs of all foreign countries shall forever attach to it, thus making it perpetually a challenge cup for friendly competition between foreign countries." Here it will be seen that a distinct trust was created in favor of all yacht clubs whose representative yachts should either compete for or win the Cup; that the Cup should be "the property" (in trust, of course) of such clubs, "which shall always be entitled * * * to claim the right of sailing a match for this Cup;" and that the only ways in which the New York or any other yacht club could deal with the Cup were to observe the conditions which should forever attach to it, keep it perpetually open to challenge, and hand it over to the club whose yacht should win.

In the face of this unmistakably clear language in the creation of the trust, what did the officers of the New York Y. C. do? They twice handed the Cup over (as is said) to a man who legally had nothing to do with it, and on each occasion took back alleged conveyances from a man who had nothing to convey, because nothing had been conveyed to him. Mr. Schuyler, together with the other owners, parted forever with all their title in the Cup in creating a trust in favor of certain institutions. The important benefits passing to the beneficiaries under this trust gift immediately attached as of right to all of them, and could not be revoked or altered by arrangements between Mr. Schuyler and the present and merely temporary trustees. Mr. Schuyler's former intimacy with the matter, as one of the donors, seems to have blinded everybody's eyes to the fact that after the first conveyance he was, legally, a complete stranger to the Cup; and also that the trusts and conditions first made cannot be interfered with.

Surely it must be clear to all that the N. Y. Y. C. could not possibly convey to Mr. Schuyler an ownership in the Cup *which it did not itself possess*, and that consequently his alleged conveyances to the club should never have been made. The New York Yacht Club is a conduit-pipe to lead the Cup to another conduit-pipe which will lead it to another; and so on into the future. Even if Mr. Schuyler had actually paid the full hundred guineas for a conveyance to him from the club he could gain no particle of ownership in the Cup, as against the beneficiaries, and he took the same with full notice of the trusts attaching to it.

As a second ground, it may be as well to remark that in the secretary's notices to the foreign clubs of both the alleged conveyances he merely states that the cup was "returned" to Mr. Schuyler. There may be a "return" or "handing over" which by no means amounts to a re-conveyance; and it is suggested that although Mr. Schuyler acknowledged the return of the cup to him, and even supposing the club had power to re-convey to him, there was, in one case at least, no dealing with the cup which amounted to a legal reconveyance. This point, however, is of comparatively small importance.

If, then, the club had no power to re-convey, or if, as suggested in the last paragraph, it did not re-convey, where did Mr. Schuyler receive his ability to make the so-called deeds now in question? If anyone could be so absurd as to claim that any property in the Cup remained in him after the first conveyance to the club made by all the original donors, this would be to admit that the legal representatives of the four other deceased donors were now entitled to a four-fifths share of the same remnants of ownership as his. A member of the club suggested to the writer that perhaps these legal representatives ought to have been also dealt with in the transactions with Mr. Schuyler. This is a mistaken idea which many possess. These representatives and Mr. Schuyler were at the time of the last transactions total strangers to the Cup, legally speaking, who never by any imaginable means, except perhaps an act of Congress, could hold ownership again.

The writer states that this article will be understood to be written in no spirit of hostility to the N. Y. Y. C.; the only object of it is to indicate the way to cut the Gordian knot on strictly legal grounds, so that international contests may re-commence. And, if the above mentioned intimation to Lieut. Henn was in any way official, there is reason to believe that if the matter could have been done legally, the club would long ago have willingly expunged the clause which inadvertently gave offence in foreign quarters. If the same inclination still exists, it is a simple matter to take the advice of counsel for the club and ascertain that the views here expressed are the only legal views that can be held. When the club is thus satisfied that the last conveyance or conveyances can never be altered or renewed and that they never had any legal existence, then a public proclamation of intention to stand solely on the terms and trusts of the first conveyance will be in order.

It will be seen that the terms of the original trust gift were very poorly thought out, and that it allowed any club in possession of the Cup to make any rules it pleased, adopt any unfair system of measurement for taxation, and arrange a club course that might be utterly unfair to a foreign vessel. But it is, as I submit, all we have to go upon, and it certainly provides unlimited scope for amicable arrangement on any point. The vagueness of it illustrates the propriety the N. Y. Y. C. members felt in endeavoring to render permanent such conditions as would make all-round fairness compulsary upon any club which might in future hold the Cup; and they succeeded in making some rules and conditions which, if not legal, were satisfactory to everybody. The fact that they succeeded as well as they did shows that their desire for fairness was of a higher grade than the legal talent which advised the making of these two last deeds. Yachtsmen will consider that much of the care which has been expended in guarding against unfairness of foreign clubs, which might in future hold the Cup, may safely be dispensed with. The ethics of amateur sport are well understood.

When the two alleged conveyances from Mr. Schuyler are cancelled then the club, in reverting to the terms of the original trust gift and the six months notice of challenge, can simply propose for amicable settlement each of those conditions of the new deed which have been generally approved of. The proposals, when agreed to, will no doubt be retained and utilized by any club which may hereafter hold the Cup. No club winning the trophy under these agreed conditions could dare to alter them except for some unforeseen and perfectly fair reason.

If the N. Y. Y. C., through adoption of the views and methods here indicated, places the Cup once more in competition, then the American yachtsmen on the upper lakes will have a chance to compete in England if the Cup should cross the water. At present they and all yacht clubs on the great lakes are shut out because their annual regatta course is not "an ocean water course on the sea, or on an arm of the sea."

The New York Y. C. can experience no loss of dignity in retiring from a position which its present lawyers will doubtless advise to be untenable. There will be no altering or withdrawing of any particular stumbling block clause when the whole of the two alleged conveyances can be seen to be the result of a long mistake in which the best motives were so poorly assisted by legal advice.

The incompleteness of the terms of the original deed virtually bequeathed the America's Cup to the honor of succeeding generations of amateur yachtsmen. It comes to us with some of the vagueness with which the world comes to us in the Genesis record; but as with the world and the America's Cup, and all things which are given us under unalterable conditions, we must in every case "make the best of it" and endeavor to fulfill the trusts thus created. Indeed it seems not only a safe but also a becoming thing that the greatest sporting trophy the world has ever known should in this vague way be left entirely to the sense of fairness of gentlemen; and I feel that the New York Y. C. could do much to permanently establish highest standards of honor by trusting these standards of honor to the fullest extent.

STINSON JARVIS.

NEW YORK, June.

---

## Atlantic City Yacht Association, June 24.

ATLANTIC CITY, N. J.

THE first catboat race of the season was sailed under the most favorable circumstances, clear sky, stiff easterly breeze and a heavy sea. The course laid out was from the Inlet pavilion out the south channel across the bar, thence to the Brigantine Shoal Whistling Buoy (due east), thence to a stakeboat off Young's pier and around stakeboat off the North Bar, thence in over the bar to finish, a distance of 20 miles. The boats entered were:

|---|---|---|---|
| Sayonara, Capt. George Gale | 11 33 04 | 3 51 41 | 4 18 37 |
| Carrie, Capt. Adolph Parker | 11 33 20 | 3 53 27 | 4 20 07 |
| Stella, J. Monroe | 11 32 38 | 3 58 27 | 4 25 49 |
| Meyer, Ed Crane | 11 33 10 | 4 10 53 | 4 37 43 |
| Linda, Samuel Mills | 11 33 42 | Withdrew. | |
| Katie, Capt Loder | 11 34 32 | 4 04 04 | 4 29 32 |
| Annie, Capt. Casto | 11 32 58 | 4 12 41½ | 4 39 43½ |

Sayonara allows Carrie 1m. 30s. over the course, which with the 16s start makes a tie.

From first to last the race was desperately fought out between the old champion (Carrie) and the new boat (Sayonara), while the heavy seas and stiff breeze added greatly to the excitement. It was a serious chance to face the breakers on the bar, but all the boats succeeded in running the gauntlet, but not without shipping some heavy seas. Linda caught one which so nearly filled her that she was obliged to withdraw from the race; the others were more fortunate, and although all suffered more or less succeeded in getting through safely and in fine trim. On the thrash to windward, while the wind was blowing strong, Sayonara did some splendid work, leaving Carrie rapidly, until put about on the port tack, having gained at least 2m.; but the wind became fitful and with many holes in it, and Sayonara found those holes to her detriment.

Carrie gradually overtook her and rounded the Whistling Buoy 10s. ahead in fine style. With booms athwartship, the yacht soon changed position again, Sayonara once more gaining the lead and keeping it, not only to the lower stakeboat but to the finish. The rest of the racers did good work, but Stella was badly handicapped by a bad fitting sail and the unfortunate neglect or forgetfulness of her captain to see that his board was sufficiently down to enable her to do her best; in point of fact, he did not attend to it until he had sailed three-fourths of the race, from which time he began to show that his boat had the ability to speed that the others claimed.

The recrossing of the bar, with a following wind, was sufficient excitement for two ordinary races considerd as one: the breakers were formidable and evidently bent upon swamping all that dared to encroach upon the circumscribed domain.

The race resulted in a tie between Sayonara and Carrie for first place, both having sailed over the course in exactly the same time to a second; the regatta committee decided that there was no race and that a resail should take place on June 29.

---

## Douglaston Y. C. Annual, July 4.

LITTLE NECK BAY—LONG ISLAND SOUND.

THE Douglaston Y. C. opened its new house at Little Neck Bay and sailed its annual regatta on Monday, the course being from off the club house, around Old Tom and Gangway buoys, and home, 18 miles. The wind was strong N.W. The times were:

| | Start. | Finish. | Elapsed. | Corrected |
|---|---|---|---|---|
| CLASS A—SLOOPS, CUTTERS AND YAWLS. | | | | |
| Duster | 12 56 45 | 3 29 30 | 2 32 45 | 2 27 13 |
| Estella | 12 56 50 | Withdrew. | | |
| Minnie | 1 00 05 | Withdrew. | | |

| Sandpiper | 1 00 05 | 3 16 25 | 2 16 20 | 2 14 05 |
| Louise | 1 00 05 | Withdrew. | | |

Duster, Roi and Ges So each win a cup given by Mr. W. P. Douglas, Willada wins the Barnes cup, and Sandpiper the Douglaston Y. C. cup.

## New Rochelle Y. C. Annual, July 2.

ECHO BAY—LONG ISLAND SOUND.

THE seventh annual regatta of the New Rochelle Y. C. was sailed on Saturday over the usual club courses on the Sound, the classes over 30ft. sailing from the starting line past buoy at west end of Execution Reef, thence around buoy off Matinicock Point, thence around stakeboat south of Captain's Island, thence past the east end of Execution Reef, thence around buoy at west end of Execution Reef, leaving all buoys on the said reef on the starboard hand, thence across the finish line; 22 nautical miles. The boats under 30ft. sailed from starting line around buoy at west end of Execution Reef, thence around black buoy off Matinicock Point, thence around easterly home stakeboat, leaving it on the port hand, thence to buoy at east end of Execution Reef, thence around buoy at west end of Execution Reef, thence across the finish line; 17 nautical miles. The wind was W.S.W., moderate, all day, and the sky was bright and clear—an ideal summer day. The start was made at noon. After a reach across the Sound the fleet was timed at Execution:

| | | | |
|---|---|---|---|
| Anaconda | 1 07 00 | Phyliss | 1 24 20 |
| Penguin | 1 09 00 | Truant | 1 24 40 |
| Gulnare | 1 09 55 | Nellie | 1 24 40 |
| Sasqua | 1 12 45 | Kittie | 1 26 10 |
| Tattler | 1 17 15 | Sirene | 1 26 30 |
| Phantom | 1 19 00 | Addie L. D | 1 26 50 |

The winners were Anaconda, Penguin, Genevieve, Sasqua, Wacondah, Kittie, Duster, Tattler, Edna, Roi, Myrtle, Isnit, Willada, Phebe R., Phyllis and Ges So.

The regatta committee included P. J. Krackel, F. W. Schoonmaker and Edward H. Sturges.

The judges were B. C. Fuller, W. Grant Cook and G. B. Butler. The timers were C. C. Hughes, George D. Phillips and William Abbett.

The iron steamer Cepheus carried a large party of members and guests.

## Eastern Y. C. Annual.

MARBLEHEAD—MASSACHUSETTS BAY.

The annual regatta of the Eastern Y. C., sailed off Marblehead on Monday of last week, resulted in an interesting race in two classes at least, Marguerite, Merlin and Mayflower, of the schooners, making a good race; while the fin-keel Handsel again met Hawk and Fancy in the 30ft. class. The race between Wayward and Thetis was less interesting, while of the two 46-footers, Wasp so easily disposed of Barbara that there was no interest at all; though this class is expected to furnish much of the racing of the season. Neither Harpoon nor Alborak were entered. The starters were:

FIRST CLASS SCHOONERS.

| | Sailing Length. |
|---|---|
| Marguerite, R. S. Palmer | 83.75 |
| Mayflower, W. A. Gardner | 89.06 |
| Merlin, W. H. Forbes | 93.45 |
| SECOND CLASS CUTTERS. | |
| Wayward, David Sears | 65.77 |
| Thetis, C. S. Dennison | 66.95 |
| FIFTH CLASS CUTTERS. | |
| Wasp, Archibald Rogers | 55.27 |
| Barbara, C. H. W. Foster | 52.86 |
| SIXTH CLASS SLOOPS AND CUTTERS. | |
| Handsel, J. R. Hooper | 32.22 |
| Fancy, C. F. Lyman | 30.67 |
| Hawk, Gordon Dexter | 26.85 |

The weather in the morning was thick, damp and chilly, the wind fresh S.E. and a moderate sea, but by 10 A. M. the mist cleared away. The courses selected were: Course "W," from starting line with Half-Way Rock on port, leaving Outer Breaker Buoy (off Pig Rocks) on starboard, past Nahant Mark, leaving it on port; thence leaving Graves, Martin's Ledge and Boston Ledge Buoys on starboard, around stakeboat off Minot's, leaving it on starboard; thence return by same course, leaving each mark on the opposite hand to finish line. Allowance for 35 miles.

Course "F" from starting line, leaving Outer Breaker Buoy (off Pig Rocks) on starboard, past Nahant Mark, leaving it on port, thence leaving Graves Buoy on starboard, to and around Three-and-a Half-Fathom Ledge Buoy, leaving it on starboard. Thence return by the same course, leaving each mark on the opposite hand to the finish. Time allowance for 23 miles.

This made a reach over the first leg of the long course, a beat to the outer mark, a run to Nahant Mark and a reach home. The shorter course was practically the same in direction, the turning mark, Three-and-a-Half-Fathom Ledge, being about half way between the Nahant Mark and Minot's. The start was made by classes at 11:15, 11:25, 11:30 and 11:40.

The schooners carried their reaching kites, balloon jibtopsails and staysails, Thetis set a balloon jibtopsail and Wayward her No. 1, the sloop running rapidly ahead of the cutter; in fact, Wasp and Barbara had soon overtaken and passed Wayward. Hawk, with a No. 1 jibtopsail, led the thirties, Handsel coming next, while Fancy, with a balloon jibtopsail, was last.

There was more wind on the second leg, and with sheets in Marguerite picked up on the other two. Mayflower passed Merlin and held the lead for a time, but finally Marguerite went ahead and stayed there to the finish.

Thetis made poor work to windward and was passed by Wayward in spite of her long lead on the first leg. The 30-footers were timed at Three-and-a-Half Fathom Ledge:

From here they laid a course straight for Halfway Rock, a close reach. Handsel was far in the lead and Fancy, lugging a topsail, was second, Hawk stowing her topsail as she turned. At the finish she failed to cross the line and was not timed. Wasp had pushed the larger boats all day and won the Puritan cup for best corrected time. The full times were:

FIRST CLASS SCHOONERS.

| | Start. | Elapsed. | Corrected. |
|---|---|---|---|
| Marguerite | 11 19 55 | 4 34 47 | 4 27 54 |
| Mayflower | 11 18 48 | 4 37 58 | 4 35 12 |
| Merlin | 11 17 23 | 4 38 42 | 4 33 42 |
| SECOND CLASS SLOOPS. | | | |
| Wayward | 11 29 47 | 4 58 37 | 4 57 30 |
| Thetis | 11 25 25 | 5 01 21 | 5 01 21 |
| FIFTH CLASS SLOOPS. | | | |
| Wasp | 11 30 40 | 4 40 11 | 4 40 11 |
| Barbara | 11 30 50 | 4 59 12 | 4 57 05 |
| SEVENTH CLASS SLOOPS. | | | |
| Handsel | 11 33 45 | 3 28 15 | 3 19 30 |
| Fancy | 11 38 55 | 3 38 45 | 3 38 45 |
| Hawk | 11 38 50 | Did not finish. | |

Marguerite wins $100; Wayward, $100; Wasp, $75, and Handsel, $75

## Larchmont Y. C. Annual, July 4.

LARCHMONT—LONG ISLAND SOUND.

THE 18th annual regatta of the Larchmont Y. C. on Monday was quite a success, with a fairly good list of starters and the finest of summer weather without the usual Fourth of July squall, which arrived this year a day ahead of time. The only drawback was in the transfer of the guests from the shore to the steamer Albertina, the small propellor engaged as a tender failing to turn up, so that steam launches had to be used. This excitement is so much a part of the annual sport, however, that it would hardly seem like the Fourth if every one was put aboard and landed from the steamer in a convenient and conventional way.

The schooners sailed the Stamford course, 27 miles; the small schooners and the single stickers over 25ft. sailed the Captain's Island coure, 21 miles; the cabin cats and 25-footers sailed the Matinnicock course, 13 miles; the open cats sailed the Scotch Caps course, 10 miles. The entire fleet went first to the Hempstead mark, there separating. The wind was fresh from N.W., making the greater part of the course a reach. The water was smooth all day.

Dauntless sailed over alone, the three other entries in her class being absent. Atlantic, Phantom and Iroquois made up a class, but in the class below the racing was partly spoiled by a mistake of Viator, who followed the big schooners over the Stamford course, leaving a duel between Peerless and Azalea, the latter proving the winner. Wasp had practically a sail-over with the old sloop Bertie, now Forget-me-not. In the yawl class two of the three boats sailed the wrong course. In the 25ft. class Pyxie sailed alone. El Chico being late in getting over from Oyster Bay. The cabin cat class was well filled. The full times were:

SCHOONERS—CLASS A.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Dauntless | 12 16 50 | 4 01 51 | 3 45 01 | 3 45 01 |

| Rajah | 12 38 23 | 3 08 17 | Disqualified. | |
| 25-RATERS—CLASS 10. | | | | |
| Pyxie | 11 36 18 | 3 11 47 | 2 35 29 | 2 35 29 |
| CABIN CATS—CLASS 11. | | | | |
| Nellie | 12 36 21 | 3 27 40 | 2 51 19 | 2 51 19 |
| Adonis | 12 39 45 | Withdrew. | | |
| Truant | 12 43 25 | 3 25 01 | 2 41 36 | 2 41 36 |
| Almira | 12 39 24 | 3 16 07 | 2 36 43 | 2 36 43 |
| Elfin | 12 41 30 | 3 38 17 | 2 56 47 | 2 56 47 |
| Aura | 12 43 47 | 3 15 27 | 2 31 40 | 2 31 40 |
| OPEN CATS—CLASS 14. | | | | |
| Marguerite | 12 37 42 | 3 17 07 | 2 39 25 | 2 39 25 |
| Wilmerad | 12 41 05 | 2 44 25 | 2 03 21 | 2 03 21 |
| OPEN CATS—CLASS 16. | | | | |
| Zelina | 12 40 50 | Withdrew, | | |
| Phebe R | 12 40 22 | 2 49 47 | 2 09 25 | 2 09 25 |

The race was sailed under a handicap as was done last year, the result comparing well with the regattas of other clubs under the usual conditions.

Wasp wins the Connor cup, there being no competition for the Gould cup. Wasp also wins a special cup for her class under the regular club allowances.

Iroquois, Azalea, Wasp, Kangaroo, Kittie, Aura, Wilmerad and Phœbe each win first prizes, and Almira a second prize.

Guinare, Mr. John E. Dwight, was entered to sail with Wasp, but did not start. While running with the fleet from Hempstead to Captain's Island, she shook out a reef, her mast going over the side a moment later. The regatta was managed by Messrs. J. F. Lovejoy, Otto Sarony and C. L. Burger, of the committee.

## Hull Y. C., July 2.

HULL—BOSTON HARBOR.

THE second club race of the Hull Y. C. for boats of classes 2, 3, 4, 5, 6 and special class, was sailed on Saturday in a breeze that varied from W. to S.W., increasing from a light air before the start to a double-reef breeze during the latter part of the race. It was a Herreshoff day in all respects, four out of six winners being Bristol boats. The times were:

SECOND CLASS—20FT.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Handsel, J. R. Hooper | 33.04 | 2 47 55 | 2 11 06 |
| Chapoquoit, C. H. Jones | 37 10 | 2 49 10 | 2 16 57 |
| THIRD CLASS—25FT. C. B. | | | |

| Don, W. H. Shaw | | 1 31 54 | Not meas. |

Handsel, Gipsy, Alpha, Vanessa, Magpie and Mab win legs for the championship and also cash prizes. Marvel wins second prize, and third goes to White Fawn or Posy, according to the measurement.

The judges were Messrs. J. R. Chadwick, W. A. Cary, E. K. Friend, E. C. North and Franklin Adams.

## Winthrop Y. C., July 2.

WINTHROP, MASS.—BOSTON HARBOR.

ON Saturday the Winthrop Y. C. sailed an open race for cash prizes in second and third classes, the wind being fresh S.W. The times were:

THIRD CLASS.

The winners were Adeline, Siren, So So and Gracie L., Selfish winning the pennant for the best elapsed time.

## Kill Von Kull Y. C. Annual, July 4.

PORT RICHMOND, S. I.—NEWARK BAY.

THE fifth annual regatta of the Kill Von Kull Y. C. was sailed on Monday over a 10-mile course, three rounds of a triangee between Staten Island, the Newark Bay bridge and the red buoy off the club house. The wind was strong N.W. The times were:

The winners were Just Woke Up, Try Again, Tarpon, Tormentor, Bon Ton, Gracie, Irving H. and Nameless. Bon Ton won the special prize for best elapsed time.

## New Haven Y. C. Annual, June 27.

NEW HAVEN—LONG ISLAND SOUND.

THE eleventh annual regatta of the New Haven Y. C. was sailed on Monday week in a fresh S.E. breeze, the courses being: For yachts 24ft. and over, from a line between the committee steamer and Pardee's Bar buoy, leaving Ludington's Rock, Welch's, Pond Point and Charles Island buoys on starboard hand, around the mid channel buoy at the entrance of the Housatonic River (located eight miles from Ludington's Rock buoy, on a line with Stratford Point), returning over the same course, leaving Charles Island, Welch's, Pond Point and Ludington's Rock buoys on the port hand. For yachts under 24ft., open sloops and catboat classes, from off Pardee's bar buoy, leaving Ludington's Rock, Welsh's and Pond Point buoys on starboard hand, thence around buoy off the southward of Charles Island and return over the same course, leaving Welsh's, Pond Point and Ludington's Rock buoys on the port hand.

Rival led the fleet over the course, winning in her class and also taking for the third time the Derby challenge cup for the best corrected time, thus holding it permanently without further challenge. The full times were:

CLASS 3—CABIN SLOOPS, 36 TO 40FT.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Rival | 11 34 31 | 2 34 04 | 2 59 33 | 2 59 33 |

| CLASS 6—CABIN SLOOPS, 20 TO 24FT. | | | | |
| Vidette | 11 32 49 | 3 38 37 | 3 05 46 | 3 03 37 |
| Zenia | 11 37 16 | 2 49 00 | 3 11 44 | 3 11 44 |

The winners are: Class 3, Rival; Class 4, Stranger and Seabelle; Class 6, Vidette; Class 7, Commodore and Venus.

## Bensonhurst Club, July 2.

BENSONHURST—GRAVESEND BAY.

THE second annual regatta of the yachting department of the Bensonhurst Club was sailed on Saturday over an 8-mile course, two rounds of a triangle between Bensonhurst, Norton's Point and Fort Hamilton. The wind was strong S.W. The times were:

CLASS B—CATBOATS.

| | Elapsed. | Corrected. |
|---|---|---|
| Edda D., R. W. Rummell | 1 51 24 | 1 48 50 |
| Isabel, R. H. Sherwood | 1 51 17 | 1 50 04 |
| B. O., J. C. Egerton | 1 50 32 | 1 50 32 |

| CLASS 3—SLOOPS—SPECIAL RACE. | | |
| Seminole, John Brown, Jr | | |
| Jewel, Mr. Harper | | |

Seminole and Jewel were not timed, but the former won by a long lead. Edda C. wins, subject to a protest for fouling from Isabel.

## The Southern Y. C.

IT IS not generally known that the Southern Y. C., of New Orleans, La., is second only to the New York Y. C. in age; having been organized at Pass Christian, Miss., on July 21, 1849. But one of the original members, Mr. Harry Rareshide, is now living. The first regatta was held on Aug. 6 of the same year, with the following entries: Sloops—Laura, Rebecca, Undine, Mary Ann, Coralie, R. Morris, Harry Hill, Rigoletto, Mary Baker, J. L. Ditus, Anna, Pilgrim, Cora, Virginia, E. Riddle, and J. Mitchell.

The club has now a station and fine house on Lake Ponchartrain, with a large fleet of steam, naphtha and sailing yachts. The racing has up to a recent period been done by open sandbaggers, many of the fastest of the New York cracks having found their way to New Orleans, among them being Silence, Mary Emma and Mephisto; and the S. Y. C. has given some of the largest money prizes ever offered for small yachts. At the present time a larger class of yacht is coming rapidly into favor, the Burgess boat Nepenthe having been built for a member, while the new schooner Adrienne, designed by Stewart & Binney, is for another. The old waterline length rules have been used by the club since its organization, but as the results of the deliberations of a special committee on measurement, appointed at the last annual meeting, the Seawanhaka rule has just been adopted. On July 4 a race was sailed, open to seven classes, from 20ft. catboats up to schooners. The old rule is still used for the open catboats and for the working boats not enrolled in the club which are eligible in some regattas.

## Seawanhaka-Corinthian Y. C. Annual, July 2.

OYSTER BAY—LONG ISLAND SOUND.

THE twenty-second regatta of the Seawanhaka-Corinthian Y. C. was quite a departure from those of a dozen years past, the scene being changed from the Lower Bay, the barren beaches of Sandy Hook and the green seas about the two lightships to the calmer and quieter waters of Long Island Sound, with green valleys and hills, and picturesque country places. The central point was of course the new club house and anchorage at Oyster Bay, the racing being done on the Sound just outside the harbor, where two courses of 34 and 18 miles have been laid out. The longer was from a starting and finishing line between the committee tug Mutual and a mark-boat off Lloyd's Neck, across the Sound to a second mark-boat off Shippan's Point, thence across again and around a mark-boat off Matinnicock Buoy, and back again over the same course. This with a W.S.W. wind made a run across, a beat to Matinnicock, a run back and a beat home. The classes under 46ft. followed the larger yachts to Matinnicock and then reached straight for the finish along the Long Island shore.

The day was fair and bright, with a moderate breeze by noon, and quite a party was gathered at the club house, many going aboard the yachts, while some waited for the steamer Myndert Starin, which left New York with other guests at 8 A. M. There was some delay after the Starin reached the club dock, owing to a slight mishap to the club steamer, which had gone to Oyster Bay to meet the train, but the steam yacht Emu and the committee boat finally carried over these guests and brought the club boat in tow. Through this delay it was 12:45 before the preparatory whistle was blown, the start for the larger yachts being given 5m. later. The starters, 20 out of a list of 24 entries, were:

Schooners over 80ft.—Montauk, F. E. Weeks.

75ft. class—Miranda, Com. G. W. B. Hill; Iroquois, R. N. Ellis; Peerless, Messrs. Ackley and Mitchell. 63ft. class—Viator, W. G. Brokaw; Azalea, Edmund Blunt.

SINGLE-STICK CLASSES.

46ft.—Wasp, Archibald Rogers.

35ft.—Indolent, S. V. R. Cruger; Mirth, Rear-Com. J. W. Beekman; Daffodil, William Whiting; Volusia, J. M. Williams.

25ft. Sailing Length—Pyxie, Oswald Sanderson; Nameless, C. W. Wetmore; El Chico, H. Maitland Kersey.

Jib and Mainsail Boats—Nadjy, A. P. Montant; Sinbad, T. S. Young; Meteor, William Trotter; Dodo, E. M. Townsend, Jr.

Catboats—Gunhilde, E. C. Jewett; Oconee, C. T. Pierce.

Iroquois was at the line too soon and ran back, while Miranda was well up the harbor, and was handicapped, Montauk making the best start. All set spinakers to port and large jibtopsails, the two schooners Peerless and Azalea looking odd with the old single jibs. The 25 footers presented a pretty picture with spinakers well bagged out and balloonjibs pulled hard. Nameless ran ahead quite fast and took lead at first, El Chico having hardly wind enough, but in a little time the fin-keel went to the front and continued to gain over the two Gardner boats.

On the second leg the fleet separated, Montauk and Iroquois holding out in the Sound, while Miranda and the smaller schooners went in by the Long Island shore. Wasp was with the two leaders, doing the best work to windward; Iroquois reached the Matinnicock mark ahead of Montauk, after an interesting bout, while Miranda, who had come up quite rapidly toward the end of the leg, put in between the two and also turned before Montauk. The times were:

Nameless withdrew on this leg. The first division of the fleet ran across to Shippan Point again with booms to port, having to beat home from there. Wasp easily left the schooners astern, and came home far in the lead; Iroquois being second and Montauk third. The full times were:

| | Start. | Finish. | Elapsed. | Corrected. |

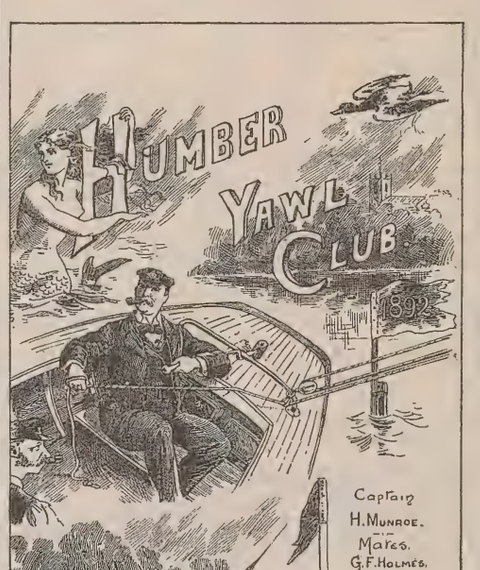
Montauk and Iroquois were disqualified for passing inside of a channel buoy. Peerless and Wasp each win half the regular prizes, having sailed alone, $100 and $50. Miranda wins $200, Azalea $100, Mirth $40, El Chico $25, Dodo and Gunhilde each $25. Wasp also wins the Leland challenge cup, and the helmsmen of El Chico and Dodo each win prizes of $25 presented by Mr. Wm. Whitlock. The guests steamer returned to the city after the finish. The regatta was managed by Messrs. W. C. Kerr, R. C. Townsend, R. W. Gibson, Wm. A. Haines and W. C. Tuckerman. The second race for the Rouse and Wetmore cups will be sailed on July 9.

## The Peerless—Boyd Collision.

A DECISION has lately been reached in the case of the libel of the steam yacht Peerless, by the owners of the tug Thos. Y. Boyd, sunk last June by the yacht in Hell Gate. The case was tried before Judge Brown, whose decision, for which, we are indebted to the *American Shipbuilder*, reads as follows:



"At about 8 o'clock p. m. on June 26, 1891, the plantiff's tug Thomas Y. Boyd, while going up the easterly channel of Hell Gate between Flood Rock and the Astoria shore, in the first hour of the flood, and having in tow on a hawser of 40 fathoms two small schooners, each about 65ft. long, came in collision with the steam yacht Peerless bound west at a point a little below the line running from Hallett's Point light to the northerly end of Flood Rock. The stem of yacht ran into the starboard side of the tug. The force of the blow with the flood tide carried both together near the dredge at the upper end of Flood Rock, and as soon as the yacht was disentangled from the tug the latter sank and became a total loss. The libel was filed to recover damages, alleging negligence of the yacht in not taking one of the westernly channels, viz., either the middle or the main ship channel, and not keeping out of the way of the tugs. The claimants contend that the accident arose wholly from the negligence of the tug in not porting her wheel as she might and ought to have done after the exchange of one whistle between the two steamers.

"The most important fact in dispute between the two parties is the position of the tug at the time of collision. The clear weight of evidence is that the tug was then in mid-channel with the schooners directly astern of her, that is to say about 500ft. to the westward of the Astoria shore, and not within 100 or 150ft. of the Astoria shore, as several of the libellants' witnesses allege. This appears not only from the greater number of witnesses who testify to this fact, including some called by the defendant who were in the best position for seeing the true place of the tug in the channel, but from other circumstances, which confirms the weight of the direct evidence. For the tug after collision was carried by the force of the blow with the yacht close to the dredge on the western line of the channel; and this could not have happened if the collision had been close to the Astoria shore and the light. With the Peerless backing and the flood tide, the tug could not have been carried so far to the westward, and she must also have been swept further to the northeastward. The schooners, moreover, after the collision, the hawsers being cut or broken, continued on in about mid channel and passed about 100 or 150ft. to the eastward of the boats in collision. The Peerless at the time of the exchange of one whistle was upon a course about west, which course she had taken from about 400ft. off Negro Point, and which made her cross the channel from Negro Point to Hallett's Point about two points to port. The exchange of one whistle was made when the Peerless had nearly reached the light on Hallett's Point and the tug opened up below it. The boats must then have been at least 1,000ft. apart and probably more. The Peerless was running at half speed, about 7 knots through the water or 5 knots by land; the tug about 4 knots by land or 2 knots through the water.

"The signal of one whistle, which the yacht gave to the tug, and which the tug immediately answered with one, imported that the boats should pass port to port, and that the tug would keep to the right. The tug did not do so but kept a straight course and without slacking speed until collision. The yacht ported hard, and as soon as she saw that the tug was not turning to starboard, reversed, but not in time to avoid collision. Under her port wheel she changed before collision about 2 points to starboard, so as to head nearly directly across towards the dredge at the north end of Flood Rock.

"I find that there was nothing to prevent the tug from porting her wheel and going to the right as her signal agreed she would do. Despite the claimant's testimony this is evident not merely from the evidence of the libellants' experts, but from the fact that the two schooners lashed together behind passed on without difficulty, notwithstanding the fact of the collision. It is self-evident that a tug like this, which is handled easily, could have gone to the right as her signal imported she would do, with perfect ease and so save collision with herself. Nothing prevented the slacking of her hawser for a moment if that was necessary for a quick turn; and the schooners would not have been thereby in the slightest degree endangered, as their subsequent passage proved. As the tug could have pursued this course without difficulty, she was legally bound to do so, both under the agreement made by the exchange of one whistle and by the rule of the starboard hand (Rule 19.) Her failure to do this brought on the collision for which the tug is therefore to blame.

"I find no fault proved in the yacht. She was meeting two schooners under sail beating to the eastward through the gate, and were right in front of her in different positions. The course adopted by the yacht under such circumstances, viz., to go through the easterly channel, was deemed by her master to be the most prudent course to adopt to avoid the two schooners, and so far I can perceive was a proper one. If the tug when below at Astoria, gave any long whistle, as some of her witnesses testify, it was not heard by anybody on the yacht or other vessels near. The yacht, therefore, had a right to suppose that the easterly channel was clear. But even had the tug's long whistle been heard, if she gave any, her position in the easterly channel was not such as to forbid the yacht from taking that channel with two schooners impeding the course toward the middle and north channel; for upon the westerly course that the yacht was holding, the evidence shows that there was no difficulty in her going to the westerly side of the easterly channel, and that when the exchange of one whistle was made, there would have been no difficulty in passing the tug, had the tug observed her duty. The yacht had a right to assume that the tug would go to the right, as her whistle and the rule required. As soon as the whistles were exchanged the yacht did all that was required of her in porting her wheel, for there was time enough and space enough for the tug to go to the right. I am satisfied that the yacht backed as soon as she could perceive that the tug was not doing her duty. She was under no obligation to stop and back as soon as the exchange of one whistle was made; because that exchange of whistles was a suitable and sufficient provision for avoiding the collision, had the tug performed her duty. That exchange of whistles for the time being, therefore, determined the risk of collision, as the yacht had a right to assume; and as soon as the risk of collision could reasonably be apprehended anew, the yacht reversed. This was all that was required of her by the rules, or by common sense and prudence. The collisione therefor being the fault of the tug, the libel must be dismissed with costs."

## YACHT NEWS NOTES.

The ladies' day race of the White Bear Yachting Association on June 18, brought out a fleet of fifteen yachts, all but one manned in part by ladies, Hornet sailing over but not being eligible. The wind was light from the west; the times were:

The inquest on the bodies of Nicholas Michaels and Mary Simonin, who were drowned on June 11 in the Hudson River through the running down of their rowboat by the steam yacht Alva, was held on June 29, the verdict of the jury being accidental drowning. The testimony of Capt. Morrison, of the Alva, was to the effect that the rowboat, after once stopping, was rowed directly in the yacht's course, the oarsman being frightened and making no effort to row on out of danger. The yacht at the time was in such close proximity to the warship Atlanta that she had little room to clear the rowboat at the last moment.

Only three boats started in the second championship race of the Mosquito Fleet Y. C., of South Boston, on July 2. The wind was strong S.W. and the times were:

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Tantrum, F. L. Perkins | 11.00 | 1 07 20 | 1 07 20 |
| Escort, W. H. Radsom | 14.11 | 1 07 45 | 1 07 40 |
| Annie, E. H. Rich | 14.08 | 1 09 21 | 1 09 01 |

This makes the second leg won by Tantrum.

Freak, the Paine fin-keel, is now completed, and sailed her first race on Monday. She carries a wire stay from the end of her bowsprit to the fore end of her fin-keel, to guard the latter from weeds and similar obstructions; an attachment which she is likely to dispense with after a very brief trial.

Titania, centerboard cutter, has been sold by C. Oliver Iselin, for whom she was built in 1887 from Mr. Burgess's designs by Piepgrass, to Robert H. Inman, owner of Adelaide. Mr. Inman will fit her out at once. She is still on the shore at Piepgrass' yard, City Island.

The owner of the Norwood has deposited the sum of $25,000 in the Park Bank, of New York, as a wager that the yacht can perform several feats in the way of fast steaming in smooth water. On July 1 Norwood made a record run of two miles at New London.

On June 27 Messrs. Read Bros., of Fall River, launched the Mabel F. Swift No. 2, designed and built by them for Mr. C. W. Anthony. The new yacht is a centerboard cutter, 53ft. over all, 34ft. 2in. l.w.l., 13ft. 6in. beam and 5ft. draft.

At a recent meeting of the Boston Y. C., resolutions of condolence were passed over the death of Augustus Russ, one of the founders of the club, its treasurer from its organization until 1886 inclusive, and its commodore in the years 1887, 1888, 1890 and 1891.

On June 27 the new Boston steam yacht Navarch No. 2, built by Ambrose Martin for Com. C. F. Merrill, South Boston Y. C., was launched at Jeffries Point, East Boston.

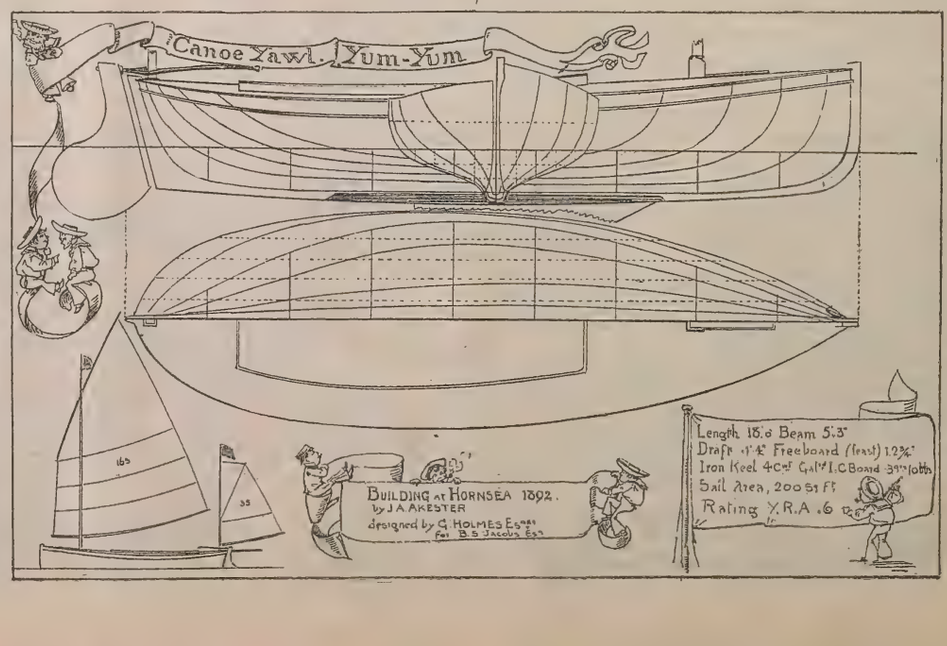
The race of the Rochester Y. C. on June 22, was postponed indefinitely on account of the disappearance of the lake buoys, none of which could be found by the competing yachts.

Lasca, the new Smith schooner owned by Mr Brooks, took her first sail on Saturday afternoon. Capt. Rhodes, formerly of Sea Fox, will command her.

Exile, 21-footer, has shipped a hollow mast, and one has been got out for Thrush.

*Small Yachts. By C. P. Kunhardt. Price $10. Steam Yachts and Launches. By C. P. Kunhardt. Price $3. Yachts, Boats and Canoes. By C. Stansfield-Hicks. Price $3.50. Steam Machinery. By Donaldson. Price $1.50.*

## Savin Hill Y. C., July 2.



THE first of a series of races for cups offered by the Savin Hill Y.C. for club boats was sailed on Saturday in a fresh S.W. wind, the times being:

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| SPECIAL CLASS. | | | |
| Annie, E. P. Sharp | 22.02 | 1 26 00 | 1 01 12 |
| FIRST CLASS. | | | |
| Mildred G., G. L. Sears | 25.02 | 1 24 23 | 1 02 14 |
| Annie Maud, F. O. Vegelahn | Not meas. | 1 26 47 | ..... |
| SECOND CLASS. | | | |
| Arab, W. F. Scott | 19.11 | 1 24 30 | 57 32 |
| Siko, F. A. McInnes | 19.08 | 1 28 55 | 1 01 41 |
| THIRD CLASS. | | | |
| Marchioness, C. E. Hodges | 16.01 | 1 30 00 | 58 27 |
| Florrie, W. H. Besarick | 16.06 | 1 31 40 | 1 00 41 |

The winners each take a leg for a class cup.

## Humber Yawl Club.

THE little yearly record of the Humber Yawl Club, of Hull, Eng, is a unique affair, the list of members and boats being supplemented by a number of clever sketches, short cruises and lines of new craft, two specimens of which we reproduce. The club, which is devoted mainly to canoe yawls, has a membership of 50, with as many boats, canoe-yawls and wide canoes.

# Canoeing.

## FIXTURES.

JULY.

9. Toronto, Regatta and Paddling Cup, Toronto.
9. Rochester, 2d Trophy Race, Irondequoit Bay.
9-23. W. C. A. Meet, Oshkosh, Wis.
15-30. Northern Div. A. C. A. Meet, Lake Couchiching, Can
23. Rochester, 3d Trophy Race, Irondequoit Bay.

AUGUST.

4-25. A. C. A. Meet, Willsborough Pt
6. Springfield, Cup, Springfield.
15-20. A. C. A. Meet, race week, Willsborough Point.
27. Rochester, 4th Trophy Race, Irondequoit Bay.

SEPTEMBER.

3. Springfield, Cup, Springfield.
3. Brooklyn, Visiting Cruise, Passaic River.
3. Orange, Ann., Arlington, N.J.
5. Ianthe, Annual Regatta.
8. Rochester, Fall Regatta, Irondequoit Bay.

OCTOBER.

1. Springfield, Cup, Springfield.

THERE is much sound sense in an editorial remark of the New York *Herald*, that "The only reason why there are not more carriage accidents than boating accidents is because horses have some sense." There would be still fewer accidents in pleasure craft, canoes, yachts, and rowing and sailing boats, if those in charge of boating parties knew how to manage a boat and to swim, and had the good sense to keep sober, to take no one on board who was not sober, to avoid overcrowding and skylarking, to keep all hands seated low in the boat, allowing but one person at a time to stand up in entering and leaving, to attend carefully to the direction of the boat at all times, and to carry no more ladies and children than there are good swimmers to care for them in case of a capsize. As to canoeing, a person who cannot swim should never be allowed afloat alone save in smooth and shoal water; and no one should attempt to sail or even paddle a canoe who cannot divest himself of part of his clothing and keep himself afloat for a time if thrown suddenly into the water. It is not absolutely necessary that a man should be a fast long-distance swimmer, but he should be able so regain his canoe under any ordinary circumstances and to keep himself afloat for five or ten minutes unaided. There are some accidents in which a much higher degree of proficiency is essential to safety; but in the great majority of cases it is the first one or two minutes which count, before the speediest of assistance can reach one.

BUT four weeks remain before the opening of the thirteenth annual meet of the American Canoe Association, at Willsborough Point, Lake Champlain, and the time is short for such preparations as remain to be made by clubs and individuals. Those who are not members but desire to visit the meet will have but little time to file their applications for membership with the Division pursers, as the names must be published for two weeks before approval. Those members who have not made up their mind will have to decide quickly in order to get to camp early and with all duffle in good shape. There is yet time for the various clubs to do much in the way of inducing members to attend the meet and also to do so in a way that will reflect credit on their club. In each club delegation an officer should be in sole command, or if none of the regular officers can attend, one member should be chosen to take command of the club camp. By pitching tents together, setting up a big pole for the club burgee, and maintaining a neat and well-kept camp, members may do much to improve the appearance of the whole camp, and to bring credit to their club in particular. In club work of this kind the "club bar," which has become entirely too prominent a feature in some recent camps, is not at all essential, and may well be left at home.

THE early fathers of canoeing in America were noted for a tendency toward statistics and elaborate calculations which were about as truthful and reliable as the proverbial Waterbury watch. One of them is still at it, as witness the following from the Baltimore *News*: "John Habberton says there were not twenty canoeists in the country when he began to paddle a canoe twenty years ago. Now there are 20,000 of them who write their names 'in water' every year. John Murray, of the Challenger expedition, says there are 323,000,000 cubic miles of water in the world, so that there is still room for the paddler to increase, even at the astonishing Habberton ratio."

Apropos of John Habberton's calculation as to the number of canoeists who write their names in water every year, the display of bottles about the abandoned site of the various meets of the Association and divisions suggests that there are not a few who use something stronger, possibly ink or Vichy.

## Around Lake Champlain.

THE morning air was still cool from the shower of the night before when my chum and I shouldered our packs and started for the railway station at North Leominster to take the Western express on the Fitchburg R. R. We were bound on a summer's trip by boat and afoot through the Lake Champlain region, with no definite point to reach, for we intended to go wherever fancy led us without troubling ourselves to count the passing days. My chum carried an army knapsack which had become dear to him by service on several such expeditions, but I wished to economize weight and therefore carried only an Indian pack, of which our little shelter tent and my gray camp blanket formed the basis.

Once seated in the cars and disencumbered of our luggage, we fell to talking over our journey, and refreshed ourselves with several bottles of ginger ale. Away we sped through the cool morning and hot noonday down into the fertile valley of the Connecticut and on again up through the winding valley whence Deerfield River pours down from the Berkshire Hills. Then we saw for a moment the great, yawning mouth of the Hoosac Tunnel, and with a rattle and roar the train plunged into darkness. Fifteen minutes later we stopped for dinner at North Adams on the western side of the range. The ride from here to Saratoga was uninteresting, and we were glad when, soon after crossing the upper Hudson and skirting the northern shore of Saratoga Lake, the train reached the terminal depot at Saratoga Springs, and our journey had really begun.

The roads were dusty and the heat suffocating as we tramped along the country road which winds leisurely through a fertile country toward Mt. McGregor and we were glad to stop here and there to rest in the shade or to pick the ripe, juicy raspberries which grew in the valleys. By sundown our great camp-pail was full of berries and we thought it was about time to camp. We pitched our tent in an orchard, on a hillside which sloped gently toward the south, and got some milk for our berries at a neighboring farmhouse.

I had just seated myself on the stone wall with my pail of berries and milk on my knees, and was expatiating on the beauties of camp life to my comrade, who was more modestly seated on a log, when the stone under me rolled, and alas, my views of camp life were somewhat clouded. Thus the first day ended, with a quiet evening chat and refreshing sleep, disturbed only by the curiosity of some horses which were pastured in the adjoining field.

The days that followed were like the first. We visited Mt. McGregor and the cottage where Gen. Grant died. It is a spot of great natural beauty. The surrounding country is generally flat and stretches away in a broad circle of green plain and woods, specked with white villages and solitary farms, until the blue sky sinks to meet it on every side.

Then there was Glens Falls with its arched cave in the great sandstone ledge below the falls. This cave is the scene of the opening chapters of Cooper's "Last of the Mohicans," and as one stands at the further opening of the passage and listens to the dull roar of the falls and watches the great patches of foam go whirling past, he can almost imagine that the centuries have turned back and that he is witnessing the stirring scenes of the "Leather Stocking Tales."

Other interesting spots were close at hand and we made our camp one night near the shores of Bloody Pond in the gloomy shadow of French Mountain. It is no wonder that the place has a dismal aspect, for here occurred the massacre which has stained Montcalm's name in English memories. The garrison of Fort William Henry had surrendered to the French officer, and under a promise that they would not serve again during the war were allowed to return to their homes. But as they passed along the narrow trail between the mountain and the pond they were attacked by the Indian allies of the French, and being wholly unarmed were massacred almost to a man.

It was not far to the southern end of Lake George, at Caldwell, where Forts William Henry and St. Edward and the little Fort St. George guarded the gateway from Canada until the final success of England in 1759.

We spent some time around the shores of the lake and at last one afternoon came back to Caldwell and boarded the steamer Horicon for a trip down the lake. We got seats in the bow of the boat and spread out our map of the lake in order to recognize the places of interest.

As we swung away from the pier the beauty of the lake burst suddenly upon our eyes. The water was clear as crystal, so that you could look down into immeasurable depths, and stretched away to shores where brown rock and green clad hills rose sheer from the water's edge.

Woody islands half concealed the entrance to innumerable bays, the main lake itself wound here and there among the hills, so that it seemed at times as if we must sail through the mountain wall, but at an unexpected moment a cleft would appear among the hills and a new stretch of lake open before us. The spray that leaped from the bow of our steamer fell back in the form of silver rain. The water was unruffled by the slightest breeze. The green hills were mirrored in its edge and did not lose in color by the reflection. Here and there along the shore beautiful villas glistened on the hillsides, while small hamlets clustered on the shore at points where there was a good landing. Here we saw men fishing lazily from the wharf or putting out in boats for more ambitious efforts.

One of the wildest spots was Roger's Rock, a lofty precipice to which no tree or plant can cling, where he who gave the rock its name leaped to the lake to escape his Indian pursuers.

When the boat reached Baldwin the twilight was rapidly deepening. After taking supper at the old tavern, we walked outside the village and rolled up in our blankets on a grassy bluff which overlooked the lake and its outlet.

The next day saw us in possession of a good skiff and bound on a voyage down Lake Champlain. "It's all very well to cruise here," said the good people along the shore, "but wait till you get down beyond Port Henry; then you'll have lake enough." Well, we did in time. But first we visited the historic places in the narrow end of the lake. The ruins of old Fort Ticonderoga stand on an old promontory between the lake and the river which connects lakes George and Champlain. The garrison house, powder magazine and redoubts are still in a fair state of preservation, and the hollow ways inside the fort can still be traced.

Crown Point was even a finer ruin. A strong earthwork incloses eleven acres, and inside four large barracks, built of rough slate, mark the limits of the old parade ground. Two of these barracks, though roofless, are still in good condition, and one is sure to notice the great fireplaces which are built into the wall of every room. On one of the walls is cut the inscription "G. R. (Georgius Rex), 1759," with the broad arrow and St. Andrew's cross. It was probably cut by some English soldier who wished to signify that the capture of the old French stronghold in 1759 had made the spot forever English soil.

And now we were really on the broader part of Lake Champlain, the only American lake that has a history. Before the Dutch had settled at Manhattan or the Mayflower landed her little band of Pilgrims at Plymouth, as early as the year 1609, the waters of this lake had been explored by the great French adventurer whose name it bears. For 150 years the hostile troops of two great nations passed up and down its valley. They left in their passage material for many a legend, and one cannot travel long without hearing some story of our country's "heroic age."

One of the finest bits of scenery on this part of the lake is Split Rock, the famous *rocher fendu*. The western shore is here a lofty limestone cliff, gray in color, mottled and striped with iron ore. The day of our visit was very calm and we were able to row close to the cliff and look up at its dizzy height while we thought of the 400ft. to which it sank through the green water at its base.

It was very pleasant to get up in the early morning, cook breakfast, and row until it was time to go ashore for dinner at some farmhouse, then to row on again for a spell and go into camp about 4 o'clock. Two of our camping places were especially beautiful. The first was on the shore of a shallow, sandy bay at the mouth of the Willsborough River. Our tent stood in a grove of pines which grew a rod or two from the shore, and as we sat there writing letters we had a view of many miles of lake. Just about sunset we rowed up the river a short distance, and, as the twilight deepened, floated back with the current. The blackness and coldness of the river water, the silent flight of birds overhead, and the dismal croaking of frogs coming to us across the water, lulled us into a frame of mind which was in keeping with the Sunday evening.

One afternoon we were driven ashore by a squall at the mouth of the Ausable River. After the sea had gone down we rowed to Valcour Island and camped at the head of the little bay on its western shore. Across a broad stretch of blue lake lay a semicircle of white, sandy beach, at the upper end of which stood a row of tall, spire-like poplars resting on the background of the blue Adirondack hills. The splendor of the sunset was added to this beauty, and we sat looking out over the waters until darkness shut out the picture from our view and it was time to roll up in our blankets and listen to the weird night sounds until we fell asleep.

In the bay, opposite our camp, Arnold's fleet was defeated by the British in 1776, and when the water is low you can still see the skeleton of his flagship, the Royal Savage, near the rocky islet south of Valcour.

We had grown rather tired of boating, so from Plattsburg we took a side trip into the lumber woods and the Northern Adirondacks. It was a strange region, rarely visited by tourists. We went from settlement to settlement along the old lumber roads, many nights coming across deserted logging camps, and spending other nights in the deep forest.

One of our most striking adventures befell us on the very edge of the "bush country." We had camped one night on the rough road which leads from Purdy's Mills to Jerusalem and Jericho (this is a biblical country, you perceive). The midgets were exceedingly attentive that evening, and at last we decided to break camp and travel all night. We knew that it was five miles to the next cabane, but the midgets were more terrible than the journey in the dark, even though we had been entertained all day with bear and panther stories by the natives. It was now twenty minutes of nine, and quite dark.

For two miles and a half we stumbled along over a corduroy road which was made up of tilting logs where they were not needed and deep mud holes where they were. Suddenly we heard a terrible scream in the distance. I looked at Allen, and he looked at me. "That's a panther's yell!" I said. We increased our pace decidedly. In a few minutes the cry rang out again. This time it was nearer. We grasped our hatchets and revolvers and started on a run. Every few moments one of us would stumble over a log and go down with a crash. Again the cry was repeated, and we immediately broke the record for all short distances.

We came to a *cabane* in the center of a clearing. All was dark inside, but we knocked at the door. It opened, and by the faint starlight we saw an old French lumberman. After a short parley in French and English we were admitted. It was a rather ticklish situation, for we did not know what sort of a crowd there might be inside. Some one lighted a lamp which burned a piece of porous wood instead of a wick, and by its light we saw that the only other occupants of the room were an old half-breed woman and a boy some 18 years old. We concluded that it would not be well to tell our real business in the country, and therefore passed as fellows looking for a job at the lakes. The old Frenchman was very communicative, and filled the evening with stories of adventure. He had taken us for Canadian spies at first, he said. Some years before he had been concerned in the Riel Rebellion and had lived ever since in fear of the Canadian Government.

He told how the game warden came up from Albany every year, and of a good joke he once played on him. It was winter and the deer were "in yard" in the snow of a mountain valley. He got the warden into one of the deepest paths and got an old buck started down it, so that the warden barely escaped with his life. He told us also of the murderer King who had been hiding in the "bush" for four years, and of the fight on last election day when the Canucks and Yankees laid out four Norwegians with clubs. He had a bitter hatred for the rich and said that the people of the bush country killed deer whenever they wanted them, but that when a rich fellow came up from New York his very guide betrayed him and got the reward.

We awoke after a refreshing sleep on the *cabane* floor. The lumberman was already stirring and we soon sat down to breakfast, which consisted of fried salt pork, eggs, bread and tea (without milk or sugar). Our host excused himself because he had no potatoes—they were very high, and for his simple life a luxury.

We spent many pleasant days tramping through the bush country and in Saranac boat or canoe upon the lakes, and among the pleasantest memories of our whole trip is that of the little whitewashed log huts and the mongrel French of their kind-hearted owners. For these people are kind-hearted in spite of their rough exterior, and many a man, in his rough, picturesque imagery, speaks of the deer as the "wild sheep," and kills, not for sport, but for livelihood.

Well, on Sunday morning we reappeared on the streets of Plattsburgh in season to shock the worthy people who were streaming into the churchyard and a few hours later were again on Lake Champlain. Our course lay to Lacolle, across the Canadian line. On this way lay picturesque Point au Roche, jutting out with lines of green and brown from a low green shore. Of course we saw the old Alburgh ferry as we returned along the Vermont shore and visited Isle la Motte and its quarries.

One moonlight evening we tried to row to Maquam, but our map was at fault and we were saved from going out into Broad Lake only by a chance meeting with a boatload of young people who invited us to their cottage on the South Sister Island. Next day, however, we reached Maquam, only to be detained several days by bad weather.

Toward evening on one of these days of waiting we were swinging lazily in hammocks on the crest of a bluff, which rose rocky and covered with cedars on the western shore. All day long dark clouds had been scurrying across the sky and the sheep had been running on the lake, as the fresh-water sailors say. But now the clouds lay piled on the western horizon, fitfully lighted by the embers of the sunset. When first we noticed them they were in the shape of the walls of some ancient city, with battlements and lofty towers, whose softened lines suggested untold age. But as we looked the hand of time was laid upon the city; great blocks of stone were dislodged, rolled down and crumbled into dust.

The walls opened and we saw a fair city with gilded domes and minarets and countless dingy roofs, while in the plain beyond a deep blue mountain pointed toward the evening star.

An unknown force breathed upon the city and walls and roofs gave forth a crimson glow. The heat increased; palaces, temples and hovels, all were fused in the vast crucible, the earth itself melted away, and against the glowing sky the solitary mountain still kept guard, the symbol of eternity in the midst of endless change. Then weird forms crept across the sky and sank struggling into endless fiery depths, until at last the fire seemed spent and all was black again.

Slowly the cloud mass took the form of a massive human face. Darker and more malignant it grew, ink-black, with eyes and mouth and nostrils of fire, until on a sudden a terrible flash shot forth from those bloodshot eyes, a look of infinite hatred and cunning blended with insufferable pain, searing its image into our memory forever—the sun had set.

After the storm was over we continued south, visiting St. Albans and minor places along the shore. One Sunday we stayed at Georgia and attended church. A farmer had offered to board us if we would let him use our boat. We ate "three loaves" and he caught "two small fishes."

I remember well how I took our skiff on my back across the Sandbar Bridge, and our visit to South Hero, and the evening row to Burlington across the broad stretch of lake where the Adirondacks and Green Mountains seem to meet at north and south.

We spent some time at Burlington and of course visited Shelburne Farms, the residence of Dr. Webb, but our pleasantest visit was to Ausable Chasm. We crossed by steamer to Port Kent and went by rail to the chasm. The Ausable River plunges into this chasm and flows through it in a channel from 5 to 10ft. wide with walls which measure in places nearly 200ft. For a part of the distance there is good walking along the brink of the river, lower down there is a trestle and hand-rail, while at the end is a wild boatride through the rapids of the little cañon.

To one who has seen the great western cañons and has looked up from their sunless depths to the narrow cleft and strip of darkened sky where the stars shine at noonday, this place has but little grandeur. But it has an element of beauty which many of the Western cañons lack, in that its walls are not so black and gloomy, and are more livened by vegetation. Indeed the picture of the glittering white sandstone walls rising ledge by ledge from the foaming stream, with gnarled cedars growing on every shelf, which the song of the thrush, and the squirrel's chatter are heard above the gurgling of the waters—this picture of life and sunlight leaves a pleasant impression upon one's memory which is totally different from the awe-stricken silence with which he emerges from one of those abysses where neither light nor life can dwell.

From Burlington to Ticonderoga we took passage on the canal boat John H. Ireland, Capt. Tom Kelly, Mate Tom, Jr. When we came on board Capt. Kelly was just lamenting the destruction of sixty barrels of beer, which had been seized and poured into the sewer by the Vermont authorities. "Sixty barrel o' beer!" he said. "Sixty barrel o' beer! Oh, Tom, me boy, there was many a good drunk in that. Sure, they'd never 'a' dared to do it among the longshore boys in New York. Sixty barrel o' beer! Sixty barrel!" He repeated this, mournfully shaking his head, at intervals all day long. The Ireland was one of twelve boats in the tow, lashed two and two, and as we followed rapidly in the wake of our powerful tug, we had a good chance to observe the strange life of the canal-boatmen.

We had spent part of the evening in the forecastle in order to escape the chilly air, but about midnight we came on deck again. All was bustle and confusion in the tow, for they were preparing to drop a boat at the iron furnace just above Port Henry. It was a striking scene—the shouting and creaking of ropes in the pitchy darkness and the weird, blood-red eye of the blast furnace glaring down upon us and lighting up the black lake water.

At Port Henry we lowered our skiff into the water and made fast to a tow of twenty-five loaded boats bound for Whitehall. Our lake adventures closed in a fitting way when our skiff broke loose at 4 o'clock in the morning and was saved only by a rash jump from the canal boat.

We left our skiff at Ti, and after crossing the lake on the wheezy old ferry, started for the summit of the Green Mountains. Our path led us through the region which was the scene of Ethan Allen's adventures with the New York officers, and to Lake Dunmore, a beautiful sheet of water with a mountainous eastern shore, where the great outlaw took refuge in a cave when they pressed him too closely.

From Lake Dunmore we passed down a beautiful valley between two ranges of the Green Mountains to Rutland, and thence up to Mt. Holly. The last two days of our tramp it rained steadily, so at Ludlow we took the train, and rapidly descending into and down the valley of the Connecticut, were again at Leominster, and had filled the measure of our summer wanderings.

W. R. BUCKMINSTER.

MALDEN, Mass.

## Arlington C. C. Anuual, June 25.

WEST ARLINGTON—PASSAIC RIVER.

THE Arlington C. C. held its first club regatta of the season on June 25, and proved a decided success; the following events being contested:

Event I., paddling, any canoe, seven entries: R. E. Molloy, Redante, first; B. R. Room, La Tosca, second; G. L. Crowell, Jr., Snake, third; C. V. Schuyler, Meda, fourth; R. Ellis, Surprise, fifth; H. Frazer, Zinga, sixth; F. J. Gibson, Joy, seventh.

Event II., paddling, tandem, open canoes, four crews: R. E. Molloy and H. Frazer, Zinga, first; R. Ellis and F. Gibson, Surprise, second; B. R. Room and G. L. Crowell, Snake, third; I. V. Dorland and C. V. Schuyler, Meda, fourth.

Event III., paddling club, two crews of four: Meda, I. V. Dorland, C. V. Schuyler, R. Ellis and H. Frazer, first; Snake, B. R. Room, R. E. Molloy, C. P. Shepard and P. E. Brockway, second.

Event IV., paddling upset, four entries: C. V. Schuyler, Meda, first; B. R. Room, La Tosca, second; G. L. Crowell, Jr., Snake, third; C. P. Shepard, Joy, fourth.

Event V., swimming: G. L. Crowell, Jr., first; B. R. Room, second; C. V. Schuyler, third; C. P. Shepard, fourth.

The club house has recently been much improved in appearance as well as in utility by the addition of a large covered balcony over the river. The club is now in a prosperous condition, its membership having increased materially this season, and it expects to send a delegation of at least six men to the A. C. A. meet. On May 28-31 a cruise was made by a party of nine, from Chatham, N. J., down the Passaic River, and several members propose to repeat the trip on July 4. The annual open regatta will be held on Labor Day, Sept. 5, in the morning. A number of club races will be held through the season, the next on July 16, all canoeists being welcome. The club house may be reached by the N. Y. & G. L. R. R., from Chambers street, N. Y., to West Arlington, the afternoon trains running at 1:30 and 3:22.

## A. C. A. Membership.

THE following gentlemen have applied for membership in the A. C. A.: Eastern Division—Sayward Galbraith, Springfield, Mass. Central Division—J. F. Nash, Albany, N. Y.

Canoeists who have attended the last two meets of the A. C. A. will learn with regret of the death of Mrs. Schuyler, wife of C. V. Schuyler, of the Arlington C. C., which occured on June 30. Mrs. Schuyler was a canoeist, a member of the A. C. A. and a lover of camp life. She was a victim to consumption, a trip to Florida last fall failing to arrest the disease.

## CANOE NEWS NOTES.

THE canoeists of Trenton, N. J., have obtained permission from the Park Commissioners to erect a club house on the Park land along the Delaware River, and a handsome two story building will be commenced very soon. Among the gentlemen interested are Messrs. Edmund C. Hill, W. C. Lawrence, J. B. Agnew, F. B Yard, Joseph O. Rickey, Jr., H. A. Hill, Fred. W. Donnelly, G. V. Packer, J. Wallace Hoff, H. C. Allen, Wm. B. Kirkbride, E. D. Anderson, F. W. Sigler, C. H. Swan, C. Carper, David S. South, Wm. T. Furman, R. P. Wilson and Herbert Lanning.

Many of the visitors of the coming A. C. A. meet at Lake Champlain will profit by their near proximity to the Adirondacks to make a trip, however short, into this famous resort. To them, and also to those who to reach the camp must pass through some of the most noted localities of the early colonial wars, since doubly celebrated by their natural beauty and historic interest, the new edition of Stoddard's "Adirondacks," a copy of which we have just received, will prove indispensable as a guide and cicerone

A very sad accident to a war canoe occurred on July 2, in which six young men were drowned. The war canoe Minnewawa, of the Grand Trunk Boating Club of Montreal, started out on Saturday afternoon with a crew of 17 bound for St. Helen's Island, in the St. Lawrence River. The canoe was capsized and but eleven of the crew were rescued by boats which put out for the purpose, the bodies of the other six not being recovered.

The New York C. C. has surprised itself and violated the traditions of years by a veritable canoe cruise made this week.

# Rifle Range and Gallery.

### Revolver Shooting in England.

THERE is to be an extra prize for revolvers this year at Bisley, besides the eleven already mentioned. It is to be called the "Smith & Wesson" and is to be shot for with target revolvers, open to all comers, at 20yds., at a target appearing and disappearing at intervals of three seconds. First prize is a Smith & Wesson .38cal. Russian model target revolver, gold plated and pearl stock, presented by the makers. It has been decided, on the recommendation of Mr. Walter Winans, to reduce the 50yds. revolver bullseye from 8in. to 6in., but his suggestion that the "inner" should be reduced in proportion has not been adopted; the "inner" will therefore remain at 16in., leaving a ring 5in. wide round the bullseye, much too wide for a target meant for fine shooting. There seems some hitch about getting up a pistol competition as distinct from revolvers. The English revolver makers are experimenting in the direction of .303cal. for revolvers and they have attempted to induce the English National Rifle Association to sanction that caliber at Bisley this year, but without success so far, .38cal. being the minimum allowed for revolvers.

The new revolver range of the South London Rifle Club, at Staines, is not ready yet, but it is hoped it will be completed in time for members to begin practicing for Bisley next week.

The 50yds. pool target at Bisley is to have a 6in. bullseye with a 4in. ring inside this, shots in this ring only to count.

For the 50yds. competitions this ring inside the bullseye will not be used.

The best scores to hand in practice for the various competitions at moving targets at 20yds. have all been made by Mr. Walter Winans with various Smith & Wesson revolvers. They are: Disappearing target, with military revolver, 38; with target revolver, 39; at sliding target, 39 (with target revolver), equal to his winning score last year at Bisley where the target had the easier 3in. bullseye; rapid firing, 36, with military revolver; this target is in sight only twelve seconds, during which time all six shots must be fired. The bullseye being only 2in. at 20yds. makes it very difficult to get the aim rapid enough with military sights. Mr. Winans got five of his six shots into the 3in. center, three of them being bullseyes.

The English National Rifle Association have now decided to adopt Mr. Winans's suggestion of having smaller sub-divisions round the bullseye in the 50yds. revolver target. The bullseye being 6in., inner 10in., and "magpie" 16in. This will make it into a practical target. The Martin Smith competition at Bisley for hunting rifles at 110yds. stationary target used to be next the "running deer," this spot has been objected to by many of the competitors as being too much exposed to the wind, the range has therefore been removed to a sheltered spot to the west of the revolver range, a thick hedge being the full length of the range on the side the wind generally blows from; this ought to improve the scores several points. It has been decided not to have any competition for single shot pistols, but perhaps this can be arranged next year.

### Cincinnati Rifle Association.

THE regular shoot of the Cincinnati Rifle Association was held on its range to-day—the shooting conditions were very unfavorable, there being a bad 6 o'clock fish tail wind; 200yds. off-hand, standard target:

### Chicago Rifles.

CHICAGO, June 28.—At the weekly shoot which took place this evening at the Burley and Erickson gallery, 146 South Halsted street, formerly known as Geo. McCune's gallery, the following scores were made, possible 300:

| | | | |
|---|---|---|---|
| C A Haukle | 271 | Jos Hosie | 260 |
| W J Gibbs | 271 | G L Cutler | 257 |
| H S Burley | 262 | A McBean | 253 |
| W Frisbie | 252 | F Erickson | 247 |

In the sweepstake that followed Mr. Haukle won. The public will notice the change of name in gallery. Owing to the sickness of Mr. McCune he was obliged to dispose of his business, and Mr. Burley and Mr. Erickson can be quoted as being thoroughly conversant in the shooting gallery business, as both are members of the Garden City rifle team, they appreciate the wants of their customers; they have had the gallery refitted at a great expense both as to scenery, guns, pistols, targets and a drinking fountain. As a rifle shot Mr. Burley need scarcely be mentioned, as it is a well known fact that he is one of the finest marksmen (both long and short range) in Chicago, and in the championship revolver contest throughout the United States, which took place last spring, he captured second prize, closely crowding first place. He has been in the gallery business for several years throughout the United States and is well known to all the marksmen here. Mr. Erickson is genial in his way and a thorough gentleman, always ready to please and assist his fellow men. With the above enterprising men in the gallery sportsmen need not lack for accommodations. It may be added that the championship diamond medal contest will take place at the Burley & Erickson gallery, commencing July 11 instead of the McCune gallery as heretofore given out. All desiring to enter please make application to Burley & Erickson, 146 South Halsted street. C. A. HAUKLE.

### Rensselaerwyck.

ALBANY, June 30.—The following scores were made to-day by members of the Third Brigade Rifle Association, at Rensselaerwyck range. Shooting was at 200yds., Standard American target; conditions were unfavorable for high scores:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Chas P Frey (off-hand) | 8 | 9 | 6 | 6 | 5 | 8 | 9 | 8 | 6 | 6—71 |
| | 10 | 7 | 8 | 5 | 4 | 5 | 7 | 9 | 9 | 9—73 |
| | 7 | 5 | 5 | 9 | 9 | 6 | 6 | 5 | 4 | 6—62 |
| Wm C Gomph (rest) | 7 | 6 | 12 | 12 | 6 | 8 | 10 | 7 | 8 | 9—83 |
| | 11 | 12 | 8 | 9 | 10 | 7 | 8 | 10 | 10 | 7—82 |
| | 8 | 11 | 12 | 11 | 11 | 10 | 8 | 9 | 12 | 10—102 |
| Off-hand | 6 | 10 | 6 | 7 | 8 | 7 | 8 | 6 | 8 | 10—76 |
| Major Chas H Gaus (rest) | 10 | 10 | 12 | 12 | 9 | 12 | 12 | 12 | 9 | 10—108 |
| | 11 | 11 | 12 | 10 | 12 | 11 | 12 | 9 | 12 | 12—112 |
| | 12 | 9 | 11 | 12 | 10 | 8 | 9 | 11 | 9 | 11—102 |
| Off-hand | 7 | 6 | 8 | 7 | 8 | 10 | 9 | 10 | 8 | 8—81 |

### The Rifle at Shell Mound Park, Cal.

SAN FRANCISCO, June 25.—The crack of heavy-weight pistols to-day at Shell Mound Park informed the people of that neighborhood that the officers of the Second Brigade and First Regiment were holding a State shoot with .45cal. pistols. The scores:

State Shoot, Staff of Second Brigade.

| | | | |
|---|---|---|---|
| Gen D'ckinson | 0234324234—27 | Maj Easton | 0322202304—18 |
| Lieu-Col Edwards | 4244424033—30 | Maj Dodd | 2454444245—38 |
| Maj Stanley | 0442323323—26 | Maj Miller | 4443335344—38 |
| Maj Dubose | 0222442504—25 | Capt Coleman | 0000220000— 4 |
| Maj Miles | 2220000022—10 | Capt Smith | 3202444354—32 |

Score Officers First Regiment:

| | | | |
|---|---|---|---|
| Col Sullivan | 4022403223—22 | Lieut Barrere | 4344455445—42 |
| Maj Gallwey | 4344044333—32 | Maj Burdick | 3434443304—32 |
| Lieut Bull | 3352243433—34 | | |

### The Revolver Championship.

Dr. Louis Bell is keeping his hand in at revolver work for the meeting with his first challenger, W. Geo. Jantzer. A recent

target is shown in the annexed cut of 6 shots at 20yds., measuring 5½in. as the string. It is a good line target, but the distance from the center one too great.

### Massachusetts Rifle Association.

BOSTON, July 2.—The Massachusetts Rifle Association held its regular weekly shoot at its range to-day with a good attendance of shooters. A strong, unsteady 6 to 9 o'clock wind kept the scores down rather low. Mr. French won the bronze seal medal Below are the scores in detail, distance 200yds., standard American target, all being re-entry matches:

All-Comers' Off-Hand Match.

| | | | |
|---|---|---|---|
| W Charles | 80 | F Daniels | 75 |
| C H Eastman | 79 | H H Martin | 74 |
| A Law | 76 | J A Jones | 72 |
| A N Winchester | 75 | E H Foote | 70 |
| D Bayley | 70 | | |
| O Moore | 68 | | |
| D N Winn | 65 | | |

All-Comers' Rest Match.

| | | | |
|---|---|---|---|
| W P Thompson | 109 | J Hurd | 103 |
| R E Hunter | 103 | H L Willard | 102 |
| J French | 103 | A H Ballard | 101 |
| J B Hobbs | 98 | | |
| D Martin | 97 | | |
| H E Newton | 92 | | |

Pistol Medal-match—50yds.

| | | | |
|---|---|---|---|
| L Bell | 95 | O Moore | 90 |
| M T Day | 91 | A G Stevens | 88 |
| D Martin | 84 | | |

All-Comers' Pistol Match—50yds.

| | | | |
|---|---|---|---|
| L R Avay | 89 | J A Jones | 81 |
| A G Stevens | 83 | J B Hobbs | 80 |

O. S.

### Lady Miller Rifle Club.

HOBOKEN, N. J., June 30.—Card receiver, three months, one winning most, 80ft. rest:

| | | | | | |
|---|---|---|---|---|---|
| Miss T Sina | 236 | Miss K Born | 243 | Miss L Sessmann | 242 |
| Miss A Cordts | 242 | Miss J Vogal | 236 | Miss L Kelly | 215 |
| Miss H Stadler | 228 | Miss M Miller | 239 | Mrs D Miller | 231 |
| Mrs H Meyer | 243 | | | | |

# Trap Shooting.

All ties divided unless otherwise reported.

### FIXTURES.

If you want your shoot to be announced here send in notice like the following:

July 11-14.—Durant Gun Club's tournament and first interstate shoot, Durant, Miss.

July 12.—Boston Shooting Association tournament, under management of Capt. Frank Cowee, Wellington, Mass.

July 12-13.—Battle Creek Gun Club's tournament and State League shoot, Battle Creek, Mich.

July 12-13.—White House Gun Club tournament, at White House, N. J.

July 12-15.—Peoria Gun Club tournament, Peoria, Ill.

July 13.—Hadlyme Gun Club's tournament, Hadlyme, Conn.

July 14-16.—Second annual tournament, under management of Wallace and Miles P. Miller, Austin, Tex.

July 21-22.—Independent Gun Club tournament, Plainfield, N. J.

July 18-20.—Baltimore Gun Club, summer tournament, at Tolchester Beach, Baltimore, Md.

July 26.—Boston Shooting Association's tournament, under management of Capt. A. W. Gore, Wellington, Mass.

July 28-30.—Johnson City Gun Club tournament, Johnson City, Tenn.

July 28-30.—Interstate Manufacturers' and Dealers' Association tournament, at Watertown, N. Y.

July —.—New Jersey Trap-Shooters' League, team contest, at Claremont, N. J.

Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eller, Sec'y.

Aug. 10-11.—Big Four Gun Club tournament, at Borlington, Ia.

Aug. 10-12.—Missouri State Amateur Association tournament, at Lexington, Mo. Added purses. Address G. A. Sturges, Sec'y.

Aug. 14.—Lincoln Gun Club tournament, Alameda Point, Cal.

Aug. 14.—Lincoln Gun Club's tournament, Alameda, Cal.

Aug. 19.—California State Shooting Association tournament, Concord, Cal.

Aug. 16-19.—Standard-Keystone Target and Trap Co., fifth annual tournament, at New London, Conn.

Aug. 17-18.—Gaillard Gun Club tournament, Natchez, Miss.

Aug. 17-18.—Gaillard Gun Club's tournament, Natchez, Miss.

Aug. 18-20.—Highland Gun Club tournament, Des Moines, Ia.

Aug. 23-26.—International tournament, Des-cbre-shos-ka Island, Detroit, Mich. Live birds and targets.

Aug. 29.—California State Shooting Association's tournament, Concord, Cal.

Aug. 30 to Sept. 1.—Hackettstown Gun Club tournament, at Hackettstown, N. J; two days at targets, third day at live pigeons. Address James L. Smith, Hackettstown, N. J.

September.—Saratoga Gun Club, annual tournament, at Saratoga, N. Y.

September.—Rocky Mountain Sportsmen's Association annual tournament, at Denver, Col.

Sept. 5.—Frankfort Game and Fish Protective Association, first annual tournament, at Frankfort, N. Y.

Sept. 6-8.—Central Illinois Sportsmen's Association annual tournament, at Jacksonville, Ill.

September (second week).—Interstate Manufacturers' and Dealers' Association tournament, at Auburn, N. Y.

Oct. 5-7.—First annual tournament of the Riverside Gun Club, at Red Bank, N. J. First two days targets, last day live birds John P. Cooper, Sec'y.

Oct. 12-13.—Wilmington Rod and Gun Club tournament, Wilmington, Del.

Oct. 12-13.—Wilmington Rod and Gun Club tournament, at Wilmington, Del.

Oct. 18-20.—Highland Gun Club annual fall tournament, at Des Moines, Iowa.

### The Retired Trap-Shooter.

THE Retired Trap-shooter sat in the back part of his billiard hall in the little country town, and from where he sat he could hit the stove nearly every time. A stranger came in at the door at the front.

"Morning," said the stranger.

"Mornin'" said the old shooter, not getting up. The stranger paused a while, then went over to the cigar case.

"I guess I'll take a cigar," said he.

"I lowed you'd want one," said the shooter, still remaining where he was. "What for kind a cigar 'd you want?"

"Got any ten-centers?"

"Nope. We don't hardly ever go over five down here."

"All right, I'll take a half dozen."

"All right. Just open the case and take 'em out."

"Well, here's your money."

"How much money is it?"

"Dollar."

"Can't change it. Just put the cigars back, and come in again when you've got the change."

"Do you ever play billiards here?" asked the stranger, looking at the table.

"Sure. At half-past three there's a game here every day. Bill, he's the station agent, he comes in here every day then, and him and Lewy Augenheimer, he's the saloon-keeper 'cross the street, they play a game 'bout every day."

"Well, can't you and I get up a game of pool?"

"Game of pool? Can if you don't mind playin' with eight balls. Some's busted. Our fellers don't mind that."

"How do you know I'm not one of your fellows?"

"Stand-up collar. Our fellers wears their turned down. How's your club shootin'?"

"How do you know I'm a shooter?"

"Catrich on your chain. Medal on your necktie. Reckon you're club champion?"

"I am. This medal—"

"Umph-humph. Got a box full of 'em myself. You a world-beater?"

"Well, I think I'm about as good as any of them."

"Umph-humph. Used to think that myself. Feller challenged ye?"

"Yes. That's what I wanted to see you about. You see—"

"Challenge in writin'?"

"Yes."

"Published in all the papers?"

"Yes,"

"Umph-humph. Used to do that myself."

"Yes, and he's been making an awful lot of talk about it. Says I'm afraid to shoot a man like him. Says he's beat everything in the world but me, and that I'm no shooter, but he would just shoot me once before he quit the business. He's going to retire you see."

"You retired yet?"

"No, and you see I can't now."

"Yep. Too late now. You'd orto retired before, if you know'd he was goin' to challenge you. He got a forfeit up?"

"Yes."

"'N' you covered it?"

"Yes."

"Umph-humph. I used to do that way myself when I was young. You made any talk in the papers?"

"Right along. I've given him as much as he did me; and told him I was the only shooter of much account left in the country now. I've come clear down here to ask you what to do next."

"How's your health?"

"Good."

"That's too bad. How's your gun?"

"She's all right."

"Pshaw! Shells all right?"

"The best I can get."

"Same as you always shot?"

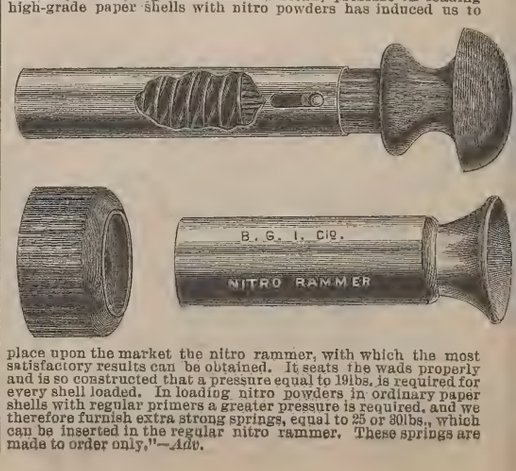
"Just the same."

"I see you're new in the business. Any death in your fambly lately?"

"No."

"Oh, yes they was."

"What do you mean?"



"Why, your Aunt Marier, respected rellertive, died this week in Ohier. On account o' w'ich lamerntable event, you will be obliged to start at onct for Ohier, and must declare all engagements in regard to the match at an end."

"Oh, I see; yes, certainly, I see."

"Say, you're a young hand at this business. Now, I'm retired myself, and have been fer years, but you sort o' stir me up again, talkin' of old times. Now, you just turn your champion man over to me. I'll take care o' him, and don't you forgit it. I only got one lung, and my wife and four daughters died last week. My shell man has disepointed me 'bout my shells, and my new gun ain't here yet. Besides, I've retired—more'n onct, 'tween you and me. You just leave me alone, and I'll make your man think he ain't no shooter at all. What chance has he got erg'inst a retired shooter with only one lung and five deaths in his fambly? Say, my friend, let me tell you something. No man with two lungs an' a healthy fambly has got any business in the trap-shootin' line. You hear me? Come in and git them cigars sometime, when you have the change."

E. HOUGH.

THE growing use of nitro powders has stimulated the invention of loading appliances specially adapted to insuring the best results from such explosives. The latest device is the Bridgeport Gun Implement Co.'s nitro rammer, of which they say: "The necessity of exerting a uniform and steady pressure in loading high-grade paper shells with nitro powders has induced us to

place upon the market the nitro rammer, with which the most satisfactory results can be obtained. It seats the wads properly and is so constructed that a pressure equal to 191bs. is required for every shell loaded. In loading nitro powders in ordinary paper shells with regular primers a greater pressure is required, and we therefore furnish extra strong springs, equal to 25 or 30lbs., which can be inserted in the regular nitro rammer. These springs are made to order only."—*Adv.*

## Willimantic Shots.

WILLIMANTIC, Conn., July 1.—The weather was very unpropitious, but quite a number of shooters put in an appearance and the shoot was a decided success. The most interesting feature was the team race between New Haven and Willimantic, which was won by the former. The race between Messrs. Willey and Burbidge and Savage and Bates of New Haven was not shot, as Mr. Burbidge failed to appear on the grounds.

No. 1, 5 birds, 50 cents entrance:

## Glenmore Rod and Gun Club.

DEXTER PARK, L. I., Wednesday, June 29.—The Glenmore's regular monthly shoot was well attended. It was the last meeting of the club's year and several of the members considerably improved their averages for the Eppig diamond badge and other extra prizes. R. Phister, Jr., E. Helgans and Adam Eppig shot well, but the first named will probably be the winner of the trophy. Fine weather and good birds made the shoot a pleasant one. The score of club shoot and sweepstake:

Club shoot, for Eppig diamond badge, at 7 live birds:

| | | | |
|---|---|---|---|
| Englebrecht (25yds.) | 1021210—5 | E Vroome (20) | 0011122—5 |
| Phister, Jr. (27) | 2111211—7 | J Bennett (30) | 1111120—6 |
| Helgans (27) | 1111211—7 | Schlieman (27) | 1200221—5 |
| Levins (27) | 0120120—4 | Vorbach (28) | 0010121—4 |
| L Eppig (25) | 1010000—2 | Vincent (27) | 1211121—7 |
| A Eppig (30) | 1111211—7 | Selover (28) | 2120122—6 |
| Still (28) | 1220110—5 | D Snipe (30) | 1111212—7 |
| Hayden (27) | 0000200—1 | F Thompson (28) | 2201110—5 |
| Dr Boehme (27) | 0211121—6 | F Thompson (25) | 1212101—6 |
| J Youngs (25) | 1110101—5 | | |

Sweepstake, $1 entrance; two moneys, 27yds.:

| | | | |
|---|---|---|---|
| Helgans | 021—2 | J Young | 110—2 |
| Hayden | 311—3 | Englebrecht | 011—2 |
| Phister | 111—3 | Still | 212—3 |
| L Eppig | 022—2 | Vorbach | 222—3 |
| A Eppig | 121—3 | | |

At the close of the regular club shoot some of the members arranged several small matches for $10 a side and the price of the birds. John Young defeated M. Hayden, and then the two as partners defeated F. Thompson and J. A. Still. The scores:

Match, 15 birds, $10 a side and birds, 27yds.

| | | | |
|---|---|---|---|
| Hayden | 120120212210111—12 | Young | 222221111211112—15 |

Team matches, $10 a side and the birds; 27yds.

| | First. | Second. | Taird. |
|---|---|---|---|
| Thompson | 11111—5 1 | 00201—2 | 0w. |
| Still | 01100—2 0 | 22210—4 | 20011—3 |
| | — — | — — | — — |
| | 7 1—8 | 6 | 3 |
| Hayden | 10011—3 0 | 02220—3 | 11011—4 |
| Young | 10111—4 0 | 21211—5 | 0w. |
| | — — | — | — |
| | 7 0—7 | 8 | 4 |

Referee, Major Pentz; scorer, Mr. C. A. Dellar.

## First German Gun Club.

DEXTER PARK, L. I., Friday July 1, 1892.—The members of the First German Gun Club of New York held their regular monthly shoot at ten birds each, Long Island rules, for the club's gold medal and an extra prize. F. Pfander and D. Neusch were the best scorers, the latter taking the medal as the former, having previously won it, was not eligible to take it a second time, so he was awarded second prize. In the sweepstake shoot the two lowest scorers had to pay for the birds and the two highest scorers divided the one prize. The scores:

Club shoot for gold medal and second cash prize:

| | | | |
|---|---|---|---|
| J Schwack | 1110001101—6 | P Neusch | 1110111011—8 |
| F Pfaender | 0011111011—8 | A Neusch | 0111000010—4 |
| A Pfaff | 1111000000—4 | A Loetz | 0110110110—6 |
| J Miller | 1001111100—6 | F Breitstein | 1011001111— 7 |
| C Schell | 0111011110—7 | H Zahn | 0111110101—7 |
| J Restedt | 0000100101—3 | | |

Sweepstake, $1 entry:

| | | | |
|---|---|---|---|
| J Schwack | 101 | C Schell | 0w |
| F Pfaender | 011 | J Restedt | 010 |
| A Pfaff | 000 | P Neusch | 101 |
| J Miller | 000 | A Neusch | 100 |
| A Loetz | 111 | | |
| F Breitstein | 111 | | |
| H Zahn | 011 | | |

Referee, Mr. F. Pfaender.

## The New Jersey State League.

THE Jersey shooters turned out strong at the monthly shoot of the New Jersey Trap Shooters' League, held under the auspices of the Independent Gun Club on their Plainfield grounds on June 30. Up to 1:30 P. M. the weather was favorable, but a that hour the clouds began to gather and a two o'clock at very heavy shower drove all hands from the field and compelled them to remain under cover for nearly an hour. Afterward the sport went merrily on until dark.

The grounds of the Independent Gun Club are situated about a mile from the depot, the roads between the two places being macadamized. They have a club house 15x20ft., one story in height. The grounds nestle down under the shadow of the mountain and are surrounded by heavy woods. The location is a picturesque one. On the above day Charley Smith, the Teutonic gent with the "Dutchy" cognomen, had a huge fly-tent pitched under some big trees and here he served up clam chowder, sandwiches and pies that would tickle the palate of an epicure.

The attendance previous to the noon hour was very light, but afterward the number steadily increased until fully fifty shooters were on the grounds. It was feared during the early hours that a small number of team entries would be received, but the management was agreeably disappointed to have nine teams report. The team shoot was under the supervision of Neaf Apgar, manager of the League, assisted by Secretary Wm. R. Hobart. It was close to 3 P. M. when the team match was called, Chas. H. Townsend, trap editor of FOREST AND STREAM, being the official scorer. The result of the contest was another victory for the team of the Independent Gun Club, which rolled up a grand total of 115 breaks out of 125 targets shot at, an average of 92 per cent. Enoch D. Miller, who is slowly recovering from a severe attack of bilious dysentery, put up a clean score of breaks, this being the only one made in the contest. There were eight full teams and one short one, that of the Brunswick Gun Club, which could muster only four men. Below are detailed scores of the team shoot:

East Orange G. C.

| | |

## Auburn Gun Club.

AUBURN, July 1.—The Auburn Gun Club to-day had a change of sport, and answered a long siege of talk by an acceptance of the offer of the City Baseball club for a game of baseball. There were several hundred spectators and they saw the Baseball Club suffer its first defeat at the hands of the gunmen by a score of 36 to 16.

## Freche Outshoots Reinhardt.

A FAIRLY cool air, a pretty stiff easterly wind, a good gray light and two hundred birds, the like of which are seldom seen at this season, were the combination at John Erb's "Old Stone House" grounds in Newark, N. J., on July 2, when Gus Freche and Chris. Reinhardt, both of Newark Gun Club, had a battle royal for the possession of a $200 purse. The match was made on the previous week, and as no notice had been given the public through the columns of the sporting or lay press, barely half a hundred people saw it. It was nearly three o'clock when Freche appeared on the scene and 3:05 when the first shot was fired. Chas. M. Hedden was selected as referee and C. H. Townsend, trap editor of FOREST AND STREAM, as official scorer. Reinhardt won the toss and he sent Freche to the score, the latter making a kill of a moderately fast incomer to the left. Reinhardt next downed a right incomer. Freche's 13th bird was an awfully tricky twisting left-quartering driver, killed with a fine first. His 14th, in the same direction, was also a fine kill, as was his 19th, 31st, 33d (fine second), 57st, 58th (a long second on an ugly bird), 68th, 69th and 79th. The star bird of the day was Reinhardt's 83d, an awfully fast left-quartering driver which dodged the first, after which Chris let it straighten in its flight and then brought it out of the air at full 70yds. This was a phenomenal shot. His 9th, 11th, 15th, 20th, 25th, 28th, 31st, 36th, 43d, 44th, 56th, 57th, 60th, 69th, 74th, 75th, 83d and 98th birds were also very hard ones. His 54th bird, a right-quartering driver, caught two full loads, flew within a few yards of the boundary, then turned and went across the grounds to the left and fell stone dead near the left fence. This was certainly a lead carrier. His 71st bird fell dead a foot inside the boundary. While some of this lot of birds had to be flushed, they were still, as a whole, the best lot of fivers I ever saw at this season. The score of the shoot is detailed below:

*Trap score type—Copyrigh 1892, by Forest and Stream Publishing Co.*

1 1 1 0 2 1 1 1 1 0 2 1 1 1 1 0 1 1 1 1 1 0—18—80

Reinhardt had the match all his own way until it was over half shot, after which he seemed to lose his grip, while Freche steadied down to business. The chances at various stages are shown by the following table of kills in strings of 5 birds each:

First Half.

| | |
|---|---|
| Freche | 3 8 11 15 19 22 27 30 34 37 |
| Reinhardt | 4 8 13 18 21 25 29 33 37 42 |

Second Half.

| | |
|---|---|
| Freche | 41 46 51 56 61 65 68 73 77 81 |
| Reinhardt | 47 50 55 57 61 65 69 72 76 80 |

Previous to the above race a "warmer" was shot in the form of a $1 miss-and-out, the result being as shown below:

| | | | |
|---|---|---|---|
| Hedden | 1112 | Erb | 10 |
| Reinhardt | 1111 | Hollis | 0 |
| Castle | 2110 | | |

Hedden and Reinhardt div.

After the race the appended sweeps were shot, 4 birds each, $3 entry, two moneys, all ties divided. Hurlingham rules governed, as they did in the match:

| | | | |
|---|---|---|---|
| Caetle | 1100—2 | 1122—4 | 1111—4 |
| Hollis | 2111—4 | 1111—4 | 0120—2 |
| Hedden | 2112—4 | 0021—2 | 1201—3 |
| Griffin | 1121—4 | 0110—2 | 1011—3 |
| Erb | 0110—2 | 2020—2 | 1222—4 |

## New Utrecht Gun Club.

WOODLAWN PARK, L. I., July 2.—The weekly competition for the first and second medals of the New Utrecht Gun Club for Keystone target shooting was well patronized on Saturday. Each member shot at 20 targets, 20yds. rise, right and left angles. A. A. Hegeman, the youngest member of the club, was the winner of the first medal with 18. W. F. Sykes won the second medal by defeating D. Deacon and J. Lott. In the sweepstake, at live birds, 28 and 30yds., the first prize was divided between P. Hegeman, D. Deacon, C. A. Sykes and R. R. Street. The second prize was also divided between W. F. Sykes, J. Lott, J. P. Adams and A. A. Hegeman. The scores:

Club shoot, at 20 Keystone targets, 20yds. rise, two medals:

| | | | |
|---|---|---|---|
| P A Hegeman | 11 | H Zeigler | 7 |
| M Van Brunt | 15 | J P Adams | 8 |
| D Deacon | 15 | W F Sykes | 15 |
| P Adams | 2 | R R Street | 10 |
| C A Sykes | 12 | | |
| L G Mitchell | 0 | | |
| A A Hegeman | 18 | | |
| J Lott | 15 | | |

Sweepstake shoot:

| | | | |
|---|---|---|---|
| P A Hegeman | 11111—5 | W F Sykes | 10122—4 |
| D Deacon | 22112—5 | R R Street | 21122—5 |
| P Adams | 00002—1 | C A Sykes | 11111—5 |
| H Zeigler | 0°022—3 | A A Hegeman | 01111—4 |
| J P Adams | 21210—4 | J Lott | 02211—4 |

## Erie Gun Club.

WOODLAWN PARK, L. I., July 1.—The postponed shoot of the Erie Gun Club was held at Woodlawn Park, L. I., on Friday. The wet weather considerably interfered with the attendance, only seven competing for the club medal and extra prizes. The birds were a fair lot. C. Mohrman won the medal and first prize with the only straight score of 7. H. Janskowsky took the second and J. Plate the third prizes. Two sweepstakes were shot off at 5 birds each, all ties divided. The scores:

Club shoot for medal and extra prizes:

| | | | |
|---|---|---|---|
| H Dohrman | 2211120—6 | J Plate | 0011211—5 |
| H Janskowsky | 2112102—6 | C Plate | 1111110—6 |
| Elssasser | 1010122—5 | H Blattmacher | 1011101—5 |
| C Mohrman | 2112112—7 | | |

Sweepstake shoots, $1 entrance, 2 moneys in each:

| | | | |
|---|---|---|---|
| H Dohrman | 12021—4 | | 22201—4 |
| H Janskowsky | 10120—3 | | 20100—2 |
| M Elssasser | 12212—5 | | 12101—4 |
| C Mohrman | 21012—4 | | 22111—5 |
| J Plate | 20212—4 | | 20121—4 |
| C Plate | 21112—5 | | 20112—4 |
| H Blattmacher | 21001—3 | | 12213—5 |

## Pennsylvania State Sportsmen's Association.

HARRISBURG, Pa., June 28, 1892.—*To the Clubs Composing the Pennsylvania Sportsmen's Association:* Do not fail to elect one delegate to attend the annual meeting of the Association at Reading, Pa., Aug. 9, 1892, at 8 P. M. It is especially intended to make the discussion of game and fish protection and propagation the important feature of this meeting. All delegates are therefore requested to be prepared to express the views of their clubs on these subjects. Suggestions and papers bearing on the revision of our game laws and the best means to secure legislative action will be most acceptable and receive close attention. United action and a clearly defined course of procedure for the ensuing year will undoubtedly bring success.—C. E. H. BRELSFORD, Pres.

## Rochester Rod and Gun Club.

ROCHESTER, N. Y., June 29.—The third badge shoot of the Rochester Rod and Gun Club took place this afternoon at the Monroe avenue grounds. The manner of the contest is a slightly peculiar one, the persons taking first place in the six separate shoots contesting at a seventh shoot for first place, and the same with those taking second place. The score of the shoot, which was at 25 bluerocks, follows:

| | | | |
|---|---|---|---|
| Stewart | 23 | Richmond | 20 |
| Hadley | 21 | Borst | 19 |
| McVean | 21 | Mills | 19 |
| Mann | 20 | C S Smith | 18 |
| Creegan | 20 | Hicks | 18 |
| | | McCarthy | 17 |
| | | Babcock | 16 |
| | | Griffith | 15 |
| | | Don | 9 |

## DRIVERS AND TWISTERS.

THE North End Gun Club, of Frankford, Pa., has been reorganized under the name of the Keystone Shooting League. The *Sporting Item* has the following anent the reorganization: "The spirit of reorganization that has pervaded the North End Gun Club, of Frankford, for some time, has at last borne fruit. The energy of the members has resulted in placing the club upon a good sound footing. To properly accomplish this result, it was found desirable to change the name of the club to Keystone Shooting League and incorporate the same, and this has been done. The prime reason for changing the name of the club was that the name of the North End Gun Club had made it so prominent that its name was pirated by every vagrant crowd who needed notoriety; hence, the name originated by the club over ten years ago, was discarded and Keystone Shooting League adopted. The men who brought the old North End into the very front rank of shooting circles, are the bone and sinew of the Keystone Shooting League, aided by fresh and constant accessions of tried and true men at the trap. The Wolstencroft brothers, Welch, Rust, Irwine, Kleinz, E. D. Miller, Treadway, Pack, Greenwood, and a host of others no less prominent, whose skill with the shotgun does not need the telling, shows the quantity of timber possessed by the league. New grounds have been secured near Bridesburg Station, P. R. R., and plans have been made for a new and commodious club house. Wednesday has been selected for regular weekly practice, and trappers will always be in attendance. Plenty of traps for either inanimate or live bird shooting have been provided, and members of other clubs, and visitors generally, are cordially invited to come and spoil all the ammunition they wish. The shooting fraternity are requested to make a note of change of name for future reference." Communications should be addressed to the secretary, John C. Shallcroft, 1,930 Harrison street, Frankford, Pa.

* * *

The meeting of the State League of Trap-Shooters at Lansing, Mich., was well attended, there being nearly sixty present from Battle Creek, Jackson, Manchester, Ovid, Kalamazoo, Detroit, Morenci, Mason, Vicksburg and Grand Rapids. The League was organized in Jackson, May 26. Its roster contains the names of some of the best trap shooters in the State. The officers are: President, J. C. Nichols, Lansing; first Vice-President, E. E. Thresher, Kalamazoo; Second Vice-President, H. E. Sutton, Jackson; Third Vice-President, N. A. Osgood, Battle Creek; Fourth Vice-President, N. W. Holt, Manchester; Fifth Vice-President, T. A. Rowley, Morenci; Secretary and treasurer, W. O. Woodworth, Grand Rapids. The League will hold two shoots during the season, the first being at Battle Creek, July 12 and 13, and the second at Grand Rapids, the date to be fixed later. The Cleveland bluerocks were adopted as the standard pigeon of the club.

* * *

Wm. Tell Mitchell, of Lynch Station, Va., although not heard of very often during the last four or five years, is by no means a new comer to the pigeon shooting ranks; as far back as 1878 he was able to hold his own with the best of the experts. He has shot six matches against John L. Brewer, the scores in each being as follows: 100 birds each, Mitchell 86, Brewer 92; Mitchell 88, Brewer 98. Out of 94 birds, Mitchell 88, Brewer 89 (match declared off owing to scarcity of birds). 50-bird matches, Mitchell 46, Brewer 44; Mitchell 47, Brewer 46; Mithell 48, Brewer 48. This gives him a grand total of 403 kills to Brewer's 417 out of 444 birds shot at. Living, as he does, in a very paradise for game, Mr. Mitchell has unlimited facilities for keeping up his practice and the chances are that during the fall he will make a tour of the Western States and shoot a dozen or more matches en route against the best men he can find. His best hold is in a 50-bird race.

* * *

The championship live bird match of the Hollywood Shooting Club was held at Hollywood Park, N. J., July 2. The entrance fee was $100. The conditions were fifty birds each at 30yds. rise. The wind blowing quite strongly from the southeast carried the birds quickly out of bounds, and therefore the scores made were on the whole very creditable. The winner of the match was R. E. Thompson of New York, who has won two previous matches this season, the last one being at Tuxedo, a couple of weeks ago. J. S. Hoey was referee of the match, and H. B. Wallack was the scorer. Following is the score: J. S. Williams, 38; T. S. Davids, 46; A. W. Money; 40; L. T. Davenport, 42, Fred Hoey, 39; E. J. Murphy, 44; E. R. Ladew, 33; R. E. Thompson, 47; Dr. W. Wilson, 36; Geo. Work, 40; W. G. Murphy, 28; C. Dolan, 41. W. G. Murphy withdrew after the thirty-seventh round.

* * *

The Baltimore (Md.) Gun Club are now making a very liberal offer to every one to take part in their weekly shoots, so as to promote the sport and get the citizens of the town interested in the sport. Thursday of every week they hold a match at Acton's Park, and Saturdays another at Tolchester. The members of the club have decided to furnish the shells and targets for 5 cents a shot to any one who wishes to take part, and, if you are not so fortunate as to own a gun, they will lend you one. This offer should certainly be liberal enough to induce many who are fond of shooting to take part, as it is cheaper than the shells and targets can be bought for by any private individual.

* * *

H. B. Bishop writes us that every effort will be made by the White House Gun Club to make their first annual tournament on July 12 and 13 a grand success. White House, N. J., is forty-five miles from New York, on the line of the New Jersey Central, the grounds are within easy reach of the depot and there are two good hotels in the town. Keystone targets and traps will be used. Plenty of lunch and ammunition will be on the ground. The club is very anxious to see all the New York, Pennsylvania and New Jersey experts present.

* * *

Frank Class, the New Jersey champion, has been showing phenomenal form for several months, and just at present should be able to give even Brewer a run for his money. In his recent matches he has shot at 600 birds and killed 565, an average of 94 1-6. In five matches at 100 birds each he has killed in order 94, 94, 93, 93 and 95. On June 29 he killed 48 out of 50, and in two matches at 25 birds each he killed 25 and 24.

* * *

James E. Wheaton, of the Newark (N. J.) Gun Club, and R. N. Shelley, of Morristown, N. J., will test one another's nerve on the Morristown Driving Track next Tuesday. They will each shoot at 25 live pigeons, 30yds. rise, Hurlingham rules to govern, for $25 a side. Frank Class will have several hundred good birds on hand and open to all sweepstakes will preceed and follow the match.

* * *

The Watertown Gun Club is looking forward to a large attendance and a fine time for shooters at the Interstate Manufacturers' and Dealers' Association tournament, to be held on their grounds at Watertown, N. Y., July 26, 27, 28. Keystones will be used. The grounds are easy of access and pleasantly situated. Programmes will be ready in a few days.

* * *

The fourth annual inter-state tournament at West Point, Miss., will be held Aug. 9, 10, 11 and 12; open to the world; $100 in gold added. The American Revised Association rules to govern all contests. A regular old-time "befo' de wah" barbecue will be served at 1 o'clock each day on the grounds. Geo. C. Nance is manager.

* * *

A match at 50 singles and 25 pairs of targets will take place on John Erb's grounds, Newark, N. J, early in August. The entrance fee will be $10, exclusive of the cost of the targets. There will also be a number of fifteen target events shot off on the same day open to all comers.

* * *

And, speaking of live birds, what a farce it is to attempt to have any sport in shooting them at this season of the year! It would be policy to drop the sport between June 1 and October 1, as during that period birds are not only hard to find, but those that are found are soft and unfit to shoot at.

* * *

Frank Fralic was severy injured by a prematurely sprung trap at the range of the Bradford (Pa.) Gun Club on June 25. He was repairing the trap; a boy pulled a string and the arm struck Frank across the mouth, bruising his upper lip and loosening several teeth.

* * *

Frank Class will have a three day's tournament which will be a formal opening of his new grounds, the last of this month. The first two days will be devoted to saucer smashing and the last day to shooting live pigeons.

* * *

"Tec Kay" and "Dutchy" say they will give the boys a great time during the Independent Gun Club tournament at Plainfield, July 21 and 22. They are both graduates of the famous Middlesex Gun Club and know just how to handle a shoot.

* * *

Thomas Brantingham, of the Independent Gun Club of Plainfield, N. J., has recently been shooting in his oldtime winning form. On June 30 he averaged 93 1-10 per cent. in shooting at 145 targets. Tom is looking for a position with some gun firm.

* * *

Gus Manitz and Jos. Williamson shot a match at ten live birds for $10 a side on the Essex county toboggan club grounds on June 25, the result being a victory for Williamson, who shot Manitz out on the seventh round.

* * *

West Orange, N. J. has a new organization known as the Ivy Hill Gun Club, which shoots at artificials every second Saturday. The club is comprised of amateurs only who shoot simply for practice.

* * *

The Washington City Rod and Gun Club held a tournament on June 29 but the scores were missing when the writer reached the town.

* * *

Plans are now being arranged for a grand tournament of Iowa, Minnesota and Dakota sportsmen at LeMars, Ia., about Aug. 1.

* * *

Frank Class will run a three days' tournament at Morristown this month. Artificials for two days and live birds on the third.

* * *

J. FRANK CLASS.

The eighth annual tournament of the Baltimore Gun Club at Tolchester Beach, Md., on July 18-20, will be attended by a big crowd.

* * *

Frank Class is shooting the race of his life and is anxious to try his skill against some of the "world beaters."

* * *

The South End Gunning Club, of Reading, Pa., has fine grounds on Boyer's Island and shoots twice each week.

* * *

A gold watch will be shot for on the grounds of the West End Gun Club at Conshohocken, Pa., on July 16.

* * *

A number of Jersey sportsmen are strongly in favor of stopping live bird shooting from June 1 to October 1.

* * *

Lieut.-Col. Breintnall shot an average of 91 4-10 at the New Jersey League shoot.

* * *

Harry Mowry, of the *Sporting Goods Gazette*, of Syracuse, was in town last week.

* * *

Over 50,000 kingbird targets were thrown during the New York State shoot.

* * *

John Erb says gun clubs should stop shooting live pigeons from June 1 to October 1.

* * *

The next shoot in the Connecticut circuit will be held at Wallingford the last week in July.

* * *

The Peoria (Ill.) Gun Club tournament on July 12-15 will draw all the Western men.

* * *

E D. Fulford is pushing work on a new telephone line to run from Cleveland to Chicago.

* * *

Billy Wagner thinks of going on the road provided he can procure the right kind of an opening.

* * *

The Wilmington (Del.) Rod and Gun Club will elect officers on July 11.

* * *

The Standard-Keystone tournament will attract a big crowd to New London.

* * *

The Johnson City (Tenn.) Gun Club's programme is a great one.

* * *

A gun club is to be organized in Peoria, Ill.

### Boston Shooting.

WELLINGTON, Mass., July 2.—The following scores were made to-day in the merchandise match at the weekly shoot of the Boston Shooting Association: Class A—Sanborn 23, Climax 22, Bradbury 21, Stone 17. Class B—Gore 21, Deftochemont 20, Amsden 17, Gale 17, Daniels 15.

### Shooting at Morristown.

FOR a number of years the Morristown (N. J.) Driving Park, controlled by Sire Brothers, has been noted for the memorable trotting matches which have taken place there, but until June 29 it had no standing as a trap-shooting ground. On that date, however, it was formally dedicated to the cause, when Frank Class and W. T. Mitchell shot a match at 50 live pigeons each. The park, which is about 1¼ miles from the D. L. & W. depot, is admirably adapted to the sport. Right at the entrance is a commodious and well-kept hotel where meals and lunch can always be procured at reasonable figures. A short distance beyond is a large and well-built grand stand, and directly opposite this across the track, where the ground is level almost as a table, is where the shoot was held. All around there is clear ground to the park fence. On three sides the park is bordered with a heavy wood. When the match in question was shot the grounds were not in as good trim as they might have been, there being no boundary staked off, and consequently no way of telling whether a bird was in or out of bounds except by pacing off the distance. Then again the grass was cut only for a few yards from the traps.

In my account of the Woodlawn match I stated that the match at Morristown would be at 100 birds, but upon arriving at the latter place I found that the men were to shoot at only 50 birds each, the result of this to also decide the tie match of the previous day. The day was a splendid one both for shooters and birds. The sun was warm and bright, but over the mountain tops came a refreshing breeze which caused the birds to feel like flying. The birds, which were furnished by Robert Cox, of New York, were all blue ones, old and hardy, and while some of them were slow in starting, they flew like demons once they felt the wind under their wings.

It was 2:50 when the match started, Dr. P. J. Zeglio, of Warrenville, N. J., being referee; C. H. Townsend, trap editor of FOREST AND STREAM, and Frank Mason, of the *American Field*, official scorers; John Harrison, of Dover, N. J., trap puller. At this time there were on the grounds beside the above Harry Piper, Frank Piper, James Timmins and R. N. Shelley, of Morristown; John Riggotts, of Rockaway; James E. Wheaton, of Newark; Mr. Thomas, the well-known dog fancier of Denver, Col.; P. Cockefair, of Bloomfield, N. J.; Mrs. Frank Class, of Pine Brook; Fred. Class, of Pine Brook, and perhaps seventy-five others.

Class was in his best form, and no matter how hard the birds flew he mowed them down in great shape until he had 46 straight kills to his credit. His 47th bird, however, an ugly zig-zagging left-quartering driver, broke his run, as it took two full loads of No. 7 and went outside to die. His next bird was hit with the first, but dodged out of the second and got away. He finished his score with 48 kills.

Mitchell was not so fortunate. He caught a circling dodger on the opening round and scored a lost bird. His 16th, a right-quartering incomer, got safely through both loads, as did his 33d in the safe direction; his 46th, a zigzagging driver, and his 50th, another right-quartering incomer. This left him 45 kills.

Both men made some beautiful kills during the match. Class's 6, 9, 11, 14, 15, 21, 22, 24, 41, 36, 39 and 42 were all better than average birds, his 6, 9, 22, 31 and 42 being particularly fine kills. Mitchell's star birds were his 18, 22, 23, 28, 38, 39 and 41, all of which called forth applause. He also did great work on his 4, 11, 12, 20, 25, 30, 34 and 37 birds.

The particularly weak point of the Virginia man seems to be on right-quartering incomers. It will be noticed that he had only seven birds to take this flight. Of these he lost three, and the others were merely "slobbered" down. On birds that go away from him, no matter how fast or what style of flight, he seems to be capable of doing fine work, but he is surely in need of improvement in his work on incomers. The guns and loads used were precisely the same in all particulars as those used in the Woodlawn match.

The score of the Morristown match is here shown in detail:

After the match the following sweepstakes were shot:

Four birds, $3 entry, three moneys:

| | | | | | |
|---|---|---|---|---|---|
| J E Wheaton | 1202—3 | 2210—3 | J Timmons | 1210—3 | 2222—4 |
| F Thomas | 2012—3 | 0011—2 | J Leonard | 0002—1 | 0022—2 |
| P Jay | 2102—3 | 2112—4 | W Armstrong | 1000—1 | 2012—3 |
| J Riggott | 0112—3 | 1011—3 | R N Shelley | 2020—2 | 0020—1 |

In the second event Armstrong and Riggott divided on the shoot off, after killing 6 each.

### The Fountain Gun Club.

WOODLAWN PARK, L. I., June 29.—The members of the Fountain Gun Club held their postponed shoot at Woodlawn Park on Wednesday. The attendance was not as large as usual, but the marksmanship was up to the average. H. W. Blattmacher and Abel Crook did some fine shooting. The weather was delightful, birds good and a fine afternoon's sport was enjoyed by those present.

Club shoot for annual prizes, best averages, 10 live birds, 5 traps, unknown angles, 80yds. boundary, M. & R. rules.

First Sweep.—First divided, VanZile and McLaughlin divided second on shoot-off.

Second Sweep.—VanZile, Crook and Elsasser divided first on shoot-off.

Referee, Mr. H. McLaughlin.

### The Hollywood Matches.

LONG BRANCH, N. J.—Louis Duryea, of Glen Cove, L. I., shooting as L. T. Davenport, was the winner of the Futurity Cup at the opening Hollywood shoot on July 1, 25 birds, handicap rise, ties at 5 birds, entrance $50, or only $25 if declared out by May 15, 60 per cent. and the cup to the winner, 30 per cent. to the second and 10 per cent to the third; two declared:

```
L T Davenport (30yds.).....1211122222122222221112222—25
E G Murphy (31yds.).....2021222022222222222222222—23

Fred Hoey (31yds.).....2220222210220210021002w
```

Ties.—E. C. Murphy, 22222; W. Wilson, 01221.

Immediately after the Futurity the match and post entries for the Schmidt and Peters prize of three cases of yellow label champagne, miss and out, took place. The entries were the same as for the Futurity, with the addition of Messrs. Dando, Moorehead, Green and Capt. Money. Edgar Murphy had to shoot fifteen birds straight to win, Dando being second with fourteen.

### Blasted Expectations.

Hotel Guest—"Meester, what you call dem long bill tings?"
Sportsman—"Woodcocks."
Hotel Guest—"Vell, sir, I kill twenty-four woodcocks before brakefast."
Sportsman—"What! Where?"
Hotel Guest—"In mine pedroom."
Sportsman—"Oh, get out! You mean muskeeters."
Hotel Guest—Vell, den, I kill twenty-four muskeeters before brakefast in mine pedroom dis morning."—*Exchange.*

### Seattle Rod and Gun Club.

SEATTLE, Wash., June 25.—The Seattle Rod and Gun Club held its regular medal shoot to-day at its grounds in West Seattle. The honors in the first class were won by W. A. Hardy, in the second by Downing and in the third by Haven. The scores were as follows:

| | | | | | |
|---|---|---|---|---|---|
| | First Class. | | | | |
| Churchill | 1101010111111011101—15 | 00 | 10 | 11— | 3—18 |
| Joe Hardy | 1111111101111101111101—17 | 10 | 10 | 11— | 4—21 |
| W A Hardy | 1111111111111100111—17 | 01 | 11 | 11— | 5—22 |
| | Second Class. | | | | |
| F Webber | 1610101000011110100010— 9 | 10 | 10 | 10— | 3—12 |
| Downing | 10110101'01101011111—14 | 10 | 01 | 10— | 3—17 |
| | Third Class. | | | | |
| Hoisington | 0010000010011000000— 5 | 10 | 10 | 10— | 3— 8 |
| Haven | 0010101010100100100— 7 | 10 | 11 | 10— | 4—11 |

There was also some practice shooting. In the first at 20 singles Conover killed 19 and A. H. Harrison 11. The second at 20 singles gave Haven 13, Downing 16, Conover 16, Churchill 18, Joe Hardy 17. In another at 10 singles Weber killed 9, Atkins 9 and Harrison 6.

### The Down Town Gun Club.

GRASSMERE, Staten Island, July 1.—Owing to wet weather, the second shoot of the Down Town Gun Club did not prove much of a success at their new shooting grounds, Grassmere, Staten Island. Eleven competed for the club's medal, at nine birds each, modified Long Island rules, 20yds. rise. C. Wolf won the trophy with a score of eight out of nine. The score:

| | | | |
|---|---|---|---|
| H Ruppell | 110111000—5 | J Doscher | 110101110—6 |
| L Maisch | 011111100—6 | C Wissing | 000100010—2 |

| H Fajer | 010111010—6 | C Hammer | 010110110—5 |
| W Joost | 111110100—6 | J Schmelz | 101111000—5 |
| J W Schmenger | 110010110—5 | | |

## Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

C. V. H., Chadwick.—Is there an attachment for the wheel of a naphtha launch to prevent the grass from entangling around it? Please answer in your next issue. Ans.—A great many experiments have been made to get something to serve the purpose, but without success. So far as we have been able to ascertain there is nothing that will do the work successfully.

C. W. H. Wellsboro, Pa.—Can you give me a recipe for dyeing gut for leaders lead color? Ans.—The favorite "mist" color is produced in gut in two very different ways. The old way is to immerse the gut for several minutes in a stain made by boiling a drachm of ground logwood and 6gr. of copperas in a pint and a half of water. This is considered objectionable by many anglers. A simpler plan is to use Arnold's writing fluid or French writing ink diluted with an equal quantity of cold water for the stain. By changing the proportions of ink and water almost any tint from greenish blue to dark brown can be produced.

N. T. L, New York.—Where, and from whom, can I get some small-mouth and large-mouth black bass? I am desirious of stocking a pond which I think suitable for this purpose, with these fish. Would also like to know about wall-eyed pike. Ans. Hugo Mulertt, Brooklyn, N. Y., advertises black bass for sale at 25 cents each and special rates for large numbers. He may be able to furnish wall-eyed pike also. This fish, known also as pike perch and Susquehanna salmon, is a valuable kind, but is not considered suitable for small ponds, it is better adapted to lakes and large rivers. The Susquehanna and the Delaware have been well stocked with the fish. In the upper Connecticut a specimen weighing 11½lbs. was taken, while spawning, in April. The pike perch grows to the weight of 40lbs. As a food and game fish it has few superiors.

### CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

318 Broadway, New York.

Athletes, Cyclists, Baseball and Football Players, Horse-back riders, Boxers and Oarsmen;
when you want to ride, run, walk, row, skate or swim a long distance,

ANTI-STIFF

It is a marvelous preparation for Strengthening the Muscular System. With Anti-Stiff there is no faith required; it goes straight for the muscles, and you can feel it at work. It has a peculiarly warming, comforting, and stimulating effect on all weak or stiff muscles and sinews. Quick in its action, cleanly and pleasant in use. Rub it into the muscles every night for a fortnight, and you will be pleased at its supporting and strengthening properties. There is not, nor has been, anything like it till now. It differs from all Oils, Embrocations and Liniments, both in substance and effect. Some Athletes are so fond of it that they rub it all over them.

Price 20c. and 35c. per box.
Trainers size, $1.00.

E. FOUGERA & CO., AGENTS FOR U. S. 30 N. WILLIAM ST., N. Y.

## For Sale.

Breeder, Shipper and Dealer in Chester White, Berkshire and Poland China Pigs, Fine Setter Dogs, Collies, Fox Hounds and Beagles, Sheep & Poultry. GEO. B. HICKMAN, West Chester, Pa. Send stamp for Circular.

FOR THOROUGHBRED LIVE STOCK, including genuine rough-coated Scotch collies, Swiftsure foxhounds, English beagles, registered Jersey, Guernsey, Ayrshire and Holstein-Friesian cattle, sheep, land and water fowls, pigs, etc. Address SAMUEL H. NULL, West Grove, Pa.

LIVE WHITE HARES (*Lepus americanus*) captured and properly boxed and delivered to express in Bethel, Me., in good condition on receipt of orders and remittances at $3 per pair. Refer to Hon. H. O. Stanley, Dixfield, Me., Fish and Game Commissioner. I. G. RICH, Bethel, Me.

FOR SALE—SMITH HAMMERLESS 10-ga., 8lbs. 14oz., Damascus barrels, full pistol grip, never shot over fifty times; perfect condition; cost $100; will sell at a bargain. Address for full particulars F. C. JOSLYN, Syracuse, N. Y.

## Wanted.

WANTED ALIVE.

| Champion Raby Mixer | 15 |

$100 will be given for the best pup sired by any of these dogs during the year 1892. Prize to be competed for at the New York show of 1893. Donor not to compete.
HILLSIDE KENNELS,
LANCASTER, MASS.
Puppies always on hand.

Chestnut Hill Kennels'
COLLIES AT STUD.
Christopher, - - $50.
Wellesbourne Charlie, $50.
30 per cent. off to members of Collie Club.
IRISH TERRIERS.
Breda Bill, - - $20.
Puppies and grown stock for sale. Dogs of all breeds taken to board, conditioned for shows, kept at stud and sold on commission.
Address
CHESTNUT HILL KENNELS,
Chestnut Hill, Philadelphia.

ARISTOCRAT
(Ch. Plinlimmon ex Lady Adelaide.)
Winner of forty first and special prizes, including five first and four specials this season, won almost consecutively. The tallest and heaviest son of Plinlimmon. He is the sire of Lord Courtenay, winner of second prize at the late St. Bernard Club show, Birmingham, also Baronet, winner of over forty prizes and specials, and numerous others. The above named progeny proves him to be one of the most successful stud dogs of to-day.
Fee $50.

YOUNG KEEPER
(Keeper ex Surprise, by Guide.)
This young dog has a massive and typical head. This with his superb breeding should be of especial value to bitches weak in that respect.
Fee $25.
DUTCHESS KENNELS, 1639 Third Ave., N. Y.
EDWARD BOOTH, Manager.

AT STUD.
IRISH AND ENGLISH SETTERS.
**Ch. Inchiquin**, 18,191, imported. The most famous sire in America. His get never fail to win when shown, and are remarkably handsome and excellent field dogs, just the blood needed to advance the Irish setter in America. Stud fee $25.
**Prince Noble**, 3242, English setter, blue belton, by Count Noble—Lassie, grand field dog; his get are first-class field dogs. Stud fee $20.
**Gus Gladstone**, 8210, by ch. Gladstone—Donna J., black, white and tan. A great fielder; none better, and an excellent stock getter. Brother to Rush Gladstone, the Derby winner. Stud fee $20.
Puppies by Inchiquin always on hand out of prize winning bitches, cheap. Pedigrees and cuts on application to J. J. SCANLAN, P. O. Box 339, Fall River, Mass.

AT STUD.
THE MASTIFF ORMONDE,
Son of the great Cambrian Princess.
Ormonde has won 1st at Rockford, Freeport, Cleveland, Cincinnati, and Chicago. Is sire of 1st and 2d prize winners, Rockford, Freeport and Chicago, 1892. Some grandly bred pups for sale. Send stamp for catalogue.

## *REARING FISH FOR DISTRIBUTION.*

IN OUR comments upon the papers and discussions relative to fish distribution brought before the American Fisheries Society, we had no desire nor intention to profit by Mr. Mather's misplaced decimal point. It was our purpose merely to show how an earnest but prejudiced advocate of a certain disappointing system of stocking may let his fancy outrun his judgment and actually deceive himself by figures based upon theories not facts. It has been clearly shown, by actual trial in several localities at least, that yearling trout can be produced at a cost of about one cent each. In order to ascertain as accurately as possible the cost of attendance and transportation in the distribution of fish by the United States, we have applied to the Commissioner of Fisheries for data upon the subject. The appropriation for this work during the year ending June 30, 1891, was $50,000, nearly one-half of which was paid for salaries of employees in this branch of the work. The cars and detached messengers traveled about 180,000 miles (nearly 462 times the width of the State of New York) and five-ninths of the mileage was paid for. The distribution included about 152,000,000 eggs, 285,000,000 fry and upward of 2,000,000 fishes ranging from fingerlings to yearlings and older. If the transportation of those yearlings had cost one-tenth as much as Mr. Mather's estimate in our issue of June 30, the balance of the appropriation available for carrying 437,000,000 eggs and fry would have been only about $6,000. Evidently there is still something seriously wrong with the calculations of the fry-planters, and it will require more than talking to convince the people that a fish which they can see and count for themselves is not better than a score of fry which a sculpin can destroy in a minute.

## *FAMILIAR ACQUAINTANCES.*

### IV.—"DRAW YOUR WEASEL."

A CHAIN that is blown away by the wind and melted by the sun, links with pairs of parallel dots the gaps of farm fences and winds through and along walls and zigzag lines of rails, is likely to be the most visible sign that you will find in winter of one bold and persistent little hunter's presence.

Still less likely are you to be aware of it in summer or fall, even by such traces of his passage, for he is in league with nature to keep his secrets. When every foot of his outdoor wanderings must be recorded she makes him as white as the snow whereon it is imprinted, save his beady eyes and dark tail-tip. When summer is green and autumn gay or sad of hue she clothes him in the brown wherewith she makes so many of her wild children inconspicuous.

Yet you may see him, now and then, in his white suit or in his brown, gliding with lithe, almost snake-like movement along the lower fence rails, going forth hunting or bearing home his game, a bird or a fat field mouse. In a cranny of an old lichen-scaled stone wall you may see his bright eyes gleaming out of the darkness, like dew-drops caught in a spider's web, and then the brown head thrust cautiously forth to peer curiously at you. Then he may favor you with the exhibition of an acrobatic feat; his hinder paws, being on the ground in the position of standing, he twists his slender body so that his fore-paws are placed in just the reverse position on the stone or rail above him, and he looks upward and backward.

He may be induced to favor you with intimate and familiar acquaintance, to take bits of meat from your hand and even to climb to your lap and search your pockets and suffer you to lay a gentle hand upon him, but he has sharp teeth wherewith to resent too great liberties.

While he may be almost a pet of a household and quite a welcome visitor of rat-infested premises, he becomes one of the worst enemies of the poultry-wife when he is tempted to fall upon her broods of chicks. He seems possessed of a murderous frenzy and slays as ruthlessly and needlessly as a wolf or a human game butcher or the insatiate angler. Neither is he the friend of the sportsman, for he makes havoc among the young grouse and quail and the callow woodcock.

The trapper reviles him when he finds him in his mink trap, for all the beauty of his ermine, a worthless prize drawn in this chanceful lottery.

When every one carried his money in a purse, the weasel's slender white skin was in favor with country folk. This use survives only in the command or exhortation to "draw your weasel." When the purse was empty, it gave the spendthrift an untimely hint by creeping out of his pocket.

In the primest condition of his fur he neither keeps nor puts money in your pocket now. He is worth more to look at, with his lithe body quick with life, than to possess in death.

## *BARTER.*

THERE was hint of a scheme in "Esau's" note last week, which might be put to the test in a small way. He suggested that as the Indians of the Northwest, who capture beaver for their fur, take everything that comes to hand, old and young, the State might well afford to pay the savages for the uncaught beaver to be left uncaptured.

The system is capable of expansion. For instance, in a certain village amid the hills of eastern Connecticut lives a young fellow who pots for the market practically all the game killed in the vicinity. There are others in the village who would like to have at least a chance to improve an occasional opportunity to try to capture some of the game for themselves. This chance of an opportunity they might acquire by treaty with the Connecticut savage. Thus: "How many quail and partridges do you expect to shoot and snare this year? How much do you expect to realize for them? Will you sell them all to us at that price, we to pay you in advance now? Here is the money. Now the birds are ours. You need not capture them for us. We will do that for ourselves. And if we fail to get them all, to the last feather, we shall not expect you to refund. But, remember, we have bought the game; it is ours; you are not to interfere with it."

Or, take a trout stream: "How many trout do you expect to 'snake out' this season? At so much a pound that comes to so many dollars. Here is the money. The fish are mine. You need not trouble to catch them." As every fisherman expects to catch twice as many fish as he actually takes, the man who is paid thus in advance on a basis of his great expectations is paid twice over.

Such a plan of compromising with the powers that be would not work in cases where the shooter or the fisherman is not a simon-pure pot-hunter, but is impelled by other than mercenary motives. The expert, who shoots or who fishes partly for money and partly for fun, might readily enough anticipate his money returns for quail, or ducks, or trout, or bass; but his fun he will not sell; or, if he would, the price put on it would be beyond reach. Game and fish have a market price; but who is ever to estimate the money equivalent of the satisfaction of the making a grand shot? or the worth per minute of playing a big trout? or the price for which one would sell the present transient delight—making no account of the precious memory—of a successful day afield?

There are some things in this world we cannot buy, and there are some things in this world that the poorest and roughest and most prosaic of mortals—even an Indian—would not readily barter.

## *SNAP SHOTS.*

IN the distribution of animal life nature employs many agencies which at first seem mysterious, but admit of easy explanation. FOREST AND STREAM has contributed its share toward the fund of information upon the spread of species. A recently made and fishless pond becomes stocked with fish without human intervention and the result is a source of wonder until inquiry shows that winds, water birds and insects are the distributing agencies in some cases, while in other localities, notably in Florida, subterranean communication with bodies of fresh or salt water is capable of demonstration. Fish are "rained" down in the streets of a Nebraska city, or "snowed" down in a city of Tennessee. Crabs fall in the streets of San Francisco. Crawfish cover the ground near Union Depot at Cameron, Mo., after a heavy rain. These are results of cyclone action and have come under observation in localities widely remote. Frogs and worms are often carried in the same way, but for the most part these are simply brought out from hiding by rain and do not "drop from the clouds."

---

The picture on another page entitled "In a July Woodcock Cover," was taken of an old woodcock shooter who was well known to many of our readers. He is no longer living, but in his life he was a good shot and a good fellow, and had followed the dogs in many fields. No one ever enjoyed summer shooting more than he, yet no one strove more earnestly to have it forbidden both by law and public sentiment. If ever there was a pleasure which was labor, it was this summer shooting. Who does not recall its tortures, its suffocating heats, its thick brush, its swarms of mosquitoes. How laboriously one used to break through the brambles and alders, and pull himself through the mire, while with one hand he wiped away the sweat and the insects, and with the other kept leaves and branches out of the eyes. It was hard work, but when one heard the ringing whistle and after the shot the rustle of the bird as it fell through the leaves, and the light thump as it struck the ground, he forgot all his sufferings.

---

"Didymus" has been prompted by "Podgers" [what names!] to utter a note of protest on the song bird millinery abomination; and he suggests that the language he uses may be intemperate. On such a subject virility of expression is in order, and the pity of it is that, however vigorous may be such denunciations of the atrocity, because aimed at the general public they are likely to prove as ineffective as did the remarks of the enraged Scotch lawyer who addressed no one in particular, but "just stood in the middle of the road and swore at large." If "Didymus" and "Podgers" had needed further proof that birds' feathers were still worn, they might have found it by studying the Christian Endeavor hosts who took possession of this town last week. There were some 35,000 of them, a large majority of the fair sex, and one noticeable characteristic, as observed by the FOREST AND STREAM, was that most of them wore birds' feathers in their bonnets.

---

Poetry is all right enough in its place; and it may serve a practical purpose when it voices humanity and a regard for bird life; but what shall be said of Mr. John Robinson's apostrophe in the *Witness* to the sportsmen to spare the birds?

> Then, sportsmen spare the birds!
> Still let the welkin ring,
> And feathered songsters symphonies
> To their Creator bring.
> Inviolate be the nest
> Beneath the verdant shade,
> Nor may the wanton, ruthless hand
> Peace and content invade.

Mr. Robinson's appeal is a work of supererogation. Sportsmen do not shoot birds in the spring, and the birds the sportsman does shoot are not of the species that join in symphonies.

---

The lawyers' year has closed, and according to the *Evening Post* the litigating lawyers of the great professional syndicates are off fishing. The Delmonico woodcock case is still untried. The records of the courts show that it is easier for a red-haired servant girl to get damages from a red-haired mistress for pulling her hair and blackening her eye, than for a game protector to get judgment against Delmonico for serving woodcock in July.

# The Sportsman Tourist.

## RAMBLES IN THE ROCKIES.

It is so long since I have had a pen in my hand that the habit of writing a chronicle of my adventures and misadventures has almost left me. A new country has to be well explored before it can be thoroughly enjoyed, and the rapid melting of the snows during the latter part of April has made excursions in every direction pleasurable as well as possible.

As soon as the passage of the mountains is practicable, and that has been for the last two weeks, the sheep that have wintered in Dixie and in Arizona come over the divide to the lambing and shearing grounds and summer ranges of the upper Sevier country. There are now no less than 130,000 sheep within twenty miles of Panguitch, and the coyotes and kitties are enjoying their annual feast. The grass no sooner starts than the sheep have it nibbled to the roots, and so all the horses and cattle must be hunted and driven out of danger of starvation up to some of the grassy cañons and parks beneath the melting glaciers, where the shepherd will hardly dare to follow. Of course, the men are apt to spend several days hunting their stock, and bacon palls upon the taste of even an epicure. Fresh meat is easily obtained, and, as a rule, I find that the men living in this vicinity are careful not to kill more than they actually need for immediate consumption, and there is, at this time of year, no danger of mistaking the sex of the animal, as the knobs on the bucks are quite prominent.

It was my good fortune to go on one of these horse hunting expeditions with a mighty hunter, whose name is Ben. Ben has lived in this country for twenty years, and has the reputation of having never shot a deer or caught a trout beyond the number required to supply himself or his camp with grub. We had neither of us tasted fresh meat during the month of March, excepting two little messes of duck, and there is no use of denying the fact that Ben carried a rifle and was resolved to defend himself to the utmost against any male *Cariacus* that might put in an appearance. In woodcraft Ben is the peer of any man that I have ever seen. When Illinois was on the frontier he hunted and fished over the great prairie region, and forty-two years ago, with the Mormon pioneers, he crossed the plains. He knows little but the frontier, and until the completion of the railroad, he freighted in Wyoming, Utah and southern California. He would not be at home on the pavements of a great city, but turn him loose in the forest or on the desert, with a blanket, matches, knife and rifle, and he is on his native heath. The sun, the stars, the bark on the trees, and the trend of the sagebrush twigs are all the compass that he needs. How little knowledge we have, those of us who claim to be sportsmen, that we do not owe the patient teachings and careful observation of these noblemen of nature, who are as destitute of the urbanities of civilization as though they had been born in the heart of the dark continent.

The first day of our outing we left our horses in the cedars, just below the snow, and proceeded to climb and wade up to the high southern exposures, where we knew the deer were sunning themselves. But the wind arose and circulated among the cliffs, so, although we climbed clear up into the realm of the grizzly and of the mountain lion, we saw nothing but tracks and droppings that were scarcely five minutes old. We must have started at least a dozen deer, yet all we saw was a white-mountain hare, that gave us every opportunity to bag him had we been so disposed. For supper we had the same old bacon and frying-pan bread, but the next morning was calm and we started out with every assurance of success. Sometimes we were in waist-deep snow and sometimes stood on barren ridges where we could look over hundreds of miles of mountain and valley. At length Ben stopped and sniffed the air.

"I smell 'em," he said, though I walked fully a quarter of a mile before I could detect the deer odor. Slowly we crawled down into a cañon and up to the top of the next hog's back. Ben looked over the edge and down into the next gulch. His rifle was poked through the branches of a pine and there was a crack. I looked below. A deer was starting to its feet and wondering which way to run. The sight went up another notch, there was another report, and Mr. Deer leaped and fell beneath the pine where he had been taking his morning nap. We packed 80lbs. of fresh meat back to the wagon, and for a week we lived "high."

Trout fishing is the great sport of this section. We have the river fishing, where trout run from 3 to 5lbs in weight; lake fishing, where trout weighing 8lbs. are frequently caught, and brook fishing, which to my mind is the most enjoyable of all. A dozen small streams enter the Severn in this immediate vicinity, and to say that they are full of trout hardly does justice to them. Under the State law, fishing below dams in streams used for irrigating purposes is allowable at any season as these are not public waters, and in Panguitch we can have a mess of trout on any day of the year.

Old residents have a theory about the movements of the trout which I give for what it is worth:

"Lake trout remain in the lake save as they enter the tributary streams for the purpose of spawning. Fry hatched in streams and creeks remain in the brooks for two years. The third season they run down to the river and return every April to spawn, seeking the river again in June. Brook trout and river trout are identical save in point of size."

This last assertion is a little too much for me to swallow, as the river trout are typical red-throats while the brook trout are more like the *fontinalis*, though somewhat darker than the brook trout of the East. In the catching of trout this spring I have averaged seven males to every female. This I can account for only on the theory that the females, being havy with spawn, lie close to the bottom and are not especially hungry. Local fishermen, who use wood grubs for bait and fish on the bottom, catch as many females as males. I tip my hook with a fish eye and troll about three or four inches below the surface. Fly-fishing will be impossible for at least another month. The immense bodies of melting snow keep the waters muddy, and about noon the waters begin to rise and do not fall until after midnight. I have tried several of the creeks with very poor success, and even the Pah Utes, whose wicciups are in every cañon, have no luck with a hook and line.

Last Saturday I went upon one of the most delightful excursions that it has been my privilege to enjoy in this mountain land. It came about in this way: About two weeks ago an insurance agent, C. D. Seymour, formerly of New York, struck the settlement. He wanted fish; so did I. This was our golden opportunity. About 3 o'clock we started for Panguitch Creek. And now a word as to this outlet of Panguitch Lake. It travels by what Cæsar would call "a circuitous route" from the lake to the river, going about 46 miles to get 16 miles from its head. For 11 or 12 miles from the settlement it has no tributary, and there is neither ranch nor cabin upon its banks. There the aspect of the country changes. There is a succession of broad meadows and narrow, picturesque cañons. The meadows are all dairy ranches, and are deserted from November until April. But the farmers have just moved back to their mountain homes, in time to protect themselves from the inroads of the sheep, and, at this time of year, when travel is almost unknown, the fisherman is a welcome visitor at the lonely cabin or the isolated tent of the herder.

The road was rocky, and we went slowly uphill for 11 miles. I am heartily glad that we had neither shotgun nor rifle, for the numbers of mourning doves and of mallards that constantly encircled us would have tempted to a trial of marksmanship. About the creek and lake greenheads breed in great numbers and afford fine sport during the open season. Nor were fresh deer signs wanting, and once a spotted lynx deigned to show himself and a coyote surveyed us from a neighboring hill. Just as the sun was touching the western mountain we drew up at an old saw mill and made camp in its deserted bunk house. The creek was too high for any fishing. It had risen 30in. since noon and was very muddy. After supper we enjoyed the pipe and camp-fire, and then when

> "The charioteer and starry gem fair,
> Hung like glorious crowns, over Orion's grave
> Low down in the west."

there was a cracking of the sage brush, a footfall on the turf and a new comer stepped into the light. It was George Dodds, who owned the adjacent ranch and who proved to be one of the very few men of this region who know anything of the outside world. Dodds left New York at the close of the war; Seymour left three years ago, and somewhere between the two I started on my western journey. It was 1 o'clock when he left and we had discussed the ins and outs of the metropolis from Castle Garden to Harlem. We had a kind of homesick feeling when we lay down on the hard bunk and tried to sleep.

Before sunrise we were driving up the creek, reveling in the sharp, bracing atmosphere of dawn. Our route lay through a meadow that was literally covered with sage hens and they were of immense size. They were mating and I could not but stop and watch their curious antics. The love-dance of the *Pediocœtes* is not new to me, but I was not prepared for any such exhibition on the part of *Centrocercus*. The strutting, the combing of the ground, the cackling reminded me of a turkey-filled barnyard. Some of the birds have already mated, as I found, later in the day, a nest containing seven eggs. It was right at the edge of a snow bank, on a bleak hillside, but I suppose the old lady knows what she is about and will look out for her brood. Our horse and cart were left at Dodds's, tied to the corral, and we went on a quarter of a mile to get grubs from a dead pine. Beneath the pines I found the first wild flowers of spring—a diminitive species of *Draba*. Each with a white grub, we wandered back to the water, and one pool gave us six trout, of which I secured five. This was most encouraging as I rather dreaded Seymour, and he fully expected to do me up. Indeed if it had not been for this streak of luck he would have had the longer string at night. On our way back to Dodds's and to breakfast we had ducks within gunshot all the time, and there were plenty of killdeer and jacksnipe. I also saw a species of jay that was new to me and that must belong, with many of our southern Utah birds, to the avifauna of Arizona and Mexico. Speaking of birds reminds me that during the day I saw a small red hawk not so large as a domestic pigeon, and witnessed a pitched battle between a flock of blackbirds and a magpie in which the larger bird was ingloriously worsted.

Dodds had breakfast ready for us, and from him I obtained many facts concerning the country, and the same details were afterward given me by other residents along the creek. The fish in the streams are not nearly so numerous as they were before the sawmill sent its refuse into the water. But there are still enough for all comers. Every spring when the waters recede from the overflowed meadows the odor of decaying trout poisons the atmosphere for miles. Fly-fishing in the creek is excellent after the middle of June, and the fly-fisher always obtains more fish than his bait-loving rival. Regarding lake trout, the statement was made that twenty tons of trout are caught annually in the lake. This seems incredible, and yet on investigation I have found that, the price of fish being 10 cents a pound at the lake, eleven men during the past winter averaged $80 each, and three men with families, who do nothing but fish from June to February, average $350 per year. Half of the twenty tons are accounted for, and the sheepmen, ranchers and summer campers can get away with a great part of the remainder. Deer are so common in the summer time that Dodds says that they often come to his corral bars while he is drinking. Mountain sheep may be obtained within a half day's ride, and antelope in a day and a half. Sage hens, grouse and pheasants (*Bonasa*) are all here in season, and ducks are common in summer. Bears are few, but the *Felidæ* have at least four representatives. Wild berries commence to ripen late in July, and the August camper can, with a half-mile walk, supply himself with fish, flesh, fowl and fruit.

Leaving Dodds's hospitality we spent the day in wandering up the creek, throwing into the most attractice pools, enjoying the magnificent scenery. Now the stream, lined with silvery willows, meandered among broad fields and the further hills were pearly with the white coats of thousands of sheep, now the pines came to the water's edge and yet again the brook cut its way through perpendicular walls of basalt. In one of these gorges the stream, 20ft. wide, was forced through a chasm less than 3ft. in width, with walls as straight as plumb line for 42ft., thence gradually receding for 350ft. further. According to the Powell survey we were, at this point, 6,000ft. above the sea level. Higher up the creek we found fine fishing at the beaver dams.

Sundown found us back at Dodds's ranch with fish enough for supper and breakfast. The evening was spent at his fireside, and Nationalism and Theosophy, Mormonism and the silver question took up the time until midnight.

Monday morning our excursion ended with a drive to the lake, from which the ice has not yet entirely melted. The open water was black with ducks. But of Panguitch Lake more at another time. We struck a splendid dinner at a sheep camp and 6 o'clock found us back in the settlement ready for bacon and bed.

PANGUITCH, Utah. SHOSHONE.

## KELLUP'S CANOE.

TOWARD the latter end of winter Kellup disappeared after supper almost every night, and presently you might have noticed a light in the woodshed. Try the door though, and your rattle would only provoke a louder pounding within. Even his old friend Sammy Calhoun possessed no "open sesame" and had to betake himself to the house. "What's the old man up to now?"

"I'm not supposed to know;" and Susan shook her head solemnly at the work in her lap.

Presently Sam picked up a book from the floor full of cuts of boat models. Then he reached another from the sewing machine and found it treating of "Canoes and Canoeists."

"Aha!" This was long drawn out. "A-hah-h-h! Now I know what he's building," said accusingly. "His time o' life, too." This last in a deprecating tone.

"I know it," sighed Susan, "I've been through all that; but what do you suppose he says?" and she looked up quick at Sammy with big eyes and her lips set tight. "What do you suppose he says—says 'Nesmuk was older than me when he quit paddling.' All I'm afraid is he'll want to sleep in it nights, or under it out in the yard, and catch his death. This is a flannel shirt I'm making him now."

By the look on her face Sam thought she might be making him a shroud. "Yes" he said, "he'll probably sleep in it. I expect that's what he wants it for. There's no water near by." Then he said he guessed he'd be going, but he would be on hand on Fourth of July evening, because Susan said that was Kellup's next holiday and he had engaged a man to haul the boat to a little river out in the country.

* * * * *

Well, on Monday evening Sam dropped in about 8 o'clock and found Kellup sitting there with his sleeves rolled up, rubbing vaseline on his arms—a pair of thin, sinewy arms.

"Hello, Caleb! Where'd you get such a color as that?"

Kellup commenced to smile. First a little round the mouth, then a set of wrinkles took it up and communicated to others till presently the whole furrowed, beardless countenance was covered with smiles. "Sammy?" then he stopped and took his knee in his hands and it looked as if he was going to start another smile, but he checked it and finished his sentence, "Did you ever go canoeing?" Sam said no, and intimated that a steamboat would suit him better.

"Well, well, every man to his taste. Well, when I launched her down in the meadows she was pretty cranky at first, and I was wishing I was somewhere else and expecting to be in a minute. Well, she kept poking her nose in the reeds on both sides, and finally climbed up on a brown, slimy log just under the surface and hung wobbling. I coaxed and coaxed and at last she slid off like an alligator."

"Big river, Caleb?"

"No, just about wide enough for three barges abreast. Well, I trained her out of the meadow into a thick, swampy wood with grapevines hanging from tall trees and trailing in the water and the underbrush thick as a hedge and dripping in the river, too, and oh, Sam, I tell you with the current deep and slow and all shut in like that it seemed like, like—well, like floating on a tropical inundation."

"See any game along?"

"Well, no. Saw a watersnake wriggling over the surface toward the leafage, and by and by coming around a bend I surprised a chipmunk on his way to drink; and what do you suppose his way was? Why, a big old chestnut leaned out from the bank and dropped a limb till the water rippled up against his elbows, and that was his pathway. The little rascal chattered at me. But, by George, Sammy, I wish you could have seen the quiet cove I came to. I just lay there watching the brown scum on the surface, a kind or pollen scum, that left the current and came slowly round the bend to trace an intricate scroll work among the yellow lilies. Pretty soon I got on a move with the double paddle, slowly, slowly, till I got pretty close, and then I stole out the 'pudding stick,' the single blade, you know, and—" "What for?"

"What for! Why, Nesmuk always stole up on a deer that way, always," and Kellup got up, indignant, and pretended to rummage on the mantelpiece for his tobacco. When he sat down again Sammy commenced: "What y' got all over your flannel shirt collar, Caleb?"

"Well, you see, along about noon the black flies got pretty thick, so I spread on the fly daub. Some I made last"——

"Black flies, man, there's not a black fly in the State."

"Well, mosquitoes, then, hang it!"

These interruptions were irritating. The thread of his eloquence seemed broken, and he only mentioned casually the things he noticed on the trip down stream in the afternoon. The warm sun, the restless wind, the vines all swaying and showing the whites of their leaves, the dark retreats where the trees overarched, and the meadow vista of bushes and high tuft grasses, with red-winged blackbirds and a Bob White sweetly calling—somewhere. There was a place worn smooth on the bank near a willow that looked like an otter slide, but might have been made by boys in bathing, and there was a butterfly that lit on the prow and basked in the sun—a long voyage.

"But oh, Sammy, you talk about the 'poetry of motion.' I just lost myself for a minute once and thought I could paddle on forever, and paddle on and on and on and right into heaven, mebbe."

Then they all kept still for a minute till Sammy winked at Susan and broke the spell. "Yes," he says, "that's what your wife's afraid of."

Kellup didn't seem to realize that some one had sprung a joke anywhere round, so after Sammy had a good loud laugh by himself he said good night.

JEFFERSON SCRIBE.

## BREEDING BUDGERIGARS.

I KNOW of no bird which has such a multiplicity of names as this charming little fellow. In English, shell parrot, undulated grass parrakeet, warbling grass parrakeet, zebra grass parrakeet, singing parrakeet, scallop parrot, etc. In German, *Wellenstreifiger Sittich, Wellenpapagei, Kanariensittich, Muschelsittich*, etc. In Dutch, *Grasparkeit*. By scientists, *Melopsittacus undulatus*, but I prefer *Budgerigar*, as it is the name by which it is called by the aborigines of South Australia, from whence it comes in large numbers. I once saw a vessel in Cape Town which had three thousand on board, and afterward helped a dealer in Adelaide to count out three hundred and fifty pair, which were the catch of one of his trappers. It is deservedly a great favorite, no less from its pretty plumage than its great docility, and the wonderful readiness with which it breeds under the most unfavorable surroundings. It is now bred in large numbers by European amateurs, who have succeeded in producing varieties in color, such as yellow and also blue ones. But the most singular fact is that there are several well authenticated instances of its having developed the power of speech. Its surprising tameness and docility is well exemplified by the numbers which are seen on the street corners, sitting on the tops of their cages, waiting the signal from their Italian owners, to pick out an envelope, telling your fortune.

It is very hardy and can be safely kept in a room where the temperature falls nearly down to the freezing point, but no lower, provided it is furnished with proper retreats, into which it can retire and protect itself from the cold. I have frequently seen them flying about in an outside aviary during sharp snow squalls, in an early fall or a late spring. It is particularly sociable, and numbers of pairs will live together without trouble, if they are supplied with sufficient nesting facilities, without which there will be constant disputes for the choice of favorite locations. In all their movements they are graceful and quick; the flight is exceedingly rapid, can walk well on the ground, running about, nodding their heads and warbling musically, which no doubt gives them the name of "singing parakeet." Should one not have sufficient room, a canary breeding cage will answer for breeding purposes, provided it is furnished with a cocoanut husk, which should be fastened on the outside of the cage, with the wires bent aside, so as to allow a free passage for the birds. It is the best nest that can be offered, but has one serious drawback, being such an excellent harbor for parasites. So soon as a husk is found to be infested burn immediately, and give the cage a thorough painting with benzine, being careful to introduce it into every crack and crevice. Just below the hole made for entrance a small perch should be placed, where the male will sit and warble while the female is engaged in incubating on the inside. Should one be so situated as to have the use of a small room, or even a portion of it, so much the better, as it seems to me to be cruel in confining such active little birds in a small cage, where they will sit and mope a greater portion of the time, from not having sufficient space to follow their natural bent of flying about and keeping almost constantly in motion. By giving them room and ample nesting accommodations, their owner will be fascinated by their beautiful plumage, lively manners, low, but sweet song, and surprising prolificness.

If one cannot make use of an entire room I would suggest a place built in the corner of one, which should be in the second story with a southern exposure. There should be a window in the inclosed space, the size of which can be made suitable to the fancier's ideas, and the number of birds he intends to keep, as a cube of 30in. will suffice for each pair. It is better that the bottom should be supported on iron rods about 2ft. in height, so as to facilitate all cleaning operations, and also to prevent the entrance of mice, which are the greatest pests with which a breeder will have to contend. By building in a corner the walls of the room will serve for two sides of the cage, while the others can be made of wire netting of ½in. meshes. It is best to use netting which has been galvanized and then paint it with drop black, which will prevent any dazzling effect and show the birds with better advantage. Make a small door in one side for the purpose of introducing the vessels for holding food and water, and along the entire length of the bottom of the other side hinge a narrow flap, which is to be used for the introduction of a small scraper for cleaning the floor. Of course it will be necessary to cover the window with wire netting. It will add greatly to the birds' health and comfort if an outside cage is so constructed as to fasten on the outside of the window, in order that they can have the benefit of fresh air and sunlight during warm weather. It should be made entirely of wire netting and of the same width and height of the window frame, projecting some 3 or 4ft., thus giving the birds a chance of flying out and enjoying a bath during gentle showers. In this case the sash can be entirely removed during the season the outside cage is in use. The inner cage must be fitted with coacoanut husks and small nesting boxes hung upon the walls near the ceiling. The boxes to be 6in. in height and width, about 9in. deep, furnished with entrance holes near the top about 1½in. in diameter, and small perches as mentioned in reference to the coacoanut husks. Gouge out a slight depression in the centers of the bottoms of the boxes to keep the eggs from rolling about and becoming chilled during incubation.

In the center of the cage stands a pine or poplar log, from which the bark has not been removed and reaching from the floor to the ceiling. This must be fitted with nesting places, by sawing it in half from end to end, gouging out the halves of nesting places in each section, immediately opposite eaeh other, nailing the parts together, bearing entrance holes and fitting perches, as directed with boxes and husks. Just here I wish to relate an experience of mine with one of the above described logs. I had been using one with great success for some time, when I noticed that the birds had forsaken it entirely and were disputing with the occupants of the husks and boxes. For several days I watched closely, but could detect nothing wrong. I then changed my tactics to night surveys, and with the help of a small bullseye lantern detected a mouse peeping out one of the holes. The next morning each hole was stopped with a paper plug, the log removed outside, and as fast as each plug was extracted the spout of a kettle of boiling water was introduced. To my great surprise I found every nesting place occupied by interlopers, and the seed pans gave forth a decidedly mouse-like odor. Sawing off about 2ft. of the log, I inserted an iron rod to support it, hung the food and water pans by fine wire from the ceiling, and thus starved the enemy out. For perches, a few clusters of small branches fastened in the corners will be sufficient, and as they become soiled or gnawn can be easily replaced. Keep the bottom of the cage well covered with coarse sand, and a fresh sod should be given as often as possible. Give an abundant supply of pure water, which must be renewed twice daily. Budgerigars are essentially seed eaters, and will thrive on a diet of mixed canary and millet seed, but I have always been in the habit of giving them a crust of stale bread, soaked in hot water and squeezed dry, when they have young ones to feed. During hot weather this should be changed twice daily, as it is apt to become sour and cause diarrhœa. In the spring, when the different grasses begin to flower and seed, a small sheaf should be hung up in the cage daily. The food and water should be placed in small shallow pans, and these again in larger ones, which will prevent any dirt or moisture on the floor of the cage. The sod ought to be arranged in the same manner. I have never seen them bathe as other birds commonly do, but they seem to take a great delight in rolling and tumbling about in wet grass, consequently I have made it a practice to sprinkle the sod daily.

They are not subject to many diseases, a greater portion of which can be easily prevented by a few precautions. Fits or convulsions are caused by too much dry and heating food, therefore the remedy is low diet and plenty of green grass in seed. Cramps come from damp, accompanied by cold, hence it is necessary to remove the bird to a dry, warm place. Egg binding is the most serious complaint with which I have had to contend. My theory is that it is caused by a lack of lime in the food, and for that reason I use sea beach sand, mixed with bits of mortar, for the floor of the cage, and mingle crushed cuttlefish bone with the seed. A temporary remedy is a drop or two of castor oil, administered internally, and also applied to the egg passage with a small feather. To give internally, gently hold the bird on one side and drop the oil on the beak, when it will be instantly swallowed. I know of no permanent cure for this distressing ailment, and counsel that the bird be not allowed to nest any longer. Such is its fecundity that it will go on breeding during the entire year except during moulting season, if kept in a warm place. My custom has been to separate the sexes about October and place them together again about March or April. By so doing one will succeed in rearing much finer specimens. I have known them to mate before their first moult, and the sequence would be feeble, weakly progeny; therefore, take the young out and keep the sexes in different compartments until they are a twelvemonth old.

The hen lays from four to six eggs, but I have never been able to find out the exact period of incubation. Would say that it is from fifteen to eighteen days, and as the young are not all hatched at the same time, but will appear with the interval of a day or so between each exclusion, I am very much inclined to think that the hen commences setting before she has laid her full complement of eggs. The length of time which the young remain in the nest also varies very much. Have known them to come out in about thirty days, and sometimes forty will elapse before they will make their appearance. In a few days after exit the young are perfectly able to take care of themselves, and the female immediately cleans out the nesting place and prepares to bring forth another brood. In feeding the young, the old birds hold the youngsters by the beak, regurgitate the half-digested seed, which the nestlings swallow. Let any one follow the above directions, which are but the repetitions of more able pens, and take a few pairs of these exquisite little birds from the cages in which they are cooped up in all of our bird shops, transfer them to such a little place as I have described, and I will warrant, in a large majority of instances, that he will be transformed into a veritable "bird crank." FRANK J. THOMPSON.

[The budgerigar fortune-telling outfit is familiar to city people. A perch is provided with a rack of sealed envelopes, and there are usually two or three of the bright-plumaged birds, presided over by a grim-visaged wizard, and patronized by a bevy of giggling girls. When the fee is paid the wizard pokes up one of the birds with a stick; it runs along the perch and picks out an envelope, pulling it with its bill, and the wizard hands it over to the girl, who, giggling more than ever, opens it to find the promise of a handsome husband, with wealth galore—and all for five cents.]

UNDER THE BEECHES.

Examining Nest of Red-Eyed Vireo.

FROM A PHOTOGRAPH, JAN. 10, 1892, BY W. P. DAVISON, LOCKPORT, N. Y.

(Forest and Stream Amateur Photography Competition.)

### "Under the Beeches."

THIS refreshingly cool winter scene should be acceptable in sultry July. The portrait is of our valued contributor "J. L. D.," whose frequent notes on bird life add to the interest of these columns, and whose story of a visit to "the old home" in our issue of May 12 will be recalled with pleasure. Mr. Davison tells us that he was "taken" all unconsciously by his son, and a most charming picture was the result, to be added to the FOREST AND STREAM'S Amateur Photography Collection.

### A Quail-shooting Club.

WE have been shown the details of the plan proposed by the advertiser of quail shooting this week, and it appears to afford an unusual opportunity to make sure of excellent sport at a nominal outlay. The certainty of a plentiful supply of game appears to be assured by the project, which is, for that reason, well worth investigation.

## CAMPS OF THE KINGFISHERS.—IV.

### GREEN LAKE, MICHIGAN.

#### The One Lone Bass of Green Lake.

WE were up next morning before the sun, and on the water soon after—Sam and Charley in the skiff, Harry, Gooder and Kelpie in the Traverse boat, while I went it alone, the Masons having gone home the night before with a promise to come back next evening to see "what luck," and the Colonel still holding to his determination not to wet a line till a bass was brought in.

I pulled out for the point below on the further side of the lake, the other two boats going across to the rush-grown bar and around into the deep bay at the extreme further side of the upper arm of the lake, a part of the upper waters that they had been over only once the day before.

The lake was quiet except for a gentle ripple on the water, and I expected to get a bass or two at the point; but I fished patiently all around it for two hours without a solitary bite, and I was glad old Sam was not in hailing distance.

I pulled across to the further shore—the lake was narrow here, a matter of forty rods wide—and fished awhile along the bulrushes in shallow water with the same results as on the other side.

Tired of sitting in the boat, I went ashore and walked back to a farmhouse, a quarter of a mile from the lake, and bought a couple of pounds of home-made butter, which I carried back to the boat in a small tin lard pail furnished by the good housewife.

While she was getting the butter ready I tried to scrape an acquaintance with a big savage-tempered pup—a cross between a Newfoundland and a mastiff—chained to a small dog house in the yard, but the attempt was a total failure. I evidently didn't remind him of any one he had ever been introduced to, as he came near strangling himself in his efforts to break the chain and get at me to "chaw me up into sassige." He barked and choked and growled savagely by turns and surged at the chain at every move I made, and all my arguments to convince him he was making a show of himself were wasted. I would have given a dollar of our daddies for a chance to knock the conceit out of the vicious cuss with the swipe of a good peeled elm club, but at the same time I was glad the chain had no weak links in it, else I would have had to "tree" on mighty short notice.

Back at the boat I shaded my butter in the bow with some willow boughs and pulled across to the point, where I put in another hour trying to make the acquaintance of some stray bass or pickerel, but it turned out like the attempt to make friends with the big pup.

I went on down the lake, fishing carefully over all the good-looking water till near the mouth of the trout stream, and not caring to try that again, crossed over and fished up the opposite shore for a mile, crossed back and fished around the point some more, and then around into the bay at the head of the lake, and around the long sandbar and across to camp as the long shadows began to creep out on the water without once hearing a click from the reel that could by any stretch of the imagination have been caused by a fish during the whole unsatisfactory cruise, although I had tempted and persuaded them with minnows, frog and spoon.

Two days of patient, careful fishing without a symptom of a nibble was a backset to my pride as a bass fisher that tempted me to smash the faithful old rod across my knee, cut a pole in the "bresh," and tie on a piece of the flag halliards for a line and start in anew to learn it all over again.

I made up my mind that I was mistaken about the bass congregating in the pool below the chute in the spring or at any other time; I was done with Green Lake at all events and ready to break camp at the faintest suggestion.

The other two boats were in with another assorted lot of goggle-eyes and bluegills, and as I climbed the bank old Sam rubbed it in on me with—

"He didn't ketch a single bass,
Nor nary pick-er-el."

But Sam had really hooked a bass, a small-mouth, a 3-pounder, the lone bass of Green Lake, and lost him. In relating the unusual episode he wound it up with, "He sailed out o' the water a couple o' foot high an' when he lit into it agin, with the hook still a holdin', I thought sure he was my meat, but he made a streak for the grass, an' before I could git in the slack o' the line he was teetotally tangled up in the weeds, an' all the pullin' I could do didn't budge him. Charley backed the boat over the place where the line was fast an' I jest pulled on the durned thing till it broke, an' then my heart dropped down into my nigh shoe, for I wanted that bass worse 'n the boy did the woodchuck. I reckon he was the last o' the tribe in Green Lake, fur that was the only bite any of us got all day, 'ceptin' o' them ornery red-eyes and bluegills, which they ain't no 'count no how."

#### How Green Lake was Ruined.

When we had staked out our claims around the campfire after supper, with Kelpie in the chair, it didn't take long to vote Green Lake a full-sized failure as far as the fishing in it was concerned.

Aleck, who was present, admitted that he had not fished the lake for four years, but he had advised us to come there believing that it was as good as when he last fished it. He had overlooked the fact that the year before there had been two railroads built that passed near it, the Chicago and West Michigan within a mile and a half and the Manistee and Northeastern, that ran between Green and Duck Lakes, not more than twenty rods from our camp, crossing the C. & W. M. at Interlochen, and he had not kept track of the spearing that had been done in it, as told us by a farmer who stopped at the camp for a few minutes' neighborly chat while on his way home from the village. He said that the railroad laborers, the villagers and the neighboring farmers had speared the lake the season before till there were no bass or pickerel left in it, or at least only a very few; that often from 10 to 15 "jack-lights" could be counted on the lake of a night, and that from 30 to 150lbs. of bass and pickerel—mostly bass —to the boat was about the run of the "kill" for the night; that he himself, with a partner to paddle the canoe, had killed with a spear 150lbs. of bass and pickerel in one night; and he added, "I 'low there wasn't more than 10 or 12 big pickerel among the whole lot."

And that guileless mossback stood up there with a spring-lamb-like look of innocence on his face and bewailed the scarcity of fish in Green Lake.

Of what use are fish laws in a locality like that? Had the goggle-eyes and bluegills not been too small for the spear they too would have been included in the general slaughter, and it was lucky for us that they were small fry, else our frying-pans would have given forth only the smell of pork, not counting the fleeting odor of the sixteen hapless trout.

It was no longer passing strange that six old bass fishers had fished the better part of three days and only struck one vagrant, lonesome bass, and lost him, which was a fitting wind up to our shattered dreams of sport. Old Sam shifted his stool a few feet out of the smoke and remarked with a solemnity befitting the occasion, "Bunkoed agin," and he about echoed the sentiment of the camp.

Aleck's glowing account of the fishing in the lake had proved, as Sam said, "powerful misleadin'," but we "held no skunner agin him" for it, neither against Postmaster Colbjornson, who had doubtless just waked up from a couple of years' nap when he wrote, "The fishing is immense, the finest lakes for fishing in the State of Michigan," etc.

#### Carp Lake is the New Hope.

Duck Lake, about a quarter of a mile from the camp, had doubtless been more industriously worked with the spear than Green Lake, as the upper end of it was only a short distance from the village. At any rate we had taken a dead-set against the region and it was decided not to waste any time investigating Duck Lake, although as viewed from the shore nearest camp it was larger, much richer in scenery around its shores and a more "fishy" looking body of water than the other. It only remained to decide between Platte Lake, about fifteen miles west nor'west of us, and the upper waters of Carp Lake, nine or ten miles northwest of Traverse City, where we had camped the year before.

Carp Lake was the choice without much discussion because we knew the water and the fishing, which, if not the very best, was yet "good enough for the Joneses," and we would be near the best of neighbors who would be glad to welcome us back, and we could get boats without any trouble, to say nothing of the good things brought to us in the shape of vegetables, milk, butter, eggs, a chicken or two when we hankered after pot-pie, a quarter of Uncle Jimmy Nolan's unapproachable mutton whenever we felt "sheepish," "lashin's o' rozberries," and so on—all at prices so surprisingly low to us "city fellers" that it seemed like giving them away.

We would go back to Carp Lake and make our camp at some pleasant spot along its familiar shore and feel that we were again with an old friend. We would float and fish, and dream and idle away the sunny days on its bright waters, and be soothed to sleep by the plash of the waves on the beach as a child by the voice of its mother.

Again we were living in the pleasures of anticipation.

Aleck was to send over the wagon by 8 or 9 o'clock next morning for the first load, and the last was to be ready in time to reach the station for the 12:05 P. M. train to Traverse City.

Before breaking up next morning Harry took a few snap-shots at the camp with his Kodak, a copy of which he furnished each of the party after we returned home, and that is about all we have left (and about all we want) to keep the remembrance of Green Lake green in our memories.

On top of the last load the big boat was hoisted and tied fast, and when a hundred yards or two in the woods the wagon was stopped and we climbed on top, except Harry, who took a "pot shot" at us with the Kodak, which he afterward christened "yachting in the woods."

The wagon kept on down the road and we cut through the woods to the railroad track to walk to town, leaving Green Lake and its disappointments behind without a regret, although we had enjoyed the camp because it was a pleasant one.

There may have been hundreds of bass and pickerel, and a stray "muskylong" or two in the lake at the time, but they were not for us. It may be they were on a strike—albeit we felt "nary a strike" from any of them—or holding a mass meeting of three days' duration in some secluded bay to discuss the advisability of leaving a lake where everything in the shape of a man within miles of it was the owner of a spear; or it may be that we had forgotten our early training and failed to find out the kind of bait that would tempt their capricious or as Dick Mac says, their "facetious" appetites.

At any rate we got none of them, and we have been in some doubt since whether we were altogether in fault, or had been beguiled to a barren lake by a couple of guileless old fish liars for a little fun at our expense. If the latter, we "acknowledge the corn," but will keep our weather eye open hereafter for lee shores on "the best bass lakes in the State of Michigan."

As we strung out in single file along the hot, sand ballasted track, casting a glance now and then over toward Duck Lake, I think the only regret at leaving was, that we had not fished it a couple of days to see if there were any bluegills and goggle-eyes in it.

Some of the villagers had told us it was a better lake for fish than Green Lake, others that it was not nearly as good, but we were satisfied with our experience with the region and not in a mood to believe anything good of it. We had but a short time to wait for the train, long enough for Harry to arrange for shipping his boat back to Traverse City and to say good-bye to Aleck, who had come over to see us off. It may ease his mind, if he ever sees this, to know we found no fault with him. He had done the very best he could for us and was honest in his belief about the fishing in the lake, as it had been a few years before, and he had spent four or five days hunting boats for us and getting lumber and straw to the camping place, and the bill, including team work, was $16. We were satisfied and left him with kindly feeling and good wishes.

#### The Caravan Wends its Way toward Mecca.

Gooder had gone in on an early morning train to have a couple of wagons ready, so no time would be wasted in getting off for Carp Lake, for the camp had to be made before dark. The wagons were waiting, one a long-bodied lumber wagon that held all the calamities, the other a spring wagon with seats, and by 1 o'clock we were on the road, Harry and Gooder leaving us here, however, to take the steamer for Omena, with a promise to come over to camp in a few days; but they didn't come, which we laid to a "weakenin' o' the spine" on account of the experience at Green Lake.

A mile or so out of town we stopped at a little stream flowing into the bay a few rods from the road to eat a lunch, prepared before leaving Green Lake, which disposed of, the spring-wagon took the lead, and before 3 o'clock we were looking down on Carp Lake from the top of a hill with the site of our last year's camp in plain view over two miles away on the further shore, and we fancied we could see the inside of "Mother Nolan's" spring-house, nestling just below the dwelling house on the hillside, with its score or two of crocks and pans of sweet, cold milk and cream ranged in scrupulous order and neatness in the shallow, stone-lined basin, fed by a cold stream of purest water gushing out of the hill from under the very foundations of the house above. And we caught a glimpse, too, in our mind at least, of a big churn full of nectar fit for the gods, standing in one corner, and of divers rolls of hard, sweet butter in their snowy cloths, made by the hand of Mother Nolan herself, bless her gentle, kindly, motherly old heart.

All these good things and more we were reminded of, and our mouths watered, and we resolved that it would not be many days before we again saw the inside of that weather-stained old spring-house, to drink a health and long life to "Uncle Jimmy" Nolan, his good wife and their boys and girls for the kindness and neighborly feeling they had shown us the year before.

At the foot of the hill the road turned squarely to the right and led along down the lake shore, over a strip of lowland between the lake and the hills that would have been "bottom land" had the lake been a river. A pleasant drive of a couple of miles over an excellent road, at no time more than three or four rods from the beach, brought us in sight of a place we had selected the year before for a camp, should we ever visit the lake again.

It was in a small grove of young birches on a point overlooking the water from a height of 12 or 15ft., and only a short distance from a farmhouse standing a few rods back from the lake at the foot of the hill, near which a little clear cold stream flowed with ceaseless whimper into the lake, where we had often stopped to eat our noonday lunch and slake our thirst. A hundred yards off this point at the break of the sandy bar where the water suddenly deepened we had taken some very fine small-mouthed bass, some of near 5lbs., and we hankered after some more of the same hatching.

A couple of hundred yards, however, before we came to the farmhouse we noticed a spot on the bank of the lake that looked even more inviting for a camp than the birch point, and stopping the wagon the others waited while the Colonel and I walked down to the little grove to decide between the two places, either one of which was "good enough for the Joneses."

We found the point a trifle more rocky and lumpy than it had looked to us the previous summer, and although an excellent place for a camp we agreed that it "wasn't in it" with the other spot, and we have never regretted the choice, for we found it afterward to be the most perfect and comfortable camp we have ever had in all the years of our camping out.

The little village of Bingham, with a big sawmill near by it on the lake shore, was only about three-quarters of a mile below, and as we could do nothing toward camp making till the slow-going lumber wagon arrived with the calamities, Charley and I prevailed on the youngster who had driven us out to drive down to the mill for some lumber that we would need for a table, etc., and we were back with it as the boys were unloading the last mess box from the wagon. It just then occurred to us that the owner of the land might object to us camping there, and I went to the house to ask permission, but finding no one around but a mean yaller dog with an evil eye that wouldn't let me come inside the fence without a "permit," I went back and we concluded to risk it anyhow and move afterward if we had to.

As we were putting the finishing touches on the first tent our neighbor came up from the house—a pleasant old German who seemed to have spent a good many years in a fruitless effort to get the best of the American language, and when we had introduced ourselves and our wishes, permission was cheerfully given to camp there "yust so long what you like," adding, in his best American, "You make some company mit me, don't it?" Had he any straw in his barn? "No straw," and the only man he knew in the neighborhood who had any lived about three miles below Bingham. Would he hitch up his team (our teamsters had fulfilled their contract and started on their return) for a consideration and go after a load? He would, and Barney was detailed to go along in order to get back the sooner. Then camp-making began in earnest.

### Iowa Prairie Chicken Grounds.

ALGONA, Iowa, July 6.—*Editor Forest and Stream:* In two months' time the prairie chicken crop will be fit for use. The rains have destroyed some of the young birds, but we have had no spring prairie fires to destroy the nests, so that taking everything into consideration I think prairie chicken shooting will be fairly good. I have talked with many farmers and they all say that there are a great many young birds. We are trying to stop all violations of our game laws; and if all the clubs take hold and work, there will be but little shooting out of season. The farmers in this section like to see game laws enforced, and are ready to lend a helping hand.

I receive many letters every week from sportsmen wishing to know where they can find chicken shooting. I know of no better place than the northern part of this county. Sportsmen can find hotels at Birt, Bancroft, Ledyard and Elmore.

Our lakes, rivers and sloughs are full of water, and I see no reason why our fall duck shooting should not be good.

JOHN G. SMITH.

## A DAY WITH THE GROUSE.

ON one of those clean, northerly, transparent November mornings, when the elfin frost sketchers had left the tops of the kitchen window panes sufficiently clear to give an impressionist effect of yellow sassafras leaves in the yard and embers of autumn over beyond upon the mountain side, John and I moved our creaky old-fashioned chairs up to the farmhouse table and fortified ourselves for the prospective hunt with hot buckwheat cakes and sausage gravy, with home-made sausages that had spluttered and burst in the frying-pan and then turned all crunchy when their insides had quickly browned, and finally, with a warmer of coffee containing blobs of real cream and uncertain sugar.

We were clad in stout canvas hunting suits, flannel shirts, thick hob-nailed brogans, and corduroy caps; and if any one doubted our intentions for the day they should have seen Don and Belle, the two setters, as they rapped the table legs with their tails, and poking their heads into our laps with impatient whines looked up with that intense expression that one sees when the dog realizes that his master is all ready for a hunt. Honest old Foghorn, the hound, sat in drop eared dignity with bowed head near the stove, looking at us occasionally out of the corners of his eyes and hoping that he would be invited to follow, but knowing full well that when we were out after grouse it was his day to remain at home. One who has not lived and loved with well-bred dogs cannot appreciate their keen perceptions and their quick divination of many of the master's thoughts and intentions. The ordinary observer would have said that Foghorn did not care to go with us on that day, and that the other dogs were wistful because such was their habit, but not a word had been spoken, and they all judged of our plans for the day from something in our manner that the gift had not been given us to realize ourselves. Dogs seem to see the ill-defined nebulæ of thought and have their deductions all made while the philosopher is waiting for something more definite; and although the quickness of their conclusions is antagonistic to good analyses of our motives, they turn at each limitation of knowledge to a friendly supposition, and it is with a wag of the tail instead of a growl that they await further information. So that as we become more familiar with philosophers' ways we find a little more yet to appropriate from our setters.

But this is digression. We were not out of the door before Don and Belle had bounced through ahead of us, and the frightened hens about the stone steps ran and flew ca-dark-ut-ing in great confusion back to the barnyard and over the fence into the orchard. A chilly crow unhunched himself from a frosty rail and flopped heavily along over the field of corn shocks and ungathered pumpkins, and out of the stiff frozen grass fluttered a few belated white-throated sparrow as we rustled noisily along through the windrows of dead leaves in the path. High up on the hill tops the sun was just beginning to mingle with the few brilliant leaves that still clung to the maples, and down in the valley a line of haze above the dark hemlocks marked the course of the stream that had been so interesting to us in the trout season. It was a rough climb through the woods to the upper grounds where we intended to hunt, and the air was provocative of such energetic movements that we were in a glow when the high levels and the morning sunshine was reached. Away to the right of us stretched a series of beech and chestnut ridges, with many acres of thick pines and hemlocks, while the edges of the woodland were lined with brushy lots, and patches of reddish buckwheat stubble here and there adjoined the saplings.

Festoons of grapevines hung from the hornbeams in the gullies, and the ground in many places was thickly carpeted with wintergreens and princess pine. In the debris of the very first crumbling log we found a group of four wallow holes and a loose grouse feather that looked as though it had been recently shaken out. Neither Don nor Belle made any signs of game just there, but they ranged eagerly back and forth to the loose heaps of brush, through clumps of sapling pines and along the stump fence, until the rapid wagging of Don's tail as he hesitated for a moment in the cart path showed that a grouse had been along there that morning. For several minutes Don was busy in trying to determine the direction of the trail, but gradually becoming convinced he started off cautiously through the scrubby oak bushes with elevated nose and swinging tail. We could see his nostrils dilate and hear him snuffing, as with half-closed eyes his every energy seemed concentrated in the delicate effort of catching the floating scent. How lightly he stepped as he led us off toward a fallen tree top! And then he began to grow stiff legged, and stopped. His tail straight out: every muscle rigid: and his right foot lifted from the ground. Belle, seeing that he had found a bird, bounded up so hurriedly that the grouse rushed out and disappeared behind a pine before we could shoot. Out from under a scrub oak went another grouse, and neither of the guns happened to be ready.

It was necessary to call Belle in and scold her for being so careless, and her drooping ears and tail showed that her feelings were hurt more than they would have been if we had punished her. The direction that one of the birds had taken led us out to a sumac thicket on a knoll. Both dogs were making signs of game and trying to locate the grouse, when suddenly out of the ferns at my very feet burst a great gray cock and sprang whirring into the air, swishing the saplings with his wings and whisking a circle of loose brown leaves into the air of his wake. The instant that the gun stock struck my shoulder and the trigger was simultaneously and unconsciously pulled, the feathers flew in a puff, the powerful bird dropped headlong through a thorn bush, and struck the ground with a thump, leaving a few loose feathers hanging lightly among the twigs, while dried thorn leaves rattled down from limb to limb as they followed the bird. The empty shell in the gun was quickly replaced with a loaded one and Don was given the order to fetch. How proudly he came trotting toward us, tossing the prize upward in order to get a better hold as he ran, and at the same time being careful not to muss the feathers. His eyes were not for a moment taken from the limp grouse in my hand until its tail had disappeared in the capacious hunting coat pocket.

Along the edge of a buckwheat stubble both dogs worked ambitiously back and forth, following first one trail and then another until we were convinced that a whole covey of grouse had been gleaning there and that their tracks were so intermingled that the dogs had a difficult riddle to solve. We were making a wide detour of the field when it was noticed all at once that Belle was standing on a "dead point" at a small wisp of foxtail grass and ragweeds, and Don was a few yards away backing her. The idea that a grouse could hide in such cover without being visible seemed ridiculous, but we had entire confidence in the two mute authorities standing there so motionless in the stubble, and as I walked up to Don a grouse sprang like a new revelation out of the wisp and started off with plenty of room to gain all wished for headway. The first charge of shot loosened a couple of wing feathers and the second shot sent the bird bounding all in a bunch among the seedy ragweeds. Just then two more clucking and squealing grouse with spread tails and half opened wings unexpectedly appeared and ran straight toward me, mounting on wing so close that I could almost have touched them with the gun. Another one jumped from the wisp straight up high into the air, and a moment later two red fellows whirred away side by side low over the field. A volcano and earthquake of grouse! There I stood with unloaded gun and trying so hurriedly to get two cartridges into the breech that they would not have gone into a peck measure just then. If my efforts at being wise had ever been so severe and so energetic as my efforts to get those cartridges into the breech in time for a shot, the nineteenth century might have had its Plato.

One of the birds scudding down the wind past John suddenly folded itself up in mid air, and a long shot at another so surprised the bird that it wheeled and alighted in a hemlock at the edge of the field.

In brush lot and in bark slashing and from hilltop to swale we found grouse that day, and when in the long shadows of the thin sunlight on a cold-waxing autumn evening we reached the farmhouse and spread our birds out upon the woodshed floor, the dogs with ears full of burrs and memories replete with good deeds, curled up contentedly behind the stove for the night.

The cider in the blue pitcher that was set upon the table after supper helped to strengthen many of the weak points in the yarns of the old settler who had dropped in to tell us of the three coons that he had found in one tree that day, and Gran'ther Bradtree, leaning his sunken cheek on the trembling hand that balanced the cane against the arm chair, was encouraged to tell again such stories of his exploits in the good old days as are usually reserved for grandchildren and withheld from contemporaries.

I have seen the beds of Eastern princes, and the luxurious couches of Occidental plutocrats, but under the rafters of a farmhouse in western New York, where the mud wasp's nest answers for a Rembrandt and the cobweb takes the place of a Murillo, there is a feather bed into which the hunter who has killed a dozen ruffed grouse in the day softly sinks until his every inch is soothed and fitted, and settling down and further down into sweet unconsciousness, while the screech owl is calling from the moonlit oak and the frost is falling upon the asters, stocks may fluctuate and panic seize the town, but there is one man who is in peace.

DR. ROBERT T. MORRIS.

IN A JULY WOODCOCK COVER.

## OLD-TIME HUNTING IN OHIO.

Further extracts from the hunting diary of a well-known Ohio sportsman, extracted from the original manuscript for the FOREST AND STREAM by the late Dr. E. Sterling, of Cleveland. See issues of Jan. 22 and Feb. 13, 1891.

*Nov. 24, 1837.*—Having received an invitation to join a hunting party from Cleveland, who had camped in Russia Township, Lorain Co., Ohio, we accepted and started off at 8 A. M. in the stage and arrived at Amherst at 4 P. M.; taking it from Amherst we went to Burgess's House, four miles, where we stopped for the night. In the morning, getting one of the boys for a guide we went four more miles through the woods to the camp of the hunting party. None of the hunters were in camp when we arrived, but toward night they began to string in like bees to a hive. The party consisted of six in all, including myself. A turkey and one deer constituted the result of this, their first day's hunt. Suffering some from cold from sleeping in a tent, it was proposed that the whole party should devote the next day to backing in straw from Hi chcock's clearing, two miles away, and try to make our sleeping department more comfortable. Some went to work and cut down a large tree for back logs, while others fixed up puncheons around our camp or extended the blazings. A few days after two more hunters joined us, bringing with them tobacco, pipes, a large bag of hard bread and a two-gallon jug of brandy. This addition made eight in all for our party. Our fire arms consisted of eight rifles, six pistols, two of them rifle barreled.

Game was not very plenty at first, but having a good stock of provisions including sugar, codfish, etc.; we passed the time away very merrily. At the end of the week, our party having killed five deer, and the weather getting warm, we went to work and jerked them. The snow having all gone and rainy weather setting in, we had no success in hunting for several days, but with our jerked venison and occasionally a turkey or partridge, we fared well. Coming into camp one day we discovered that a hound belonging to one of the party had eaten up a large portion of our jerked meat. The aforesaid hound being in the habit of chasing deer continually, and spoiling our hunting, we after a short consultation decided he should die. We drew cuts which of us should kill him. The lot fell to X. He led the hound off into the woods; shortly we heard the report of his rifle and the loud yelping of the hound. A few minutes later the hound, all covered with blood, came rushing into camp. We both sprung for our rifles, but getting mine first I shot him down. We then carried him into the woods and secreted him in a large fallen hickory tree top. X. said that when he raised his gun to shoot his heart failed him, and so he made a bad shot. We kept the affair an inviolable secret from the rest of the party, so it was generally supposed the dog had strayed off or gone home.

At this time a light snow fell, but in less than twenty-four hours turned to rain, and though still-hunting was bad we never lack for deer, turkeys and numerous lesser game in camp. It so continued rainy weather more or less for the next week, and no prospects for snow, discouraging many of the party. The result was that most of them left us for their homes, leaving myself and two others only in camp. We passed away our time pleasantly sitting around our camp-fire at night, smoking, discoursing about the part present and future, and recounting all little incidents in each other's history. Our camp was so far from any settlement no noise disturbed us, and the stillness of the forest was seldom broken at night save by hooting owls that had a fondness for our camp, or minor sound peculiar to the locality. Hunters from Wellington, Camden, Henrietta and other clearings near, often visit us, exchanged stories and news of the day and never departed without tasting and partaking freely of our camp hospitalities.

After living in camp by ourselves three weeks, (occasionally killing a deer or turkey, as our tastes demanded) with rain and warm weather continuing, one evening brought a change and fresh excitement in the almost every day routine, by the arrival of one of our hunters from Cleveland with the latest news. Thanksgiving, Christmas and New Year's day had all passed pleasantly, weather open and steamboats making their regular trips from Detroit to Buffalo and touching at Cleveland, on the route. This was Jan. 25. A little snow in the morning, but before noon it had all disappeared. Fate seems to be against us in regard to snow, we had had a glorious time all around, plenty of game to eat for the hunting of it. We were all stronger and in better health than when we

came into the woods, so it was voted on all hands to break the camp of 1837-38, and make for home, which was reached safe and sound in due time, partly by stage and partly by foot, as we came.

## INDIAN DOVE NOOSE.

GEYSERVILLE, Cal.—On the overland train going east, not long since, we had the pleasure of the companionship of one of the most ardent sportsmen that it has been our good fortune to meet for many a day. He hailed from Minnesota, the land of blizzards, and was on the way home from his first visit to our coast and fresh from a hunting trip among the Sierras, as well as from a raid upon the feathered denizens of the California tules. Being a born sportsman, a lover of nature generally, he was not long in discovering our weakness for the members of that persuasion, and he at once became an interesting traveling companion. Among other things, he was delighted with the coast scenery—particularly with Yosemite Valley—and enthusiastic in his praises of our State in general.

In relating some of the incidents of his trip, he referred to the unique manner in which the Indians of Tulare county capture turtle doves. Armed with a neat little device in the shape of a horsehair slipnoose fastened to the end of a rod, the catcher would secrete himself in the foliage beside a spring where the little birds were in the habit of going for water, and while in the act of drinking, the noose was dexterously slipped over the little head and the victim quickly whisked out of sight. It was done so quickly that there was no chance for a flutter or commotion to frighten away the other birds, and the "native son" soon roped in as many as he wanted.

I have just been reading the interesting article by Edward A. Robinson, in a recent FOREST AND STREAM, "On the Pampas of Entre Rios," and I notice that his scheme for capturing partridges in South America is somewhat similar to the Indian method of capturing doves, mentioned above. MARION.

### Freaks of Bullets.

WHILE shooting my .22cal. Ballard the other day, and adjusting my Lyman sights for shooting cats at 15ft. or thereabouts, I shot at the end of a stick of hard wood that was lying in a pile, and feeling a smart rap on my left side and seeing something drop, I stooped and picked up what was evidently a badly demoralized "long rifle" bullet. On examination I found my bullet had struck the lower side of the stick, gone diagonally through and made quite a dent in the side of another stick lying below and obliquely to it, and then around back, evidently to let me know that, if my sights were perfectly adjusted for 75ft., they threw lead too low at 15. Can "Podgers" tell me the wherefore of this? S. S. NORRIS.

### The Ideal Handbook.

THE Ideal Manufacturing Company of New Haven, Conn., is a progressive concern that aims at perfection in the manufacture of reloading tools, and is satisfied with nothing short of its ideal. Success, instead of assuaging, seems only to whet its appetite for improvement, and no wonder the company has made an enviable record, and intrenched itself in the hearts of shooters from Maine to Yubadam.

"The Ideal Handbook of Useful Information to Shooters" is a valuable little book published by this company, which will be sent free to any reader of FOREST AND STREAM.—*Adv.*

# Natural History.

## BIRDS AND BONNETS.

*Editor Forest and Stream:*

I pity that indiscreet contributor of yours, who spells his name with a big, big P. He hardly has time to pull his foot out of one scrape before he puts it into another. Some time ago he got to tampering with women's hair, and as might have been expected, it didn't take them long to go for his. He says, "Ask her to wear her hair some other way that may be much more becoming; do you think she will do it?" Well, no. I tried that when I was younger; but this court wont do it again if she knows herself, and I should think the aforesaid P. was old enought to know better than to meddle with female fashions.

A young lady at my present resting place indignantly denies that women are any longer at the bottom of this needless bird slaughtering business. She says that nearly all women who have souls worth saving have joined the Audubon Society, and scarcely a bird is worn in bonnets now.

If this is true I may yet die happy. I am a sportsman, but this bloody business has made me miserable for many a weary year.

In Florida, where I eat my daily bread, the slaughter has been frightful. I have heard men, who claim to be sportsmen, tell of shooting into a tree where egrets collect by hundreds to roost, and then in the morning picking up those that had attractive plumage and leaving the rest to rot. Now, I believe when such fellows die, their souls, if they have any, will be kept in a state of miserable unrest for several eternities by the screams and flutterings of birds that they have slain in wanton barbarity.

In Brazil a great part of the revenue is derived from the skins of humming birds and other birds of plumage, millions upon millions of the lovely little creatures being killed to decorate the hats of the tender-hearted ladies, who would hardly tolerate the presence of a man who would brutally treat a dog or cat. These little innocent creatures are in their finest plumage during the nesting season, and when the old birds are killed the young ones must, of course, die a miserable death by starvation.

Now, if the women who thoughtlessly give encouragement to this hellish torture could be brought to the point of thinking on the matter, the revenue of Brazil would be seriously diminished. DIDYMUS.

### A Feathered Cut-Throat.

MY cousin Sam, who lives in Beyroo, says that there is a pigeon hawk in Syria which kills pigeons by cutting their throats with its sharp bill as they fly. It gives a swoop, a quick dart, and presently there is a tumble. The pigeon is picked up with a gash across its throat.

CHAS. HALLOCK.

## RARE BIRDS' NESTS.

WE are permitted by the recipient to publish extracts from a private letter written by Mr. H. Austen of Halifax, N. S., to Dr. Elliott Coues. The notes are of great interest to ornithologists. It will be remembered that in FOREST AND STREAM of Nov. 26, 1891, we published a figure of the nest of the ruby-crowned kinglet from a specimen taken by Mr. Austen. This, if we recollect aright, was the first figure of the nest of this species ever published.

In his letter to Dr. Coues, dated June 27, Mr. Austen says:

"It has occurred to me that you might be interested in the following note about 'ruby' kinglets, as your Key to North American birds says 'eggs unknown.' I think I was the first to discover the nest and eggs of this bird. On the 5th of this month I found a female ruby that had just begun to build her nest. On the 6th all the outside was complete, on the 9th she was carrying feathers to line the inside, and on the 18th I examined the inside and found it to contain one egg. I looked at it again on the 24th, and as it still held only the one egg, and as the female did not show up and the egg was cold and inside of the nest damp, I knew she had deserted it. Hearing the male about I went to work and in one hour and ten minutes had the new nest, which contained six eggs. I left it until the 26th, and it still holding the same number I knew the set was complete and so took it.

"Now to-day I was out again, and hearing the male about the same place I spent part of the day in the vicinity and saw the female carrying material for another nest, and after a time I succeeded in locating the bough on which she has commenced to build her third nest for this month. I watched her come to the place three times, and can just make out with my glasses that the nest is started, and when it is complete and eggs are all laid I will take it. Is this not something remarkable and worth knowing?

"I have taken 5 nests of the bay-breasted warbler this month; 3 ruby kinglet, 2 with 6 eggs each and 1 with 10; 1 nest of the Nashville with 5 eggs; 1 nest of olive-sided flycatcher with 3 eggs; 1 nest of Canada jay (last April) with 2 eggs, and many others beside. H. AUSTEN."

# Sea and River Fishing.

## IZAAK WALTON.

With thee to trudge up Totnam Hill
That summer morn so cool and still,
When smiling in the early day
Around the peaceful landscape lay,
The humble cot in vale withdrawn,
The noble mansion on its lawn,
The village church whose taper spire
As index finger pointed higher,
The whistling plow-boy far afield,
And distant rivers scarce revealed,
I think as in thy book I read,
I should have liked it well indeed;
To listen to the homely talk
That still beguiled the tiresome walk,
Of scaly wonders of the flood
From Pliny and Dubartas good,
And texts with holy meaning fraught
In plenty from the Scriptures brought,
And legends, too, of pious men
Who loved to angle through the glen,
More pleased the speckled trout to hook
Than ponder o'er some ancient book,
To harken as thou didst rehearse
Sir Henry's or sweet Herbert's verse,
I think as in thy book I read
I should have liked it well indeed;
For such the talk with which the way
Thou didst beguile that summer day,
While pleased Viator,* led along
By holy text and fragrant song,
Forgot the dust and growing heat
As on he pressed with willing feet,
Till in surprise at length he sees
The "Thatcht House" shining through the trees,
Its swinging board the sign of rest
And comfort for the welcome guest,
Where in a brimming cup of ale
He reads the moral of the tale.

T. J. CHAPMAN.

* The first edition of "Walton's Compleat Angler" opens with but two interlocutors, *Piscator* and *Viator*.

## NEW ENGLAND FISHING.

THE trout fishing season has proved to be a most singular one thus far, especially in northern New England waters. Early in the season the water was unusually low, the melting of the snows in April and May not bringing the Maine lakes and streams nearly up to high water mark. Indeed at the time of the ice leaving the Sebago, the Rangeleys and Moosehead those waters were the lowest ever known at that season. This was generally unfavorable to trout and salmon fishing, though many fair catches were made. But later the tables have turned. From a very dry April and May there has followed a June noted for its rainfall. For twenty days in Maine it actually rained some part of the twenty-four hours, while for ten full days and nights it rained all of the time. This was followed by a perfect flood of rain the last days of June and the first of July, till by that time the lakes and streams the most noted for fishing were the highest ever known. Old guides said that they had never before seen the Rangeley Lakes so high as they were on the last days of June. The rivers have been running full banks, and the smaller streams have overflowed their banks. At the Upper Dam and Middle Dam, Rangeley Lakes, the gates had to be started, the water being above the danger line. All this has been ruinous to fly-fishing.

Some of the papers, which make it a business to habitually lie on this subject and always represent the fishing good at the points they are the most desirous to boom, have told fish stories this season the same as ever. But in spite of such stories, fly-fishing has been unusually poor. A party of expert fly-fishermen returned last week from Camp Stewart, Richardson Lake, where they had been spending a couple of weeks. They tried the fishing faithfully every day, when it did not rain so hard as to preclude the getting out of doors, even clad in rubber coats and boots, and they found it difficult to get trout enough for the table. They caught nothing above 1½lbs. in weight. The water ran roily and spring high into the Richardson Ponds and all the streams where they tried to fish. This party was composed of Mr. C. S. Robertson, city auditor of Somerville; J. F. Wellington, of the Boston Coal Trade; J. S. Murphy, superintendent of Stickney, Poor & Co.'s spice works, and John J. Vaill, of Somerville. These gentlemen came back pleased with the rest they had had, but their fly-fishing was a failure. They tried at the Upper Dam several times, but without success.

A party consisting of H. H. Haskell, son of E. B. Haskell, one of the senior proprietors of the Boston *Herald*; H. C. Moffitt, R. D. Ware, S. A. Lord and C. B. Ashendent, have recently returned from Allerton Lodge, Mooselucmaguntic Lake, where they had been stopping for several weeks. They too found the weather noted only for the continuous rain and very poor fishing. Mr. Ashendent is credited with a 6lb. trout, however, by the papers, but the paper story remains to be confirmed by some member of the party. It is a remarkable fact that these later fishermen to return report that the black flies have been less troublesome than usual this season, notwithstanding the wet weather, which is usually favorable to their growth and increase.

Gov. Russell, of Massachusetts, is an angler, and he is as popular among anglers as he is as the ruler of the Commonwealth. Lately he has had a new honor conferred upon him. He had good success with a peculiar fly at B Pond this spring, where he was the guest of Messrs. John and Bayard Thayer. The fly was a suggestion of Senator Simpkins, a companion angler with the Governor. It has the body of a silver-doctor, the wings of a professor, with brown hackle under feathers and a red tail. Messrs. Dame, Stoddard & Kendall have lately been making the fly, and at the suggestion of Mr. J. Otis Wetherbee, another companion angler of the Governor, the fly is to be called the "Gov. Russell." Such a fly is likely to be heard from in the fall campaign.

Some of the Boston salmon anglers in Canadian and other waters are already returning, generally reporting very poor success. The streams have been greatly swollen by the very heavy rains, conditions decidedly against success in taking salmon with the fly. It is believed that the run of salmon is being a heavy one, the high water being favorable to their ascent of the rivers to their spawning grounds, though not favorable to angling. Besides, it is understood that the unusually high water in some of the salmon rivers has hindered the operations of the net fishermen.

July 3 and 4 was to have been pretty generally given over to bluefishing by a number of Boston anglers. Reports indicated that bluefish were plenty, especially off Nantucket, and a great fleet of boats was chartered for the days in question. The late trains on the Old Colony were pretty well crowded with sportsmen on the Saturday night of the 2d, and matters looked propitious for good fishing. Mr. Horace Cook, of the Boston grain trade, at the Chamber of Commerce made up a party of his friends consisting of Harry B. Moore, A. A. Keen, agent of Pillsbury's flour in Philadelphia, and Mr. F. W. Darling. They had a nice 32-ft. boat. They went down to Nantucket, where they arrived Saturday evening. The next morning there were some 20 boats, with crews and skippers all engaged, in Nantucket harbor, ready to go for bluefish. But the weather was bad. There was a heavy wind, with one of those peculiar fogs that make it dangerous going a dozen rods from land. Most of the parties refrained from starting out. But the Cook party, having an excellent boat with a captain and a mate, decided they would try to get around the point. They made good headway before the wind, but when the Point was reached the captain decided that it looked "too nasty" to venture out into the open sea. The boys were disappointed, for not a bluefish had they caught. But there was nothing for it but to beat back into the harbor. By this time the wind had increased almost to a gale. The captain suggested to the mate to put on his oil suit and take the helm while he donned his own oil clothing. They put the boat about, and the fishermen, who were not much used to rough salt water, soon began to appreciate the putting about and the difference between running before a heavy wind and beating against it. Though the mainsail was under three reefs, yet the boat careened so that she took barrels and almost hogsheads of water at every sea. It was necessary to pump constantly to keep the craft afloat. Added to the wetting was the fact of a terrible *mal de mer* that seized the poor landsmen. I asked Harry Moore if he was seasick. He answered, "Seasick! No. I was too frightened to be sick. Honestly I was never so scared in all my life. I want no more salt-water fishing; the inland lakes and ponds are good enough for me."

After beating for two or three hours the Cook party got back into Nantucket harbor, and the universal verdict was that no money would hire them to try it again in such weather. The other boat that ventured out had about as tough a time as did the Cook party. Very few bluefish were caught. On Monday, the Fourth, the wind again blew a gale from the northwest and fishing was almost an impossibility. Such is fisherman's luck.

SPECIAL.

### Colorado Trout.

CRIPPLE CREEK GOLD FIELDS, Colo., July 3.—I am not a subscriber in the full sense of the word, but have been a purchaser of it for many years past. Being a miner, my occupation necessitates moving from place to place oftener than I would wish the address changed to reach me. It will be fifteen years this fall since I first beheld Old Sol rise over yonder mountain range. Since that time I have arrayed myself in raiments of buckskin, and with the ever trusty "Old Reliable" Sharp .45-90 have hunted all kinds of game to be found in the Rockies, sometimes being very lucky, at other times not so lucky. But of more recent years the study of geology has remained the foremost thought. I have just now come in, pick and shovel on shoulder and pan in hand, from a search for the yellow metal. At this season of the year Dame Nature (here in the mountains) is dressed in her loveliest of robes. Over on Ten-Mile trout are quite plentiful. A friend of mine went trouting there last week and had the pleasure of taking 32 fish. I will go and try my hand at the business, and if I have good luck will write you all about it, and if no good luck will write anyhow. BUCKSKIN HARRY.

## AMERICAN FISHERMEN IN CANADA.

AN unusually large number of American anglers are at present in Canada, both upon the salmon streams of the far east and the trout and ouananiche waters of the northern district of Quebec. On the Restigouche among other members of the Restigouche Salmon Club, Dean Sage of Albany and Mr. Caldwalder of New York and Colonel Cutting have done fairly well. Other members of the club now whipping the same waters are Arthur H. Weeks secretary, John S. Kennedy president and Dr. Weir Mitchell of Philadelphia. All report the fishing slightly better than last year. As a matter of fact, the shipments of salmon from the Restigouche this year exceed by over a hundred boxes the shipments last year up to the same date. Robert Goelet and Stanford White the well known architect are fishing at Red Bank on the Restigouche, where the former in one day killed eight salmon averaging over 25lbs. each. Harry Hollins, Mr. Vanderbilt's broker, has done well at Brandy Brook, having killed thirteen fine fish in two days. The pools at Indian House are being successfully fished by Mr. James Breeze and wife, Mr. and Mrs. John Purdy, Charles Fearling and Captain Emmet, all of New York. Rev. Dr. Rainsford has been fishing the Patapedia for nearly a month, and Camp Albany on the Restigouche has yielded some famous fish to Abraham Lansing of Albany and Dudley Olcott and C. H. Raymond of New York.

The American anglers who have thus far fished the Lake St. John waters this season are charmed with their success, especially with the ouananiche. The run of these fish into the Grande Discharge of Lake St. John during the last week or two has been unyrecedentedly large, Messrs. E. N. Coates and D. H. Coates, of the Springfield Fishing Club, took upward of a hundred pounds of fish in one day at the Discharge at the end of June, and also report the trout fishing as excellent in their own lakes. Dr. J. Lundy, of Philadelphia, recently killed twenty-five ouananiche in one day, and Mr. and Madame Petit, of Paris, took sixty. Messrs. James Chamberlain and W. H. Mathews, of Rochester, are at the Alma Club on the Grande Discharge. Capt. Rose and the Lady Cecil Rose, of London, the latter a daughter of the Earl of Cathcart, are making a long stay in the Lake St. John district, and are at present fishing the splendid ouananiche waters of W. A. Griffiths, Esq., in the Grande Discharge, where some of the grandest sport is had and the largest fish taken. The fish are here sometimes taken up to eight pounds in weight, and those of three and four pounds each are by no means uncommon. To take equally large fish in Mr. Beemer's waters, anglers should descend two or three miles below Scott's Camp. At present the fish take bright and large-sized flies, chiefly the professor, Jock Scott, silver-doctor, etc. Soon they will require much smaller flies of the same character or darker hues, and will probably be easily seduced by the B. A. Scott, a new fly tied in close imitation from samples of flies taken last season in July and August from the stomachs of ouananiche and supplied by Mr. B. A. Scott, the manager of the hotels and fishing grounds at Roberval and the Grande Discharge.

Among others who have recently passed through Quebec on their way to the Grande Discharge are Messrs. Eugene McCarthy, of Syracuse; E. H. Curtiss, Dr. Paul F. Mundé and Dr. B. H. Wells, of New York, and Mr. Nowell, of the Boston & Maine Railway—all of them, with the exception of Mr. Nowell, old-time fishers of the ouananiche.

In Lake Edward there have recently been some magnificent catches of red trout. J. U. Gregory, Esq., recently took a beauty nearly 6lbs. in weight, and has splendidly preserved the skin. His nephew, Mr. Van Felson, took on Monday last a number of handsome specimens in the St. Anne River, from the preserve of the Tourilli Fish and Game Club, up the line of the Quebec & Lake St. John Railway, and that notwithstanding the constant rain of the last few weeks, which has swollen the rivers enormously. Two of these trout weighed respectively 2¾ and 5lbs. E. T. D. CHAMBERS.

QUEBEC CITY, July 7.

## SALE OF TROUT IN CLOSE SEASON.

*Editor Forest and Stream:*

Mr. W. L. Gilbert, in his reply to me in your issue of July 7, appears to labor under the hallucination that I will have my "hands full in preventing the sale of cultivated trout in Connecticut at any season of the year either dead or alive." Probably I have had more experience in prosecuting illegal trout fishermen and illicit dealers in trout than Mr. Gilbert's "Connecticut attorney" ever did. I have never as yet failed to convict all persons found violating Connecticut's "modified" (so called) law. I fully understand how tenaciously some cling to the proviso in our law which reads:

That any person may take trout in waters owned by him for the purpose of stocking other waters, or take and sell any trout reared in such waters.

Undoubtedly Mr. Gilbert catches at the ellipsis in the above quoted proviso. To understand the fish laws of this State one needs to read more than one section. I beg to call attention to Revised Statutes, 1888, Section 2,525, which reads:

Nothing in this chapter [Fishing in Ponds, Reservoirs and Streams] shall prevent the Fish Commissioners, or any person authorized by them, from taking fish at any time and place, and as they choose, for the purpose of science and of cultivation and dissemination.

Now I claim that without one of these permits no person can legally sell trout in the close season. I am ready to try conclusions with Mr. Gilbert's "Connecticut attorney" to test my claim.

The courts would construe the statute quoted by Mr. Gilbert in accordance with the legislative intent; since it is always to be presumed the Legislature designed the statute to take effect, and not to be a nullity.

HARTFORD, Conn., July 9. A. C. COLLINS.

*Editor Forest and Stream:*

Disappointed in his efforts to legalize in Massachusetts the sale of artificially reared trout during the months of January, February and March, Mr. Gilbert has applied to the Commissioners of the District of Columbia for information about the law governing the sale of trout in this District, and has been told that there is no law relative to the sale of brook trout. It was incorrectly stated that only about 100lbs. of brook trout per annum reach the city. It is true the markets have a very small lot of trout, but the large clubs and hotels receive the fish in large quantities from private preserves and distant markets. "There is no prohibition of hook and line fishing within the limits of the District at any season of the year," says the *Book of the Game Laws.* It would appear, therefore, that any kind of game fish can be lawfully sold in its spawning season. This is only one of the many signs of a benighted understanding among the District's lawmakers, and only here and in similar fossilized communities can the sale of unseasonable fish and game go unpunished.

Anglers' fishes in Washington comprise a goodly list in the markets during April, May and June. The inspector of marine products reported the arrival at the river front of weakfish (called sea trout), croakers, bluefish (called tailors), white perch, yellow perch, striped bass, flounders, spots, Spanish mackerel, carp, scup (called porgies), sheepshead, drum, pike and black bass. He might have added many other names, but these will serve to show how extensively the game fishes figure in the city's food supply. Only two black bass found their way to the market, but hundreds of the spawning fish were caught and eaten. FARIO.

WASHINGTON.

## SOUTH SIDE SPORTSMEN'S CLUB.

FROM the twenty-sixth annual report of the committees of the South Side Sportsmen's Club, of Long Island, we find that the membership now numbers 100, which is the limit of the organization. The officers for the ensuing year are: Roland Redmond, Pres.; W. Bayard Cutting, Vice-Pres.; George P. Slade, Treas.; Francis O. deLuze, Sec'y; George G. DeWitt, Counsel. The four honorary members of the club are: William H. Furman, William Nicoll, James Benkard and Samuel Shaw.

The record book of the club shows 5,862 trout killed last year. "The brook fishing was excellent up to the close of the season, showing the wisdom of employing the game keepers or wardens, as only three years ago there was strong evidence of the stream having been netted." A large amount of woodland was cleared without improving the shooting. Many coveys of quail were raised, but owing to the drought they concealed themselves in inaccessible covers. Deer have increased on the property. Twenty-two were killed at and near the boundary fence.

Owing to ill health Supt. James P. Swain was forced to resign, and J. Brian Foulke was appointed in his stead.

In the fish preserves, during some necessary repairs, eels entered and proved very destructive to the young trout. One eel was killed containing 42 fry. By these depredations the stock of fry was reduced to 7,000, and it became necessary to buy 20,000 from the Tuxedo Club. In order to keep out these marauders concrete floors are being laid in the preserves. In the upper brook 3,213 trout were killed averaging in weight 3⅝oz. The average of the other 2,649 trout was 12½oz. Of the 192 rainbows killed the heaviest weighed 3lbs., 12oz.

"Of late years the number of large fish taken from the pond has been small, and upon examining the reports it was found that since three-year-old fish have been turned out instead of two-year-olds, the fishing in these waters has declined. It has now been decided to turn out mainly two-year-olds, keeping only about 1,200 until three years old. These will be put out for the early fishing. Experience has shown that after natural food becomes plenty, the old fish are hard to lure with artificial fly.

The members of the fish committee are Roland Redmond, John G. Heckshcr and George P. Slade. To the report of the committees are appended the charter, constitution, by-laws and fishing rules of the club, the rules of the executive committee and the special provisions of the new game code of 1892, Art. VII., relating to Kings, Queens and Suffolk counties and Long Island Sound.

## SOUTHERN CALIFORNIA FISHING.

*Editor Forest and Stream:*

I see in your issue of June 23 Mr. Ramon E. Wilson, of San Francisco, sees fit to criticise my letter of April 7, and to make many erroneous statements regarding the same. If Mr. Wilson is capable of reading a letter intelligently, and will refer to my letter, he will note that I referred to the trout fishing in this State as being good. I am familiar with and have fished in some of the northern streams Mr. Wilson mentions, but have yet to find a better stream for trout than the San Gabriel. To be sure many fishermen would not come south so far to find trout, and no more would the angler here journey to the "northern citrus belt" for that purpose. My letter was meant to give the most convenient places where the fishing was good, and not out-of-way places like Tahoe, Donner, Independence, the Klamath, etc., which are practically out of the State. Mr. Wilson mentions some places where I do not think there are any better fish than catfish, and the statement made by me that the fresh-water fishing in the Eastern and Southern States is far superior to the fishing here, and that practically trout were the only fresh-water variety worth angling for here, remains a fact despite Mr. Wilson's numerous doubts.

I brought a fine rod with me when I came to this State ten years ago, and after spending a small fortune in tips and repairs, I now leave it at home when I go fishing, and take a couple of light bamboo poles. If Mr. W. will refer to my remarks about the purchase of tackle, he will see it referred to salt-water, and it is a fact, as any one who will investigate will find, that it is impossible to get a fine salt-water outfit—such as one will find at Mills or Vom Hofe's—in this State. Therefore I say, bring your salt-water fishing tackle with you.

Speaking of large trout, one was caught in the Bear Valley Lake weighing 12¾lbs. This trout was on exhibition in Los Angeles last year, and on its bed of ice looked very handsome and tempting. I believe Gus Knecht of the Bear Valley Hotel caught it.

In conclusion I will say whatever I write is the result of practical experience, and solely hoping to be of use to some brother sportsman. C. B. WILLIS.

ALHAMBRA, Cal., June 29.

### In the Great Back Bay.

ST. ALBANS, Vt.—Lake View House.—In July: One boat—32 wall-eyed pike, 3 Northern pike and 7 bass. One boat—37 wall-eyed pike, 1 mascalonge, 9½lbs. One boat—20 bass, 1½lbs. to 3½lbs. One boat—13 bass and 13 wall-eyed pike. All boats catching other small fish. Fishing good. H. L. SAMSON.

## THE ANGLING EXHIBIT.

Now that the exhibition space in the building for the Angling Exhibit at the World's Fair is nearly all allotted to manufacturers and dealers in fishing tackle, it is in order to notify the anglers of the United States and Canada that they can contribute very materially to this exhibit. Individual anglers and angling clubs can furnish various articles that will add much to the completeness and attractiveness of the display, in the way of paintings, drawings and photographs of fishing scenes, club houses, landscapes, etc., fish specimens, articles of tackle, etc., which can be utilized in decorating the screens and walls. It is hoped and urged that almost every angler will contribute something to this display. A single article from each angler would form an aggregation that would be both unique and novel, and one that could not fail to be exceedingly interesting to all who love the fisher's art.

At the Piscatorial Exhibition, held Feb. 18 to March 5, 1892, at the Royal Aquarium, Westminster, London, there were nearly 2,000 entries by anglers and angling clubs, consisting of paintings, photographs, drawings, fish specimens, articles of tackle, etc., and it seems to me that American anglers should do as much for the great World's Columbian Exposition and make this feature of it a truly representative one.

The classification of the Exhibit is as follows:

*Group 39.—Angling Exhibit.*

CLASS 242.—History and Literature of Angling.
- Section 1.—Books, periodicals, poems, etc.
- Section 2.—Paintings, drawings, engravings, photographs, maps, etc.
- Section 3.—Anglers' trophies, medals, prizes, etc.
- Section 4.—Mounted fishes, fish skins, fins, earbones, etc.

CLASS 244.—Salmon Rods and Salmon Tackle.
- Section 1.—Salmon rods.
- Section 2.—Salmon reels.
- Section 3.—Salmon lines.
- Section 4.—Salmon flies, leaders, etc.
- Section 5.—Gaffs, butt-rests, bags, etc.

CLASS 245.—Rods, Reels and Tackle for Bass, Trout, Pike, etc.
- Section 1.—Bait rods, fly rods, trolling rods, etc.
- Section 2.—Materials and mountings for rods.
- Section 3.—Multiplying reels, click reels, automatic reels, etc.
- Section 4.—Reel fittings, reel fastenings, etc.
- Section 5.—Fishing lines; braided, twisted, laid, etc.
- Section 6.—Materials and dressings for lines, etc.
- Section 7.—Fish hooks of all kinds, unmounted.
- Section 8.—Fish hooks, snelled and mounted, gangs, etc.
- Section 9.—Artificial flies and materials.
- Section 10.—Silkworm gut, leaders, snells, gimp, etc.
- Section 11.—Artificial minnows, insects, etc.
- Section 12.—Trolling baits, spoons, spinners, squids, etc.
- Section 13.—Sinkers and swivels, all kinds.
- Section 14.—Floats, furnished lines, etc.
- Section 15.—Minnow seines, nets, traps, etc.
- Section 16.—Landing nets, net rings, gaffs, etc.
- Section 17.—Creels, baskets, bags, live nets, etc.
- Section 18.—Minnow buckets, crates, bait boxes, etc.
- Section 19.—Rod cases, reel cases, butt rests, rod holders, etc.
- Section 20.—Tackle boxes, tackle books, fly books, leader boxes, etc.
- Section 21.—Insect repellers, fly oil, fly cream, head nets, etc.
- Section 22.—Tools, pliers, knives, files, oilers, etc.
- Section 23.—Miscellaneous articles, balances, disgorgers, stringers, clearing rings, drying reels, etc.
- Section 24.—Accessories; fly wax, dyes, varnishes, stains, waterproofings, etc.

CLASS 247.—Anglers' Apparel and Appurtenances.
- Section 1.—Hats, clothing, wading pants, boots, shoes, etc.
- Section 2.—Filters, cups, flasks, etc.

CLASS 248.—Anglers' Camp and its Outfit.
- Section 1.—Tents, portable houses, camp furniture, hammocks, cooking utensils, pack baskets, canned food, lamps, etc.
- Section 2.—Fishing boats, canoes, fish cars, etc.

I will take pleasure in furnishing blank applications for space, and all desired information as to details, etc., to all who will communicate with me.

JAMES A. HENSHALL,
In charge of Angling Exhibit.

No. 210 TENTH STREET, N. W., Washington, D. C.

### Fishing for Fun and Fishing for Money.

LOCK HAVEN, Pa., July 4.—Trout fishing in all our streams this season shows a great improvement over former years, and numerous large ones, for our waters, have been taken.

I captured with fly in McElhattan last month a 15 and a 16in. trout weighing respectively 1¼ and 1½lbs.

We have a Fish and Game Protective Association, organized last spring, that is making great efforts to improve the fishing in our county and to compel the observance of the laws protecting fish.

It was reported that Clinton county applied for more trout fry this season than the whole State could furnish.

The greatest obstacle we have to contend with in replenishing our streams is market-fishing. Certain persons are on our trout streams night and day catching trout for sale to the saloons. They make a regular business of it throughout the entire season, and of course become very expert and successful in taking trout. They are bait-fishers. They are strongly suspected of using dynamite or other illegal devices to fill their baskets. They are the worst trout hogs we have—trout hogs for money. We want a law to prohibit catching trout for sale. T. M. C.

### Fishing Incidents.

A CORRESPONDENT of the London *Fishing Gazette* relates: "I had hooked and was playing a roach, when I saw hovering over it a kingfisher, which made a dash for the fish, but, striking the rod instead, fell partly stunned upon the water. I could have reached the bird with the net, but thinking it might recover, let it float away. All at once there was a rush, a swirl, up flew the water, and the kingfisher disappeared in the jaws of a pike."

In connection with the incidents of overboard hauling of fishermen by fish, noted by Mr. Cheney last week, read this from the Brownwood (Tex.) *Banner:* "Several parties were fishing in the Colorado River on the Brown county line a few days ago. One man left the party in a skiff to examine some set hooks. Not returning in due time his companions went in search of him. They found his empty skiff floating on the water. They then examined the hooks, and upon one they found a 125lb. catfish and their lost companion with the hook run through his hand. It is supposed the man had drawn the fish up and tried to take it off, but the fish in flouncing around had hooked his captor and dragged him under the water."

### Bluefish in Great South Bay.

THE first run of bluefish came into Great South Bay last week. Some of them weighed as much as 12lbs., and they were caught in large quantities near Sayville, Long Island.

## JUGGING FOR CATFISH.

AMONG the diverse modes of fishing in the great rivers of the Mississippi valley there is one that is known as jug-fishing or "jugging" but more properly float fishing, and is much in vogue with those who fish for recreation.

A dozen or more earthen jugs tightly corked, or blocks of wood, to which a baited line a few feet long is attached generally complete the outfit; but these make-shifts are clumsy and inconvenient and the better way is to secure the requisite number of air-tight tin cans four or five inches in diameter and twelve or fifteen inches long with a ring at one end to which the line or leader is attached. They are usually kept in stock where fishing tackle is sold, but can be made by any tinsmith. They should be painted white to prevent rust; and besides they are more readily seen in the water.

About two o'clock one warm afternoon of last August Harry and I loaded thirty-three floats (there's luck in odd numbers you know) in a light running skiff and pulled up the river about four miles to while away the afternoon and take in a few catfish. The river was smooth as glass, not a breath of air stirring, and o'd Sol was getting in his work as if it was his last chance for the season.

Coming to a suitable place we pulled across the river, throwing out the floats two or three rods apart with hooks baited with scraps of fresh meat from the butcher shop. We were "honin fur cat" and were coaxing them to leave the gravelly and muddy depths of the Mississippi to come up and take a bite.

The floats move off in line like a file of soldiers on parade. Now they break ranks, some lay behind, others advance. Some drift into shallow water and the lines drag the bottom. We row over to them, shorten the lines, examine the bait, and start them on their journey again. The floats in the eddies bunch up like a flock of teal as if in consultation, then they separate. Some swing off to the right, others to the left, others advance like skirmishers, and a few bring up the rear while the skiff floats silently a hundred yards behind.

"There's a bite!" Over to the extreme left a float goes down with a jerk and comes up with a jump; down it goes again, bobbety, bob, bob, now it goes up stream with a rush, then toward the bank. "It's a big one." Swiftly and quietly with muffled oars we pull over to interview him.

"Easy now, don't grip the line as if you were checking a lumber raft: take it between your forefingers and thumbs and pull him in gently; if he struggles turn him loose till his fight is over; the float will hold him. There, let him fret a little longer. Now try him again. Don't lift him out of the water for he may not be safely hooked."

The skiff is cautiously tipped until its edge is level with the water and he is floated in without a struggle. He's a "blue cat," a twenty-five-pounder if an ounce. He is dropped into the "live box" in the bow of the skiff; and the hook is baited and dropped overboard.

There's trouble with the lower float in the center of the current; it's spinning like a top but don't go under. "That's a little one, "a fiddler." Down we go to the front and take in a three-pounder, just enough for a good meal if you are really fish hungry.

The floats have now drifted to both banks and the line is three-fourths of a mile in length; but there is not a ripple on the water and you can see them without trouble.

"There's another bobble" near that tow head. He's lively but it's not a big one. He's moving down stream toward that drift pile." Then we row over and head him off and when his dance is done float him in, a good fifteen-pounder. This is safer than a landing net, for unless the fish is well hooked or completely tired out he is apt to plunge and you may lose him in the moment of victory.

We rest on our oars until the floats pass us, then we take our position in the rear again where we can overlook the scene of action.

Now we float a mile or more without a bite or nibble. "There's a float that seems to be sinking. I wonder if it leaks." It is still for a few minutes but slowly comes up again. "It's a turtle and you can bet your biggest fish he's stole your bait."

We drop quietly down and replace it and pick up a half dozen straggling floats and drop them noiselessly in deep water alongside an island and pull back to our position, to await results. On looking back there are but five floats in sight and away we go to see about it. But the missing float pops up suddenly as if to catch breath and down it goes again. In a few minutes it comes up thirty yards lower down.

"That's the biggest one yet and we mustn't lose him. He's too near the bank, he'll get fast in the willows and then good bye."

The boat is quietly backed down between the fish and the bank and by striking the water with an oar blade we drive him into safer quarters where he can take his time to finish the battle. When he got quiet down went the gunwale and we floated him in and took in several bucketfuls of water at the same time, but that is a small matter to a fisherman.

This was the biggest fish we caught and I will not say how much it weighed lest some of your readers might say it was a fish story and wouldn't believe any of it.

We had spent so much time in taking him in that our nearest floats were a quarter of a mile down stream and when we reached them three were dancing like puppets and made lots of sport for the next half hour, but we secured all the fish.

As it was nearly sundown and we were nearing home we picked up the floats and pulled into port. Our seven "blue cats" weighed 125lbs., a pretty good catch for a four-hour run. We divided liberally with our friends and had an abundance for ourselves.

Our luck that day was better than usual, but was not remarkable; I have seen better work when the run was longer and the water in the right stage and condition. At other times we might go over the same course and get nothing for our trip but fisherman's luck.

I could a fish tale unfold that would harrow up a fellow's feelings because he was not there himself, of phenomenal catches and big fishes of the western rivers in early days that would fall on incredulous ears except among those living near those streams and to whom such things are no marvel. CAMERON.

### An Oregon Trout.

OREGON is productive of many remarkable things, among which may be mentioned trout. Mr. John Williamson, who is in the employ of F. M. Warren, at the Cascades, has brought from that place a trout 3ft. in length and weighing 12lbs. This monster trout was captured in one of the waterwheels at the Cascades. Mr. Williamson says that in all his twenty years' experience he has never seen anything to equal in size or weight the fish that has been captured.—*Portland Telegram.*

### Big Salmon Score.

MR. STANFORD WHITE, of the well-known firm of architects, McKim, Mead & White, returned last Saturday from the Restigouche River where he has been angling for salmon. In a little over three weeks' fishing he killed forty-six fish, the aggregate weight of which was 1,049 pounds. This is the best salmon score for the Restigouche Club to date, and is well worth recording.

### Hemlock Lake Association.

A NUMBER of gentlemen met at Frank J. Amsden's office this morning and perfected an organization to be known as the Hemlock Lake Association for the Protection of Fish and Game. Officers were elected as follows: President, L. A. Pratt; Vice-President, L. G. Wetmore; Secretary and Treasurer, F. W. Emerson; Executive Committee, Wm. Manning, Geo. A. Reynolds, R. B. Ashley, F. J. Amsden, Geo. P. Marten. The object for which the Association has been organized is a most meritorious one. It is to prevent as much as possible illegal fishing in the lake. This will be gratifying not only to cottagers at the lake but to citizens of Rochester generally, for it is a fact that there has been a great deal of illegal fishing at the lake. In many instances the poachers have left set lines in the lake such a length of time that the water has been polluted more or less by the decaying fish, and so many fish have been taken from the lake by set lines and nets that the stock has become diminished to such an extent that it is difficult for legitimate sportsmen to make a respectable catch. Similar associations for the protection of other bodies of water have been formed in different parts of the State. The local association will take steps to prosecute all persons found fishing illegally in the lake, and all property owners and cottagers at the lake will be asked to become members.—*Rochester Union and Advertiser, June 27.*

### Conesus Lake Association.

A NUMBER of cottage owners at Conesus Lake held a meeting in F. J. Amsden's office this morning and perfected an organization to be known as the Conesus Lake Association for the Protection of Fish and Game. Officers were elected as follows: President, Horace McGuire; Vice-President, L. L. Williams; Secretary and Treasurer, Daniel C. Bascom; Executive Committee, John C. Hayden, Lewis Ennecker, Willard G. Rich, Geo. Field, H. T. Jaeger. The object of the association is the prevention of illegal fishing at Conesus Lake, which has heretofore been carried on to a considerable extent. All cottage owners at the lake and others interested in the protection of fish will be asked to join, and steps will be taken to prosecute all persons found fishing with nets and set lines at the lake.—*Rochester Union and Advertiser, June 29.*

### Better than Bait.

THE boy had been sitting for three hours watching the bob on his fishline when the man came along.

"What are you doing there?" said the man.

"Fishin'," said the boy.

"Got anything?" said the man.

"Yep," said the boy.

"What?" said the man.

"Patience," said the boy, and the man offered him four dollars a week to come down to the railroad office and answer questions.—*Detroit Free Press.*

### Quebec Trout.

QUEBEC, June 3.—I have just returned from a short excursion on the Tourilli Club territory, up the St. Anne River, where, notwithstanding the height of the waters, which are overflowing its banks, we were fortunate enough to kill seven brook trout over 2lbs. each, the largest being 5lbs. VAN V.

## Fisheulture.

### LONG ISLAND SOUND STRIPED BASS.

A PETITION extensively signed and sent to the New York Fish Commission sets forth the great decrease in the game fish of the Sound, particularly between Fort Schuyler and Rye Neck and Oyster Bay. "Within twenty-five years it was not uncommon for an angler to secure one hundred good fish, of five or six sorts, in a single day, at any point within the bounds named, but now such a catch is unheard of, unless it be of the coarser sorts, such as flounders and eels. That an improvement of the angling in the Sound would be of great advantage to our towns, does not require proof; and it appears to be a discrimination against salt-water angling when the ponds and streams of the interior of our State are supplied with trout, etc., and these waters, so near New York city, are comparatively neglected. We therefore request that you will, as soon as practicable, commence an annual distribution of eggs or fry of salt-water fish, but especially of the striped bass (*Labrax lineatus*) and weakfish (*Otolithus regalis*), in the waters of the sound as indicated."

In response President Huntington advised the petitioners, July 1: "We have had one of our men at Barnegat Bay, and otherwise made efforts to secure weakfish eggs, thus far without success; hope to secure some yet this season, also of sea bass, and perhaps of other salt-water fish. Could do nothing with striped bass this season, as our finances are very close, and it would incur a considerable expense to get the eggs and handle the fish, as the coast of North Carolina is, from the most reliable information obtained after a diligent investigation, the only location where the eggs can with any certainty be had. Our appropriation for next year having been increased, we will then make the effort, and hope for success."

### American Fish in Germany.

MAX VON DEM BORNE wrote the Commissioner of Fisheries June 18, 1892: "The two dogfish sent by your kindness last year have spawned, and many hundreds of young dogfish were seen around a parent fish. The same happened with the long-eared sunfish sent last year. The calico bass unfortunately died during the severe winter."

### Yearlings Versus Fry.

MR. CHAS. F. ORVIS has informed the U. S. Fish Commission that he intends to rear 20,000 brown trout to yearlings before putting them into his ponds, for he believes the comparative failure of restocking their streams has resulted from the fry having been nearly all destroyed very soon after they were planted.

Mr. J. G. Bailey, president Silver Springs Milling Co., Rogers, Ark., wrote to Mr. William F. Page that a yearling rainbow trout received from him at Silver Springs December, 1890, or January, 1891, jumped out of his race April 21, when 28 months old. It was 22in. long and weighed 3lbs. dressed. No food has been furnished them. This was a female full of eggs.

### American Fisheries Society.

NO. 81 FULTON STREET, NEW YORK, June 1.—*Editor Forest and Stream:* We are anxious to have at least 600 members present at the next annual meeting, which will be held in Chicago on the second Wednesday in August, 1893. All persons interested in the Society and its work are cordially invited to join as members. EDWARD P. DOYLE, Sec'y.

## The Kennel.

### NOTES AND NOTIONS.

PREVENTION of cruelty to animals is making rather a noise just now, various societies existing for this alleged purpose, being very active in various demonstrations, and unfortunately these demonstrations are much more in the line of punishing some one for assumed cruelty than in a preventive direction. A prominent magazine devoted to household science recently put the question whether the impertinent and presumptous interference with private rights by these societies was not a greater evil than the cruelties they seek to suppress, and startling as such an inquiry is at first sight, it is worthy of serious consideration. The underlying trouble attendant on the work of all such societies is the sentiment on which they are founded going the way of all sentiment and swallowing up considerations of practical utility or even common sense. It is practically certain that sentiment, that may almost be called fanaticism, is a necessary part of any such work. None will be apt to devote much of their time to a work so essentially abstract in its character from practical motives; "the game is not worth the candle" is the view practical men would take. As a result, fanatics, necessarily with ill-regulated minds, impatient of restraint or moderate measures, come to the front in such work, and the cruelty they practice and the enormous assininity they develop is simply natural evolution, soon arriving at the conclusion that an enforcement of law is a secondary matter, that their views of what the law should be is the right ground to proceed on.

Such idiotic procedures as opposition to vivisection, dehorning cattle, many sports, etc., are the result of mental fermentation that cannot and will not be tolerated in an enlightened country. To vivisection we owe all the brilliant triumphs of modern surgery in saving many human lives, dehorning cattle is wisely done for the benefit and comfort of the animals operated on, and the transient pain produced is many times outweighed by their subsequent comfort. Sports have long been an enjoyment of many of the noblest men the world was ever adorned by; and indulge in abstractions as much as fanatics may, it is useless to attempt to persuade the world that men, standing far above their fellows in self-sacrificing works of mercy, are cruel in their devotion to sports.

A most ludicrous spasm of prevention of cruelty societies is the performance in Cincinnati of such a society undertaking the work of killing vagrant dogs: sentiment has no place in such work. It is just as thoroughly a police duty to remove the hordes of vagrant and worthless curs that infest our cities as it is to suppress rowdyism, and it is just as much the duty of municipal governments to incur the cost of protecting the public from one evil as the other, and that irresponsible agents of a S. P. C. A. will continue to do the work as satisfactorily as sworn public officers is not to be expected, and if the prospect of making money by capture of vagrant dogs becomes a factor, the worst excesses of the dog-catcher will soon be excelled. This may seem unwarranted, but have not the outrageous assumptions of authority by such agents given a strong color of probability to such a belief? This suggests the only protection the public have from such men is a resolute defiance of their threats and commands, thereby teaching them that obedience to the law on their own part is the only condition on which they will be tolerated.

As to "dog catching," The Onlooker would again impress it on all municipalities that the foundation of the abominations of the business is the wretched "per head" system; make it a matter of duty of regular police officers to capture stray dogs and the work will be better done and without the disgusting features that now characterize it.

The Onlooker regrets that the respected editor of the London *Stock-Keeper* should misconceive his exception to the remarks as to that "noble" incident and assures said editor that nothing was further from his intent than any reflections on the motives directing the unfortunate remark. The Onlooker cannot but hold that the remarks to this were hasty, inasmuch as the editorial columns of FOREST AND STREAM have always been free from gush and maudlin sentiment, and an error of writing or print was more likely than that slush like the unfortunate word was the fact.

THE ONLOOKER.

### DOGMATICS OF DOGDOM.

BLOODHOUNDS are sometimes used to track criminals which do not take their tracks with them, but setters and pointers will make a good stand on "footpads."

—§—

According to recent versions of the two matters, the manner in which a Colorado wolf glimmers in the horizon and the manner in which a high class field trial dog ranges are one and the same.

—§—

Field trials must be most destructive competitions, for in the reports we read that nearly every dog "breaks his back" at some stage of the race.

—§—

It is generally admitted and presented as a special feature of merit that coursing is the noblest of sports, because the dogs run honestly, they being out of control of man for the time being. The converse of this suggests itself, and is a sad commentary on the honesty of man.

—§—

About the most pathetic scene in life is that of an old maid buying a Newfoundland because that breed is famous for saving children from drowning.

—§—

Man or dog does not look right when out at elbows.

—§—

Did you ever see a dog "toe the scratch"? If not, watch one which has mange or fleas. THE CYNIC.

## COLOR, TYPE AND RETRIEVING.

*Editor Forest and Stream:*

It did me lots of good to read Capt. Pat Henry's sensible article in the last issue of a contemporary. The idiot's course that has been more or less in vogue to cull out all colors but black, white and tan for several years past, deserves to be severely condemned by all breeders who have a desire to improve the field quality of our setters. What figure color cuts, I cannot see; and when compared to field quality is of no more importance than coat.

Since Mr. Llewellin said his say on the color question, I have heard of several breeders saying that they have been right there all the time; yet, only a few years ago, one of these same parties was the worst color crank I ever talked to. Why! he could not see any good in a lemon and white at all, no matter if their work was deserving of the highest admiration.

My old friend "Pious Jeems" and myself have had many an argument on that question, but I have always stood firm on the basis of Capt. Pat Henry's logical illustration of Jersey cattle color. There you have it. Color cranks tried to side-track the breed, and might have done so if one sensible man had not pulled the switch and sent them right through on the main line again.

By the way, that illustration will knock the support "galley west" from under those who maintain that the field-trial dog is differently put up from the field dog, or that there can be a difference.

We want the field dog for his field qualities, same as the Jersey cattle for their butter qualities, and whenever the field trial dog is acknowledged not a field dog, the field trials have done our pointer and setters more harm than they ever have done good.

But, speaking of breeding, it makes me smile when I think of H. S. Bevan's article headed "English Setter Type," in a contemporary, not so much because he says nothing about type of any kind except to mention what Dr. Rowe said of old Gladstone, and the type he is pleased to call the Tennessee. Look out, friend Bevan, and don't jump your "Tennessee setter" on us quite yet. "Tennessee type!" That amuses me.

Take Mr. Bevan's partial list—Gath, Roderigo, Gath's Hope, Daisy F., Chance, Jean Val Jean, Rowdy Rod, Antonio, Lady C., Gladstone's Boy, Sportsman. This is not all, but enough. Take this list, and show me a type. Big-boned, sway-backed Sportsman won't type with Jean Val Jean, whose hips are two inches lower than his shoulders.

Daisy F. won't type with delicate Lady C.; Gath's Mark and Gath's Hope will hardly show the typical form of Rowdy Rod or Toledo Blade, the two last differing as widely from each other in type as they do from the two first, etc.

Now, where, Mr. Bevan, is your vaunted Tennessee type?

Then again, two Tennessee dogs, Gath and Roderigo, were sired by Count Noble; Jean Val Jean by Mingo, so rightly only the credit of breeding them belongs to Tennessee. Tennessee got in on the "ground floor" in this "dog business," and has bred more dogs and has more practical men breeding dogs than any other State in the Union.

But, Mr. Bevan, you have no type any more than Ohio has an Ohio type; Indiana an Indiana type, etc.

And, Mr. Bevan, the very type of dogs you condemn, you mention in your partial list as dogs of Tennessee type as wonderful how many dogs have been bred in Tennessee or its vicinity.

I note that the question of retrieving at field trials has about lost its interest. The "anti-retrievers" have the Eastern and Central trials solid. I see some have claimed that retrieving has a tendency to make a dog low-headed. I do not think so. I have always practiced a system of teaching my dogs to retrieve in the kennel, but not allowing them to retrieve in the field until they pointed staunchly, were steady to wing and shot, and obedient. With the amount of experience a dog would acquire in getting this far along, he would have become confirmed in his method of carrying his head, and the mere act of hunting a dead bird would have no influence on his carriage of head. I have seen many dogs that did not retrieve that carried low heads; and all the dogs that I know anything about personally that carry low heads and retrieve did so before being taught.

Only last winter I had a bitch that the only trouble in her retrieving was that she carried too high a head, and the runners nearly always escaped her in the grass, and my observation has been that, in the field trials, instead of low-headed retrievers, the opposite has been the case. The dog is told to retrieve, and he goes with his head up, like a shot, after the flushed birds. The handler gets him back and the dog hunts about with high head, and his handler gets nearer and nearer the birds, working his dog back and forth across wind until it finally strikes the scent, finds the bird and retrieves it. Of course, there are dogs that mark the dead bird when it falls, and go directly to it and get it. In either case there is an absence of low heads. There are few retrievers of good judgment but that can tell the difference between a live, a wounded, or a dead bird. Those who have ever experimented with a dog of any experience, with a cripple bird, by trying to get it to point, may recollect how unfruitful in points the experiment was.

The old way at field trials of throwing out a dead bird and shooting off the gun for a retrieve came as near showing the kind of a retriever a dog was as throwing out a ball would. I have had dogs that would retrieve a bird that way every time, but would not touch a bird on the ground until it had been handled.

That system was just as practical as a party I once knew, who made a practice of going to the market and buying a snipe before going out to look at a dog he intended to buy, and putting the bird in a pocket to test the dog's nose. If the dog was friendly inclined and came and smelled him, as dogs frequently do a stranger, he became a firm believer in the quality of that dog's nose. If the dog paid no attention to him, he held the opinion that the dog could not smell tar. I have noticed that a good, level-headed dog, with lots of experience, which retrieves, acts altogether differently on a wounded bird when the birds were shot at than on one which was slightly wounded and made a long flight. The dog expects to find a dead or wounded bird when the birds are flushed and shot, and pounces on the cripples with confidence unmistakable; but when he comes on to a cripple that has flown off when the dog knows there should be no dead birds, he often makes a hesitating point for an instant before being apparently satisfied that the bird is wounded, and then dashes in and gets it.

The main reason that retrieving is less thought of among the handlers is that most of them do not shoot many birds over dogs in their preparatory work; the dog's work being sharper without it. All handlers aim to produce a dog that will range and hunt just outside of its competitor, if within the bounds of possibility. Therefore, when a gun is fired and no bird is killed, a handler doesn't want his dog to stop in a long cast to look the ground out for "dead birds," but to hustle for the live ones. I could not help contrasting the Derby last year at High Point with a memorable one I recollect about seven years ago. In the one I have in mind were Bob Gates, Gath's Mark, Gath's Hope and other good ones. In the heat between Gath's Mark and Bob Gates, in the timber where a number of birds had been scattered, it seems to me they made more points than were made in the entire first series of the Eastern Derby last year.

I was glad the quality of the Southern Derby was good, as I have remarked a falling off in quality of the puppies each year now for several years past. Speaking of falling off, what has struck me more than anything in this line is the falling off in attendance. Compare the number of spectators at the last trials at High Point with those at the same trials of 1882. Then they had a crowd of sportsmen gathered together, all bent on having a good time and a friendly contest. Each had a dog entered and was anxious to have the best dog for field-shooting win. The last meeting I noticed was composed principally of handlers, judges and reporters.

Why is this? I think it is owing to several reasons.

First—Because the honor of winning is now secondary to the purse.

Second—Because all were then out with the idea that the dog whose work showed the quality of the superior field dog was the best dog. All were more or less practical shooters, and as such knew what qualities a first-class field dog should have. The trials were conducted on these lines, and every one understood and was interested. But now, let a practical man who has shot for years go to a trial and advance some of the ideas he has acquired by actual experience in the field, and he will be smiled on pityingly and told that his ideas will do for "plug shooting dogs," but not for "high class field trial dogs." He sees dogs hunt without regard to gun or whistle. He hears these dogs extolled to the skies for their pace and range. He sees them on game miss more opportunities to point than they take advantage of. He pictures in his own mind himself trying to shoot over one of these dogs in the small fields and brush where he and old Dash have put in so many pleasant days and had satisfactory bags, and he shakes his head as he thinks how impossible such a thing would be. Business calls him home by the next train and the field trials know him no more.

While it is necessary to keep the crowds at field trials where they will not interfere with the work of the dogs, yet field trials should be made as interesting as possible to all spectators who attend. The pleasure of a field trial are much increased by a large attendance of jovial spirits, and the entertaining chats that take place in the evenings after the day's work are full of pleasant recollections of the good old times that followed the trials in days gone by.

CROAKER.

PUPPYISM.

A puppy may look as wise as an old dog, but he don't always know as much.

## THE PEARL OF PEKIN PROTEST.

*Editor Forest and Stream:*

I notice a letter in your paper, June 30, from Mr. T. W. Bartels, asking for information respecting the decision arrived at by the executive committee of the American Coursing Club on the Pearl of Pekin protest. I thought Mr. Bartels understood the decision of the majority of the executive committee—Dr. Shaw and Mr. C. G. Page—for their decision appeared plain enough in the *American Field* of April 23, and the reason given why they had made this decision.

It appears that both Dr. Shaw, who is one of the executive committee, and Mr. Ira Brougher, the secretary of the club, made an affidavit that in their presence Mr. T. W. Bartels had agreed to an arrangement with Mr. Edmonds, the owner of Chicopee Lass, to settle the difficulty between them, so the majority of the executive committee under the circumstances considered it best to refer the protest back to the club.

As far as I am concerned in the case, as one of the executive committee, as Mr. Bartels thinks fit to quote remarks from a private letter, I may say that I made no secret of my decision, which was in favor of Pearl of Pekin, and I was simply guided in this decision by the coursing rule expressly laid down to meet such an emergency.

H. C. LOWE.

LAWRENCE, Kan.

### Death of a Noted Collie.

LAST week we had a visit from Mrs. Smyth, owner of the Swiss Mountain Kennels, and while she reported all well at her own place, we were very sorry to hear that Mr. Jarrett, owner of the Chestnut Hill Kennels, had sustained a severe loss in the death of his beautiful collie bitch Roslyn Dolly, which was worried by a mastiff boarding in the kennel. Though small, this bitch probably showed more intense collie quality than anything yet seen on our benches, but as a practical sheepdog she was rather too much on the bric-a-brac order. She was about two years old and had whelped only a week before her death a fine litter by Wellesbourne Charley, and these are living yet. Dolly was not shown extensively but in her short career she was most successful, beating among others the hitherto invincible Flurry II. Dolly was by Christopher out of Roslyn Torfrida. We hope that her last litter may console Mr. Jarrett for his heavy loss. Dolly had one litter previously by the English dog Gladdie, to whom she was sent during last summer.

## POINTS AND FLUSHES.

CHICAGO, Ill., July 9.—The World's Fair management is busily engaged in arranging the preparatory routine details. There is, however, nothing new which is interesting to dog owners.

The recognition of the Canadian Kennel Club Stud Book by the bench show managers was a move in the right direction, for it is fair to presume that their registration is at least quite as correct as that of the American Kennel Club Stud Book. Moreover, it is the recognized registration of a large and prosperous country, and is entitled to recognition for this reason alone.

In regard to the registrations in stud books, it would seem to be a necessity that all errors should be corrected in the interest of dog fanciers at large, and a duty which should be promptly performed by those having the publication in charge. Volume II. of the A. K. C. Stud Book contains a number of errors. In Irish setters there are several registered as Irish setters, the dam of which was a coal black native English setter of short pedigree. There are also erroneous pedigrees, as in the case of Gath and others. Some dogs, erroneously registered, are re-registered in later volumes, while other registrations remain as originally and erroneously published.

The re-registration of a dog for the purpose of correcting an error in the original registration, accomplishes the purpose only in part, when there is no reference in the original registration to the error or the later correction of it. A reader can not possibly know that a registration is erroneous or that it is correctly registered in a later volume if the fact is not stated in connection with the registration. For these important reasons earlier volumes of the Stud Book should undergo a thorough revision, and printed slips should be inserted in each one, correcting erroneous pedigrees or giving information in regard to where the correct pedigree can be found. I was conversing recently with a gentleman who is thoroughly posted in kennel matters, and he incidentally mentioned the small value of a registration of which the pedigree contained a few common proper names. For instance, John Smith's dog Bob might be registered as being by Dick out of Sal, she by Jack out of Moll: Dick, by Tom out of Nell, etc. Of what value is such a registration to a breeder ten years hence? The pedigree may be correct, but as a record it has little value. The information is too meagre and vague. Out of the multitude of dogs having such common names the question of identity is most puzzling. Whose Dick? Whose Sal? Whose Jack? Whose Nell? These are questions which now occur to any one having much to do with pedigrees and the stud book. To make a registration of practical value to those who purchase the stud book as well as those who register their dogs, full information should be required of owners who register as to the owner and breeder of each parent in a pedigree, excepting where parents can be referred to by number in the stud book, which reference would accomplish the same purpose. This information would be available in later years to identify every Jack, Tom, Nell, Dick, etc., beside reducing the opportunities of fraudulent entry, which such loose requirements as at present obtain can not guard against. If this were enforced it might entail more labor and expense; but as the publication of a correct and useful stud book is one of the chief ends of the A. K. C., the added labor and expense would be most profitably incurred. As there is a fairly good sum in the treasury, probably, if more extensive information were given, it could be done without any added expense to owners.

I was pleased to notice the election of Mr. E. Knight Sperry, of New Haven, Conn., to the secretaryship of the New England Field Trial Club, and I believe that the club acted wisely in selecting him for the responsible position. Mr. Sperry is an earnest, enthusiastic sportsman, thoroughly interested in the welfare of his club and the improvement of the dog, and firm in the faith that a successful trial can be held and established in New England, in all of which he is perfectly sound. So I am informed that the honor came to him unsought (in fact, without his knowledge till after his election); the mark of confidence and esteem of his fellow members must have been most gratifying to him, although the office, so far as any profit is concerned, is only in the satisfaction of knowing that a good work was done and a good cause helped along. There is no money in it. There is, however, hard work and some expense. I shall look forward to a most successful trial in New England this fall, as the result of Mr. Sperry's popularity, skilful work and support of his efforts.

The time for giving pointers and setters their yard training is now here. Amateurs should not overlook the fact that morning and evening, the coolest parts of the day, are the best. The lessons should be given with deliberation and kindness, as hurry or severity is certain to make the dog nervous, or else he becomes overheated. In either case he is not in the best state to receive his lessons. But little can be accomplished in attempting to teach in the warm parts of the day. The dogs become too heated to pay any attention to the tutor and suffer much discomfort. A good run after the lessons and kind treatment at all times will permanently gain the affections of the youngsters, and if properly encouraged they will not look upon the lessons as something to be avoided.

B. WATERS.

### Terrier Importations.

MR. SYMONDS, of Salem, Mass., and his henchman, George Thomas, not content with running an already crowded kennel, are, like that well-known charity boy, still crying for more. The steamship Tauric brings another batch of dogs in charge of Harry Pinder—four Scotch terriers and a Yorkshire. The latter is—well, a dandy—so says our informant, especially if his price is any criterion. It has been imported for Miss Rotch, of Bar Harbor, Me., but unfortunately will probably not be shown. The terriers from the "land o' cakes" are brothers and sisters of Scotch Hot, which was seen out at the shows this spring. They are Highland Roy, Scotch Cold and Gipsey Yet, by Gipsey King out of Kelvoir and running back to the best blood of the breed. Then there is the bitch Norwich Mouse by champion Alister out of Ashley Kate. It will be therefore seen that this kennel will make a strong bid for honors in this game breed. The fox-terrier Ebor Spendthrift and black and tan Beaconsfield won in the challenge classes of these respective breeds at the Sheffield, England, show the other day.

## NATIONAL BEAGLE CLUB MEETING.

THIS meeting was held at 266 Washington street, Boston, Mass., and was called to order at 7:55 P. M., President Chapman in the chair.

Vice-Presidents B. S. Turpin and W. S. Clark, O. W. Brooking, W. A. Power, J. T. Flannelly and H. V. Jamieson were present in person, and the following members of the club were present by proxy, viz.: Messrs. William H. Ashburner, John Davidson and Dr. N. Rowe were represented by Mr. F. W. Chapman; H. W. Lacy and E. L. Bryant were represented by Mr. H. V. Jamieson. The above gentlemen vested in said F. W. Chapman and H. V. Jamieson full power of attorney to represent and act for them on any matter that should come before the meeting for the welfare of the National Beagle Club. Messrs. H. L. Kreuder, C. S. Wixom, William Manard, William H. Child, Paul C. F. Hoffman and George W. Rogers were represented by Mr. F. W. Chapman, to vote on judges for coming field trials and bench show of the N. B. C., as per their written suggestions to the club.

Treasurer read report as follows:

| | |
|---|---|
| Total receipts | $114 68 |
| Total expenditures | 74 30 |
| Balance on hand | $41 38 |

Voted that report of treasurer be referred to executive committee.

The matter of the report of the executive committee having been brought forward, and the executive committee not having prepared a report, it was voted that the report of executive committee be laid over until next club meeting. Communications read. Moved by O. W. Brooking, and seconded by B. S. Turpin, "That selection of judges for the bench show and field trial of this club, for 1892, be left to the executive committee." Five affirmative, six negative. Vote doubted by B. S. Turpin. Ballot being taken resulted in the following: Messrs. Brooking, Turpin, Power, Clark and Flannelly in the affirmative; Messrs. Jamieson, Rowe, Davidson, Ashburner, Bryant and Lacy in negative. Motion lost.

Affirmative argument being that power of selection of judges lay wholly with the executive committee; that the club had no voice in the matter.

Negative argument being that a quorum of the club being present, they desired to act at once to expedite matters. Believing that power of selection of judges lay in the hands of the club when they so desire to exercise it, which desire had been manifested by their instructions to their representatives and their suggestions to the club.

Immediately after the above vote was announced, the meeting became a scene of such long continued disorder that it was evident that the members present would permit no further business to be transacted, and it was therefore voted to adjourn *sine die*.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—The circular issued to the C. K. C. executive has resulted in a vote almost unanimously in favor of Kingston alone being allowed to hold a show on the dates claimed by the dog show committee of that city. This means that if Montreal holds a show on same dates that it cannot be held under K. C. rules and wins will not count.

A meeting of the executive of the club was held Friday night, the following members being present: Williams, Kirk and Donovan (secretary). The meeting fully concurred in the full vote of the executive taken by mail in regard to the Kingston and Montreal claims for dates.

The club will issue a certificate for exhibits at the World's Fair show similar to that used by the A. K. C., but on a different colored paper. A dog to be entitled to such certificate must be eligible for registration in the C. K. C. S. B. under the regular rules, *i.e.*, three generations on both sides or have won two first prizes.

In the case of Mr. Bell's St. Bernard St. John the decision of the A. K. C. was upheld and the amended pedigree handed in by Mr. Bell (sent him by Mr. Jas. Watson) was referred to the stud book committee of the C. K. C. for its investigation and approval.

The letter that appeared in last week's "Flaps" from Mr. Geddes *re* Mr. W. H. Middleton's resignation from the Ottawa committee was read, and it was the unanimous opinion of the meeting that there was no evidence before it implicating Mr. Middleton in the act leading to Mr. Mercer's disqualification.

A committee consisting of Messrs. Williams, Mitchener and Stone was appointed to procure the certificates, cost not to exceed $100 for 1,000.

Fourteen new members were received. The secretary was instructed to procure the volumes of the E. K. C. S. B. for 1890 and 91 and to subscribe for 1892. Also to write the secretary of the A. K. C. to see what mutual adjustment of dates on both sides of the line could be arrived at.

I hear that Mr. J. F. Kirk, Toronto, is down to judge all classes at Winnipeg, Manitoba.

H. B. DONOVAN.

## A DAY AT SPRATTS' KENNELS.

LAST Thursday we took a pleasant jaunt to the above kennels. It was not a business trip, as the kennels have already been described in the FOREST AND STREAM. We wanted the outing and to hear Mr. John Brett, the manager, talk of Darkies and Tycoons, Royal IV., etc., slipping greyhounds, beagle hunting, pheasant rearing, puppy raising, and the hundred and one trials and pleasures of a head game-keeper's life in England, is a delight that only those fond of dogs and a country life can fully appreciate. The man is a veritable encyclopedia on sport, and as a fisherman he can catch or "kipper" a salmon with equal facility; the catching we had to take for granted as there are no salmon in Jersey, but of his salmon-curing abilities we had a practical test and we liked it. The kennels hardly interested us much, as they were chiefly filled with boarders, which, however they might delight their owners, are not calculated to inspire a fancier with any great enthusiasm, though they all looked well and the kennels were sweet and clean. Mr. Brett's own dogs interested us more. We saw Real English, one of that trio of clinking good English setters that resulted from the happy nick of Mr. Brett's Myrrha, that he brought with him from England, and Mr. Windholz's champion Rockingham. The other two of the trio are Rockaway, that Mr. Raper bought and took back to England with him, and Rockingham, Jr., that Mr. Windholz swears by.

Real English, unfortunately, after Pittsburgh show, in racing through the fields became overheated, and to cool off ran into a pond and took a chill which resulted in paralysis. His limbs were useless for some time, but now we are happy to say the dog can almost raise a gallop, and though he may never face the judge again, Mr. Brett thinks he can pull him through. Of course, Myrrha was mated again with Rockingham, and as if to clinch the good judgment displayed in this breeding, there are four puppies, nine weeks old, that are tumbling over each other on the lawn that would astonish some of our setter breeders. They are simply grand. Such heads, general make-up and activity we never saw in pups at that age; and that they are game is fully proved by their destructive work among Brett's pet game fowls, six of which they put *hors de combat* the other day without turning a hair. While lamenting the loss of the chickens, their owner consoles himself with the thought that they "have it in 'em." A St. Bernard pup, by Kingston Regent, that suckled with them, in fact Myrrha and the St. Bernard bitch shared their milk, is a picture of its sire and we hope will grow to be as good. With genuine English hospitality, Mr. and Mrs. Brett, the latter of whom is a sort of ready reference for Brett's defective memory, entertained their visitors, and what with looking at photographs of celebrities on the other side, both canine and human, dog chat and rolling the puppies over on the grass, time passed all too quickly.

## RETRIEVING AT FIELD TRIALS.

*Editor Forest and Stream:*

I differ with excellent judges as to abolishing retrieving at field trials. Mr. B. Waters in your issue of June 30 states, "Retrieving being an educational quality, is in the same category with dropping to shot, turning to whistle, staying at heel, dropping to order, etc., acts acquired by education." The field trial clubs justly recognize the educational qualities. The Southern Club puts a penalty of twenty-five points of demerit on the following educational qualities: Breaking shot, 5 to 10; breaking in, 3 to 5; chasing, 10. Why not dispense with these and other educational qualities and let the dog hunt *à la naturel*, it would save trainer's fees—quite a consideration—and time so often quoted by the advocates of abolishing retrieving. If the arguments used for abolishing retrieving hold good the same can be used with equal force in abolishing the other educational qualities. These educational qualities afford many useful requisites in a field dog, and demonstrate the ability of many dogs to train on when deprived of their own way of doing things and complying with some of the wishes of the shooter. The test of retrieving at field trials can be done as well as the testing of pointing, backing, ranging or any other quality of a field dog. It all takes time, and in the language of the Texan, "that is what we are here for." Instances can be mentioned for and against almost all essential qualities.

The question, is it of sufficient importance to be retained along with chasing, breasting shot, breaking in, barking, obedience and other educational qualities? I think it is. If these educational points are not retained there is very little of the natural dog I would want. If the natural qualities cannot be brought under control without injury, it is time we were finding the same out and breeding more for educational points. It is well known to many the peculiar characteristic many of the stud dogs of the day possess, and in their hereditary power of transmitting these characteristics lies their worth in breeding the dogs of the future. Some have speed and dash, others level-headedness; others bird sense; others retrieving. If you count out any good quality at the field trial, that quality will have little value to breeders and will finally be lost sight of. Retain as many good qualities as possible; have fewer stakes if time is such an essential feature to all, and run those well that are run, and do not eliminate so many good qualities simply on the plea—it takes time. P. H. BRYSON.

MEMPHIS, Tenn., July 7.

## MR. MIDDLETON AND THE C. K. C.

*Editor Forest and Stream:*

Mr. Geddes's letter shows that it is the committee of the Ottawa show who draw my partner, Mr. Middleton, into complicity with me in the Newcastle entry affair. A perusal of his letter as published by Mr. Donovan proves this clearly.

Mr. Middleton, I repeat, has nothing whatever to do with the matter, nor yet are the dogs composing the kennel implicated. My partner resigned simply because he did not desire to serve on the Ottawa committee. This he will state over his own signature if Mr. Donovan wishes it.

It seems hard that innocent persons should be dragged into this unpleasant business. F. H. F. MERCER.

NEW YORK.

## IS THE DOG TAX CONSTITUTIONAL?

*Editor Forest and Stream:*

Can any of your readers inform me as to whether the constitutionality of taxing dogs has ever been tested? I have an idea that a decision was rendered avoiding the dog tax on that ground either in New York or New Jersey, and that an appeal was taken, but the judge died without rendering an opinion. GRAY JOHN.

### Central Field Trial Club Derby Entry.

*Editor Forest and Stream:*

Through an oversight we find that the subjoined entry was omitted from our list of Derby entries. Will you kindly notice same?

BELLE OF KENTUCKY (Fairmount Kennels), English setter bitch. (Dad Wilson—Bohemian Girl).

C. H. ODELL, Secretary and Treasurer.

## ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitteed to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp-Fire Flickering Vote." Such popular vote will be quite distinct from the award by the committee.

# DOG CHAT.

### New England Field Trials.

THOSE who are interested in the field trials this fall will be pleased to note in our business columns the rapid advance made by the New England Field Trial Club in the matter of stake money to be run for at their second annual trials, to be held on Nov. 8 at Assonet, Mass. Last year the prizes were a percentage on the entrance money. This year, in the Derby Stake for setters and pointers whelped after Jan. 1, 1891, the prizes will be $200, $100 and $50. Ten dollars to nominate and ten to fill. Entries close Aug. 1. In the All-Aged Stake, entries for which close Nov. 1, the prizes will be the same, also the entry fees. The stakes are open to all, and with such well known judges as Messrs. N. Wallace, of Farmington, Conn., and "Wash" A. Coster, Saratoga Springs, N. Y., field trial men should have every confidence in entering their dogs. Any other information about the trials may be obtained from the Secretary, Mr. E. Knight Sperry, New Haven, Conn.

### Who Comes Here?

Fox-terrier men in England are very much interested in a publication of a mezzotint of the celebrated fox-terrier champion D'Orsay, who is considered so nearly perfect in form that he was also chosen to represent the breed in bronze by the German Fox-Terrier Society. This is the first time a dog has been illustrated in such an ambitious style. The mezzotint is said to be a faithful representation of Mr. Redmond's terrier from a painting by Miss Maud Earl, and engraved by Richard Josey. The size is 20x15in. There are 100 artist's proofs at $15.75 and the prints cost $5 25. F. Mansell & Co., Barnsbury, London, Eng., are the publishers. We know there are many of our fox-terriers men who are anxious to get a good picture of this dog and that is the reason we tell them about it, for as an artistic illustration of type it is valuable to all lovers of the breed. D'Orsay has beaten every terrier on the other side.

### Hamilton Kennel Club.

ALTHOUGH the Hamilton, Ont., people cannot hold a show this year they do not mean to let the grass grow under their feet, as it is probable that about the time of the Canadian shows the H. K. C. will hold another dog show with entries confined to Wentworth county. As the club ran rather behind on their expenses at their first show, they, on July 1, held an athletic festival with the idea of raising money to repay some of the guarantors who made good the losses on the show. We are pleased to hear that quite a comfortable sum was realized, and this week a tug of war will be held to decide the championship of Wentworth county. Mr. John Hackett, one of the executive committee of the H.K.C., is in New York city, and will stay for about a month.

### Brooklyn Dog Show.

THE dog show at Brooklyn in November, to be held by the National Greyhound Club, promises to be quite an elaborate affair, second only to the W. K. C. show. A premium list of over $2,500 will be issued, and it is expected that a large number of specials will be given. Mr. James Mortimer will superintend, and that alone is a good move. The entry of sporting dogs, that is pointers and setters, will probably be affected by the field trials, but other breeds should fully make up the deficiency. There is every reason to believe that a show in Brooklyn, well managed and advertised, would be a big success. The ground is new and it is about time that the dwellers in the City of Churches fell into line.

### Gladstone's Pet Dog.

MR. GLADSTONE, who at the present writing seems to stand a good chance of once more being Prime Minister of Great Britain, has a pet dog to whom he is much attached. It is a black Pomeranian that came from Schwalbach, Nassau, Germany, where some of the family were sojourning in 1888. Mr. Gladstone finds a new amusement that varies the monotony of chopping down giant oak trees in the passion that his dog Petz has for retrieving sticks, and the dog will lie outside the noted statesman's dressing room door in the early morning hours in the hope that he may be allowed to accompany him on his matutinal walk, when he knows he will have an opportunity to indulge in his favorite pastime.

### Cuffing Elcho at Kingston.

IN answer to Dr. Mills's "charitable proposition," Mr. Wade has nothing to say except that he will pay no attention to such "financial arguments." As to whether Dr. Mills did cuff Elcho's ears, Mr. Wade writes: "I was informed as to Dr. Mills's cuffing Elcho's ears at Kingston show by Messrs. —— and ——, gentlemen of undoubted veracity, with ample opportunities to know whereof they spoke; and another wires me to-day, 'Take Mills up for five hundred.' Do I understand Dr. Mills to explicitly deny any such act?"

### Celebrated Dachshunds.

SOME time ago we mentioned that Mr. Manice was importing some crack dachshund bitches, to be sent over after the English Kennel Club show. Jargonelle, the best one, arrived July 4, and the next day whelped five nice large pups (two dogs), by champion Pterodactyl. Jargonelle has a most beautiful head, and with Janet, Mr. Manice has a great brace for next year's shows. Jay and the other two bitches were to arrive last Monday.

### Mr. Mortimer Buys an Irish Water Spaniel.

IN company with Mr. Raper, Mr. Mortimer has been doing a good deal of show trotting. He attended the Belfast show June 29, then back to England at Burton-on-Trent, in Nottinghamshire, the next day, and to Ripon, in Yorkshire, July 1. At Burton-on-Trent the manager of the Hempstead Kennel claimed an Irish water spaniel, named Eileen Shaughran, that won first and second.

FROM present indications the coming dog show of the Industrial Exhibition Association to be held at Toronto, Canada, Sept. 12 to 15, will surpass anything ever held there. A by-law was passed last week by the ratepayers of the city of Toronto voting $150,000 for exhibition purposes, all of which will be expended this year. A new race course will be made and a new grand stand erected capable of seating 12,000 people, the dog show also receiving its share of the grant. Exhibitors from the United States are reminded that the dog show is run in connection and by the Exhibition Association, and that the exhibition is second to none in America, being attended by some 300,000 people every year. Those holding bench show tickets are entitled to all the privileges of the grounds without any extra expense. The premium lists are now in the hands of the printer and will be ready next week. All communications should be addressed to C. A. Stone, secretary and superintendent of bench show, 82 King street, East, Toronto.

One of those inquisitive little birds has just whispered us that one of the most prominent officials of the Duquesne Kennel Club will shortly join the ranks of the Benedicts. We wish him, and so will every dogman that knows him, every happiness. Paul Gladstone, we believe, is quite reconciled to the change.

We have received a very tastefully arranged catalogue

issued by the Seminole Kennels. There are several capital pictures of the noted dogs in the kennel. One of champion Roslyn Wilkes is especially good, and so is that of the Irish setter champion Tim. The kennel contains some of the best blood obtainable in the three breeds, Irish setters, collies and pugs, of which their owner makes a specialty.

It was a matter of great surprise to Mr. George Raper when he saw the large number of excellent Japanese spaniels that were brought before him at the late New York show. He remarked then that it was the finest collection he had ever seen. It is more than likely that Mrs. Eugene Clark, who stands *facile princeps* in this breed, will be able to materially strengthen her kennel, as her husband sailed recently from San Francisco, Cal., on a visit to Japan, and will bring home some of the best of the breed that he can secure.

Good Reason—She—"That odious Mrs. Newritch seems to think more of her dog than of her boy." He—"Oh, well, the dog has a pedigree."—*Life.*

Dr. Griffin, of Hamilton, Ont., who is well known as an ardent sportsman and also as vice-president of the Hamilton Kennel Club, sails this week for Europe, with the intention of buying some good bull-terriers.

We are pleased to note that Mr. E. Knight Sperry, of New Haven, Conn., has been elected secretary of the New England Field Trial Club. Mr. Sperry is in touch with field matters, and we have no doubt that he knows how best to serve the club by bringing it more prominently to the attention of the kennel press than has been the case so far. The New England Field Trial Club should not hide its light under a bushel.

We regret to announce the death of Mr. James P. Kerr, the proprietor of the *Breeder and Sportsman*. Mr. Kerr was well and favorably known on the Pacific slope, having been for many years connected with the San Francisco *Call*. Ten years since he started the paper which he owned at the time of his death. Mr. Kerr was born in Scotland in 1853, and died June 27, 1892, at Denver, Col., where he had gone to try and recover his health.

The recent cricket match between North and South of England has created a feeling among several of our dogmen that a similar game should be arranged over here. There are difficulties in the way of such a meeting; still, if a committee of three could be formed to undertake the preliminaries, we see no reason why some such reunion should not take place. We have a list now of about twenty-five well-known dogmen who would more than probably take part, and should be pleased to receive the names of those who would really care to join in and make a pleasant day of it. Mr. Harry Twyford can secure a field for operations, and no doubt a little gathering of this sort will add to the good feeling that should prevail among all members of the fancy.

Mr. J. E. Long, of St. Louis, Mo., who is well known to all collie men as a breeder, and a judge at Chicago shows, is probably by this time on his way to England, where he will purchase some collies for his kennel.

Mr. Rawdon Lee's crack English setter Richmond met with a painful accident in London recently, breaking one of the bones in a hind leg.

In commenting on the great number of English dog shows, Mr. Freeman Lloyd wonders where all the dogs come from that make them possible. He says there must be, roughly speaking, 10,000 show dogs in England at present.

An important case bearing on the sale of dogs from pounds and dog homes, such as the institution in London, has just been decided in England. It seems a young lady bought a dog from the Battersea Home for Lost Dogs, kept it for some time until it was recognized by its former owner and action brought for its recovery. The judge ruled that, despite the authority given the secretary of the Home by the Commissioner of Police to sell dogs after detaining them three days, he had no right to do so in law, and the dog was restored to its former owner, the young lady being allowed the price she paid for the dog.

They are asking in America, "Will beagles follow a drag?" Will a bear eat honey? Will a fowl bask in the sun—Will a frog go a-wooing—Will a fool follow his nose—Will a soldier follow a cook? Well, what do you think?—*Stock-Keeper (Eng.).*

If a thing is worth doing at all it is worth doing well is evidently the idea that prevails in Goshen, Ind. The other day a "mad dog" bit a number of animals. Twenty-seven dogs were exterminated during the afternoon owing to the difficulty in identifying the one affected.

The Horse—How are you getting along, old fellow?
The Dog—Oh, I have to work like a horse. How's things with you?
The Horse—I live a regular dog's life.—*Judge.*

Owing to the exertions of "Billy" Graham, who is so well and favorably known over here, the Irish terrier classes at Belfast show were filled with a record entry, no less than 168 entries facing the judge, and competition, especially in the open dog class, was so keen that many well-known winners were shut out of the money.

Arrangements have been made, according to the English *Field*, by the National Pointer and Setter Field Trial Committee, to hold a meeting over grouse during the forthcoming shooting season. It will take place August 23, on Mr. Heywood Lonsdale's place at Kingussie, Invernessshire, Scotland. Such a meeting has often been talked of but little or nothing has been done. It will be quite a change from the usual English style of trials in the spring, when necessarily no birds are shot over the dogs.

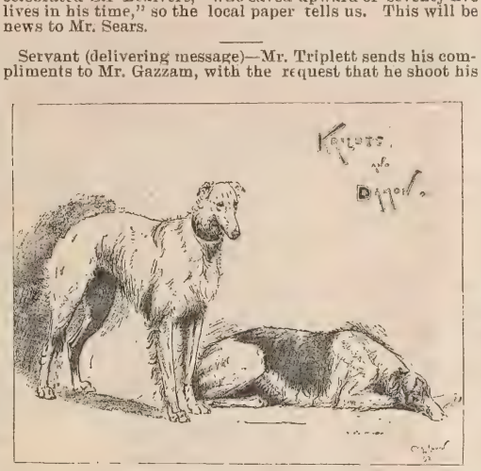
There was a sale at Aldridge's, London, the other day, and the pointers and setters belonging to that fine old sportsman, Mr. Thomas Statter, who died some time since, were sent to the block. Prices ruled small, Toil, a field trial winner, only bringing $70 and the lot $715. Mr. Lloyd Price's yearly draft brought good prices, Saule, a well-known field trial pointer, fetching $420.

One of the most useful small terriers we have heard of is one which helps an English electric light company to carry wires through the pipes laid underground. The terrier has been so trained that when a light cord is attached to him he runs through the conduit from one man-hole to the next, dragging the cord with him. After each performance he is treated to some favorite morsel, and he has thus come to consider his work a pleasure.

Among the new advertisements this week we notice that R. H. Alberts, Jr., offers a kennel of English setters for sale; R. O'Neill, English foxhound; H. G. Hallowell, litter of Irish setter pups; J. M. Fronefield, Jr., English setter pup; Samuel Abrams, two mastiff pups, C. D. Robers advertises portraits of his pointer Duke of Dexter; Ed Fisher wants dogs to break.

We have received from Mr. Stone a list of the railroads that carry dogs free to the Toronto show, but space will not permit of our publishing them this week. They will appear in the premium list.

J. Cumming Macdona, who is so well known in England as a thorough sportsman, and to American lovers of the St. Bernard as the pioneer breeder in England, has just been elected Member of Parliament for Rotherhithe, England.



A good joke was played on the two farmers who judged collies at Edinburgh, Scotland. A Mr. Tait, according to *Scottish Fancier*, led in his celebrated Young Elsinore (which was not entered), to see how they would treat a good collie. Result—first out; award nothing!

As only two members of the board of governors of the National Greyhound Club are in New York city at present, the meeting which was to have been held last Monday was postponed.

The regular quarterly meeting of the New England Field Trial Club will be held at 266 Washington street, Boston, Tuesday, July 12, at 2 P. M. A meeting of the board of governors will be held at the same time and place.

We should not think that the climate of Florida would suit St. Bernards, but F. L. Siegel, proprietor of the Plaza Hotel, Pensacola, has just purchased Prince Rupert, by champion Ben Lomond out of Bernie IV. Prince Rupert will have as a kennel mate Princess Lula, a daughter of the celebrated Sir Bedivere, "who saved upward of seventy-five lives in his time," so the local paper tells us. This will be news to Mr. Sears.

Servant (delivering message)—Mr. Triplett sends his compliments to Mr. Gazzam, with the request that he shoot his

PSOVOIS KRILUTT AND DAMON.
From the London "*Pictorial World.*"

dog, which is a nuisance in the neighborhood. Gazzam—Give Mr. Gazzam's compliments to Mr. Triplett, and ask him to kindly poison his daughter or burn up her piano.—*Harper's Bazar.*

## KENNEL NOTES.

**Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.**

BRED.

☞ **Prepared Blanks sent free on application.**

*Jill—Bambo.* Dr. Nichol's (Cookstown, Ont.) cocker spaniel bitch Jill (Doctor—Lucy) to his Bambo (Bob Obo—Maida), June 3.

*Mystic II.—Chubb.* E. H. Bragg's (North Sidney, Me.) beagle bitch Mystic II. (Ross—Spot) to his Chubb (imported Blue Boy—Mystic), May 14.

*Primrose—King Krueger.* Dr. Nichol's (Cookstown, Ont.) beagle bitch Primrose (Brittle—Pearl) to his King Krueger (Sport Bannerman—Virgie), June 14.

*Louie—Master Rich.* C. E. Rowland's (Toledo, O.) greyhound bitch Louie (Trales—Dick's Darling) to F. S. Anderson's champion Master Rich (Rich and Rare—Minnie), March 3.

*Hawthorne Belle—Master Rich.* W. E. Stevens's (Riverside, Ill.) greyhound bitch Hawthorne Belle (champion Double Shot—champion Clio) to F. S. Anderson's champion Master Rich (Rich and Rare—Minnie), March 5.

*Narka—Knight.* E. B. & O. W. Pfau's (Hartwell, O.) St. Bernard bitch Narka (Peter—Nanet) to F. S. Anderson's Knight (imported Tell—imported Mona), April 5.

*Bonnie Bondhu—Gath's Hope.* L. Rausch's (St. Louis, Mo.) English setter bitch Bonnie Bondhu (Count Wakefield—Pearl Bondhu) to Blue Ridge Kennels' Gath's Hope), April 6.

*Golden Rod—Inspiration.* Chas. Clippinger's (Lansing, Mich.) pointer bitch Golden Rod (champion Beaufort—Zuba) to J. H. Winslow's Inspiration (champion Bang Bang—Telie Doe), June 16.

*Lady Victoria—Eberhart's Cashier.* W. T. Garton's (Des Moines, Ia.) pug bitch Lady Victoria (Lord Clover— ——) to Eberhart Pug Kennels' Eberhart's Cashier (champion Kash—Lady Thora), June 25.

*Wee Wee—Bradford Ruby II.* Mrs. A. W. Cunningham's (New York city) pug bitch Wee Wee to Eberhart Pug Kennels' Bradford Ruby II., June 26.

*Princess Hepsey—King Regent.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Princess Hepsey to their King Regent.

*Lakme—King Regent.* Mrs. J. F. Hall's (Philadelphia, Pa.) St. Bernard bitch Lakme to Swiss Mountain Kennels' King Regent, Jan. 22.

*Ida P.—King Regent.* V. Petrola's (Washington, D. C.) St. Bernard bitch Ida P. to Swiss Mountain Kennels' King Regent, Feb. 17.

*Altonetta—King Regent.* F. E. Lamb's (Arlington, Md.) St. Bernard bitch Altonetta to Swiss Mountain Kennels' King Regent, April 2.

*Donna Silva—King Regent.* Chestnut Hill Kennels' (Chestnut Hill, Pa.) St. Bernard bitch Donna Silva to Swiss Mountain Kennels' King Regent, May 7.

*Florette—Scottish Leader.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Florette to their Scottish Leader, March 22.

*Dart—Scottish Leader.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Dart to their Scottish Leader, May 6.

*Bounce—Ben Ormonde.* H. B. Ward's (Moore's, Pa.) St. Bernard bitch Bounce to Swiss Mountain Kennels' Ben Ormonde, Jan. 23.

*Miss Waggles—Snowball.* Swiss Mountain Kennels' (Germantown, Pa.) cocker spaniel bitch Miss Waggles to their Snowball, May 14.

*Hornell Lady—Snowball.* Rev. L. Bradley's (Philadelphia, Pa.) cocker spaniel bitch Hornell Lady to Swiss Mountain Kennels' Snowball, Jan. 19.

*Brownie S.—Snowball.* Swiss Mountain Kennels' (Germantown, Pa.) cocker spaniel bitch Brownie S. to their Snowball, March 28.

*Bernie—King Regent.* W. S. Diffenderffer's (Baltimore, Md.) St. Bernard bitch Bernie (Sargano—Floss) to Swiss Mountain Kennels' King Regent, April 6.

*Nellie—Gus Gladstone.* Dr. Geo. Lewis's (Westport, Mass.) English setter bitch Nellie (Royal Albert—Nellie II.) to J. J. Scanlan's Gus Gladstone (champion Gladstone—Donna J.), June 16.

WHELPS.

☞ **Prepared Blanks sent free on application.**

*Louella,* J. J. Scanlan's (Fall River, Mass.) Irish setter bitch Louella (Elcc—Hazelnut II.), July 4, eight (three dogs), by his champion Inchiquin (champion Shandon II.—Iona).

*Lucy Gloster.* L. Gardner's (Mt. Vernon, N. Y.) English setter Lady Gloster (champion Gloster—Lady Gay Noble), June 10, ten (four dogs), by his Roger (Count Noble—Queen Meg).

*Dora Deane.* L. Gardner's (Mt. Vernon, N. Y.) English setter bitch Dora Deane (Count Paris—Nellie Cambridge), June 11, twelve (five dogs), by his Roger Count Noble—Queen Meg).

*Elsie H.* J. J. Scanlan's (Fall River, Mass.) Irish setter bitch Elsie H. (Elcho, Jr.—Maggie H.), June 27, eight (five dogs), by his champion Inchiquin (champion Shandon II.—Iona).

SALES.

☞ **Prepared Blanks sent free on application.**

*Lady Blanca.* Orange, white markings, St. Bernard bitch, whelped Nov. 29, 1886, by Kastelhorn out of Topsey, by Swiss Mountain Kennels, Germantown, Pa., to F. E. Lamb, Arlington, Md.

*Lady Castlereagh.* Orange, white markings, St. Bernard bitch, whelped Aug. 25, 1887, by Puritan out of Ravine, by Swiss Mountain Kennels, Germantown, Pa., to F. E. Lamb, Arlington, Md.

*Lad.* Red Irish setter dog, whelped Aug. 24, 1891, by champion Inchiquin out of Hazelnut II, by J. J. Scanlan, Fall River, Mass., to Dr. Linsey, same place.

*Don.* Red Irish setter dog, whelped April 19, 1891, by champion Inchiquin out of Jess, by J. J. Scanlan, Fall River, Mass., to Jas. Walker, same place.

*Kincarra.* Red Irish setter dog, whelped April 19, 1891, by champion Inchiquin out of Jess, by J. J. Scanlan, Fall River, Mass., to C. L. Whitman, Greenwich, Conn.

*King Regent—Dart whelps.* St. Bernard dogs, whelped Dec. 9, 1891, by Swiss Mountain Kennels, Germantown, Pa., one each to F. H. Jacobs, Hammonton, N. J., and J. P. Persch, Germantown, Pa.

*King Regent—Nancibel whelps.* St. Bernards, whelped April 11, 1892, by Swiss Mountain Kennels, Germantown, Pa., a dog to C. M. Bull, Brooklyn, N. Y., and a bitch Miss R. Simkins, Vineland, N. J.

*Brantford Red Jacket—Brownie S. whelp.* Cocker spaniel dog, whelped Oct. 9, 1891, by Swiss Mountain Kennels, Germantown, Pa., to F. W. Blaziel, Fitchburg, Mass.

*Tristan G.—Nancibel whelp.* St. Bernard dog, whelped May 28, 1891, by Swiss Mountain Kennels, Germantown, Pa., to G. S. Fox, Philadelphia, Pa.

*Inchiquin—Louella whelp.* Red Irish setter bitch, whelped Nov. 20, 1891, by J. J. Scanlan, Fall River, Mass., to Wm. Coons, Rhinebeck, N. Y.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.*

E. J. U., Hyde Park, N. Y.—You do not give the breed of dog.

H. H., Hyde Park, N. Y.—You do not give the breed of your dog. To register in the A. K. C. S. B., the only one now published, your dog must show an authentic pedigree for three generations back or the sire and dam be already registered. Registration in the A. K. R., which has been incorporated with the A. K. C. S. B., is not sufficient.

COMMODORE GERRY made a very unfortunate allusion in a recent interview when he spoke of respecting the last wishes of the late Mr. Schuyler, as such a remark naturally suggests an inquiry as to how the wishes of the other four original owners of the America Cup have been observed by those who have twice ventured to meddle with the original conditions, finally obliterating them entirely. It is a matter of history that the reception which Com. Stevens and his party met with on their arrival in British waters was neither chivalrous nor generous, the fame of the yacht had preceded her, and yacht owners declined to give her a race. This treatment was keenly felt by Com. Stevens, as his correspondence shows; but when, a few years later, he and the other four owners drew up the conditions under which they intended presenting the Cup to the club, they threw the competition open boldly to England and the whole world. No one can read the original deed without being impressed with the fair and sportsmanlike spirit which inspired it, and the absence of any vindictive or retaliatory feeling. The wishes of these five owners, so clearly expressed, have been utterly disregarded in the subsequent returns and reacceptances of the Cup; and yet the plea is made that a change which is imperatively demanded by all fair-minded yachtsmen must not be made because the last wishes of Mr. Schuyler must be respected.

THE report of a new challenge for the America Cup, based on a positive offer of a challenge in the event of the rescinding of the present deed of gift, has renewed a good purpose in provoking a discussion of the whole subject. The more American yachtsmen learn of the terms of the new deed and the manner in which the document was forced upon the New York Y. C., the better chance there is of a return to the true deed. The comments in the daily papers tell the story of the great change in public opinion. In 1887 but two American journals, FOREST AND STREAM and the New York *World*, dared to say that the New York Y. C. was wrong both in making a most arbitrary change in the conditions, and in requiring so much from the challenger; now the course of the club is boldly discussed by the leading daily papers.

At every fresh rumor of a change of the new deed the *Boston Herald* rushes to the defence of the New York Y. C. with the historic if somewhat time-worn remark of Mr. J. Malcolm Forbes, to the effect that it is not any well grounded objection to the new terms that prevents British yachtsmen from challenging, but the recollection of the "two miles of open water between Volunteer and Thistle." When a man has an opportunity to distinguish himself by a clever *bon mot*, it is asking altogether too much that he should deny himself out of regard for anything so trivial as the truth; and under the circumstances Mr. Forbes cannot be blamed for his remark. At the same time all American yachtsmen know that this reflection on the pluck and courage of their antagonists is most unjust and untruthful.

The last race for the Cup was finished at 4:30 P. M. on Oct. 1, off the Scotland Lightship, the entire fleet reaching New York about 6 P. M. Within two hours later a formal notice of another challenge was

handed to the secretary of the New York Y. C. So far from being deterred by the victory of Volunteer, the new challenge was penned by the members of the Royal Clyde Y. C. before the wake of the two yachts, including the "two miles of open water," had disappeared from the face of the ocean.

Immediately on the receipt of this challenge a call was sent out for a special meeting of the club, held three days later, at which all matters pertaining to the America Cup were taken out of the hands of the club and entrusted to a special committee, the result being the new deed of gift. The many changes that appear in that document were made in the face of a *bona fide* challenge from reputable yachtsmen, which challenge was of course withdrawn when the terms of the new deed were made public a month later.

---

On the eve of the sad cruise two years ago which was opened by the sudden death of Mr. Schuyler, the report was current that the meeting between him and the officers and leading members of the club on the flagship during the cruise would be the occasion of a discussion of the whole subject of the new deed, with a view to certain changes. Mr. Schuyler's sudden death on the evening he boarded the flagship of course disposed of the matter in an unexpected manner, but there is good reason to believe that if he had lived through the cruise the final and irrevocable terms of the new deed would have been materially altered, in accordance with what were understood to be his wishes. Throughout a long life Mr. Schuyler was noted as a particularly fair and liberal-minded sportsman, and his influence in behalf of fair play for a challenger is on record in connection with the early races for the Cup. In view of this lifelong record, it is difficult to believe that in his last years he could have indorsed something so completely contradictory of all the views of himself and his fellow-owners; or that he fully understood the terms of the document which was drawn up in his name by the lawyers of the committee.

---

WITHIN the past week a new form of water sport, already quite well known in England, has been introduced in New York, which, if it becomes general, will add considerably to the excitement of yachting. The only requisites are a large cannon of the most modern type and a stretch of open water frequented by yachts, fishing vessels and trading craft. In England the hulling and sinking of small craft by guns used in tests and artillery practice has become quite common, some lives having been sacrificed. On Saturday last, in testing a new 10in. gun at Sandy Hook, one of the three shots fired passed completely through the hull of a coasting schooner, sinking her so quickly that her crew had barely time to launch the yawlboat. The decks were thrown up and two great holes smashed in the stern and port side, the vessel being a total loss. The crew were picked up by a steam yacht. While this is the first serious accident, it is by no means the first instance of reckless firing about New York and the Sound by which the lives of yachtsmen and fishermen have been imperilled.

---

THE American Y. C. has met with undeservedly hard luck this year. On the day of the great steam yacht race the Sound was so rough that one of the yachts declined to start, while on the day of the annual sailing regatta there was not a breath of air all day. The obvious way in which to avoid such mishaps in the future is to set both the sailing and steaming events for the same day.

---

## Boston City Regatta, July 4.

BOSTON—BOSTON HARBOR.

THE annual regatta of the City of Boston, sailed off City Point on July 4, brought out an unusually small list of starters, owing to the bad weather, there being a heavy sea and a gale from N.W. Those that sailed the course had a hard time, and their skippers deserve much credit for making a race under such circumstances. The times were:

The judges were Thomas Christian, W. H. Godfrey, N. B. Stone and W. H. W. Cherrington.

---

## Quincy Y. C., July 4.

HOUGH'S NECK—BOSTON HARBOR.

THE Quincy Y. C. regatta of July 4 was sailed under the management of the Quincy Y. C., the wind being strong N. W. The full times were:

FIRST CLASS.

| | Elapsed. |
|---|---|
| Gipsy, H. R. Drinkwater | 1 27 45 |
| Moondyne, A. J. Shaw | 1 28 47 |
| White Fawn, A. E. Jones | 1 29 55 |
| Posy, R. G. Hunt | 1 32 09 |
| Adolph, Henry Moebs | 1 33 38 |

JIB AND MAINSAIL.

| | |
|---|---|
| Vanessa, A. Bigelow, Jr. | 1 23 00 |
| Exile, J. F. Small | 1 23 21 |

SECOND CLASS.

| | |
|---|---|
| Magpie, J. S. Otis | 1 21 40 |
| Opechee, W. P. Barker | 1 22 20 |
| Vision, George Crane | 1 22 44 |
| Niobe, A. F. Schenkelberger | 1 23 48 |
| Smoke, Rice Bros | 1 23 51 |
| Helen, R. J. Sawtell | 1 29 56 |

THIRD CLASS.

| | |
|---|---|
| Midget, H. M. Faxon | 1 19 55 |
| Scamp, H. W. Nute, Jr. | 1 20 16 |
| Imp, Geo. F. Maybury | 1 32 15 |
| Flora Lee, C. D. Lanning | 1 32 16 |
| Don, W. H. Shaw | 1 22 55 |
| Dandelion, Arthur Adams | 1 22 55 |
| Mab, John Shaw | 1 23 22 |
| Elsie, Gordon M. Keating | 1 29 16 |
| Sunbeam, Harold Faxon | 1 32 27 |

The winners were: First Class—Gipsy, first; Moondyne, second; White Fawn, third.

Jib and Mainsail—Vanessa, first; Exile, second.

Second Class—Magpie, first; Opechee, second; Vision, third.

Third Class—Midget, first; Scamp, second; Imp, third.

The judges were George E. Pfeffman and P. H. Gavin.

---

## Savin Hill Y. C. Open Regatta, June 30.

SAVIN HILL—BOSTON HARBOR.

THE annual open regatta of the Savin Hill Y. C. was sailed on June 30 in a strong blow from S.W., all the starters being close-reefed, and even then having more than enough wind. Only Exile and Alpha of the 21ft. class were present, and as the former was not willing to start with but one competitor, there was no race in the class. There were good races in the first, second, third and fourth classes, the winners being: Wapiti, Magpie, Don, subject to measurement, and Annie. The official times were:

FIRST CLASS.

| | Elapsed. | Corrected. |
|---|---|---|
| Wapiti, James Bertram | 2 00 17 | 1 24 30 |
| Ustane, S. N. Small | 2 05 10 | 1 27 23 |
| White Fawn, A. E. Jones | 2 08 00 | 1 34 08 |
| Fannie, E. P. Sharp | Withdrew. | |
| Good Luck, J. B. Farrel | Disabled. | |

SECOND CLASS.

| | | |
|---|---|---|
| Magpie, H. S. Otis | 1 16 33 | 47 10 |
| Arab, W. F. Scott | 1 25 22 | 56 05 |
| Trifle, J. F. Cashin | 1 29 26 | 58 59 |

THIRD CLASS.

| | | |
|---|---|---|
| Don, W. H. Shaw | 1 24 45 | |
| Agnes, James T. Bache | 1 24 22 | 53 19 |
| Wink, Frank Gray | 1 27 00 | 54 16 |

FOURTH CLASS.

| | | |
|---|---|---|
| Annie, E. H. Rich | 57 29 | 28 44 |
| Cutty Sark, M. M. Torrance | 57 15 | 29 32 |
| Princess, Samuel Ware | Withdrew. | |

The judges were A. A. Sallow, L. A. Horton and John S. Besarick.

---

## Riverside Y. C. Annual, July 9.

COS-COB, CONN.,—LONG ISLAND SOUND.

THE third annual regatta of the Riverside Y. C. was sailed on Saturday, but in such a light breeze that the race was anything but exciting. The larger classes had but few starters, the chief interest being in the open boat classes, Tattler beating Siren and Phyllis winning in her class. The times were:

SCHOONERS—80FT. CLASS.

| | Start. | Finish. | Elapsed. |
|---|---|---|---|
| Nirvana | 12 47 03 | 5 45 03 | 4 58 00 |

| Phyllis | 12 54 23 | 4 17 32 | 3 23 09 |

The winners were Peerless, Merope, Aura, Almira, Nahma, Tattler and Phyllis, the yachts in the other classes sailing over. The steamer Hazel Kirke carried a large party of guests over the course

---

## Corinthian Y. C., July 4.

MARBLEHEAD—MASSACHUSETTS BAY.

THE sixtieth regatta of the Corinthian Y. C. was sailed over club courses off Marblehead on July 4, the wind being very strong from N.W., all of the small number of starters being reefed down. In the third class the new Paine fin-keel Freak sailed her first race, but withdrew after picking up a lobster pot on her fin, a similar mishap befalling Reaper. The official times were:

THIRD CLASS.

| | Length. | Elapsed. |
|---|---|---|
| Reaper, Benson | 24.3 | 1 47 58 |
| Sirocco, Fowle | 26.6 | 1 52 41 |
| Korali, Robbins | | 1 58 50 |
| Freak, Paine | | Did not finish. |

SPECIAL CLASS A.

| | |

## Southern Y. C. Cruise.

THE fleet of the Southern Y. C started on their annual cruise on Saturday, July 2, at 5 o'clock. The yachts raced from the start to anchorage at Waveland on Mississippi Sound that night, making the 60 miles sailed with a fair southerly breeze within six hours and a half. The flagship Zoe, Com. Gordon at the stick, won on time allowance. The boats were at Waveland all day Sunday, and on Monday, July 4, sailed in a regatta given by the Waveland and Bay St. Louis (Miss.) Regatta Association.

The race was started with double the required 5 knot breeze (S.W.) at 12 M., and ended pell mell in a rain squall. The sloops Susie B. and Montauk carried away their topmasts and the open sloop Lady Luckett capsized. The sloops Annie M. (50ft.) and the Siren came all the way from Mobile, Ala., but would not enter the contest. The sloop Nepenthe had nothing to sail against. The cruise continues on to the outlying islands of the Gulf and will last the greater part of two weeks. The times of the race were:

SCHOONER CLASS.

| | Elapsed. | Corrected. |
|---|---|---|
| Viola | 2 24 58 | 2 16 00 |

## Detroit Y. C., June 20.

DETROIT, MICH.—DETROIT RIVER.

THE opening regatta of the Detroit Y. C., on June 20, was sailed in a fresh southerly breeze, with a heavy rainstorm at the end.

The course for the first, second, third, fourth and fifth classes was from a stakeboat anchored abreast of the Park House dock, around the Grosse Pointe Lightship and return, thirteen miles. For sixth and double-cat classes, around the Dummy Light and return, eleven miles.

The times were:

FIRST CLASS.

| Martha | 1 02 26 | 4 29 00 | 3 26 34 | 3 23 16 |

Corsair, Jr., capsized and North Cape withdrew to go to her aid.

The judges were W. K. Parcher, Capt. Joe Nicholson and Will Hammond. The time-keepers were Louis Hilsendegen, J. A. Minnewegen, C. F. Fraser and Will Hayes.

---

## New York Fishing Club.

RICHMOND VALLEY, S. I.—NEW YORK HARBOR.

ON July 4 the yachts of the New York Fishing Club sailed a race off the club station at Richmond Valley, S. I., the times being:

SECOND CLASS.

| | Start. | Finish. | Corrected. |
|---|---|---|---|
| Bijou, J. A. Hassmer | 10 21 06 | 11 32 37½ | 1 10 53½ |
| Florence, W. Lubeck | 10 21 04 | 11 32 37½ | 1 11 33½ |
| Dolphin, A. Stroh | 10 20 54 | Withdrew. | |

FIRST CLASS.

| | | | |
|---|---|---|---|
| Bessie, O. Frohwein | 2 32 04 | 3 49 25 | 1 16 06 |
| Falcon, E. Vom Hofe | 2 35 00 | 3 51 41 | 1 16 41 |
| Lillie, F. Fredericks | 2 33 35 | 3 54 14 | 1 19 24 |
| Acme, Hy Fisher | 2 31 50 | 3 55 07 | 1 22 02 |
| Salvator, W. Lubeck | 2 31 30 | 4 01 22 | 1 27 19 |
| Petrel, F. Peterman | 2 33 21 | Withdrew. | |

The official timekeepers were Messrs. John H. Loose and N. Engel, Jr.

---

## Beverly Y. C., July 4.

MONUMENT BEACH—BUZZARD'S BAY.

The 185th regatta, second sweepstakes, took place at Monument Beach on July 4. It had been blowing very hard from the west, but moderated before the boats started, the result being as a rule that they started with too many reefs, but soon shook them out.

As Hector is the only first class boat in the bay, there was no race in that class, and no fourth class boats appeared, it looks as if the new Herreshoff fin had frightened the whole class; but as she has not been delivered by the builders, and when delivered is likely to sail in third class, to say nothing of the fact that she will be an experiment in the water, the scare seems premature.

In second class Gynote again showed up well. She is vastly improved, but was not quite good enough for the old Mist with her overhanging stern. Torment was looked on by many as the winner, but broke down after being badly beaten.

In third class Doris had been pared down at both ends and got into the class, but does not seem quite up to Elna and Puzzle, who made a very good race.

Second class course 11¼ miles, third class 7½ miles, and rather fluky.

SECOND CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Mist, G. H. Lyman, B. Y. C. | 27.10 | 2 03 46 | 1 53 05 |
| Gynote, W. E. C. Eustis, B. Y. C. | 27.02 | 2 05 04 | 1 55 48 |
| Lestris (late Crawl), J. Crane, Jr., B. Y. C. | 26.04 | 2 17 17 | 1 05 28 |
| Torment, C. C. Hanley, Mon. Beach | 27.04 | 1 19 44 | 2 09 03 |

THIRD CLASS.

| | | | |
|---|---|---|---|
| Elna, John Parkinson, B. Y. C. | 22.04 | 1 37 05 | 1 26 16 |
| Puzzle, Wm. Amory, 2d, B. Y. C. | 22.09 | 1 37 52 | 1 26 58 |
| Doris, John Parkinson, B. Y. C. | 23.02 | 1 38 45 | 1 28 14 |
| Daisy, Howard Stockton, B. Y. C. | 21.01 | Withdrew. | |

Judges: N. H. Emmons, W. Lloyd Jeffries.

---

## Eastern Y. C. Special Race.

A SPECIAL race of the Eastern Y. C. for invited yachts which do not exceed 21ft. waterline measurement, or which do not exceed 25ft. racing measurement, will be sailed from Marblehead Rock on Thursday, July 28, 1892, at 10:45 A. M., unless unfavorable weather necessitates postponement. All matters connected herewith, not otherwise specified herein, will be governed by the racing rules of this club so far as they may apply.

Entries, which must inclose the certificate of measurement from the measurer of the club from which the yacht enters, must be delivered to the secretary of the club, Mr. William S. Eaton, Jr., 281 Franklin street, Boston, before 2 o'clock P. M. on Tuesday, July 26.

Each yacht must carry a number, which will be supplied by the regatta committee at the club house, upon each side of her mainsail, as near the center as possible.

Time allowances will be given at the rate of $^{6}/_{10}$ of a second per mile for each tenth of a foot racing measurement, taking the nearest tenth. Racing measurements will be reckoned according to the present rule common to the Corinthian Y. C., of Marblehead and the Beverly Y. C. The crew of any yacht shall not exceed five men. No spinakers, shifting ballast, or outriggers will be allowed. One life preserver must be carried on deck.

The prizes are: First prize, $50 and the medal of the club; second prize, $25, if five or more start; third prize, $15, if seven or more start. Regatta Committee, Wm. S. Eaton, Jr., Chairman; R. D. Sears, P. T. Jackson, Augustus N. Rantoul, Henry H. Buck, Secretary of Committee, 50 State street, Boston.

---

The Manayunk, Pa., Model Y. C. sailed a regatta on July 4 on the Schuylkill River.

## New York Y. R. A. Cruise.

The New York Y. R. A. made a decided change of programme this year in arranging the route for its annual cruise, Long Island Sound being abandoned as too far distant for a short cruise and the vicinity of the Lower Bay and the Highlands chosen instead. Although the waters are not so well adapted for yachting as the Sound, they answered the purpose of the cruise much better, and brought out a good fleet. The programme of the cruise was announced in the following:

General Order No. 1.—The annual cruise of the New York Yacht Racing Association shall start on July 4. Yachts shall rendezvous in Gravesend Bay off Bath Beach on Saturday afternoon, July 2, report to the fleet captain and remain at anchor over Sunday, and sail as follows:

Monday, July 4, to Keyport.
Tuesday, July 5, to Highlands.
Wednesday, July 6, to Red Bank.
Thursday, July 7, to Atlantic Highlands.
Friday, July 8, to Sewaren.

Saturday, July 9, to Brooklyn Y. C. and disband. This part of the programme will be decided upon by the owners of the yachts present at the rendezvous.

The start will take place at 10 A. M. each day. At 9:30 A. M. a gun will be fired to prepare to start, and all the yachts must remain at anchor until the starting gun is fired. The first yacht reaching the destination of the day will take her own time of arrival, anchor in some convenient place, hoist an ensign and take the time of arrival of all the other yachts, all of which must pass between this yacht and the nearest shore. The record of each day's run shall be delivered to the fleet captain immediately after the arrival of the last yacht.

In the event of a steam yacht accompanying the fleet the time of all arrivals shall be taken by the steam yacht.

Yachts desiring to leave the fleet must first obtain permission from the admiral. During the cruise the president of the association shall command the fleet and act as admiral of the fleet, and shall issue such orders as may be necessary. He shall also appoint a fleet captain, who shall see that his orders are executed.

The vice president of the association shall act as vice admiral during the cruise, and in the absence of the admiral shall command the fleet.

The admiral shall appoint a fleet surgeon, who shall attend to all sickness or accident to members while on the cruise.

The fleet shall be composed of a squadron from each club in the association, numbered according to date of organization, and each squadron will be commanded by a commodore of the club represented by the squadron, who shall receive all orders from the admiral and execute the same

All yachts shall carry the association flag at the masthead and its club flag at the peak, but yachts may display both flags at the masthead while at anchor.

The daily runs shall be subject to such changes as may be deemed proper by the admiral during the cruise.

Commodore B. F. Sutton, of the Brooklyn Y. C., will act as fleet captain during the cruise.

Prizes will be given to yachts making the best average runs in their respective classes during the cruise.

A. J. PRIME, President N. Y. Y. R. A.

The fleet assembled on Saturday in Gravesend Bay. Sunday being spent at anchor. On Monday at noon the yachts were under way for Keyport, arriving at 4 P. M. The above programme was carried out successfully, the fleet disbanding on Saturday.

## Royal Hamilton Y. C., Queen's Cup, July 1.

HAMILTON, ONT.—LAKE ONTARIO.

THE race this year for the Queen's Cup of the Royal Hamilton Y. C., won last year for the first time by Vreda, Com. Boswell, R. C. Y. C., was open only to yachts of the 30ft. class, and was sailed over a 20-mile triangular course off Hamilton on Dominion Day. The wind was west, quite light most of the time. Out of the fleet of fourteen starters the most interesting boats were the new Fife centerboard Vedette, sailed by Mr. Æmilius Jarvis, and Nancy, built from his own designs by Mr. Thos. Dalton for Mr. F. S. Malloch in 1889. Vedette is new and hardly tried yet, but Nancy showed her speed in the lake circuit in 1889, heading her class. Last year she was laid up, her owner sailing a new 35ft. Dalton boat, Dinah, but in view of the Queen's Cup being raced for by her class she has lately been launched and fitted out.

Vedette had the lead at the start, the first leg before a light breeze under spinakers, but Erma and Nancy soon passed her, the order at the first mark being Erma, Nancy, Echo, Maud, Vedette and Volante. On the second leg, reaching, Nancy headed higher than Erma, and passed her to windward near the mark, Maud pushing Nancy, the turn being timed:

| | | | |
|---|---|---|---|
| Nancy | 11 24 30 | Echo | 11 30 30 |
| Maud B | 11 26 30 | Vedette | 11 32 00 |
| Erma | 11 27 30 | Volante | 11 32 30 |
| Lotus | 11 28 00 | | |

The wind freshened for a short time on this leg, Vedette gaining, the times at the end of first round being:

| | | | |
|---|---|---|---|
| Nancy | 12 17 24 | Maud B | 12 24 15 |
| Vedette | 12 23 51 | Lotus | 12 26 09 |
| Echo | 12 24 33 | Volante | 12 34 43 |
| Erma | 12 19 05 | | |

After some changes in second and third places the race ended as follows:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Nancy | 10 | 2 50 21 | 4 50 21 | 4 49 21 |
| Maud B | 10 | 3 01 47 | 5 01 47 | 4 50 44 |
| Vedette | 10 | 2 54 26 | 4 54 26 | 4 54 26 |
| Erma | 10 | 2 56 05 | 4 56 05 | 4 55 54 |
| Echo | 10 | 2 56 56 | 4 56 56 | 4 56 24 |
| Lotus | 10 | 3 01 37 | 5 01 37 | 4 59 41 |
| Volante | 10 | 3 07 13 | 5 07 13 | 5 06 44 |

Clipper, Mona, Quickstep, Salona, Dolphin, Caruli and Illaway started, but were not timed.

Next year the cup will be sailed for at Kingston, open to the 40 and 35ft. classes. Nancy was sailed by Mr. J. H. Fearnside and the Nadia's crew.

## St. Lawrence Y. C., July 1.

MONTREAL—DORVAL—ST. LAWRENCE RIVER.

THE first race of the St. Lawrence Y. C., of Montreal, for the perpetual challenge cup presented recently by Sir Donald A. Smith for an annual race on each Dominion Day between yachts of Classes A, 29ft. and 24ft., was sailed on July 1 over the club course from the station at Dorval. The entries were:

| | L.W.L. | Beam. | Length. |
|---|---|---|---|
| Eagle | 36.03 | 10 | 36.02 |
| Viking | 30 | 12 | 35 |
| Dream | 28.09½ | 11.6 | 32 52 |
| White Squall | 27.01 | 11 | 31.01 |
| Coquette | 25 | 10 | 29 06 |
| Chaperon | 25.10 | 10 | 29 04 |
| Frolic | 23.07½ | 10.6 | 28.45 |
| Molly Bawn | 20 | 8 | 25.02 |
| Valda | 21.09 | 8 | 24.01 |
| Ellida | 19.10 | 7 | 21.01 |

Valda, sailed by her owner, Mr. G. Herrick Duggan, won; the times being:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Valda | 10 10 45 | 12 19 24 | 2 08 40 | 2 00 03 |
| Viking | 10 13 10 | 12 13 45 | 2 00 35 | 2 00 35 |
| Chaperon | 10 12 25 | 12 49 30 | 2 36 55 | 3 32 15 |
| Molly Bawn | 10 11 20 | 1 04 30 | 2 53 10 | 2 46 06 |
| Eagle | 10 15 00 | Withdrew. | | |
| Coquette | 10 11 26 | Withdrew. | | |
| Frolic | 10 26 30 | 12 52 40 | 2 26 10 | Not timed. |

Eagle ran aground at the Chateauquay Buoy. This race was sailed in the morning, one of the regular series races being sailed in the afternoon, Valda again winning.

## Monatiquot Y. C., July 9.

WEYMOUTH, MASS.—BOSTON HARBOR.

THE club race of the Monatiquot Y. C. was sailed on Saturday over the club courses, the wind being fresh S.W. The times were:

FIRST CLASS.

| | Elapsed. | | Elapsed. |
|---|---|---|---|
| White Fawn, A. E. Jones | 1 58 22 | Moondyne, A. J. Shaw | 2 15 49 |
| Posy, R. G. Hunt | 2 02 59 | Gipsy, M. F. Drinkwater | 2 18 41 |

SECOND CLASS.

| | | | |
|---|---|---|---|
| Opechee, W. P. Barker | 1 50 10 | Mab, John Shaw | 1 59 50 |
| Primrose, H. M. Faxon | 1 50 42 | Dandelion, Arthur Adams | 2 07 36 |
| Imp, W. F. Haybury | 1 52 05 | Asp, E. S. Hunt | 2 08 50 |
| Diadem, L. A. Hayward | 1 52 16 | Don, W. H. Shaw | 2 10 06 |
| Helen, R. W. Sawtell | 1 53 03 | Lora, D. E. Whelan | 2 13 56 |

Asp broke the jaws of her gaff on second leg. Com. Cavanagh's new yacht was disabled while leading the first class. The sailing lengths of the yachts are not yet known. White Fawn probably takes first prize in first class, with Posy second and Moondyne third. Primrose wins first in second class, Imp or Opechee second.

The judges were Henry Gardner, C. G. Sheppard, F. W. Cowing, Dana Smith and L. W. Morrison.

## Riverton Y. C., June 30.

RIVERTON—DELAWARE RIVER.

THE yachts of the Riverton, Philadelphia and Corinthian yacht clubs sailed a joint regatta on June 30, on the Delaware River, the course being 10 miles and the wind fresh from S. W. The times were:

SCHOONERS.

| | Elapsed. |
|---|---|
| Lydia, O. D. Wilkinson, C. Y. C. | 1 51 55 |

FIRST CLASS SLOOPS.

| | |
|---|---|
| Narounya, R. P. White, C. Y. C. | 1 38 43 |
| Schemer, F. S. Brown, P. Y. C. | 1 42 47 |

SECOND CLASS SLOOPS.

| | |
|---|---|
| Narina, W. B. Henry, C. Y. C. | 1 19 51 |
| Majorie, J. P. Edward, R. Y. C. | 2 22 30 |
| Mermaid, R. E. Tucker, C. Y. C. | 2 23 11 |
| J. S. M., M. R. Muckle, Jr., P. Y. C. | withdrew |

CLASS A—OPEN YACHTS.

| | |
|---|---|
| Coronet, H. Yale Dolan, R. Y. C. | 1 54 35 |
| Mohican, C. B. Kugler, P. Y. C. | 1 56 18 |
| Olga, A. W. Hansell, R. Y. C. | 1 58 38 |
| Spray, L. C. Cook, R. Y. A. | 2 12 40 |
| G. de B. Keim, G. de B. Keim, R. Y. C. | capsized |
| Nettie, C. M. Riddle, R. Y. C. | disabled |

CLASS B—OPEN BOATS.

| | |
|---|---|
| Keystone, Geo. T. Gwilliam, P. Y. C. | 2 24 20 |
| Bonnie Jean, W. S. Grant, Jr., P. Y. C. | disqualified |

NAPHTHA LAUNCHES.

| | |
|---|---|
| Camera, F. G. Stuart, R. Y. C. | 1 09 35 |
| Tillie, G. W. B. Roberts, R. Y. C. | 1 10 08 |
| Amerique, C. A. Wright, R. Y. C. | 1 11 37 |

## Volunteer Sailing Club, July 4.

NEW HAVEN, CONN.—NEW HAVEN HARBOR.

THE Volunteer Sailing Club, of New Haven, sailed its first annual regatta on July 4, over a four-mile course. The race was started at 4:40 P. M. in a light northwesterly wind. The times were:

| | L.W.L. | Start. | Finish. | Elapsed. |
|---|---|---|---|---|
| Veto, Com. Conklin | 17.05 | 4 42 30 | 6 06 00 | 1 23 30 |
| Norma, Capt. J. Jooss | 15.06 | 4 42 39 | 6 06 20 | 1 23 50 |
| Lottie, Geo. Vernholt | 14.11 | 4 43 00 | 6 08 00 | 1 25 00 |
| Lassie, J. Johnson | 15.01 | 4 43 00 | 6 21 20 | 1 38 20 |
| Belle, L. M. Cooney | 13.05 | 4 42 00 | 6 55 00 | 2 13 00 |

Veto, Norma and Lottie sailed a very close race, Norma winning by corrected time. Another race will be sailed on Sept. 5, the three boats making the best records in two races to be awarded first, second and third prizes respectively. Race committee, Webster R. Mathis, chairman; F. F. Upson, J. H. Jooss. Capt. George Damon judge. J. W. E. Johnson, Sec'y.

## American Model Y. C., July 4.

THE second regatta of the above club was somewhat a disappointment, due to the action of the owners of the first class yachts, who refused to start in the face of a northwest wind. True it was very unsteady, a large bill on the northwest shore splitting it up and causing it to come in spiteful puffs; but even so it would have been a very pretty race, with a quartering wind on the first half and a close haul on the last half of the ¼ mile course. Five yachts showed up at the starting line, and finally fearing the hard work before them concluded not to sail over the course. The second and third class yachts showed their mettle by starting, only two yachts finishing in their respective classes out of four starters over the regular triangular mile course. The times were:

SECOND CLASS.

| | Start. | Elapsed. | Corrected. |
|---|---|---|---|
| Marjorie | 11 26 00 | 38 17 | 37 02 |
| Maria Shoofly | 11 25 30 | 35 42 | 35 42 |

THIRD CLASS.

| | | | |
|---|---|---|---|
| Jennetta | 1 11 15 | 36 08 | 36 08 |
| Mischief | 1 10 50 | 37 15 | 35 01 |

Maria Shoofly won in the second class by 1m. 20s., while Mischief won in third class by 1m. 7s.

## YACHT NEWS NOTES.

THE White Bear Y. C., of White Bear Lake, near St. Paul, Minn., has arranged for a series of four boat races. The conditions are that the yachts must be owned and run by club members, and entries must be made to J. H. Ramaley, secretary. One race was sailed on July 4, the other dates being: July 9, club trophy, now held by Fortuna; July 23, club trophy, catboat cup; Aug. 13, club trophy.

The race of July 3 of the White Bear Y. A. was sailed in a heavy blow from the east, the times being:

SLOOPS.

| | Elapsed. |
|---|---|
| Wapsie, Charlie Bigelow | 1 49 40 |
| Kitten, Sam Stickney | 1 46 05 |
| Hornet, Paul Gotzian | 1 49 30 |
| Shark, Jim Elmer | 1 44 42 |
| Manitou, Gene Ramaley | 1 52 00 |
| Fortuna, Doc Welch | 1 43 18 |
| Victorine, Dick O'Brien | W. |

CATS.

| | |
|---|---|
| Nushka, Lucius Ordway | 1 46 01 |
| Kelpie, Oscar Taylor | 2 00 42 |
| Mischief, L. Bement | 2 03 00 |

Fortuna was disqualified for fouling a mark. Shark wins, with Hornet second. Nushka wins in her class.

On July 2 the sloop Vashti sailed from Hull on a cruise, having on board Com. Herbert O. Stetson, Hull Cor. Y. C., Messrs. Russell Field and Henry Wilson, and her regular crew. At 4 A. M. next day she was off Monhegan, the weather being foggy, with a heavy sea and very high wind. The yacht was under two-reefed mainsail and storm jib, and when about 6 A. M. she was found to be nearing the breakers an attempt was made to tack her. After the failure of three attempts, she was anchored close inshore, her two cables holding from 8 A. M. until 4 P. M., when she parted both and went on the rocks on Whitehead Island, near Rockland, Me. All hands reached the shore safely, but the port side of the yacht was entirely stove in and her dinghy was wrecked. The party were cared for by Capt. Freeman Shea, of the Life-Saving Station. The yacht was floated by Capt. Snow, of Rockland, Me., and towed to that place by a tug brought from Boston by Mr. Stetson's father, Com. John A. Stetson. The yacht will be repaired at Rockland.

The following additional notice has been sent out by the Beverly Y. C. to govern its regatta of July 29: "The club rule requiring boats to be sailed by a member will be waived for this race. Special class and third class sloops may carry five men. If no 25-raters start special class will be abandoned, and prizes in third class sloops will be increased to first, $50; second, $20; third $15; fourth $10; fourth prize to be given only if eight boats start. Beverly Y. C. rule of measurement is the same as that of Hull and Massachusetts clubs, and, except as regards spinnakers, the same as that of Larchmont and Seawanhaka clubs. Additional course—If two No. 7's or No. 8's are shown, third class and special class will sail same course as fourth class. The regatta will be open to yachts not over 30ft.

On July 9 at 10:30 A. M. the fleet of the Eastern Y. C. started on its annual cruise to the eastward, the following yachts making up the fleet: Schooners—Mayflower, flagship, Vice Com. W. A. Gardner; Gitana, W. F. Weld; Constellation, Bayard Thayer; Fortuna, H. S. Hovey; Marguerite, R. S. Palmer; Œnone, G. W. Weld; Triton, C. R. Holman. Sloops—Wayward, David Sears; Bayadere, T. W. Merrill; Barbara, C. H. W. Foster; Thelma, F. B. McQuesten; Baboon, Geo. A. Goddard; Elf, Henry Howard; Gossoon, Chas. A. Morse; Harpoon, Adams Bros.; Polly, str., C. S. Eaton. Harpoon sailed from Boston to join the fleet and will return to Lawley's after the cruise to ship her heavy board.

On July 4 a regatta was held at Onset, Mass., the times being:

SECOND CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Adelaide, F. Sherman, East Wareham | 24.00 | 1 58 04 | 1 21 33 |
| Mary, H. Blout, Chatham | 24.00 | 2 11 36 | 1 35 15 |

THIRD CLASS.

| | | | |
|---|---|---|---|

The report has reached London from Australia that the steam yacht Sunbeam recently sunk in Admiralty Gulf, North Kimberly District, Australia. No particulars are given save that the disaster was caused by corrosion of floors. The yacht is of composite construction, built in 1874 and has been made famous by Lady Brassey's voyages and books.

The large sharpie Bristol, owned by Mr. Edward Ingraham, of Bristol, Conn., is a typical Florida cruiser, being built for the Indian River and similar waters. She is 77ft. over all, 73ft. l.w.l., 24ft. beam, 6in. draft forward and 27in. aft. She was built by J. McFadden of Melbourne, on the Indian River, in 1891, and cruised all last winter on the Halifax and Indian Rivers and Lake Worth. She is schooner-rigged and has a large cabin house elegantly furnished, offering accommodations for a large party. The yacht can make about 8 miles per hour and carries a crew of five. The large cockpit aft gives space outdoors, a great convenience in warm weather.

The American Y. C. held a race for naphtha launches on July 4, over an 8 mile course off Milton Point. There were 8 starters, Louise, G. C. Smith, winning by 4m. 6s., with Sweetheart, H. C. Schriever, second. On the morning of July 6, the date of the annual sailing regatta, there were present the yachts Iroquois, Peerless, Viator, Azalea, Wasp, El Chico, Fyxie, Chippewa, Sasqua, Oconee, Phyllis, Willada, Aura and Merula, with the regatta committee. There was hardly a draft of air on the Sound, and the regatta was finally postponed indefinitely.

On the night of June 30 the Sound steamer Maine and the steam yacht Nourmahal, now under charter from the Astor estate by Mr. J. M. Waterbury, were in collision off Bartlett's Reef Lightship, in Long Island Sound. The Maine struck a glancing blow on the starboard quarter of the yacht, damaging the rail and plating somewhat. The collision in some way stopped the dynamo on the yacht, and all the lights went out at once, causing some alarm on board. Mr. Waterbury and a party were on their way to the Yale-Harvard race at New London. The responsibility for the collision has not yet been determined.

The Massachusetts Y. C will sail its 146th race July 15 on Dorchester Bay, the classes being as follows: Special—Jib-mainsail boats measuring 21ft. waterline and under. Prizes $15 and $10. Sixth class—Catboats measuring 18ft. and less than 21ft. waterline. Prizes $10 and $5. Seventh class—Catboats measuring less than 18ft. Prizes $10 and $5. Fifty per cent. of the prize money will be awarded to any boat sailing over the course and having no competitor, and no second prize will be awarded in any class unless three or more start. The race will start at 2:30.

Mr. J. R. White, of Rochester, N. Y., present owner of the centerboard sloop Onward, has sent the following challenge to George N. Leavens, of Belleville, secretary of the Bay of Quinte Y. C.: "I hereby challenge the yacht Norah to a race for the Fisher cup, now held by her, and desire that the race be held on the 15th or 16th of July, 1892, if the owner of the Norah will waive Rule 3 of the conditions of challenge as to the twenty-five day clause, and if not I would name as the time July 30, 1892, unless another date can be agreed upon."

On June 28 a catboat belonging to Chas. H. Pratt, of Glen Cove, L. I., was found adrift and full of water, her boom broken and sail in the water. It was learned later that she was stolen from her moorings by two men, of whom no trace has been found except two satchels left in her cabin. It is not known whether the men escaped from her in safety or were drowned in the squall which swamped the yacht. Her watertight compartments kept her afloat after filling.

The annual regatta of the Carolina Y. C., of Wilmington, N. C., was sailed on July 4, the finish being timed:

| | | | |
|---|---|---|---|
| Idler | 1 41 56 | Mamie B. | 1 55 48 |
| Peggotty | 1 43 58 | Comet | 1 59 44 |
| Little Alice | 1 53 10 | | |

The club having abolished the three classes of boats and put them all in one class, Idler was declared the winner.

The Baltimore Y. C. fleet, including the following yachts: E. L. Bartlett's Comfort, Capt. Dorry; Ella, steam yacht, Capt. J. D. Mallory; Ibis, schooner, Capt. S. C. Townsend; Leona, Capt. James A. Smyser; Lagonda, Capt. George W. Coale; and Gaetina, Capt. F. W. McAllister, has been on a cruise on the Potomac River. The steam yacht Ella struck a wreck when near Solomon's Island, and was beached for repairs.

The new Gardner schooner Alcese is now in commission, and has been at Boston, New London and New York, her appearance being generally admired. The Gloriana bow is not a thing of beauty in itself, but the model is a very handsome one above and below water. The trip from Bos on to New York proved that the yacht was oversparred, and she was taken immediately to Tebo's, where both masts were lifted out and shortened 3ft. 6in. on the heel.

The Marguerite Y. C., of Menasha, Wis., elected the following officers on June 25: Com., F. D. Lake; Vice Com., S. H. Vaughn; Fleet Captain, W. H. Miner; Sec'y, Harry DeWolf; Treas., Geo. U. z. Several new members were elected. It was decided to accept Com. Felker's invitation to join the Oshkosh and Fond du Lac yachts in the annual regatta to be held at Oshkosh, July 16, for the cup.

The "Yachting Guide," issued each year by Andrew Thompson, London, is a compact and convenient little volume of information for yachtsman, containing a great deal of useful matter, though much of it is of course adapted to British rather than American yachting. The rules and allowances of the Yacht Racing Association are given in full, also the rules of the Yacht's Boat Sailing Association.

On July 4 the Lincoln Park Y. C., of Lincoln Park, near Chicago, sailed a race on Lake Michigan with the following starters. Period winning with Alice second: Period, Charles Monsall; Alice, C. O. Andrews and D. D. Dutton; Louise, G. Poole; American Girl, Bergman Brothers and Wood; Dragon, Lovedale Brothers and Ford; Buano, W. Todd.

The latest addition to the small classes in Boston is a 24ft. racing skiff from the St. Lawrence River, imported by Mr. J. S. Poyen. She is 3ft. 4in. beam and of canoe model. If she is well sailed her performance against the fins and splashers will be very interesting. She probably carries 450sq.ft. of sail, the others carrying from 700 to 900.

On July 10 at 10 A. M., while Mineola, Mr. August Belmont, was lying off the Corinthian station at Tompkinsville, S. I., her gasoline stove exploded, injuring the deck and interior considerably. The steward, John P. Smith, was badly burned and jumped overboard, being picked up by Capt. Neilson, the club janitor.

The first race of the Provincetown Y. C. was sailed on July 4 over a 10-mile triangular course in a light breeze. The winners were: First class, sloop Hersey D. Taylor, 2h. 8m. 41s.; second class, sloop Etta, 2h. 30m. 30s.; third class, cat Duster, 1h. 33m. 21s.; fourth class, sloop R. R. Kelly, 1h. 51m. 33s.

On July 1 a yacht club under the name of the Lake Geneva Y. C. was organized at Geneva, Ill., with the following officers: Com., N. K. Fairbank; Vice-Com., C. Leß. Withrow; Rear-Com., H. W. Marsh; Sec'y and Treas., W. S. McCrea. Directors: Julian M. Rumsey, George S. Isham and J. Leiter.

The new fin-keel for Mr. Howard Stockton, for racing on Buzzard's Bay, has been named Fin. She is 17ft. lwl. The Herreshoffs have just sent away a centerboard 30-footer similar to Alpha, to be raced about New York. The machinery of the 130ft. steamer is in place and the cabin work is well advanced.

The fifth championship regatta of the Minnetonka Y. C., of Lake Minnetonka, Minn., was sailed on July 2 over a 10 mile course, the wind being light from the north. The winners in the various classes were White Wing, Bird, Idler and Ida. Bird is a Herreshoff boat.

Fyxie, Mr. Oswald Sanderson, is now at Woods's yard preparing for a cruise to Boston, where she will sail in the regular events of the Eastern, Beverly and Corinthian clubs, and also in special matches with Reaper and Vanessa, the two 21ft. fin-keels.

The St. Lawrence Y. C. of Montreal has issued a very neat year book, a chart of the club's racing courses being given for the first time. The club now numbers 340 members and a fleet of 51 sailing yachts and boats and 34 steamers.

On July 4 Luther C. Ward, formerly of the firm of Ward & Stanton, yacht builders, of Newburgh, N. Y., died at the age of 69. The firm built the steam yachts Radha and Polynia, and also the Shaugraun, afterward Henrietta.

Com. C. M. Connolly, of the Corinthian Navy, has bought the cutter Pelican of Hugh Boyd, of the Atlantic Y. C. The Pelican will be put in commission before Aug. 1 at Port Jefferson.

The fast run of the Yankee Doodle on July 4 was followed by the inevitable breakdown two days later, the steam pipe breaking and carrying away the smokestack. Vamoose is out again after her accidents.

On July 4 a catboat capsized on Ulster Park Lake, drowning Mrs. Kellert, of New York, and Herbert Slater, who was in charge of the boat.

Brunhilde, schr., J. J. Phelps, which has been under charter to the Bahamas' Lighthouse Service for a year, sailed for New York on July 5, her charter having expired.

On the night of July 6 a fire broke out on the steam yacht Thyra, Com. Lawrence, American Y. C., but was extinguished by the crew, the damage being about $200.

Alpha has been hauled out at Hull for painting and to replace her centerboard, which she lost in the latter part of the Boston City regatta of July 4. She will be ready for Friday's race.

On July 9 the fleet of the Winthrop Y. C. sailed on the annual cruise for Camden, Me. The yachts were Nimbus, Widgeon, Eva, Clara, Hattie, Signet, Naiad, Alda, Marion, Eclipse.

The open regatta of the Staten Island Y. C. on July 9 was sailed in a very light air, only two yachts finishing out of a fleet of six. Mamie S. won by 57s.

The annual cruise of the Corinthian Y. C. of Philadelphia will be through Long Island Sound, the fleet assembling at Larchmont on July 6.

Duplex, naphtha yawl, Dr. C. M. Wilson, dragged ashore on July 3 in the squall and sustained some damage to her bottom.

The Citizens' Yachting Association, a new organization, of Detroit, Mich., has just taken possession of a new club house.

The yachts of the New Bedford Y. C., Pointer, Nadir, Iris, Saracen, Wanda and Tahena sailed on July 2 on a cruise.

Vice-Com. Morgan's new steam yacht Ituna was spoken off Cape Race on July 7, and arrived at New York on Tuesday last.

The Herreshoff 2½-rater Wenonah has made a fine showing in the Clyde regattas, winning every race of last week.

The Jamaica Bay Y. C. sailed a race on July 4, the winners being Bennie, Gil Blas Anna and Indian.

Tillie, steam yacht, has been chartered by W. H. Starbuck to H. McK. Twombly, of New York.

Meteor, late Thistle, has had her channels removed and her spars considerably lightened.

The South Boston Y. C. will start on July 16 on its annual cruise for Boothbay, Me.

Adrienne, schr., sailed from Boston for New Orleans on July 7.

The annual regatta of the Fall River Y. C. was sailed on July 4.

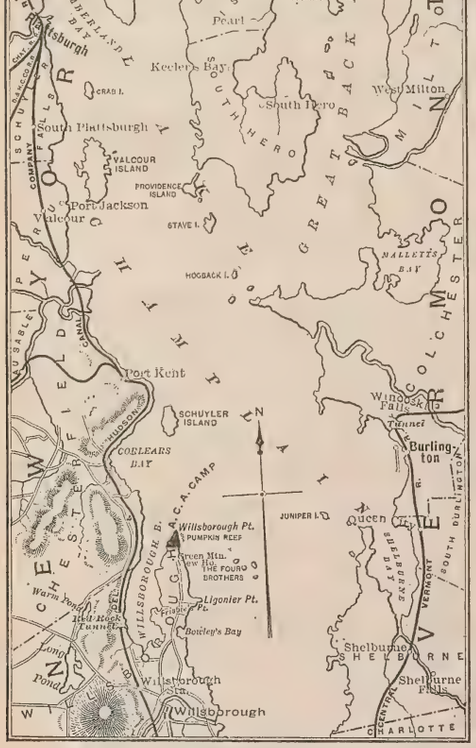
## FIXTURES.

JULY.

9-23. W. C. A. Meet, Oshkosh, Wis.
15-30. Northern Div. A. C. A. Meet, Lake Couchiching, Can
23. Rochester, 3d Trophy Race, Irondequoit Bay.

AUGUST.

4-25. A.C.A. Meet, Willsborough Pt
6. Springfield, Cup, Springfield.
15-20. A. C. A. Meet, race week, Willsborough Point.
27. Rochester, 4th Trophy Race, Irondequoit Bay.



SEPTEMBER.

3. Springfield, Cup, Springfield.
3. Brooklyn, Visiting Cruise, Passaic River.
3. Orange, Ann., Arlington, N.J.
5. Ianthe, Annual Regatta.
8. Rochester, Fall Regatta, Irondequoit Bay.

OCTOBER.

1. Springfield, Cup, Springfield.

THE question as to the standing of a brass centerboard weighted with lead is a very interesting one, as there are indications in both canoeing and yachting that the loaded fin, whether fixed or movable, is likely to play an important part in racing. We pointed out some time since that the very wholesome restriction on weight of centerboard has disappeared from the rule, probably by a clerical error. As to the present standard of the weighted centerboard, we are inclined to differ from the opinion expressed unofficially by the chairman of the regatta committee, and to consider them as admissible under the rule. The use of a limited amount of ballast in the centerboard has been fully recognized in the rules for many years. No objection has ever been made to the hollow centerboards filled with movable blocks of lead that were used by the Toronto canoeists in 1883-4-5; they were admitted on the same footing as a solid gunmetal board of the same weight; and wooden boards weighted with lead have always been admitted under the rule. The principle of extra weight of ballast in the centerboard being thus recognized, the only question is that of form; and if the lead cylinder on the lower edge of the brass center plate is so fitted as to house completely within the trunk, we should consider it as coming under the same head as the ordinary heavy metal board of uniform thickness, which now is not even limited in weight.

LAKE CHAMPLAIN.

A CORRESPONDENT calls attention to an error in Rule 1, as printed in the new Year Book, and asks for official information. While the Year Book is considered as the official standard of all rules, there is clearly an error in this case, as the sole change made in Rule 1 last November was the substitution of the word "cruising" for "general purpose." The limit of drop of centerboard was removed, but the vote was afterward reconsidered, and the limit was left as before, at 18in. We print elsewhere the rule as our minutes, made at the meeting, show it to stand, in effect unchanged from last year. The trouble arose from the hurry with which much of the work of the meeting was necessarily done, in which the racing regulations, as usual, are the chief sufferers, they being considered after the question of location, date of the meet, etc., are disposed of, usually at the end of an all-day session.

The work of amending the racing rules has been very badly done for several years, and it is time that more serious attention was given to a matter of such importance. It is one of the most important functions of the regatta committee to present to the executive committee at the November meeting a report which shall include in definite form all proposals for changes of the rules. The present regatta committee is better fitted to deal with this subject than any that has been appointed for some years, and they cannot do a better service to the racing men than to lay before the executive committee a careful revision of Rule 1. The rule has been very carelessly meddled with in the past, some important restrictions being dropped out for no apparent reason.

WE shall publish during the next month all the information obtainable in regard to the A. C. A. meet, and members will do well to watch our columns for official information which can be given to all through no other source after the camp circular has been sent out, which will be done very shortly. Com. Winne requests us to state that he will give personal attention to such inquiries in regard to the camp as may be addressed to him. At the same time we would suggest to inquirers that they make certain that the information has not already been published before applying for it, as the commodore's time is well taken up just now.

ON Saturday last the meet of the Western Canoe Association opened at Lindenwald Point, Lake Winnebago, and on Friday of this week the meet of the Northern Division, A. C. A., will open at Geneva Park, Lake Couchiching, Canada. We hope to give full accounts of each meet.

COM. C. V. WINNÉ.

# AMERICAN CANOE ASSOCIATION.

## THIRTEENTH ANNUAL MEET.

### Willsborough Point.

OFFICERS, 1892.

COMMODORE, C. V. Winné, Albany, N. Y.
SEC'Y-TREAS., W. B. Wackerhagen, Albany, N. Y.
*Central Division*—Vice-Com., E. L. French, Buffalo, N. Y.
Rear-Com., T. H. Stryker, Rome, N. Y.
Purser, C. G. Belman, Amsterdam, N. Y.
*Eastern Division*—Vice Com., J. W. Cartwright, Jr., Boston, Mass.
Rear Com., E. C. Knappe, Springfield, Mass.
Purser, R. Appolonio, Winchester, Mass.
*Northern Division*—Vice-Com., D. B. Jaques, Toronto, Can.
Rear-Com., W. F. Sweny, Kingston, Canada.
Purser, J. W. Sparrow, Toronto, Canada.
*Atlantic Division*—Vice-Com., L. W. Seavey, New York.
Rear-Com., L. B. Palmer, Newark, N. J.
Purser, F. L. Dunnell, Brooklyn, N. Y.

REGATTA COMMITTEE—R. S. Oliver, Ford Jones, H. L. Quick, E. H. Barney and R. W. Gibson, chairman.
CAMP SITE COMMITTEE—W. H. Brown, W. E. Christie and W. R. Huntington, chairman.
TRANSPORTATION COMMITTEE—J. W. Sparrow, Dr. Sidney Bishop, W. S. Smith and I. V. Dorland, chairman.
Signal Officer, Dr. Geo. L. Parmele; Ass't Signal Officer, H. R. Tilley; Fleet Surgeon, Dr. W. J. Nellis; Official Photographer, S. R. Stoddard. Clerk of the Course, Geo. P. Douglass.
GENERAL MEET—Willsborough Point, Lake Champlain, Aug. 4 to 25.
DIVISION MEETS—Central, Atlantic and Eastern, none. Northern, Lake Couchiching, Can., July 15 to 31.

The birthday of the American Canoe Association is Aug 3, as it was on that day twelve years ago that the little party of thirteen canoeists, mostly strangers to each other, met in convention at Crossbyside, Lake George, and organized the Association. The coming general meet will miss being a birthday party by just one day, as the camp will be formally opened on Aug. 4.

The location of the camp of 1892 is already familiar to many who were present at the same spot last year, and to many more through the very favorable reports which were spread by these former, as well as through the excellent photos made by Mr. Stoddard, several of which we reproduce by his permission. Willsborough Point is one of the most beautiful spots in a region famous for its scenery, which includes the famed Adirondacks, Lake George and the Green Mountains; not to mention Lake Champlain itself. The Point is six miles distant from Port Kent, eight miles from Burlington, Vt., and nine and one-half miles from Essex, N. Y.

It is a high rocky peninsula, a spur of the mountains on the mainland, running north and south for four miles, parallel with the New York shore, and forming on its west side a bay about one mile wide. The point is covered with thrifty farms and farmhouses, but there are no buildings within a long distance of the camp except the hotel. From Willsborough station, on the Delaware & Hudson R. R., the camp may be reached by a pleasant drive of nearly six miles. From the camp is visible a wide expanse of Lake Champlain, with the city of Burlington opposite, the Adirondack Mountains immediately at hand on the west, and the distant peaks of the Green Mountains on the east.

The camp may be reached from Burlington, on the east side of the lake, and on the west from Port Kent, the lake steamers from Port Douglass, a special station of the D. & H. R. R., by launch, and from Willsborough station by carriage. It may also be reached from the various points on the lake, Plattsburg and Ticonderoga.

The D. & H. C. Co. will have a platform and small station, with a telegraph operator in charge, ready by August just opposite the camp.

The following is the time table to let off and take on passengers:

Going North.

Leaves* N. Y. 7 P.M. Albany 11:15P.M. Arrives at Camp. 6 A.M.
Leaves N. Y.. 9:10A.M. Albany. 1:10P.M. Arrives at Camp. 7:30P.M.
Leaves N. Y..11:59P.M. Albany. 6:50A.M. Arrives at Camp.11:30A.M.

Going South.

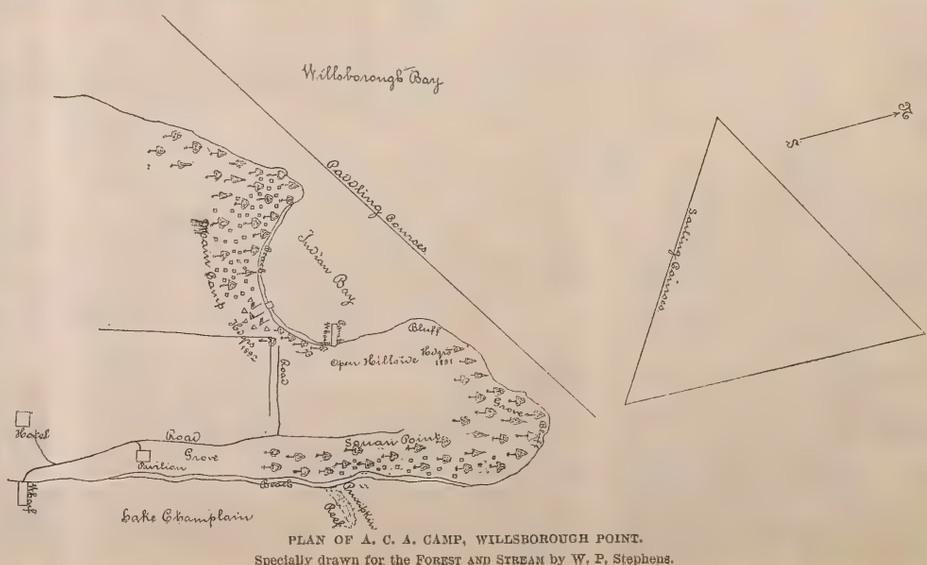
L's Montreal. 7:15A.M. Camp...11 A.M. New York..... 7 P.M.
Leaves* Camp 8:30P.M. Albany. 2:30A.M. Arrives at camp. 6:45A.M

*Runs Sundays.

All freight and baggage must be shipped or checked to Port Kent, and then the owner can arrange with the baggage man on train to put off baggage at camp station.

All freight, duffle and canoes shipped to Port Kent will be looked after by the D. & H. agent, and if marked will be reshipped to camp. Mark everything with owner's name, Port Kent, N. Y., A. C. A. Camp, Willsborough Point, N. Y.

R. R. fare from Albany and return, $6.20; R. R. fare from New York and return, $10.30; Canoeists come on night boat from New York fare $1.50, and take the train that leaves Albany at 6:50 A. M. and arrive in camp 11:30 A. M., they can purchase their certificate at Albany.



The steamer Chateaugay, of the Lake Champlain Transportation Co., will make trips as follows: Leaves camp at 8 A. M. for Burlington, connects with Vermont from Port Kent and returns to camp 9 A. M.; leaves camp 9:15 A. M. for Port Kent. Leaves Port Kent at 4:26 P. M. and arrives in camp at 5:15 P. M. Leaves for Burlington and connects with the Vermont coming from Ticonderoga and returns to camp at 6 P. M., making a ferry between camp and Burlington in the morning and evening at very convenient hours.

The steamer Vermont leaves Port Kent 7:20 A. M. and connects with the Chateaugay at Burlington, getting the canoeist in camp at 9 A. M., and the Vermont leaves Ticonderoga 1:25 P. M and connects at Burlington with the Chateaugay, arriving in camp at 6 P. M.

The trip from Ticonderoga permits the tourist to vary his route and pass through Lake George one way at an extra expense of but $1.50. The rates of fare for the round trip are very nearly as follows: From New York, $10.30; Rochester, $11.40; Springfield, $8; Toronto, $17. During August low rates from the West prevail. The railroad tickets to the camp are good on the Champlain steamer from Port Kent, Burlington and Ticonderoga. All of these points are reached by the D. & H. R. R. from Montreal on the north and Albany on the south, while Burlington is also in close connection with the entire railroad system of New England.

The A. C. A. camp covers the extreme north end of the point, on land owned by Mr. E. K. Baber and leased by him to the Association at a nominal rental of $1 per year. The accompanying plan of the camp, specially drawn for the FOREST AND STREAM, shows the general arrangement and the lay of the ground. Beginning at the extreme end, the ground is quite high, rocky bluffs rising from 20 to 30ft. above the lake, while the land slopes upward toward the center of the point, this portion being quite heavily wooded. The fringe of wood extends for half a mile along the east or lake shore, up to the wharf just in front of the hotel. Within this grove is the ladies' camp, which will take in a part of the point and the shore opposite Pumpkin Reef. The bluffs extend along the west shore, overlooking Indian Bay, and forming a fine point of view commanding the main camp and the racing courses. Last year headquarters was located on this high ground, as shown in one of the views, but this year no tents will be allowed on the large open meadow which forms the hillside. The men's camp will be located in the place selected by common choice last year, along the south shore of Indian Bay, where a grove provides ample shade for those who prefer it, while there is plenty of open space for those who prefer to camp in the sun.

The grove and beach in front of the main camp are shown in two of the views. Owing to the very low water of last year a wide and stony beach was exposed, but it is probable that the water will be higher this year, covering the worst of this beach. A wharf will be built, as shown, and a landing for canoes will be constructed immediately in front of headquarters. The ground in the main camp rises gradually and is very convenient to the beach, but high enough to afford dry tent sites. Headquarters will be located nearly on the site of the Puritan camp of last year, just inside the fence corner. The road has been graveled, making a good walk to the pavilion, where meals will be served. This is located between the camp and the hotel, on the lake shore, and in a pleasant grove. Members are at liberty to select such tent sites as they may prefer in all places not reserved for public use. These are the west slope of the hillside,

PLAN OF A. C. A. CAMP, WILLSBOROUGH POINT.
Specially drawn for the FOREST AND STREAM by W. P. Stephens.

the small grove on the beach in front of headquarters, and the open space on the west point of Indian Bay. It is desirable to preserve one compact and well-arranged camp, and members are requested in selecting tent sites to leave a clear road between the water and the first row of tents, and to preserve the necessary passageways at convenient intervals between the various groups of tents.

*Mess.*—The camp mess will be under the direction of Mr. Otis, as last year. It will be served in the large pavilion, and everything will be as clean, neat and palatable as last year, generally admitted to be the best yet provided at a meet. The price will be $1 per day, or thirty five cents each for breakfast and supper and fifty cents for dinner.

*Hotel.*—The Willsborough, formerly the Green Mountain View House, managed by Mr. J. Henry Otis, is a cosy and comfortable hotel, located about one-quarter of a mile from the camp. It offers every convenience for ladies and chance visitors who do not care to camp, and at the same time it is entirely free from the objections of the ordinary summer hotel which brings a host of tourists and sightseers into the camp. Mr. Otis has been specially accommodating to the Association, and will do all in his power to insure the comfort of those who prefer the hotel to the camp. Meals may be taken at the hotel, or, if preferred, with the canoeists in the pavilion.

No. 15. Sailing upset and maneuvering, no special appliances, no limit to ballast; at signal throw over astern and recover paddle; second signal, canoe to be righted and cross finish line under sail. Time limit ½ hour.

No. 16. Paddling upset, usual conditions, no special appliances.

No. 17. Hurry scurry, run, swim and paddle short distances.

No. 18. Gymnastics.

No. 19. Long distance cruising race, two or three days' racing, about six hours each day, and camping at night, each man with his own outfit. Details of this event to be decided at a meeting to be held at camp Saturday evening, Aug. 6.

*Note.*—The events will not be called in the order of numbers. The long distance cruising race will be made (if made at all) between Aug. 5 and 12.

The sailing races will be taken up Monday, Aug 15, if there is wind, and continued, as long as wind is good, until finished.

Paddling races will be called early on the first day if there is no wind, but if there is they will commence later that day, or on the second day.

Events 15, 16, 17 and 18 will be called, if possible, on the afternoon of Thursday, Aug. 18.

MAIN CAMP VIEWED FROM OLD HEADQUARTERS.

*Ladies' Camp* will be located the same as last year, on the east side of the Point, and will be in charge of one active member and four lady associate members, selected one from each division.

*Wharf* will be located on the bay side very near headquarters.

*Headquarters* will be located on Indian Bay, at the approach to camp from the main wharf.

*Mail* will be in charge of a postmaster at headquarters. Address for all mail matter, "A. C. A. Camp, Willsborough Point, Essex Co., N. Y."

*Telegraph* station at hotel.

*Barber.*—A good barber at hotel.

*Dark Room* at hotel for the use of A. C. A. photographers.

*Carpenters and Laborers* have been engaged and lumber purchased, and tent floors and skids, etc., will be built for members at cost on application to camp site committee. Flag poles can be furnished at a reasonable price. We earnestly request members desiring floors to send their measurements to Wm. R Huntington, chairman camp site committee, Willsborough Point, after Aug. 1.

*Camp Store* will be located near mess pavilion with a stock of the articles usually in demand, and orders taken for articles not in stock.

*Signals.*—The A. C. A. Signal Code will be used to convey all intelligence from headquarters to the entire camp, the signal station and poles being located at headquarters. Copies of the code may be obtained of the secretary. Price, 10 cents.

## Camp Rules.

1. A member of the executive committee will act each day as executive officer, and will be obeyed accordingly.

2. Daily before 10 o'clock tents and grounds must be put in order, all refuse, papers, etc., must be ready for removal by the camp cart. Members will be held responsible for the appearance of their tents and the surrounding grounds.

3. The commodore and secretary will be at headquarters for transaction of business each day from 9 to 11 A. M. Immediately upon arrival members will register at headquarters.

4. Flags will be raised at 8 A. M. and lowered at sunset.

5. Tents may be located by owners, subject to the approval of the camp site committee, and with due regard for the thoroughfares and lines.

6. Camp will be open daily from 10 A. M. to 5 P. M. Guests may be invited by card, to be obtained of the secretary. Before 10 A. M. and 5 P. M. no guest will be expected in camp except by invitation for occasions specially announced on bulletin board.

7. Neither guests nor members from main camp will be expected in the ladies' camp before 10 A. M. or between the hours of 5 and 7 P.M. At 11 P. M. all guests and members from the main camp are expected to leave the ladies' camp except when present by special invitation announced on bulletin board.

8. On Thursdays, Aug. 11 and 18, visitors are invited from 10 to 6, during which hours the rules governing admission of guests to camp will be suspended.

9. Visiting boats must land at the steamboat wharf or at the headquarters, unless otherwise directed by officers in charge.

10. Taps will sound at 11 P. M. After that hour quiet must be maintained in camp.

11. As these rules are few and simple as possible, the orderly and creditable appearance of the camp is intrusted to the members generally.

CHAS. V. WINNE, Commodore.

*Non-Members.*—By-Laws, Sec. 2: Every member attending the general A. C. A. camp shall pay $1 for camp expenses. Non-members when accompanying members may be admitted to the camp at the discretion of the commodore and secretary, provided that, if they spend more than two nights in camp, the members introducing them shall pay $2 each, the same dues and camp charges as regular members.

*Water Parade and Illumination.*—A special effort will be made to decorate and illuminate the camp. The executive officers urge the members to bring colored lanterns, flags and colored fire. An illuminated parade will take place if possible. The camp will open on Thursday, Aug. 4, and will terminate on Aug. 25.

## Regatta Programme.

REGULAR EVENTS.

No. 1. Paddling and sailing combined, half miles alternately, total three miles. Time limit, 1½ hours.

No. 2. Paddling, half-mile, straightaway.

No. 3. Sailing, four and one-half miles, same rig and ballast as in race No. 1. Time limit, two hours.

These three races to constitute the record races.

No. 4. Trophy paddling, one mile, straightaway. Exempt from one-man-one-canoe rule.

No. 5. Paddling, open canoes, not under 55lbs. weight, single blade paddles, one-half mile straightaway.

No. 6. Unlimited sailing race. No limit to rig or ballast, six miles. Time limit 2½ hours. Starters in the trophy race to be selected from this race. See Rule 5.

No. 7. Trophy sailing. No limit to rig or ballast, nine miles. Time limit 3½ hours. Starters to be selected as by Rule 5.

No. 8. Novice sailing race. No limit to rig or ballast, distance three miles. Time limit 1½ hours. Open only to men who have not sailed a canoe prior to Sept. 1, 1891.

No. 9. Sailing, the Pecowsic Cup. Four and one half miles, no limit to rig or ballast. Time limit 2 hours. Winner of trophy barred.

No. 10. Sailing club race, distance four and one half miles. Time limit 2 hours. First three members of any one club to count. No club can be represented unless it enters at least three men; all men entered must have become members of the club they represent before the first day of the A. C. A. meet.

No. 11. Cruising race. Open to "general purpose" or "cruising" canoes, sailing and paddling combined, one-half miles alternately. Distance three miles. Time limit 1½ hours.

OTHER EVENTS.

No. 12. Paddling war canoe race. Details will be posted.

No. 13. Paddling tandem, half mile straightaway.

No. 14. Paddling club fours, half mile straightaway.

Particular attention is called to the following rule and notice:

RULE X.—Paddling races shall be started by the starter asking: "Are you ready?" On receiving no answer, he shall say "Go." If he considers the start unfair, he may recall the boats, and any canoe refusing to start again shall be distanced.

The combined paddling and sailing race shall be started in the same manner, the word "Go" being immediately followed by a gun.

RULE XIII.—Five minutes before the start, a signal will be given and a blue flag hoisted, and four minutes later a second signal will be given and a yellow flag hoisted, and one minute later a third signal will be given to start and an A. C. A. flag hoisted and left up.

Any canoe which crosses to the course side of the starting line prior to the third signal, must return above the line and recross it, keeping out of the way of all competing canoes, using the paddle if necessary; but after the third signal the start shall be considered as made, and all canoes on either side of the line shall be amenable to the Sailing Rules. Canoes may take any position for starting, and prior to the third signal, may be sailed and worked in any manner (outside aid not allowed). A green flag displayed signifies that buoys are to be left to starboard, a red flag means to port. The regatta committee may vary the manner of starting at their discretion, but all sailing races should be started to windward when practicable.

The course flag if used will be put on a staff separate from the starting flags.

The regatta committee will arrange for a division race of war canoes, if required, and will also arrange races for any special prizes offered by individuals.

*Notice as to Punctuality.*—The regatta committee and their assistants will make every effort to start races punctually on time, in justice to those members who are at the line ready. Any canoe entered may, if late, cross the line and join the race at any time after the start, but will not expect the race to await her arrival. All members will recognize the necessity of avoiding those delays, which tire out the punctual men before the race begins.

## Prize Flags.

THE regatta committee of the American Canoe Association begs to acknowledge receipt of contributions, or promises of contributions, for prize flags, since the last publication in the FOREST AND STREAM, as follows, and to cordially thank the respective clubs and members.

Yonkers Canoe Club $5. Prize flags: per Commodore C. V. Winne, one each from Miss Florence M. Seavey, Mrs. C. Bowyer Vaux, Miss S. E. Vair, Miss Fanny Archabald, Miss Christie, Mrs. W. P. Stephens, five from Mohican Canoe Club.

R. W. GIBSON, Chairman.

## A. C. A. Membership.

THE following gentlemen have applied for membership in the A. C. A.: Northern Division.—John Agnew, Toronto; W. R. Hornell, Lucknow, Ont. Central Division.—John C. Neville, W. R. Robeson, Archibald McClure, Albany; Stephen Waterman, Providence, R. I.; Quincy Pond, J. Merrill, Jr., Boston, Mass.

## The A. C. A. Measurement Rule.

*Editor Forest and Stream:*

What is a canoe under A. C. A. rules? Material changes in Rule I. of the racing regulations—which defines a canoe—were made at the executive committee meeting in Boston, 1890, and published in the 1891 Year Book. Under the rules then adopted there were three kinds of canoes: Unclassified—racing machines—under which no canoes have thus far been built, or races provided for them on the programme, as far as I can learn; racing canoes, the boats that have generally been used for racing purposes, and "general purpose" canoes. The racing canoe, according to the 1891 rule, must not be over 16ft. in length, over 30in. in beam, or under 28in, and must not draw over 10in. of water, and the centerboard must not drop more than 18in. below keel.

The 1892 Year Book states on page 39 that changes were made in Rule I. at the executive committee meeting in Albany, Nov. 14, 1891. It does not state what those changes were; but on pages 9 and 10 the rule is printed, and it is quite different from that printed in the 1891 book. A hasty reading of this rule shows that there is a typographical error in it, and a careful reading develops the fact that the first paragraph remains unchanged, but that the new matter is in the second paragraph. The limit of drop of centerboard to 18in. is left out—by mistake or on purpose it is impossible to learn—and the restriction that the board when housed must not project above the coaming is added. The third, fourth and fifth paragraphs have not been changed, I believe.

Now, the questions are, has the limit of 18in. been done away with, and no limit placed on the drop of board? and did the committee pass a rule forbidding the board to project above the coaming when hauled up? These are points the racing men want to know about right away. If the board cannot project above the coaming, is there any boat, new or old, that can enter the races at the meet in August? It is certainly a vital point to have Rule I. absolutely free from errors, and I would suggest that a corrected copy of this rule be sent to every A. C. A member without delay.

Is lead on the centerboard ballast? and is it against Rule XIV. to put it there? This is a question for the regatta committee to decide, I suppose.

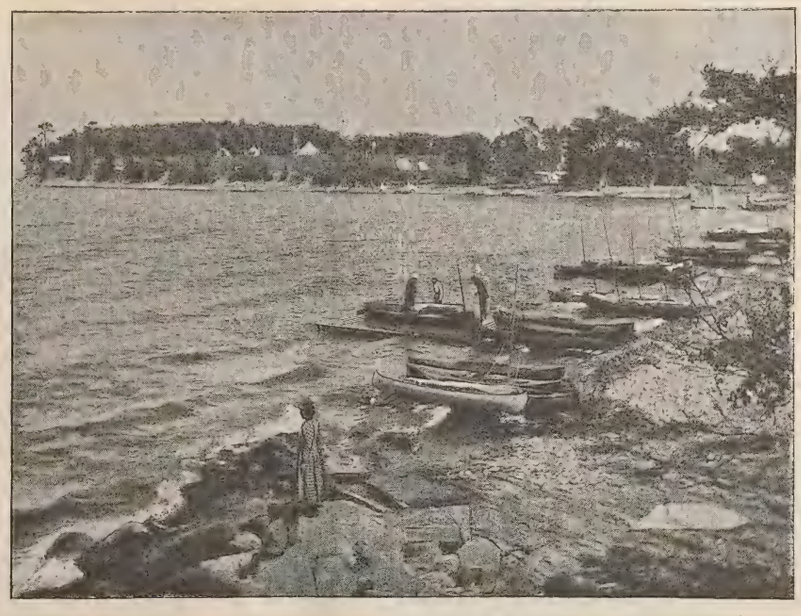
Is the unclassified canoe entitled to enter any races on the programme, and, if so, which ones?

Experience has shown that not more than four canoes can start in a sailing race around a triangle with half mile sides and have an even chance of winning. The canoe that gets the lead at the start, if more boats than four sail, has by far the best chance of winning. There is no chance after the start to make up even half a minute of lost time; for while the delayed boat is fighting her way through the fleet, the leader, unhampered, is increasing her lead all the time.

The short course is in the interest of the spectators and not of the canoeists. While it is, perhaps, inadvisable for the regatta committee to make any radical changes in the course this year for all the races, there is no reason why the trophy race should not be so laid out that every one of the fifteen canoes entitled to enter should not be given an even chance to win. This can easily be done. The distance to be sailed is 7½ miles. There will be several launches at the disposal of the committee and the A. C. A. owns a patent log. Therefore, on the day of the race a course could be logged off—after the start if necessary—3¾ miles to windward and return on the open lake, or an L course, 3 miles to windward and back and 1½ miles reaching. The start and finish would be where the whole camp could see them, and plenty of sea room would be given each canoe to sail a fair race from start to finish. Nothing in the rules prevents this change, and, so far as I can see, there is no reason why it could not be made, and every reason why it should.

AN OLD MEMBER.

*Editor Forest and Stream:*



The confusion which is said to exist in Rule I. as printed in the A. C. A. book prompts me to direct attention to a matter which I laid before the executive committee at Albany last November.

I then urged the necessity of an official standard certified version of the A. C. A. constitution, by-laws and sailing regulations, which should be engrossed with enough space for the insertion of changes, which changes should be only entered by the secretary and certified by the commodore.

My suggestion was met by a declaration on the part of the committee that the book of that year was an official version of the constitution.

The present state of things shows that this action entirely fails to meet the requirements. Nobody knows what is the official reading of Rule I. The book is apparently incorrect, and there is no official document by which to correct it.

I therefore beg to repeat to the executive committee my personal suggestion, that a duly attested record is necessary.

BEACH OF MAIN CAMP. OLD HEADQUARTERS OPPOSITE ON HILL.

The regatta committee itself is unable to decide questions which will be brought before it.

My personal impressions are, however, that the A. C. A. rules recognize for races, only such canoes as come within its classification limits, but that it is a custom for the regatta committee to make a race for any canoes, even unclassified, if any one should offer a special prize for that purpose.

My impression is that the limit of drop of centerboard was not officially removed, and that the restriction that the board should not project above the coaming when housed was intended to apply only to cruising canoes. It would appear that Rule XIV. forbids lead on the centerboard and was intended to do so.

As to the triangular course, which has become customary in the A. C. A., there are many things to be considered besides the advantages of the spectators. The small triangular course develops and encourages and rewards maneuvering power in the canoe, and skillful handling by the racer. There is far more science in sailing this course than once around a long course. It is well known that more than once a race has been won by skill in handling a boat which was not absolutely the fastest, and it is not in accord with my experience that only four canoes can make a fair start on such a course. It is true that blanketing is apt to occur in a crowd, but it is equally true that it does occur even in races between two boats, and it cannot be avoided except by providing each boat with its own separate course, which would be absurd.

A radical change in the manner of laying out the course would make such a different kind of race, and so affect the result, that it should be made only after due deliberation by the authority of the Association.

Moreover, the uncertainty and confusion caused by the use of several different courses, as compared with the simplicity of the single triangle, seem to me to urge the latter method most emphatically.

All the A. C. A. sailing races should be sailed on the same triangular course, according to the established system which everybody understands, and which can be carried on without a hitch.

For the coming races the plans of the committee have been made after careful deliberation, and it would be undesirable at this late hour to make any radical changes. If an experiment is desired, such as a long L course, any member may offer a special prize and lay out such a course, and will in that way no doubt obtain satisfaction. But it would be unfair to increase the work of the committee, which every one knows is sufficiently heavy, by calling upon them to undertake the experiment.

Let me repeat, however, that these opinions are personal, and not from the regatta committee.

To conclude I would point out that it is the executive committee and the secretary who are the custodians and recorders of the A. C. A. constitution and by-laws and regulations, and to them we must look for the corrected version. R. W. GIBSON.

---

In order to save time, we submitted the first letter to Mr. R. W. Gibson, chairman of the regatta committee, whose reply appears above. Rule I. is incorrectly given in the Year Book. As we understood the action of the executive committee at the November meeting, the rule should read as follows:

RULE I. A canoe, to compete in any race of the A. C. A., must be sharp at both ends, with no counter stern or transom, and capable of being efficiently paddled by one man, and must come within the prescribed limits, as follows: Maximum length, 16ft., and for that length a maximum beam of 30in. Minimum beam, 28in. Beam may be increased ½in. for each full inch of length decreased. No canoe shall have a draft of more than 10in., except the unclassified boats, to which class the limits of length and breadth only shall apply.

In centerboard canoes, the keel outside of the garboard shall not exceed 1¼in. in depth, including a metal keel band of not over ¼in. deep. The centerboard must not drop more than 18in. below the garboard, and when hauled up must not project below the keel. Canoes without centerboards may carry keels not over 3in. deep below garboard, and not weighing more than 36lbs. Leeboards may be carried by canoes not having centerboards.

Measurement.—The length shall be taken between perpendiculars at the fore side of stem and the aft side of stern. The beam shall be taken at the widest part, not including the beading, which shall not exceed 1½in. in depth. If deeper it shall be included in the beam. The word "beam" shall mean the breadth formed by the fair lines of the boat, and the beam at and near the waterline shall bear a reasonable proportion to the beam at the gunwale.

The "cruising canoe" shall be one which conforms to the above conditions, and, in addition, has a well not less than 16in. wide for a length of 3ft. 6in., with a sleeping space of 6ft., of which at least 5ft. shall be clear. There must be no projecting centerboard when housed. The sliding seat shall not be longer than the beam of the boat, and no standing sail shall be used. The regatta committee may rule out any canoe which, in their opinion, does not conform to the spirit of these regulations.

The foregoing rules of measurement shall not be interpreted to disqualify any canoe built prior to Jan. 1, 1890, which conforms to the rules prior to that date.

## CANOE NEWS NOTES.

The fourth annual camp of the Owanux Canoe Association will be held at Merwin's Point from July 23 until July 30. The races will be held on Tuesday and Wednesday, and are as follows: Paddling, one-half mile straightaway, paddling tandem, combined sailing and paddling, sailing on the triangle three miles with no limit to rig, etc., upset, 100yds. and hurry scurry race. The regatta committee are Messrs. J. H. Rowland, G. H. Lauzzettle and C. T. Gilbert. The camp committee includes G. Foster Sanford, William Stark and S. B. Rowland. On Wednesday evening of the camp week the annual meeting will be held and prizes for the different races awarded. At the conclusion of the meet the big camp fire will be lighted.

The neatest and daintiest of all canoe club books is the little white volume of the British Canoe Association, the fifth annual edition of which has lately reached us. The association has now 170 members. The book contains six handsome proto-gravures of the 1891 meet on the Norfolk Broads. The meet this year will be on the Menai Straits, beginning Aug. 15

The boathouse of the Brooklyn C. C., at the foot of Fifty-fifth street, Brooklyn, was entered the night of July 6 by thieves, who stole a gold watch and chain and a pocketbook containing $13 from a locker belonging to one of the members. The club house was robbed about a year since, the thieves being detected.

I would like to correspond with some one who would take a cruise on Lake Michigan and perhaps Huron, in canoes or small boats during July and August. House tent and camp outfit enough for four or five, and could accommodate one light weight in my sneakbox. Address, G. A. R., 47 Eleventh street, Grand Rapids, Mich.

The *Mail and Times*, of Des Moines, Iowa, contains a very interesting canoe cruise on the Des Moines River by Messrs. Tac Hussey and Walter Weatherly. Mr. Hussey is an old A. C. A. man, No. 79 on the roll.

The July number of *Lippincott's Magazine* contains an article on canoe cruising, the sixth of the "Athletic Series," by W. P. Stephens.

Mr. George P. Douglas, of the Ianthe C. C., won the one-mile novice bicycle race of the Riverside Wheelmen in New York, on July 9.

# Rifle Range and Gallery.

### The National Rifle Association.

*Editor Forest and Stream:*

I inclose herewith copies of the correspondence in regard to the withdrawal of the National Rifle Association of America and the holding of its annual matches at New Jersey, which speaks for itself.

While the abandonment of Creedmoor by the N. R. A. will probably put an end to competitive shooting in New York State, the N. R. A. will probably be maintained in existence, but only as the owner of the Hilton shield and other similar trophies which will probably be offered for competition at the ranges of the different States so as to give all the national guard an equal chance.

The aggressive association which has been the parent of the various international matches and the founder of rifle practice will, however, practically cease to exist. GEO. W. WINGATE.

NEW YORK, June 30.

---

STATE OF NEW YORK, Department of Rifle Practice, 99 Fourth Avenue, New York, June 23,—Gen. G. W. Wingate, Pres. N. R. A., City.—Sir—To enable me to fix a date for the State and Brigade matches, I have the honor to request what dates in September next the N. R. A. proposes to hold its fall meeting at Creedmoor, L. I. A reply by bearer, if convenient, will much oblige very respectfully your obedient servant, B. M. WHITLOCK, General Inspector of Rifle Practice, S. N. Y.

---

THE NATIONAL RIFLE ASSOCIATION OF AMERICA, Temple Court, cor. Beekman and Nassau Streets (Room 400), New York, June 24, 1892.—Gen. B. M. Whitlock, General Inspector of Rifle Practice, S. N. Y., Albany, N. Y.: Sir—I am in receipt of your letter of the 23d inst. requesting a statement "as to what dates in September next the N. R. A. proposed to hold its annual meeting at Creedmoor," in order to enable you to fix the dates for the State and brigade matches. In reply, I have to state that the dates assigned by you for the practice of the National Guard at Creedmoor have left no time unoccupied which could be used by the N. R. A. for its monthly matches or annual meeting. It has, therefore, been decided not to hold any annual meeting at Creedmoor during the present year, and the N. R. A. will transfer such meeting to the State of New Jersey, where its exertions in establishing rifle practice seem to have earned for it a warmer regard than on the range it created. Yours very respectfully, GEO. W. WINGATE, Pres. N. R. A.

---

NEW YORK, June 24, 1892.—Gen. Bird W. Spencer, General Inspector Rifle Practice, S. N. J., Passaic, New Jersey: General—I wish to inquire of you officially whether or not arrangements can be made by which the matches which the N. R. A. has been in the habit of shooting at Creedmoor, may be shot upon the range at Sea Girt, New Jersey. The matches I refer to are those for the Hilton Shield, the Interstate Trophy, perhaps the Wimbledon Cup and the Judd Trophy. It is not desired by the N. R. A. to have any personal management of these matches, or to receive any of the income, but simply that they shall be shot as a part of the programme of the New Jersey Rifle Association and on its range, under the supervision of the N. R. A. We think the giving of these matches at Sea Girt will undoubtedly attract a number of competitors to it, who would not otherwise be willing to come. Yours very truly, GEO. W. WINGATE, Pres. N. R. A.

---

STATE OF NEW JERSEY.—Inspector General of Rifle Practice, Trenton, June 28, 1892.—Gen. Geo. W. Wingate, Pres. National Rifle Association: Dear General—Yours 24th received. I have had a conference to-day with Governor Abbett and secured his approval to your proposition as therein outlined. We shall be glad to include the matches in our programme, and you may announce the completion of the arrangement as far as gone, as you deem best. The details we will arrange later. Yours truly, BIRD W. SPENCER, Inspector General Rifle Practice.

---

NEW YORK, June 16, 1892.—General Josiah Porter, Adjutant-General, Albany, N. Y.: General—It is with the most profound regret that I learn that the State has taken steps which have practically resulted in driving the National Rifle Association from Creedmoor, and may result in its dissolution.

The Association, as is well known, only maintains itself by the receipts which it gets from the monthly sharpshooters' matches, with which receipts it is enabled to carry on the matches themselves (at which large numbers of National Guardsmen qualify without cost to the State) and to provide the prizes which induce the mass of the National Guard to engage in these competitions. The small surplus left and which constitutes its only income, enables it to provide the prizes and to carry on its annual fall meeting, which meeting always involves a loss of from $250 to $750.

The refusal of the new General Inspector of Rifle Practice to recognize as heretofore the scores made in these matches, prevents their continuance, and in consequence prevents the holding of the annual meeting at Creedmoor even if the assignments made by him of the range had not occupied the entire time which the matches and meeting could be held.

The N. R. A. has therefore been compelled to abandon the idea of having an annual meeting at Creedmoor and to close its office.

I desire to put upon record an earnest protest against this action by the State as I cannot but consider it as calculated to be destructive of competitive rifle shooting in the National Guard and as a necessary consequence to be injurious to all military rifle practice. The efficiency of the National Guard organizations in rifle shooting and the number of men who engage in it is in the cities of New York and Brooklyn, in direct proportion to the efficiency of their regimental teams, and those teams are developed and trained in the competitive matches of the N. R. A. The sharpshooters' matches did not interfere with the free practice proposed by Gen. Whitlock. No one was obliged to shoot in them and those who did so without expense to the State. Annual competitions in military rifle shooting such as those of the N. R. A. are fostered among the citizen soldiers of all English-speaking people as of great military value, and I am unable to see why the authorities of New York State should, upon the twentieth year after the establishment of Creedmoor, reverse all its traditions and turn the Association out of the range they have created, which is the birth place of rifle shooting in the United States.

I cannot also but consider that this action by the State authorities is a practical breach of faith toward the National Rifle Association. When we recently donated Creedmoor to the State it was with the express reservation of the right of the annual meeting and with the implied idea that we should be permitted to continue our matches there as previously under your administration. It was thought that it was possible that there might be in the remote future a new administration which might possibly interfere with this. But the idea that it would be done within two years after the giving to the State of this valuable property and by those who know the circumstances of the transaction was too incredible to be considered.

I must say also that I think in view of our personal and military relations, the position I occupy as president of the National Rifle Association, and the criticisms which I will be exposed to from its members, in consequence of the part I have taken in turning the range over to the State in reliance upon an understanding which is now ignored, I was entitled to have you confer with me before a policy was adopted by the State which will result in practically wiping out the National Rifle Association and abolishing all competitive shooting in the National Guard of this section.

Of course Gen. Whitlock is entitled to manage his department, but I respectfully submit that with all his experience in regard to shooting matters, it is not sufficient to justify upsetting the whole system and ignoring those, without whose efforts there never would have been any such position as that which he occupies. Truly yours, GEO. W. WINGATE, Pres. N. R. A.

### New Jersey Rifle Shooting.

*[Specially Reported for Forest and Stream.]*

MILLER RIFLE CLUB, Hoboken, N. J. Captain Richard W. Dewey, Wednesday evening, July 6. The appended scores were made to-night in the regular weekly shoot at the new headquarters of the club, new No. 423 Washington street, Hoboken. The conditions were 10 shots off-hand, 25-ring target, possible 250: D. Miller 243, F. Liell 242, Louis Sohl 239, F. Brandt 238, J. H. Kruse 238, Frederick Kloepping 235, August Meyns 235, W. Rogers 234, H. F. Meyer 232, Henry Seltenreich 232, H. Vanderheyden 225, W. Forkel 224, R. Zoch 222, G. A. Demorest 220, F. Kammel 220, J. J. Devitt 215, F. Dunstedt. The regular monthly meeting of the club followed, after which an unusually spirited social session was in order. The members are more than pleased with their new headquarters. Two 75ft. channels are fitted in with all improvements, on the Zettler plan.

Lady Miller Rifle Club, Hoboken, N. J. Headquarters 423 Washington street. Thursday evening, July 7. Unusual high scores were the rule to-night in the regular weekly competition for the handsome and costly cake basket. Those made are below. The conditions were 10 shots on rest, 25-ring target, possible 250:

| | | |
|---|---|---|
| Pres Mrs Stadler..243 | Miss L Prien.....242 | Mrs J Vogel.....239 |
| Mrs M Miller.....243 | Miss M Miller....241 | Mrs M Meyers....230 |
| Miss K Born.....243 | Miss T Sina.....241 | |

Greenville Schuetzen Park, Greenville, N. J., Friday, July 8. In the regular semi-monthly shoot between the Newark Shooting Society and the Excelsior Rifle Club, of Jersey City, at the range in the park mentioned above, the scores made were: Fred. C. Ross, N. S. S., 232; Michael Dowler, N. S. S., 228; William Hayes, N. S. S., 222; L. P. Hansen, E. R. C., 215; John Coppersmith, N. S. S., 213; William Weber, E. R. C., 195; James Hughes, E. R. C., 190; W. Bergerow, N. S. S., 188; William H. Robidoux, E. R. C., 181. The conditions were 10 shots, off-hand, 25-ring target, possible 250, distance 200yds. In the flag shooting that followed the result was:

| | Red. | White. | Blue. | | Red. | White. | Blue. |
|---|---|---|---|---|---|---|---|
| Fred C Ross.. | 3 | 7 | 4 | WHRobidoux | 4 | 8 | 15 |
| W Bergerow.. | 3 | 8 | 19 | W Weber..... | 6 | 4 | 12 |
| JCoppersmith | 16 | 18 | 19 | Jas Hughes... | 9 | 8 | 35 |
| W Hayes.... | 10 | 19 | 17 | L P Hansen.. | 6 | 14 | 12 |
| M Dorrier.... | 11 | 17 | 11 | | | | |

The Greenville Rifle Club, Capt. W. H. Robidoux, are at present hunting up new headquarters. They lost their last through some trouble between the proprietors, Joseph Kaiser and Peter Vreeland. The outcome of the matter was that the "house" was closed up. The matter will probably be speedily adjusted, and an amicable feeling renewed between Messrs. Kaiser and Vreeland. The handicap tournament among the club members will continue just as soon as the club is again housed.

Many Hudson County riflemen attended the Newark Shooting Society's two-days' shoot at Newark, Monday and Tuesday, the 4th and 5th inst. They also captured a fair number of the prizes.

The Excelsior Rifle Club of Jersey City has completed all arrangements for its annual open-to-all outdoor shoot at the Greenville Schuetzen Park, Friday and Saturday, Aug. 19 and 20, through an unusually efficient committee. On the ring target fifteen prizes averaging from $40 down to $1 are offered. Tickets are $1 for three shots, best two tickets for first five prizes to count. On the bullseye target prizes ranging from $25 to $1 are up for competition. Premiums for the most flags and best three tickets consist of $5, $3 and $2. The shooting committee consists of: First Shooting Master, L. P. Hansen; Second Shooting Master, William Weber; William H. Robidoux, John Speicher, Ward J. Channing and William H. Hallowell. The shoot will no doubt turn out to be the success anticipated, as the committees and members are working hard.

The Palisade Rifle Club, Capt. John Reinhardt, is continuing its weekly shoots at headquarters, 354 Palisade avenue, Jersey City Heights, notwithstanding the warmth of the weather. Barely possessing fifteen members they have among them a dozen men who are deeply interested in rifle shooting as a sport. The club has a committee at work making preparations for an outing.

The Shooting Club of the Sixth Battalion, Germania Schnetzen Bund, W. R. N. J., have changed its headquarters from Moye's Hall, First street, to August Meyns' Rifle Ranges, 423 Washington street, Hoboken. They meet for practice every Saturday evening. The change is for the better, as regards the locality and is nearer to the members' homes.

The Hansen Rifle Club shoot weekly at headquarters, Wisch's Schuetzen Ranges, 300 Adams street, Hoboken. The membership of this club is dwindling down lately, and unless new life is infused in a short time, the Hansen Rifle Club is liable to "go up the spout," to use a slang phrase.

The Hoboken Rifle Club, Capt. John H. Yeck, elect a new set of officers at next month's regular meeting. The present officers were elected for a period of three months.

Rifle shooting in Hoboken has received quite a boom. A club which will be composed largely of German citizens, will be organized in Benger's Hall, Adams street, near Second, next week. At present there are quite a number of clubs in Hoboken comprising the Miller, Hoboken, Hansa, Friesy Night, Shooting Club, Batallion and last but not least, the Lady Miller Rifle Club, which club possesses a membership of twenty, all of whom are ladies. At present they are interested in a shoot for a handsome silver cake basket.

The Herman Rifle Club, have abandoned rifle shooting for the summer. At present they pass their spare time away in fishing. The raids they make on the finny tribe and fish dealers are something enormous.

The Hudson Rifle Club, Captain Henry L. Hansen, unmindful of the warm weather, meet every Monday for practice at headqurrters, Giles avenue, Marion. By the way, Capt. H. L., isn't it about time you passed over that plate. JAY H. KAY.

### Bellville Sharpshooters.

BELLVILLE, Ill., July 2—The Bellville Sharpshooters held their tournament to-day and it proved to be one of the most enjoyable shoots of the season. It was a success financially as well as socially. To Mr. D. Schneidewind are due the thanks of all visiting shooters for the able manner in which the shoot was conducted, and his untiring efforts to make everything pleasant for the boys. Bellville has long held the reputation for her hospitality to visiting sportsmen and their appreciation of the same was shown by the crowd that came to-day.

The shooting was fast and furious from the opening gun in the morning until 5 o'clock P. M., when most of the visitors left for home on the evening trains; but a few could not resist the temptation to stay over until the Fourth.

Ring Target.

The following prizes were won on the point target: Wm Bauer $9.55, S. G. Dorman $8.50, D. Schneidewind $7.95, L. Schweighoefer $6.60, F. Lendi $5.05, C. Baptie $4.10. NAMROD.

### Massachusetts Rifle Association.

BOSTON, July 9—The Massachusetts Rifle Association holds its regular weekly shoot at its range to-day for rifle and pistol shooting. There was a large attendance of shooters and some fine scores were made by Messrs. Lee, Cushing, Daniels, Francis, Burnitt and Bell. The shooting conditions were first-class, good light and not much wind. Below are to-day's scores in detail, 200yds., standard American target:

Seal Medal Off-Hand Match.

| | | |
|---|---|---|
| H Cashing.....87 | E H Comey.....79 | S C Snow.....77 |

| C Burk.....227 | H Rosenthal... ..205 | J Kehrwalt.....202 |
| C Engsberg.....211 | A Rossy.....204 | |

At the Target of Honor shoot of the Palisade Rifle Club, held at Shafer's Park, June 25. G. W. Graf won the first prize, a handsome gold chain; H. Rosenthal second, C. Burk third, A. Rossy fourth, A. Matz fifth, I. Reinhardt sixth.

H. ROSENTHAL, Sec'y P. R. C.

### Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening, at Burley & Erickson's shooting gallery, 146 South Halstead street, Chicago. Conditions were: 25yds, 25 shots each, open sights, free off-hand position, Massachusetts paper target. Possible 300 points:

| | | | |
|---|---|---|---|
| W J Gibbs.....268 | A McBean. .....256 | F Erickson.....250 | |
| J P S Burley,.....264 | John Polittes.....256 | John Martin.....249 | |
| Roy Taylor.....262 | W Frisbie... .....253 | Thos Ford ... ....249 | |
| C A Henkle.....259 | | | |

After the regular shoot a sweepstake was shot for and won by Mr. W. J. Gibbs making a score of 110 points out of possible 120.

# Trap Shooting.

All ties divided unless otherwise reported,

## FIXTURES.

If you want your shoot to be announced here send in notice like the following:

July 14-16.—Second annual tournament, under management of Wallace and Miller, P. Miller, Austin, Tex.

July 18-20.—Baltimore Gun Club, summer tournament, at Tolchester Beach, Baltimore, Md.

July 21-22.—Independent Gun Club tournament, Plainfield, N. J.

July 23.—New Jersey State Trap-Shooters' League seventh annual tournament, Claremont, N. J.

July 25.—Boston Shooting Association's tournament, under management of Capt. A. W. Gore, Wellington, Mass.

July 26 28.—Interstate Manufacturers' and Dealers' Association tournament, at Watertown, N. Y.

July 26-29.—Corry Gun Club tournament, Corry, Pa.

July 28-30.—Johnson City Gun Club tournament, Johnson City, Tenn.

July 28-30.—Springfield Gun Club tournament, Springfield, O.

July 29—Dexter Park Shooting League team contest, Dexter Park, L. I.

July —.—New Jersey Trap-Shooters' League, team contest, at Claremont, N. J.

### Pelham Heights Gun Club.

PELHAMVILLE, July 6.—The Pelham Heights Gun Club held a private sweepstake shoot on Wednesday at 25 bluerocks under American Association rules. S. C. Barnum was the winner. The score:

| | |
|---|---|
| S C Barnum..... | 1111011101111011101101010—18 |
| Dr J Hutchinson..... | 1100110101101010111101010—16 |

|---|---|
| Dr Hutchinson.... | 1011101101111—9 |
| S C Barnum..... | 00.0100000010—3 |

## DRIVERS AND TWISTERS.

John Parker, the ever popular "Jack," of Detroit, writes us that everything is booming for the International shoot, to take place at Des-Chree-Snos-Ka Island on August 23 to 26.

* * *

And, by the way, "Jack" has been conjuring his brain for many days to devise some equitable handicap for target events; a handicap which will serve to protect the medium shot without putting a sure-losing penalty on the man who has superior skill. He has at last worked out a scheme which is so well thought of in Michigan as to be adopted for use at the semi-monthly shoots of the Michigan Trap Shooters' League.

* * *

The handicap embodies a combination of the Interstate and North systems, and is thus described: In event No. 1 everybody shoots from known traps and angles. All who win or tie for first money are obliged in the succeeding event to shoot as experts from traps Nos. 1, 2 and 3, unknown traps and angles; those who win or tie for second money shoot in the succeeding event as semi-experts, from known traps and unknown angles; all others shoot from known traps at known angles. By using traps 1, 2 and 3 for experts the shooter is not out-gunned. This system was given a trial at Lansing, Mich., and suited everybody. This seems to be an equitable handicap, and we can see no reason why it should not become generally popular.

* * *

Once more we will say for the benefit of our readers that we have no space for publication of personal complaints concerning arms and ammunition. We do not believe that the experience of one or a dozen men is sufficient to properly demonstrate the fact that the product of a firm is defective. Because one man buys a "Jones" gun which bursts at the first fire it does not necessarily follow that all the product of the "Jones" factory is defective. A liberal-minded sportsman would refer to the "Jones" firm rather than to the public press. Again, if a man wishes to know why his shoulder was bruised by a charge of "Squedunk" powder he would be more likely to get the information from "Squedunk & Co." than from the editor of a paper.

* * *

A new gun club has been started by some of the hill sportsmen, Spokane, Wash., under the name of the Cliff Park Gun Club. Jos. H. Spear has been chosen president and Mr. D. S Cowgill secretary and treasurer. The club intend to fit up their grounds on top of the cliff, the use of which has kindly been offered by Mr. Dillman. They will put in the latest improved traps, which have been ordered for them by Messrs. Ware Bros. from the East. They will hold a regular shoot once a week, the day not having been fully decided upon, but the club will allow no Sunday shooting.

* * *

The Baltimore Gun Club members who are training to uphold their reputation in the tournament which will be shot at Tolchester, July 18, 19 and 20, had a $2 entrance pool at Acton's Park on July 7 with the following result: At 40 keystone targets Buffington broke 33, Dr. Smith 39, Greener 39, Malone 39, Hartner 40, Cantler 38, Price 30, Snip 28, Grey 37, Edwards 33, Johnson 28, Gilpatrick 36, and Nixton 23 Hartner, recording secretary of the club, won first money; second money was divided between Dr. Smith, Malone and Greener.

* * *

At the annual meeting of the Inglewood (Mass.) Fish and Game Corporation, the treasurer reported no liabilities. The assets include cash, eight buildings, furnishings, boats, rights, privileges and about twenty years' lease. The directors elected for the ensuing year are: Andrew S. March, President; Henry P. Brigham, Vice-President; Samuel Shaw, Fred E. Whiting, Leroy S. Brown, Henry E. Cobb, C. A. Hopkins, E. Noyes Whitcomb and Joshua Knight. Henry O. Cutter was elected treasurer.

* * *

The sporting men of Waukesha, Wis., have perfected the permanent organization of the Waukesha Gun Club. The new organization starts out with thirty two members. It is the intention to hold bi-monthly trap-shooting contests the first Friday and second Saturday of each month. Officers were elected as follows: President, John C. Land; Vice-President, R. S. Greengro; Secretary, Adolph Estberg; Treasurer, William A. Gault; Captain, George Anderson.

* * *

The members of the Santa Fe (N. M.) Gun Club held a shoot yesterday afternoon, north of the Santa Fe elevator. Clay pigeons were used at a distance of 18yds. Following is the score out of a possible twenty-five: Peach 18, Myer 16, F. A. Foster 18, Babcock 10, J. P. Foster 20, Spien 14, Gumly 14, Thompson 16, Sweeney 18, Crube 15, Tolly 14, Eagan 17, Logan 18, Heffustay 15, Furman 17.

* * *

The seventh contest for the prizes of the New Jersey Trap Shooting League will take place at Claremont, N. J., on Saturday, July 23, under the auspices of the New Jersey Shooting Club. The traps will be in position at 8:30 A. M., and the team shoot will be started at 2 P. M. The facilities at these grounds are unsurpassed and a big turnout is looked for.

* * *

At the annual meeting of the Watertown Gun Club, July 7, the following officers were elected for the ensuing year: Pres., O. M. Paddock; Vice-Pres., A. F. O'Connor; Sec'y, J. C. Ayers; Treas. and Team Capt, W. H. Tallett. The club is in a prosperous condition, and is making active preparations for the coming tournament, July 26, 27 and 28.

* * *

Of the younger sporting associations in Grand Rapids, Mich., the Valley City Gun Club is one of the most flourishing. It has a membership of nearly forty, and many good shooters are being developed. In a short time, as soon as a classification of members can be perfected, suitable prizes will be offered for the best scores in each class.

* * *

Considering the fact that the various gun clubs throughout the country depend upon the trap journals for free advertising for their tournaments it would be no more than just for them to reciprocate by furnishing the said papers with the scores. At the Atlantic City shoot the newspaper men were obliged to sit down and copy every score.

* * *

Henry Matz, of the Reading Shooting Association, which will engineer the annual tournament of the Pennsylvania State Association, August 9 to 12, says the shoot will be the best on record. Every member of the Reading Association is an active worker, and as they are all pulling harmoniously together, success is sure to be their portion.

* * *

The fourth annual interstate tournament of Mississippi gun clubs will be held at West Point, Miss., Aug. 9-12. Four days sport will be provided. On the last day the championship of the South will be decided in a race of 50 bluerocks. In addition to the sweepstake $100 in gold and several medals will be added by the management.

* * *

The following scores were made at the shoot of the Baltimore Gun Club at Tolchester on July 2, 10 Keystone targets: Caulter, 7, 10, 10, 10, 9; Meyers, 8, 6, 5, 7, 7, 2; Kelly, 6, 0, 6, 5, 5, 6, 5; Franklin, 10, 8, 9, 9, 10, 7; Coe, 5, 6, 8, 8, 5, 5; Smith, 8, 10, 9, 8, 9, 5; Lindey, 8, 10, 9, 7, 7, 10; Hall, 7, 9, 8, 8, 10, 8; Clark, 8, 0, 0, 0, 0.

* * *

The Androscoggin Gun Club of Auburn and Lewiston, Me., entertained the Bath and Lisbon gun clubs on the Fourth. A friendly Boston target shoot was indulged in on the club grounds, but there was no regular match. The regular shoots of the Androscoggin Gun Club occur every Thursday afternoon.

* * *

R. H. Breintnall was unable to get to Atlantic City on account of having to march his regiment in the Centennial parade at Paterson, N. J. If Col. E. A. Campbell is elected Brigadier-General of the First Brigade N. G. N. J., Lieut.-Col. Breintnall will be promoted to the colonelcy of the First Regiment.

* * *

As Charles Burbidge failed to appear to shoot along with Allen Willey against Messrs. Savage and Bates at Willimantic, Conn., on July 1, FOREST AND STREAM stands ready to pay over the forfeit to Messrs. Savage and Bates unless good reason is shown for their not doing so.

* * *

C. F. Barnes, of Wheeling, W. Va., is out with the following broad challenge: "I challenge all comers to a 100-bird shooting match, gun below elbow until bird is on the wing. I will lay odds of two to one and shoot a match of 100 birds, 50 from right shoulder and 50 from left shoulder.

* * *

The Island City Gun Club, of Wheeling, W. Va., has a team which should hold its own with any five men in the country. Its score of 115, made at Atlantic City, ties the score made by the team of the Independents, of Plainfield, at a recent shoot of the New Jersey League.

* * *

H. Balsir and E. H. Garrison are matched to shoot against C. Furgueson, Jr., and G. G. Morris, of the Atlantic Rod and Gun Club at 50 live birds each, 28 and 30yds. rise, for $200. The match will be shot on the Atlantic club's grounds at Coney Island, when Garrison names a date.

* * *

The official organ of the New Jersey Trap-Shooters' League failed to publish a line anent the League shoot at Plainfield on June 30.

* * *

FOREST AND STREAM, however, gave a full account of the shoot.

* * *

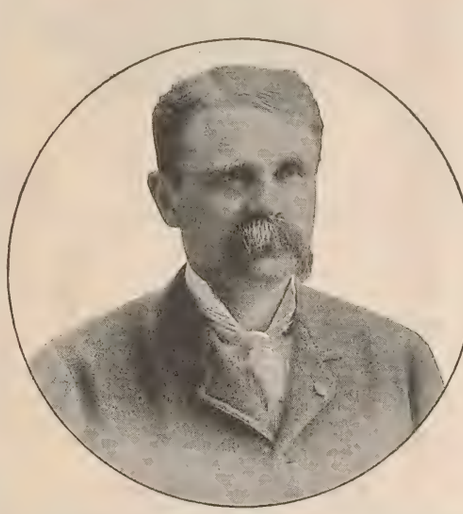
The Sipe & Sigler cup shoot was held at the grounds of the Cleveland Gun Club, July 2. The number of birds killed by Crockett and Brett was 28 each, but a handicap of one bird each was given, leaving the score tied at 29. The cup was won by Crockett in the shoot-off.

* * *

The Young Men's Gun Club, of Parkersburg, West Virginia, has elected the following officers: President, J. H. Dils; Vice-President, Conrad Goetz; Secretary and Treasurer, G. M. Cover; Field Captain, H. H. McVey. The club has blossomed out finely this season.

* * *

The Brunswick Gun Club, of New Brunswick, N. J., thinks of locating a fish and game preserve in Pennsylvania. The club has an offer of a most desirable tract, which a committee of members will be delegated to inspect at an early date.



* * *

Fulton, Ill. has organized a gun club and has sent out a challenge for a match for the championship of amateur clubs of the State. The Spring Valley (Bureau county) Gun Club has accepted the challenge for a purse of $25 to $50.

* * *

George S. Atwater, a popular member of the Boiling Springs Fish and Game Club, has met with a sad loss in the death of his seven months' old daughter, Mabel, which occurred at Massilon, Ohio, on July 1.

* * *

R. B. ORGAN,

President Illinois State Sportsmen's Association. 1892-93.

All trains on the South Branch of the Central Railroad of New Jersey will stop at the shooting grounds during the tournament at Flemington, N. J., on July 26 and 27.

* * *

Johnson City, Tenn., will be the Mecca for trap shooters on July 26 to 30. This should be one of the biggest shoots of the season judging from the fine programme.

* * *

The East End Gun Club, of Houston, Ill., has been organized with J. W. Smith as President; Robert Jankes, Vice-President; W. H. Roberts, Treasurer; L. C. Palmer, Secretary.

* * *

The old grounds of the Jersey City Heights Gun Club at Marion, N. J., will soon be converted to other uses. The coming live-bird season will probably be the wind up there.

* * *

"Court" will soon be in the vicinity of the metropolis worrying the gun trade. And he will be accorded a rousing welcome in sporting as well as business circles.

* * *

Harry Thurman will hold a two days' tournament open to all and no handicaps, on the Pier at Atlantic City some time during the early part of September.

* * *

"Dutchy" and "Tee Kay" are up to their eyes in business booming the shoot of the Independent Gun Club, to be held at Plainfield, N. J., July 21 and 22.

* * *

Shooters all over the Eastern section of the country agree with us in saying that gun clubs should discontinue live bird matches from June 1 to Oct. 1.

* * *

At the shoot of the New Jersey League on July 23, targets will be charged for at the uniform rate of two cents each. This should help fill the events.

* * *

The Baltimore Gun Club has put out an attractive programme for its summer tournament to be held at Tolchester Beach, Md., July 18 to 20.

* * *

Frank Class has organized a gun club at Morristown, N. J. The club will hold weekly shoots at the Morristown Driving Park.

* * *

Invitations have been received for the fourth annual tournament of the West Point (Miss.) Gun Club, to take place Aug. 9 to 12.

* * *

The Michigan State League has adopted the bluerock targets, expert trap, Paul North's electric pull and the Parker handicap.

* * *

The annual tournament of the Corry (Pa.) Gun Club will be held on July 26 to 29, and a big programme is announced.

* * *

The Harrisburg and Williamsport, Pa., and Staunton, Va., contingents failed to materialize at Atlantic City.

* * *

Paul North, the "ruddy faced chap" from Cleveland, O., will be chief hustler during the Johnson City shoot.

* * *

The Rod and Gun Club of Steubenville, Ohio, spent a week camping out at Toronto after the Fourth.

* * *

East Liverpool, O., has a new gun club, which will hold weekly shoots on the East End race track.

* * *

The Bucyrus (Ohio) Gun Club will give a big tournament Thursday, July 28, at live birds and targets.

The Wawaset Gun Club, of Wilmington, Del., will engineer an excursion to Augustine Pier on July 21.

* * *

Twenty members of the Knoxville Gun Club have signed an agreement to attend the tournament at Johnson City, Tenn.

* * *

The Parkway Rod and Gun Club will hold a shoot and picnic, open to all, at Miller's Dexter Park on Aug. 28.

* * *

"Picus" will be one of the prime workers during the Baltimore Gun Club shoot.

* * *

Tredway's new recoil block caught the fancy of the shooters at Atlantic City.

* * *

Joe Hunter says he will go to Johnson City if he has to walk.

* * *

The monthly shoot of the Essex Gun Club will be held at Marion on July 22.

* * *

Newport, Ark., has a new gun club.

C. H. TOWNSEND.

### The Illinois Rule.

CHICAGO, Ill., July 9.—In the FOREST AND STREAM report of the Illinois State shoot there was comment upon the absurd rule adopted in the convention, which rule placed all gauges at the same score, without any handicap whatever. Dr. N. Rowe, editor of the *American Field*, was the mover for this rule, as was duly shown. In the issue of the *American Field* for July 2 the said gentleman editor replies in said paper to the aforesaid comment. There is no doubt as to the identity of the writer of the reply. No member of the *American Field* staff can imitate that fine Italian English, strive he never so diligently. To establish this point I need only quote the opening sentence: "The adoption of the rule at the convention of the Illinois State Sportsmen's Association, placing 10 and 12-gauge guns at the same distance, brought forth the remark on the following day, from a gentleman who was very much excited over it, that it had put the question of ten and twelve gauges back twenty years, a statement which could have been made only through not considering the circumstances."

A glance at this opening sentence establishes also further facts. The reply of the editor of the *American Field* lacks candor and a frank and cheerful manhood. It lacks logic. It lacks also a tenor even with the actual facts of this case.

In the first place, the "gentleman who was very much excited over it" is purely hypothetical. He is identical with "the friend I met at the Palmer House." He is a dummy. This "gentleman" means really "the FOREST AND STREAM report." For "back twenty years," read "one hundred years behind the times." There you have it. It was the FOREST AND STREAM report that the editor felt constrained to try to answer, not a dummy gentleman. The candid, frank and manly thing to do would have been to say so, directly and plainly. It was lack of frank and manly candor, and a surplus of concealed but purely selfish motives, which induced this gentleman and editor to move for the adoption of this rule. That got him into trouble. A further exercise of the same lamentable weakness will never get him out.

In the next place the reply is illogical. When the gentleman uses the expression "placing 10 and 12 gauges at the same distance" he is guilty of the logical fallacy known as "begging the question." I cannot speak as to the early educational advantages of the editor of the *American Field*, and perhaps he does not know what begging the question means. If he did, certainly he would not commit so ruinous a fallacy in the first sentence of an explanation meant to get him out of a serious difficulty. If he did not, he should take better thought. Certainly he knows or should know, and certainly all his readers know, or will know that this was not the question of "placing 10 or 12 gauges at the same distance," but of placing 10s, 12s, 16s 20s, all at the same distance. In short, it is the question of abolishing all handicap in pigeon shooting, for guns above 10 gauge are not to be used. The editor stuck to the 10s and 12s because he thought that would be the best sort of sophistry. Any sort of sophistry is bad, is ruinous, is self-condemning when the facts are shown. The editor of the *American Field* may fool himself, either through ignorance or intention, but he cannot fool the shooters of America nor of Illinois. They will see clearly through a misfit explanation intended to cover up a position taken for purely selfish and money-seeking reasons.

To evade the real issue in a case, to adopt a special pleading, to shift from post to post and not courageously stand and meet the statements of the original bill of declarations—all this may avail a lawyer or an editor who seeks only to save time and trusts to Providence to save his case; but they do not win a case, and they do not incite admiration or respect. Any explanation of an assumed position, no matter how unfortunate that position may be, must have a tenor even with the actual facts of the case. It will not do to say, "I have four potatoes and four turnips, therefore I have eight oranges." The people will not believe it. They will detect the lack of logic at once, and suspect that the mover of the proposition has neither turnips nor potatoes for the market.

To say so much is to cover the whole of the article in question. It is not candid; it is not logical; it is distant from the actual facts. I cannot find it in my heart to respect demagoguery which seeks to justify demagoguery, and which insults so noble a body of sportsmen as the Illinois Association with such remarks as, "The Illinois Association's rules are not national." . . . "The rule and its effect are purely local." What sort of pleading is it to belittle a body of sportsmen actually the first in all the land, unless we shall except the older organization of New York? No rules, neither those devised by any sportsmen's organization nor by any body of men are national, or can be national, for reasons that are obvious. But this great Illinois Association is national in its importance, and from it the shooters of this Nation have a right to expect and to demand wise and well-considered action, and not a cheap effort to gain a few subscribers for a newspaper. It will not take the Illinois Association long, when it sees it is being worked in so open-faced a manner, to show that it is national enough to change this "purely local rule," and to change it before all the world has had time to laugh at it.

To excuse this 10-gauge doctrine, as does the able editor of the *American Field*, on the ground that it is purely local in application, is not only slighting to the Illinois Association, but is of itself hopelessly illogical and absurd. No rules can be national, but in shooting matters there are certain principles, which, if established as true, must be national in their application. If a 10-gauge gun is no better shooter than a 12 here in Illinois, the same gun is no better than a 12 in New York. If 10s and 12s should theoretically stand at the same score in Chicago, they should theoretically stand at the same score in New York. If this proposition is wrong in New York, it is wrong in Illinois, if both States are equally alive to progress. Therefore it is no defense of the doctrine to call it purely local. That is inconsistent and absurd. The able editor's syllogism has a hole in it.

In logic this hole is called a faulty middle. A homely illustration in point of this is that of the ancient sow which sought to crawl through a hollow log which led into a turnip patch. The log was hollow, but also crooked, and both ends came out on the same side of the fence. The animal went through the log several times, but to its intense surprise remained always outside the field. To this day it does not understand why it could not get in to the turnips. The defense of this rule on the "purely local" basis is simply the act of going through the hollow log and coming out on the same side of the fence. This simile is further singularly fit. The editor of the *American Field* was after suffrages when he went into the log, and he is after them now he is out. But he will never get them until he finds a straighter log.

Not content with the weak "purely local" plea, and not content with evading the comparison between the 10-gauge and the 16-gauge, which is quite as legitimate as that between the 10 and the 12, the writer of this unique defense attempts to prove the practical equality of the 10 and the 12-gauges. He says:

"The only advantage the 10-gauge has over the 12 is a larger killing surface, but this is more than counterbalanced by the greater facility with which the 12-gauge can be handled and thrown on to a fast bird, and so make it an easy bird before it gets to be a hard one."

This proposition is much as if one should say, "Things not equal to the same thing are equal to each other." There is no hard and fast method of comparing the execution of 10 or 12-gauges, because the physical qualities of the shooters handling them are not available as factors. As a general thing 10-gauges are handled by powerful men, to whom their weight is no more than that of a 12-gauge is to a man of less physical strength. I know a very earnest 10-bore man who claims that he does not "fire steady" at the score with a gun lighter than his old 10-gauge. The matter of quickness in getting on is also variable. The quickest man I ever saw at the trap shot a 10-gauge. Now he has changed to a 12-

gauge, but he does not get his birds any closer to the trap. Nowadays, even with the gun-below-the-shoulder rule, the gun is practically at the shoulder when the trap is sprung, and the 10-gauge man gets on practically as quick as the 12. A study of the June tournament would go far toward showing this, physical differences of shooters duly considered.

I fear the able editor at bar is remembering the old days of gun-below-the-elbow-shooting, when he was so ardent a 12-bore man. A greater difference in the quickness of handling the two arms existed then, and a less need of handicap. To-day there is less difference in quickness in getting on, and therefore a greater need of handicap. Yet what does our able editor do? Instead of recognizing this fact, which cannot be avoided, he reverses the actual case for purely selfish and politic reasons, bars all handicap just when a handicap is actually needed, goes back a hundred years into the past, gets himself into an absurd position in trying to cover all his different policies, and then seeks absolution through an explanation whose absurdity will attract more pity than the original mistake, which might have been excused by the frank avowal, "Gentlemen, I want popularity with you all, 10s, 12s and every body else, and I will forego thought, progress, record, or anything else for that immediate purpose."

The closing sentences of this remarkable editorial utterance are as follows:

"Therefore, the quick shot has been developed, and the majority of birds are killed within 40yds.

"To do this and meet the changed conditions at the trap, the gun must be handled quickly, and the light 12-gauge is the gun only with which it can be done. It can, therefore, be seen that the man with the 10-gauge gun is handicapped, for he cannot possibly cover a bird as quickly as his equal in skill can with the 12-gauge; and it would be the rankest rot for any one to claim that at 40yds. the 12-gauge will not kill any bird that the 10-gauge will kill."

So we are informed that the "light 12-gauge is the gun only ["only gun" was probably meant] with which this can be done." Really, the 10-gauge men will feel their toes stepped upon, will they not? The able handler of two policies should be more careful with his feet. And how about the 16-gauges? Are they not a "gun only" also with which this can be done? Is not a 16-gauge as easily handled as a 12-gauge? If it can "be seen that the man with the 10-gauge gun is handicapped," should not the man with the 12-gauge gun be penalized? And if the man with the 12-gauge gun should be penalized, should not he with the 16-gauge be penalized still more? In short, should not the 16-bore stand at 32yds., the 12 at 36yds. and the 10 at 25yds.? These are some of the plain and logical conclusions to which so absurd a system of reasoning must bring us. The whole labored article reduces itself to an absurdity.

Therefore it proves nothing.

With one statement of the article in question I can not forbear asking space to file a specific exception. It quotes itself as follows: "The battle of the bores has passed into history, and has not to be fought now. It lasted many years, and ended in a victory for the 12-gauge gun."

I do not conceive that there has been any battle of the bores, or that there has been any "victory for the 12-gauge gun." I do not conceive that there has been any victory for any gauge, although the 12-gauge is the practical standard of to-day. I conceive that there has been a battle over the question of a handicap between different gauges, and that the necessity for such a handicap has been accepted all over the world, long ago. It is ridiculous to fight that fight over again. It is

ONE HUNDRED YEARS BEHIND THE TIMES.

It is ridiculous for any man, especially one who would pose as an authority, to gratuitously suppose that this fight has not been fought, when all the world knows better. Indeed, it is almost waste of time, almost threshing of old straw, to go over this reply in seriousness. It is dignifying the question too much. The principle of handicap is all of it that should be recognized. I have no right to say that one gauge is better than another. I believe a man has a right to shoot a 10-gauge if he likes, or a 12 or a 16. Destroy personal preference and you destroy sport. But destroy handicap and you destroy sport with equal and with speedier fatalness. It is a principle as old as the Mexican plains, as the Arabian deserts, as the Roman hills. It is recognized perforce in every form of sport, for the principle of fair play is only another form of the principle of handicap. Every shooter in America and every shooter in the "purely local" organization of the Illinois State Sportsmen's Association must on thought admit it. It is a principle that cannot be explained away even by a writer who is careful and logical, far less by one who is unguarded, uncandid and illogical. It is the purblind abandonment of so well-established a principle which makes deplorable this action of the Association at this most momentous time. It is not in any sense a contest of the 12-gauge against the 10.

The facts in regard to the adoption of this rule seem to be as follows: There was great discussion at the convention and the 10-gauge men, irate in advance at a merely supposed attempt of the committee to force a heavy handicap upon them—an attempt never really made, for a compromise, naming the old handicap, was offered during the discussion—was and is more indignant than the talk advanced. An ardent believer in the 12-gauge arose and said that he thought a man who shot a 10-gauge handicapped himself—a statement which is both true and untrue, since it cannot be made general in its application, the individual man not being a constant factor. Quick as a flash, upon hearing this statement, an inspiration came to the mover for this remarkable rule and writer of this remarkable article in its defense. It was a strong 10-gauge crowd. Ten-gauge dollars were good. It would be a great stroke to make capital with—the 10-gauge men also. The no-handicap scheme would do it! Enough. The motion was made. No handicap whatever, gentlemen, that ought to be fair for all. The members, such as were left present, for it was now late, were tired, disgusted, ready for anything. No handicap, gentlemen, that ought to be fair for all. The weary disputants did not detect the sophistry. With a whoop the motion carried. There was no wisdom in its making, there was no deliberation in its acceptance.

What men do in their haste they undo at their leisure.

E. HOUGH.

## Towanda Gun Club Shoot.

TOWANDA, Pa., July 9.—An ideal afternoon for trap shooting was July 4 on the grounds of the Towanda Gun Club, and a number of would be target smashers came to take advantage of it. W. K. Park of Wilkesbarre, Pa., representing the Wilkesbarre Gun Co., was as usual one of the first to appear on the scene loaded to "break em all." Look at the scores and see how he did it. Joe Adams of Waverly, N. Y., came down but as he neglected to bring his reliable Scott gun could make no straights. McCormick of Ithaca, N. Y., who is a steady shot came to the front in fine form. Dr. Keyes of Williwanna, Pa., always attends our tournaments, but complained of making an unusual number of "gooseeggs." In fact the shooting was rather difficult for all. Among other shooters from out of town were: Chas. Armstrong of Arnot, Pa.; Joe Parrott of Scranton, Pa; Wm. Tyrell of Orwell, Pa.; Hamaker, F. Welles and N. Welles of Wyalusing, Pa.; Griffith of Foot-of-Plane, Pa.; James Emery of Evergreen, Pa. (Proprietor Evergreen Kennels); Montanye, Snider, Brown and Dittrich represented the home club. The shooting was from two bluerock and one Keystone trap, rapid firing system, birds thrown hard and varying somewhat in flight owing to trappers having trouble in setting traps. Sweeps were 50 and 75 cents entrance, 10 single targets each except last two. Score as follows:

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Armstrong | 4 | 6 | 6 | 6 | 7 | 6 | .. | .. | .. | .. | .. |
| Snyder | 6 | 5 | 6 | 7 | 9 | 5 | 10 | 8 | 7 | 8 | 10 |
| Purrell | 4 | 5 | 6 | 7 | .. | .. | .. | .. | .. | .. | .. |
| Parrott | 5 | 5 | 4 | 7 | 2 | 4 | 3 | .. | 7 | 5 | 7 |
| Montanye | 10 | 7 | 9 | 7 | 8 | 9 | 8 | 8 | 8 | 9 | 9 |
| McCormick | 8 | 7 | 5 | 7 | 8 | 8 | 7 | 9 | .. | .. | .. |
| Adams | 5 | 5 | 7 | 5 | 7 | 5 | 8 | 6 | .. | .. | .. |
| Park | 5 | 7 | 6 | 6 | 8 | 8 | 7 | 7 | 8 | 8 | .. |
| Dimock | 2 | .. | 2 | .. | .. | .. | .. | .. | .. | .. | .. |
| Keyes | 3 | 7 | 5 | 7 | 6 | 8 | 9 | 4 | 7 | 7 | 5 |
| Brown | 4 | 4 | 4 | .. | .. | .. | .. | .. | .. | .. | .. |
| F Welles | .. | .. | .. | 5 | 5 | 4 | .. | 5 | .. | 8 | 6 |
| Hamaker | .. | 3 | 4 | 4 | 1 | .. | 5 | 8 | 6 | 5 | .. |
| J Emery | .. | .. | .. | 5 | .. | .. | .. | .. | .. | .. | .. |
| N Welles | .. | .. | .. | 4 | 6 | 7 | 4 | 8 | 9 | .. | .. |
| Dittrich | .. | .. | .. | .. | 5 | 7 | .. | 7 | 7 | 7 | 8 |
| Griffith | .. | .. | .. | .. | .. | 6 | .. | .. | 4 | .. | 3 |
| Turner | .. | .. | .. | .. | .. | .. | .. | .. | 5 | .. | 7 |
| Shiner | .. | .. | .. | .. | .. | .. | .. | .. | 6 | .. | .. |

Match 12, 3 doubles:

| | | | |
|---|---|---|---|
| Montanye | 10 10 10—3 | Snyder | 10 10 11—4 |
| Keyes | 11 00 11—4 | Dittrich | 00 11 00—2 |
| Hamaker | 10 10 11—4 | Parks | 10 00 00—1 |
| F Welles | 10 11 10—4 | N Welles | 00 10 11—3 |

Match 13, 4 singles and 3 doubles:

| | | | |
|---|---|---|---|
| Keyes | 1000 11 00 10—4 | Snyder | 1101 10 10 10—6 |
| Dittrich | 1111 00 10 10—6 | Parrott | 0000 10 10 10—3 |
| Hamaker | 1001 10 10 10—5 | Turner | 10 11 00—3 |

W. F. DITTRICH, Sec'y.

## The Fountain Gun Club.

WOODLAWN PARK, Gravesend, L. I., July 6.—The majority of the members of the Fountain Gun Club did some good shooting for the annual prizes, the best seven averages of the season to count. R. Phister, Jr., the winner of the Gleamore diamond badge, killed all his birds in good shape. Dr. Shields also shot well, killing 46 out of 49 shot at during the afternoon. The weather was delightful for shooting and the birds a very good lot of flyers. The sweepstake contests were all well contested, Dr. Shields, C. W. Wingert and W. Lair getting the most of the boodle. The scores:

Regular club shoot for best averages for annual prizes:

| | | | |
|---|---|---|---|
| H McLaughlin | 1121200121—8 | Dr Shields | 1012011211—8 |
| C W Wingert | 1101212112—9 | J E Lake | 1121111021—9 |
| W Schumacher | 0120120112—8 | R Phister, Jr | 2212212112—10 |
| H W Blattmacher | 0111111131—9 | | |

Sweepstake shoot, $1 entrance, 3 moneys, 5 birds, 25yds. rise, classified:

| | | | |
|---|---|---|---|
| Dr Shields | 11101—4 | W Lair | 11221—5 |
| W Schumacher | 20121—4 | Dr Van Zile | 21221—5 |
| R Phister, Jr | 12112—5 | H W Blattmacher | 02022—4 |
| J E Lake | 11101—4 | C W Wingert | 11111—5 |
| H McLaughlin | 11212—5 | | |

Phister, Jr., Lair and Wingert div. first, Dr. Shields second, Blattmacher third.

Sweepstake, same conditions:

| | | | |
|---|---|---|---|
| Dr Shields | 12121—5 | W Lair | 10220—3 |
| W Schumacher | 10211—4 | Dr Van Zile | 10112—4 |
| J E Lake | 10112—4 | H W Blattmacher | 01111—4 |
| M McLaughlin | 11201—4 | C W Wingert | 12111—5 |

Dr. Shields and Wingert div. first, Phister, Jr. second, Lair third.

Sweepstake, same conditions:

| | | | |
|---|---|---|---|
| Dr Shields | 11111—5 | W Lair | 11021—4 |
| W Schumacher | 11220—4 | Dr Van Zile | 22211—5 |
| Dr Little | 02110—3 | H W Blattmacher | 01101—3 |
| J E Lake | 11120—4 | C W Wingert | 11011—4 |
| H McLaughlin | 10012—3 | | |

Dr. Shields first, Wingert second, McLaughlin and Blattmacher div. third. Referee, H. McLaughlin; scorer, C. A. Dellar.

## Wauregan Gun Club.

PELHAMVILLE, July 4.—The Wauregan Gun Club having secured new grounds at Pelhamville, N. Y., had a good day's sport on the Fourth in sweepstake and match shooting. They started early in the morning and kept the fun up until dark. The birds were a good lot and a considerable number got away, especially during the latter part of the day. The scores:

Live birds, Hurlingham rules, $3 and birds:

| | | | |
|---|---|---|---|
| W H Brickner | 0101—2 | 110—2 | G Silberhorn | 20212—4 | 000—0 |
|---|---|---|---|---|---|

Sweepstake shoots, first $3 and birds; second $3, 2 moneys; third $2, 1 money:

| | No. 1. | No. 2. | No. 3 |
|---|---|---|---|
| G Silberhorn | 10200—2 | 00010—1 | .. .. |
| J Mills | 10100—3 | .. .. | .. .. |

| L Miner | 0 | 22211 | 0 | 0 | 22 |
| E Valentine | 0 | .. | .. | .. | .. |
| J Mills | .. | 12110 | .. | 0 | .. |
| M F Brickner | .. | .. | 2 | .. | .. |
| George | .. | .. | .. | .. | 10 |

Sweepstakes, miss and out:

| | No. 9. | No. 10. | No. 11. | No. 12. |
|---|---|---|---|---|
| J Loonie | 1110 | 00 | 0 | 01111 |
| W H Brickner | 11220 | .. | .. | .. |
| L Miner | 110 | 00 | 100 | 00012 |
| P Brennan | 0 | .. | .. | .. |
| J Tiernan | 21222 | 02 | 102 | 10021 |

Sweepstake, 3 birds, ties shot off: L. Miner 2, J. J. Loonie 3, W. H. Brickner 3, G. Gilbert 3. Brickner won tie.

## The Hollywood Shooters.

THE Independence Club had its third shoot of the season at Hollywood on July 8. It attracted a brilliant galaxy of Long Branch fashion and a score of crack marksmen. The conditions were 15 birds, entrance $20, 70 per cent. of the total amount to go to the winner, and 30 per cent. to the second man. The match resulted in a tie for first place between E. G. Murphy and J. S. Williams, both of New York, each killing 14 birds out of 15. Instead of shooting the tie off they decided to divide the prize money equally. Fred Hoey and C. Dolan each killed 13 birds. The scores:

| | |
|---|---|
| E G Murphy (30yds.) | 102222221222222—14 |
| J S Williams (30yds) | 211122202221212—14 |
| Fred Hoey (3yd.) | 212222222202220—13 |
| Clarence Dolan (28yds) | 212122022132201—13 |
| W W Leonard (22yds) | 122100222210221—12 |
| W Wilson (28yds) | 000w. |
| Capt Money (30yds) | 100w. |
| Gould Hoyt (20yds) | 222220212101w. |
| B R Kittredge (22yds) | 0110w. |

There was a second match, free for all, for the Moet and Chandon prize. Conditions, 5 birds at 30yds. rise, the prize for the winner being three cases of champagne, presented by George K. Kessler. There were fifteen entries. Capt Money, Fred Hoey, J. S. Williams and W. P. Thompson were tied for first place with a record of 5 straight for each. Capt. Money won on the shoot off with a score of 11 birds straight. John S. Hoey was referee.

## The Acme Gun Club.

DEXTER PARK, L. I., July 5.—The members of the Acme Gun Club held their monthly competition for the annual prizes to-day, the best average of the two shoots to count. The attendance was small and the shooting was not up to their usual average. The score:

First club shoot, 5 live birds, H. & T. traps:

| | | | |
|---|---|---|---|
| H Lemaire | 11101—4 | C Horney | 11011—4 |
| T Short | 11111—5 | J Link | 11111—5 |
| F Rausch | 11111—5 | C Dethloff | 00111—3 |
| C Munk | 11001—3 | | |

Club shoot at 20 targets, annual prizes, 18yds.:

| | | | |
|---|---|---|---|
| C Stuetzle | 10100001000001100110—7 | LeMaire | 10011010110000110000—8 |
| J Link | 01006000111001100110—11 | C Horney | 01000000001111100000—4 |
| C Dethloff | 11100101001000100001—8 | H Reach | 00000000000000000000—0 |
| C Munk | 00100100000010100000—4 | Lyon | 10-10111111111100011—15 |
| T Short | 00111011110000110101—11 | Monroe | 00000010010000010000—3 |
| F Rausch | 10111011110010000100—10 | | |

Sweepstakes, 6 targets each:

| | 1 | 2 | 3 | 4 | | 1 | 2 | 3 | 4 |
|---|---|---|---|---|---|---|---|---|---|
| C Dethloff | 2 | 2 | 3 | 2 | C Stuetzle | 2 | 3 | 5 | 2 |
| S Lyons | 3 | 4 | 4 | 5 | C Monk | 1 | .. | .. | .. |
| J Link | 2 | 2 | 1 | .. | F Short | 3 | 3 | 5 | .. |
| F Rausch | 4 | 1 | 3 | 5 | C Horney | .. | .. | 2 | 3 |

In the first sweep Link won third money on the shoot-off. In No. 2 Short won second; in No. 3 Short won first; in No. 4 Lyons won first.

## New Utrecht Gun Club.

WOODLAWN PARK, L. I., July 9.—The weekly shoot of the New Utrecht Gun Club at 20 keystone targets each resulted in D. Bennett winning the gold medal and D. Deacon and C. A. Sykes tied with 13 each. Bennett being allowed a handicap of one bird, took the first, the other two shot off for second. The score:

Twenty clay birds, 20yds. rise, 3 trap.:

| | | | |
|---|---|---|---|
| W Sykes | 01001010100001110100—8 | J Adams | 00010101101000000001—5 |
| Deacon | 11110001011101110—13 | Nostrand | 10101100100 0101100—10 |
| *A Adams | 01010110101110101011—11 | Bennett | 10010010111101111110—14 |
| *Forman | 00100001100101011001—7 | C Sykes | 11100100101111010—13 |
| P Adams | 00001001010.0 1010.0— 7 | | |

Ties for second place, Deacon and C. A. Sykes.
*Not members.

## A New Forest and Stream Club.

MARYSVILLE, Wash., June 30.—Last Monday the Forest and Stream Rod and Gun Club of Marysville was organized with ten members. Constitution and by-laws were adopted and the following officers were elected: President, Edmund Smith; Vice-President, H. B. Myers; Secretary and Treasurer, C. H. Schaefer; Directors—C. A. Creese, F. C. Bertois and M. F. Shea. The objects of the club are recreation and the protection of fish and game. The club makes a creditable showing for a small town.

## Northwestern Shots.

TACOMA, Washington, July 4.—Seattle, Whatcom, Victoria and Tacoma were represented at the trap tournament under the auspices of the Tacoma Rifle, Rod and Gun Club. Tacoma kept up her record by carrying off the honors of the team shoot, as well as in the general averages. The prizes aggregated $500 in cash, and an additional $500 in extras donated in cash, and nearly $500 in articles contributed in prizes. The wind was quite strong, interfering slightly with the shooting. The team shoot resulted as follows, the teams following each other in the order named:

Tacoma: Morrison 6, Rist 5, Barry 8, Box 8, Mullen 9, Burnett 7; total 43.

Victoria, No. 1: Minor 7, W. H. Adams 8, J. C. Maclure 7, F. S. Maclure 8, Weiler 9, Combs 8; total 47.

Tacoma: Dodge 9, McNoughton 8, Kimball 7, Shutt 4, Northover 8, McCoy 6; total 42.

Victoria, No. 2: Beckford 8, John 4, White 3, F. Adams 7, W. Henly 7, W. A. Dier 3; total 32.

Tacoma: Smith 8, Dunham 10, Ellis 10, Eberly 9, Bringham 9, Barlow 10; total 56.

Tacoma also defeated Victoria in a team pool shoot, 106 to 93, out of 100 birds.

## Ottawa, Kansas.

OTTAWA, Kan., July 7.—There was a celebration at this place on the Fourth, appropriate to the day, and some of the prominent shooters of this county gathered together and had a pleasant shoot. For some unaccountable reason the Ottawa Club did not show up, except one member, so they do not appear in the club shoots.

Team shoot, 4 men from each club, 10 bluerocks per man: Richmond 34, Willow Springs 28, Centropolis 25

Team shoot, 4 men from each club, 6 bluerocks per man: Richmond 24, Willow Springs 23, Centropolis 14.

Team shoot, men chosen from all clubs present, 10 bluerocks per man:

| | | | |
|---|---|---|---|
| Sutton | 8 | Lock | 9 |
| Thornburg | 10 | Putnam | 9 |
| Paramore | 8 | G Anderson | 5 |
| W Anderson | 8 | Giles | 7 |
| Galt | 6—40 | Scott | 3—33 |

F. B.

## Endeavor Gun Club.

THE Endeavor Gun Club held its semi-monthly club shoot at Marion, N. J., on July 9. This is a lively organization, the members of which are divided into three classes in the prize competitions. They shoot from five traps, under the rapid-firing system. The scores, 25 bluerocks each:

| | |
|---|---|
| Mehl | 1110111011101101111101—19 |
| Hollister | 0100111010111010011111110—16 |
| Lawrence | 1110010111011111011111101—19 |
| McPeek | 1011111101111111111111001—21 |
| Fry | 1101111011100111000001001—14 |
| Straden | 1111111000001011000111111—16 |
| Dr Fletcher | 1011110011101010101000000—11 |
| Polhemus | 0000010011001010000000000—5 |
| Post | 1110000001101000000000001—7 |
| Creveling | 0111110101010010010101101—14 |

## The Manhattan Gun Club.

DEXTER PARK, L. I., July 6.—The attendance at the regular monthly shoot of the Manhattan Gun Club was very slim in the competition for the two class medals in A and B. The weather was fine and birds good, but the shooting was dull. H. Messerschmitt and D. Monsees did very well, the former winning the Class A medal. C. Lichtenberger won the second prize in that class. H. Deffar took the medal in Class B, being the only competitor. The score of club shoot:

Class A.

| | | | |
|---|---|---|---|
| H Messerschmidt | 2112111—7 | F Hoffman | 0112002—4 |
| D Monsees | 1112211—7 | H Funck | 2102001—4 |
| P Neusch | 0012010—3 | C Lichtenberger | 2012021—5 |

Tie:

| | | | |
|---|---|---|---|
| H Messerschmitt | 011 | D Monsees | 200 |

Class B.

| | |
|---|---|
| H Deffar | 1000112—4 |

Referee, Mr. D. Monsees; scorer, Mr. E. W. Dellar. Messerschmitt won Class A medal; Lichtenberger, second prize. Class B medal was won by Deffar.

## Down on the Newark Meadows.

THE members of the East Side Mutual Gun Club had some lively shooting at Wiedemeyer's Park, Newark, N. J., on July 7. The principal event was in the form of a challenge shoot between Robert Baar and Robert Schrafft in which each wagered that the other would not make a clean score in a match at 10 live birds each. Schrafft succeeded in killing his 10, while Baar was obliged to be content with 8. The artificial events were at 10 bluerock targets each, the results being as appended.

## Shooting at Pearl River.

THERE was a small attendance at the Fourth of July shoot of the Excelsior Gun Club at Pearl River, N. Y., but what was lacking in numbers was fatoned for in the enthusiasm displayed. The day was a delightful one for the sport and the presence of a fine lunch served to keep the party in a holiday humor. In the ten sweeps at 10 targets each the scores were as below:

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|---|---|---|---|---|---|---|---|---|---|
| Peterson | 7 | 6 | 7 | 6 | 5 | 8 | 7 | 7 | 6 | 8 |
| J H Blauvelt | 6 | 6 | 6 | 5 | 6 | 10 | 5 | 8 | 8 | 8 |
| De Baum | 5 | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| Taylor | 7 | 5 | 4 | 7 | 8 | 7 | 10 | 7 | 7 | 9 |
| J J Blauvelt | 6 | 3 | 7 | 5 | 8 | 6 | .. | .. | .. | .. |
| McMillan | .. | 5 | w | 6 | 4 | 5 | .. | .. | .. | .. |

## The Ridgewood Gun Club.

RIDGEWOOD PARK, L. I., July 8.—The shooting on Friday by the members of the Ridgewood Gun Club was rather poor, although the birds were a medium lot. Louis Gehring and C. Laeger tied with six each for the club's gold medal and an extra prize of $10 to be won three times in succession. Gehring could not take the medal, having previously won it three times, so Laeger was awarded it, Gehring taking the second prize. C. Nicol also killed six, but was not eligible to win it, being a new member. The score:

Regular club shoot, 25yds. rise.

| | | | |

## Boston Shooting Association.

WELLINGTON, Mass., July 9.—There was a good attendance at the weekly shoot of the Boston Shooting Association to-day, and some good scores were made in the several matches. In the merchandise match at 25 targets the following scores were made: Class A—Sanborn 22, Sanborn 22, Bradbury and Barrett 21, Perry 19, Cowee 18. Class B—Gore and Gale 22, Dill and Warren 21, Bradstreet 19, Daniels 14. Class C—Parker 13, Dobson 12. The usual sweepstake matches followed.

## Shooting at Morristown.

A NUMBER of Frank Class's friends gathered at the Morristown (N. J.) Driving Park on July 4, and as live birds were conspicuous by their absence, artificial targets were shot at. The principal event was 25 bluerocks each, $5 entry. The scores were: Timming 21, Quimby 20, Hathaway 20, Larison 19, Carlisle 19, Reilly 18, Day 16, Muchmore 16, Leak 15, Leonard 15, Shelley 15, Erni 11, Piper 10, Mann 9.

## By the Sounding Sea.

ATLANTIC CITY and the board walk are familiar to sightseers the world over, and no matter from what clime a tourist hails he has not "done" the country until he has seen them. At this season Atlantic City is especially attractive. All the hotels are running full blast; the bathing is superb; the fishing is first-class; all the amusement stands are offering special attractions; the owners of yachts are anxious to do business without taking all the wealth of the pleasure seekers; Pain's "Sardanapalus" burns regularly three times each week, and last, but not least, the fine grounds of the Atlantic City Gun Club are open every day, with traps in position, for the use of all comers, and J. Howard Brouse will be found ready to extend the right hand of welcome. Nearly every day a party drops in and spends a few hours practicing at the artificials. The club house is one of the most attractive both in point of appearance and location of any that the writer has had the privilege of visiting. It is situated on the shores of the Inlet, almost half a mile from its mouth. The building, an excellent cut of which accompanies this article, is about 22ft. square. The veranda, which extends around three sides of the house, is 10ft. wide. From this can be secured a fine view of the ocean beyond the Inlet. Directly opposite is Brigantine Shoals, on which are some attractive club houses owned by private parties. In the offing and made fast to the pier are dozens of catboats and sloops used for pleasure trips and fishing parties. All day long can these white-winged fliers be seen scurrying over the waters of the Inlet and old Mother Ocean.

Directly in front of the trap screens and distant about 100yds. is a line of piling, and beyond this can be seen the hotels above the Inlet. Adjoining the club grounds on the south is the driving, running, athletic and base ball park, and still further south the Inlet Park Amusement Company's property which comprises Pain's "Sardanapalus," Ed Travis's rifle range, merry-go-rounds and other attractions. East of this last-named place is Smith's Inlet Hotel and the Pavilion. South of the Pavilion is seen the north end of the board walk, which is 24ft. wide and three miles in length. This was erected in 1891 at a cost of $60,000. It replaced the old-time walk which was only 18ft. wide. This is "the" promenade of not only this town but of the country as well. All along the "walk" are found amusements galore. Here you find the tin-type fiends; next the Edisonian where at least a score of phonographs regale the ear with sweet strains. Then you can drop in to a Natatorium and see a number of experts display their skill in feats of daring in the water, after which you walk in and take a comfortable seat to watch the work on a dozen or more shuffle-boards, all the players being refined people who practice the sport for recreation only. The "elephant" also comes in for its share of attention. The lofty lighthouse on Absecom Shoals, for which the reflecting glasses cost Uncle Sammy $8,000, is in full view from all parts of the town, and at night its rays can be seen twenty miles away.

The above and a thousand and one other attractions, however, were not alone what took the writer and a large number of shooters to the famous watering place and kept them there for four days last week. The premier attraction was the second annual tournament of the Atlantic City Gun Club. The shoot opened at 9 A. M. on the glorious Fourth, and from that time until near dark on the evening of the 7th bluerock and Keystone targets were kept flying about. Two sets of 5 traps each were used, one Keystone and the other the "expert" with Paul North's

H. THURMAN.

electric pull. The programme was so arranged that each alternate event was open for all with no handicaps. In the amateur events the experts were obliged to shoot from unknown traps. All the amateur events were at bluerock targets, while the open-for-all events were at Keystones.

The attendance on the opening day was much better than was anticipated, there being close to 30 entries in the regular events. The shooters came from various parts of the country and a number brought their families along. Among them were Milton F. Lindsley and wife ("Wanda") from Hoboken, N. J.; Enoch D. Miller and wife, Springfield, N. J.; Wm. Wagner, wife and children, Washington, D. C.; J. S. Thurman, Jr., and wife, Germantown, Pa.; Jos. H. Hunter, wife and child, Washington, D. C.; Harry Thurman and wife, Germantown, Pa.; E. R. McMullen, Mahanoy City, Pa.; R. T. Clayton, Tamaqua, Pa.; J. H. Penn, Dr. E. C. Myer, Geo. W. Lemon, R. D. Wright and R. B. Burt, of the Island City Gun Club, Wheeling, W. Va.; Gus E. Griff, of New York; J. W. Tredway, H. L. David, E. W. David and Wm. Garvin, of Philadelphia, Pa.

While the shoot was generally supposed to be under the auspices of the Atlantic City Gun Club, and the members of said club were more than willing to be credited with the affair, it was very noticeable that the club members were conspicuous by their absence, all the active work being done by Harry Thurman, J. Howard Brouse, Wm. Garvin and Enoch D. Miller. Although the club has over thirty members, there were not enough on hand to take part in the management. In the events also very few of the members' names appear. In order that the general reader may judge for himself as to how liberally the club officers and members supported their own venture, we append a list of officers, members and associate members, so that they may be compared with the list of shooters in each day's events.

President, L. R. Adams; Vice-President, A. C. Griscom; Secretary and Treasurer, R. C. Griscom; Trustees, Chris. Sander, R. Stroud, Wm. Riddle; Captain, Charles Minerd.

Members: Geo. Thompson, S. Lillig, T. Wilson, Duke Smith, John Clark, George McCormick, H. Postoll, C. Marsden, John E. Mehrer, Adolph Schlecht, L. P. Scott, Geo. Cluin, E. L. Plum, Dr. J. D. Leckner, Fred. P. Currie, William Riddle, Daniel Sander, William Raun, C. Herold, J. L. Young, Frank Smith, J. Everett Mehrer, Jr., Charles Whippey, William A. Bell, R. Barlow, E. L. Griscom.

Associate Members: Charles Gale, William Muhlrod, Dr. A. L. Helmbold, E. L. Robinson, L. T. Brooks, E. A. Hibbs, D. Johnston, Dr. William Wright, W. H. Vanest, Phil J. Leigh, Louis Groff, Mr. Godshalk, J. Howard Brouse, manager.

The weather on the opening day was delightfully cool and the light perfect. The targets and traps worked fairly well and the shooting was up to the average. During the afternoon a large number of ladies visited the grounds to encourage the shooters. In the evening some went to see the burning of Sardanapalus, while others passed the time in patrolling the board walk or in other ways sought to kill time. Below are the scores of the first day's events: Ten bluerocks (amateur), $1 entrance; 15 Keystones, open to all, $1 50; 10 bluerocks (amateur) $1; 10 Keystones, open to all, $2; 10 bluerocks (amateur) $1; 20 Keystones, open to all, $2 50; 15 bluerocks (amateur), $1 50; 15 Keystones, open to all, $1.50; 10 bluerocks (amateur), $1; 15 Keystones, open to all, $1.50.

*The Second Day*

opened with a cool breeze and a haze in the air which boded well for a good shooting day. This promise was fulfilled, the conditions being almost perfect up to the firing of the last shot. There were several new comers, among them being Eddy Collins of West Hoboken, N. J.; Neaf Apgar of Plainfield, N. J.; Dr. James Wolstencroft the noted specialist of Frankford, Pa.; W. I. Wolstencroft also of Frankford; "Tee Kay" Keller of Plainfield, N. J. and W. C. Clarke of Altoona, Pa.

The attendance was about the same as on the opening day and a very pleasant time was spent, the shooting being continued until dark. During the day the team of the Philadelphia Shooting Association shot its score in the team match, rolling up the handsome aggregate of 114 breaks out of 125 targets shot at. When the members left the score there were heartily congratulated upon their work and bets were offered that the score would not be beaten, during the next two days. The result of the second day's work is here shown:

No. 1, 10 Keystones (amateur), entrance $1; No. 2, 15 bluerocks, open to all, entrance $1 50; No. 3, 10 Keystones (amateur), entrance $1; No. 4, 20 bluerocks, open to all, entrance $2; No. 5, 10 Keystones (amateur), entrance $1; No. 6, 20 bluerocks, open to all, entrance $2.50; No. 7, 15 Keystones (amateur), entrance $1 50; No. 8, 15 bluerocks, open to all, entrance $1.50; No. 9, 10 Keystones (amateur), entrance $1; No. 10, 15 bluerocks, open to all, entrance $1 50.

Extra No. 1, 10 singles, $1 entry: Hunter, Apgar and Collins 10 each, Hathersall, Davis, W. Wolstencroft and E. D. Miller 9 each, Lindsley, H. Thurman, David, Clayton, Hunter, Wagner, Penn and Tredway 8 each, Budd, Garvin and French 7 each.

Extra No. 2, 15 singles, $1.50 entry: Hunter, Tredway and Penn 10 each, W. Wolstencroft, Wagner and E. D. Miller 14 each, Thomas, Wright and Budd 13 each, Landis, Clark, Apgar, Hathersall and Collins 12 each, Clayton and David 11 each, J. W. Wolstencroft 10, Keller, Lane and F. Miller 9 each.

Extra No. 3, 15 singles, $1 50 entry: Penn, Hunter, Wagner and Thomas 15 each, Tredway 14, Collins and Landis 13 each, Clark, Budd, Hathersall, Apgar, Wright and Clayton 12 each, Grieff 10, Wanda and Keller 8 each, E. D. Miller 7.

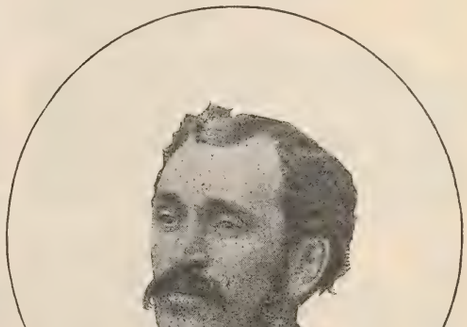
Extra No. 4, 10 singles, $1 entry: Apgar 10, Collins, Wright and Wagner 9 each, Brouse, Clayton, Thurman, Clark, Landis and Thomas 8 each, David, Tredway, E. D. Miller and J. W. Wolstencroft 7 each, Lane 6, Wanda 4.

Extra No. 5, 5 pairs, $1 entry: Apgar 10, Wagner and Brouse 9 each, Landis 8, Thurman, Rice, Tredway, E. D. Miller and Clayton 7 each, Clarke and Thomas 5 each.

### A GREAT BOWLING MATCH.

On the evening of Tuesday a large number of local and visiting shooters, accompanied by a party of friends, went to the Brunswick Bowling Alleys, the attraction being a ten-frame match game between teams of five men each representing Atlantic City and the visitors, arranged by the tournament managers. The alleys on which the match was rolled was in fairly good condition and of regulation length. The pins, however, were not spotted according to regulations. Previous to the start of the game several impromptu matches were rolled by the shooters and their friends, and some nice scores resulted. Everybody was in a holiday humor, and although the majority were pretty tired after their all-day's shoot they heartily enjoyed the sport.

It was 9 o'clock when the great championship match was started, the teams being as follows:



Atlantic City team: W. Leigh, L. R. Adams, captain, A. C. Griscomb, W. Chew and J. Clark.

Visitors' team: M. F. Lindsley, C. H. Townsend, J. H. Hunter, Harry Thurman and T. H. Keller, captain.

Mr. Webster, of New York, was impressed into service as umpire. From the start it was conceded that the home team had a decided advantage in being accustomed to the alleys to which the visitors were utter strangers. Under the circumstances the only wonder was that the margin in favor of the Atlantic City contingent was not greater than 86 pins. The full score of the match is given below, an asterisk (*) denoting a strike and a dagger (†) a spare.

Atlantic City Team.

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | Strikes | Spares | B'ks |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Leigh | 10 | *20 | 50 | 79 | *98 | 108 | *137 | 151 | 177 | *193 | 6 | 2 | 2 |
| Adams | †20 | *37 | 44 | *64 | †92 | †120 | 128 | *155 | †172 | 179 | 4 | 3 | 3 |
| Griscomb | 7 | 20 | 29 | 39 | 51 | 67 | †87 | *113 | *130 | 138 | 2 | 3 | 5 |
| Chew | †20 | †33 | 43 | 53 | *72 | 81 | *101 | †119 | †127 | *147 | 4 | 2 | 4 |
| Clark | 10 | †30 | 50 | 68 | 88 | 105 | *115 | 135 | *155 | 172 | 3 | 4 | 3 |
| | 67 | 150 | 216 | 303 | 401 | 481 | 563 | 673 | 761 | 832 | 19 | 14 | 17 |

WM. GARVIN.

Visitors' Team.

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | Strikes | Spares | B'ks |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Lindsley | †16 | 23 | *42 | 51 | 58 | †74 | 82 | 92 | 101 | *120 | 1 | 3 | 7 |
| Townsend | *17 | 24 | †*54 | *82 | *102 | 115 | 133 | 141 | *158 | 167 | 5 | 2 | 3 |
| Hunter | 10 | 19 | 36 | 57 | 60 | 80 | *100 | 120 | *140 | 155 | 2 | 5 | 3 |
| Thurman | †20 | *37 | 48 | 55 | *73 | 82 | 88 | 107 | 116 | ***146 | 5 | 2 | 5 |
| Keller | 11 | 21 | 31 | †51 | *76 | *91 | 100 | †113 | 131 | **153 | 4 | 3 | 4 |
| | 74 | 126 | 211 | 296 | 369 | 442 | 503 | 553 | 646 | 746 | 17 | 15 | 22 |

Thurman and Keller did great work on the wind-up, the former getting a tripler and the latter a doubler. But for bad luck in the second and seventh frames the scores would have been much closer. The visitors were perfectly satisfied, however, with the showing they made.

*The Third Day.*

Another perfect stretch of weather, with the same cool breeze and gray light as on Tuesday. This was the big day of the tournament, there being over fifty shooters on the grounds. The great attraction was the continuation of the team match, in which two teams had shot on the preceding day. This drew a number of new men, among whom were Messrs. Matz, Ritter, Schmelck, Schaaber and Sheele of the Reading (Pa.) Shooting Association; Dr. Bristor, of Altoona, Pa., Mr. Burt, of Wheeling, W. Va.; Mr. Royds, of Germantown, Pa.; Messrs. Haddon, Austenruhl and Leaming, of Camden, N. J. It has been previously stated that on Tuesday, when the Philadelphia contingent rolled up 114 breaks they were looked upon as winners, but on this day the five men of the Island City Gun Club, of Wheeling, W. Va., proved themselves to be possessed of both nerve and skill by putting up a score of 115, this remaining the top figure in the match. Seven teams in all were entered, each man shooting at 25 targets. Joseph Thurman, Jr., of the Germantown Gun Club, and J. H. Penn, of the Island City Gun Club were the only ones to roll up clean scores. Harry Thurman, of the Germantowns, E. D. Miller, of the Unions, J. H. Tredway and Mr. Lane, of the Philadelphias, scored 24 each. In addition to receiving 30 per cent. of the entrance money, the winning team was awarded a special prize in the form of a $10 gold piece, presented by the management.

The programme events were all well filled during the day, and the shooting was first-class. In addition to the programme there were two extra events shot off, one at 10 and the other at 15 singles. Below are the team scores in full, and a table showing the result of the programme events.

No. 1, 10 Keystones (amateur), $1 entrance; No. 2 15 bluerocks (open to all), $1.50; No. 3, 10 Keystones (amateur), $1; No. 4, 20 bluerocks (open to all), $2; No. 5, 10 Keystones (amateurs), $1; No. 6, 20 bluerocks (open to all), $2 50; No. 7, 15 Keystones (amateurs), $1.50; No. 8, 15 bluerocks (open to all), $1.50; No. 9, 10 Keystones (amateurs), $1; No. 10, 15 bluerocks (open to all), $1.50.

MILLER IS A SWIMMER.

On Wednesday evening a swimming match took place at Kippell & McCann's Natatorium, among the contestants being Harry Thurman, Frank Mason, Neaf Apgar, Ed Collins and E. D. Miller. The swimming pool is less than 100ft. in length, and the course comprised the length of the pool and return, the premier honors were carried off by Enoch D. Miller, who easily out-swam his competitors. The affair was a pleasant one to all except Frank Mason, who was unfortunate enough to leave all his cash in his pockets when he placed his clothes in the closet, the result being that while he was sporting in the water some contemptible sneak "went through" his clothes and extracted all his wealth. The next time Frank goes bathing he will leave his valuables in the safe.

*The Final Day*

as usual was rather flat, the most of the shooters having left for home on the previous evening. Still a dozen men hung on until the last shot was fired. The scores are appended:

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | Average. |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Hunter | 8 | 14 | 8 | 19 | 6 | 19 | 13 | 15 | 8 | 14 | 88.57 |

## Putney Patriots' Fourth.

PUTNEY, Vt., July 5.—The Putney Rod and Gun Club held an all-day's shoot the Fourth of July, which was a success in every way. Besides their regular members, Messrs. Bolt, Blarney and Douglass, of Holyoke, and Messrs. Akeley and Stockwell, of Brattleboro, were present. The event of the day was the team match; two members compose a team, and each member to shoot 25 birds. Putney entered three teams, Holyoke one, and West Brattleboro one. First money was won by Putney No. 1 team, while Holyoke took second and Putner No. 2 took third. Sweepstake matches preceded and followed the above event. The winners were as follows:

No. 1, 10 singles: Warren 7, Robertson 6, Crosby 5.

No. 2, 5 singles: Wing, Blarney and Willard 4, Wing winning on shoot-off; Bolt, Crosby, Robinson and Pember 3, Robinson winning the shoot-off.

No. 3, 5 singles: Robertson and Bolt 4, Willard 3, Crosby, Blarney and Wing 2.

Team match:

## Rochester's Fourth.

ROCHESTER, N. Y., July 7.—The Rochester Rod and Gun Club observed Independence Day by holding an open-air tournament and sweepstake shoot on their grounds. The weather on the 3d was not very promising, but the 4th opened up in fine form, and as the day gave promise of being an exception to the usual rule it brought out a large number of sportsmen, and a programme of eleven events was shot. The conditions governing each contest were the same, 15 Peoria blackbirds, under the Paul North system of handicap, 5 traps.

JOHN B. MULLEN, Sec'y.

## The Glorious Fourth at Lynchburg.

LYNCHBURG, Va., July 5.—The Lynchburg Gun Club held its annual picnic and Independence Day shoot yesterday. The day opened cloudy, but by 11 o'clock it was clear as a bell and just cool enough to be pleasant. The attendance was heavy. From Staunton there came a team comprised of W. F. Summerson, Dr. E. F. Wayman, E. Berkeley, "Happy Billy" McDonald and R. S. Bowman; Pamplin City sent us Murrell, Chambers, Hamlet, Franklin and Womack; jolly George McAlpin came over from Richmond; Bryan Taliaferro, of the Jacksonville (Fla.) Gun Club, came along with "Gaucho" Du Bray, of the Parker Gun Company, who has Lynchburg tied to one of his strings and is liable to push around this way at short notice; and W. F. Clements, the U. S. pigeon man from Baltimore, also put in the day.

The visitors were entertained in great form, and it was the most pleasant occasion since the organization of trap shooting in this city. Among the scores you will find some marked "field." In these events the shooter goes down in front of the traps and takes the field, as if following a dog. The man at the pull calls "mark!" and immediately pulls some one of the five traps. The shooter must find the bird as best he can and shoot. In these events it's best man win and no favors. The visitors were greatly pleased with the new idea. At noon an elegant luncheon was served, after which shooting was continued until dark.

One of the most interesting events was the contest for teams of 5 men each, at 20 targets per man, entrance $5 per team. First honors were tied for by the t am of the Staunton Gun Club and the Lynchburg No. 1 team on 70 breaks each. This match was for a silver cup. Below are the scores made in the team match, the "Picked Team" shooting for targets only:

| Only for Targets. | Lynchburg No. 1. | Staunton Team. |
|---|---|---|
| Taylor | 12 | Wayman 18 |
| Du Bray | 16 | Terry 13 |
| Taliafero | 15 | Bowman 13 |
| Clements | 14 | Dornin 19 | McDonald 10 |
| McAlpin | 16—75 | Moorman 15—70 | Cleland 13 | Berkley 13 |
| Lynchburg No. 2. | Pamplin Team. | Summerson 16—70 |
| Smith | 12 | Murrell 9 | Park Team. |
| Miller | 7 | Chambers 15 | Christian 8 |
| Withers | 13 | Hamlet 14 | Lee 2 |
| Durphey | 10 | Franklin 6 | Jenkins 15 |
| Clark | 15—57 | Womack 10—54 | Strother 8 |
| Picked Team. | | | Hamner 8—41 |
| Goggin | 8 | Adams 4 | D Christian 7—37 |
| Lee Long | 9 | Mitchell 9 | |

Below are the tabulated results of the programme events which were as follows: No. 1, 10 singles, rapid fire, $2 entry; No. 3, 6 pairs three traps, $2 entry; No. 4, 15 singles, $1 entry; No. 5, field shoot, 10 singles, $1.50 entry; No. 6, 10 singles rapid fire, $1 entry; Nos. 7 and 8, same as No. 6; No. 9, field shoot, 5 singles, $1.50 entry; No. 10, 3 pairs, $1 entry; No. 11, 7 singles, $1 entry. All ties were divided:

| | 1 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
|---|---|---|---|---|---|---|---|---|---|---|
| Dornin | 9 | 7 | 14 | 8 | 9 | 8 | 9 | 9 | 4 | 4 | 7 |

## A Novel Shooting Place.

TRAP-SHOOTING has become such a well-known sport that under ordinary circumstances the spectacle of a party blazing away at live birds or targets attracts little or no attention from the non-sporting public, unless some of the shooters chance to be personal friends. Away down the Jersey coast, however, at a place yclept Atlantic City, there may occasionally be witnessed a sight that is rather out of the common run and which invariably attracts a big crowd of interested spectators. If you chance to be in the town on a pleasant Friday, eat your lunch about 1:30 P. M. and then stroll down the board walk until you reach the pier of Young & McShea. Go out on the pier, and when you have walked about as far as you can without going overboard you will see fastened on the extreme end, 1,400ft. from shore, a set of bluerock traps. Rather a novel place for a trap-shoot, say you; and the novelty is still further enhanced when you are informed that the Pier Gun Club, by whom the traps are used, is comprised of both women and men, and that the members of one sex are fully as enthusiastic as the other. The last shoot of this organization, held on Friday, July 8, was attended by nearly a score of members, and the totals made were very creditable, considering the strong southeast wind, which caused the targets to be somewhat erratic in their flight. The shoot was directed by that irrepressible major domo of shooting affairs, Harry Thurman, better known as "Old Father Time" and "Rainbow." Harry is happiest when dabbling in shooting affairs, although incidentally he puts in an odd spell at the Rainbow Knitting Mills or in hustling up trap copy for the Philadelphia *Item*.

In the club shoot each contestant shot at 25 targets, 16 and 18yds. rise, under American Shooting Association rules. A feature of the event was the fine showing made by Mrs. J. L. Young. This was Mrs. Young's initial attempt at this style of work, but she proved herself to be an apt novice by powdering 15 out of her 25 targets. This score goes to show that with a little practical experience Mrs. Young will become an adept. In fact the entire Young family seems to be endowed with the ability to shoot, as Miss Emma Young broke 8 and J. L. Young 20 out of 25. Below are the scores of the shoot in detail:

| | |
|---|---|
| H Thurman | 1111111111110101010111110—20 |
| C Minerd | 1111111111011011011010001—19 |
| J Leigh | 1110111011101101010010001—16 |
| R Hires | 1000010101111100111001011—14 |
| J L Young | 1110101101111111100111111—20 |
| Geo McCormick | 1101010101110111011111111—19 |
| H McCann | 1110010001111111111010111—18 |
| J R Denny | 0000000011001010000w. —4 |
| L R Adams | 1001111011111111111111110—20 |
| H Wood | 1111111111111111111111010—23 |

Mrs. J. L. Young 15; Miss Emma Young 8; Mrs. F. Applegate 2; Mrs. E. Morris 1.

Two sweepstake events followed. Miss Emma Young securing first prize in each.

## Shooting at Somerville.

THE Somerville (N. J.) Gun Club held an interesting day's sport on July 4, there being a good attendance of shooters from surrounding towns. Among the visitors were Dr. P. J. Zeglio and Jos. Zeglio, of Warrenville; E. G. Lott, Geo. E. Reading and J. T. Chamberlin, of Flemington; H. Bishop and M. Anderson, of White House, and Geo. Cramner, of North Branch. The events were at 10 birds each, Nos. 1, 2 and 3 being from three traps, unknown angles, and No. 4 from three traps, known angles. The score:

| | 1 | 2 | 3 | 4 | | 1 | 2 | 3 | 4 |
|---|---|---|---|---|---|---|---|---|---|
| Bishop | 3 | 3 | 6 | 8 | Rockafellow | .. | .. | 4 | 6 |
| P Jay | .. | 6 | 8 | 7 | Hendershot | 3 | 4 | 4 | 4 |
| J Zeglio | .. | 3 | 6 | 5 | Lott | .. | 6 | 5 | 5 |

| Pickel | .. | 3 | .. | .. | Clark | .. | 3 | .. | .. |

### The Fourth at Blauveltville.

THE Spring Hill Gun Club held a very pleasant shoot at Blauveltville, N. Y., on July 4, the attendance being good and the weather beautiful. Among those present were Messrs. Simpson, Moore and Richmond, the hard-shooting trio of the New Jersey Shooting Club, of Claremont, and L. H. Schortemeier, the rotund and tall German who made such a fine showing for the Emerald Gun Club at Syracuse during the State shoot. Both live birds and targets were used. The scores in the programme target events were as follows:

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Richmond | 10 | 13 | 11 | 13 | 15 | 13 | 14 | 12 | 13 | 9 | .. |
| Schortemeier | 7 | 13 | 13 | 13 | 11 | 14 | 13 | 12 | 13 | 8 | 14 |
| Moore | 8 | 14 | 14 | 14 | 7 | 13 | 13 | 13 | 14 | 9 | 14 |
| Simpson | 7 | 13 | 14 | 12 | 12 | 14 | 13 | 13 | 11 | 10 | 15 |
| Baker | 6 | 10 | 11 | 13 | .. | .. | .. | 12 | .. | 7 | .. |
| Lewis | .. | .. | .. | 2 | .. | .. | .. | .. | .. | 4 | .. |
| Fogarty | .. | .. | 14 | .. | .. | .. | 15 | .. | 15 | .. | 13 |
| Farmer | .. | 5 | 7 | 7 | 9 | 7 | 9 | .. | .. | .. | 8 |
| Bogart | 3 | .. | .. | 14 | .. | 15 | 13 | 13 | 14 | 9 | .. |
| Duryea | 6 | .. | .. | .. | .. | .. | .. | .. | 6 | 3 | .. |
| Allen | 5 | .. | .. | .. | .. | .. | .. | .. | 11 | 8 | .. |
| Little | 5 | .. | .. | .. | .. | .. | .. | .. | .. | 6 | .. |

Nos. 1 and 10 were at ten targets each, $1 entry, three moneys; all others fifteen targets each. $1.50 entry, three moneys, except No. 11, in which there was one money only. No. 5 was at unknown angles. Bluerock targets were thrown from Keystone traps

Special events: Ten pair doubles, $1.50, two moneys: Simpson 15, Moore 16. Richmond 16, Schortemeier 17.

Twenty-five singles, $2.50, 3 moneys: Simpson 21, Bogart 22, Dr. Allen 16, Moore 21, Richmond 20, Schortemeier 23, Baker 19, Duryea 13.

Live bird events: No. 1, seven birds, $4 entry, three moneys; No. 2, ten birds, $5 entry, three moneys; No. 3, seven birds, $4 entry, two moneys. Hurlingham rules, except boundary, which was but 20yds. each side and 60yds. straightaway from center traps, 25yds. dead line.

### Oakleigh Thorne Wins the International.

THE international pigeon match for the Gun Club International Cup, which took place in England recently, was in many ways an unusual contest. The winner, Oakleigh Thorne, was one of the three Americans in a field of sixty-nine competitors, including some of the best shots of England and France.

Mr. Thorne is the wealthy owner of a stock farm in Millbrook, Dutchess county, this State. He is a thorough sportsman, and is very much interested in trap-shooting, devoting a large amount of his leisure time to the sport. The two other Americans represented in the contest for the cup were Charles Macalester and H. Yale Dolan. Among the Frenchmen were M. Moncorge, M. Journu and M. Drevon, who are considered to be the best trap shots in France.

The Gun Club international cup is valued at $1,000. Besides this, Mr. Thorne won $750 sweepstakes. A foreign paper describes the match as follows:

"Thanks to the strong wind, the birds left the traps at a rare pace and misses were very frequent, the fielders in the two opening rounds having by far the best of the betting. The chances of no fewer than twenty-one of the contestants were extinguished in the first tour, this number including several crack shots. Sixteen were dropped out in the second round, and on the termination of the seventh only seven were left in to continue the shooting. Of these Westley Watson was the first to retire, as his eighth bird, struck with both barrels, made a desperate effort and just cleared the line of demarcation. M. Journu, the French champion, shot under a rising bird with both charges, and in the tenth round M. Drevon was also beaten by a similar rock, which went away as if on a special mission. Mr. Dolan's bird looked like going, but was brought to grass by a rattling good second.

"The scorer now announced four ties, those successful up to this point being Mr. Thorne (31), Mr. Dolan (31), T. Taylor (28½), and C. Bewicke (28). Now for the battle royal between England and America. Our friends from across the Atlantic looked as confident as possible, but Mr. Bewicke displayed a certain amount of nervousness. The quartette brought down bird for bird until the 13th round, when Mr. Bewicke was beaten by a smart one from No. 2 trap. Success also failed to smile on Mr. Taylor's efforts, for his rock flew off to the left apparently none the worse.

"This left the issue to be fought out by Mr. Thorne and Mr. Dolan. Strange to say, both missed their 14th pigeons, after which Mr. Thorne added two more birds to his score, showing fifteen kills out of sixteen."

Mr. Dolan missed his sixteenth bird also, thus scoring fourteen kills out of sixteen shots. It was considered a grand performance for Mr. Thorne to beat such a field at 31yds. rise. Mr. Dolan won second prize of $500, and Messrs. Taylor and Bewicke divided third and fourth. The scores of the four prize winners were as follows:

| | | |
|---|---|---|
| Oakleigh Thorne (31) | 1111111111 | 11101 1 |
| H Yale Dorlan (31) | 1111111111 | 11101 0 |
| T Taylor (28½) | 1111111111 | 110 |
| C Bewicke (28) | 1111111111 | 110 |

### The Machimoodus Fourth.

THE Machimoodus Gun Club held an all-day tournament at their park, Moodus, Conn., on the Fourth, which was attended by over thirty gunners from all over the State, including a number of Connecticut's best shots. The most exciting event of the day was the second contest for the genuine W. W. Greener breech-loading shotgun, the gift of F. C. Fowler, and sweepstakes. The conditions of the gift were that the gun be shot for at four tournaments held by the club during the year 1892. The man winning it at each tournament is barred from shooting for it at any other of the remaining tournaments. Then, at the end of the four tournaments, each winner will shoot off the ties and the gun will become the absolute property of the party winning it. In case of a tie at any of the tournaments, both or all parties will stay in and be allowed to shoot for the gun at the final shooting for the gun. Twenty-five targets, Keystone system, entrance $1, targets included. The score in the second contest was as follows:

| | |
|---|---|
| Cook | 1011110010111111111110110—19 |
| Brainard | 1111110111111111111111111—24 |
| Mcshier | 1011110011111010011110111—18 |
| Bill | 1100110000111111110101111—17 |
| Merriman | 1100011111111111111110011—20 |
| Fowler | 1111111111111011011111—23 |
| Edgarton | 1011110111111111111111101—22 |
| Burbidge | 1111111111111011111111—24 |
| Dana | 1111110101111111111011111—22 |
| Avery | 1111010101011111111111—21 |
| Pitt | 0000111111101010010011110—14 |
| Willey | 1011110101011011111111—20 |
| Banning | 1111111111111111111111111—25 |
| McGinty | 1111111011011111111111—22 |
| Bates | 1111111111111011111111—24 |
| Savage | 1111111100111111111111—22 |
| Olmstead | 1110110111111111111100111—21 |
| Treat | 0010101000010100110100101—10 |

On the whole day's shooting Bates of New Haven, Edgarton of Willimantic, Burbidge of Hartford and Brainard of Moodus ran up the highest scores, averaging over 90 per cent.

The next tournament will be held the last of the present month.

Machimoodus Club has a membership of 30, and their club house is second to none in the State. Keystone rules, traps and targets. The establishment of the club was mainly due to Mr. F. C. Fowler, proprietor of the well known Oak Grove Kennels at this place, the home of Kildare, Seminole, Duke Elcho and numerous others of the aristocracy of the Irish setter family.

At the election of officers of the club Mr. Fowler declined the presidency, to which he was unanimously elected, but accepted the none less essential office of captain. While the grounds are four miles distant from the Valley Railroad and five miles from the Air Line, the fact is no hindrance to visiting sportsmen from attending the tournaments given by the club, as on previous notification to the secretary they are met at either road and conveyed both ways free of expense, in teams provided by Mr. Fowler. A feature of Machimoodus grounds not found elsewhere is the "captain's tent," which is supplied with choice cigars and drinkables from sparkling Apollinaris to the best spirits Kentucky sends forth, which are dealt out free to patrons of the club, and the captain "pays the freight."

MOODUS.

### The Crescent Gun Club.

DEXTER PARK, L. I., July 7.—The members of the Crescent Gun Club had a fine afternoon's sport on Thursday although the attendance was not very large. The contest for the Parker gun was very close, C. Mohrman killing his seven straight and won, W. Catman winning the second prize after outshooting three others. The birds were fair and shot from five unknown traps, gun handicap 25 and 27yds. The team shooting was very close, two out of three resulting in ties. The scores:

Regular monthly shoot for best averages for the Parker gun and extra prize:

| | | | |
|---|---|---|---|
| C Hubbell | 1110121—6 | W Gilman | 1021111—6 |
| O Hillmer | 0200201—3 | J Vagts | 2111110—6 |
| C Mohrman | 1221221—7 | W Boller | 0012121—5 |
| C Winchester | 0100112—4 | S Hopkins | 1110111—6 |

Tie for second won by Gilmer.

Team shoot, $1 each entrance, losing side to pay for the birds, 3 birds each, club handicap:

First Match.

| | | | |
|---|---|---|---|
| C Hubell, Capt | 100—2 | C Winchester, Capt | 111—3 |
| J Vogts | 010—1 | C Mohrman | 211—3 |
| W Gilmer | 112—3 | S Hopkins | 002—2 |
| O Hillmer | 120—2 | W Bolton | 202—2 |
| C Bandman | 111—3—10 | H Merrihew | 10c—1—10 |

Winchester's team won shoot off.

Second Match.

| | | | |
|---|---|---|---|
| C Hubbell, Capt | 011—2 | A Hopkins, Capt | 111—3 |
| C Mohrman | 101—2 | W Gilmer | 110—2 |
| C Winchester | 112—3 | J Vagts | 111—3 |
| W Bolton | 010—1 | S Short | 201—2 |
| C Landman | 112—3—11 | H Merrihew | 100—1—11 |

The second sweep was to decide the winner of first with both moneys.

Sweepstakes at 10 targets, $1 entry, three moneys. No. 1: C. Landman 5, C. Hubbell 9, T. Short 9, C. Winchester 7, H. Merrihew 8.

No. 2: C. Landman 8, C. Hubbell 9, C. Winchester 8, H. Merrihew 8.

Referee, Mr. C. A. Dellar.

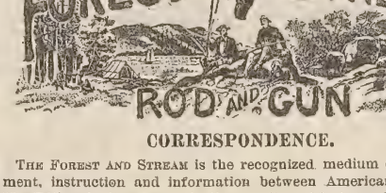
P. S.—At the commencement of the shoot the birds were rather slow but improved during the afternoon when a good lot of flyers got away. The Crescents had fine weather for the first day in their change of dates.

### Shooting at Roger's Fort Hill.

THE Common Council of Lowell, Mass., appropriated $100 toward a trap shoot which was held at Roger's Fort Hill Park on July 4. Each man shot at 10 singles and 3 pairs of artificial targets, there being 51 entries. The results:

Edward Hartford 15, J. E. Burns 14, G. V. Gregg 13, G. C. Bates 12, Harry Runels 11, Chas. Hayes 10, W. L. Gregg 9, Dr. Downs 8, E. A. Smith 7, S. B. Hall 7, Edwin Coburn 5, N. W. White 4, W. H. Spalding 3, M. Knowles 10, H. Hartford 8, A. D. Butterfield 8, C. E. Blaisdell 6, James Shepherd 5, Enos Brocker 2, M. McDermott 8, James McCaskin 5, Frank Lee 6, A. Lawrence 2, W. P. Edwards 11, W. Butler 4, Peter Beck 5, Moses Davenport 4, A. Coburn 4, G. Maynard 12, L. A. Derby 9, J. C. Wheeler 14, D. D. Snyder 8, N. Brown 10, F. Bramhall 9, A. Maynard 6, E. W. Lovejoy 13, Samuel Greenwood 6, David Foster 2, G. R. Dickey 9, H. W. Burton 8, F. Sherman 9, W. Wiley 4, Henry Boynton 10, W. M. Owen 8, A. Allard 7, I. Allard 4, Geo. C. Moore 8, Geo. Massey 4, G. H. Nutting 8, H. Jones 14.

The approvriation of $100 was divided as follows: $15, $14, $13, $12, $10, $8, $7, $6, $5, $3, $2, $1. This will be presented to the first thirteen named marksmen in the above score.



### Niles Gun Club.

NILES, O., July 6.—The second and last day of the Niles Gun Club tournament was a pronounced success throughout. The contests for the various prizes offered by the business men of the city were very exciting and close. The following is the score of the main shoot of the day: Upman 19, Runnell 21, Andrews 21, Morris 21, Lewis 16, Turner 21, Cremer 19, Cochran 21, O'Connell 19, Ward 18, Phillips 20, Fry 20, Wilson 16, Miller 19, Geo. Naylor 17, Winfield 17, John Naylor 20.

## Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

F. E. A., Waterbury, Vt.—Will you kindly give information on following points: 1. Weight and size of largest small-mouthed bass on record. 2. Weight and size of largest big-mouthed bass on record. 3. Is the snake commonly known as the spotted or checkered adder in this section a poisonous one, and if not is there any poisonous reptile in Vermont, except the rattlesnake? Ans. 1. 8lb. 10oz., length 25in., girth 18½in.; this was caught by Mr. Boynton near Glens Falls, N. Y., and weighed by Mr. A. N. Cheney. 2. 23lbs. 2oz., length 37½in., girth 29½in. Caught near Altoona, Fla., by Mr. H. W. Rose. The head of this fish is now in the FOREST AND STREAM office. 3 Probably your spotted adder is the snake known as spreading adder and blowing viper (*Heterodon platyrhinus*), a ferocious looking but harmless species. When alarmed it flattens and expands its head, darts out its tongue and hisses and sputters for dear life, but this is only for its own protection, and no harm is caused by its teeth. The spreading adder is usually brown or reddish, with numerous (more than twenty) dark blotches on the back and sides and half rings on the tail. It reaches a length of 30in. In the Eastern United States it is one of the commonest of the snakes. The copperhead, a venomous snake, is found in New England, but is comparatively rare. In color the body is brown, the belly yellowish and with 35 to 45 dark blotches on the side; the head is coppery-red above; across the back there are from 15 to 25 V-shaped markings.

### CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

### SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

### ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

## *MAJOR H. W. MERRILL.*

READERS of the FOREST AND STREAM, particularly those who remember his sketches in the earlier volumes, will learn with sincere regret of the death of Major H. W. Merrill, at his home in this city, on last Thursday, July 14. The intelligence was received at this office with sorrow, for the Major had been not infrequently a visitor here for many years, and he was one of those men with whom a personal acquaintance ripens into affection. His age was 78 years. His wife survives him. A son, Frederick J. H. Merrill, Ph.D., is Assistant State Geologist of New York. A brother, Nelson Merrill, is a member of the bar of this city.

Major Merrill came of New England Puritan stock. He traced his ancestry back to Nathaniel Merrill, who emigrated from England to Connecticut in 1633-34. About the year 1802 Jared Merrill moved from Connecticut to what was then the far West, and settled in the Oneida country of New York. In 1811, his son Asa Merrill went still further west, and made a pioneer farmer's home in the wilderness of the Genesees, at a point subsequently known as Byron. Here Hamilton Wilcox Merrill was born in 1814. The child whose birthplace was on the advance line of civilization was destined to spend a large portion of his active life in service on the frontiers. Living on the home farm to the age of twenty, he went as a cadet to West Point, and graduating in 1838 was appointed Second Lieutenant of the 2d Dragoons, then on duty in the Seminole War. On the way to Florida Lieut. Merrill was for a time with Gen. Scott in Georgia and Tennessee, effecting the removal of the Cherokees. Arrived in Florida his introduction to active service was as the volunteer leader of a scouting party in pursuit of the Indian murderers of a white family; the trail led into a dense hamak, impenetrable by horse, and the young officer led the way, pistol in either hand, into the dark cover, only to find, as was the rule in that war, that the Indians had made good their escape. The three years' campaigns which followed were full of hardship and adventure, relieved by indulgence in field sports, for which the Florida game supply of that period afforded unlimited opportunity.

Coacoochee and his followers at length deported from Florida, Lieut. Merrill in 1841 marched with his command 1,400 miles west to Fort Towson, in the Choctaw and Chickasaw Nations, north of the frontier of the Republic of Texas; and from this time, except while in the Mexican War, he was almost constantly in the field, in the Indian country along the Texan frontier, and in the West, until his resignation from the service in 1857.

In 1846 he joined Gen. Taylor's army at Camargo, in Mexico, and took part in the battle of Monterey. Then, in the army of Gen. Scott, he was in the siege of Vera Cruz, the battles of Cerro Gorda, San Antonio, Contréras, Molino del Rey (where, now Captain, he won for gallant action and meritorious services the brevet of Major), and the bombardment and battle of Chepultapec; was one of the eight mounted men who escorted Gen. Scott into the City of Mexico after its fall; and took part in the two days' fight in that city after the surrender by Santa Anna.

One whose life had been passed around such scenes could not fail to be an interesting personality. Major Merrill had a rare fund of entertaining reminiscences of the old days, stories of how the elusive Seminole Coacoochee lured the Scouts into the depths of Florida swamps, there to make mock of them; of Capt. Martin Scott (the man for whom the coon came down) who, in a moment of peril, when some one called out to him to lie down, answered, "Martin Scott never lies down," and the next instant fell, mortally wounded by a Mexican bullet. Again it would be a story of the memorable charge over the Mudellin Bridge at Santa Cruz, where 300 American dragoons put to rout 1,400 Mexican lancers; or of that still more memorable charge, with fiercer odds, at Molino Del Rey, where Major Merrill's horse Black Warrior was shot under him; and more than once, in such recital, the narrator would catch the martial spirit of the hour and tell the story with inimitable effect. Or it might be a humorous incident in his own experience, how, when separated from his command in the Indian country and obliged to camp for the night alone, he was awakened by a terrific alarm, which, half awake, he recognized as the Indian war whoop, but which proved to be the screech of an owl perched just overhead. Again, it would be a pathetic tale of a pointer dog found on the battlefield of Molino del Rey, forgetting its own mortal hurts, to seek out its dying master and lick his face and wounds.

From early life Major Merrill had a decided taste for hunting, and it was his good fortune to be stationed throughout almost the entire period of his army life in regions where the game supply afforded unstinted scope for this favorite pursuit. In the vicinity of his first Florida camp, on the Ocklawaha River, the deer, wild turkeys, and wild ducks and geese were found in an abundance which astonished him. On the Texan frontiers and in the western Indian country were vast numbers of buffalo; the command often marched for days together in sight of the herds, and it was necessary to detail riders to keep between their hosts and the wagon trains to prevent the buffalo from stampeding the mules. Here too there were deer and antelope, wild turkeys, ducks and geese, grouse and quail, to say nothing of foxes and wolves. We may well believe that with such incitements to the chase hunting was often a more agreeable pursuit than scouting for Indians; and an officer who knew how to handle a gun might well deem it his duty to keep the mess supplied with fresh meat.

The records show that Major Merrill was a capable and efficient officer in the command of his troops and his dealings with the tribes; none the less was he accomplished as a sportsman. Constant practice gave him great skil', Mounted on his faithful "Black Warrior," or on his trained hunting pony, he outstripped the fleetest game and thought it no feat to bring a buffalo to earth by a shot while both pursued and pursuer were at full speed.

Such hunting will never be known again on this continent; it is as much a thing of the past as are the conditions of frontier life which prevailed in the Southwest a half century ago. His experiences on the plains in the '40s and '50s afterward furnisheds material for a number of interesting sketches contributed to the earlier numbers of the FOREST AND STREAM.

The hunting rifle in use at that time was of course the muzzleloader, and it was the good work done by the arm in those days of frontier life that caused Major Merrill to be a life-long advocate of its merits. The superiority of the muzzleloader over the breechloader as an arm of precision he maintained with much sturdiness. His writings most valued by riflemen and of the greatest practical good were those relating to point-blank and the trajectory curves of sporting rifles. These were subjects to which Major Merrill devoted much study, and to him belongs the credit of having first presented them in a form adapted to popular comprehension and instruction.

Major Merrill inherited a strong constitution, which carried him unscathed through the exposures of Southern campaigns, and blessed him with a hale and vigorous old age; from his Puritan ancestry, too, came those high traits of character which marked his public and private life, and were the crown of that old age. His were the bluntness of the soldier, the simplicity of a child, the straightforwardness and ingenuousness of one who thinks no evil.

## *SNAP SHOTS.*

Last autumn we chronicled the successful introduction of our native quail into China, where the American traveler is now greeted by the cheery whistle of Bob White. There are other conquests in store. The authorities of the Cape of Good Hope are greatly interested in a project of introducing into that colony American game birds. Their agent, who has naturally come direct to this office for assistance in the undertaking, tells us that the South African people want both quail and grouse. There is probably no obstacle to prevent the successful transportation of quail from America to the Cape of Good Hope. If properly cared for the birds will bear the confinement and hardships of the voyage; but it is very doubtful if ruffed grouse can be carried so far. The almost uniform failure of all attempts to keep this creature in confinement for any length of time appears to point to certain defeat of such an enterprise as its transportation to South Africa. On the other hand, the Massachusetts Association has been decidedly successful in bringing sharp-tailed grouse across the continent; and properly cared for that species might weather the voyage to the Cape. The undertaking is one which will be watched with much interest and with many hearty wishes for its successful achievement. Future Fourth of July orators may yet with truth and pride allude to the whistle of the American Bob White saluting with the British drum beat the rising sun around the world.

Two New Haven gentlemen, Mr. J. B. Robertson and Mr. Clayton Redfield, have secured two pairs of Mongolian pheasants, and are trying the experiment of rearing these birds in confinement. The birds were received from Oregon, and soon after their arrival in New Haven began to lay. The eggs were taken as fast as laid and put under bantam hens, and the first brood, numbering eight chicks, was hatched July 5 The hen pheasants continue to lay, and it is hoped that a considerable number of the young may be reared this summer. If the expected success should be attained, it is proposed next spring to turn out a number of the birds in different parts of Connecticut in the hope of stocking the State covers. If this turning out should be done, wide publicity ought to be given it, so that sportsmen who come upon the new birds may recognize and spare them for breeders.

Mr. Stewart Culin, curator of the archæological museum of the University of Pennsylvania, has been appointed secretary of the Board of Commissioners for the Columbian Historical Exposition in Madrid. The University will make a considerable display of its archæological collections at the Exposition.

The New York game law abolished at one fell swoop more than forty special county regulations respecting fish and game.

## ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitteed to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp-Fire Flickering Vote." Such popular vote will be quite distinct from the award by the committee.

# The Sportsman Tourist.

## CAMPING ON THE BLUE.

IN the running water there is life. Who can catch and hold the glint of the rivulet? No camera can reflect the rapids. No two breaks of water rushing over stones are alike. Writers have attempted to tell the story of the breakers, the song they sing. But they never sing the same song twice. Wherein they have the advantage of some singers and most story tellers. The songs of the waters are always melodious. It is a medley with melody. The rythm of swift-flowing water is the rarest sound in nature. The beauties of the Blue have been told in poetry. One denizen on the banks of this most crooked and turbulent stream, one who has studied it in all its moods, writes of its charms in a local paper:

Mark the massive walls arise,
Lifting rugged rocky sides
Into deeply vaulted skies,
Where the filmy fleece-cloud rides.
Here and there a stately column
Leans its lonely form, and solemn
Embattled lines of sharp peaks set
Spear-like upon the parapet
Pierce with jagged, cragged crest
The Heaven's unresisting breast.
There a gnarled oak, dark and high,
Bare and bleak, and blasted by
Crashing wind and flashing sky,
Extends its wasted, bony form,
And still, though dead, defies the storm.
Here a majestic monarch shoots
In rifted rocks its grappling roots:
Over the precipice, bald and bare,
It fearlessly flings to the upper air
Branches broad, storm-bent and old.
Black arrow-headed crags and tall
Leap up, and out, and over all.

Our camp is ten miles from Milltown, the crossing of the Air Line Railroad to Leavenworth on the Ohio River, by the country road. By river it is fifty-five miles. This will show the windings of the stream. It is not sluggish. It does not meander through meadows. At times the bluffs rise abruptly for 400 feet; natural falls, rapids, alternate deep pools, form natural feeding grounds and hybernating places for fish.

The canoeist can here find swift water, long reaches of deep and quiet water, abrupt turns with ever varying scenery.

Adown the stream is a picture for an artist of nature. The camera and the draughtsman may delineate its features as nearly as they can be reproduced. But yet the beauty of the scene is not portrayed. It can not be put upon canvas, neither can a pen portrait portray its beauties. Looking from the front of the camp, three rapids and two beautiful green isles make a picture that can only be realized by being gazed upon from our dining room on the days when sun and atmosphere combine to display effectively all its charms.

"Fishing is only for those who have learned the sport. Like that of the wing shot, the art must be learned in early life." One of the ladies of our party who had never handled a rod hung a very nice fish on an 8oz. rod without a reel, with a very light line, and with a little instruction from "the old man," landed it in very nice style. The main thing in taking a fish is to keep cool and keep your mind on the business you are engaged in.

Casting into a pool of a depth of from ten to twenty feet of clear, cold water forms an ideal fishing place for black bass. The expert fly-fisher has here full swing. For forty yards in his rear and forty in front there is no obstruction. He can stand and cast for hours without disturbing the pool. Aha! says the fly-fisherman, the bass will not rise to the fly. Yes, they will, but it must be cast with skill, and so rushing are the rapids on either side that his casting, the strike and struggles of the hooked fish, do not create the commotion and consequent disturbance that they would in quiet waters. Most valuable things learned are by experiment. Theory may teach but practice makes perfect. To catch a bass in midsummer in the streams of southern Indiana, requires patience, perseverance and a knowledge of the stream. By these requisites do not understand that the effort is to catch these braves of the waters on their spawning beds. Far from it. It is after they have gone through that process that they are the most wary. In the early spring and during the first frosts in the fall season the bass will rise to fly or bite at minnow, but in the season when camping out is the most agreeable, it requires finesse to catch the finny pride of middle Western waters. It is then the art of the angler has the most exercise.

Standing in the rapids and casting the fly for the bass one may occasionally be surprised by the lunge of the mascalonge (called the pike, but which David Starr Jordan pronounces the mascalonge of the great Northern lakes), and if he has tackle strong enough and his nerve is responsive to the effort, one of the gamest fish that swims may reward the expert angler. Within a mile of water stretch from where the patient angler in the picture stands, five pike (mascalonge) were captured in a short time, the smallest weighing 6 and the largest 8lbs. Dr. Jordan says these fish, or their progenitors, went down the Mississippi to the mouth, thence up the Ohio to the mouths of the small rivers emptying into that stream, up which they went and spawned and to which they annually return.

As a hint of how we live, here is a dinner bill of fare, in plain English, as all bills of fare should be made out for English-speaking people:

Turtle Soup.

Turtle fried in rolled crackers. Baked Mascalonge.

Claret Punch.

Broiled Squirrel, Frog Legs. Broiled Mushrooms.

Corn roasted in husk on the coals.

Boiled Beans with Bacon. Stewed Potatoes with cream dressing.

Buttermilk. Sweet Milk. Tea. Coffee.

Liquors.

Cigars—Cob Pipe if preferred.

We catch our own turtles, shine our own frogs, gather our own mushrooms, and, if particular about it, can milk the cows and make our own buttermilk, which the same we have not done.

Coon hunting at night is a favorite amusement for the young folks.

There is Wyandotte Cave only a mile away, where the underground way to the bowels of the earth can be traversed. And what is there not here or hereabouts to charm the eye, make music to the ear and cheer the heart of all who love nature in her manifold beauties. JAP.

NEW ALBANY, Ind.

## CAMPS OF THE KINGFISHERS.—V.

### CARP LAKE, MICHIGAN.

#### The Carp Lake Camp.

KELPIE was feeling better than when he first joined us, but he was still "powerful weak an' porely," and he was ordered to plant himself in a chair in the shade, light his pipe, look on and take comfort, which he did with some growls and protests, as he said it was the first party he was ever out with that wouldn't let him do any of the work of making camp.

But we wanted him to take it easy till he came to his appetite and gained a little strength, and we at last convinced him that it was no use for a "little old fragile half sick feller" to stand up and argue against four sizable old strong and hearty ones.

He had found his way into our hearts from the start, and I believe any of us would have turned out of a snug bed at midnight to roost on the ground and make a place for him.

The three larger tents were put up in line a few feet back from the break of the nearly perpendicular bank, which was here 8 or 9ft. above the level of the lake.

All along the steep slope, down to the narrow strip of sandy beach was a growth of young birch trees, white cedars and small bushes, with here and there a wild cherry literally loaded down with bright red, half ripe cherries, on which the robins, bluejays, flax birds and others of our feathered friends would have a rare feast as they ripened.

Between this and the foot of the hill, from 4 to 8 rods wide in places, was a strip of level, grass-grown, sandy ground entirely free of bush or shrub, except a few puny looking mullen stalks that had lost the ambition to grow for lack of moisture in the hot, sandy soil.

Near the first tent put up, a few feet from the bank, were two low, wide-topped jack oaks, dividing near the ground into two and three separate branches, and under their spreading boughs Charley and I built the table and stretched the big fly over it, tying the guys on the lake-side to small trees over the edge of the bank.

The ironclad was taken out of its box and the empty box mounted on its side on one end of the long table, the hinged lids to swing up, and this served admirably for a cupboard in which the keeper of the frying-pans kept his tin cups, plates, knives and forks, spoons, salt, pepper and sich. Here was at once our dining-room, parlor and general loafing place, a cool, laziness-breeding retreat, for it was in the shade at all hours of the day.

A couple of rods from the big fly, up lake, near the bank, where he would have shade in the afternoon, Barney's kitchen table and fireplace were located, and just across the road at the foot of the hill his tent was pitched to be handy to his working territory.

Kelpie, who had been lazily looking on and "cogitatin' in his mind" during the camp-making, emerged from a reverie and the shade of the oak with a well simulated Rip-Van-Winkle expression on his face, remarking as he knocked the ashes from his fireless pipe, that "it looked like somebody had been around there making a camp, and being a stranger in these parts, he wondered if he could get to stay all night with them."

This smacked of a protest against his enforced idleness, but his conscience was quieted by old Sam with, "Take it easy, old pard; we don't 'low any sick man to do any work around this ranch. Jest wait till ye kin git away with a pound or two o' bacon at a settin' an' git some fat on yer ribs, an' then maybe we'll let ye do somethin'—see?"

The wagon came back with the straw in good time and before dark the beds were made and the camp about finished except for a pole on which to hoist "old glory" to the breeze.

Barney put a good supper on the new table, helped out by a bucket of rich milk brought up from the house by neighbor Gehring, which was a welcome change from the pasty "condemned" stuff we had been using in our coffee at Green Lake, and even Kelpie attacked that supper with a zeal that started Barney into a quiet chuckle, as he poured him the second cup of coffee, at the success of his cookery.

We built no camp-fire that night, but went early to bed, as happy and tired a lot of mortals as ever turned in for a night's well-earned rest.

Next morning Charley and I walked down to the village to get a few supplies at the store and hire a couple of boats, old Sam going along with the axe at a "right shoulder shift" as far as a tract of swampy woods below the birch grove to cut a flag pole.

We found our friend Oberlin, who was postmaster and proprietor of the store, the same genial clever fellow as when we made his acquaintance the year before, ready to lick a stamp for a fair customer, or sell at a "marked down" anything from a cross-cut saw or a Chicago ham down to a yard of calico, a fish hook or a stick of black jack chewing gum. A good country store keeps about everything necessary to the comfort of mankind, and our wants were soon supplied, not omitting a "reddin' comb" for old Sam, whose wild-looking unkempt locks, Charley said, imitating Sam's manner of speech when he affected backwoods dialect, which was most of the time—"made him look like one o' them furrin' pianer pounders what goes 'round givin' recitals, as they call 'em."

Oberlin told us where we could hire a couple of boats, and in half an hour we were pulling against a stiff wind back to camp, where we found Snakeroot and the Colonel trimming a basswood sapling about 25ft. long, with Kelpie standing by trying to figure out, as he said, "how much longer that pole would be if the crooks were straightened out of it."

The next pole Sam cut, which he found in a grove a quarter of a mile above camp near the water, was a smooth-barked white birch 60ft. high, which he got neighbor Laidlaw, living a little further up the lake, to snake down to camp next morning behind his wagon as he went to his work at the mill, and when the old flag whipped out 55ft. from the ground to a salute from the Colonel's big pistol, he was so swelled up with "tickle" over his selection that we didn't hear the last of "that dandy flag pole o' mine" till he was in the wagon a couple of weeks later ready to start for home, and it will doubtless be his model for a flag pole when we make the next camp.

To make the spot even more perfect as a camping place there was plenty of dry wood scattered along the shore under the bank for the cook's fire and the nightly camp-fire, and we were "jest about as near heaven as the Joneses ever expect to get" when Barney found next day, not more than ten rods up the lake, a spring of delicious, cold water boiling up out of the sand under the bank, with a perceptible taste of iron and, we thought, a

little sulphur in it, as it coated the gravel and pebbles over which it flowed into the lake a few feet away with a dirty, blackish copper color.

Barney dug it out with a shovel and cribbed it up with a bottomless box, and it proved a spring of great comfort to us to the very last day in camp. The temperature was exactly 46 deg., as noted by the camp thermometer after being held in it a matter of five minutes.

Flowing out of the bank not two feet away was another spring not so cold, and without any taste or sign of iron or sulphur in the water, each running a stream about the size of the grip of a bass rod.

Afterward we found along under the bank for two or three hundred yards up the lake a dozen or more other springs of about the same volume or less, several of which were more or less impregnated with iron, but we stuck to Barney's first discovery for our drinking water, as we found that besides its refreshing coldness and agreeable mineral taste, it was possessed of slightly laxative qualities, and it must have had in it, too, some mysterious property that worked directly in harmony with the digestive organs, for before we were in camp a week Kelpie's appetite had developed at such a satisfactory and remarkable rate that he could hide a square meal with a celerity that put him in the front rank, a state of affairs that kept the keeper of the fryin' pans a hustlin' to meet the increased demands made on him at meal times.

A day or two after the keeper found another spring under the bank near the flag pole, boiling up clear and very cool near the roots of some young birches; just plain, pure spring water without the faintest taste of mineral in it. This he also cribbed and used as a refrigerator, where he kept his butter almost too hard to cut easily, the milk sweet and cold, and the buttermilk in such a state of seductive freshness that there was no resisting it, and at

strife with old-time foes; him of the bronze back and valiant heart, the crafty pickerel and the mighty maskinonge—peer he of all the warriors of the North or South.

Memories of battles won and lost come trooping through the rifts in the cloud of gray; the trusty old rod doubled to its work, the swishing line taut and tense; the frantic rush, the leap in air, the whirring reel—a tuneful melody—and last of all the deadly gaff or ready landing-net, or—parted line and blighted hopes.

Brother of the rod, a look into the past age stirs the blood.

A very wizard is the old brown pipe to revive the half-forgotten recollections of river, brook and lake; of the forests and the streams; to rekindle the old camp-fires, around which the weather-beaten disciple of the rod has spent many a happy care-free hour, that will never come again.

But now I know that if the reader is an old camper with silver in his hair he will forgive me this digression and charge it up to the old pipe, for has he not himself had dreamy visions of the camps of bygone days through the smoke of the weed that comforteth the angler's heart?

The camp was finished to our pleasement and nothing remained but to go a-fishing. The Colonel did not care to go out that day, and as I had some arrangements to make with our neighbors about milk, butter, vegetables, etc., we let Sam and Charley and Kelpie open the campaign in the two wooden boats off the birch point, where we had found some good bass fishing the year before.

When I went down to the Gehring farmhouse the same surly cur was there taking a nap on the porch with one eye open, and as soon as he got it trained on me he seemed to be reminded of something, but just as he got his bristles raised to the proper elevation for trouble to set in and sounded the tocsin of war in the shape of some

Tommy, be it known, was a sturdy youngster of ten years with a sixteen year old head on his shoulders, whom everybody in the camp took a liking to for his manly and upright ways. A bargain was also struck with Tom to pick every day and bring to camp from three to six quarts of the luscious red raspberries growing wild nearly everywhere in great abundance, a contract which he faithfully carried out, and we did the rest in the way of keeping them from getting sour.

If there is anything more satisfying to the inner man than a tin cup full of ripe red "rozberries" with powdered sugar and cold rich milk over 'em, it must be two cups, which line of figuring Br'er Kelpie was ready to uphold three times a day. Twice a week a butcher's wagon from Traverse City made the rounds of the neighborhood, from which we could get a cut of beef, a roast of pork or a quarter of mutton, selected by the "keeper," with the critical eye of an old meat inspector, and then we had bass and "rockies" (we were above eating the "snakes" we caught), and bluegills and trout till had there been anything in the popular delusion that a fish diet makes brains the camp might have been appropriately named "Camp Smarty."

"Great airth an' seas!" such living as the Joneses had in that camp was a caution to dyspeptics. With all the good things with which the table was supplied and the awful examples set him in the way of hiding them from sight, Kelpie began to pick up rapidly and come back to his original shape. Every few days he would furtively let out another tuck in the waistband of his breeches, so to speak, or, to put it nautically, shake out another reef to make room for the "rozberries" and trout called for by his steadily increasing appetite.

The color was coming back in his face, and the marked improvement in his health was a revelation to us, and a

CAMP OF THE KINGFISHERS.

Robin's Nest Camp, Carp Lake, Michigan, 1891.

1. Kingfisher (Old Hickory). 2. Snakeroot. 3. Kelpie. 4. Old Bluegill. 5, 8. The Two Johns. 6. The Keeper of the Frying Pans. 7. Old Frigid.

well-regulated intervals a "vial o' wrath" found its way into the spring to be cool for the boys when they returned in the evening after a hard day at the oars and felt the need of a "liver invigorator."

For a camp of pure, solid comfort, free, too, of black flies, skeeters and "croppies" (Dick Macauley's no see 'ems) we had never found its equal, and never expect to find a better one, and many a night when sitting before the camp-fire weaving fancies in the embers and looking back to the old camps of the past through the flickering flame and smoke I longed for my old dead comrade and chum Uncle Dick Sloan to be with us again in the flesh to help enjoy it all. And sometimes my fancy outlined his fragile old form holding his well-worn old camp stool down on the further side of the fire with the half paralyzed old leg hung limply over the good one, sucking comfort from his well-seasoned old briar root pipe, and fighting with his only good arm and hand the stifling puffs of smoke from the camp-fire as in the by-gone days. Ah, me! The loss of a cherished old comrade and bosom friend who has shared your camp in brotherly harmony in all weathers for twenty odd years is a calamity that never rights itself; a wound that takes the rest of a lifetime to heal.

Thinking of him as I write, I have wandered from the trail into a wilderness of old memories, conjured up by the dissolving rings of misty gray from a reminiscence-breeding pipe of "Old Judge," through which, from out the shadowy past, appear in turn the old camps on the Tippecanoe, on Central Lake, on Sisson's, Six Mile, Carp and Black, Echo, Douglass, Brown's and Platte; and around the wavering flame of the waning fire, disputing with feeble flicker the sombre shadows of encroaching night, sit "Daddy Foulds" and "Judge" Snider, Billy Wetzel and Ben Renshaw, rare old Ben, loyal old comrades they and well beloved, who with Uncle Dan have crossed over the divide into the unknown land beyond.

Through the delusive film come memories, too, of fierce

ominous growls, Mother Gehring appeared on the scene and by a vigorous kick in his rear and a few words in German—or maybe it was the attack in the rear—prevailed on him to slink around the corner of the house, where he turned and stood eyeing me with an expression on his dog(ged) countenance that said plain as print, "Old feller, I'll get even with ye for that kick if it takes me all summer."

It was plain, too, that he thought this in German, but I have rendered it into elegant American for the benefit of any reader who may not have had to do with cross-grained Teutonic canines.

He was another good subject for a peeled elm club, which I felt the more need of because, unlike the big savage pup at Green Lake, he was not chained. I had a notion, as the ill-favored cuss glowered at me from around the corner, that he would willingly parted with another joint of his already abbreviated caudal for a chance to hustle me out of the lot and take a mou'ful out of the seat of my breeches—if nothing else—as I went over the fence; but the presence of his mistress and the remembrance of the jolt in the rear prevented the carrying out this vengeful scheme, and Mother Gehring and I proceeded with our negotiations—a hard tussle for me without an interpreter—touching on the matter of milk, vegetables, and baking bread for the camp, without further interference from "the ornery cuss around the corner." We furnished the flour and Mother Gehring baked two, three or four loaves of most excellent bread at a time as needed, and every evening we got a half gallon or a gallon of fresh, sweet, rich milk, but no butter, as she made barely enough for their own table, and all the vegetables from the garden we wanted.

From neighbor Laidlaw's, a half mile or more up the lake we got every other day a roll of golden butter right from the churn and a big tin pail full of fresh buttermilk which little Tommy took on himself to tote to the camp.

flattering testimonial to Barney's out-in-camp cookery. The properties of the mineral spring, or something else, seemed to keep us hungry most of the time, and old Sam was not much out of the way when he remarked one evening as he speared his fourth trout from the pan with his fork, "This gang would bu'st up the best tavern in ole Kaintuck in two innin's," and in the same breath, with a wink at Kelpie across the table, "Jeems Mackerel, tech them rozberries a leetle mild; too many of 'em might give ye a pain in yer diafram."

It was a great camp; full of good fellowship and good cheer, and we enjoyed it all as only they who go to the woods with long intervals between: as only they who love the voices of the forest, and hear music in running brooks.

The boys came before sundown with a couple of snakes and a fair string of small-mouthed bass, and by the time Barney had supper ready the odor from the frying-pans reminded us of old times again.

They had not found the fishing quite up to their expectations, but it was so much better than at Green Lake that old Sam's chin—which we got to read like a barometer by the elevation or depression thereof—gave indications of a mind serene and at peace with all the world. When he came up the low bank near Barney's table with chin away down it meant "nary nibble all day;" chin away up "heap good luck," with graduations between the two extremes that told almost unerringly the measure of his success for the day.

After supper we carried up some logs and limbs from under the bank and built a big camp-fire at the foot of the hill back of the tents (that started the "ornery cuss' at the farmhouse to barking, thought it was a newfangled moon, maybe), and sat around it till well into the night, telling over the stories of old camps—stories that bear oft repeating and never grow old—and laying plans for the morrow's fishing.

## THE BIRDS AND THE MUSIC BOX.

My music box I wound, and placed
It out of sight amid the grass,
Then, just beside it, artfully
Inclined a polished looking glass.

The birds were busy with their cares
Of keeping house and brooding young,
Trilling, meanwhile, soft lullabyes,
No sweeter songs were ever sung.

They heard the music in the grass,
And this is what they seemed to say:
"Why!" "What is that?" "What can that be?"
"Some bird has come from far away!"

A swallow first came skimming down,
And caught within the mirror bright
A flashing glimpse of her own wings,
Then circling upward with delight

Told all the birds that flitted near—
They heard the news with great surprise—
"A singing swallow has arrived,
I've seen it with my own two eyes."

Next robin redbreast hopped along
And chirped: "Oh, welcome, cousin dear;
No song so sweet as our old song,
'Twas kind in you to settle here."

Then an excited phœbe came,
And p'ped: "Dear me! I've always heard
That long ago, before the flood
The phœbe was a singing bird.

"And this one has a dress and hood
Just like the one I always wear;
I'll practice a few notes myself!"
"How very silly, I declare!"

A bluebird trilled. "I've just been nigh
And saw the bird. She's very fair,
With wings like bits of summer sky,
And such a modest, lovely air!"

Just then the music box ran down,
And all the birds began to sing;
A perfect medley filled the air,
That made the whole green hilltop ring.

MAPLE CORNER, Wellington, Conn. ANNIE A. PRESTON.

## THE MULE DEER IN DOMESTICATION.

THE mule deer is found in the Sierra Nevadas and Siskiyou Mountains of northern California and eastward into the Rockies, and also in the Cascades of Oregon and Washington. They are very seldom seen west of the summit, where the black-tail range. The latter sometimes cross to the eastern slope, but are not found far in the interior. The fawns of the mule deer can often be found during the latter part of May or early in June, hidden in the dense thickets of the wooded mountain side, where they have been left by the doe. If their dainty hoof-marks are seen in the soil they can be tracked, with considerable assurance of being found. When run upon they will lie very low and quiet, their ears thrown back so as to lie flat on their shoulders, and their large, lustrous eyes watching every movement of the strange enemy. If one is cautious in his approach, advancing in a sidelong direction, he may sometimes get so near to them, that by a quick spring he can catch them. It must not be supposed, however, that this little creature is slow in getting up and starting off. On the contrary, they are very active, and make no ceremony in starting. A sudden spring raises and throws it forward at the same time. And for a short distance they are very fleet, but when quite young they soon tire and can be run down and caught. Their cry is a low, plaintive bleat, which certainly must arouse the sympathy of the rather hardened captor.

The young do not run with the mother, but she goes to them a number of times during the day, that they may suckle, and then leaves them again. If you should chance upon them at this time they will separate, the doe going up the mountain side, while a streak of flicked white and russet disappearing in the thicket marks the flight of the fawn.

When captured they will struggle violently for a little while, and their sharp hoofs will do some damage to one's person or clothing. But they soon become reconciled to their new surrounding and are quite content.

They are beautifully spotted, and these remain during most of the summer, but gradually disappear as the hair falls, and by the last of September have entirely disappeared and given place to the uniform blue coat.

The fawns soon learn to drink milk from a bottle having a rubber nipple, or even from an open vessel; but owing to their habit of butting while drinking, the latter method of feeding is not always a safe one, as the dish, milk and all, is liable to be thrown into the lap of the feeder. Their appetites are vigorous, and they will drink too much if allowed, which causes indigestion and a weakened condition. They become very gentle and are fond of going into the house in search of any knick-knacks that may be given them, such as nuts, candies, fruits, etc. They know their masters or those who feed them, and will follow them about the yard. They begin browsing early, grow quite fast, and the supply of milk can be gradually cut down. The leaves of the wild rose and sarvis bushes are favorites with them, but the tender twigs and buds of various kinds are eaten, and they often graze on the meadows the same as a sheep. They generally feed late in the evening or early in the morning, preferring to lie in the shade and cool dark places during the heat of the day, away from the annoyance of flies and mosquitoes. They feed some at nigh , especially during moonlight, but dark nights are more quiet, and lie resting or sleeping under a tree or some rude cover. They will lie on the same spot night after night, preferring this to a new bed each night. In their wandering about, should they run across a cabbage patch, their appetite is soon satisfied with this dainty morsel.

The males grow a small stub of an antler the first fall. This drops off the following winter and the new antlers start out about the middle of March. These grow rapidly and are covered with the velvet most of the summer, drying and peeling off or are torn off on the bushes about the latter part of July, and by the first of September the antlers are clear and fully grown. These remain until the following January and then drop off, sometimes nearly at the same time, or there may be several weeks between the time of the two being shed.

The horns are often quite large the second autumn—that is, when the animal is a year and a half old, sometimes having four points, but there may be only a spike. Little reliance can be placed on an estimation of the age from the number of points. The hoofs of the animal in domestication grow long and are distorted, interfering considerably with its fleetness and activity. This is owing to their not being worn off by the rough rocks of the mountain sides in travel, as in the wild state.

The general appearance of the animal when quiet and undisturbed is awkward. Its form is not symmetrical; its gait is a long swinging stride. But when startled it becomes a thing of beauty; its whole figure commands admiration.

During the first year of its life its disposition is gentle and inoffensive; it is playful and harmless, but as it grows older becomes more sullen and treacherous, and will often attack children or women, and if it should get them down will stamp them with its front feet, or, jumping up and putting all four feet together, will come down, striking with all of them at once. It will also attack with its horns, and as they grow to healthy proportions it can do considerable damage in this way. It is prone to use them in a brisk tussle with the clothes line or any flaunting rag that it imagines is defying it. As sometimes happens, when in its moonlight rambles it comes across the previous day's washing idly flapping in the night breeze, it will strike at the garments with its feet, and the good housewife next morning finds the shirts and various other articles slit from end to end and hanging in halves and different shapes along the line. But not always is the battle to the brave or the strong. If during the fierce attack the line should break and become fastened around the antlers of the brave charger, there is a change of programme. The line and its array of ghostly forms now becomes the attacking party, and follows close the retreating and thoroughly frightened monarch of the forest, flopping and striking at every bound, producing a scene of the wildest confusion and most laughable nature. At the finish the deer is the most exhausted and subdued, if not the more dilapidated of the two.

The female is less sociable and more timid and treacherous than the male, neither is it so vigorous under domestication. Both are subject to diarrhœa and kindred disorders, owing probably to the change in diet. If not given entire freedom, and that in the locality or climate in which they are found in their wild state, they become sickly and do not live as a rule longer than three or four years, generally dying from some bowel trouble. If the does bear young at all, they are liable to be weakly and do not attain full growth.

When about a year old if given full liberty the animal will leave the place for several days at a time, and then return, only to leave again when its fancy dictates. Finally on one of these trips, especially if it be in the fall of the year, it meets with congenial company and never returns. Should you in hunting run across the band of deer to which it has joined itself, it will recognize you as a familiar and harmless creature, and will stand looking at you, until the rest have gone so far that it fears it will be lost from them, and then turns and follows them. This confidence on its part sometimes causes it to lose its life at the hands of some hunter who is not acquainted with the fact that it is the property of some particular individual.

The mule deer is larger than other species, sometimes attaining a weight of 275 or 300lbs. The best method of hunting the animal, and the various experiences one has in its capture must be deferred for some future time, or to some more skilled marksman than the writer.

DES MOINES, Ia. SYLVAN.

## SNAKES.

[*Continued from Page 8.*]

IF one's knowledge of snake habits is alone from observations made on specimens in captivity, but little credit should be given unless a study has been made covering a period of several years, and even then at best much is lacking. I am well satisfied that much that is written on the subject is copied from the writers of the marvelous or presented from stories recounted by others. One quickly learns or at least believes, and

"Like one,
Who having, unto truth, by telling of it,
Made such a sinner of his memory,
To credit his own lie."

The idea that a snake can strike for its full length or a greater distance, and that, too, from the coil, is a popular and very erroneous belief, and must be quickly dispelled on consideration by every thinker. If a snake struck from a coil of two or even one and a half convolutions it would of necessity have to make one and a half turns or more of its head. To illustrate this plainly let any one flex the elbow, resting the finger-tips on the shoulder; then present the finger-tips from you at an object, straightening the arm. It will be seen at once that the hand has to make a half revolution in describing the

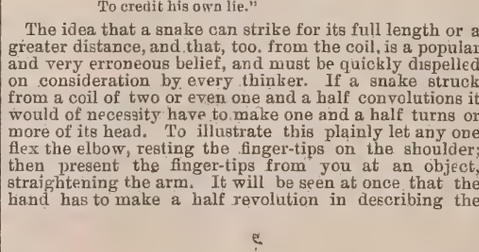

FIG. 1. FIG. 2.

semicircle in order to have the fingers still in position with palm of hand presenting down. Of course a striking snake does not direct his head away from the enemy, but the principle is identical, and any thinker will see that it is impossible for a snake to strike any distance from a coil. The fact is, no snake in America that I have met with can strike half the length of the body, anyway, counting from a standard or central point in the coil. Of course the innocuous species lack the dash and vigor of the poisonous ones in attack, but any person can readily verify what I say in the following lines by taking observations on any small streaked snake, and settle a point to their satisfaction. A massasauga 24in. in length can strike from a central point about 9 or 10in., but rarely more, and a large rattler 6ft. long could cover 3ft. or less. I have repeatedly irritated blacksnakes and blue racers and caused them to assume the defensive, and do not think one ever reached over two-fifths from a central point; that is, 2ft. in a length of 5ft.

In Fig. 1 is shown a very large massasauga lying at rest, and much as the diamond rattlers lie, although a favorite position with them is with the rattle more elevated and frequently drawn into the middle of the coil. Here the dotted lines indicate how the tail is vibrated by muscular action to warn in attack. At *A* is seen the deep pit in the upper jaw, an invariable cavity, which is well defined and lies between the eye and nostril in all rattlers, moccasins and copperheads, serving as an identifying mark for many poisonous species.

Fig. 2 shows exactly the position, from above, of a small massasauga ready to strike. The head is drawn back and the body arched out so that it can get the full spring of its tense muscles, and which it could not do from a coil. This is the exact position a massasauga assumes when badly bothered and from which it strikes about quicker than a flash and with remarkable accuracy within a short distance. It will be seen that there is no coil, or at least what we should look for from the descriptions we read of the marvelous, convolutions rising coil on coil, etc. At *C* is represented the head when thrown or sprung forward and which is elevated considerably, as could be seen if viewed from the side. *B* is the central point which I use or figure from as a standard from which to measure striking distance. Of course, the position varies constantly in an irritated individual, and frequently I have teased specimens so that they would flop about, first biting from one side, then the other, until finally they refused to strike at all. One word more and I have done on the subject of striking. Whoever answers this article let him quote no authority, but give only personal observations. "I'm weary of conjectures." Snakes cannot and do not strike from a coil, and though a portion of the body remains coiled, that portion thrown forward from a central point must certainly be free from the coil. Another time will consider snakes' methods of ejecting their venom.

DR. MORRIS GIBBS.

### The Red Desert Buffalo.

The *Rawlins* (Wyoming) *Journal* says that a buffalo bull was discovered on the range near Bridger Pass one day this spring and that he is believed to be one of the bunch that range up on the desert north of Bitter Creek. This bull was probably one of the survivors of the bunch, now we fancy all gone, which used to range in the Red Desert country. Not so very many years ago there were 450 of these, but they have been growing fewer in numbers, and when we last heard of them, a year or two since, there were only about fifteen left.

## RIFLES FOR BIG GAME.

*Editor Forest and Stream:*

With regard to the size and weight of rifles for deer, it is plain that it depends not only upon the shooting capabilities of the man, but also very greatly upon the make of rifle and kind of ammunition used. The .45cal. Winchester need not weigh more than 9lbs., even when used with 100grs. good powder, if it is held properly. What difference will 1 or 2lbs. make to a sportsman?

I have shot a deer dead with a .32 long, and then had another run off, apparently unhurt, with at least two bullets in him.

I should like your correspondent to see my .32-40 do the work, and see whether it is a "bean-blower." A rifle with a good powder charge and a light bullet will do far better work than a much larger caliber, using a badly proportioned cartridge. A .32-40 should have a rapid twist, because otherwise, sufficient rotation will not be given to the bullet, to enable it to maintain its accuracy. Finally, though I prefer a .45 for all large game, I maintain that a .32 40 properly handled and using a split bullet is quite large enough for deer. "Aztec" says the .38 40 is large enough; well, my 32 40 is a long way ahead of a .38 40, as regards power, penetration, accuracy and long range. All sportsmen should bear in mind that good cartridges, good shooting and good rifles do the work, whether the calibers used are large or small.

BERGERVILLE, Quebec. L. D. VON I.

*Editor Forest and Stream:*

The comparative general effects of the .32cal. with any powder charge, and the .50 110 will be as follows: A deer struck by a .50-110 hollow point ball back of the shoulders is virtually dead the instant the ball hits it. If struck in the shoulder the animal is paralyzed, and remains in that condition until it dies. The opposite shoulder will be uninjured. If struck too far back, it is so badly hurt it cannot go away, and can be dispatched by a second ball.

A deer shot with a .32, any powder charge, will feel a sting, and being frightened by the report of the gun, will make a run. If the ball in passing through the animal should happen to sever any large artery, the deer will die—give it time enough. If shot in the shoulder the hunter may get it. The meat of the forequarters will be badly "bloodshot," the certain result, if the animal lives after getting the wound. If shot too far back, and the intestines are "distorted," it will also die. If not shot again it will go about one mile, and then lay down. And the hunter when he finds it—if he finds it—will also find from eight to twelve beds the deer has made, beds of great suffering. The meat of the deer will be valueless, but the man that shot it will have the satisfaction of knowing that by using a trifling gun he has added hours of agony to the death of a beautiful, harmless creature.

ED. RICHMOND.

COLORADO.

## A BIT OF GROUSE HUNTER'S LORE.

THE game laws of New York allow ruffed grouse shooting between the first day of September and the first day of January, and although the young birds are powerful and quite knowing early in the spring, they are not much hunted until the autumn leaves are falling and the cool, invigorating air allows the hunter to climb and tramp over windfalls and rocks with comfort. During the months of September and October the young grouse have comparatively short tails and small ruffs, so that they are readily distinguished from the old birds, but by the latter end of the season many of them are in perfect feather except that they lack the sheen, like that of polished mahogany, which can be observed when the back of an old bird is held in the proper light. The very large birds with iridescent black ruffs are usually cocks, although it is frequently difficult to find any marks of differentiation in plumage which will distinguish them from hens, and hunters are very often mistaken as to the sex of any particular ruffed grouse. The best test without dissection is perhaps that afforded by spreading the tail to it's full extent. If the two external tail feathers can be brought into a straight line with each other before the other feathers of the tail separate from each other at the margins, the possessor of that tail is in all probability a male bird. The feathers of the tail of the hen bird usually separate from each other while the two external tail feathers are making an obtuse angle. It is customary for hunters to suppose that the birds with brown or chocolate-colored ruffs are females, but the color of the ruff is not a distinctive sex mark.

The general coloration of ruffed grouse varies greatly in different localities, the "partridges" from northern New England, for instance, being almost invariably ashy gray in general effect, the color of the tail being most pronounced. In Pennsylvania the "pheasants" give an impression of reddish brown coloring, and the tails of these birds are beautifully rich in their reddish elements. In New York State we find red birds and gray birds in about equal numbers, and in one brood we find individuals representing both extremes in such color variation, just as is the case among the screech owls. Ruffed grouse from Oregon and from Texas are smaller and much lighter than their Eastern relatives. Late in the autumn the grouse develop a row of narrow movable projecting scales along the sides of the toes for aids in walking upon slippery snow and ice, and these scutellæ, as they are called, drop off when the snow melts in the spring. The average weight of full grown Eastern grouse is about twenty three ounces, but this weight varies two or three ounces in accordance with the character and abundance of the food supply. The food in the autumn includes almost all berries that are accessible in any given locality, but sumac and cedar berries are not usually eaten until winter. The grouse eat beech nuts, acorns, chestnuts, mushrooms, vetch pods and seeds, witch hazel flowers and many succulent leaves. They rarely touch wheat, maize, oats, or barley, but of buckwheat they are inordinately fond, and early in the season they strip off the flowers and immature grains, and continue to glean in the buckwheat fields until the stubble is deeply coveredwith snow.

Hunters who are familiar with the birds' habits beat the fences and deep furrowed plowed ground all about the buckwheat fields that are not too far removed from the woods, and find there many birds that the sportsman in the brush knows nothing about. Grouse are fond of tearing the fleshy fruit of the skunk cabbage to pieces in order to get at the seeds. They devour the fruit of all of the species of wild grapes with avidity, and a covey of grouse feeding among the tangled festoons of grapevines furnishes an inspiriting spectacle for one who knows how to approach them with due caution. The leaves of the bishop's cap (*Tiarella cordifolia* and *T. nuda*) are as staple an article of diet with ruffed grouse as bread and butter are for the American citizen, and at all seasons of the year fragments of the rough lobed leaves are found in their crops; even to the exclusion of all other articles of diet at times. During the winter the food consists principally of the buds of birch, poplar and maple trees, the leaves and berries of the wintergreen, and the leaves of the bishop's cap; and as there are very few days during the winter when grouse cannot find an abundance of some one of these forms of provender they are almost always in good condition and "as plump as partridges." Kalmia leaves, which are sometimes eaten by them in winter, are said on good authority to make the flesh temporarily poisonous for man, and the fact that the birds' food directly affects their flesh is exemplified in the delicious aromatic flavor of grouse that have been feeding extensively upon birch buds and wintergreens, the grateful odor pervading the whole house when such birds are so unfortunate as to get upon the hot old kitchen stove just before dinner time.

Ruffed grouse are as neat in their habits as such proud and self respecting birds ought to be, and they are very fond of dusting in the wallow holes which they make in the dry dust of crumbling logs in the woods. Wherever the grouse live we are so certain to find their dusting holes that the hunter wastes no time in the woods in which the crumbling logs have not been thus utilized by the élite. During the day the birds spend most of their time in the brushy edges of the woods and in the brambly gullies that extend out into the fields, and if there are stumps near at hand in the open the grouse are fond of running out about them and hiding there during the middle of the day. We should naturally expect to find the grouse on the sunniest hillsides when the weather is very cold, but they seem to be rather indifferent to the temperature of their surroundings and the covey is almost as likely to be found in the dreary north-facing ravine as on the warm southern exposures. When they are in company the birds keep up a constant talking to each other, but in low voices as though fearful of being overheard. There are querulous notes from the spinsters and solemn warnings from the dignified matrons when the obstreperous young cocks challenge each other to a wrestle, but the loudest vocal expression of the ruffed grouse is the clucking and squealing of a bird that has lain long to the dog, when, running like a rabbit out from under the brush heap, he bustles on roaring wing away through the swishing birch twigs and gives vent to his emotions as he departs. Not all grouse squeal when thus flushed, but they seldom fail to utter their loudest notes when alighting on a tree overhead after being startled; and when running for a hiding place they utter a hurried "*quit, quit, quit*," that attracts the immediate attention of the dog. A mother grouse with young whines precisely like a dog when an enemy is near her brood.

At night the grouse usually sleep upon the ground, and indifferently in the woods or out in the open clearing if the weather is dry. When it is rainy they sleep under logs or rocks or clumps of conifers, and frequently a whole covey will be found at night scattered along under an old tumbledown fence in the woods. In winter when the snow is deep they sleep either high up in coniferous trees or under the snow in the open, so that just at evening it is no uncommon sight to see a covey of grouse diving from wing, one after another, into the snow. If the weather is very boisterous and the birds happen to live down to a patch of wintergreens or clover or young winter wheat they may remain under the snow for several days, burrowing for short distances and eating the green leaves that are thus found. When a grouse is sitting quietly at no great depth beneath the snow, a little hole about as large as one's finger is kept open by the bird's breath, and the moisture congealing in large flakes upon the frosty twigs or grass just over the hole will easily locate the bird for a good observer; and the grouse in such a position will allow one to approach quite near before he leaves his comfortable room beneath the winds.

MAJOR H. W. MERRILL.

The snow is sometimes too hard to serve for house purposes, and then the birds may not alight upon the ground for many days at a time, but fly from the hiding tops of evergreens to the trees in which they bud at morning and at evening. On the first warm day though, when the sun has softened the snow, the boy who is following a rabbit in the warm corner of the thicket will suddenly come upon the neatest, the trimmest and the most inspiring bird track that is ever imprinted in any woods on the pure white surface of this good earth of ours. Three evenly spread toemarks in front and one short straight mark behind. One footmark just as far in advance of the previous one as that is ahead of the one before it, and all in definite order. Here the track leads around a mossy boulder; there it goes along the whole length of that half-sunken log and then straight out through the sheep path among the hazels. No slipshod stepper ever made such marks. So clear, so well defined, so mathematical a track is indicative only of such character as belongs to the noblest of all game birds, and perhaps the boy will hear from him in a moment. No! There is where he strutted; and there are the concentric segments of circles made by the wing tips in the snow as the old fellow flew, several minutes before danger approached. The danger was not so great, though, after all, if I am familiar with that boy, for the bird that left was game for a man of sharp wit and good judgment.

Grouse are quite apt to keep each other company in small coveys until spring, except when they are much disturbed, but certain very old birds are quite content to be solitary, and they are then quite difficult to approach under ordinary circumstances. A wary old bird will slide quietly out of the way as soon as he hears the sportsman approaching him, and it is folly to attempt to corner him, but most of the grouse run and hide when there are signs of danger, and a good pointer or setter will follow them easily to their places of concealment. A grouse will not often remain before the pointing dog for more than two or three minutes, and then he bursts forth with the startling roar that reminds one of the sudden dumping of a coal cart upon the pavement, unnerving the hunter who is not cool and steady in his aim. If the bird makes a high flight at first he may be expected to alight upon the ground on descending. If he goes off low he will probably slant upward at the end of his flight of a few hundred yards and alight in a tree, barring accidents which are liable to happen at the hands of gunners.

Grouse are sometimes caught in snares that are set for them on their feeding grounds, and hunters who cannot kill a flying bird are not beneath chasing them with spaniels which bark at the flushed birds and cause them to stop, out of curiosity, and alight upon limbs overhead in order to watch the antics of the dogs. The hunter can then approach closely before attracting the attention of the preoccupied grouse. It is a very difficult matter to see a grouse that has alighted in a large tree at the end of a deliberate flight, as he usually sits bolt upright very close to the trunk and moves not a feather, and unless one scans every foot of the tree systematically the bird will probably not be discovered. Hunters often declare that they have never been able to find a grouse in a tree, just as we hear young women complain that they cannot discover a four-leafed clover, and yet certain eyes are very expert at detecting grouse in trees and four-leafed clovers in the greensward; much to the discomfiture of untrained observers who were not previously aware of their lack of the requisite power.

Wing-shooting is the most certain and the most satisfactory way of getting a good bag of grouse, and for this purpose well broken pointers or setters are indispensable. Their keen noses enable them to detect the scent of a bird that has walked along the ground perhaps half an hour previously, and they follow the trail until the vicinity of the game is reached. The bird being located in his hiding-place, the dog stands silently pointing until the hunter has found a good place from which to shoot when the grouse springs out on wing. The most successful shots in the brush are not often the men who make good scores in open field shooting, for in the latter sort of work one learns to take sight along the barrel of his gun, and in the woods such sighting is naturally interfered with. The best grouse hunters of my acquaintance shoot with both eyes open and head erect, moving the gun with the same intuition that guides the batter in striking a ball after "suppressing the image" of everything except that of the object aimed at. The image of branches and trees upon the retina of the eye being suppressed at will by the hunter, he is then conscious only of the presence of the swiftly moving bird, and this object he follows as accurately with the gun as he would with his finger if he were pointing out the bird to a friend.

Very nice calculations are required in order to hit the bird, however, for if the gun were aimed directly at a crossing grouse at the instant of firing, the charge of shot would pass far to the rear of the game. It is necessary to know approximately the length of time required for combustion of the powder, the time occupied by the charge of shot in reaching any given point, and to judge correctly of the distance and direction of the angles and curves of flight of the bird. All of the factors excepting the first vary with each fraction of a second after the bird is on wing, so it would seem almost impossible that any one could be capable of making the calculations requisite for striking a swift-speeding grouse among the trees were it not for the aid of that peculiar faculty of instinctive co-ordination in action of brain and muscle. A strong bird is not easily killed even when fairly hit, and it seems cruel to allow a wounded grouse to escape, but men who have been struck with shot testify that the benumbing effect was such that they did not suffer any real pain after the receipt of the injury. When we know what a fox or hawk would do with a captured grouse it makes the hunter's conscience easy.

DR. ROBERT T. MORRIS.

### New Hampshire Deer and Grouse.

LANCASTER, N. H.—The prospects for game this fall are very flattering. Deer are seen by some of the anglers nearly every day, and people sitting on First Lake House piazza have several times seen deer in the small open space on the opposite side of the outlet, or narrows, above the dam, not over twenty-five or thirty rods from the house. Last Tuesday forenoon two ladies, guests at the Lake House, were out by the roadside above the house gathering wild flowers, when they saw a movement in some bushes just in advance of them, and on looking closely they spied a fawn not 10ft. from them. He had evidently been curled up, sound asleep, and was not aware of their approach until, as one of the ladies declared, "she could have reached out and put her hand on him."

The law protecting the deer until Sept. 1 is being strictly observed here, as has been the case for the past few years, and each year when the first of September comes is shown the wisdom of such a course, for nowhere in the New England States can a deer be more easily secured than in northern New Hampship during September or October, and it seems to us that the three Connecticut lakes possess more advantages in that direction than any other place, both in point of location and extent of territory.

This year is "partridge year," too; last season scarcely any were brought in; this season should furnish them more abundantly, and favorable reports of young broods are beginning to come in.

ROB.

THE four full-page pictures, Young Mountain Sheep, American Elk, Group of Elk, and FOREST AND STREAM'S Grizzly, from the "*Forest and Stream Animal Series*," handsomely printed on heavy paper suitable for framing. The set of four (in tube) will be sent for ten cents (stamps will do).—*Adv.*

### THE LONELY COOT.

TOM JENKINS owned an old musket,
Aged ninety years or more;
And everywhere that Jenkins went,
You'd find this old smoothbore.

He took it to the shore one day,
The wary duck to shoot;
And when the pebbly beach he reached,
He spied one lonely coot.

Tom hid behind a pile of stones
That this coot he might secure:
He capped his gun with a G. D. cap,
And aimed both long and sure.

For once the gun did not miss fire,
To Tom's unbounded glee;
And around that coot's devoted head
Struck a charge of double B.

But the coot it never moved or winked,
Or turned upon its back,
So in his gun Tom again poured home
An ounce of powder black.

On top of this a dried grass wad
And a pound of double B;
All rammed home by Tom's strong arm,
And capped with the old G. D.

Eight times or more Tom shot in vain,
Then cursed his wayward luck;
This iron-clad coot that died so hard
Was but a decoy duck. HERBERT A. DAVIES.

OSWEGO, N. Y.

### The Quail Shooting Club.

QUAIL shooters who have been used to expending much time and money per quail for their sport, will do well to investigate the plan proposed by an advertiser, "Quail Shooter," in this issue. As explained to us this is a perfectly practicable project for securing unusual quail shooting opportunities, and there is in it nothing of a speculation for the advantage of the advertiser, who is a sportsman, and has no axe to grind.

### Want a Camp Away Back.

*Editor Forest and Stream:* Having but two or three weeks at our disposal this fall, and consequently not wishing to spend much time en route, a small party of us have concluded to try Pike county, Pa. We wish to get well back and establish a camp. Can some of your readers give us through the columns of your valuable paper a pointer on the best locality for bear and deer, and how to reach it? W. A. D.

### Hardly.

*Editor Forest and Stream:*

Did you ever see or imagine anything more unsportsmanlike, inconsistent, more double-faced or incongruous than the spectacle of a professed sportsmen's paper this week offering nets for sale for advertiser of all descriptions, both for fish of all kinds *and partridges*, etc. Why, it's shameful. OLD SCHOOL.

## Camp-Fire Flickerings.

"That reminds me."

BILL PHILIP, a big, good natured Irishman—Red Bill we called him—told me he never shot a gun in his life. He always had a fine dog, usually a hound, and was fond of going hunting with some one of us hunters, taking his dog along on a chain. Passing his cabin one morning, I noticed his dog—a powerful hound—and I said to Bill, "What did you cut his tail off for?" "Well, I tell ye," says Bill. "Jim Mason an' me went hunting up the Hog Meadow Creek the other day, and just below where the tote road crosses it we jumped a big buck. The dog see him and gives a big jump and jerked me down on me hands and face, and away he went chain and all. The deer run across the alder bottom, and was just at the culass, when Jim shot at it. We went and looked, and Jim says, 'We'll get it; here is lots of blood;' and sure. the blood was spattered all over. We followed the trail down across the hardwood ridge to the river, and over into the big blow-down about a mile, finding blood all the way, when the dog came back to us. And phat do ye think? Every bit that Jim hit the deer was to shoot two inches off the tail end of the dog." IGNOTUS.

### It Puts Names on Hotel Registers.

*(An entirely unsolicited letter.)*

DUKINFIELD HOUSE, Avoca, North Carolina, May 18, 1892.—Forest and Stream Pub. Co.: Dear Sirs—Last season I put a small advertisement of my hotel in your valuable journal, and I must say it brought me letters from all over the country, and was the cause of quite a number of first-class Northern sportsmen finding my shooting place. I advise all who have hotels, shooting resorts, or anything for sale, to give your paper a chance. We are making great preparations for the coming season, as we have lots of quail left over for breeding purposes. While I am writing this there are several calling within 200yds. of the hotel. We are sowing large patches of buckwheat, peas, and oats all over the preserve, and intend adding one thousand more quail to the preserve early next season. I also intend giving the FOREST AND STREAM another advertisement when the season opens, to let all sportsmen know where good shooting can be found, as I believe they will be sure to see it if it is in the FOREST AND STREAM, as I think all the best of sportsmen read it. We also have as fine bass fishing at my place as can be found anywhere, and the door is always open to strangers.—S. W. EVERITT Manager.

## CLOSE SEASONS.

### Game and Fish.

THE periods designated in this summary are those during which game and fish are protected and may not be taken. For other limitations, exceptions, etc., see full text of statutes in the *Book of the Game Laws.* Where no close season is given for game or fish the law provides none.

Insectivorous birds are protected in most of the States and in Canada.

*Arizona.*—Elk, deer, antelope, mountain sheep, mountain goat, ibex, between Feb. 1 and Oct. 1. Partridge, wild turkey, geese, brant, swan, curlew, plover, snipe, rail, ducks, between March 1 and Sept. 1. Grouse (prairie chicken), five years from 1887.

*Arkansas.*—Deer, between Feb. 1 and Aug. 1. Wild turkey, between May 1 and Sept. 1. Pinnated grouse (prairie chicken), between Feb. 1 and Sept. 1. Quail (Virginia partridge), between March 1 and Oct. 1.

*California.*—Quail, partridge, grouse, wild duck, rail, between March 1 and Oct. 1. Doves, between Jan. 1 and July 1. Male deer, antelope, mountain sheep, until 1893. Female deer, antelope, elk, mountain sheep, at all times. Imported wild turkey, prairie chicken, bob white quail, pheasant, grouse, until 1895. Trout, between Nov. 1 and April 1. Salmon, between Aug. 31 and Oct 1.

*Colorado.*—Wild turkey, quail, at all times. Partridge, pheasant, prairie chicken, except from Sept. 1 to Nov. 15. Wildfowl, except from Sept. 1 to April 1. Bison, buffalo, mountain sheep, mountain goat, ibex, at all times. Elk, deer, antelope, except between July 1 and Dec. 1. Trout and food fish, December to April inclusive.

*Connecticut.*—Woodcock, quail, ruffed grouse (partridge), gray squirrel, between Jan. 1 and Oct. 1. Sora (rail) in counties of New Haven, Fairfield, Litchfield, between Jan. 1 and Aug. 20; in other counties, between Jan. 1 and Sept. 1. Wild duck, wild goose, brant, May, June, July and August. Trout, except from April 1 to July 1. Black bass, in May and in June until after June 10.

*Delaware.*—Partridge, grouse, quail, woodcock, rabbit (hare), in Kent and Sussex counties, between Feb. 1 and Nov. 15; in Newcastle county, between Jan. 1 and Nov. 15. Reed bird, ortolan, rail, between Feb. 1 and Sept. 1. Wild goose, swan, brant, wild ducks (except summer or wood ducks), between April 15 and Oct. 1. Black bass, trout (in Newcastle county), between Nov. 1 and June 1.

*District of Columbia.*—Partridge (quail), between Feb. 1 and Nov. 1. Pheasant (ruffed grouse), between Feb. 1 and Aug. 1. Woodcock, between Feb. 1 and July 1. Pinnated grouse (prairie chicken), between Feb. 1 and Sept. 1. Snipe, plover, between May 1 and Sept. 1. Wild duck, wild goose, brant between April 1 and Sept. 1. Water rail, ortolan, reed bird, rice bird, between Feb. 1 and Sept. 1.

*Florida.*—Deer, except November to February inclusive. See county laws. Wild turkey, quail (partridge), except from Nov. 1 to March 1.

*Idaho.*—Buffalo, elk, deer, antelope, mountain sheep, between Jan 1 and Sept. 1. Mongolian pheasant, at all times. Quail, except between Oct. 1 and Dec. 15. Pheasant, grouse (prairie chicken), between Feb. 1 and July 15. Wild duck, goose, between April 15 and Aug. 1. Moose, for six years from 1891.

*Illinois.*—Deer, wild turkey, between Jan. 15 and Sept. 1. Pinnated grouse (prairie chicken), between Nov. 1 and Sept. 15. Ruffed grouse, quail, pheasant, partridge, between Dec. 1 and Oct. 1. Woodcock, between Sept. 15 and July 15. Gray, red, fox or black squirrel, between Dec. 15 and June 1. Wild goose, duck, brant, between April 15 and Sept. 15.

*Indiana.*—Deer, between Jan. 1 and Oct. 1. Quail, pheasant, from Dec. 20 to Oct. 15. Wild turkey, between Feb. 1 and Nov. 1. Prairie chickens, between Feb. 1 and Sept. 1. Woodcock, between Jan. 1 and July 1. Wild duck, between April 15 and Sept. 1. Squirrel, from Dec. 20 to June 1.

*Iowa.*—Pinnated grouse (prairie chicken), between Dec. 1 and Sept. 1. Woodcock, between Jan. 1 and July 10. Ruffed grouse (pheasant), wild turkey, quail, between Jan. 1 and Oct. 1. Wild duck, goose, brant, between May 1 and Aug. 15. Deer, elk, between Jan. 1 and Sept. 1. Salmon trout, between Nov. 1 and April 1. Bass, pike, croppie, other game fish, between Nov. 1 and May 15.

*Kansas.*—Prairie chicken (pinnated grouse), between Sept. 1 and Jan. 1. Quail, at all times, except that a person may shoot quail on his own premises between Nov. 1 and Jan. 1.

*Kentucky.*—Female deer, March to August inclusive. Quail, partridge, pheasant, March to September inclusive. Wildfowl, May, June, July, August, and first half of September. Woodcock, January, February, March, April, May. See county laws.

*Louisiana.*—Deer, between March 1 and Oct. 1. Wild turkey, between April 15 and Oct. 1. Quail, partridge, pheasant, between April 1 and Oct. 1.

*Maine.*—Moose, deer, caribou, between Jan. 1 and Oct. 1. Wood duck, dusky duck (black duck), teal or gray duck, between April 1 and Sept. 1. Ruffed grouse (partridge), woodcock, between Dec. 1 and Sept. 1. Quail, between Dec. 1 and Oct. 1. Pinnated grouse (prairie chicken), between Jan. 1 and Sept. 1. Plover, between May 1 and Aug. 1. Salmon, between Sept. 15 and April 1. Landlocked salmon, trout and togue, between Oct. 1 and May 1. Black bass, Oswego bass, white perch, between April 1 and July 1. See other seasons for specified waters.

*Massachusetts.*—Deer, at all times. Pinnated grouse, woodcock, ruffed grouse (partridge), between Jan. 1 and Sept. 15. Quail, between Jan. 1 and Oct. 15. Wild ducks, between April 15 and Sept. 1. Plover, snipe, sandpiper, rail, shore, marsh or beach birds, between May 1 and July 15. Wild pigeon, gull, tern, between May 1 and Oct. 1. Gray squirrel, hare or rabbit, between March 1 and Sept. 1. Salmon, between Aug. 1 and May 1. Trout, landlocked salmon, lake trout, between Sept. 1 and April 1 (in Berkshire, Franklin and Hampshire counties, between Aug. 1 and April 1). Black bass, between Dec. 1 and July 1. Smelts, between March 15 and June 1.

*Michigan.*—Deer in Lower Peninsula, save only from Nov. 5 to Nov. 25; in Upper Peninsula, save only from Sept. 25 to Oct. 25. Wild turkey, except from Nov. 1 to Dec. 15. Woodcock, except from Aug 15 to Dec. 15. Wild duck, wild goose, waterfowl, snipe, save only from Sept. 1 to Jan. 1 (see sections 10 and 15, page 77). Ruffed grouse (partridge, pheasant), except from Nov. 1 to Dec. 15 inclusive; in Upper Peninsula, except from Oct. 1 to Jan. 1 inclusive. Quail (Virginia partridge), save only from Nov. 1 to Dec. 15 inclusive. Pinnated grouse (prairie chicken), to Sept. 1, 1894. Trout, landlocked salmon, grayling, from Sept. 1 to May 1.

*Minnesota.*—Woodcock, between Oct. 31 and July 4. Prairie chicken, white-breasted grouse, sharp-tailed grouse, between Nov. 1 and Sept. 1. Quail, partridge, ruffed grouse, pheasant, between Nov. 1 and Sept. 1. Wild duck, wild goose, brant, snipe, all aquatic fowl, between April 25 and Aug. 20. Moose, deer, elk, antelope, between Nov. 30 and Nov. 1. Trout, save only in April to September inclusive.

*Mississippi.*—Deer, between March 1 and Sept. 15. Wild turkey, quail (partridge), between May 1 and Oct. 1.

*Missouri.*—Deer, between Jan. 1 and Oct. 1. Wild turkey, between March 1 and Sept. 15. Pinnated grouse (prairie chicken), between Feb. 1 and Aug. 15. Ruffed grouse (pheasant or partridge), quail (Virginia partridge), between Jan. 1 and Oct 1. Woodcock, between Jan. 10 and July 1. Turtle dove, meadow lark, plover, between Feb. 1 and Aug. 1.

*Montana.*—Bison, buffalo, quail, for ten years from 1891. Deer, mountain sheep, mountain goat, antelope, elk, moose, between Jan. 15 and Sept. 15. Grouse, prairie chicken, fool hen, sage hen, partridge, quail, between Nov. 15 and Aug. 15. Wild geese, wild ducks, between May 1 and Aug. 15.

*Nebraska.*—Buffalo, elk, mountain sheep, deer or antelope, between Jan. 1 and Oct. 1. Grouse, between Jan. 1 and Sept. 1. Quail, wild turkey, between Jan. 1 and Oct. 1.

*Nevada.*—Partridge, pheasant, woodcock, wild goose, wild ducks, sandhill crane, brant, swan, plover, curlew, snipe, grouse, robin, meadow-lark, sharp-tailed grouse, between Jan. 1 and Aug. 1. Quail between Jan. 1 and Sept. 1. Deer, antelope, elk, mountain sheep, mountain goat, between Jan. 1 and Sept. 1 inclusive. Trout, landlocked salmon, between Oct. 1 and April 1. Lake trout in lakes, from Jan. 1 to April 1.

*New Hampshire.*—Plover, yellowlegs, sandpipers, ducks, rails, between Feb. 1 and Aug. 1. Woodcock, ruffed grouse, partridge, quail, between Jan. 1 and Sept. 1. Moose, caribou, deer, between Jan. 1 and Sept. 1. (Dogs prohibited except between Sept. 15 and Nov. 1.) Raccoon, gray squirrel, between Jan. 1 and Sept. 1. Hare, rabbit, muskrat, between April 1 and Sept 1. Landlocked, or fresh-water salmon, between Sept. 30 and April 15. Lake trout, brook trout, between Sept. 15 and April 15 (except that lake trout may be taken with single hook and line only during January, February, March and April). Pike-perch, white perch, May and June. Black bass between April 30 and June 15. Muskallonge, pickerel, pike, grayling, April and May.

*New Jersey.*—Deer, except between Oct. 31 and Dec. 1. Quail (partridge), rabbit, except between Oct. 31 and Dec. 16. Ruffed grouse (pheasant), except between Sept. 30 and Dec. 16. Woodcock, except during July and between Sept. 30 and Dec. 16. Upland or grass plover, except between July 31 and Dec. 16. Wilson snipe, English or gray snipe, except during March and April, and between Sept. 30 and Dec. 16. Reed bird, rail bird, marsh hen, except between Aug 25 and Dec. 16. Gray or black squirrel, except between Sept. 14 and Dec. 16. Pinnated grouse (prairie chicken), except between Nov. 1 and Jan. 1. Wood duck, between Jan. 1 and Sept. 1. European partridge, grouse, hen pheasant, protected to 1895. Lake trout, October, November, December, January and February. Brook trout, except from April 1 to July 15 inclusive. Black bass, Oswego bass, December, January, February, March, April and May to May 30. Pike, pickerel, between Dec. 1 and April 1.

*New York.*—Deer, between Nov. 1 and Aug. 15 (protected for five years in Greene, Ulster, Sullivan and Delaware counties). Hounding forbidden between Oct. 11 and Sept. 10 (forbidden at all times in St. Lawrence, Delaware, Greene and Ulster counties, and between Dec. 1 and Oct. 1 in Sullivan). Black and gray squirrels, between Jan. 1 and Sept. 1. Web-footed wildfowl, except geese and brant, between May 1 and Sept. 1. Quail, between Jan. 1 and Nov. 1. Woodcock, partridge, grouse, between Jan. 1 and Aug. 15. Wilson's or English snipe, plover, rail, mudhen, gallinule, greenbittern, surf bird, curlew, water chicken, bay snipe, shore bird, between Jan. 1 and Sept. 1 (except in Onondaga, Wayne, Oneida, Cayuga, Wyoming, Genesee, Niagara, Monroe, Erie, Chautauqua, Cattaraugus and Orleans counties). Meadow lark, between Jan. 1 and Nov. 1. Robins and all other wild birds protected at all times (except English sparrow, crane, hawk, wren, raven, crow-blackbird, blackbird, kingfisher).

Trout of any kind between Sept. 1 and April 15 (trout, salmon trout and landlocked salmon under 6in. in length protected always). Salmon trout, landlocked salmon, between Oct. 1 and May 1. Black bass, Oswego bass, between Jan. 1 and May 30 (under 8in. at all times). Black and Oswego bass in Lake Geo ge between Jan. 1 and Aug. 1; Black Lake, Jan. 1 to May 5. Muskallonge, between Jan. 1 and May 30. Wall-eyed pike, pike, yellow bass, in Susquehanna River, between Nov. 1 and May 30.

*Long Island.*—Wildfowl, between May 1 and Oct. 1. Snipe, etc., Jan. 1 and July 1. Woodcock, partridge, grouse, Jan. 1 and Nov. 1. Trout, Sept. 1 and April 1. Salmon trout, landlocked salmon, Oct. 1 and April 1. Black bass, Jan. 1 and May 30. Hares (rabbits), Jan. 1 and Nov. 1. Deer, except from Nov. 10 to 16 inclusive. Black and gray squirrels, Jan. 1 and Nov. 1.

The law of 1892 abolished all existing local county laws.

*New Mexico.*—Elk, buffalo, deer, antelope, mountain sheep, wild turkey, grouse, quail, between May 1 and Sept. 1. Trout, food fish, during November to April inclusive.

*North Carolina.*—Deer, between Feb. 1 and Oct. 1; for exceptions see page 130. Partridge, quail, roe n, wild turkey, between March 15 and Nov. 1. Mountain trout, between Oct. 15 and Dec. 30.

*North Dakota.*—Prairie chicken, pinnated grouse, sharp-tailed grouse, ruffed grouse, wild duck, between Dec. 1 and Aug. 20. Quail for four years from 1891. Buffalo, elk, deer, antelope, mountain sheep, between Jan. 1 and Sept. 1. Pike, pickerel, perch, bass, muscalonge, between Feb. 1 and May 1.

*Ohio.*—Quail, except between Nov. 10 and Dec. 15. Gray, fox or black squirrel, except between July 1 and Dec. 15. Woodcock, except between July 15 and Nov. 1. Ruffed grouse, prairie chicken, except between Sept. 1 and Dec. 15. Wild turkey, except between Oct. 1 and Dec. 15. All dates inclusive. Wild duck, except between Sept. 1 and April 10, when shooting is forbidden on Sunday, Monday and Tuesday of each week. Deer, except between Oct. 15 and Nov. 20. Brook trout, landlocked salmon and California salmon, from Sept. 1 to March 15, inclusive.

*Oklahoma.*—Wild turkey, quail, partridge, prairie chicken or grouse, except from Sept. 1 to Dec. 31. Deer, antelope, between Feb. 1 and Nov. 1.

*Oregon.*—Deer, between Nov. 1 and July 1 (females, between Jan. 1 and Aug. 1). Elk, moose, mountain sheep, between Nov. 1 and Aug. 1. Wildfowl, between March 15 and Sept. 1. Prairie chicken, sage hen, between April 1 and June 15. Grouse, pheasant, Mongolian pheasant, quail, partridge, between Nov. 15 and Sept. 1. Mountain or brook trout, November to March inclusive. Redfish, lake trout, from Aug. 10 to Dec. 31.

*Pennsylvania.*—Deer, save from Oct. 1 to Dec. 15. Gray, black, fox squirrels, between Jan. 1 and Sept. 1. Hare, rabbit, between Jan. 1 and Nov. 1. Wildfowl, save from Sept. 1 to May 1. Wild turkey, between Jan. 1 and Oct. 15. Upland or grass plover, between Jan. 1 and July 15. Woodcock, between Jan. 1 and July 4. Quail (Virginia partridge), between Dec. 15 and Nov. 1. Ruffed grouse (pheasant), pinnated grouse (prairie chicken), between Jan. 1 and Oct. 1. Rail, reed bird, except in September, October and November. Speckled trout, save from April 15 to July 15. Salmon, grilse, save from March 1 to Aug. 15. Lake trout, in October, November and December. Black bass, rock bass, wall-eyed pike (Susquehanna salmon), between Jan. 1 and May 30. Pike or pickerel, between Feb. 1 and June 1. Pike County.—Deer, except between Oct. 1 and Dec. 1. Gray or black squirrel, except between Sept. 1 and Dec. 15. Gray rabbit, except between Oct. 15 and Dec. 15. Wood duck or summer duck, except between Oct. 1 and Jan. 1. Woodcock, except between July 4 and Dec. 15. Quail (Virginia partridge), except between Oct. 15 and Dec. 1. Ruffed grouse (pheasant), except between Sept. 15 and Dec. 15. Salmon or speckled trout, except between May 1 and Aug. 1. Pike or pickerel, except between June 1 and Feb. 15.

*Rhode Island.*—Grouse or heath hen, between Jan. 1 and Nov. 1. Woodcock, from Jan. 1 to Sept. 1. Ruffed grouse (partridge), from Jan. 1 to Sept. 1. Quail, from Jan. 1 to Oct. 1. Barnard's tattler, upland plover (grass plover), from April 1 to Aug. 1. Dusky or black duck, wood duck or summer duck, blue or green-winged teal, from May 1 to Sept. 1. Hare (rabbit), gray squirrel, between Jan. 1 and Sept. 1. Trout, between Aug. 15 and March 1. Black bass, between March 1 and July 15.

*South Carolina.*—Deer, between Feb. 1 and Sept. 1. For exceptions see page 155. Wild turkey, partridge, quail, woodcock, pheasant, between April 1 and Nov. 1. Dove, between March 1 and Aug. 1.

*South Dakota.*—Prairie chicken, pinnated grouse, sharp-tailed grouse, ruffed grouse, between Jan. 1 and Aug. 15. Wild duck, snipe, goose, brant, plover, curlew, between May 15 and Sept. 1. Quail for three years from 1890.

*Tennessee.*—Deer except from Aug. 1 to Jan. 1. Quail (partridge), except from Nov. 1 to March 1.

*Texas.*—Deer, between Jan. 20 and Aug. 1. Wild turkey, between May 15 and Sept. 1. Pinnated grouse (prairie chicken), March, April, May, June and July. Quail (partridge), April, May, June, July, August and September.

*Utah.*—Elk, deer, buffalo, bison, antelope, mountain sheep, between Dec. 1 and Sept. 1. Quail, partridge, pheasant, prairie chicken, sage hen or grouse, between March 15 and Aug. 15. Wild goose, wild duck, snipe, between April 1 and Sept. 20. Trout, except between June 15 and Feb. 15.

*Vermont.*—Deer, to Nov. 1, 1900. Quail, ruffed grouse, partridge, wild goose, wild duck, between Feb. 1 and Sept. 1. Woodcock, between Feb. 1 and Aug. 15. Trout, landlocked salmon, salmon trout, togue, between Sept. 1 and May 1. Black bass, wall-eyed pike, pike-perch, between Feb. 1 and June 1.

*Virginia.*—Deer, from Jan. 1 to Aug. 15. Partridge or quail, between Jan. 1 and Oct. 15. Pheasant, ruffed grouse, wild turkey, between Feb. 1 and Sept. 15. In the counties west of the Blue Ridge (except Rockbridge), and in Rockbridge and the counties east of the Blue Ridge (except Prince Edward), between Jan. 15 and Oct. 15. In Prince Edward, between March 1 and Oct. 15. In Fluvanna, between Feb. 15 and Nov. 15. Waterfowl, between May 1 and Sept. 1. Woodcock, between April 1 and Nov. 1. Trout, between Sept. 15 and April 1. River bass (black bass, pond bass, black perch), pond bass (southern chub), between May 15 and July 1.

*Washington.*—Elk, moose, deer, mountain sheep, mountain goat, between Jan. 1 and Aug. 15. Wildfowl, between April 1 and Aug. 15. Mountain grouse, blue or dusky grouse, ruffed grouse (pheasant), pinfail grouse, prairie chicken, sage hen, between Jan. 1 and Aug. 1. Quail, and gold and silver and China or Mongolian pheasant, for five years from 1891. Trout, from November to April inclusive.

*West Virginia.*—Deer, from Dec. 15 to Sept. 15. Quail (Virginia partridge), between Dec. 20 and Nov. 1. Wild turkey, between Jan. 1 and Sept. 15. Ruffed grouse (pheasant), pinnated grouse (prairie chicken) between Jan. 1 and Nov. 1. Wildfowl, between April 11 and Oct. 1. Snipe, except between March 1 and July 1. Woodcock, except between July 1 and Sept. 15. Jack salmon or white salmon, between April 1 and June 15. Brook trout, landlocked salmon, between Sept. 1 and Jan. 1.

*Wisconsin.*—Woodcock, quail, partridge, pheasant, ruffed grouse, prairie chicken, prairie hen, sharp-tailed grouse, other grouse, mallard, teal, wood duck, snipe and plover, between Dec. 1 and Sept. 1. Wild duck, wild goose, brant, all aquatic fowl, between May 1 and Sept. 1. Deer, between Dec. 1 and Nov. 1. Brook, rainbow and mountain trout, from Sept. 1 to April 15. Muckinaw or lake trout, from Oct. 1 to Jan. 15. Pike (wall-eyed pike) from March 1 to May 1. Black, green and Oswego bass and muscalonge, from Feb. 1 to May 1.

*Wyoming.*—Partridge, pheasant, prairie chicken, prairie hen, grouse, except from Aug. 15 to Nov. 1. Sage chicken, except from July 15 to Sept. 15. Wildfowl, except from Aug. 1 to May 1. Deer

elk, moose, mountain sheep, mountain goat, antelope, may be killed by residents at any time for food; at no time by non-residents. Buffalo to 1900.

CANADA.

*British Columbia.*—Deer, elk, reindeer, caribou, mountain goat, mountain sheep, hare, from Jan. 1 to Sept. 14 inclusive. Grouse, partridge, prairie fowl, quail and meadow lark, between Feb. 1 and Sept. 1. Wild duck, between March 1 and Aug. 31 inclusive. Cock pheasant, between Feb. 1 and Sept. 30. On the mainland of British Columbia, quail and cock pheasant, to 1894. Trout, from Oct. 15 to March 15 inclusive.

*Manitoba.*—Deer, cabri, elk, wapiti, moose, reindeer, caribou, between Jan. 1 and Oct. 1. Grouse, prairie chickens, pheasants, partridge, between Dec. 1 and Sept. 15. Woodcock, plover (except golden) snipe, sandpipers, between Jan. 1 and July 15. Wild duck, between May 1 and Sept. 1. Pickerel (1016), between April 15 and May 15 inclusive. Speckled trout between Oct. 1 and Jan. 1.

*New Brunswick.*—Moose, caribou, deer, red deer, between Jan. 15 and Aug. 31. Cow moose, at all times. Partridge, between Dec. 1 and Sept. 20. Woodcock, between Dec. 1 and Sept. 1. Snipe, between March 1 and Sept. 15. Salmon, except between Feb. 1 and Aug. 1, for rod fishing. Speckled trout, lake trout, landlocked salmon, between Sept. 15 and May 1.

*Newfoundland.*—Caribou, except from Sept. 15 to Feb. 15, inclusive. Ptarmigan, willow grouse, partridge, other grouse, between Jan. 12 and Sept. 15. Moose, elk, to 1896. Rabbit, hare, from March 1 to Sept. 1. Curlew, plover, snipe, other wild or migratory birds (except wild geese), between Jan. 12 and Aug. 20. Salmon, from Sept. 10 to May 1, inclusive. Trout, cuar, whitefish, landlocked salmon, between Sept. 15 and Dec. 1.

*Northwest Territory.*—Elk, moose, caribou, antelope, deer, mountain sheep, mountain goat, hare, between Feb. 1 and Sept. 1. Snipe, between May 1 and Aug. 15. Grouse, partridge, pheasant, prairie chicken, between Feb. 1 and Sept. 1. Wild duck, wild goose, between May 15 and Aug. 15. Pickerel (1016) between April 15 and May 15, inclusive. Speckled trout, between Oct. 1 and Jan. 1.

*Nova Scotia.*—Moose, caribou, except from Sept. 15 to Jan. 31, inclusive. Hare, rabbit, between March 1 and Oct. 1. Grouse or partridge, between Jan. 1 and Sept. 15, inclusive. Woodcock, snipe, teal, between March 1 and Aug. 20. Blue-winged duck, during April, May, June and July. Salmon, between Aug. 15 and March 1; fly-fishing permitted between Feb. 1 and Aug. 15. Speckled trout, lake trout, landlocked salmon, between Oct. 1 and April 1.

*Prince Edward's Island.*—Trout, between Oct. 1 and Dec. 1.

*Quebec.*—Deer, between Jan. 1 and Oct. 1. Moose and caribou, between Feb. 1 and Sept. 1. Woodcock, snipe, partridge, between Feb. 1 and Sept. 1. Wild ducks, between May 1 and Sept. 1. Pickerel (1016), between April 15 and May 15 inclusive. Bass, maskinonge, from May 25 to July 1. Salmon (fly-fishing), except between Feb. 1 and Aug. 15. Speckled trout, between Oct. 1 and Apr 30. Gray trout, lake trout, landlocked salmon, between Oct. 15 and Dec. 1, inclusive. Winanish, from Sept. 15 to Dec. 1.

# Sea and River Fishing.

## LITTLETON SPORTSMEN.

THE heavy rains during the past few weeks have raised the water in the ponds and streams so that fishermen have not put in so much work as usual. The trout season is well on, and although some very good catches have been made this spring, they will not compare with those of a year ago at this time.

A good story is told of a party of fishermen from this section. Late one evening they started for Round Pond, where there is good sport with pickerel. Arrived at the old deserted farmhouse about midnight, they put up their horses in the barn near by, and spreading their blankets on the mows above they sought the sleep of which they were so much in need.

There was a heavy storm during the early morning, and when finally they awoke it was to find the floor of the barn flooded and the horses standing knee deep in their stalls. There was no way by which they could dismount from their position, and to make matters worse the water was constantly rising. None of them could swim, and after a long consultation as to what was best to do, they collected enough timber for a raft. On this they paddled out of the barn, and, reaching the land, made their way to the nearest house. Here they received aid and ere long the horses and carriage were taken from their dangerous position. Without waiting to fish they made their way home. Somehow the story of their uncomfortable adventure leaked out, and they have not yet heard the last of it.

Profile Stream, about 12 miles from Littleton, is a favorite retreat for fishermen. Already several trips have been made to this place and good strings of trout secured. A few days ago Mr. Chas. H. McCarthy and Mr. Geo. Parker, with others, secured 340 fine trout in a few hours. This is probably the largest catch made at any one time in this section this season.

Dr. Rowell, of Stamford, Conn., a yearly visitor in Littleton, arrived here last week, and not a day passes but what he makes some trip to the lakes and streams in this section. The doctor is an expert angler and seldom returns without a good string of trout.

Judge Colt, of Boston, has been the guest of Judge Aldrich, and these two gentlemen have had some good sport with the rod. The judge enjoys a day's fisning now as much as he did twenty years ago.

One of our young insurance men had an experience recently which has furnished amusement for his many friends. He had passed the day fishing and secured about a dozen small trout. Returning home he had taken care of his team and was just leaving the barn when he met a little fellow who lived near and was thus accosted by him:

"Say, what'll you give me for these fish?"

Our insurance friend opened the basket the little fellow held and saw there ten or a dozen small trout. The thought occurred to him that should he buy these and add them to those he had caught it would make a fair showing for his day's trip.

"Well, how much do you want?" he asked.

"Will you give me a quarter?"

The twenty-five cents were placed in the hands of the youth, who readily promised not to tell that he had sold him the fish.

With a smile beaming upon his face as he thought of his cleverness, our friend returned to the barn to place the fish he had purchased with those he had brought back.

"Strange," he muttered to himself, "where I could have put that fish basket." High and low he searched, and then all at once an idea presented itself. He set down the fish basket he had taken from the youth, eyed it suspiciously, and then when he saw his own mended shoulder strap he for the first time realized that he had been the subject of a pretty good joke, the little fellow having taken it from his own team and then asked him to buy his own fish. He doesn't like to have people ask him about buying these fish now. He says it was a good joke, but they ought to let the matter drop.

There was some indignation among sportsmen here a short time ago when a report was circulated that the approach to Lonesome Lake on Cannon Mountain would be blocked. This lake is owned by Mr. Prime, of New York, who is now passing the summer at this retreat. The prevailing belief at one time was that bear traps would be set along the trail leading up the mountain, and for a few weeks no fisherman would venture on a trip to Lonesome Lake. It is not known who started this story, but it has been proven that there is no truth whatever to it. Mr. Prime is a true sportsman, and although owning this retreat, does not object to sharing it with fishermen, providing they do not abuse the privilege.

The Gale River valley is another favorite place for anglers. It is extremely picturesque, the water tumbling over rocks and boulders, forming miniature cascades along its course. The banks are lined with a heavy growth of evergreen, and the fisherman with long rubber boots must wade in the water or climb along the lower bank in order to cast his hook in the deep and shaded pools.

Mr. C. F. Nutting returned Friday from a trip to Gale River, and in his basket were thirty-five handsome trout.

The reader of the FOREST AND STREAM will remember the name of "Zip" Trombley, one of Littleton's noted sportsmen. On Saturday with Mr. H. Emery, of Lynn, Mass., he passed the day fishing around this section and secured a beautiful string of trout.

Already sportsmen from the East and South are commencing to arrive at the many resorts among the White Mountains. The vicinity in and about Littleton affords ample opportunity to engage in sports, and hardly a day passes but what some angler with rod and kit steps off the train at the station and makes his way to some of the hotels about here. W. STANHOPE HUSTON.

LITTLETON, N. H., July 12.

## THE RESTIGOUCHE SALMON CLUB CUP.

THE silver loving cup presented to Henry W. de Forest, the well known sportsman, by members of the Restigouche Salmon Club, is more thoroughly typical of this popular sport than any trophy or testimonial yet conceived to perpetuate the festive salmon with all his associations, in the highest art of American silversmithy.

Tiffany & Co., the makers, have evidently studied the salmon from every conceivable point of view, and in this beautiful creation have pictured him to us with a snap and vim that must fire the heart of any fisherman to the highest pitch of enthusiasm.

On one side of the cup we find the venturesome salmon making a reckless cut through the stream intent upon a first nibble at the bait, which in another minute will seal his fate. On the front of the cup he is pictured with his

THE RESTIGOUCHE LOVINGCUP.

tail curled up in that contemptuous fashion which bespeaks the fisherman's delight, who at the other end of the line is viewing with calm satisfaction the game fight for liberty which his latest victim is struggling for.

The body and handles of the cup are profusely embellished with decorative work of the highest order, every leaf and mark of which is closely associated with the subject treated. Over the inscription on the front are clusters of pine cones, which are always to be seen on the banks of the streams where the salmon are mostly found. Around the three handles are clinging vines of ivy leaves indicative of the friendship embodied in the testimonial. Around the base a pretty effect is produced by the maiden hair fern introduced between the palm branches, the latter suggestive of success.

The cup, which is of sterling silver, stands 11in. high, has a capacity of 11½ pints and weighs over 83 ounces.

The decorative treatment is a combination of repoussé work and etching, with the effect heightened by delicate shading produced by oxidizing, and as a whole is a masterpiece of study in design and faithful execution of workmanship. G. F. HEYDT.

### Bluefishing Near New York.

NEW YORK, July 18.—*Editor Forest and Stream:* Please say to the boys if they want good bluefishing with a rod and reel to go to Perth Amboy. On Saturday, July 16, with rod and reel our party of three caught 14 on the last of the flood and the ebb tide. We used shedder crabs. Mr. Frank Dawson was our boatman and placed us as usual in the center of the fishery. Last year on July 20 the same party caught fifty bluefish at the same place, still fishing. My opinion is that the reason we do not have better fishing in waters around New York city is that the bunker boats are seining not only bunkers, but our game fish that should be caught only with a line.

H. C. W.

## NEW JERSEY COAST FISHING.

AT the present time there is a great scarcity of desirable fish on the northern coast of New Jersey. This is not only true of the fish that ordinarily fall a prey to the skill, patience or luck of the angler, but is also observed in a marked degree in the case of those which are taken by commercial fishermen. For the nonce, therefore, the sportsmen and netters who have annually waged such fierce wars of words, have ceased hostilities and are exchanging sympathetic sentiments. Even the long-suffering "menhaden pirate," who has figured so prominently in the periods of fish scarcity in this State, is having a much needed rest.

Early in the season a large body of bluefish appeared off this coast, and the indications for a brief time were favorable for a period of good fishing; but the fish did not tarry, and almost before they were recognized they had passed on to the east. During most recent years there has been a substantial body of bluefish off this shore throughout the summer, but this season so far has been a conspicuous exception, and the few fish taken have been only stragglers. The extensive bluefish fishery at Seabright has been a failure, and the same unfavorable report comes from other points on this coast.

The principal angling now being followed at this place is for flounders; these are taken from the pier and in the surf. At times large numbers of people fish from the pier, although the sport has been poor. A short, stout rod is used, and by means of a heavy sinker, about 125ft. of line are gotten out. Crabs, clams and fish are used for bait. The only fish taken in quantities are flounders, locally called "plaice," and small skates which are numerous and annoying. Occasionally a sea bass or a kingfish is landed.

There is some surf fishing at times, but I can learn of no satisfactory sport of this kind.

Parties angling from boats catch flounders and sea bass. A local paper of the 12th instant contains the following account of a catch of the former fish:

"Leonard Hulit is credited with the largest catch of flounders this season. Seventeen, from 3 to 6lbs. each, is rather exciting sport. Mr. Hulit made his haul from a boat off Avon Beach yesterday morning."

Sea bass are quite abundant, and market fishermen usually take from 100 to 250lbs. daily to a boat.

The pound nets which are set in this vicinity to supply the hotels with fish are not yielding very satisfactory returns. The catch of late has consisted chiefly of sea robins (called "pigfish"), skates (called "sea 'possums"), and rays (called "pigeon stingrays"). The unusually great abundance of small skates is thought by the fishermen to be the cause of the scarcity of other fish. The pound nets are also securing a few porgies, sea bass, sheepshead, bonito and weakfish, and some days there is a good run of small butterfish.

Only four Spanish mackerel have been caught this season, but as the main run on this shore is usually in August, the fishermen are not much concerned at the present scarcity. Twenty-one sheepshead were taken at a lift on July 8, but this fish is scarce and some days none are caught. Weakfish are also generally not abundant, but a large school seems to have struck on during the night of July 10, for the pound nets above this place yielded 60,000lbs. the next morning, this being much the largest catch of the season. The nets here contained 2,000lbs. the same day.

The absence of menhaden from this coast attracts attention and occasions considerable comment when taken in connection with the scarcity of game fish. Like the bluefish, the "bunkers" appeared on this shore early in the season in large numbers, but they soon passed, going toward the east, and only small scattering schools have since been seen. At this time no schools are observed and the pound nets are taking only a few fish daily.

H. M. S.

OCEAN GROVE, N. J., July 13.

## DO SALMON FAST WHILE RUNNING?

*Editor Forest and Stream:*

In reading some very interesting information concerning the Ranidæ by Dr. Garnier, the Canadian naturalist, I note this significant passage, to wit:

"I think I may state it as a fact that the first three species of frogs, *R. halecina*, *palustris* and *sylvatica*, do not take any food till after they have ceased spawning. I have examined many stomachs and do not remember having found food in them till after the rut has ceased."

This is precisely the analogue of what some observers claim for the salmon, and if true, will tend to give extraordinary support to what will have to be regarded hereafter as something more than a mere theory in respect to the salmon's abstinence from food during the rutting (running) season.

However, for myself I have always maintained, and do insist, that the food of the salmon in rivers and estuaries is mainly of a pulpy nature, and, therefore, is digested with such rapidity that it leaves small trace, if any, in the stomach. So, also, land frogs (as distinguished from aquatic frogs) feed principally on insects, slugs and earth worms, the pulpy nature of which readily accounts for their apparently empty stomachs. It is during the rutting season that such food is most abundant, and it therefore affords their staple article of diet at the time. Insect life disappears with the advent of frost, and terrestrial frogs then go into hibernation. CHARLES HALLOCK.

### Henderson Harbor Bass.

HENDERSON HARBOR, July 12.—When so many are seeking a place for a few days' black bass fishing this place should be made known. One may step on the train at New York at 9 o'clock and be at Adams at 8 next morning, where a conveyance will take you for a drive through a lovely country, and set you down here in ample time for dinner, and to make all arrangment for a day's fishing. To-day a party of six made an early start, and returned at 8 P. M. with 159 small-mouth black bass, ranging from ¾ to 2¼lbs. The larger fish will commence to run about July 20, and continue until Sept. 15, when the pike abound in numbers and of large size. At the close of the season I hope to give your readers some details regarding this charming spot, so little known to sportsmen of your city. INO.

## ANGLING NOTES.

IN a recent issue of the London *Fishing Gazette* there is a fascinating story written by "The Amateur Angler" about his outing with "Piscator Major" on the Itchen in the south of England. The sport is dry-fly fishing for brown trout, but there are grayling in the stream, and thereby hangs a moral:

"Another rise—across the water a little higher up. The major's eye is upon him, and his unerring fly is over him. Down he goes—a tremendous rush and splash.

"'It's a grayling, I'm afraid,' says Piscator. A grayling it turned out to be; and who after this will tell me that a grayling is a 'dead-hearted' fish? This grayling was as plucky as ever was a trout—he came to grass weighing at least 2½ lbs. Now, as a faithful narrator, I have to tell a melancholy story. Says the Major, 'He must go back to the water.' 'What for?' said I. 'What has he done? He's a regular beauty—fat and plump.' 'Out of season,' said this quixotic angler. 'Grayling spawn in April and this is only May.' And back to the Itchen goes this beautiful, sweet-smelling, thymy-scented fish."

That is "The Amateur Angler's" tribute to "Piscator Major's" respect for the unwritten laws of sport. 'Piscator Major" writes me:

"I had a glorious time on the Itchen with my dear father and hope to have many more. He is the best man I ever met, God bless him! Don't miss his articles in the *Gazette*." That is "Piscator Major's" tribute to "The Amateur Angler." Who will say that angling has not, as Walton says it has, "A calmness of spirit and a world of other blessings attending upon it?"

---

We look to England for our silkworm gut and England looks to Spain for it. Every year we get discouraging reports about the gut crop, and higher prices are predicted, until we have become accustomed to and look for these pessimistic reports from the other side. It is generally the best grades of gut that suffer most, but there is a generous falling off in the quality of all grades in length or thickness, or both. I cannot see what is to prevent the gut industry from starting in this country. A bill was introduced in the United States Senate early in the spring for the encouragement of silk culture, and it provided for five experimental silk stations to be under the direction of the Agricultural Department. There are now two Government stations, one at Washington and one at Philadelphia, but they lack money for carrying on the experiments. We have one silk-producing State, for in Kansas not only are the cocoons grown but the silk is reeled. This station receives State aid and it is said that cocoons are raised in forty-six counties in the State. I have seen gut drawn from Chinese worms, raised in the United States, that was equal to Spanish gut. It is a simple matter to draw the gut if you have the worms. If the worms are raised here it would seem that the gut would follow as a natural consequence. The gut of the future, however, will be that from native American silkworms, the *cecropia* and the *polyphemus*, when the proper food is found for the worms. Strong gut has been drawn from these worms that was 9ft. long, and can be again if they are thoroughly experimented with. I have two paintings, life size, of the *cecropia* and *polyphemus* moths that were painted in 1790.

---

Most any kind of a record is a ticklish thing to deal with. A man may think he has a cinch on some particular record and prints it only to find that a fellow in the next county walks all over it. For instance, the St. Louis *Republic* has an interview with a man who has beaten a record, and it is all about a tarpon that is "perhaps the biggest silver king yet caught." As the fish weighed "nearly 170lbs.," and as Mrs. Stagg has killed two tarpon of 175½ and 205lbs., and Mr. John Hecksher killed one of 184½lbs., all three killed on a rod; it is not the biggest, but that is not where the record comes in. The record was about the time of playing and killing the fish. The tarpon was caught in April last, and its captor desired to "make a new record, the best then being about two hours from the time of a bite to that of landing a tarpon." After the tarpon was killed the gentleman's time keeper said: "You are the luckiest man I have ever seen. With a broken pole you have landed that tarpon in just 56 minutes." "It was true I had broken the record, but let me tell you I had to remain in my cottage for three whole days afterward." Now let us see about that record, for the tarpon which weighed "nearly 170lbs." has been presented to the St. Louis University and is on exhibition, and the record of its capture may need some repairs. On April 17, 1892, Mrs. McGregor killed a tarpon of 160lbs. in 45 minutes, but that may have been after the St. Louis fish. So we go back to 1891. On May 1, of that year, Mrs. Geo. T. Stagg killed a tarpon of 116lbs. in 27 minutes: on the 5th, one of 125lbs. in 32 minutes; on the 6th, one of 61½lbs. in 4 minutes; on the 7th, one of 115lbs. in 12 minutes, and one of 100lbs. in 15 minutes; on the 8th, three tarpon of 165, 153 and 125lbs. each, in 35, 24 and 35 minutes respectively. Even then this lady did not retire to her cottage for any length of time, for the next day she killed a tarpon of 148lbs. in 25 minutes. If it is necessary to whittle the "record" down any finer, the kill of Mr. H. A. Weatherspoon, of Louisville, Ky., who on April 5, 1892, landed a tarpon of 145lbs. in 3 minutes may be added. If the St. Louis gentleman had used a rod instead of a "pole" he might have killed his fish more quickly.

---

I see that Dr. Henshall has succeeded in getting an "Ohio River pike" or mascalonge, and now he can settle the matter of the number of spines in the dorsal fin. In 1882 the late Dr. Sterling, of Cleveland, Ohio, wrote me: "The Mahoning pike of the Mahoning River, etc, is an inhabitant of all the tributaries of the Ohio, as far down as the State of Illinois. * * The markings of this fish are very similar to those of the mascalonge, without scales on the operculum, and would be taken by the careless observer for the latter fish. * * Another peculiarity of the fish is its thirteen spines in the dorsal fin." The same year that this letter was written one of these mascalonge weighing 36lbs. was sent to New York city, where it was found among other things that "the anterior half of the lower jaw was toothless and it had thirteen spines in the dorsal fin." This is a less number than is possessed by the mascalonge of the St. Lawrence system.

Judge Greene's article upon the feeding of salmon reminds me of a recent experience. A marketman in town sent me word that he had a salmon from the Delaware river which he would like me to see. Upon going to the market I found a handsome fresh-water fish, and one that had been in fresh water long enough to lose its silvery appearance, lying side by side. The bright fish was the alleged Delaware River fish, but I contended that it was not what it purported to be, as in all probability it came from Canada. In proof I could only say that the Delaware contained no salmon but those recently planted unless it might be a stray one from some other stream, in which case it would not get into the country to be sold for thirty cents per pound. The fish was so fresh that I bought a part or it—it weighed twenty-six pounds—and when it was opened the stomach was literally packed full of capelin; some were scarcely digested, being nearly perfect in form. This settled the question as to the salmon coming from the Delaware, for the capelin are not found so far south as even off the New England States. The fish proved to be by far the best I have had this year.

---

An advertisement in one of the newspapers begins: "The grand pilgrimage to the wonderful shrine of Sainte Anne De Beaupre, 21 miles below Quebec, will leave, etc.," and it concludes: "This pilgrimage will give parties a splendid opportunity to make a trip to Saguenay and Lake St. John's celebrated fishing grounds." At first glance a devotional pilgrimage and a fishing trip may seem to be strange bed fellows, but the Christian religion and fishing have always been associated together. As the result of a conversation in the street with Rev. Dr. George B. Gow, he sent me a letter, of which I give the substance. The Greek word signifying fish is composed of five letters, although in English characters it is spelled *Ichthus*. The early Christians made use of the figure of a fish as a symbol of their faith, reading the word thus: The first letter stands for Jesus, the second for Christ, the third for God's, the fourth for Son, the fifth for Savior. So that the fish to the early Christians, carved on a tombstone or used in any place, signified "Jesus Christ, God's Son, (our) Savior." I conclude that the pilgrimage and the fishing trip are all regular.

---

Last spring I sent you, at request of Mr. John Mowat, of Campbellton, N. B., an advertisement of some fishing water that he had for sale on the Restigouche. The fishing was not sold and I brought it to the attention of my friend Mr. Archibald Mitchell, of Norwich, Conn., who leased it with the privilege of buying. Mr. Mitchell has just returned from fishing the water, and writes me that it was all that he expected to find it. He killed thirteen salmon, weighing 275lbs., an average of 21lbs. per fish. He also hooked eighteen kelts, which after giving lots of sport, were beached, unhooked and returned to the water. The last clean fish was a 25-pounder, which rose twice to a silver-doctor (which fly killed nearly all the fish taken) and then refused it, when it rose to and was killed on a Mitchell fly. One day while poling up stream one of the canoemen saw a salmon in swift water which the other man gaffed. It was an 18lbs. fish with both eyes gone, having lost them in a net. This, he was told, was not uncommon. Mr. Mitchell was so well pleased with the fishing that he bought Mr. Mowat's Upsalquitch water.

A. N. CHENEY.

## CHICAGO AND THE WEST.

*[From a Staff Correspondent.]*

CHICAGO, Ill., July 9.—The labor riot now agitating the town of Homestead, Pa., could have been predicted on May 9 by at least one man in Chicago. That man is Mr. A. Hirth, manager or Spaldings' retail tackle department in this city, who received letters at that time which described fully the situation now actually existing, saying the affair would be as bad as that of 1881 2. It is a fact not generally known that in 1881 2 Mr. Hirth was burgess, or mayor, of this same town of Homestead, and had the handling of the labor riot of that time. He says he doesn't want any more of it.

I presume that Mr. Chas. Norris, of the Big Four railroad, has this season caught more large trout than any angler of Chicago. He is back to-day from another trip to his paradise in the north peninsula, whose whereabouts he persistently refuses to divulge. This time he had good luck and bad luck too. He caught plenty of good trout, but lost nearly all he caught, through a series of singular accidents. He tried to keep his fish alive, and to this fact owed his misfortunes. Twice his live box upset in the river and let out every trout he had; once he smashed a barrel which he had impressed for similar use and so lost all the live trout he had in that. Finally, having caught another lot to bring home, he left them in still water over night and they all died and turned a faint and sickly yellow. This sort of fishing does not depopulate a stream very much, but it is rough on the angler. Mr. Norris swears an early revenge.

I ran across Charlie Burton and a party of friends up at Eagle Lake, Wisconsin. One day last week when I found him he was out in a boat, casting fly for sunfish. His party had 18 bass and a half dozen pickerel. On the day following, I hear, Mr. Burton got into somebody's trout preserve by mistake, caught a 2½lbs. trout, and got chased out of the field. And the trout went with him. If I had a 2½lbs. trout that I loved, I should hate to risk it with Charlie Burton.

There will probably be a good many anglers among those who for one reason or other will go up next week to attend the meeting of the Western Canoe Association at Lindenwald Point, below Oshkosh on Lake Winnebago. There is splendid fishing on this big body of water, and up Neenah way it is likely the mooneys have not yet all done running. Mr. John Earle caught 8 on the fly last week.

The Chicago Fly-casting Club sends out to its members the following card:

"The July practice meeting will be held Thursday, July 14, at Washington Park, 3 P. M. The entertainment committee will set out a light lunch at the grounds. These meetings are proving very instructive. Attend if possible." It is pleasing to think of a better understanding of this essential art in angling growing up in this city, where it has been all too little known.

Speaking of a light lunch reminds me once more of the proportions which the angler's appetite may assume. Now there is my friend T. B. W., just back from his camping trip. I went with him into a restaurant to-day.

"I am not very hungry," said he, "so I think I'll just have a New England boiled dinner:" and he did. I never saw a New England boiled dinner before, and at the time I had doubts as to my friend's ability to cope with it. Those doubts exist no longer. His sublime confidence in himself forced admiration. He told me these New England boiled dinners were the only thing that seemed to touch the spot, since he had come back from the woods.

Mr. Herman J. Burrell, of Portland, Ore., was in the city lately, though I believe he has since returned to his home in the great Northwest. The longing thoughts of many anglers of this region will go back with him. From what they tell us, I presume our fishing here is not worth the name, in comparison with the sport of that great domain beyond the upper corner of the Rockies.

Our little party on its brief camping trip took just 70 black bass, not fishing very hard, but still having only two really big days. I can not refrain from a word about the latter of these, because it was one of those thoroughly enjoyable and satisfactory experiences which make an angler feel good all over. We had been taking in the lake all the big-mouth bass we cared for, and had grown disgusted because they wouldn't come out of the grass and fight like men. We wanted some small-mouths, and the day before I had located some, during a frog hunt along the banks of the Fox River, about 3 miles from our camp. I had found them in a deep pool beneath a wagon bridge, but had not been able to make them bite, for they seemed as shy as trout. On our last afternoon in camp we concluded to walk over to this wagon bridge, just for the sake of looking at the big fellows in their home. I had tried them in vain with frog, fly and all the artificial baits at hand, and we had no idea that we could make them rise to any lure within our means, for we had no minnows nor crawfish, indeed no live bait whatever but a few big frogs, which under the circumstances we did not value, for the day was warm, bright and cloudless. As we approached the bridge, one of the party with his rod knocked down one of the dragon flies, or "devil's darning needles," which were flying all about. Recalling the fact that we had found many of these insects in the stomachs of the big-mouth bass we had taken on the lake, he put this one on his hook, and stepping to the end of the bridge tossed it over. On the instant the water was all a-boil! A dozen great bass broke for it. One big fellow missed, doubled back, nabbed it, and swung down under the bridge with a strain which nearly broke the stout bait-rod at the first rush. A pretty fight he made, but had to yield. He weighed 4lbs. and was a magnificent fish in every way. Meantime J. B. H. essayed a cast with a live frog, and at once hung a second bass almost as large. We could see a whole school of big bass following the hooked captive about as he rushed wildly through the water. The scene was most exciting, and all three of us yelled like Indians. We were directly above the fish, and the unruffled water was so clear that we could see every movement they made. I doubt if a better chance was ever offered for watching the feeding habits of the small-mouth bass.

The first bass struck boldly, savagely, and in apparent anger. His fins were all ruffled up, and he seemed mad clear through. The second bass seemed to feel the same about the frog. After that the bass acted differently. They seemed to see us, and to grow cautious. They sank to the bottom, and took the bait slowly, carefully, delicately, and only after the most thorough investigation. With the most tempting live frog they would have nothing to do. A spoon hook they scorned. A quill minnow they would not look at. An artificial cricket brought one gingerly rise, and no more. There was just one bait which they could not resist, and that was the dragon fly. When we lowered one of these, hooked lightly through the shoulders and not broken up or mutilated, down to the bottom of the deep clear water, we could see temptation depicted on every bass countenance. They would *chasser* around, look nervous, go up and softly take a smell of it, and then finally one old fellow would gently suck it in. Then would come the rush of his jealous comrades, suddenly emboldened, and the fight, and the wild yells from the bridge above. We could see the whole panorama, could count the bass in the pool, could see each bass take the bait, and knew in advance how large a fish we had to play. I do not think a similar opportunity often offers. We simply exulted in the fact that we had outwitted these wily fellows by finding the bait they couldn't help taking. It was matter of further self-gratulation that we found near by a clover field in which the dragon flies were numerous, and where we could catch them easily in the landing net. After this we shall bear the dragon fly in mind when the bass will not rise. We took here, under these interesting circumstances, 16 small-mouth black bass, averaging 2¼lbs. in weight. It happened that I was the only one using a fly-rod, in this instance a Harris model Kosmic, weight less than 4oz. On this baby tool I killed 3 bass, each weighing over 2½lbs., and a more sensational angling experience I do not care to have, for at every moment we expected to see the little rod go. The bass would only bite at the edge of the shadow on the upper side of the bridge, and when one was struck it ran with the current, directly under the bridge. There was no way of saving the rod, and there was little skill possible in playing the fish, for it was only a question of the endurance of the rod, whose slender tip, even under all the lift I dared give it, rattled ominously along the ends of the planks. Sometimes the fish would run out from under the bridge, but when he saw us he would go back under, and then we could hear the fight, but could not see it. The rod would tell when the bass sprang clear of the water, and we could hear him splash when he fell back, but we could not see the spring or the shaking of the head. We were all mightily tickled to see how the little strip of bamboo stuck to the big bass, and finally brought them out completely beaten. It was as severe a test as could be devised for any rod, and I must say my admiration for the capabilities of the fly-rod increased materially. There is no comparing a bait-rod with a fly-rod when it comes to sport in playing a fish. Here we had actual, genuine sport, and albeit a trifle anxious in its nature, I believe the best I ever knew under any circumstances. We left the bridge with our big string of bass after only a couple of hours of fishing, and each of us asserted that prettier, cleaner, easier and better sport he had never had. Above all rose the exultant feeling that we had circumvented these knowing fish, and beaten them at their own game. We had gone there baitless, but we returned with abundant credentials to show our fortune. Dillenbeck, the owner of the vill-

age hotel, said that we were the first party who had taken such a string of fish there, on rod and line, in 20 years. "We never go to the river to fish," said he. "Sometimes we go spearing there, or take a net and catch a lot of 'em, but no one fishes much with bait there." Still another citizen assured us that the spearing for small-mouth bass was better in the creek below the mill.

I noticed one singular thing in fishing for these bass, which makes me think the hook does not hurt a bass very much. I was directly above one old fellow when he sucked in the dragon fly, away down deep in the water. I struck him, and, as I learned later, drove the keen sprout clear up through the hard roof of his mouth. The bass did not seem to mind it much, but flirted his tail and made slowly off, sculling gently up toward a bank of weeds and grass above the bridge. Of course here I put strain on him, and soon as he felt the lift of the rod he changed at once and became a regular demon. I do not think a fish hooked in the mouth feels so much pain as it does anger. Immediately after its anger comes fear, sooner in the weak-hearted fishes than in the plucky small-mouth.

We had opportunity on our trip to compare the habits of the big-mouth and small-mouth bass very carefully. The big-mouth bites nearer the surface and plays near the bottom. The small-mouth bites nearer the bottom and plays nearer the top. The big-mouth makes a savage rush and splash in striking, while the small-mouth is far more deliberate, cautious and gingerly in its action. The big-mouth hunts the weeds when hooked and sulks, while the small-mouth will come to the top and try to shake out the hook, or to break away from it by sheer strength. As to fighting qualities, much depends on the depth and quality of the water. In Phantom Lake the bass, big-mouths, ran small and did not fight very well, though that is deep, cold spring water. In the mill pond the big-mouths ran very fierce and strong, but it was so weedy we could hardly tell much about their fight. Over in Beulah Lake, off a steep, rocky shore, we took a 4lb. big-mouth, which outfought any fish killed on the whole trip, large or small-mouth. It was probably 8 or 10 minutes before J. B. H. got him up out of the deep water high enough to see what he had on. We took the small-mouths under the bridge in about 10ft. of water, and had the water been deeper they would have made still more trouble. I believe they fought harder and longer than trout of the same weight. Under the circumstances it was easy to note everything very closely, and I am sure there was a difference in the fighting quality of individuals of the same weight. I could notice this on the fly-rod especially, because these ones could not hurry matters, but simply had to hang and let the bass kill himself. When I struck my last bass we all thought the rod was gone, for he kept the tip under the bridge for what seemed a quarter of an hour, and made so long and hard a fight that we thought he must be much larger than the others. Yet he was of just about the same size, as near as we could judge, and was hooked like the others, square up through the roof of the mouth, a fact due to our position directly above the fish.

We noticed another thing, which doubtless is not new, though it never appeared so forcibly to us before, and that is, a fish in the water looks only about half as big as it really is. Distance does not lend enchantment, if you actually land your fish. Our bass got bigger after we had them out. The largest small-mouth we took weighed 4lbs., but judging by the apparent size of some of the bass which followed him around after he was hooked, there must have been several in that pool which weighed over 5lbs., and one or two that would have gone 6lbs. or over. I don't believe that small-mouth bass ever get much bigger than one old fellow we saw swim lazily out from under the bridge several times. This fellow had a torn, white spot on top of his upper lip, as though he had been hurt or hooked before. We did not hook him, though once or twice he came very near yielding to the temptation of the dragon-fly, and apparently experienced keen regret at his own cowardice when he saw a bolder brother swim off with the coveted insect inside his mouth. For my part, I never dropped a fly down in there on my little fly-rod without the devout mental reservation that I didn't want that big bass to take hold. He would have smashed things sure.

I presume no angler would use a bait-rod to catch a bass if he could get the lure out to the fish in clear water with a fly-rod. Unfortunately, this cannot often be done, so we put up with the brutality of a short, stiff casting rod, which, aside from its utility in the pretty art of bait-casting, is a purely unsportsmanlike and butchering tool. When you are casting frog for big-mouths, the fun is over when the fish has made his rise. The best part of this sort of fishing is the casting itself. I cannot learn that casting from the free reel is much practiced in the East; at least, I have never seen an Eastern angler come out here who knew anything practical about our style of bait-casting. Eastern rod makers for a long time seemed to have no idea of the right sort of rod for it. Many a "bass rod" has been sold in Chicago which was worthless to its owner, though he paid a round price for it. A rod maker must know the sport for which he is making rods, or he is working in the dark, and does not know when he has hit the idea. I have seen so many handsome, highly finished "bait-casting rods" which would not cast a bait at all, though they would play a fish to perfection. There is the difficulty of it. It is no sport to snub a fish up on a short, stiff rod which gives him no chance, and yet without such a rod in much of our fishing one could not hook any fish to snub or otherwise. This is why we are congratulating ourselves upon our interesting evening at the bridge. We actually caught big fish on little rods, in clear water, on a fair field and with no favor.

The art of bait-casting from the free reel is much harder to learn than that of fly-casting. I shall never forget the bitterness which sounded in the voice of our friend, the Chief-with-two-Stomachs, as he wiped his brow and gazed intently at his frog, which had landed directly behind the boat instead of in front of it, as he had wished. "I can do almost anything some," said he, "but I can't do this any!" E. HOUGH.

## IN NEW ENGLAND WATERS.

THE extremely high water in the New England lakes and trout streams is being of some advantage to the trout fishermen after all. Such a state of the water greatly injured the early fly-fishing, it is true, but later there are more encouraging reports. Just here it may be mentioned that good trout fishing is always to be looked for soon after high water. This is especially true of mountain streams. Trout bite in such locations soon after very high water has begun to subside, other conditions being favorable. Mr. J. W. Chickey, subscription manager of the Boston *Herald*, with a friend, has recently had a turn at the brooks in the vicinity of North Conway, N. H., with good results. They took some fine strings of trout, and were happily surprised at the size of some they caught; several running up to 13 and 14in. in length. There are also reports of better fly-fishing in the Maine lakes and ponds, now that the term of rain and high water is over.

Fish Commissioners Stilwell and Stanley, of Maine, finished their planting of salmon for 1892 two or three weeks ago. Last fall they succeeded in getting 175,000 landlocked salmon eggs from Grand Lake Stream and Sebago. These were hatched at Enfield, and have lately been distributed in Hopkin's and Flood's ponds in Otis; in Tomah Lake, in Washington county; Ashland, Franklin and Trunk ponds, near Sorrento, and in Cherryfield and Columbia Falls waters. They have also let out some fish in Waterville and Hartland waters. They have liberated 175,000 sea salmon fry in Sebago waters, besides returning some 400,000 Sebago salmon fry to the same waters, it being a law of the State that a large proportion of the eggs taken from Sebago shall be returned, when hatched, to the same waters.

Mr. Stanley says that great injury is being done to the brook fishing this year in that State, by the greed of the marketmen and hotel men. The market men in several towns have been selling these fish freely. In some cases they, with the hotel men, have had fishermen hired to take fish and have paid them wages. The Commissioners think that this should not be. Citizens and visitors should be allowed to fish for and catch what they can use for their own eating, but should not be allowed to catch and ship to market.

A true fish story is told of Commissioner Stanley this spring, and it is all the better for being perfectly true. Early in the spring he was one of the first at Weld Pond to fish for landlocked salmon. There was still some ice in the pond, but not strong enough to support a man. Mr. Stanley went out in a boat. He came to where he desired to fish and threw an anchor out on the ice. He fished there for some time, taking a number of fish. But after a while the wind caused the anchor to loosen. Mr. Stanley laid his rod on a cake of loose ice that was close beside the boat, while he went to the bow to throw the anchor again into more solid ice. Looking back he saw his rod disappearing over the edge of the ice. He calculated that a big fish had hooked himself and was away with his tackle. Soon he got sight of his rod again, but immediately it disappeared under a floe of ice. He rigged another rod and fished for about three hours. At the end of that time he saw his rod again coming up the pond. Evidently the fish had repented and was returning the rigging. The rod came so near to the boat that Mr. Stanley caught it and soon landed a 7lb. salmon. Mr. Stanley says it was a "spent" fish or it would have weighed 12lbs. at least. He liberated the penitent thief, and was thankful to get back his rod and line. He took that day eight salmon, weighing all the way from 2½ to 7lbs. Five of these were "spent" fish and returned to the pond at once. Mr. Stanley says he has seen a number of "spent" fish at Weld Pond this season. This shows that many have spawned there during the past season; a gratifying indication.

Mr. Stanley adds the injunction that every reasonable fisherman will return "spent" fish to the water. They are worthless and a sportsman should be ashamed to retain one. They are no worthy specimen of Maine salmon. If they are returned, one year will make them into salmon that any angler may justly be proud of. Such a course would tend to the good of the future of angling in Maine, and would not be much of a disappointment to the honest angler. Would it not be a good idea for Mr. Stanley to give the FOREST AND STREAM a nice description of a "spent" salmon or trout, in order that the uninitiated may recognize such when taken. It is easy to understand how an angler, not experienced in the Maine waters, might not be aware that he had taken a fish that was worthless from having bred only a few months previous.

The Commissioners say that more salmon have been taken at Sebago this year than ever, though not as many at Rangeley. Many small fish have been taken at Sebago weighing from 2 to 3lbs. This is a good indication that the number of salmon is increasing; the small fish evidently being young. They have great hopes of the salmon in Maine, and not without excellent reasons. One hundred salmon, weighing 1,850lbs., are reported as having been taken in the Bangor pool this year. As usual, Mr. F. W. Ayer has taken the lion's share, he having caught twenty-one fish, and his nearest competitor eleven. This is not a bad record for a pool that was almost totally exhausted for several years, till restocking and protection brought it up to present proportions. The more wonder is that it is a pool that everybody fishes, from the boy in a punt with an alder pole and a cotton line, up to the rig that cost the angler hundreds of dollars—both fishermen faring about alike.

Still the salmon fishermen are returning from Canadian waters with stories of rather poor success. Messrs. F. C. Coffin, T. J. Homer, J. W. Bailey and George L. Clark, all of Boston, together with Prescott Clark, of Providence, left Boston early in June, and after visiting Quebec, proceeded to Riviere du Loup. From thence they proceeded to the head-waters of the St. Francis. When they reached Fall Brook great expectations were dashed. The brook was too much of a roaring torrent, and big trout could not be taken. The St. John was followed as far as Fredericton, and thence to Boston. The members of the party are delighted with wilderness canoeing, but the fishing was not a success.

H. S. Kempton, of the Boston *Herald* editorial staff, and S. Albert Wetmore, city editor of the same paper, did the reporting of the Republican Presidential convention at Minneapolis. The time was too short for them to return to Boston before doing the Democratic convention at Chicago, so they resolved to try the fishing in the celebrated Minnetonka. They had great success, and they are distributing among their friends a photograph of their success. They are holding a pole between them in the picture on which are strung some twenty big bass. An enormous pickerel shows off his spotted sides in front of the other fish. This fellow weighed over 12lbs. The guide stands in the rear, and there is the lake and the boats. The picture should have been a good one, and worthy to have been entered in the photographic prize competition of the FOREST AND STREAM. But alas for the skill of the Western expert photographer! The picture was overtimed and not restrained, and is all too flat.

Mr. Rowe, Mr. F. A. Larkin and Mr. Sawyer, all of Milwaukee, Wis., are in the East for a few days' bluefishing. They are in the hands of Capt. Ned Robinson, of Cataumet, and it is calculated that they will have fine sport, since bluefishing is good in that direction.

Mr. Richard O. Harding, with George B. Appleton & Co., and secretary of the Massachusetts Fish and Game Protective Association, has got back from salmon fishing. He has been absent for three weeks, the guest of Mr. D. H. Blanchard, at his fine river, the upper half of the northeast branch of the St. Marguerite. Mr. Blanchard owns the upper half of this river, and Mr. Walter M. Brackett controls the lower half. It was Mr. Harding's first trip to the Canadian salmon waters, and he enjoyed it much, as who could help enjoying a trip of that sort, under the patronage of so genial a soul as Mr. Blanchard. But alas! the salmon fishing was very nearly a failure. The water was remarkably high and the river white in all of the rapids. It rained every day for eight days during Mr. Harding's stay, and it not only rained, but it poured. Not a salmon was taken till just before Mr. Harding was obliged to leave. Then Mr. Blanchard hooked a big one in the pool below camp, and the fellow took them down river nearly a mile before he could be subdued. Mr. Harding had the good fortune to be in the canoe at the time, though he did not have hold of the fish. He says that the working of that magnificent fish was well worth the trip. He was hooked some thirty-five minutes before he was brought to the gaff. The fish weighed 37lbs. Mr. Blanchard got another one that weighed 12lbs. before Mr. Harding came away, and that was all the result of three weeks' outing with over two weeks on the stream. Mr. Harding got no salmon. When he came away Mr. Walter Brackett had taken no salmon, though his son Arthur had taken one 24lb. fish. Later the fishing will doubtless be better, since the "fresh run" of salmon had just begun when Mr. Harding came out. The small salmon of Mr. Blanchard's was evidently one of the "fresh run," while the big fish had been in the fresh water for some time. The St. Marguerite Club, which controls the northwest branch of the river, had taken but twelve salmon, the result of five rods for nearly two weeks.

SPECIAL.

## A TOUGH SCULPIN.

I am Sir Blob;
I enter and rob
The nests of the spawning salmon.
I down the fry
And wink my eye
At the law's protective gammon.

BOILING springs would not be selected, as a rule, for fishcultural operations; but occasionally tough-skinned fishes like the miller's thumb or blob hover around the edges of the hot-water areas in search of their prey. Even the blob, however, has a limit of endurance and falls a victim to heat stroke. Dr. O. P. Rex, 921 Chestnut street, Philadelphia, was the owner of such a rash blob which was cast up by the Boiling Spring in Benton county, Arkansas. Not recognizing the fish he sent it to the U. S. Fish Commission for identification, and it was found to be one of the varieties of *Cottus bairdi*, the ubiquitous miller's thumb or blob, a very near relative of the one shown in our illustration accompanying these notes.

THE UBIQUITOUS BLOB.

The blob is a fresh-water sculpin, and if it has any good points they were long since forgotten. Represented by numerous varieties and ranging from Arctic regions across the continent and southward to Alabama, occupying besides other waters the territory inhabited by salmon and trout, it is one of the most inveterate and destructive of the enemies of eggs and young fish. The blob grows to a length of about 6in., but its capacity for destroying fry is not to be measured by its size. Multiply his length by his activity, his power of forcing his way into rock crevices, his superb digestion, insatiable appetite and tough armor, and you will more readily appreciate his approval of the ancient policy of planting tender trout fry in his domain. He lies in the streams and laughs a broad and generous laugh, and looks to it that the victims of misplaced confidence are planted sure enough.

## THE SHEOMET ANGLERS.

*Editor Forest and Stream:*

I desire to acquaint you of a newly-formed angling club, all of whose members, with two exceptions, are residents and prominent business men of Springfield, Mass. The club has chosen an Indian title, the Sheomet, and has purchased 180 acres of land in Franklin county, Mass., six miles from Athol, and two hours by railroad from Springfield. The land compasses a little lake of some 50 acres, in which trout have always abounded, and in which 50,000 fry were placed this spring, the same experiment to be repeated annually. The club has also secured leases covering fifteen years of the various brooks in the vicinity and measuring over twenty miles in length. An excellent house and stable are included in the club's purchase, but the building will at once be enlarged and elaborately improved with all modern conveniences and comforts. Membership is limited to twenty persons, at a fee of $200 each, and when the project was started it required less than two hours to complete the roll. This will give an exhibit of the angling spirit that blossoms in the Queen City of the Connecticut Valley, and becomes more interesting from the fact that for some years Springfield has been the home of another prosperous coterie of fly-casters—the Amabelish Club, whose preserve, covering 300 square miles of woods and waters, lies near great Lake St. John, Quebec—the home of that marvelous finny warrior, the wininnish—the one superlatively grand game fish of the world.

The officers of the newly-formed Sheomet Club are: Pres., Dimon N. Coats; Vice-Pres., Henry M. Phillips, P. M.; Sec'y and Treas., W. F. Callender. Directors: W. H. Wetson and N. D Bill. Members are: E. M. Coats, A. B. Forbes, A. B. Wallace, E. S. Bradford, mayor of Springfield, W. H. Gilbert, E. C. Barr, E. H. Sterns, H. S. Dickenson, J. W. Goodrich, J. W. Kirkham, D. F. Fullerton, C. L. Goodhue, J. A. Murphy, Warren Cheney and R. L Cheney. KIT CLARKE.

NEW YORK, July 16.

### Merrimack Salmon.

THE salmon fisherman does not need to go down into Maine to find excellent sport at his favorite amusement. The Merrimack is now an inviting field for angling with the rod for the king of game fish. The salmon can be seen striking all over the lower river—that is, from the mouth of the Shawshin down—but it requires an expert handler of the rod and fly to secure a fish worthy of his prowess. Twenty-pound fish are no exception. They can be seen disporting themselves in the waters of the Merrimack at early morn or dewy eve, their silvery sides flashing back the earliest rays of the sun or its last glances as it reluctantly leaves the earth to lunar's glories and the night. Patrick McCarthy, with commendable pride, shows the first salmon caught with a fly of late years in the Merrimack. It is a fine specimen, weighing about 10lbs., and was captured just before dusk. Mr. McCarthy used his old rod which has stood him in good stead in Penobscot waters and there established his fame as a salmon killer. A fire-brown fly—an Irish production—was used. The salmon took it greedily, and was handled with care and skill for ten minutes, when Mr. McCarthy gave the rod to his companion, Fred Palmer, who continued the operation of leading the "silver king" into captivity for five minutes longer, when Mr. McCarthy gave him the gaff and secured the prize.—*Lawrence (Mass.) Eagle, July 12.*

### Fresh-Water Sunfishes.

FROM the Report of the U. S. Commissioner of Fisheries for 1888 we have just received a pamphlet copy of a Review of the Centrarchidæ or Fresh-water Sunfishes of North America, by Charles H. Bollman, A.B. This review was unfinished at the time of Mr. Bollman's death, but notwithstanding the want of notes on the names and observations on the habits of the species, which he intended to add to the paper, it will prove useful to students of these fishes. The article contains keys to the genera and species, together with accounts of their distribution and some critical notes upon their relationships.

Most of the species of this family are fully described and fifteen of them are illustrated, the figures with one exception being reduced copies of those in the Fishery Industries. The illustrations include the round sunfish, calico bass, crappie, Sacramento perch, rock bass, warmouth, mud bass, black-banded sunfish, long-eared sunfish of the West, red-breasted bream, chinquapin perch, blue sunfish or bluegill, the common sunfish, and the small-mouthed and large-mouthed black basses.

We notice that McKay's sunfish (*L. euryorus*) is referred to as identical with the common sunfish, but after a careful comparison with the type of this species and the examination of several additional specimens, we find that the two fishes are quite distinct.

### Sale of Pennsylvania Trout.

THE PENNSYLVANIA FISH PROTECTIVE ASSOCIATION, 1020 Arch street, Philadelphia, July 16.—*Editor Forest and Stream:* Your correspondent "T. M. C.," in your issue of July 14, bewails the catching of trout for sale to saloon and hotel-keepers. If he will consult Sec. 8 of Act of Assembly of Penn., April 16, 1870, P. L. 1870, page 12, he will find this provided for. It is too late this season for the Game and Fish Protective Association of his locality to take action. This act referred to applies to Potter, Lycoming, Tioga, Clinton and Sullivan, and if trout fishing is to be of any good hereafter in open waters should be made general. It is to be hoped that a united effort will be made by all the fish and game associations throughout Pennsylvania to have the Legislature at its next session make it a finable offense to catch fish for barter or sale and make the purchaser just as liable to punishment as the seller. This will do away with one great evil which now almost threatens the total destruction of trout fishing in open waters in Pennsylvania. R. M. HARTLEY, Treas.

### New Hampshire Fishing.

LANCASTER, N. H., July 15.—At last we are having some good fishing, the first this season. For the past week every one here has caught fish and plenty of them; some good ones, too. But the fishing is very backward, and although nearly every one who has been here has had plenty of fish, it has been an all-day's job to get enough of them to supply the table, instead of taking an hour or two, as usual.

The Connecticut Lakes have been well patronized this year and every one has seemed satisfied, after taking the weather conditions into account.

The jolliest party of anglers I have met for a long time arrived here last Friday, the 8th. The party was composed of twelve traveling men and members of the Stag Outing Club, of Boston. It was their first trip here, and they express themselves as being highly delighted with this section, both for fine fishing, beautiful scenery and good accommodations, and they all say that they have enjoyed the best fishing both with bait and fly that they have ever had, without any exception, and they are all fishermen, too.

The fish thus far have not averaged as large as they will from now out probably. Though a few good ones have been taken, they have been running from ¼ to 1½lbs., and within a very few days a few of from 1½ to 3lbs. have been taken. I see no reason why fishing in this section will not remain good the rest of the open season or until Sept. 15, so little having been done early, owing to the unusually wet June; but no one denies that this season has not been a "trout saver" all over the New England States. ROB.

### Something to Be Proud of.

THIS charming picture is from a photograph sent us by Mr. H. D. Stevens, of Malone, N. Y., and shows his little daughter, with the 4½lb. speckled trout caught by him in Lake Duane in the first week in June of this year, as already recorded in these columns. A man might well be proud of such a fish, and a man might well be proud of such a daughter. The privilege of being proud of such a fish and such a daughter is something that does not fall to the lot of one man in a million.

### Texas Tarpon.

VICTORIA, Tex.—I have just returned from Pass Caballo, which lies between the end of Matagorda Peninsula and the upper end of Matagorda Island. I spent two weeks there fishing, sailing and bathing. The fishing is very poor this year, both on the coast and inland throughout all southwest Texas. It almost seems as if some disease had attacked the fish, for a scarcity of fish is something we very seldom know here. Although most of the fish on the coast are scarce there is one kind that is not—the tarpon, or, as we call him here, the grand decoy. There are great numbers all through Matagorda Bay. The fishermen catch them in their nets and either throw them out on shore to die or kill them with a gig. As I had no regular tarpon outfit I only fished about half a day for them and did not succeed in hooking any. If I go down again I shall take a regular outfit and catch one or more. Having read all the accouns in FOREST AND STREAM of tarpon fishers' trips to Florida and other places, I thought this might be of interest to them.

Any information I can give concerning the place can be had by writing me through FOREST AND STREAM.

W. M. P.

### A Bunker Boat's Haul of Weakfish.

NEW YORK, July 18.—*Editor Forest and Stream:* A party of friends started last Saturday morning from Canarsie for a day's chumming. The captain of our boat, who had been requested to obtain a barrel of bunkers, had failed to do so because no steamers were in; and he reported bunkers very scarce this season. On the way out we saw a steamer at Fairchild's unloading into the tramway cars that empty the fish into the vats. We could not get a bunker from them, because the whole boatload consisted of weakfish! The name of the boat was the John A. Moore. GONZALE POEY.

### A Low Rate to Washington, D. C., via Pennsylvania Railroad.

FOR the meeting of the League of American Wheelmen, to be held at Washington, D. C., July 18th to 20th, an event which promises to surpass anything of the kind held for years, the Pennsylvania Railroad Company will sell excursion tickets at a single fare for the round trip from New York. These tickets will be sold and good going July 16th to 19th inclusive, and valid for return passage until July 24th inclusive.—*Adv.*

## Fisheulture.

### PLANTING TROUT AS FRY OR YEARLINGS.

[Read before the American Fisheries Society.]

*Mr. President and Gentlemen:*

In the last report of this Society, pages 11 and 13, this question was discussed in a small way, neither side having any figures to show the cost of feeding and planting a trout which was a year old. I am quoted as saying: "I do not believe that it is economy to raise trout" (for distribution) "to be a year old," and that belief has been confirmed by subsequent experience. The advocates of planting yearlings have had an innings, and have vented their views in the newspapers and perodicals, but the other side has not been heard from, and, if I am not mistaken, this opening gun from our line will be followed by others of larger caliber. We believe that the best results will be had from planting trout as fry and will essay to prove it.

If a man wishes to plant an orchard he would like to have trees that will give him a crop at once, and if he would stock a stream he naturally wishes yearling fish, hence the scheme of feeding trout until they are a year old commends itself to the anglers and also to their journals, but what they want and what we can afford to give them are different things. The nurseryman will give you several small trees for the price of an older one, and the fishculturist can give you a hundred or more fry cheaper than he can raise and deliver a yearling trout. That the yearling is worth many fry is true, for it has escaped a class of enemies that can only kill smaller fish, but the kingfisher can still take it, and does. I will not consider the question of the ability of a pond-fed fish to take care of itself, for it may be able to do so, and I propose to treat the subject squarely, and strictly on what I believe to be its merits.

At the last meeting of this Society, it seemed as if my position was unsupported to any extent, and this was not encouraging to one whose only object was the general good of fishculture, but, months afterward, letters of approval incited an experiment in the cost of feeding young trout and a consideration of the expense of planting them, but it was not until the first of January last that my foreman received orders to weigh and record the food of 16,300 brook and brown trout, the hatch of the previous spring. The record gives date, pounds of food, temperature of air and water, and remarks on weather, etc. It covers the months of January, February and March, 1892, ninety-three days, on three of which we had no food. If it be said that these fish, so near a year old, would consume more food in the last quarter, the record shows that on twenty-three cold days the fish were not taking much food, ranging from 4 to 8lbs. of horse meat against 15 to 20lbs. on other days.

During the previous quarter, October to December, I have the word of the man who cut the meat, that the fish took more food, for we have little cold weather on Long Island before Christmas, and the record shows that the taking of food was influenced not only by the temperature of the water dropping below 40deg. Fahr., but also by the temperature of the air and the atmospheric conditions. Therefore, I am disposed to take this, the last quarter, as a fair estimate of the consumption of food during the year, for we started in with nearly 25,000 fry which fed along from March to nearly the last of May, when the mortality began, the weaker ones died, and there is a great waste of food when so finely chopped as it is necessary to be for the "babies."

Horse meat has been spoken of and a digression may be pardoned to say that during my twenty-four years' life as a fishculturist the question of the best and cheapest food for trout has been the leading one. Beginning with hen's eggs, which is the worst of all, the usual beef's liver, lights (lungs), heart, maggots, mosquito larvæ, soft clams (*Mya arenaria*) and salt-water mussels (*Mytilus edulis*) have been tried, until in November last, a man who kills worn out horses for their hides, bones and dog-meat, was found, who delivers us clean, sound muscle, free from bone, of horse, mule, or cow that died in calving, at the uniform price of four cents per pound at the station, and it is the best food for trout and the cheapest that we have found. At this station beef livers from New York averaged, with express charges, seven cents per pound, *i. e.*, they cost fifty cents each and averaged 10lbs. apiece, and the freight on the box cost forty cents, whether containing one or three, and the supply was uncertain.

To resume. During the quarter mentioned, we fed 16,000 trout as follows:

| | Pounds. |
|---|---|
| January | 328½ |
| February | 376½ |
| March | 435½ |
| | 1,140½ |

This, for ninety days, would equal 12 66lbs. per day, which at 4 cents per pound would cost a trifle over 50½ cents per day or $184 per year for the 16,000 fish.

Divide this and it gives $11 55 per thousand fish. Add to this the transportation. One man can take care of ten cans of fry for twenty-four hours, and each can will carry 5,000 fry or 30 to 50 yearlings, according to size.

Say, for instance, that you have a million trout fry to plant. This will require one man for twenty days, if he can take them in lots of 50 000 in ten cans of ten gallons capacity each. Without counting railway fares, his daily expenses, say $3, and his pay, say $2, would equal about $100 for the whole. Now keep these fry for one year, and if you have good luck you may have 600,000 to plant. From thirty to fifty of these are all that can be carried in a can, and ten cans are as many as a man should be asked to care for on a trip of 12 to 24 hours, or 500 at one time, at the largest figure. This would require twelve men for 100 days, and again throwing out railway transportation, would cost at the low average of $4 per day per man for wages and expenses the sum of $4,800, and I defy any man to prove that the result of feeding trout to be yearlings, and then planting them, would be in any sort of proportion to the expense of food and transportation, which added together would make a grand total that would be appalling to States with small appropriations.

Let us say that one yearling is worth ten fry, which has not been proved, and then compare the expense. Let us plant fry in sufficient numbers to allow for all losses and not waste our means on planting yearlings, a new notion which has been loudly heralded as a grand success, but which cannot be proved to be so.

It has somewhere been stated that the United States Fish Commission had stocked some far Western stream with trout fry for years and no good results followed: a year or two ago some yearlings were put in, and lo, the stream now affords good fishing. If fry cannot live in this stream, we might ask how the stock is to be kept up? By planting yearlings each year, when their progeny cannot live? Surely such a stream is not a good stream for trout and should be abandoned.

That those who have streams to be stocked will clamor for yearlings instead of fry is to be expected. They would like two-year olds also, and if we would give them our old three-pounders, they would be very happy; but they should apply for their two-year olds just two years before they need them and give us twelve months to produce yearlings on natural food in their own streams without expense to the State.

When we count the cost of food, attendance and planting, with incidentals, such as ice, extra help, etc., it will be

found that a yearling trout will have cost from 6 to 10 cents more than it would if planted as a "baby" the year before. Of course, the idea of transportation is one that cannot be accurately figured, for obvious reasons. A man may be gone from half a day to three days with ten cans of fish, costing from $10 to $15 for his labor and hotel bills, exclusive of railway fares, and the planting of yearlings cannot, it seems to me, begin to compensate for the great cost of rearing and planting them. The assertion has been made that it is the best method, and this has been repeated and reiterated until many people believe it. There are but few men in the country whose practical experience renders them competent to speak on this question, and I am assured that an overwhelming majority of them are in favor of planting fry.

FRED. MATHER.

NEW YORK FISHERY COMMISSION, Cold Spring Harbor, N. Y., May, 1892.

### REARING FISH FOR DISTRIBUTION.

*Editor Forest and Stream:*

In your issue of June 30, Mr. Fred Mather, in discussing the question of "Rearing Fish for Distribution," takes occasion to correct the arithmetic, or punctuation, of his paper read before the American Fisheries Society at its May meeting, and while he virtually admits in this correction that the cost of food for a yearling trout, at Cold Spring Harbor, will be only a fraction above one cent, yet he states the fish (yearling trout) will cost about ten cents by the time it is planted. If under Mr. Mather's management the cost of attendance and transportation (with the courtesies of railroad and express passes*) is nine times the cost of food, then Mr. Bowman is right in his opinion that it is too expensive to raise trout to yearlings for distribution by the New York Commission. Moreover, Mr. Mather is right for once on this question, in saying he is one of those who do not believe in wasting money in that way. Right he is, as far as he goes. I fully agree with his Western friend that the Governor should investigate an establishment where the cost of attendance and transportation is nine times the cost of food—where it costs ten cents to raise and plant a yearling trout.

Mr. Mather brings into the question the element of cost of transportation. It would be interesting to know his basis for computation. It is true some approximate ratio may be obtained by comparing the number of fry with the number of yearlings which may be carried in cans of the same size. But it is manifestly absurd to state definitely in cents the cost of attendance and transportation without knowing the constantly varying factors of distance to be traveled, means of transportation, time of year, number of fish, etc.

Mr. Mather's broad assertion that the yearling advocates were routed horse, foot and dragoons, is born of fancy. We brought cold, hard, stubborn facts; the fry advocates were armed with vague and visionary theories backed by attempted ridicule and discreditable aspersions. The yearling advocates left the field well satisfied, and if there is to be a Gettysburg next year, Mr Mather will find other hands than Mr. Clark's bearing steel which will command his attention (I had almost said convince him).

He speaks of yearling advocates whose opinion on any fishcultural subject would have but little weight. That's tough. It reminds me of the boy who, having received a well-merited chastisement, threw a stone in the dark hoping to hurt something, but failed to hit anything. However, I extend my sympathies to Mr. Fairbank, Mr. Benkard, Mr. Redmond, Dr. Bean and others of my friends, who must feel this severe criticism.

If it were not, as Mr. Mather pertinently states, that life is too short and ink too high, I would tell him how trout can be raised to yearlings and planted for less than one-half of ten cents each. However, if he will come West we will try to show him, provided he is not one of those who will not see.

WM. F. PAGE.

NEOSHO, Mo.

* See Mather's report in New York Commission Report for 1889, p. 30.

### Pacific Halibut for New York.

MR. EUGENE G. BLACKFORD has visited Tacoma, Wash., on his recent travels through the Far Northwest, and has naturally enough looked into the future of the fishery interests of the Puget Sound region with particular reference to Tacoma as a shipping center. He predicts that in ten years eleven carloads of fish per day will be sent to the East. Except during the time from June 10 to Sept. 15, New York gets its supply of halibut from Portland and Vancouver. They can be shipped from Tacoma to New York by express in six days and arrive in perfect condition. The fishing banks off Cape Flattery, he believes, will prove wonderfully rich. Canneries, however, are not needed there and it would be injurious to the permanence of the industry to establish them.

If Mr. Blackford were less interested in fishculture and the development of the fisheries and more devoted to the spoils of office he might not have been set aside for a political worker, whose first remark on entering the office was: "What is there in it?"

### Lake Ontario Whitefish Hatchery.

IT is understood that the location at or near Theresa is practically settled upon for an United States whitefish hatchery, but owing to a report that the water supply is insufficient during the dry season and the midsummer temperature of the water too high, final action will be deferred until the Commissioner can examine into the matter and ascertain the true conditions of the place. In August, it is claimed, the adverse conditions are most evident, and in that month the investigation will be made. When these vital points are settled satisfactorily steps will be taken to secure a site. It is not probable that the station can be operated during the coming fall and winter. The Commissioner is greatly interested in the establishment of this station which has such great possibilities. Notwithstanding the present uncertainty about the site, Lake Ontario will probably not be neglected as the Commissioner can continue the usual heavy plants of whitefish from the Ohio and Michigan stations.

### State Fish Exhibits at Chicago.

FISH COMMISSIONERS FORD AND POWELL, of Pennsylvania, Huntington and Bowman, of New York, and Titcomb, of Vermont, had a conference on July 15 in Washington, D. C., with Capt. J. W. Collins, Chief of the Department of Fisheries, relative to their proposed live fish exhibits at the World's Fair. The plans proposed and the means available for making the display were brought up for discussion. Letters were read from a number of State Commissioners who are interested in the work but could not be present.

### Wisconsin Fish Planting.

SIXTY-TWO counties in Wisconsin received nearly 7,000,000 of fry of the brook trout and rainbow trout during the distribution from the State hatchery at Madison last spring. The trout were almost equally divided between the two kinds. In addition to the trout 6,000,000 bass (presumably white bass) and 15,000,000 pike perch were deposited in the interior waters.

### Mississippi River Shad.

YOUNG shad in a pond at the U. S. Fish Commission Station, Neosho, Mo., are doing well. They are seen in large schools throughout the entire pond, and excite the interest of the many visitors. Before the advent of cold weather in the fall the fish will be allowed to escape, and will make their way into the Mississippi and Gulf of Mexico. Owing to the abundance of natural food in the water supplying the station, the growth of fishes which feed upon insects and crustaceans is remarkable. This is particularly noted with the tench and the rainbow trout.

## The Kennel.

### FIXTURES.

DOG SHOWS.

Sept. 6 to 9.—Second Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Canada. A. D. Stewart, Sec'y.

Sept. 6 to 9.—Rochester Kennel Club, at Rochester, N. Y. Dr. O. S. Bamber, Sec'y.

Sept. 13 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A. Stone, Sec'y.

Sept. 19 to 22.—Third Annual Dog Show of the Kingston Kennel Club, at Kingston, Canada. H. C. Bates, Sec'y.

Sept. 20 to 23.—Western Michigan Kennel Club, at Grand Rapids Mich. H. Dale Adams, Galesburg, Mich., Superintendent.

Sept. 27 to 30.—Dog Show at Ottawa, Can. Alfred Geddes, Sec'y.

Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.

FIELD TRIALS.

Sept. 5.—Manitoba Field Trials, at Morris, Man. A. Holloway, Winnipeg, Man., Sec'y.

Oct. 25.—Third Annual Field Trials of the National Beagle Club, at Nanuet, N. Y. Bench show of the club Oct. 24. H. V. Jamieson, Sec'y.

Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.

Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 8.—New England Field Trials, at Assonet, Mass. Geo. E. Stickney, Newburyport, Mass., Sec'y.

Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.

Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck, Sec'y.

Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.

Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.

Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

### POINTS AND FLUSHES.

CHICAGO, July 16.—The possibility of holding field trials in different parts of the country comes up periodically for consideration, the matter of holding one in Kansas or vicinity being the most recent. The fact that successful field trials were held there in years past would go far toward proving that it can be done again.

I believe that a great deal of good could be accomplished if local clubs would form with a view to running their trials with local support only, thus developing a local interest and educating a larger class of sportsmen. The value of the purses could be gauged by the probable revenue which the trial would produce, or it could be made a sweepstake. Local trials run on the sweepstake plan could be run in many sections of this great country where no trials are now held.

Almost every field trial club starts with a determination to assume or achieve national importance. With this end constantly in view, they shape their policy to harmonize with that of the established clubs. They claim dates to fit in with the great national events, and run their trials in a different section of country from their own, a section so different in climate, cover, grounds and habits of birds that, from their local point of view, it is a foreign land.

If the local clubs were formed, with trials held in the best season on their own grounds, and run according to conditions existing in their own country, the test would be of far more value to the sportsmen of each section.

If a club is too ambitious, and hangs up larger purses than the support of the club will warrant, its efforts can only result in discouragement and failure.

In the last issue of FOREST AND STREAM I read the article of that eminent authority on field trials and field work, Mr. P. H. Bryson, of Memphis, Tenn. Mr. Bryson, in the article referred to, discussed some of my remarks on retrieving at field trials and differed from my views, and also the views of those who oppose retrieving being considered at field trials. From Mr. Bryson's remarks, I perceive clearly that I did not make my argument so full on the point pertaining to educational qualities as I should, hence it needs more elaboration. Mr. Bryson states his position as follows:

"Mr. B. Waters in your issue of June 30 states; 'Retrieving being an educational quality, is in the same category with dropping to shot, turning to whistle, staying at heel, dropping to order, etc, acts acquired by education.' The field trial clubs justly recognize the educational qualities The Southern Club puts a penalty of 25 points of demerit on the following educational qualities: Breaking shot, 5 to 10; breaking in, 3 to 5; chasing, 10. Why not dispense with these and other educational qualities and let the dog hunt *à la naturel*, it would save trainer's fees—quite a consideration—and time so often quoted by the advocates of abolishing retrieving. If the arguments used for abolishing retrieving hold good the same can be used with equal force in abolishing the other educational qualities. These educational qualities afford many requisites in a field dog, and demonstrate the ability of many dogs to train on when deprived of their own way of doing things and complying with some of the wishes of the shooter. The test of retrieving at field trials can be done as well as the testing of pointing, backing, ranging or any other quality of a field dog. It all takes time, and, in the language of the Texan, 'that is what we are here for.' Instances can be mentioned for and against almost all essential qualities. The question, is it of sufficient importance to be retained along with chasing, breaking shot, breaking in, backing, obedience and other educational qualities? I think it is. If these educational points are not retained, there is very little of the natural dog I would want. If the natural qualities cannot be brought under control without injury, it is time we were finding the same out and breeding more for educational points."

Taking up Mr. Bryson's first point, namely, "The field trial clubs justly recognize the educational qualities. The Southern Club puts a penalty of 25 points of demerit on the following educational qualities: Breaking shot, 5 to 10; breaking in, 3 to 5; chasing, 10." The faults enumerated, which are really violations of education or lack of education, can hardly be considered educational qualities. They are faults pure and simple. It is true that clubs recognize these faults, not in the sense that they are educational, but that they are obstructive to the progress of the trial, injurious to a competing dog, since few dogs, however well broken, will perform well with an unsteady competitor; and, more particularly, it is impossible to judge with any precision the real capabilities of an unsteady or wild dog.

In respect to penalties, nearly all rules go further than the foregoing, and say that "the second chase, however, loses any further opportunity of competing in the stake." The best dog in the stake might chase twice, which, under the rule Mr. Bryson quotes, would foot up a demerit of 20. On the other hand, this dog might have merits amounting to 70, yet he is disqualified because he is not fitted properly to compete. This fact alone shows the true purpose of the penalties.

Now, dropping the purely negative aspect of the matter let us consider what the clubs say, directly and positively, about training. Nearly all say that "all dogs *must* be thoroughly broken as a matter of course," or "all dogs *should* be broken," etc. If a breaker disregards this requirement of the clubs, the latter punish him for it by penalizing the most offensive faults of his dog. This is more as a matter of protection to the interest of the competitors and the trials, as shown by only those grosser faults being considered which are obstructive to the trials or injurious to the competitors.

Concisely, it is as if a club should say: "We require your dogs to be well broken, but if they are not so, there are certain faults of training which we enumerate and which we will not excuse; we will penalize or disqualify your dog for them."

Thus it will be seen that all clubs require dogs to be broken, and if the requirement is disregarded up to a certain point, the club retains the discretionary power to consider and act upon it, and beyond that point inflicts arbitrary penalties or disqualification.

To suggest, even for the purpose of a *reductio ad absurdum*, that the dogs be turned loose in a trial in an unbroken state and run wild, or *au naturel*, is going entirely outside of the issue. No field trial man has ever advocated such a measure in whole or in part, therefore it is irrelevant. All appreciate and approve thorough training.

The term natural qualities are used to distinguish them from the educational, not to imply that the latter should be abolished.

If a dog is not educated properly, he suffers in the inferior quality of his work; for flushing, awkward performance on birds and working out the ground inefficiently carry their own penalty. That is, the results of educated natural qualities are judged, and not the education itself. Even the general results are governed by rule, for under the heading of "bird sense," nearly all clubs say in substance or in words: "Bird sense is shown in a dog by his desire to hunt birds; his selection of likely places to hunt in; his method of hunting places; his industry in staying out at his work, and his skill in handling and pointing the birds after he finds them." This embodies all that is required of a dog in working to the gun, and while his natural qualities are considered, it is only in their practical application and practical results, in a prescribed manner.

The values of all educational qualities are determined by their practical results. To give an arbitrary value to educational qualities would result in giving a thoroughly educated dog an arbitrary reward, whereas only by the application in actual work can his educated natural qualities be properly determined.

As to the purposes of a field trial, whether they are for the purposes of determining which are the best dogs for finding and pointing birds under conventional conditions, or which are the best dogs under other considerations, commonly called an ordinary day's shooting, is a question still unsettled by sportsmen at large. If the latter is the case, then the rules and theory of running which at present obtain need remodeling from beginning to end. I believe that the former is the case, hence I believe that the present theory is correct.

In other competitions there is an analogy in the principle. For instance, in a horse race, the education of the horse: breaking to harness and to respond to the bit and voice; his acquirement in hauling a weight, etc., are not considered. Only the results of these educational qualities combined with his natural abilities, are considered; but if an untrained and unbroken horse were started in a race he would suffer the penalty of disqualification. He would not be fitted for the competition without the training.

Therefore, all who consider that field trial clubs do not consider anything but the purely natural qualities of setters and pointers are laboring under a grave misapprehension. The natural qualities are considered, but they are educated natural qualities; and, as hereinbefore shown, if these qualities are uncultivated or imperfect, there are ample safeguards to meet any requirement.

The matter of retrieving at field trials has been pretty well threshed out, and so far as I have observed any reason in the arguments advanced by the supporters of retrieving at trials, it all rested on the fact that they wished to secure the birds after they had shot them. The fact that a field trial is not an ordinary day's shooting, in fact or in theory, was not considered for a moment. A field trial is for testing the dog's qualities thoroughly in competition on birds, while the ordinary day's shooting is to bag the birds. When a setter or pointer has found and pointed birds, he has done all that is natural to him in his special field as a finding dog. When the bird is killed, the matter of finding and bringing it to hand is a matter of education. Of course, it requires intelligence to retrieve well, but it is only such intelligence as is possessed by dogs at large, and not at all peculiar to pointers and setters. The shooter himself can often retrieve the bird. Poodles, Newfoundlands, etc, or even curs can be taught to retrieve, but they have not the natural requirements for hunting birds.

No field trial man denies the usefulness and necessity of a retriever in field work, and but few of them consider it a field trial quality. On the other hand, every man whose experience has been confined to ordinary shooting, considers such ordinary day's shooting the true test of a field trial.

I noticed recently where an advocate of retrieving made the ludicrous remark that those who advocated its abolishment at field trials were "compelled" to acknowledge its usefulness afield. This is truly a solemn affectation of partial victory. Considering it as a matter of fact, the writers referred to never admitted anything else than that retrieving was necessary in actual shooting; therefore, the term "compelled" is badly chosen and misleading.

There is a widespread misapprehension as to a field trial meaning of natural and educational qualities, owing, no doubt, to taking them in their commonly accepted meaning and not their special field trial meaning. If any doubter will carefully read any club's field trial rules, he will find that the matter is as herein set forth; and that field trial ideas have been greatly misrepresented in the arguments advanced during the past few months.

B. WATERS.

### Coursing Items.

A coursing correspondent informs us that Mr. Ralph Taylor, of the Emporia Kennels of greyhounds, has removed from Emporia, Kan., to Colorado Springs. Mr. Ed. Lyons, of the same kennels, will probably join Mr. Taylor at Colorado Springs shortly, and then they will move their kennels to the Springs. Among the noted dogs in their coursing "stable" are Girl's Favorite, Brilliant, Trales and some Trales—Brilliant pups. They seem to think that the altitude of Colorado Springs will develop the lung power of the greyhounds better than any other. The St. Patrick Greyhound Kennels have sent their bitch Irish Lass to North Platte, Neb., to be bred to Col. Cody's (Buffalo Bill) Dingwall, which was recently presented to him by Col. North. Irish Lass is a litter sister to the much talked of Pearl of Pekin.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—The beagles imported by the Albion Beagle Kennels of Toronto arrived from England two weeks ago. They are: Rally, a 4-year-old, 14½in. bitch, by old champion Ringwood out of champion Abagail. Ringwood in his day was the best beagle on the bench and champion Abagail was first three years in succession at Birmingham, besides winning other prizes Rallywood, a 14½in. dog, by old Rallywood out of Rally, is 2 years old; Comely, a bitch, by Duster out of Crafty; Baffler, a 3-year old dog by Bowler out of Ringlet, and Dimpler, a 14-months bitch by Duster out of Ringlet. Rally came out in whelp to Bowler. Comely whelped seven puppies (two dogs) to Chancellor at Cornwall on the way up from Montreal, one bitch has since died.

You have cut off a line of copy in second paragraph of mine last week. In addition to the names of those gentlemen given as being present at the C. K. C. executive meeting there were Dr. J. S. Niven, London (in the chair), and C. A. Stone and J. G. Mitchener, Toronto.

Mr. A. D. Stewart has been appointed superintendent of the exhibit of dogs from Canada at the World's Fair.

A special order has been issued by the Dominion Customs authorities to permit dogs entered for the Canadian circuit to enter in bond at one point, take in the circuit and leave at any point most convenient to owner's place of residence.

I cannot think that Mr. Geddes would bring Mr. Middleton's name up in connection with Mr. Mercer's case unless he had authority to do so. I have written Mr. Geddes, and if his reply reaches me in time will send it with this. If not, later.

An old spaniel breeder and judge writes me as follows: "Coat is a matter that judges must take a stand on in the near future. Last year we saw dogs winning that had no more coat than a smooth fox-terrier should have, and placed over better dogs because of a *straight* coat. This seems to me wrong—not what the standard calls for nor what a spaniel should have."

Mr. H. Falconer, Shelburne, Ont., has bought the mastiff bitch Attraction from Mr. Geo. P. Dustan, Peterboro, N. H. She is 16 months old, and is by champion Beaufort out of June (A.K.C.S.B. 13,548) (champion Ilford Caution—Winchell's Bess).

Mr. S. H. Thompson, Toronto, has purchased the rough-coated St. Bernard bitch Survivor, by Monarch out of Judy III., from Mr. A. M. Dodge, New York.

Mr. A. D. Stewart, Hamilton, has imported from Mr. Geo. Raper, Sheffield, the smooth fox-terrier dog Raby Domino, by champion Domino (Pitcher—Vene) out of Dawning (Brittle—Day Dream). In color she is white, with black and tan spot over left eye and ears ticked with black. Whelped April 7, 1890 Winnings, second puppy, second novice, second open, Haslingden. H. B. DONOVAN.

## PACIFIC KENNEL CLUB MEETING.

THE regular monthly meeting of the Pacific Kennel Club, held at 21 Kearney street, on July 6, was well attended, the following members being present: E. P. Schell, Horace Oscar, Clarence Haight, H. L. Miller, L. L. Campbell, Thos. Higgs, Geo. H. Croley, S. E. Fischer, T. J. Watson, William Henry Huber, Frank Markey, E. H. Wakeman, Dr. Bohill, P. D. Linville, Jas. E. Watson, A. Russell Crowell, T. W. Skaife, D. C. Golcher, W. J. Golcher, John Hefferman and Hypolite Biers.

The meeting was called to order by Vice-Pres. E. P. Schell in the absence of Ramon E. Wilson.

Committee on poultry and pigeon prizes reported $147.75 paid, other charges are on the books, but the parties cannot be found and consequently the bills cannot be liquidated.

The following names were submitted and the gentlemen elected to membership: Geo. P. Sperry, Stockton; Fred Howard, Howard Vernon and Henry Spencer, of San Francisco.

In the absence of the president, the appointing of the finance, membership and other committees was laid over until the next meeting, in August.

On motion of Mr. Watson the secretary was instructed to present the stricken family of the late Wm. S. Bowen, of Santa Clara, one of the oldest members of the club, with a copy of the resolution of regrets passed by the club.

The secretary was then instructed to purchase books and engage a collector for delinquent dues.

On motion of Secretary Haight the monthly dues will become due on the first of the month following their election. Afterward the treasurer reported $175.30 in the treasury.

On motion of Mr. Schreiber the secretary was requested to correspond with Mr. Jas. Mortimer, requesting him to act as delegate to the A. K. C. Adjourned at 9:45 P. M. until Aug. 3.

## IRISH SETTER CLUB MEETING.

*Editor Forest and Stream:*

At a meeting of the executive committee of the Irish Setter Club, held July 11, 1892, there were present Messrs. Child, Thompson and Davis, and by proxy Dr. Rowe, E. B. Bishop, F. L. Cheney and F. H. Perry.

The following gentlemen were elected members of the club: Geo. T. Leach, High Point, N. C.; H. B. Anderson, Glen View, N. J.; F. C. Fowler, Moodus, Conn., and Dr. L. C. Sauveur, Chestnut Hill, Philadelphia.

The question of holding field trials was taken up and many communications from members, trainers, and others were read and discussed. It was not thought advisable to hold our trials independently, but that it was essential to run them at or near the other trials so as to form one of the circuit, and thereby obviate the necessity of the trainers making a separate trip to run their Irish Setter entries.

This left two localities to chose from, New Albany, Miss., and Lexington, N. C. Should they be run in connection with the Southern trials it would necessitate holding them during the second week in February. As many of those who run their dogs also desire to exhibit them on the bench, it was thought that this would be too close to the bench shows and interfere with the preparation of the dogs for that event, besides putting the trials off too late in the season. In considering the question of holding the trials at Lexington, we could begin them immediately after the conclusion of the Central Trials, and as most of the handlers would be in attendance at either the Eastern, Philadelphia or Central Trials, which are to be held immediately before ours, it would not require them to make a separate journey to run their Irish dogs. Under these circumstances it was thought best to again hold the trials in North Carolina, and the following was decided on: To run the Irish Setter Trials at Lexington, N. C., beginning Dec. 19, immediately after the conclusion of the Central Trials; to have two stakes, a Derby, the entries to which are to close on Sept. 15, and an All-Age, the entries to close Nov. 1. The fees for each stake are $10 to enter and $10 to fill. The prizes for the Derby are $200 to the winner of first, $100 to second and $50 to third. The prizes for All-Age stake will be announced later. There will also be some special prizes. The rules of running are the same as used last year, being those of the United States and Eastern trials for 1891. Copies of these rules and any further information desired can be obtained by addressing the secretary. G. G. DAVIS, Secretary,

1378 Walnut street, Philadelphia, Pa.

## NEW ENGLAND FIELD TRIAL CLUB.

A MEETING of the board of governors of the New England Field Trial Club was held at 266 Washington street, Boston, Mass., Tuesday, July 12, at 2 P. M., President Power in the chair.

Mr. A. M. Tucker for the committee on grounds and game read communications from several parties relative to an increased supply of game. The report was very satisfactory and was accepted.

The matter of posting the grounds and making a penalty for hunting on the preserve was referred to the next meeting.

The committee on incorporation reported that their duties were finished, the charter having been granted June 29, 1892.

The committee on publication submitted copies of circulars, entry blanks, etc., issued according to instructions from the board.

The following gentlemen were elected to membership:

THE POINTER RIP RAP.

Roading in the Four Hour Race at Central Field Trials, 1891.

Geo. H. Lyman and Dudley B. Fay, of Boston, and Geo. E. Thompson, of Bath, Me.

A very interesting discussion was indulged in by all present, and all felt greatly encouraged at the excellent prospects for the coming trials.

A pleasant feature of the occasion consisted of a large punch bowl filled with delicious lemonade from Young's Hotel, accompanied by cigars, donated by Mr. E. Knight Sperry, secretary of the club.

## MR. MIDDLETON'S RESIGNATION.

*Editor Forest and Stream:*

I inclose a copy of Mr. Middleton's resignation which speaks for itself. I might just add that in handing it to Mr. McMahon he said that he would prefer to remain on the committee, but thought it was the only thing left for him to do. He also spoke in the same way to other members of the committee as well as myself, and asked me to write the secretary of the Canadian Kennel Club and ascertain if he, as a partner, was affected by the disqualification of Mr. Mercer. This, I think, is quite sufficient to prove that it was not the Ottawa committee that drew Mr. Middleton into the unpleasantness, as Mr. Mercer states.

ALFRED GEDDES, Sec. Bench Show.

OTTAWA, Can., July 17.

Copy of Mr. Middleton's letter:

"E. McMahon, Esq., Secretary Central Canada Fair, Ottawa: Dear Sir.—In consequence of the verdict of the Canadian Kennel Club with regard to the Little-Mercer affair, I have no alternative but to place my resignation as a member of your committee in the hands of the committee. I should like it, however, to be clearly understood that Mr. Mercer's action with regard to the entry of the Clumber Newcastle was done entirely without my knowledge or consent. Yours faithfully, W. H. MIDDLETON."

## CANADIAN FIELD TRIALS.

THE International Field Trials, which begin with the Amateur Stake Nov. 7, promise well. Birds are very plentiful; the young coming out after the rains had ceased were not destroyed by the wet weather.

Mr. William Brailsford, who is coming out on a visit this fall, will be one of our judges. The other two have not been selected yet. The Amateur Stake, which will begin a day before the regular trials, will be for all-aged dogs broken and run by amateurs. It is to be hoped that those who delight in breaking their own dogs, as well as shooting over them, will turn out and make the only amateur stake in the country a success.

The entries for the Derby close Oct. 1, All-Aged Stake Oct. 15. The judges will be instructed to be as lenient as possible as to breaking, in the Amateur Stake.

W. B. WELLS, Sec'y.

The handsome steam yacht owned by Dr. Derby, one of the officers of the American Mastiff Club, was burned to the water's edge at Nyack, N. Y., July 13. The origin of the fire is a mystery, as no fire or light was left on the yacht overnight.

Admirers of the red setter will be pleased to read Dr. Davis's letter in another column. The Irish setter men had almost come to think that the first attempt was to be the last, but we know what an enthusiastic worker Dr. Davis is and we scarcely expected him drop his oars until he had taken another pull. We sincerely hope that the success attained last year will be doubled this.

Mr. Grace, in a letter to one of the FOREST AND STREAM staff, says that he will be unable to attend the Great Bend meeting this year, and probably the Merced meet, too. He remarks further that the weather in San Francisco is beautiful for coursing and owners can run their dogs every day of the year at Cannavan's Park.

# DOG CHAT.

### National Beagle Club Affairs.

The next meeting of the National Beagle Club, July 28, promises to be a lively one. The friction among the officers seems to be on account of the selection of judges—whether this shall be done by executive committee or by the club. We do not know how such things are usually worked but one would think that the club as a whole should be heard in the matter. The secretary to secure the names of those who would be willing to act in a judicial capacity and then send out a voting list of those men and let the members choose, and the two men securing the most votes be elected judges. The executive committee is the servant of the club, and if a majority of the club calls for a certain line of conduct that line must be followed. By the way, the *American Stock-Keeper*, in a paragraph that is difficult to understand, wishes to know our authority for stating exclusively that Mr. A. C. Krueger would probably be one of the judges. We had our information from two sources, one was the secretary, and this is what he said after asking our terms to judge: "Mr. Krueger seems to be very favorably looked upon as one of our best judges; would he be acceptable to you as a coadjutor? I ask this that we may choose men friendly to each other, that the most possible good may come to the National Beagle Club." This seems to us sufficient ground to give the news that Mr. Krueger would *probably* be one of the judges. The club has sent out a list of amendments to be voted on by the members of the club.

The attention of members is drawn to the Rule III. Sec. 2, of the Running Rules. "Entries shall be mailed to the secretary in sealed, printed envelopes [to be mailed with entry blanks] endorsed 'field trial entries.' All entries so received to be open and acted upon at an executive committee meeting." This rule is contrary to all procedure and an insult to the secretary. If a secretary is elected he is supposed to command the respect of every one and his honesty be undoubted, then why may he not receive the entries as they come in, post them in his book in the regular manner in which this is done by other show and field trial secretaries, and has hitherto been the method pursued by the previous secretary of the club? This is not the open-hearted policy hitherto pursued by this club.

### Foster Mothers.

The prudent breeder makes provision for emergency. It is a well-known fact that many of our best breeding stock on the female side are sent around to shows to get a record, and they are often unfortunately in a condition when the quietude of home is better adapted to their state than the hurly burly of a dog show. The average breeder is not at all far sighted, and of course he should not expect a healthy litter or a healthy free-milking mother when the dam is subjected to such treatment. This leads up to the advice we wish to give—more attention should be paid to the subject of foster mothers. A man who owns a valuable bitch owes it both to his reputation as a breeder and the breed of which the bitch may be a shining light, to, if at all possible, arrange for a foster mother, so that even if everything goes right, and the bitch has say a litter of eight, several puppies can be transferred to the foster and the whole litter probably saved. Many breeders, when a bitch has a litter of eight or ten, or more, will drown three or four so that the remaining ones may do well, picking out those that seem least likely to grow into good ones. This is sometimes a dangerous policy and will often defeat its own ends, for it is a well-known fact that the ugly duckling of a litter may turn out to be a crack-a-jack when matured. In England more attention is paid to "fosters" than here, and only this week, as we turn to the *Stock-Keeper*, we find that there are nine advertisements for foster mothers or of them. The charge for the bitches averages about $5. That sum will secure a foster in this country, either through the dailies or the kennel press. This is very little outlay and trouble for a great deal of good. It is not necessary to order your foster according to the size of the breed of your puppies. We have known a small bull-terrier suckle three St. Bernard puppies and bring them up in fine shape. The case in point was champion Daphne's when she had a litter by champion Plinlimmon. By such a procedure the wear and tear of maternity does not fall with such a weight on the valuable bitch, and another important fact is that for every foster mother used there will probably be half a dozen mongrels less to run about our streets, and that means so many less "mad dog" scares.

### Peterborough Hound Show.

This is an annual event among hunting men in England that excites them to the highest degree of rivalry. The sight of so many beautifully modeled hounds with waving sterns and the background of pink-coated horsemen and whips, to say nothing of the musical chorus that must come from so many throats, would stir the blood of every one, even though completely ignorant of the top bar of a five-barred gate or the mysteries of a bullfinch. No less than twenty-four packs were entered, and "Brooksby," that entertaining writer for the *Field* (Eng.) tells us that there was hardly a discreditable hound among them and few without a fashionable pedigree. No one kennel swept the board, but as usual the Warwickshire, which showed the champion dog and the best bitch, was well to the front, while the Oakley, Mr. Fernie's, the Worcestershire and the Vale of White Horse packs also carried off their share of honors. It will hardly interest our readers to give the names of the winners, but we may say that Hermit, as stated above, belonging to the Warwickshire hounds, won the stallion hound cup, and Royalty, who was the best bitch in her class and would have won the champion cup had she been on the grounds at the time of judging, also came from the same pack. It is interesting to note that with regard to the bitches the judges seemed determined to enforce the wholesome principle that excellence of a pack of foxhounds is dependent mainly upon its brood bitches, and that if these do not promise sufficient power and size, a pack must of necessity deteriorate to weediness; and this doctrine holds good in other breeds as well.

The harriers and beagle packs also had their annual meeting and were surrounded by their special admirers. The beagle Bronwyd Nigle won the champion cup and was so much fancied that he was sold after the show for $130. Compared to a Frank Forest this is not a large price, but as working beagles go in England is considered so over there.

### Death of Noted English Collie.

One of the most celebrated collie brood bitches has gone the way of all flesh. We allude to Mr. T. H. Stretch's Sweet Lassie. She was known as the dam of such cracks as champion Ormskirk Amazement, Excelsior, Dolly and others. Her value both as a show and brood bitch was extraordinary; in fact one of her litters produced six cup winners. It will be remembered that two years since mention was made of her having been sold to Capt. Heaton for $1,250, but Mr. Stretch was never content till he got her back again. Unfortunately for her owner, Sweet Lassie was due to whelp the day she died of inflammation, to Ormskirk Chriss, the sire of Ormskirk Ormonde.

### Toronto Show.

The premium lists of the dog show to be held at the city of Toronto, Canada, Sept. 12, 13, 14 and 15, are now ready for distribution. Considering the entry being only $2, the list is a very liberal one, some $3,000 being offered in cash prizes, besides medals, diplomas, etc. The majority of the specialty clubs have donated specials. The list contains

193 classes in all, 53 challenge classes, $25 to the party making the largest number of entries, and $15 to second largest number, 34 kennel prizes and sweepstake prizes. In the majority of the large breeds four money prizes of $15, $10, $5 and $3 in the open classes, and $15 and diploma in challenge classes, sexes divided, are offered, while in the following classes, pointers, English, Irish and Gordon setters, collies, field spaniels, cockers, three moneys: $15, $7, $3 and diploma in open classes, and $10 and diploma in challenge classes, are offered. The remaining classes have two, of $7, and $3 and diploma for third. There is also a rule that in classes made for dogs and bitches, should there be six or more entries, two classes will be made. We would draw the attention of our readers to the railway and express arrangements which are printed in the list, thus enabling intending exhibitors to have before their eyes the rates of the different roads. There are still, we learn, several roads to hear from which will be published through the press. Entries close Sept. 1. All communications should be addressed to C. A. Stone, secretary and superintendent of Bench Show, 82 King street, East, Toronto, Ontario.

### Pearl of Pekin Protest.

The news now comes from Mr. Brougher, secretary of the American Coursing Club, that this case having been referred back to the club, will not be acted upon until the annual meeting in October, 1893. Mr. Brougher's words are: "The executive committee have reserved their decision until the October meeting of the club. They did not give any reason for so doing." The protest was entered in October, 1891, and it is a sad commentary on the way coursing troubles are evidently adjusted in this country, that it will take one year to decide a question that, according to the rules, should require one hour to decide, especially as the evidence that Mr. Edmunds was in the wrong seems to be overwhelming. In the face of this it is hardly in good taste for any officer of that club to ask the N. G. C. or any one else to get up a sixteen dog stake and give a handsome cup. We have a letter from one of the principal members of the present executive committee, in which he says: "It matters not to me personally, which way it goes, as each party are personal friends of mine. I promise you this, if it should be referred back to the club and come up before the present executive committee, it will not lay on the table long—let it hurt who it may." This has the right ring about it, and with this coursing men and those directly interested in the affair must rest content till the meeting at Great Bend. It is not at all probable that the N. G. C. will get up a sixteen dog stake nor give the cup.

### Cat Nursing Puppies.

JANITOR ENOCH EDWARDS is having a little millenium, when we are told that the lion will lie down with the lamb, all to himself. At present in his flat is the unusual spectacle of a cat nursing four Skye terrier puppies. How Edwards happened to become possessed of this singular combination is not without interest. Up to last week he owned a Skye terrier bitch, but she was stricken with apoplexy or something, and died just before whelping. Her owner was much moved, and in the interest of science, and incidentally his own finances, he decided that the pups must be saved at all costs. The mystery of the Cæsarian operation was to him a blank, but he tried it, and successfully. He tried to feed the pups by sticking their noses in a saucerful of milk, but naturally this resulted in nearly suffocating them. He was about to reconcile himself to the inevitable, when he bethought himself of the cat, which was suckling her kittens, and the Skyes were quickly installed in the kittens' quarters during the mother's absence. The cat naturally acted a little queer at first, but being a sensible and a feline mother, she went to work and has since suckled them as if they were her own flesh and blood. The puppies are of ordinary size and perfectly healthy.

### Greyhounds.

Greyhound men are continually adding new blood to their kennels, and what is particularly noticeable and to be commended, is the fact that great attention is paid to running blood. Mr. James Black, of Sheepshead Bay, L. I., has imported a good young greyhound dog called Flash, by Col. North's Huic Holloa, out of Phœbe Mayflower. Huic Holloa is a well known coursing dog, having won $8,875 in stakes. Col. North gave Mr. Dent, his trainer, 500 guineas for him. Mr. Black's new dog has every appearance of being fast, having plenty of length and depth in the right places. Mr. Black's Dolly Dollar, that won at New York, whelped nine puppies recently by Prince Albert, but she killed all but three. This is hard luck, as there was a good market for them. Mr. Black has sold one and retains a dog and bitch. He is thinking of running Dolly Dollar and the new dog at the Great Bend meeting, and we trust he will do so, for we should like to see the Eastern kennels well represented this fall. If this is done our greyhound men must remember the leading cause for past defeats and send out their dogs in good time to become acclimated and in fit condition to run.

### Psovois.

It is well to throw a light on some of the smart gentry who think a dog an excellent medium whereby they can turn an honest (?) penny. *Stock-Keeper* (Eng) gives an extract from a Russian journal called in English *The Sportsman's Diary*. The part we quote will especially interest American buyers of these Russian dogs: "* * * At the last auction, which took place in the riding school of the St. Nicholas Palace, St. Petersburg, dogs did not sell easily, although the prices ran as low as three roubles, the highest fetching 200 roubles. It is true that the three rouble specimen was not worth that price even, being cross-bred. Count Sheremeteff bought a number of dogs at this sale, among them Zavlaidai, for 200 roubles; he is not a bad dog. Mr. J. J. Rousseau bought several Borzois—not expensive ones—for instance, one cost him six and another seven roubles. All these dogs will be sent to America, of course, which country Mr. Rousseau has flooded with Borzois that are not free from faults." To properly explain the pith of this we may remark that a rouble is worth about sixty cents in our money.

### Another St. Bernard Importation.

The Mount Sion Kennels, Albany, N. Y., have just purchased from Mr. Wm. Marshall, of Scotland, brother of John Marshall, of Troy, the Newfoundland breeder, a rough-coated St. Bernard bitch, litter sister to the late Scottish Prince, and is expected by steamer Circassia next week. She is described as "standing 31in. at shoulder, with immense bone, a beautiful orange in color, with perfect markings, great depth of muzzle, best of legs and feet and perfect in disposition." Mr. Marshall was the breeder of Scottish Prince, also Sunray, Harmony and Scottish Leader, owned by the Swiss Mountain Kennels, and several others of note It is from Mr Marshall's kennel Mr. Sidney Smith has picked up so many youngsters that have afterward made their mark in the St. Bernard world.

### Cuffing Elcho at Kingston.

On this subject Dr. Mills writes: "After Mr. Wade's fiasco regarding the charge of cruelty to a hound I showed at Kingston, it is plain to me, as I think it must be to others, that his object is simply to annoy me. I shall, therefore, take no further notice of anything that Mr. Wade may write affecting my character or reputation. If any of the 'gentlemen of undoubted veracity' he refers to will make the same charge as Mr. Wade over his own signature in any Canadian paper, I will however make him prove it in a court of law or suffer the consequences—if he is worth that much attention."

As an afterthought Mr. Wade sends us the following: "While I have no wish to trespass on your stand against prolonging the wrangle between Dr. Mills and myself, may I not point out that I have never quoted the incident as to cuffing ears as being, *in itself*, wrong. I simply pointed it out as an illustration of where ultra refinements of dog show moralities would land us."

### Coursing at Merced, Cal.

THE people of Merced, Cal., will give a purse of $1,000 for a coursing meeting next year, open to the world, but with this proviso, that Mr. John Grace will guarantee to sportsmen of Merced that he will be on hand to judge the meeting. The Californians are afraid to hold a large meeting unless they are certain of having a judge that can be relied upon to give fair decisions. The experience at Madera last year taught them a lesson. Dr. Irwin Royce is making strenuous efforts to have a coursing meeting at Topeka, Kan., this year; he says in a letter to Judge Grace that it is a grand location, with eleven miles square of open country and jackrabbits *ad libitum*.

### A Hunt Club For Albany.

The following gentlemen, Messrs. Henry A. Peckham, William M. Whitney, Jr., C. L. A. Whitney, Lewis Balch and George D. Miller, have formed a society to be known as the Albany County Hunt. The particular object or purpose of the society shall be the keeping and owning of foxhounds for the purpose of hunting and for other lawful sporting purposes.

### Marc Anthony Dead.

The well known St. Bernard Marc Anthony died last week of apoplexy. Last year he won first in the puppy class at New York show, and at the time of his death was owned by Mr. White, of Staten Island. Marc Anthony was a son of Courage III. out of champion Cleopatra and bred by Mr. Daniel Mann. He was only two and a half years old when he died.

### Beagle Stormy.

Mr. George Laick, of Tarrytown, N. Y., has sold the beagle field trial winner Stormy (10,785) to Mr. F. B. Zimmer, Gloversville, N. Y., secretary of the dog show that is held in that town.

---

Now that the grouse season is near at hand, the principal pointer and setter breeders for the field in England are sending drafts from their kennels to Aldridge's auction sales in London. We notice that Mr. Heywood Lonsdale had some up the other day, ten setters realized $835; a lemon and white bitch, Alpha, bringing $130. Beacon, a pointer, brought $157. The prices do not seem large considering their breeding and field qualities.

---

The best Clumber spaniel imported to this country so far, at least of those seen in public, is dying and may by this time have passed to the other side. This is Mr. Mercer's Lady Snow. Unfortunately she has never been in really good health since she was imported, as she arrived in wretched condition.

---

Dog shows and field trials are working the good in California that they have already done in the East, and the sportsmen of the Pacific Slope are making constant drafts on the best blood that can be procured in Eastern kennels. Mr. R. L. Gardner, of Oakland, Cal., received July 7, from the Blue Ridge Kennels, two young English setters, a dog by Gath's Hope ex Tempest, she by Count Noble ex Lit, and a bitch by Gath's Mark ex Princess Joy. They arrived after the long journey in good condition. Mr. L. S. Campbell, of the Bay View Kennels, will have them in charge.

---

Mr. H. H. Hunnewell, Jr., of Wellesley, Mass., is a new fancier in the fox terrier field, and will also go in for brown poodles. At present he has a fox-terrier bitch, Meg, a daughter of the wire-hair Tyke imported by G. E. I. Grainger, and two puppies. He has ordered two good bitches and a dog from England. In poodles he has a good brown one, a prize winner at Paris, France, shows, and has left a commission in that city for a first-class dog and bitch. His kennels are called Hill Hurst, and are now in process of erection.

---

Mr. Frank F. Dole, the well known bull-terrier man, and his brother have organized an athletic and sporting goods company in New Haven, Conn., to be called the Dole Brothers Co.

---

Mr. C. F. R. Drake, treasurer of the National Greyhound Club and part owner of the Tubby Hook Kennels, has not been well for some time and has taken a trip to Houghton, Mich., for his health, and will not return till September. He has just had presented to him a fine foxhound by ch. Bravo (9,291) out of Frances (15,409). He tells us that he has seen out there some very good deerhounds of Mr. Thayer's stock, and one, a puppy, he speaks very highly of, remarking that "it would make some of the New York cracks hump themselves"—and why not?

---

The Seminole Kennels have purchased from Mr. F. H. Perry of DesMoines, Iowa, his Irish setter Pride of Patsy. The bitch Nino, formerly owned by Mr. Perry and now by Gail W. Hamilton, and a well-known prize winner, was bred to Claremont Patsy, and on June 23 whelped a litter of ten, five of which were dogs.

---

A poor old toper, who was in the habit of getting lost on his way home, was asked how he could afford to keep the dog that was always with him. "That dog," he said, "not only boards himself, but finds me."—*Boston Post.*

---

Among the records of the Superior Court there is a quaint little volume containing interesting reminders of the early days of Baltimore. The book has 504 small-size pages, on which are recorded indiscriminately everything legal thought worthy to be preserved. It embraces the time from June 2, 1741, to Aug. 2, 1750. Among other curious entries is the following, recorded by J. Bierewood, clerk: "This day John Bell, planter, on My Lady's Manor, in Baltimore county, with his son, Frederick Bell, about 12 years old, who had unfortunately lost his left ear by the bite of a dogg about a year agone, to the truth of which he attested, and requested me to record the same, and recorded accordingly 20th June, 1746."—*Baltimore Sun.*

---

According to *Stock-Keeper* Mr. T. Duerdin Dutton, the well-known St. Bernard breeder, has lost his celebrated St. Bernard, Tiger III., through fatty degeneration of the heart, the dog being found dead in his kennel. The dog was by Pliny out of champion Grace, and, up to 1890, had won thirty-four prizes.

---

Bulldogs must be a popular breed in England to be able to support two specialty clubs. A new one has been formed in England called the British Bulldog Club, with headquarters at Manchester, the first meeting has been held and the first specials will be given at the coming Gloucester show. Mr. Cyril F. W. Jackson is the secretary of the new organization.

---

Mr. Mortimer has for some time had a sneaking liking for a dachshund, and it seems that the missing dachshund that we read about in the English papers after the Sheffield show was one that this gentleman had claimed at that show and the secretary had omitted to advise the previous owner of the transaction. The dog's name is Tack and with it Mr. Mortimer won his first prize on English soil at Belper show the other day. Mr. Mortimer also takes one of the Feldman K—Bessie K. litter, that Mr. Klocke, of Pittsburgh, tells us are now weaned, Mr. Frank Dole, we believe, taking nearly all the rest of them.

---

The kennel of English setters and pointers belonging to Messrs. Jos. H. and J. A. Hunter has been moved to Bloomington, Monroe county, Ind. This reminds us that "Joe" Hunter has lately been devoting his spare time to trap shooting, and though we can scarcely term him a "Black Wonder," still he has surprised his many friends by his skill with the shooting iron. At the Washington Trap Shoot he tied with such a noted shot as Miller, and carried off several prizes; then he ran down to the big shoot at Knoxville, Tenn., where he won several sweeps and a lot of specials. He is one of the prime movers of the Washington Gun Club and very popular among his fellow members.

---

Mr. Sidney Smith seems to have a faculty for getting hold of real good things in St. Bernards, for now we learn that he has a pup by the late Scottish Prince out of a sister to Mr. Moore's late Alton, that will, it is promised, "bang Banagher," and we all know what he did. Our informant says "it is the largest and finest specimen ever bred." This can be no other than the dark star we alluded to a week or two since.

---

Mr. Manice's two dachshund bitches that he purchased from the English dachshund breeder, Mr. Harry Jones, have arrived, and he is well pleased with them.

---

The secretary of the A. K. C. is all ready for business now, as far as the World's Fair is concerned, having procured a ponderous volume containing 1,600 duplicate certificates of registry, which owners of dogs that are intended to be entered in the World's Fair show must supply themselves with at a fee of 50 cents each. This, with $1 for registration in the A. K. C., and the $1.50 for entry fee to the show, makes the amount equal to an ordinary $3 entry fee; $1.50 of this will be returned providing the dog is absent from the show. The 50 cents extra that the A. K. C. charges for the certificate of registry may seem rather exorbitant, but it is the intention of the club to devote this money to the purchase of silver medals, which will be donated by the A. K. C. at different shows.

---

Last Thursday we took a run up to the northern part of New York city and in the wilds of Morrisania we spent a pleasant hour or two looking over Mr. J. B. Blossom's Gordons and Mr. George Jarvis's pointers. First we took a look at Lad of Kent, who seemed as vigorous and full of health as ever; Lass of Kent, his kennel companion, is heavy in whelp to King of Kent, and the 23d is the date that "George" expects the advent of some future champions. The setter Rock Belton and a promising pup by Lad of Kent completed the kennel. Then we took a stroll over to Mr. Blossom's delightful place, but sorry we were that the rose garden's glory had almost departed. Old Beaumont, Heather Bee and York, well known to fame, seemed fit to show any moment, and champion Kelso, the Irish setter, was another interesting pet that has the freedom of the place. We were just about returning when Mr. Blossom came up from the city, and this was the signal for an adjournment to the cool of the dining room, where Mr. Blossom dispensed his hospitality with a true knowledge of the average dogman's weaknesses.

---

Mr. M. H. Thiman has sold the noted Irish setter Gen. Husted to Miss N. Frances H. Cole, who in turn presented it to Mr. T. Chevalier of New York city. This dog is looking very well now, having filled out very nicely since the early spring, when he won several prizes. Mr. Thiman also sold Duke, an English setter, to Mr. Louis Contoit, the well-known Irish setter breeder.

---

The well-known prize winner Irish setter Norna whelped July 11 nine puppies (six dogs), by the no less noted Duke Elcho. Edna H., who is also well known as a big winner from the same kennel, was bred July 8 to the same dog.

---

There are several new kennel advertisements this week. Among them we find Gladerigo Kennels have seven English setter pups for sale; New York St. Bernard Kennels, several litters of puppies by their noted dogs; W. G. Kingsley, brok n liver and white setter; Handsome Brook Kennels cocker spaniels; John Fox, pointer bitch; Frank Forest Kennels, beagles; C. T. Brownell, five Gordon pups; Dr. Leo, Great Danes; Geo. Betts, cocker and field spaniels. Wants.—T. R. Burns, Irish spaniel; J. H. Lindsay, bulldog.

## KENNEL NOTES.

**Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.**

### NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

*King Don II.* By T. T. Ashford, Birmingham, Ala., for liver and white pointer dog, whelped Feb. 18, 1892, by King Don (Vandevort's Don—Vandevort's Luck) out of Patti M. II. (Nick of Naso—Patti M.).

*Corktown Crib and Corktown Coxey.* By Corktown Cocker Kennels, Ottawa, Ont., for black and white chest and black tip cocker spaniel dogs, whelped April 20, 1892, by Tip Obo (Bob Obo—Cleo) out of Tough (Wildair—Bell ).

*Corktown Chubby, Corktown Caution and Corktown Tannie.* By Corktown Kennels, Ottawa, Ont., for two black cocker spaniel dogs and one black and tan bitch, whelped April 20, 1892, by Tip Obo (Bob Obo—Cleo) out of Œuone (Obo, Jr.—Tough).

### BRED.

☞ **Prepared Blanks sent free on application.**

*Bonnie Bondhu—Gath's Hope.* L. Rausch's (St. Louis, Mo.) English setter bitch Bonnie Bondhu (Count Wakefield—Pearl Bondhu) to Blue Ridge Kennels' Gath's Hope (Gath—Gem), April 6.

——*—Duke of Dexter.* C. B. Pinto's (Bar Harbor, Me.) pointer bitch —— to C. D. Roberts's Duke of Dexter (Duke of Vernon—Boski), June 6.

*Miss King Don—Duke of Dexter.* C. D. Roberts's (Dexter, Me.) pointer bitch Miss King Don (King Don—Patti M. II.) to his Duke of Dexter (Duke of Vernon—Boski), May 9.

*Nino—Claremont Patsy.* G. W. Hamilton's (Centreville, Kan.) Irish setter bitch Nino (champion Elcho—champion Noreen) to F. H. Perry's Claremont Patsy (Friscoe—Nellie IX.), April 21.

*Carrie R—Kent Elgin.* F. C. Rochester's (Logan, O.) pointer bitch Carrie R. to T. T. Ashford's Kent Elgin (King of Kent—Vera Bang), April 24

*Dora Dott—Clip Graphic.* A. W. Bealer's (Atlanta, Ga.) pointer bitch Dora Dott (Meteor, Jr.—Belle S.) to T. T. Ashford's Clip Graphic (imported champion Brackett—champion Sally Brass II.), July 14

*Pera—Kent Elgin.* T. T. Ashford's (Birmingham, Ala.) pointer bitch Pera to his Kent Elgin (King of Kent—Vera Bang), June 6.

*Fanny V. Croxteth—King Elgin.* E. G. Eaton's (Athens, O.) pointer bitch Fanny V. Croxteth to T. T. Ashford's King Elgin (King of Kent—Vera Bang), April 12.

*Lucky Trinket—Kent Elgin.* Dr. C. E. Mitchell's (St. Louis, Mo.)

pointer bitch Lucky Trinket to T. T. Ashford's Kent Elgin (King of Kent—Vera Bang). May 25.

*Mack's Juno—Clip Graphic.* T. T. Ashford's (Birmingham, Ala.) pointer bitch Mack's Juno (Rex Morgan—Fleet) to his Clip Graphic (champion Brackett—champion Sally Brass II). May 20.

*Lucy Dashwood—Flash.* M. Murphy's (Brooklyn, N. Y.) greyhound bitch Lucy Dashwood (Jumbo—Silvia) to Jas. Black's Flash (Rule Hollow—Peggie Mayflower). July 8.

*Lucy Dashwood—Flash.* M. Murphy's (Brooklyn, N. Y.) greyhouse bitch Lucy Dashwood (Jumbo—Silvia) to Jas. Black's Flash (Rule Hollow—Peggie Mayflower). May 23

*Virginia—Happy Toby.* Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Virginia (Spokane—East Lake Virgie) to their Happy Toby (Spokane—Lalla Rookh). July 13.

*Peggie Pryde—Spokane.* Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Peggie Pryde (Eberhart's Cashier—Flossy II) to O. P. Kinnie's Spokane (champion Kash—Lady Thora), July 11.

WHELPS.

☞ **Prepared Blanks sent free on application.**

*Dolly Dollar.* Jas. Black's (Sheepshead Bay, L. I.) greyhound bitch Dolly Dollar (Pinkerton—Mrs. Goldfield). March 7, nine (seven dog), by his Prince Albert (McPherson—Brighton Lady).

*Kathleen.* E. Lever's (Overbrook, Pa.) Irish terrier bitch Kathleen (Paragon—Banshee II.), June 9, eight (six dogs), by J. Campbell's Sport (Mars—Sandy).

*Fannie V. Croxteth.* E. G. Eaton's (Athens, O.) pointer bitch Fannie V. Croxeth (Devonshire Sam—Rooney Croxet), June—, six (two dogs), by T. T. Ashford's Kent Elgin (King of Kent—Vera Bang).

*Nelly.* W. H. Gordon's (Ellenburgh, N. Y.) pointer bitch Nelly (Stanrich Bob—Flash), July 5, thirteen (seven dogs), by Dr. H. S. Paine's Castle Harold (Duke of Hessen—Fatinitza).

*Dot Smirle.* Corktown Cocker Kennels' (Ottawa, Ont.) cocker spaniel bitch Dot Smirle (Bob One—Tough), June 29, four (two dogs) by their Tip One (Bob One—Cleo).

*Nino.* G. W. Hamilton's (Centreville, Kan.) Irish setter bitch Nino (Elcho—Norene), June 23, ten (five dogs), by F. H. Perry's Clermont Patsy (Pigeon—Nellie IX).

*Bonnie Bondhu.* L. Rausch's (St. Louis, Mo.) English setter bitch Bonnie Bondhu (Count Wakefield—Pearl Bondhu), June 6, ten (seven dogs), by Blue Ridge Kennels' Gath's Hope (Gath—Gem); two bitches since dead.

SALES.

☞ **Prepared Blanks sent free on application.**

*Pride of Patsy.* Dark red Irish setter dog, whelped Jan. 20, 1890, by Claremont Patsy out of Nino, by F. H. Perry, Des Moines, Ia., to S. Minole Kennels, Chestnut Hill, Pa.

*Prince.* Black and tan terrier dog, whelped Sept. 14, 1891, by Vorrilcen II. out of Kitty, by E. Lever, Overbrook, Pa., to Addison Rowe, Lansdown.

*Pilot.* Gordon setter dog, whelped May 20, 1892, by Grouse out of Maud, by C. T. Brownell, New Bedford, Mass., to B. W. Walker, Murray, Pa.

*Dixey.* Gordon setter dog, whelped July 25, 1889, by Murkland R. out of Beaulah, by C. T. Brownell, New Bedford, Mass., to F. R. Wing, same place.

*Norah.* Gordon setter bitch, whelped July 10, 1889, by Max out of Judy, by C. T. Brownell, New Bedford, Mass., to F. R. Wing, same place.

*Little Girl.* Gordon setter bitch, whelped Aug. 20, 1890, by Sam out of Belle, by C. T. Brownell, New Bedford, Mass., to F. R. Wing, same place.

*The Judge.* Silver fawn pug dog, whelped March 18, 1892, by Spokane out of Flora, by Eberhart Pug Kennels, Cincinnati, O., to A. A. Bogen, New Ulm, Minn.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.*

G. H. H., Pittsburgh, Pa.—You will require two more generations on both sides to register your bitch in the A. K. C. Stud Book. If you register your bitch the puppies are eligible to registry providing you have their sire's pedigree for two generations back.

W. H. B.—What is the best cure for mange that is on an English setter about one year old. Ans. Apply the following: Sulph. sup. 8oz., kerosene 20oz., vaseline oil add 40oz; mix together and well rub all over the dog every other day for two weeks, then wash off and repeat if necessary. Treat for worms. Feed the dog well, allowing a fair quantity of meat.

J. D. C., Providence, R. I.—1. Does a bitch after spaying ever come in heat? 2. What are the usual prices for the op ration? 3. Do you know of any one in Boston or vicinity that does the work? 4. Are there any books published on the anatomy of the dog? Ans. 1. Yes. 2 From $10. 3. Any veterinarian can do it. 4. None on the dog alone; Cuevan treats of it.

CONSTANT READER, Falls Village, Conn.—I have a pointer puppy, 2 months old, that had small spots come on the head where the hair came off and would fester at first. Then the festers came on thick as they could be and would form one sore as large as a penny, and this is now working back over his body. Ans. Probably run to some dietic error. Apply the following lotion:

| | |
|---|---|
| Magnesia carb. | ʒii |
| Pulv. zinci ox. | ʒss |
| Pulv. amyli | ʒiii |
| Aq. ad | ʒvi |

Mix: Lotion.

Apply to irritable parts frequently with a piece of sponge. Give mixed with the food for a few days a grain of sodi bicarb. and 3grs. of mag. sulph. Treat for worms.

CROOKED LEGS, Long Branch, N. J.—I have three valuable setter pups of my own raising, now 4 months old, whose front legs have become so extremely bowed as to cripple them and prevent their moving faster than a walk. They have always been kept in an outdoor run, 25ft. by 12ft., naturally shaded and perfectly clean. The extreme crookedness has developed within the last month. The joints of two of the pups are immensely large, like those of young bastiffs. I have for the last week turned them out entirely except when feeding and at night. I feed three times a day at regular hours, giving table scraps, oatmeal and occasionally milk and stale bread. They are all very large and heavy, and hate to move. A brother of theirs, much smaller, is perfectly straight and active as a cat, but he has not been confined in any way since I gave him away. The dogs are now absolute cripples. Ans. Treat for worms. Feed principally on raw meat, minced, and milk, and add a little bone meal to the food twice daily. Keep the puppies out of doors as much as possible. Give half a teaspoonful twice a day of compound syrup of hypophosphites, and also one teaspoonful of cod liver oil twice a day, or use cod liver oil cakes instead.

# Canoeing.

## FIXTURES.

JULY.

9-23. W. C. A. Meet, Oshkosh, Wis.
15-30. Northern Div. A. C. A. Meet, Lake Couchiching, Can
23. Rochester, 3d Trophy Race, Irondequoit Bay.

AUGUST.

4-25. A. C. A. Meet, Willsborough Pt
6 Springfield, Cup, Springfield.
15-20. A. C. A. Meet, race week, Willsborough Point.
27. Rochester, 4th Trophy Race, Irondequoit Bay.

SEPTEMBER.

3. Springfield, Cup, Springfield.
3. Brooklyn, Visiting Cruise, Passaic River.
3. Orange, Ann., Arlington, N.J.
5. Ianthe, Annual Regatta.
8. Rochester, Fall Regatta, Irondequoit Bay.

OCTOBER.

1. Springfield, Cup, Springfield.

### A. C. A. Membership.

THE following gentlemen have applied for membership in the A. C. A.: Atlantic Division.—Herbert Wilcox, Summit, N. J.; Alfred W. Dater, Brooklyn, N. Y.; Frank Albertus Marsellus, New York. Eastern Division.—John A. Jennings, Frank F. Tuckerman, Boston, Mass.; Wm. T. Donnelly, Taunton, Mass.; I. A. Wadsworth, W. R. Slocum, Hartford, Conn. Northern Division.—A. H. O'Brien, Toronto. Central Division.—Wallace T. Foote, Port Henry, N. Y.; Rev. Lewis Francis, Brooklyn, N. Y.; Arthur W. Francis, Brooklyn, N. Y.; Lewis W. Francis, Port Henry, N. Y.

# WESTERN CANOE ASSOCIATION.

## Eighth Annual Meet.

CAMP, Lindenwald Point, Lake Winnebago, Wis., July 14.—"S-s-s-sh—boom! ah!" This was the remark, made incidentally but positively, last night by thirty muscular young men dressed in sweaters and knickerbockers, who occupied the front row of seats at the Oshkosh Opera House. The rest of the audience jumped nervously, "Look out for the stick!" remarked the thirty muscular young men with equal positiveness. The audience dodged and looked a trifle scandalized. The audience was glad when the orchestra began to play. So were the thirty muscular young men, because before long they heard the opening note of a familiar popular air. The thirty muscular young men with one voice fell into line and joyfully sang—

"Ta-ra-ra boom-de-ay!
Ta-ra-ra bonm de-*ay!*
Ta-*ra*-ra boom de ay!
Ta-ra-ra *boom*-de-ay!"

Then they repeated softly, and repeated loudly, and did it *da capo*, and *allegretto*, and *staccato*, and *scherzando*, and *forte*, and *di capo* again some more yet. The thirty muscular young men were familiar with this air. They had sung it cheerfully to every farmhouse and to every young woman they had passed on their way into town on the long 'bus. Every time Dickie Merrill, who sat on the front seat and carried the honorable office of head bugeleer, gave warning, in the clear notes of the cavalry assembly call, that a farmhouse or a girl was in sight, the thirty muscular young men fell into line and sang cheerfully. This disturbed the cows a good deal, and caused most of the young women to jump the fence and take to the woods, but it gave the young men a fine chance to grow familiar with the intricate air of "Boom-de-ay," and enabled them to execute it at the opera house with great *esprit*, *eclat* and *sang froid*. At first the blood of the audience ran cold. Then the word went back that the thirty muscular young men were not wild men from Borneo, but canoeists from Lindenwald. The audience applauded. Mr. Kitchen of Chicago, appointed a committee of one, arose from his seat near the orchestra, turned to the audience and bowed profoundly with his hand upon his heart. Then the audience yelled with delight, and everybody was in the best sort of rapport for an evening of solid fun, in which the unfortunate stage people were the main sufferers. The villain was openly reviled, and the comedian and his wife were given some advice, in a frank, candid way, as to methods by which they could improve their make-up. With any song the thirty young men joined in and assisted the actors, and at any dance they cheerfully patted Juba in perfect time. Finally the leading danseuse, clad in scarlet all over and under, appeared to do her act, and a loud "Ah-h-h!" greeted her. A rapid word passed down the line—"Bouquet! bouquet!" Every muscular young man took from his broad bosom the brave red wild rose which had been ordered as part of the evening's uniform, and in a moment Commodore Gardner had a double handful of roses. A gentleman volunteered the rather dirty string which had bound a rag upon his sore finger, and the roses were tied together with a double bowline hitch. A collection, taken up in a cap, and consisting of cigarettes, chewing tobacco, matches, coppers, quarters, etc., etc., was passed with the flowers to the head usher, and he presented the latter to the dancer in scarlet, who smiled, flushed and redoubled her efforts. She danced harder, one dare say, and to heartier applause, than ever in her life before. In the next act she wore the roses on her bosom, and every time she appeared the thirty young men greeted her with a cheerful "Ah-h-h!" When the soubrette came on they said "Ah-h-h!" also, and helped her when she danced by patting lovely time and whistling a cheerful chorus. At the close of the performance the manager tried to make a speech, but he didn't make much of a speech. As the curtain fell the soubrette made a line shot at the young men with a half loaf of property bread, which was caught fair by Mr. Kitchen, who yelled, "Judgment!" The audience filed out, and in the open air took a long breath.

Then the thirty muscular young men got into their long war canoe 'bus, and sang "Boom-de-ay" for a change as they started home. They passed a policeman, a foolish Hibernian, who didn't know the mayor had given the W. C. A. the city of Oshkosh to play with for a week.

"O'wan, g'wan," said the policeman, whose name was Casey.

"Boom de ay," remarked the thirty young men.

"Oi'll not haive that!" said Casey. "Oi'll run yez in, Oi will, Oi will!"

"Whoa!" cried everybody. "Get in, officer, and we'll take you around to the station house."

So Casey got in, or rather got on the back step of the 'bus. From this he fell off after a short ride. When the boys missed him they turned around and drove back after him, meeting him much blown with a fruitless run after the departing vehicle. He was again offered a ride to the station house, and the situation seemed different to him.

"Oi'll arrist the driver," said he.

"No, no!" cried everybody, "it wasn't his fault."

"Well, then, Oi'll arrist the horrses and wagin!" said Casey, who felt that the dignity of the law must be maintained. But he thought better of even that, and so the party went on back to camp. This morning, when he sees the mayor and the chief of police, Mr. Casey will probably regret the fact that he tried to run in the owners of the town. As the war wagon left the city there was a temporary change of air to one embodying the sinfulness and lack of wisdom of that

"Peculiar policeman called Casey,
For fear of losing his place, he
Would run in the boys
For a-makin' a noise—
This peculiar policeman called Casey."

Then the thirty muscular young men sang "Boys will be Boys," also "Little Old Man," "Tavern in Our Town," and about a thousand other native melodies, with some occasional reverirance to the piece of resistance, "Boom de ay." And as they turned in it was nearly time for another day.

From the above and foregoing it may be seen that the canoe meet of the West is now in progress, and that all is going about as it should.

Under Secretary Woodruff's supervision the first tents went up last Saturday, July 9. Sunday there was rain. Monday was clear. Heavy rain fell Tuesday afternoon. It was clear yesterday and today is a lovely day. The prospect for enjoyable weather is good.

The movement of this Association meet from Ballast Island to Oshkosh for this year was probably beneficial on the whole, as it awakens interest in circles to which Ballast has seemed a distant country. In the future, should the old location be taken up, it may not seem so remote as now. It is new men who are needed in the Association, and this should not be forgotten in any place. The old men are bound to continue in their loyalty.

As to the quality and characteristics of the 1892 location, we can probably not do better than to read from the year book, which has the following to say:

"Lake Winnebago is one of the prettiest sheets of water in the Northwest, and unequalled either East or West in its facilities for canoeing or yachting. It is thirty miles long by eight to eleven miles wide. The eastern shores are high and abound in picturesque sweeps of scenery. The western shore is lower, insuring steady breezes. It is on this shore, four miles south of Oshkosh, and twelve miles north of Fond du Lac, on Lindenwald Point, that the camp will be pitched.

"Lake Winnebago has an historical interest, which is of itself one of the most charming features of the beautiful inland sea. It may well be called the Champlain of the West. When New England was an unexplored wilderness, Lake Winnebago was a link in the chain of waterways which formed a route by which French missionaries and French explorers had penetrated to the heart of the continent. Fleet after fleet of light canoes had danced along its waves or swept swiftly over its mirrored surface, while Boston was but a half-formed hamlet and New York a fat, somnolent burger town, owing allegiance to the land of the blue tulip. For years afterward this was the only route from the great lakes to the Mississippi. Starting from Green Bay, the line of canoes or batteaux would push up the Fox River with its foaming rapids, coming out into Lake Winnebago and gliding down its sparkling waters until the mouth of the Wolf was reached, where now stands the bustling city of Oshkosh, and then up the Wolf again into the Fox to the 'portage,' half way across what is now Wisconsin, and down that broad river to the Mississippi.

"Any canoer can, if he will, travel the same route this year, and with more ease than was given to the old explorers, as the government has locked the rapids of the Fox and pretty cities are strung along it every few miles, like pearls on a chain, where he can find resting place. Above, the traveler would have to pick his way along the rice swamps and reeds, as did his ancient predecessors.

"It will be seen, therefore, that in choosing Lake Winnebago for a camping ground the W. C. A. builded wisely. The point on which the '92 camp will be located is an ideal spot for an outing. It is 900ft. long and from 85 to 100ft. wide, the greatest width being at the lake end. The ground is delightfully shaded by native trees with soft turf beneath, with the exception of an open glade at the end farthest from the mainland, which is clear of shrub and has the appearance of an old council ground, for which it is admirably adapted. On the south side of the point the shore is rocky and abrupt, furnishing plenty of deep water for the docks. On the north side is a beach of hard, white sand, 150ft. long and the same in breadth, which shoals gradually and furnishes unexampled facilities for bathing.

"Once in camp, it will be the fault of the canoer if he does not enjoy himself. There is good cruising in every direction. It is but twelve miles to Fond du Lac, and the way is dotted with hospitable homes. Oshkosh is but four miles away, while if the canoer is in search of society he has only to keep on past the mouth of the Wolf River for four miles more and he will come upon one of the most fashionable resorts of the section, where he is certain to be warmly welcomed. Across the lake, plainly visible, a short ten miles away, is the beautiful land of the Stockbridges, who fleeing first from New England and New York, finally came here to seek and find rest. It is a country full of sentiment. If possessed by a touch of historical sentiment, the canoer can cut loose from camp and drift idly down the Fox, as the old explorers did; past Neenah, Menasha, Appleton—an old college town—Kaukauna and De Pere, to Green Bay, then put his canoe on the cars and be back ready for the races or any other sport the next morning. No better or interesting cruising grounds could be found anywhere."

The camping grounds on Lindenwald Point would have been much better had the undergrowth been cleared away at some spots along the shore. These wet thickets harbor mosquitoes, which pests made trouble for a night or so, though ordinarily a fresh evening breeze rids the camp of them. The site itself is pleasant, indeed very desirable, affording a fine view of the lake, and giving a fine position for starting sailing races, as no sweep of land cuts off the wind, the point being a long peninsula.

On this peninsula the camp is pitched along a central street, which sweeps out into a circular plaza on the bulb of the peninsula next the shore. In the center of this pleasure commons there is nightly builded the huge council fire, about which plenty pow-wow is held.

The arrangement of the tents is as follows, beginning at the big mess tent and cook house, and going toward the council ground: First, a tent of Ruckawa C. C., of Dayton, O.; next, the tent of W. H. Yardley, of Minneapolis C. C., who represents the St. Paul *Globe;* next, four large tents of the Mahn-a-wauk C. C., of Milwaukee, which has the largest showing of any organization; next, another Ruckawa tent, headquarters of Mr. O. A. Woodruff, secretary-treasurer; next, the tent of Commodore G. H. Gardner, of Cleveland C. C. This completes the line down to the council ground. Beginning again at the mess tent, and going down upon the right hand side, there come first the two tents of the Racine C. C., just beyond where space has been reserved for two tents of Traverse City (Mich.) C. C.; next beyond this Mr. A. S. Comstock, of Evanston C. C., has pitched one of his neat little Protean tents, and close thereby is the domicile of FOREST AND STREAM; beyond again is the abode of Mr. Geo. P. Mathes, of Milwaukee, representing the Chicago *Times* in Wisconsin, and the Milwaukee *Sentinel* here, also using his spare time in representing himself, for he has two boats along and is an enthusiast in the sport. Beyond on the line is the marquee of Commodore Smith, of Davenport (Ia.) C. C.; next thereto, the two large tents of Oshkosh C. C., then the small "A" tent of Grandpa Gates, of Columbus (O.) C. C.; then the tent of Kenwood C. C., of Chicago, and the big and well appointed canvas house occupied by the lively representatives of the Chicago C. C. This again brings us to the lake. There are now in place nineteen tents. Most of these are very large. Canoeists seem gregarious in their habits, here at least, and there is little camping of the solitary, individual sort which most people attribute to the craft.

There appear upon the mess tent register the following names, all present at date:

Messrs. D. H. Crane, H. Ware, Geo. M. Munger, A. W. Kitchen, J. F. Turrill, N. B. Cook, A. S. Comstock, of Chicago; Messrs Emil Hansen, Hugo Hansen, F. W. Dickens, P. B. Huntington, Richard Merrill, George P. Mathes, A. R. McLenegan, W. A. Hansen, A. P. Chapman, Jr., E. H. Holmes, Chas. Melville, J. D. McWhorter, L. H. Robinson, H. L. Atkins, Chas. Rogers, Masters Bert and Lester Atkins, W. A. Armstrong and F. W. Rockwell, of Milwaukee; Messrs. C. B. Pratt, Robert Brand, W. G. Cook, R. P. Finney, C. D. Cleveland, J. J. Cowham, W. H. Titus, F. H. De Grush, E. G. Mierswa, of Oshkosh, Wis. Messrs O. A. Woodruff and N. H. Crawford, of Dayton, O.; Mr. Thos. Kennelly, of Fremont, O.; Mr. G. H. Gardner, of Cleveland, O.; Mr. Thos. S. Gates, of Columbus, O.; Messrs. A. T. Johnson, W. J. Reynolds, A. Arthur Guilbert, Geo. A. Pease, Thos. Bishop and Capt. H. Gray, of Racine; Mr. Marcus C. Smith, of Davenport, Ia.; Mr. W. H. Yardley, of St. Paul, Minn.; Mr. J. E. Edgewright, of St. Louis, Mo.

There are at this writing 36 canoes in camp. This probably does not cover the full number to be expected, nor is the above list of names indicative of the full assembly. Friday and Saturday will probably be the biggest days. The Milwaukee fleet is quite respectable at date, including the following canoes: Lilla, F. B. Huntington; Bon Ami, H. H. Hansen; Skyver, F. W. Dickens; Oualaska, W. A. Dawson; Avis, E. J. Hansen; Ruth, Richard Merrill; Dixie, E. H. Holmes; No Name, A. W. Friese; Stevens, A. R. McLennegen; Unknown, Go Safely, George P. Mathes. Chicago will send up Messrs. Lee and Waters and perhaps others at the close of the week and possibly these will bring a boat or two along. All in all the meet is not disappointing in any of its bearings.

THE RACING.

The regular events did not begin until Tuesday, but on Monday a scrub race was pulled off for the amusement of the gentlemen on board the Milwaukee yacht Idle Hour, one of the many boats which from time to time had run into the bays near by. On board this boat were Messrs Will and John Mariner, H. B. Sanderson, George Nash, A. W. Friese and Richard Merrill. The start for the scrub race was made from the yacht and the course lay to a boat anchored about a mile out in the lake, around this and return. The starters were O. A. Woodruff, canoe Wood; Nat Cook, canoe Lotus; F. B. Huntington, canoe Lilla; F. W. Dickens, canoe Skyver; Emil Hansen, canoe Avis; A. McLaegan, canoe Safety; Hugo Hansen, canoe Bon Ami; A. W. Friese, canoe Electra. At the line the positions were Nat Cook, Huntington, Woodruff, E. Hansen, Dickens, H. Hansen, McLinegan and Friese in order given. At the turn the positions were, in order, Woodruff, E. Hansen, Huntington, Nat Cook, Dickens, H. Hansen, McLinegan and Friese. The first leg of the course was a straight run before a puffy southwest wind and the return was a beat to windward. At this latter the crew of the Wood seemed at home and won without serious doubt of it, Nat Cook and Huntington finishing next neck and neck, Emil Hansen, in his peculiar fin keel Gardner boat, Avis, coming next, after missing in his last reach and going about. The others in order were Dickens, McLinegan, Friese and Hugo Hanson.

After this little eye-opener the canoe Electra, a birch-model boat, furnished amusement to several amateurs by dumping them into the lake.

On Tuesday morning the course was established for the regular events. The starting stake was placed at a point perhaps 200yds. from the point of the peninsula, a line from this to the Commodore's tent being made the starting basis. The course is triangular, the first buoy from the line laid at a distance supposed to be half mile, though probably it is greater. The three legs of the triangle are equal, or intended to be so, and the course is twice round the triangle—about three miles. The starting is done by three guns, the first a five-minute gun, the second a one-minute gun, and the third for "go." In this work the tidy cannon presented the Association by the late Judge Longworth was used. The time-keepers sat on the high shore at the end of the peninsula, whence the entire course was easily visible. From this position of advantage the scene was very animated and beautiful as the graceful little ships went nodding and bowing by, or wheeled in graceful curves about the farther buoys.

The first event of the meet for the Gardner cup, was started at 10.20, under a stiff southwest wind.

Race No. 8, sailing, first heat, for the Gardner challenge (sailing) cup, presented to the Association by Hon. Geo. W. Gardner, July 1886. Open to all classes, no limit to ballast or rig for classes A and B; class C to be governed by the usual restrictions.

The starters were as follows: O. A. Woodruff, canoe Wood, B class; F. B. Huntington, canoe Lilla, B class; F. W. Dickens, canoe Skyver, C class; Emil Hansen, canoe Avis, B class; Hugo Hansen, canoe Bon Ami, C class; Nat Cook, canoe Lotus, C class; E. H. Holmes, canoe Dixie, B class; A. S. Comstock, canoe Bluebeard, B class.

By a clever maneuver Nat Cook made the line on a lead of 25yds., the others in order being Emil Hansen, Comstock, Dickens, Holmes, Woodruff, Huntington, H. Hansen. The first leg was a dead run before the wind and nearly all winged out early. Cook kept his neat lead, crowded by Woodruff and Holmes, till Woodruff broke his steering gear and fell out of it. At the home buoy on the first round the order was Cook, Woodruff, Holmes, Huntington, Dickens, E. Hansen, Comstock, H. Hansen dropping out. On the second round Cook led the chase, the finish being: Nat H. Cook, first, time 37m.; E. H. Holmes, second, time 39m.; F. B. Huntington, third, time 39m. 15s.

Race No. 12, sailing (passenger race); free for all classes, 3 miles.—This was a pretty and exciting event. The wind was almost a gale, and many a man from Corinth wished his hiking board was 12ft. long. The passengers weighted the B Class boats pretty well down. McLinegan and Hansen went over, and the wonder was that others did not also. The crews and passengers were as follows: G. H. Gardner and O. H. Woodruff, Nat Cook and John Turrill, F. B. Huntington and C. Cleveland, F. W. Dickens and Tom Kennelly, E. H. Holmes and Tom Bishop, A. McLinegan and Emil Hansen, Robert Brand and W. Cook. The start was at 2:47, and in the following order: Cook, Gardner, Huntington, Dickens, Holmes, McLinegan and Brand. All went off wing and wing, and Gardner collared Cook

for first place, and though the latter turned cleverly on his heel at the first buoy, Gardner forged by soon after, both boats going a clipping gait. McLinegan and Hansen went over near the first buoy and were picked up by a launch. At the second buoy both Gardner and Cook stood well out for an offing, for the home stake, and turning together, Cook went to windward and took the lead again. Rounding the home stake, Gardner winged out, and doing well at this, again collared Cook after a hard struggle up, and thence led him in. Holmes and Huntington also got in, but passenger work in the stiff wind was too much for the others. The finish was as follows: Gardner, first, time 34m. 36s.; Cook, second, time 35m. 20s.; Holmes, third, time 39m. 55s.; Huntington, fourth, time 4-m. The prize in this race was a handsome silk blanket, which Com. Gardner will henceforward wrap about his manly form of evenings.

The gale of wind increased after this race was finished, and soon a terrible rain and squall storm was upon the camp Everything was drenched, and at the time it seemed that all the tents would be torn up and the whole camp demolished. The pegs held, however, and by sunset nature seemed to have repented. Fortunately all the boats were in, and no accident occurred in consequence of the squall.

Yesterday, Wednesday, July 13, was fair and pleasant, with not enough wind to scare a ripe dandelion. The morning was well advanced when the gun sounded for the first event of the day.

Race No 9, first heat for the W. C. A. sailing trophy, which is raced for under the following rules and conditions:

1. The cup shall be known as the W. C. A. sailing trophy.

2. It shall be sailed for annually at the meet, on the fourth day of regatta week, weather permitting, or on the first fair day thereafter.

3 The race is open to all Class A and B canoes: no limit set for ballast or rig.

4. Only active members of the W. C. A. in good standing can enter.

5. At least five canoes must start to make a race.

6 The course to be triangular, distance not less than six miles (see Rule XXV )

7. The cup can be held by the winner, who must give bonds for its safe return, for one year. when it is to be returned to the regatta committee in good order, to be raced for again.

8. The winner of the Gardner cup will not be allowed to enter for the trophy, nor will the winner of the trophy be allowed to sail for the Gardner cup at any one meet. Note.—Both conditions are recorded, as it is impossible to state beforehand which race will be called first.

9. These rules can be changed or amended, if it is thought advisable by the regatta committee, at any annual meet, by a vote of two-thirds (⅔) of the members present.

There were five starters out of the entry, all B class boats: O. A. Woodruff, canoe Wood, Ruckawa C. C., Davton, O.; F. B. Huntington, canoe Lilla, Mahn-a-wauk C. C., Milwaukee; Emil Hansen, canoe Avis, Mahn-a-wauk C. C., Milwaukee; N. B. Cook, canoe Carrier Pigeon, Kenwood C. C., Chicago; E. H. Holmes, canoe Dixie, Mahn-a-wauk C. C., Milwaukee. At the gun these started for the line at 10:30, under a mere breath of a breeze from the north, getting off in the following order: Huntington, N. B. Cook, Woodruff, E. Hansen, Holmes. All hauled close and it was a pretty test of the boats for the first leg. Half way over Cook led, Holmes still further to windward, Woodruff away to leeward. Cook came about first at the buoy in 10½m., and taking the wind abeam, fairly flew for the second leg, leaving the others out of it. Mr. Cook is the designer of his boat, the famous Carrier Pigeon, for light work a hard one to beat. He has started four times in this event and every time has capsized, being unable to hold her down. To-day was his sort of a day, and the Pigeon showed only her heels to the rest. He even had in 160lbs. of ballast as it was. Holmes reached for the buoy but could not make it, he and Hansen going about together. Time at the first turn: Cook 10.30, Holmes 12.50, Hansen 13. Huntington 13.40. Woodruff 14.43.

At the second turn Cook was increasing his lead. Time: Cook 16.20, Holmes 19.15, Hansen 19 25, Huntington 20 20, Woodruff 21.10. The boats now winged out, came down running nearly free.

At the home buoy, end of the first round, Hansen was a little brush between Wood and Dixie. Woodruff blanketed Huntington, and they came down stem and stem in a slow struggle for the turn, Woodruff drawing by a half length. Time at the 1½ mile: Cook 24.42, Holmes 28.25. Hansen 29.13. Woodruff 31.35, Huntington 31.40.

On the leg for the 2-mile stake the wind hauled a little, and Cook could not point up so close. Woodruff now showed what he could do when he wanted to, and laid up closer than anybody, though he did not reach the stake. Dixie now had a bout with the odd fin-keel boat, but Hansen laid the latter about in advance of Dixie. Time 2 miles: Cook 36m. 55s., Hansen 40m , Holmes 40m. 05s., Woodruff 43m. 35s., Huntington 45m. 35s.

Cook seemed not in the least concerned about this race, and bettered himself when he liked. Time, 2½ miles: Cook 4 m. 22s , Hansen 44m. 40s., Holmes 44m. 50s., Woodruff 48m. 20s., Huntington 50m. 20s.

At the finish, Hansen bettered his lead for second over Holmes by several lengths, and this made all the contest that there was. Time record, 3 miles, W. B. Cook, first, 47m. 20s.; Emil Hansen, second, 50m. 05.; E. H. Holmes, 50m. 30s.; O. A. Woodruff, 55m. 06s.; F. B. Huntington, 57m.

After the above the wind freshened a little, and the next event was sailed before luncheon.

The start of the second heat for the Gardner cup was at 12:05. Emil Hansen got off first, Nat Cook second. Holmes and Woodruff fouled and had hard to clear. The others went off bunched. Nat Cook kept close to windward, Dickens following far out to leeward. Emil Hansen, in his flunan hadofe boat, nailed Nat for first place as they went about for the buoy, but fell out of it. Time at the one-half mile: Nat Cook 11.51, Huntington 12.15, Emil Hanser 12.37, Woodruff 13m. Dickens, Holmes, Oshkosh, Cook and Hugo Hansen turned the buoy in order.

At the mile buoy matters had freshened up a bit, and the time was: Nat Cook 17.15, Huntington 17.17, Emil Hansen 17.38, Woodruff 17.55. Holmes, Dickens, Oshkosh and Cook passed next in order. Hugo Hansen was still working patiently for the half-mile buoy. Comstock's Bluebeard had damaged her rudder, and he pulled out of it on the second leg.

At the one and one-half mile turn the time was: Nat Cook 22.10, Huntington 22.32, Emil Hansen 22.35, Woodruff 23; the others holding their former relative positions.

For the 2-miles buoy the fleet scattered badly. Cook and Woodruff both went about on a pretty brush for place at the turn. Woodruff not making it Cook and E. Hansen both drew by, Hansen having now shaken Huntington off. Hugo Hansen now left the course, and brought his diminutive dandy sail back to dock. Emil Hansen and Nat Cook now showed together in the lead, and there was great Milwaukee enthusiasm as Emil drew up and both boats went around together. Time, Nat. Cook and E. Hansen 35.02, Woodruff 35.40, Huntington 35.50.

Wind abeam on the next leg, Emil with the fin gained four lengths on Nat, and the turn was as follows: E. Hansen 39.50, Nat. Cook 39 57, Woodruff 40.32, Huntington 40.34.

On the run in for the home stake there was a lovely finish between E. Hansen, Nat. Cook, Woodruff and Huntington, the boats much of the time being only a couple of lengths apart. Hansen, however, jealously maintained his advantage and won the heat Record time, Emil Hansen, first, 45.34, Nat Cook, second, 45.35. Woodruff 45.55, Huntington 46.30; Holmes and Dickens followed later.

After luncheon two lively little paddling races took place, which furnished a great deal of amusement to the large crowd of spectators which had assembled.

Race No. 5—All canoes to upset at gun, and then to cross line, Entries: Emil and Hugo Hansen, O. A. Woodruff, Nat Cook, F. B. Huntington, F. W. Dickens. This race was won by Woodruff, Nat Cook second.

Race No. 6, Hurry Scurry—To dive from stand, swim 40yds., get aboard canoe and paddle 100yds. Same entry as in No. 5, except Huntington. Nat Cook was first aboard, Woodruff next. Woodruff had the shorter course, and there is grave suspicion he could have won even by greater margin than he did. Woodruff first, Nat Cook second. There will be suitable prizes determined later for first and second in both these events.

Racing will be continued throughout this week, and the camp will last through next week. All of which will duly appear in the following issue. E. Hough.

## Toronto C. C., July 9.

TORONTO—TORONTO BAY.

THE annual regatta of the Toronto C. C. was held on Saturday afternoon, July 9, at Hanlan's Point, the first race being called shortly after 3 o'clock. The weather was perfect, a clear bright day, with a fresh southwest breeze, just sufficient to keep it from being uncomfortably warm The regatta committee and officers of the day deserve great credit for the excellent arrangemen s made for the accommodation of visitors and the way in which the races were put through.

The usual experience of spectators of aquatic sports is a succession of long waits and short excitements, but the several thousand who lined the shore floated about in canoes or boats or were lucky enough to have tickets for the grand stand witnessed the list of ten events promptly disposed of in two and one half hours.

The course was boomed on both sides for 200yds. at the starting point, thus giving the contestants all a good show. The officers of the day were: Com. G. R. Baker, referee; George Wilkie, judge; A. Shaw, starter; Fred Woodland, clerk of course.

On account of the lack of entries for decked paddling, a stern chase was substituted, which was won by E. R. Rolph, with A. E. Bell second and R. B. Elgie third.

No. 2. The International Trophy Race was the event of the day; the entries being: M. F. Johnston and H. R Tilley, Toronto C. C.; R. G. Muntz and J. F. Smellie, Argonaut R. C and J. H. Carnegie, Toronto C. C. When the starter arrived at the starting flags he found the quintette waiting patiently for him, each one conscious that a struggle was waiting for him. The wind seemed to freshen a little and it looked as if Johnston and Tilley, who paddle in the standing up position, would have it a little harder on that account.

The draw for position gave Carnegie the inside course, next Johnston; Smellie, Muntz and Carnegie used canoes lightly decked with oiled silk and paddled in the one knee position. Smellie had a comfortable wad of cushions and sat with both feet forward in a lean looking canoe.

The start ing was easy, a few words of direction and a pistol shot set the five at work; gradually Carnegie and Muntz and Smellie forged ahead leaving Johnston and Tilley slightly behind, the former steering badly and the latter shipping water at every dip. At half way Muntz took the lead, but so little advantage had he that he could not afford to let up till almost home, when he allowed Carnegie to close up to about three lengths with the same space back to Smellie. On account of the wind Johnston was driven out of his course considerably, while Tilley filled and a friendly skiff picked him up.

It was expected that the mile would be made in 9m. but the watches showed 10¼; this may be accounted for from the fact that it was necessary to paddle twice on one side and all drifted off the course slightly. The course was staked out on the ice last winter and is guaranteed and therefore perhaps differs from records on "estimated miles."

The result proves beyond doubt that Muntz is one of the fastest paddlers in the world and is justly entitled to the honors he holds as champion paddler of the A. C. A. and first winner of the T. C. C international paddling trophy. Undoubtedly his position in a canoe is the fastest, and that the standing positions of Johnston and Tilley should be discarded, as it has been abundantly proved that it is not the thing for a fast race. As for Carnegie and Smellie, they are worthy opponents, who will make the work for the winner a deal harder next year. Mr. Muntz will hold the cup until the next regatta when he returns it to the Toronto C. C. He is also the recipient of a handsome gold medal presented by Mr. W. G. Ellis.

No. 3. Junior singles was won by E. R. Rolph, who defeated A. E. Bell by 2ft., the pair being three length ahead of H. Ford, R. Sweny, R. Y. Douglas and R. B. Elgie, finishing in order named.

No. 4. Senior Singles.—J. H. Carnegie won easily by two lengths over M. F. Johnston, who steered a very erratic course.

No. 5. Fours.—A very close race to turning buoy, when the crew, consisting of R. B. Elgie, R. Y. Douglas and A. M. Rice won by a length from T. D. Ellis, E. R. Rolph, H. Ford and A. E. Bell, with M. S. Johnson, H. R. Tilley, J. C. Iredale and Jas. Wallace a few lengths behind.

No. 6. Gunwale Race.—M. F. Johnston won. R. Sweny second, R. B. Elgie third. H. R. Tiley overbalanced himself and had to give up.

No. 7. Handicap Tandems.—Seven crews lined up for this and got well started, all reaching the turning buoy together. when Bell and Rolph forged ahead, winning by two lengths, with Sweny and Rice. Douglas and Ford, Tilley and Musson, Johnston and Wiley, Elgie and Hill, Griffin and Vanston finishing in the order named, making a very exciting race, they being bunched at the finish.

No. 8 Tandem Hurry Scurry.—The competitors had to swim 50yds. to canoe anchored and paddle across the line. The Elgie brothers, who are expert swimmers, were the first to reach their canoes. but lost time getting in. Johnston and Ellis were first home, Rice and Sweny second.

No. 9. Tandem Upset.—Johnston and Tilley won handily, the former's ability being simply astonishing. After starting another gun warned them to upset The water was shaken out of the canoes, and climbing in they paddled across the line. Sweny and Ellis second, the other crews retired.

No. 10. Tug of war—which was a complete surprise. The lightweights succeeded in holding more than their own until the others swamped. Wingers: Bell, Rolph, Wallace and Sweny, defeating Johnston, Milley, Douglas and Elgie.

## Red Dragon C. C. Regatta and Camp-fire.

THE Red Dragon C. C. held its annual regatta on June 25, and never in the history of the club has there been a more successful and eventful day. Everything was favorable: perfect weather, a nice breeze from S. W. springing up with the flood tide and continuing until the termination of the sailing race.

The course was around a triangle approximately 1½ miles, twice around for sailing canoes and once around for canvas canoes and St. Lawrence skiffs The boats were all started together, making a very pleasing sight. They were well bunched together and crossed the line in the following order: Kie Loe, Enid, Pollywog, Kid, Ratz, Bubble, Osceola, Sugar Loaf, Nassau, Picnic and Olga. Osceola capsized about 200yds. from the starting point. In rounding the first buoy on the jibe Ratz, Bubble and Nassau upset, With no other mishaps they finished in the following order, with time of winners:

SAILING CANOES.

| | Start. | Finish. |
|---|---|---|
| Kie Loe, F. W. Noyes, R. D. C. C | 3 35 30 | 4 18 00 |
| Pollywog, R. B Fleischman, R. D. C. C | 3 36 00 | 4 17 00 |
| Enid, E. S Fenimore, R. D. C. C | 3 35 30 | 4 22 00 |
| Kid, W. P. Rickey, Jr., P. I. C. A | 3 36 30 | 4 25 00 |
| Ratz, E Booze, P. I. C. A | 3 36 00 | Upset. |
| Bubble, F Zeigler, P. I. C. A | 3 36 00 | Upset. |
| Osceola, D. MacCormick, R. D. C. C | 3 37 00 | Upset. |

ST. LAWRENCE SKIFFS.

| | | |
|---|---|---|
| Picnic, W. F. Norgrave, R. D. C. C | 3 40 00 | 4 26 00 |
| Olga, H. Blumner, R. D. C. C | 3 40 00 | 4 30 60 |

CANVAS CANOES.

| | | |
|---|---|---|
| Sugar Loaf, W. Gray, R. D. C. C | 3 36 30 | 4 10 00 |
| Nassau, S. Wilson, R. D. C. C | 3 38 30 | Upset. |

In the single paddling race there were four starters: Ratz, E. D. Anderson, P. I. C. A.; Mochdronus, N. P. Rickey, Jr., P. I. C. A.; Kie Loe, M. D. Wilt Miquinonus C. C.; Enid, F. O. Gross, R. D. C. C. The start was made at 5:10¼, finishing in the order named above, the first 5:14, the second 5:14¼.

In the tandem paddling three canoes started: Mochdronus, E. D. Anderson and N. P. Rickey, Jr.; Enid, H. Fleischman, Q. C. B. C., and F. O. Gross, R. D. C. C.; Ratz, Robert Lucas and J. Rickey, P. I. C. A. They started with a bound, all taking the water at the same time. Enid had a little the advantage of the tide, having the outer course, and soon had the lead of about three-quarters of a length over Mochdronus, which she maintained until about 100ft. from the finish, when both crews spurted, Mochdronus gaining until almost at the finish, when she fouled Enid. The latter's crew ceased paddling, fearing a crash. However, Enid passed the line a few inches in advance of Mochdronus. Ratz was about three lengths behind the leaders.

There was only one entry in the upset paddling, F. W. Noyes with Enid paddled and upset over the course, giving a scientific exhibition of upsetting and righting a canoe while remaining in the cockpit.

As it was late in the evening and the wind had died out, it was decided to declare off the novice race.

The gentlemen then repaired to the club house, where lunch was spread and the inner man provided for. The corn cobs were lighted and songs indulged in. As the evening shades darkened the surroundings, Chinese lanterns suspended from the club house and trees, and the blazing camp fire on the beach, with occasional flashes of red lights, made scenes which will be long remembered by the 100 guests and members of the club.

Mr. Rothrey, in a humorous and apologetic speech, referring all his shortcomings to the effect of the influence over him of his friend Mr. W. H. Baker, presented the prizes to the winners.

First prize in sailing race, a silver smoking set, four pieces; second, a canoe lantern; third, a paper knife.

First prize canvas canoes, silver mug.

First prize St. Lawrence skiffs, silver mug.

First prize single paddling, silver cup; second, canoe ax.

First prize tandem paddling, each a silver goblet; second, each a can of spar varnish.

First prize in upset paddling, silver cup.

The members of the club extend their hearty thanks to the Park Island Canoeing Association for the large representation they sent and for the interest they manifested in making the regatta a success.

27. Roy. N S, Lord Alex. Russell Cup, Halifax.

IN view of the unprecedented terms of the "dimension" clause," and the exacting nature of its demands, it is but natural that it should have become the central point of the argument from the time of the first publication of the new deed of gift; but the fact must not be overlooked that the objections extend much further than to this clause alone, and its "waiving," or even its complete abrogation, would not remove them. The real points at issue are two; first, and most important, the rights of all yacht clubs as beneficiaries under the terms of the original trust, to challenge for the America Cup; second, the specific conditions which shall govern the races. The importance which the dimension clause has assumed is due not only to its unfair and impracticable demands, but chiefly to the fact that it is the principal one of several limitations specially designed to restrict the free right of challenge originally bestowed on "all organized yacht clubs." The practical operation of this clause is to place the challenger in the position of a petitioner to the New York Y. C. asking humbly that he may be allowed the privilege of competing for the Cup on such terms as may graciously be granted him.

In all other challenges, not alone in yachting but in all sports, the two parties meet on an equal footing to agree upon terms, the challenger being the peer of the defender. In the case of the America Cup, however, the challenger must build, or at least begin the construction of his yacht, a year prior to the race, complying carefully with certain limits; he must then furnish to his opponents full information as to the yacht, and after they at their leisure have fully digested it, he will be permitted to know whether his challenge has been accepted and what "generous concessions" have been bestowed upon him, though he is still left in utter ignorance of the craft that will be pitted against him.

While the dimension clause plays an important part in bringing about this sort of "mutual agreement," it is not the only factor, and its abrogation would by no means remove the objections to the new deed. A critical comparison of that document with the true deed of gift will show this important difference, that while the deed of 1857 treats the challengers as the equals of the holders, specifying a "mutual consent" as the first steps toward a race, and imposing arbitrary conditions only in the event of a failure to agree; the deed of 1887 places the holders—practically the New York Yacht Club, so long as races are sailed under this deed—in a position far above the challenger; and imposes on the latter from the first moment a series of conditions such as have never before been known in the history of yachting.

In order to form a fair judgment on the whole question it is necessary to bear in mind the difference we have pointed out between the two classes of conditions. Just now, as in the offer recently made to Lord Dunraven, the New York Y. C. is ready to make a race on perfectly fair terms so far as matters of measurement, time allowances, courses, number of races and similar details are concerned: without inquiring whether this is due to an innate spirit of fair play, or to the pressure of public opinion since 1887, the simple fact may be accepted as correct. In regard, however, to the absolute right of all clubs to challenge, the New York Y. C. stands by the letter and especially the spirit of the new deed, in denying the right of a challenging club to meet it as an equal in the discussion of terms which shall be mutually agreeable to both parties. In this the club is at east consistent, having taken the position in 1870, on the receipt of the first challenge for the cup, and stood by it in 1871, in 1876, and notably in the case of the Royal Clyde challenge in 1886.

If the America Cup is to be restored to its old position of the premier yachting trophy of the world, it must be through no mutilated or patched-up version of the new deed, but through the re-establishment of the rights of all organized yacht clubs to challenge freely as the equals of the holders. If this right is restored by the present holders, there will be no objection on the part of any foreign club to such provisions in addition as may be necessary to secure fair and open courses and the rights of centerboard vessels.

FROM the first discussion of the new deed in 1887, its apologists have displayed much more valor than discretion, and have entirely failed to appreciate the very delicate nature of the task assumed by them. Forgetting all about stones and glass houses, they have repeatedly made open charges of dishonesty and unfair dealing against the Royal Clyde Y. C. in connection with Thistle's length, as though all unfair dealing in international racing had been confined to one party alone. They have urged as a reason for the 90ft. limit that a British club *might* be guilty of such an unfair act as the changing of a measurement rule after it, as holder of the cup, had received a challenge; an insinuation which very naturally suggests the delicate

question whether the New York Y. C. ever *has* done such a thing. In the same heedless manner they have brought up another subject which will not stand a strict scrutiny, in the recent attempts to belittle the number and character of their opponents.

Their statements that all opposition to the new deed is confined to a few malcontents who in no way represent the New York Y. C. naturally suggests the question of how fully does the new deed represent the real sentiment of this large club. The new deed was the work of less than a dozen men; the whole matter of returning the cup to Mr. Schuyler and accepting it back was arranged by a small and select party; it was nominally submitted to the club at a special meeting, at which few members and still fewer voters were present; and the actual work of drafting the new deed was done a little later by a committee of six, aided by the club secretary. Only the minutes of the meeting of Oct. 4 will show the exact number present and voting, but it is not likely that over 15 members, out of a total of some 700, actually voted on the question of returning and re-accepting the cup.

So far as the club at large is concerned, all knowledge of the terms of the new deed was kept from the members until long after the document had been finally adopted; and the yacht owners of the New York Y. C., the voting members, have never yet had an opportunity to vote on the acceptance or rejection of the work done in their name by a paternal board of officers. As the new deed stands it represents the ideas of about a dozen men out of a club of 700 to 800, many, if not a majority, of the larger number condemning it openly.

## The America Cup.

A STRONG effort is being made by the supporters of the new deed of gift and by several newspapers, the Boston *Herald* and New York *Recorder* in particular, to ridicule and belittle the growing opposition, as the work of a few malcontents whose sympathies are entirely English. So far from this being the case, those most interested in the matter—and there are too many of them, both within and without the club, to be hindered by such misrepresentation—are one and all American yachtsmen who feel that the national reputation has been seriously compromised in the blundering effort to retain at any cost the possession of a piece of silver whose whole value disappears the instant that any suspicion of unfairness attaches to the conditions under which it is held. It has taken nearly five years for the general yachting public and press to see the question in a fair and unprejudiced light, looking at its technical points rather than at the political ones, but that the subject is pretty well understood is proved by the current talk among yachtsmen, and by such extracts as the following from various American papers.

The New York *Times* of July 10 handled the matter in a very able editorial, too long for us to reprint in full. Speaking of the new deed it said: "It seems a pity that this matter has to be discussed anew, for all unprejudiced persons are bound to see that the small and obstinate element in the New York Y. C. which insists on the preservation of the clause as it stands in the deed of Oct 28, 1887, is an obstacle in the way of international sport. This element is fond of proclaiming its belief that, because all the donors of the famous cup have passed over to the majority, the club must not venture to tamper with the wishes of the last of them, Mr. George L. Schuyler, which are embodied in the present deed.

* * * * * * * * * * *

"As for the deference which must, according to certain luminaries in the New York Y. C., be paid to the wishes of Mr. Schuyler, a few words may be said. It is implying that he, who was one of the most thoroughly sportsmanlike yachtsmen that ever trod a quarterdeck, was lacking in every instinct that goes toward the encouragement of sport to insinuate that he deliberately constructed the new deed of gift with the purpose of putting an end to international yachting. If he did not do it for that purpose, then the club has a right to treat that deed as Mr. Schuyler would treat it were he alive; and it is beyond doubt that were he alive he would rather modify the dimension clause than see the death of the America's Cup contests.

"But if the club thinks that Mr. Schuyler's deed must be respected because he is dead, it takes a still more untenable ground, for all the other donors of the Cup are quite as dead as the gentleman just named, and there were more of them than of him. It is not from any disposition to treat this matter with levity, but with a wish to show the utter absurdity of the position of our yachtsmen that the facts are thus treated. If respect for the dead is to be an element in governing the action of the New York Y. C., it should go back to the original deed and obey the wishes of the majority."

The *Tribune* comments as follows: "It is strange if the New York Y. C., with the challenge for the America's Cup knocking at its doors, does not recede from the obstinate position which it has assumed and maintained in the face of the yachting sentiment of the civilized world. It seems as if the club must finally pay attention to and act in accordance with such strong public sentiment, which never yet existed without finally fulfilling the end for which it was striving. Waiving for a moment every other consideration it must be admitted that the deed of gift by which the America's Cup, the symbol of the yachting sovereignty of the world, is held, should be, like Cæsar's wife, above suspicion. With the exception of a few men in the New York Y. C., who unfortunately, from their social standing, their reputation as yachtsmen and gentlemen, are able to draw after them a following which forms a wall of adamant, against which the great waves of popular sentiment have so far beaten in vain, and of two or three men in the Eastern Y. C., the whole yachting world and every man who has a sportsman's instinct and a love of fair play, whether he be a yacht man or not, is opposed to the present deed of gift. The challenge, which all Americans want, which would do so much for yachting, is already here, and it only remains for those few people, who have so far successfully opposed their wishes to the wishes of the great majority of people, to remove their opposition and we shall see again one of those great international yacht races which have done so much in the past, and, is is to be hoped, will do so much in the future, to improve the type of yachts, to increase the maritime spirit of the world, and to foster among nations a generous rivalry in matters pertaining to the sea and to the noble sport of yachting."

As showing how general the feeling in favor of strict fair play is among all classes, we quote the following extracts from various local papers which usually interest themselves very little in yachting:

"English yachtsmen, it is reported, have challenged the New York Y. C. to sail another race for the America's Cup provided the deed of gift is amended to meet with the approval of the Britishers. The deed should be amended and another international race should be run. We have beaten the English yachtsmen in every race since the America won the Cup, and with Yankee ingenuity to design the racers, the best workmen in the world to build and rig them and American sailors to run them, there is no reason why we cannot keep that Cup this side of the Atlantic."—*Chronicle, Pottsville, Pa., July 9.*

"It looks as though next year would witness another of those exciting yacht contests for the America's Cup which stirred patriotic America to her utmost depths in the seasons of 1885, '86 and '87. Since the latter date such races have been practically impossible because of the almost prohibitive terms of the present deed of gift under which the New York Y. C. holds the famous Queen's Cup captured of the English yachtsmen by the American yacht America at Cowes, on Aug. 22, 1851. The Cup was given by the owners of the America, J. C. Stevens, E. A. Stevens, Hamilton Wilkes, J. B. Finley and George Schuyler, to the New York Y. C., to remain forever a perpetual challenge to international competition. The original conditions required of would-be contestants were very simple. The New York club accepted the cup on those terms and became the custodian of it. In 1882 the club, desiring more stringent conditions with respect to foreign competition, returned the cup to Mr. Schuyler, the only survivor of the original givers, and he returned it with a new deed of trust imposing the desired conditions. Under those provisions the races of the three years mentioned were sailed. The Englishmen were defeated on each occasion, yet after the Volunteer-Thistle race of 1887 was sailed, the New York Y. C. secured a new deed of gift in the same manner as before. This time the conditions were made practically prohibitive. A large number of American yachtsmen objected to this as manifestly unfair, and it is maintained that Mr. Schuyler had no power to receive the Cup and return it with a new deed of trust. It is announced that a challenge has been sent by an Englishman for a race for the Cup on condition that the restrictions be modified. This, it is believed, will be done, and that next season there will be another series of races off Sandy Hook seems probable. In view of the work done by the American yachts in all former races for the cup, there seems to be no good reason why the New Yorkers should be backward about letting the Englishmen try again. They certainly ought not to resort to unfair and unsportsmanlike means to prevent the old world yachtsmen from winning back the cup they lost forty one years ago."—*Rome (N. Y.) Sentinel, July 7.*

"Since 1887, when America beat the English contestants for the America Cup, yachting as a sport of general public interest has declined steadily. Recent contests in New York's lower bay have been failures, and the annual race of the New York Y. C. attracted little attention.

"Another international regatta would no doubt revive interest in one of the cleanest and fairest of sports, but the English show no disposition to enter upon another contest. For this the New York Y. C. is responsible. * * *

"Many yachtsmen, including a strong minority in the New York Club itself, acknowledge the injustice of the conditions, but a majority of the yacht owners stand by it. Therefore, the Cup is held in this country, not by reason of superiority, but because the terms by which it is held are unfair. No contestant in any trial of skill or ingenuity should be forced to confess his strong and weak points to his adversary before the contest. Every American must blush to think that an organization representing, in a sense, the nation, should seek to retain by unfair means an advantage fairly and honestly won. It would be better to lose the Cup than to retain it on such terms."—*Albany Evening Journal, July 15.*

The Boston *Globe* of July 27 has a very conservative and impartial statement of the case, in which the matter of waiving the dimension clause is presented with more emphasis than it deserves in an interview with an anonymous defender of the new deed, but the article as a whole is very fair.

The *Field* comments as follows: "The annual announcements that a challenge has been received by the New York Y. C. for the America Cup have commenced rather early this season, and the one made this week on the subject is shrouded in more than its usual quaintness. The statement that the New York Y. C. will not consider the challenge until it has the opportunity to eliminate the objectionable dimensions clause from the 'New Deed of Gift' shows a superb sense of magnaminity, if true; but we are inclined to think that somebody is poking fun at the New York Y. C. At any rate, there is not the slightest foundation for the statement that the Earl of Dunraven is the challenger, and we very much question whether any British yacht club could be found which would venture to back a challenge under existing conditions."

## Vessels and Drawbridges.

THE following decision, for which we are indebted to the *American Shipbuilder*, will be of interest to all yachtsmen who are unfortunate enough to cruise in the vicinity of drawbridges, especially the yachtsmen of Newark Bay.

We have had little personal experience of the bridge in question within the past two years, but from a long experience prior to that time we can bear testimony to the difficulty of the passage, especially for a small yacht, owing to the strong tides, the cross currents and the breaking of the wind by the bridge itself, and also the total disregard by the bridge tenders of all rights of small craft. The suggestion below, of a signal by which a sailing vessel might know whether to stand off or to come for the draw, is a most valuable one. No signal is now given, and when the draw is swung open the vessel is expected to be ready to go through at once, although it is impossible for her to lie near at hand while waiting. We have a lively recollection of one occasion on which, after waiting half an hour for the draw to open, we were greeted with a round of profanity from the bridge hands because of the necessary delay in beating up.

BROWN, J.—On Nov. 15, 1891, at about 5:30 A. M., the scow Senate, towed with a cargo of about 160 tons of brick, while proceeding up Newark Bay in tow on a hawser from the tug Winnie bound for Newark, in going through the westerly passage of the draw of the Central Railroad bridge, came in contact with the chamfered end of the central abutment. The bow of the scow was square on deck, but sloping beneath. In the contact with the pier a plank from its side was thrust through the bow of the boat below the waterline about a foot inside of the sloping corner beam, which caused a leak, from which she sank soon after passing through the draw.

The libellants claim that this collision was not through any negligence of the tug, but through the negligence of the defendants in not opening the draw when signaled by the tug, and in compelling her to wait for a freight train, without giving her any answering signal to show their intention, thereby embarrassing her in the handling of her tow, that through the cross set of the tide, collision resulted without any fault on the part of the libellants. The evidence leaves no doubt that as respects the management of the tug, the signal given, and the trains passing, the account of the libellants is more accurate than that of the respondents. The defendants' evidence with regard to the passing of the trains will illustrate how little reliance can be placed on the general recollection of persons in regard to ordinary occurrences under their immediate observation when their memory is not charged with the matter at the time. Several witnesses from the bridge testified most positively that no train went past within a couple of hours before the tug and tow went through, and that there was no detention or delay, whereas it subsequently appeared by incontrovertible evidence that at least three trains had passed within an hour, and one of them at about the same time the tug captain stated. The undoubted facts, therefore, are that the tug, pursuing the usual course to go through the westerly passage of the draw, gave the usual signal of three whistles when about half a mile distant. No answering signal being received the tug, after running 400 or 500ft., gave a second signal, and after that saw a freight train coming from Singer's factory to the westward about two miles off. The tug then stopped and drifted till the train had passed, when a third signal of three whistles was given, and afterwards three more, after which the draw was seen to be turning off; whereupon the tug started up full speed in order to pass her tow properly into shape for going into the passage; but then in consequence of the waiting and drifting meantime and of the set of the tide, the starboard corner of the scow struck with a heavy blow the sloping corner of the pier, some two or three feet from the angle, with the result above stated.

It is not the practice in the management of that draw to give any answering signals to vessels desiring to go through. In the day time vessels in passing are required to wait until they see the draw beginning to open; in the night time a red light is exhibited when the draw is closed, and a green light when it is off; and vessels do not know whether the draw is opening or not until the green light is seen.

With a freight train two miles distant and a tug on a hawser coming up with the tide not over 1,500 or 2,000ft. away, the refusal to open the draw in order to give a preference to so distant a train, was an unreasonable and unjustifiable obstruction of the tug and tow. Its unreasonableness was increased by the omission to give any signal, which left the tug in uncertainty what to do or what to expect. The practice of the bridge to give no answering signals, is one little to be commended and is liable often to place the bridge in the wrong. The draw is worked by steam, and answering signals, such as are given upon other bridges, could be given without difficulty. True, signals are not made a statutory duty. But the real necessity of such signals is manifest, particularly where there is a cross set of the tide, because without them it is impossible for the approaching vessel to know with any certainty whether she can safely continue on towards the draw, or whether she must stop and manœuvre for delay. The embarrassment to a tug encumbered with a tow upon a hawser is still greater, and it is so evident, that I have no hesitation in holding that the omission either to open the draw when the tug is at a reasonable distance, or to give prompt notice by some practicable answering signal if the draw cannot then be opened, is negligence and misconduct; because it violates the rule that is obligatory upon all persons charged with duties concerning navigation, to use all reasonable and practicable means of avoiding collision and the attendant losses of life or property. Edgerton vs. the Mayor 27 Fed. 230. The defendants neglected this duty in the present case; that was the efficient cause of the accident, and I do not find any lack of reasonable skill and diligence on the part of the tug.

Decree for the libellants, with costs, with an order of reference to compute the damages, if not agreed upon.

Robinson, Bright, Biddle and Ward for the libellants; De Forrest and Weeks for the respondents.

## Seawanhaka Corinthian Y. C.

OYSTER BAY—LONG ISLAND SOUND.

THE following are the official times of the two races thus far sailed for the Rouse and Wetmore cups, at Oyster Bay. The next race will be on Aug. 13.

*June* 25.—One gun start; preparatory 12, start 12:05:

| | Start | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Pyxie | 12 05 00 | 5 31 00 | 5 26 00 | 5 26 00 |
| Nameless | 12 05 00 | Withdrew. | | |
| Indolent | 12 05 00 | Withdrew. | | |
| Mirth | 12 05 00 | Withdrew. | | |
| Meteor | 12 05 00 | 5 29 00 | 5 24 00 | 5 25 50 |

*July* 9.—One gun start; preparatory 1:50, start 1:55:

| | Center | Lloyd's | Bell | Buoy. | Center | Lloyd's | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Island. | Point. | Buoy. | Island. | Point. | Finish. | Elapsed | | |
| Nameless | 2 08 31 | 2 38 07 | 3 42 40 | 3 56 20 | 4 25 36 | 5 02 05 | 3 07 05 | | |
| El Chico | 2 08 10 | 2 40 35 | 3 44 44 | 3 57 56 | 4 28 27 | 5 08 00 | 3 13 00 | | |
| Trinket | 2 10 56 | 2 41 49 | 3 50 25 | 4 03 30 | 4 33 30 | 5 15 30 | 3 20 30 | | |
| Nadjy | 2 08 54 | 2 35 09 | 3 38 30 | 3 51 35 | 4 19 45 | 5 01 10 | 3 06 10 | | |
| Meteor | 2 09 30 | 2 38 17 | 3 43 30 | Withdrew. | | | | | |
| Dodo | 2 08 48 | 2 39 50 | 3 41 30 | 3 55 30 | 4 25 25 | 5 04 41 | 3 09 41 | | |
| Pyxie | 2 08 30 | 2 34 42 | 3 35 28 | 3 49 11 | 4 19 36 | 4 56 06 | 3 01 06 | | |

The course in this race was a triangle off the mouth of Oyster Bay Harbor, around the Bell Buoy, Lloyd's Neck Buoy and Center Island Buoy, two rounds, making 10 miles.

R. C. TOWNSEND, Sec'y.

## Sippican Y. C., July 9.

MARION, MASS.—BUZZARD'S BAY.

THE first race of the Sippican Y. C., an open sweepstakes for first, second, third and fourth classes, was sailed on Saturday in a fresh S.W. breeze. The courses were:

For first and second classes from the judge's yacht, anchored off Hotel Sippican, past Southeast Ledge Buoy No. 13 on starboard, Nye's Ledges Buoy, Seal Rock Buoy on port, and return; 15 miles.

For third class was off Sherman's Wharf, Southeast Ledge, Cow Bells Buoy, Seal Rock Buoy and return; 8 miles.

Fourth class to a stakeboat off Plantin's Island, Seal Rock Buoy and return; 7 miles.

The new Hiller boat, Flight, was the only entry in the first class, and the new Jenney boat, Venture, was the only second class boat, so they sailed together. Flight, with her large sail, had all the wind she wanted, and Venture, with her small sail did not; but Venture did very well, considering, against the larger boat.

In the third class was the best race of the day. There were two new boats, Sippican, built by Holmes, and Vivian, by Huckins, and the Cottage City crack, Natica, came to try her luck with the Buzzard's Bay boats. Hermione crossed the line first, followed by Sippican, Phenomenon, Vatica, Vivian, Elna and Tycoon, in the order named. Sippican had too light a gaff and too short a masthead to hold up her large sail, and could not do very well to windward. After all her triumphs in Boston Phenomenon was near the tail end. Natica was passed by even the fourth class boats on the first leg, and she continued on her way home without finishing.

In the fourth class the old Edith met the champion Cat. Squall was missed, for she could not be put in condition in time. Cat gained about three minutes on the first leg, and Edith could not gain more than a minute and a half on the run home.

Worry had no competitor in the fifth class, and did not go over the course.

FIRST AND SECOND CLASSES.

| | Length. | Elapsed. | Corrected |
|---|---|---|---|
| Flight, Louis Parks | | 2 34 19 | 2 23 11 |
| Venture, I. L. Jenney | | 2 45 23 | 2 31 08 |

THIRD CLASS.

| | | | |
|---|---|---|---|
| Tycoon, J. L. Stackpole, Mattapoisett | 23.01 | 1 36 10 | 1 24 52 |
| Hermione, R. L. Berston, Mattpoisett | 22.01 | 1 37 42 | 1 26 14 |
| Elna, I. Parkinson, Bourne | 22.10 | 1 38 38 | 1 27 06 |
| Sippican, W. H. Davis, Marion | 23.02 | 1 39 06 | 1 27 56 |
| Phenomenon, D. L. Whittemore, Boston | 23 08 | 1 40 32 | 1 28 49 |
| Vivian, H. Huckins | 23.02 | 1 40 59 | 1 29 46 |
| Natica, E. H. Raymond, Nantucket | | Withdrew. | |

FOURTH CLASS.

| | | | |
|---|---|---|---|
| Cat, Bruce Clark, Marion | 19.03 | 1 48 32 | 1 33 03 |
| Edith, Van Renssalaer, Marion | 19.04 | 1 49 38 | 1 34 14 |

The judges were Dr. J. S. Whiting, J. G. Palfrey and W. A. Andrews.

## Beverly Y. C., July 16.

MONUMENT BEACH—BUZZARD'S BAY.

The 186th race, Buzzard's Bay championship, was sailed on July 16 at Monument Beach. All the morning there was a three-reef breeze blowing S.W. by S., and courses were fixed accordingly.

Just as second class was starting wind fell light and in two minutes was blowing N.W. by W., giving the boats a free wind race. The courses for third and fourth classes were hastily changed and third class went off in a light air, but five minutes later when fourth class went off, it was again blowing a strong double-reef breeze and rapidly increasing.

The result of this was a very rough race, the two seas running across each other, the smaller classes having a long and tough beat of it.

Whisper started for a walkover in first class, but carried away her rudder off Wing's Neck. In second class Lestris led off, but was soon passed by Gymnote, who is sailing very fast this year. Mist followed but could not catch the leader. Mist carried a single reefing reef only and finally split the step of her mast and started the planking. She had to give it up and was lucky to get home.

Doris and Daisy only started in third class. Sippican was on hand but carried away goose neck just before the start.

In fourth class Fin put in an appearance and attracted much attention. She is just from Herreshoff's yard, rather higher than the Boston fins and with rather more overhang in proportion. She measures 28ft. and some inches on deck, 16ft. 10½in. l.w.l. and 5ft. 9½in. beam. Kitten was ready, wishing to try the Marion boats with her new sail. Squall, Cat and Edith were on hand, but Cat had a bad attack of stage fright when Fin appeared and refused to start.

Fin got a very bad start. She was changing from second to first reef and shifting jibs when gun was fired, and when she got off with a five minute handicap, she had no jib set and mainsail was only half hoisted. This, however, did not trouble her. She took the seas easily, carried sail well and won handily.

Squall was oversparred and gave it up. Edith hung on till Kitten had beaten her very badly and then withdrew. Summary:

FIRST CLASS,

| | |
|---|---|
| Whisper, Theo. Weld | Broke down. |

SECOND CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Gymnote, W. E. C. Eustis | 27.04 | 1 38 25 | 1 28 41 |
| Lestris, J. Crane, Jr | 26.04 | 1 40 46 | 1 30 00 |
| Mist, Geo. H. Wyman | 27.04 | Broke down. | |

THIRD CLASS.

| | | | |
|---|---|---|---|
| Doris, T. Parkman | 23.02 | 1 35 10 | 1 24 49 |
| Daisy, Howard Stockton | 20.00 | 1 40 29 | 1 27 35 |

FOURTH CLASS.

| | | | |
|---|---|---|---|
| Fin, L. M. Stockton | 17.01 | 1 40 27 | 1 23 35 |
| Kitten, Toby Club | 20.00 | 1 45 55 | 1 32 14 |
| Edith, G. G. VanRansalaer | 19.04 | Withdrew. | |
| Squall, J. G. Palfrey | 20.00 | Withdrew. | |

Gymnote, Doris and Fin take first and legs for pennant, Kitten takes second.

## Hull Y. C., Third Club Race, July 16.

HULL—BOSTON HARBOR.

THE third club race of the Hull Y. C. was sailed on Saturday in a strong reefing breeze from N.W., making rough water over the course. The principal feature of the race was the 21ft. class, this divided, the keels making a "special" class, while the centerboards sailed in the regular fourth class. Alpha was not ready, her new board not being in place, so her crew sailed Idler. Mr. George Stewart sailed Catspaw, making a good race until her bobstay parted. The times were:

THIRD CLASS—25 FOOTERS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Gipsy, A. C. Drinkwater | 26.08 | 1 50 20 | 1 24 46 |
| Posy, R. G. Hunt | 30.07 | 1 54 15 | 1 30 11 |
| Ustane, S. N. Small | 27.03 | 1 57 29 | 1 30 48 |
| No Name, John Cavanagh | | 1 55 58 | Not meas. |
| White Fawn, A. G. Jones | 30.11 | Withdrew. | |

FOURTH CLASS—21FT. CENTERBOARDS.

| | | | |
|---|---|---|---|
| Exile, J. F. Small | 26.03 | 1 26 33 | 1 05 02 |
| Catspaw, C. A. Prince | 26.05 | Disabled. | |

SPECIAL CLASS—21FT. KEELS.

| | | | |
|---|---|---|---|
| Vanessa, A. Bigelow, Jr | 24.03 | 1 21 35 | 0 58 33 |
| R. D., James McIntyre | 25.04 | 1 27 12 | 1 05 01 |
| Tadpole, W. E. Waterhouse | 23.04 | 1 27 53 | 1 05 42 |
| Asp, E. S. Hunt | | Withdrew. | |

FIFTH CLASS—21FT. CATS.

| | | | |
|---|---|---|---|
| Idler, F. L. Dunne | 23.04 | 1 23 36 | 0 58 40 |
| Koorali, R. C. Robbins | 23.04 | 1 26 35 | 1 02 48 |
| Madge, W. H. Thayer | | 1 27 58 | Not meas. |
| Magpie, H. G. Otis | 22.04 | 1 28 39 | 1 04 00 |
| Smoke, H. L. Rice | | 1 33 00 | Not meas. |

SIXTH CLASS—18FT. CATS.

| | | | |
|---|---|---|---|
| Mab, John Shaw | 17.02 | 1 18 38 | 0 52 49 |
| Primrose, H. M. Faxon | 17.11 | 1 19 52 | 0 54 50 |
| Don, W. H. Shaw | 20.05 | Withdrew. | |

The prizes were: Third class, $15, $10 and $5; fourth class, $15, $10 and $5; special class, $15, $10 and $5; fifth class, $15, $10 and $5; sixth class, $10 and $5.

The judges were: W. A. Cary, Franklin Adams, James R. Chadwick, E. K. Friend and E. C. North.

## Cape Cod Y. C., July 16.

EAST DENNIS—CAPE COD BAY.

THE third regatta of the Cape Cod Y. C. was sailed on Saturday in a fresh breeze, the times being:

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| City of Chicago, F. Crosby | 25.05 | 3 04 44 | 2 39 07 |
| Nobscussett, L. Hall | 24.06 | 3 13 04 | 2 40 25 |
| Ariel, H. H. Sears | 21.07 | 3 17 04 | 2 40 52 |
| Percy Allen, V. Bacon | | Withdrew. | |

The judges were S. Sears, H. H. Hall and B. H. Porter.

### Hudson River Y. C., July 10.

NEW YORK—HUDSON RIVER.

The Hudson River Y. C. sailed a regatta on July 10 over its regular course, a triangle off the club house at Ninety-second street. The wind was light and moderate, S.W. The times were:

CLASS I—OPEN SLOOPS—26FT. AND OVER.

| | Start. | Finish. | Corrected. |
|---|---|---|---|
| Lizzie F. | 1 09 50 | 3 38 15 | 2 28 25 |
| J. A. Cameron | 1 12 04 | 3 35 40 | 2 33 24 |
| OPEN BOATS—24 TO 26FT. | | | |
| Clara S. | 1 12 04 | 3 58 37 | 2 46 01 |
| Moore | 1 12 04 | 4 01 22 | 2 49 18 |
| Wenona | 1 12 04 | Withdrew. | |
| OPEN CATS—21 TO 23FT. | | | |
| Roxie | 1 16 19 | 3 15 02 | 1 58 43 |

After the finish of the race a tug of war took place on shore, with various water sports.

### Massachusetts Y. C., July 15.

COMMERCIAL POINT—BOSTON HARBOR.

THE first race of the Massachusetts Y. C. off its new club house at Commercial Point was sailed on Friday in a very light S.W. wind, the times being:

SPECIAL CLASS.

| | Finish. | Elapsed. |
|---|---|---|
| Catspaw, Gordon Prince | 4 02 32 | 1 17 32 |
| Tadpole, C. A. Prince | 4 10 50 | 1 25 50 |
| Fannie, Percy Hodges | 4 17 06 | 1 32 06 |
| Thrush, Henry Bryant | Disabled. | |
| Exile, J. F. Shaw | Withdrew. | |
| SIXTH CLASS, CATBOATS 18FT. AND LESS THAN 21FT. | | |
| Magpie, H. G. Otis | 4 23 40 | 1 33 40 |
| SEVENTH CLASS, CATBOATS LESS THAN 18FT. | | |
| Wink, Francis Gray | 4 24 07 | 1 29 07 |
| Scamp, C. H. Nute | 4 24 44 | 1 29 44 |
| Primrose, H. M. Faxon | 4 30 00 | 1 35 00 |
| Marchioness, C. E. Hodges | Withdrawn. | |
| Mirage, L. M. Clark | Disabled. | |

The judges were W. O. Gay, A. J. Clark and F. L. Perrin.

### Savin Hill Y. C., July 16.

SAVIN HILL—BOSTON HARBOR.

THE race of the Savin Hill Y. C. for cash prizes in Classes 1, 2, 3 and special, was sailed in a fresh west wind on Saturday, the times being:

SPECIAL CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Caprice, R. W. Bird | 20.00 | 1 34 51 | 1 07 57 |
| Fannie, E. P. Sharp | 22 02 | Withdrew. | |
| FIRST CLASS. | | | |
| Annie Maud, F. O. Vegelahn | | 2 01 38 | |
| SECOND CLASS. | | | |
| Arab, W. F. Scott | 19.01 | 1 45 02 | 1 18 04 |
| THIRD CLASS. | | | |
| Marchioness, C. E. Hodges | 16.01 | 1 45 37 | 1 14 03 |
| Circe, P. N. Kenway | 17.01 | 1 59 45 | 1 29 32 |
| Agnes, J. F. Bache | | 1 54 47 | |
| Mirage, L. M. Clark | | Disabled. | |

### American Y. C., July 16.

NEWBURYPORT, MASS.

THE first regatta of the American Y. C. of Newburyport, Mass., was sailed on Saturday in a single reef breeze from N. W., the times being:

FIRST CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Spurt, D. B. Pierce | 19 11 | 1 25 11 | 0 58 12 |
| Gleam, P. J. Lowell | 19 08 | 1 39 35 | 1 12 21 |
| SECOND CLASS. | | | |
| Wizard, C. Cortwright | 14 06 | 1 06 00 | 0 41 04 |
| Pert F. Knight | 16 06 | 1 04 30 | 0 42 26 |
| Elf, E. M. Bailey | 16 09 | not taken. | |

Spurt is a new 21-footer, this being her first race.

### The Fisher Cup.

THE following acceptance of the challenge published last week has been sent by the Bay of Quinte Y. C.:

BELLEVILLE, Ontario, July 13.—T. B. Pritchard, Esq., Sec'y Rochester Y. C., Rochester.—Dear Sir: The Onward's challenge to yacht Norah to a race for the Fisher Cup, dated July 1, and postmarked Rochester, July 5, was received by me on the 7th. Mr. Bell, owner of Norah, being away from home, I was unable to answer you before the 8th, and as you stated that both Mr. White and yourself intended taking in the circuit, and would probably start on the 9th, I addressed Mr. Bell's acceptance of Onward's challenge to you at Cobourg. I have just learned that the Onward was not at Cobourg, hence this letter and telegram to-day. However, inclosed find conditions governing the competition for Fisher Cup, and Mr. Bell requests me to say that he accepts the challenge on behalf of Norah, and names the date July 30. Will be pleased to give you every possible information required, so that the race may be fairly and satisfactorily contested. Yours truly, GEORGE N. LEAVENS, Sec'y Bay of Quinte Y. C.

## YACHT NEWS NOTES.

THE steam yacht Linta, designed and built by Seabury & Co. for Mr. Walter Luttgen, Commodore of the Rahway Y. C., was launched at midnight on July 13, the shipyard being illuminated by electric light. The yacht is 85ft. over all, 72ft. l.w.l., 14ft. beam, 5ft. draft. The main saloons and staterooms are located aft the machinery, and consist of two large double staterooms, fitted with dressing cases, toilet rooms, etc. The owner's room, on the starboard side, has a bathroom attached These rooms are finished in cherry and mahogany, with panel ceiling. The saloon is aft of the staterooms. It has four large berths, which are used as seats during the daytime and for sleeping purposes at night. At the forward end of the saloon, on the port side, an Æolian organ is placed, and on the starboard side a large bookcase is fitted. This saloon is finished in very delicate cream color enamel paint, with gold trimmings, and highly ornamented with papier maché panel work on sides and ceiling. Forward of the machinery are the crew's quarters and forecastle, also galley and ice boxes, chain lockers, stores, etc. The pilot house is of polished mahogany, large and roomy, with smoking room adjoining. The machinery consists of a Seabury compound engine and a Seabury safety water tube boiler, very compact and powerful. The yacht is also supplied with complete electric light plant for lighting throughout. The furnishings are of silks and damasks, with Axminster carpets, rugs, etc. The yacht is intended as a family cruiser, her speed being 12 miles.

The second annual race of the Cherry Diamond Y. C. will be sailed on Saturday, July 23, on Long Island Sound off Larchmont. Prizes will be offered in each class where two yachts start with the full intention of completing the course, and in each class where four or more yachts start a second prize will be given. The race will be open to yachts of any club. All cabin yachts will be classified according to their racing length, and all open yachts according to the actual loadwater line length. Among the prizes are the Manhattan Athletic Club gold cup, value $500, for the 46ft. class only, and the Tyson cup, value $50, offered by Geo. G. Tyson, of the M. A. C., for the cabin cat class. The champion pennant, offered by Com. J. C. Summers for the 20ft. open class, and won by Phyllis, will also be raced for. The steamer Bay Queen has been chartered for the members and guests, and the steam yacht Vamoose will act as judges' boat. The Bay Queen will leave the foot of East Thirty-first street at 8:15, dock at New Rochelle at 10:30, making the same landings after the race. Cappa's 7th Regiment band will furnish the music and a caterer will serve luncheon on board.

The Roberts Safety Water Tube Boiler Co. are rapidly approaching their five hundredth boiler, having sold 150 this season. They are now building boilers of about 40sq. ft. of grate for the Titusville Electric Light Co., and also for Ross & Sanford's tug Margaret J. Sanford, as well as a large boiler for a Pacific coast steamer owned at Portland, Ore. They have also furnished a boiler of about the same size for the steam yacht Fra Diavolo, and a boiler with about 24sq. ft. of grate for a new fast steam yacht on Lake Champlain owned by Kellogg & Averill. Rev. Mr. Aspinwall's new steam launch Secret has one of these boilers and is reported to develop about 20 miles an hour, and the duplicate boiler is in a new launch owned by ex-Mayor Howell, of Brooklyn, and he expects to develop similar speed. The new Roberts boiler in the Bo-Peep will probably be tried this week, and the one in the Dock Department launch is giving the best of satisfaction. The owners of Theresa and Evelyn are reported to be well pleased with the boilers in their yachts.

On July 15 at 11 A. M. the flagship Electra, New York Y. C., with Com. Gerry on board, grounded on the middle Tuckemuck Shoal, near Nantucket, for which place she was bound. Intrepid, schr., Mr. Lloyd Phœnix, was near and offered assistance, and the steamer Nantucket parted a hawser in the attempt to haul the yacht off. In answer to a telegram from Nantucket, the Boston Towboat Co. sent their tug Elsie from Vineyard Haven, and at 2 P. M. the yacht was floated, apparently uninjured. She steamed to Vineyard Haven and later to New Bedford. The grounding is ascribed to incorrect information on one of the private charts, a change in the bell buoy, made some time since, not having been noted, although shown on the Coast Survey charts.

Mineola, cutter, was at Wintringham's last week to repair the damage caused by the explosion of July 10. The cause of the explosion is not known, but it was presumably due to the vapor of naphtha which had collected in the bilge. Although one burner of the naphtha stove was lighted, it was not extinguished nor was any damage done forward. The whole force of the explosion was about the companion ladder, well aft, there being one very loud report, accompanied by a flash, but followed by no fire. The damage was mainly to the deck, which was lifted several inches, the glass and chinaware, and the skylights, which were blown off, the coamings being loosened.

On July 5 a new yacht club was organized at Jamestown, R. I., opposite Newport; with the following officers: Com., H. R. Hostetter, of Pittsburg; Vice-Com., Nelson Emmons, of St. Louis; Sec. and Treas., W. Murray; Judges, A. S. Murray, A. W. Luther; Measurer, R. Wadsworth; Regatta Committee, Dr. Reichert, A. Emmons, Dr. Birney, T. Newhall, P. Labens. The pennant is dark blue with white J. The club now has thirty members owning twenty fine boats, and proposes to give a regatta at least once in every two weeks. Four courses were laid out and the catboats divided into three classes, the first over 21ft., the third under 18.

The programme for the Atlantic Y. C. cruise, arranged at a meeting on July 13, is to rendezvous at Cold Spring Harbor on July 22, running to Black Rock on Saturday, the 23d, to Morris Cove on Monday, New London on Tuesday, where a meeting of captains will determine the future course. The following new members were elected at the meeting: Theo. R. Hostetter, cutter Mignon; Roland A. H. Harper; R. Suydam Palmer, schr. Marguerite; Robert A. Osborn, cutter Ciara; Walter A. Peck, H. L. Goodwin, cutter Laxen; Theodore Van Tyne Johnson, D. D. Tompkins and Edwin B. Condon, schooner Republic.

Commodore G. W. Gardner, Cleveland, Ohio, has just received from the St. Lawrence River Skiff, Canoe and Steam Launch Co., of Clayton, N. Y., his new single rater, specially designed for the above company by Mr. Wm. Gardner. The boat is 18ft. l.w.l., 23ft. over all and beam 5ft., and draws (including fin) 4ft. The fin is composed of a steel plate ½in. thick, weigaing 500lbs., with a cigar shaped lead bottom weighing 700lbs. She is very fast, as well as being non capsizable and self-bailing. Com. Gardner will race her in the Inter-Lake Yacht Association races.

A very strange story is told of the schooner Crest, of Boston, which capsized off Newburg on July 16, her crew of two, with Mr. and Mrs. H. E. Sturtevant and Miss Ella Gilson, guests, saving themselves in the yawl. According to the captain, John Masury, the yacht lost her metal keel a day or two before, and nothing was done to replace it, so she rolled over the first time a squall struck her. She had lately come from Salem, Mass.

On July 16 the sloop Galena, Thos. Giblin and John De Vito, of Boston, was in collision with a coal barge off Fort Independence, Boston Harbor. The yacht lost her bowsprit and leaked so badly that she sunk at Commercial Wharf, where she was towed by the police boat.

On July 12 the steam yacht Coot, owned by Dr. J. H. Derby, of Lloyd's Neck, was burned at Nyack, where she had gone for repairs The origin of the fire is unknown, as there was no fire in the furnace. The loss is $5,000, insured.

Prince Karl, cutter, has been hauled out at Wintringham's and her ballast increased by the addition of two semi-cigars of iron, bolted to the lower side of her iron keel, forming a bulb. The weight is about 1,400lbs.

The fourth annual regatta of the Indian Harbor Y. C. will be sailed on July 30 off Greenwich, Conn. Entries may be made up to 11 A. M., July 28, to Mr. F. S. Doremus, 20 Nassau street, New York.

On July 14 Sakonnet, steam yacht, fouled a submerged can buoy off Vineyard Haven, losing all but one of her propellor blades and damaging her bows. She made New Bedford under sail.

The races of the Lake Yacht Racing Association are now taking place on Lake Ontario. Owing to other matter we are compelled to postpone our report until next week.

The third championship regatta of the Mosquito Fleet Y. C. was sailed on July 16 with but one starter, Tantrum, this race giving her the trophy, a silver ice pitcher.

On July 12 an afternoon squall on New York Bay capsized the working schooner Palestine, her captain and crew of one being taken off by the steamboat New York.

On July 16 a race for $150 per side was sailed over a 16 mile course on the Shrewsbury between Undine, C. R. James, and Enigma, F. Oakes, the former winning.

On July 16 Pyxie, Mr. Oswald Sanderson's 25-footer, started from Larchmont for Boston. Among other races she will sail a match with Vanessa on Aug. 2.

The Larchmont Y. C. has enjoyed a very pleasant and successful cruise during the past week, the fleet reaching Newport on July 14.

On July 16 the Jersey City Y. C. held a ladies' day, the fleet sailing down the bay in the afternoon, a supper and dance following.

The revised times of the Larchmont Y. C. regatta of July 4 show that Marguerite, and not Aura, won in the cabin cat class.

The special regatta of the American Y. C., which was postponed July 6 for lack of wind, will be resailed on Sept. 1.

Mr. George L. Kingsland, a member of the New York Y. C. since 1855, died on July 16 at the age of 65.

Windward, yawl, has been sold by Mr. Whitehouse to R. H. Peebles, of New York.

Arab, sloop, has been sold by Edmund Fish to F. M. Freeman, of Bellhaven, Conn.

Windward, sloop, has been sold by G. C. Shattuck to G. A. Adams of New Bedford.

Mr. N. D. Lawton has replaced the 40ft. Chispa by a 25ft. Cape cat.

Starling, steam yacht, has been sold by E. A. Seccomb to David Dows.

Ione, sloop, has had a lead cigar added to her keel.

### Yacht Pictures.

FOR list of yacht pictures send your address to Forest and Stream Publishing Company, 318 Broadway, New York.

## Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

PROVIDENCE, R. I.—The *Field*, *Land and Water* and the *Illustrated Sporting and Dramatic News*, all of London.

A. P., Manchester, Va.—Please name some good book on chub and pike-fishing; also one on bass-fishing. Ans. The chub is not classed among game fish by American writers. We have seen chub taken with crickets and helgramites by black bass fishermen. Worms and small minnows have also been used successfully. All of the general angling works of the FOREST AND STREAM catalogue contain chapters on pike. For the black bass there is nothing else equal to Dr. Henshall's two books, "The Black Bass" and "More about the Black Bass."

## Trap Shooting.

All ties divided unless otherwise reported.

### FIXTURES.

**If you want your shoot to be announced here send in notice like the following:**

July 21-22.—Independent Gun Club tournament, Plainfield, N. J.

July 23.—New Jersey State Trap-Shooters' League Seventh annual tournament, Claremont, N. J.

July 26.—Boston Shooting Association's tournament, under management of Capt. A. W. Gore, Wellington, Mass.

July 26-27.—Fourth annual shooting tournament and family picnic of the Tri-State Gun Clubs, at Coney Island, Cincinnati, under the management of Henry Goodman, A. C. Dick and Wm. E. Limberg.

July 26-27.—Second tournament of the Michigan Trap-Shooters' League, Grand Rapids, Mich. R. C. Wharton, Sec'y.

July 26 28.—Interstate Manufacturers' and Dealers' Association tournament, at Watertown, N. Y.

July 28-29.—Corry Gun Club tournament, Corry, Pa.

July 28-30.—Johnson City Gun Club tournament, Johnson City, Tenn.

July 28-30.—Springfield Gun Club tournament, Springfield, O.

July 29.—Dexter Park Shooting League team contest, Dexter Park, L. I.

July —.—New Jersey Trap-Shooters' League, team contest, at Claremont, N. J.

Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eller, Sec'y.

Aug. 9-12.—West Point Gun Club tournament, West Point, Miss.

Aug. 10-11.—Big Four Gun Club tournament, at Burlington, Ia.

Aug. 10 12.—Missouri State Amateur Association tournament, at Lexington, Mo. Added purses. Address G. A. Sturges, Sec'y.

Aug. 14.—Lincoln Gun Club tournament, Alameda Point, Cal.

Aug. 19.—California State Shooting Association tournament, Concord, Cal.

Aug. 16-19.—Standard-Keystone Target and Trap Co., fifth annual tournament, at New London, Conn.

Aug. 17-18.—Gaillard Gun Club tournament, Natchez, Miss.

Aug. 18-20.—Highland Gun Club tournament, Des Moines, Ia.

Aug. 23-26.—International tournament, Des-chre-shos-ka Island, Detroit, Mich. Live birds and targets.

Aug. 29.—California State Shooting Association's tournament, Concord, Cal.

Aug. 30 to Sept. 1.—Hackettstown Gun Club tournament, at Hackettstown, N. J; two days at targets, third day at live pigeons. Address James L. Smith, Hackettstown, N. J.

September.—Saratoga Gun Club, annual tournament, at Saratoga, N. Y.

September.—Rocky Mountain Sportsmen's Association annual tournament, at Denver, Col.

September.—Harry Thurman's tournament, on Pier, Atlantic City, N. J.

September (second week). — Interstate Manufacturers' and Dealers' Association tournament, at Auburn, N. Y.

Oct. 5-7.—First annual tournament of the Riverside Gun Club, at Red Bank, N. J. First two days targets, last day live birds John P. Cooper, Sec'y.

Oct. 12-13.—Wilmington Rod and Gun Club tournament, Wilmington, Del.

Oct. 18-20.—Highland Gun Club annual fall tournament, at Des Moines, Iowa.

Oct. 19-20.—Somerville Gun Club tournament, Somerville, N. J.

### DRIVERS AND TWISTERS.

We have been informed, and the information is presumed to be reliable, that a match is to take place between Jacob Pentz, secretary of the Newark Gun Club, and George Raynor of the same club, the conditions to be 50 live pigeons per man for $100 a side. The challenge was a chaffing one from Mr. Raynor and it aroused the old-time enthusiasm in "Uncle Jake" who determined to enter the ranks once more and see just how much of his old-time skill he retained. The date has not been definitely decided upon, but the match will probably take place at John Erb's "Old Stone House" grounds in Newark. It is a good many years since "Uncle Jake" has faced the traps in a contest, but still we are inclined to think that we will "go a box" on his chance of winning.

* * *

The shoot of the New Jersey State Trap Shooters' League to be held at Claremont on Saturday is expected to be a record-breaker in point of attendance, as the grounds are easy of access and well adapted to accommodate a large body of shooters. Sweepstakes will be shot from 8:30 A. M. and at 2 P. M. the State championship team contest will begin. The fact that targets will cost only two cents each in both the team and sweepstake events will materially increase the attendance. All New Jersey Central trains from New York will stop at the grounds. Those coming from Newark should get off at Lafayette, which is only five minutes' walk from the grounds.

* * *

The Boston *Herald* of July 7.—"Certain inquisitive sportsmen have been prying into the recesses of the coverts, just to find out how the young partridge are getting on. The report is full of promise. Broods are large and healthy, and unless some such mysterious allment as that of last year attacks the young birds between now and the autumn the sportsman is not likely to be as disgusted with his luck as he generally was last fall. Two bad years running are the exception, and probably the average per gun for '92 will be considerably better than it was in '91. The poacher, however, is certain to come out on top, as he always does."

* * *

The open tournament of the Independent Gun Club to be held at Plainfield, N. J. to day and to-morrow will draw a big crowd. Targets will be charged for at the uniform rate of three cents each. Blue rock targets will be used. One-half a cent for each target thrown will be divided into five average moneys each day. This should insure a neat purse. The program comprises events at 10, 15 and 20 targets each, and each alternate event will be at unknown angles from known traps. "Dutchy" Smith will be prime hustler during the shoot.

* * *

The Round Bay Gunning Club, of Baltimore, Md., will hold a picnic at Acton's Park on Monday, July 25, and the proceeds of the excursion will be applied to the purchase of three solid gold medals to be presented to the men who saved the lives of the eleven persons at the foot of Hanover street, July 3 The presentation speeches will be made by Ed. Thomas, president of the club.

* * *

An interesting shoot given by the Carondelet Gun Club was that of the medal shoot July 10. Mr. Labruyere won the gold medal killing sixteen birds straight. In the confusion shoot, which was an interesting affair, the score resulted as follows: Branecke 5, Hart 8, Schrempp 7, Yockey 3, Loy 6, Roy 5 and Labruyere 7.

* * *

President Baker of the Baker Gun Company, while shooting for practice on the grounds of the gun club at Batavia, N. Y., on July 9, received some copper shreds from an exploding cartridge in his right eye, producing a painful injury. Dr. LeSeur was called and removed the particles from the eye.

* * *

The members of the Watertown (N. Y.) Gun Club anticipate a big time during the Interstate shoot to be held on July, 26, 27, and 28. The Manufacturers' and Dealers' Association guarantees $200 on the first day, $350 on the second and $200 on the third. The usual average moneys will be awarded in the classes.

* * *

While cutting hay on his farm, near White House, N. J., on July 11, S. K. Large uncovered three nests of quail. He says these birds were never so plentiful in his section as now. But when the gunning season opens he expects to have the usual hard time to find the game.

* * *

The Savannah (Ga.) *Press*, of July 8, says: "Gun clubs seem to have the 'mning' on all other clubs now. Every day or so the pop, pop of their guns can be heard on Hutchinson's Island. Yesterday it was the Forest City and Independent clubs. The former won on a score of 103 to 96."

* * *

E. D. Fulford writes as follows from Bryan, O.: "I am pushing my line toward Chicago, with a force of 80 to 100 men, through a splendid country. I never saw so many quail. Every day I see from 8 to

15 coveys in a drive of from 10 to 20 miles. The young are big enough to fly strong. Expect great sport in the fall."

* * *

With twenty men from Knoxville, ten from Bristol, three from Washington, half a dozen from Lynchburg, added to the local contingent, Johnson City should show one of the biggest tournaments of the year. The added money, merchandise and special prizes for averages are the combination that catch the boys.

* * *

The following scores were made at the shoot of the Passaic City Gun Club at Passaic, N. J., on July 9.—Thirty birds each: Wise 27, Keyitt 20, Hall 26, Lenone 21, Reid 18, Bowes 17, Gaston 23, Smock 17, Stone 27, Coman 22, Jelleme 23, Hemion 18, Totten 14, Campbell 23, Abbott 21.

* * *

The Curry Gun Club tournament at Corry, Pa., next week, will attract the full strength of the Pennsylvania trap shooting fraternity. Corry is delightfully situated for a shoot and every person in the town will assist in entertaining the visitors.

* * *

The eleventh meet of the Madison County Sportsmen Association will take place at Cazenovia, N. Y. Two days' shoot at king birds on the gun club's new grounds, the first week in August. For programme address Will H. Cruttenden, Cazenovia, N. Y.

* * *

From Busyrus, O., we learn that the gun club members are going ahead with the preparations for their shooting tournament, which will be held on Wednesday and Thursday, July 27 and 28. It is proable a large crowd will be in attendance.

* * *

The White House (N. J.) Gun Club is officered as follows: President, J. H. Davis; Vice President, S. K. Large; Secretary, M. S. Anderson; Treasurer and General Manager, H. Bishop. The club will run a merchandise shoot in the fall.

* * *

E. D. Fulford shot at 100 targets on July 4 at Wauseon, O., and broke 98. He was to shoot at live birds, but as they could not be procured targets were substituted.

* * *

The Fond du Lac (Wis.) Gun Club has been organized with the following officers: President, M. S. Tredeven; secretary, A. R. Keating; treasurer, L. F. McLean; captain, M. M. Anderson.

* * *

The tournament of the Forester Gun Club advertised to take place on July 26 and 27, has been postponed until later in the season when it is hoped it will be cooler weather.

* * *

The ninth contest of the Connecticut Shooting League will be held on the grounds of the National Gun Club at Wallingford on July 26. The fun will start at 9 A. M.

* * *

Why is it that the Interstate Manufacturers' and Dealers' Association does not arrange for reduced fares during the monthly tournament?

* * *

At Kalamazoo, Mich., on July 7, Wm. Ormsby broke 44 out of 50 clay pigeons, his shooting time being 2 minutes, 17 seconds. He used four guns.

* * *

The members of the Foresters' Gun Club, of Flemington, N. J., have assurances of a large attendance at their tournament on July 26 and 27.

* * *

The Manhattan Gun Club will hold an invitation shoot at Dexter Park on Aug. 3. The principal feature will be a contest at 10 live pigeons.

* * *

Had it not been for the West Virginia and Plainfield, N. J., contingents, the White House tournament would have been very flat.

* * *

All the Rochester, Buffalo, Saratoga, Johnstown, Auburn and Syracuse shooters are expected at Watertown next week.

* * *

Class and Helgins will have another match at 100 live birds each. Class should win by a wide margin.

* * *

The West Side Trap-Shooting League will hold its monthly team shoot at Woodlawn Park to-day.

* * *

The Parkersburg (W. Va.) Gun Club will run an excursion from that place to Huntington on July 24.

* * *

Don't forget. Targets only 2 cents each at the New Jersey League shoot at Claremont on Saturday.

* * *

Teipel's Park, in Covington, Ky., is becoming quite a popular place for trap contests.

* * *

S. W. Rhea, mayor of Bristol, Tenn., will be with his club at the Johnson City meet.

* * *

The great auburn-haired youth from Knoxville, Chas. B. Ross, will be at Johnson City.

* * *

The Somerville (N. J.) Gun Club will hold a tournament on Oct. 19 and 20.

* * *

The Kansas City (Mo.) Gun Club tournament on Aug. 3 and 4 will be a big affair.

* * *

Rhode Island shooters complain of a scarcity of sport at the trap.

* * *

Wm. R. Hobart has severed his connection with Von Lengerke & Detmold.

* * *

## New Utrecht Rod and Gun Club.

THE regular weekly shoot of the New Utrecht Rod and Gun Club was held at Woodlawn Park, L. I., on Saturday, July 16. The competition was for the gold and silver medals. Mort Van Brunt won the gold one with a score of 18 out of 20, and D. Deacon again won the silver one with a score of 16. Several live-bird sweepstakes were shot off, also four matches between Dr. Wynn and R. R. Street. The scores:

Club gold and silver medals, 20 Keystones, 3 traps, unknown angles, 18yds. rise, American Association rules. Also three sweepstakes:

| | 1st. | 2d. | 3d. |
|---|---|---|---|
| Deacon | 11101101111011111101—16 | .. | .. |
| Bennett | 01110110011011011010—12 | 5 | 7 5 |

## Wheaton Outshoots Shelley.

A NUMBER of Jersey sportsmen went to Morristown, N. J., on July 12 to witness the 25-bird match between Jas. E. Wheaton, of the Newark Gun Club, and R. S. Shelley, of Morristown, which took place on Frank Class's shooting grounds. The match was for $25 a side, under Hurlingham rules. On the thirteenth round Wheaton had killed 10 to Shelley's 4, and at this stage the Morristown man threw up the sponge.

In a 4-bird sweep, $3 entry, which followed, the scores were:

| | | | |
|---|---|---|---|
| Castle | 2111—4 | Tenaud | 2010—2 |
| Hedden | 1211—4 | Riley | 10 0—2 |
| Wheaton | 1111—4 | Hathaway | 0020—1 |
| Timmins | 0111—3 | Riggott | 2111—4 |

The winding-up shoot of the day was at 25 targets per man, the results being as follows: Timmins 21, F. Quimby 20, A. Quimby 20, Hathaway 20, Carlisle 16, Tunison 19, Riley 18, Hill 16, Muchmore 16, Day 16, Tenaud 15, Leek 15, Shelley 14, Guailen 11, Piper 10, Mahan 9.

## Long Island Sportsman's Club.

ONLY four members of the Long Island Sportsman's Club were present at the regular monthly shoot at Dexter Park, L. I., on Monday, July 11. L. Gentzlinger won the medal for the first time with a score of 16 out of 20. C. Stuetzle took the lion's share in the following sweepstakes shoots. The scores:

Club shoot, 20 bluerocks, two traps, 18yds. rise, monthly shoot for gold medal.

| | |
|---|---|
| Fluegel | 01101011111011111001—14 |
| Gentzlinger | 11011111111111111010—18 |
| Thiel | 10101110101101110011—13 |
| Stuetzle | 01101111110101011101—15 |

Sweepstake shoots, 25c. entrance, two moneys in each:

| | 1st. | 2d. | 3d. | 4th. |
|---|---|---|---|---|
| Stuetzle | 101111—5 | 11101101101— 8 | 01111111111— 9 | 11111111111—10 |
| Fluegel | 111100—4 | 10111010101— 7 | 01101101111— 7 | 01111111111— 9 |
| Gentzlinger | 110000—2 | 11111010000— 6 | 10101011111— 8 | 10101011010— 6 |
| Thiel | 110111—5 | 10110111001— 6 | 01101110110— 6 | 10110101111— 7 |

## Wauregan Gun Club.

SEVERAL members of the Wauregan Gun Club paid a visit to the club's new grounds at Pelham Heights, Westchester, and shot off three sweepstakes contests on Saturday, July 9. W. H. Brickner and J. Loonie were the principal winners. The scores:

Ten live birds, 5 traps, 27yds. rise, 30yds. boundary, M. H. rules, $3 entrance, 2 moneys:

| | | | |
|---|---|---|---|
| E Bornhoeft | 2111211100—8 | J J Loonie | 0021220227 |
| W H Brickner | 0121210121—8 | S C Barnum | 1002200200—4 |

Five birds, $2 entrance; 2 monies:

| | | | |
|---|---|---|---|
| W H Brickner | 22112—5 | S C Darnum | 00220—2 |
| E Bornhoeft | 00222—3 | W Hutchinson | 00020—1 |
| J J Loonie | 1-100—3 | | |

Same:

| | | | |
|---|---|---|---|
| W H Brickner | 12000—2 | S C Barnum | 00110—2 |
| E Bornhoeft | 01002—2 | W Hutchinson | 02000—1 |
| J J Loonie | 12222—5 | | |

## Texas Traps.

LAREDO, Tex., July 8.—On the "glorious Fourth" the Laredo Gun Club held its shoot in Height Park. There was a large gathering of spectators, and many people from out of town were present.

The first shoot was 10 single bluerocks, which scored Dryer, of Laredo, 6, Colst, of San Diego, 7, Critzer, of San Antonio, 7, Field, of Laredo, 8, Statem, of Laredo, 6, Haynes, of Laredo, 8, Blaier, of San Diego, 9, Miret, of San Diego, 3, G. C. Woodman, of Laredo, 8, J. J. Haynes, of Laredo, 5, D. K. Murchison, of Laredo, 6, F. Ridder, of San Diego, 4; which resulted in Blaier, of San Diego, winning first prize.

The seventh and last regular shoot was live pigeons, which resulted as follows: Dryer 8, Colst 6, Critzer 7, Field 7, Murchison 5, Page 7, Stratham 6, McKnight 1, J. Haynes 2, Dryer winning first prize. The shooting was kept up during the day, closing at about 6 P. M., and the large number of spectators enjoyed the sport as well as those who participated.

## Waverly Gun Club.

THE postponed regular monthly shoot of the Waverly Gun Club was held on Friday, July 15 at Dexter Park. O. Hillmer won the club medal with a score of 6 out of 10. The scores:

Regular monthly shoot, 10 bluerocks, 2 traps, right and left angles, A. A. rules:

| | | | |
|---|---|---|---|
| Helmstead | 1111011110—8 | Schulz | 1111101101—8 |
| Hillmer | 1111011111—9 | Fils | 0101111011—7 |
| Grane | 0111101111—8 | Mehrman | 1110110111—8 |
| Finkheiser | 1101010111—8 | | |

A number of sweepstakes followed.

## West Shores of Syracuse.

SYRACUSE, July 17.—The West Shore Gun Club, composed of engineers and firemen, held their shoot Saturday. The following is the score at 20 bluerocks:

| | | | |
|---|---|---|---|
| Crosby | 11110111111111111111—19 | Jones | 11010110001101010101—11 |
| Duncan | 11101100111101111111—16 | Eddle | 01000100031101100001— 7 |
| Davis | 01110111011010001—12 | Long | 11100111010111011101—15 |
| Peters | 00300000010011010010— 6 | R Peters | 00000w— 0 |
| Whitwell | 00000011110011101100— 9 | Farrar | 11100111101110101001—14 |
| Ackerman | 00011100111101111011—13 | Herman | 11111111101111111011—18 |

## Cleveland Gun Club.

CLEVELAND, O., July 11.—The Cleveland Gun Club held their regular shoot this afternoon. Tamblyn won the first and Page second badge in Class A. Silsby won first and Watts second badge in Class B. The following were the scores made at 30 birds: Tamblyn 28, Curtis 14, Flick 25, Elworthy 22, Page 24, Watts 19, Silsby 23.

## Boston Shooting Association.

WELLINGTON, Mass., July 16.—Charley Bradbury did some fine shooting to-day at the grounds of the Boston Shooting Association, breaking 23 out of 25 targets in the strong wind which prevailed, and which is considered by experts to be as good as a clean score on a calm day. Stanton also did some good shooting, getting 22. The scores made in the merchandise match follow: Class A, Bradbury 23, Stanton 22, Stone 21, Cowee 20, Climax 19, Bond 18, Class B, Warren 21, Gore and Gale 20, Daniels 16.

## North Side Gun Club.

FOURTEEN members of the North Side Gun Club turned out on Tuesday, July 12, at the Queens County Driving Park, Maspeth, L. I., to compete in the regular monthly shoot of the club for the gold badge and best average scores for the annual prizes. The veteran A. Duryea and J. Tiernan tied with scores of seven straight; the latter withdrew from shooting off and Duryea took the trophy. In the sweepstake contests, miss and out, the Meyer family were the principal winners. C. H. Meyer shot in fine form. The scores:

Club shoot for gold badge:

| Class A. | | Class B. | |
|---|---|---|---|
| Cardt Meyer | 1121100—5 | M C Manning | 1121101—6 |
| E Barlow | 1022120—5 | J Grau | 1160000—2 |
| D Franz | 0111200—4 | J Tompkins | 0121001—4 |
| A Duryea | 1111121—7 | H Kuhnast | 2010010—5 |
| J Tiernan | 2122122—7 | J Kroeger | 0111111—6 |
| Chas Meyers | 1212201—6 | C Steffens | 0210111—5 |
| C M Meyers | 1111110—6 | J Meyer | 0100000—1 |

Sweepstakes, $1 entry, miss and out:

| First Shoot. | | | |
|---|---|---|---|
| Cordt Meyer | 12112112 | A Duryea | 0 |
| C M Meyer | 21121111 | J Kroeger | 0 |
| Chas Meyer | 12110 | M C Manning | 10 |
| E Barlow | 2110 | J Tiernan | 1110 |
| H Kuhnast | 22112110 | C Steffens | 110 |

| Second Shoot. | | | |
|---|---|---|---|
| Cordt Meyer | 1110 | H Kuhnast | 1111 |
| C M Meyer | 110 | J Tiernan | 20 |
| Chas Meyer | 1221 | C Steffens | 2111 |

Referee, Mr. S. Lyon.

## Independence Day in Texas.

BURTON, Texas, July 6.—The shooting contest that took place here on the Fourth was well attended. The following is some of the shooting done. First, amateur shooters:

Shoot No. 1, 12 bluerocks: Payel and Moses 8 each, Wade and Sauls 7, Craig 6, Whitener 4, Epperson 3.

No. 2, 12 bluerocks: Moses 11, Craig 10, Gilham 9, Thompkins 8, Schwartz 5.

No. 3, 9 bluerocks: Thompkins 8, Moses and Williams 6, Gilman and Wendorf 5, Craig 4, Schwartz and Sauls 3.

No. 4, 7 live birds: Sauls 7, Thompkins and Wendorf 5, Gilham, Craig and Williams 4, Schwartz 3.

No. 5, 6 bluerocks: Williams 9, Thompkins 8, Wade 6, Moses and Payel 5, Gilman, Sauls and Craig 4.

No. 6, 9 bluerocks: Craig and Thompkins 8, Williams and Payel 6, Gilham 5, Sauls 4, Wade 1.

No. 7, 9 bluerocks: Craig 7, Thompkins and Payel 6, Williams 5, Sauls and Gilham 3, Wade 2, Smith 1.

No. 8, 6 bluerocks: Thompkins, Williams and Payel 5, Sauls 4, Craig and Bieberstein 3, Smith 1.

Here is some of the shooting done by experts:

No. 9, 6 bluerocks: Brown, 6, Thompkins 5, Craig 4, Rogers 3.

No. 10, 6 bluerocks: Rogers and Thompkins 5, Craig 4, Brown 3.

No. 11, 6 bluerocks: Brown, Craig and Rogers 4.

No. 12, 6 live birds: Brown and Craig 2, Rogers 1.

No. 13, 6 bluerocks: Brown 4, Craig 3, Rogers 2.

No. 14, 6 bluerocks: Brown 4, Rogers 3, Craig 2.

## A Pittsburgh Cruelty Case.

A CASE of considerable interest was brought up before Judge Ewing. It was that of Mrs. E. H. McWhorter and J. O'H. Denny, members of the Sportsman's Association, who were charged with cruelty to animals. The charge was based upon a pigeon shoot, held at the association's grounds in the Nineteenth Ward some time ago.

Judge Ewing charged the jury that the Supreme Court had recently decided that it was not cruel to kill pigeons when the shooting was in the interest of skill; that if a wounded pigeon was killed it was a question for the jury as to whether it was cruel or humane to deprive it of suffering. The judge cited the case of lame horses that are killed and quoted from the Scripture that birds and fish are made for the pleasure of man. The jury returned a verdict of not guilty.—*Pittsburgh Commercial Gazette, July 14.*

## At Hollywood Trap.

LONG BRANCH, N. J., July 15.—The Independence Sweepstakes shoot, the fourth of the summer's series of shooting events at Hollywood, took place at the grounds of the Hollywood Gun Club this afternoon in the presence of a fair-sized crowd. The conditions were 10 birds, at rises ranging from 26 to 31yds. and $15 entrance fee. There were ten participants, including Capt. Money, Fred Hoey, J. Seaver Page, Edgar Gibbs Murphy, Dr. Wilson, Noel Money, W. B. Thompson, Walter Leonard, Gould Hoyt and Philip Daly Hazzard. Dr. Wilson won first money, 70 per cent. of the fees, killing his ten straight birds. Noel Money and Walter Leonard tied for second money, each killing eight.

## Newark Gun Club.

THE monthly shoot of the Newark Gun Club, at John Erb's, on July 14, was slimly attended, only half a dozen members taking part in the club shoot, at 10 targets per man. Despite the excessively hot weather the birds were as fine a lot as ever were trapped on the grounds, every one of them being a veritable "scorcher." The scores were as follows:

| | | | |
|---|---|---|---|
| Collins | 1222212212—10 | Raynor | 0120100111— 6 |
| Lindsley | 2122101122— 9 | Leddy | 1001222220— 7 |
| Castle | 0111111111— 9 | Hedden | 1121112111—10 |

At this point the supply of birds gave out and ended the sport.

## CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

**Three Copies, $10. Five Copies, $16.**

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

## ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

**Address all communications:**

**FOREST AND STREAM PUBLISHING CO.,**
**No. 318 Broadway, New York City**

## The White House Gun Club.

ON Tuesday morning, July 12, the members of the White House (N. J.) Gun Club felt sanguine of success in their venture of opening a two-days' trap tournament, for at the opening hour quite a respectable contingent of visitors were on hand and they were quite sure that the number would be augmented before the day was far advanced. At the opening hour there were on hand Messrs. Brantingham, Squiers, Soper, Apgar and Pierson of the Independent Gun Club of Plainfield; M. F. Lindsley of Hoboken; Wright, Myer and Burt of the Island City Gun Club of Wheeling, W. Va., and R. Dickey of Somerville. The day wore on, however, without any further accessions to the ranks of the contestants, not a single member of the local club firing a shot in any of the regular events.

The grounds of this club are situated almost a half mile from the White House Depot of the New Jersey Central Railroad, on the farm of S. B. Large, who has erected for them a neat 15x20 house. Situated right in the heart of the most thriving agricultural section of New Jersey, White House offers great attractions to visitors. The country is rolling, with a rich soil particularly adapted to the raising of fine fruit. Peach orchards are seen in every direction, and the county also boasts of a large number of stock farms, as well as extensive dairies. The place received its name many years ago from the old "White House Hotel," situated almost a mile from the depot.

The shooting during the tournament was at keystone targets thrown from keystone traps, all at known angles. On the opening day events Nos. 1, 2 and 5 were at 10 targets each, $1 entry; Nos. 3, 4, 7 and 10 at 15 targets each, $1 50 entry; Nos. 6 and 9 at 20 targets each, $2 entry, and No. 8 at 25 targets each, $2.50 entry. The scores follow:

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | Average |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Brantringham | 9 | 7 | 12 | 9 | 9 | 17 | 12 | 18 | .. | .. | 77.50 |
| Squiers | 5 | 9 | 9 | 9 | 9 | 10 | .. | .. | .. | .. | .... |
| Lindsley | 6 | 7 | 11 | 11 | 9 | 14 | 8 | 18 | 15 | 14 | 76.09 |
| Myers | 9 | 7 | 9 | 11 | 8 | 15 | 11 | 22 | 19 | 13 | 80 |
| Pierson | 5 | 7 | 8 | .. | .. | 7 | 15 | 17 | 9 | | 61.81 |
| Wright | 8 | 9 | 12 | 14 | 7 | 19 | 14 | 24 | 18 | 14 | 89.67 |
| Soper | 6 | 7 | 12 | 11 | 8 | 16 | .. | .. | .. | .. | .... |
| Burt | 8 | 9 | 13 | 10 | 10 | 13 | 11 | 24 | 17 | 10 | 83.22 |
| Apgar | .. | .. | .. | 11 | 10 | 19 | 12 | 23 | 18 | 14 | 80.16 |
| Dickey | .. | .. | .. | 5 | 4 | .. | .. | .. | .. | .. | .... |

*Extra No. 1, 10 singles, $1 entry: Apgar 10, Myer 9, Lindsley 8, Wright 7, Pierson 6, Bishop 6, Brantringham 5, Burt 4.

No. 2, same: Apgar 9, Myers 8, Wright 7, Lindsley 6, Burt 5.

No. 3, same: Lever 5, Bishop 6, Pierson 4, Soper 3, Dickey 3, Voorhees 2, Schenck 2.

No. 4, same: Bishop 7, Squiers 5, Pierson 5, Lever 5, Voorhees 4

*The Second Day.*

On Wednesday morning the members once more tried to anticipate a good attendance, and once more were their hopes dashed to the ground. The weather, as on the opening day, was intensely hot, with scarcely a breath of air until near 4 o'clock, when there was a strong blow lasting for an hour. It was after 1 o'clock before a shot was fired, the only visitors being J. L. Smith, of Hackettstown, and Mahlon Ruppell, of Milford. The regular programme was abandoned and a series of ten target events substituted, the results being appended:

## Team Shoot at Mobile.

MOBILE, Ala., July 5.—The team shoot which took place here yesterday was a pleasant affair throughout and all the visitors were pleased with the arrangements. The team contest was for teams of six men each, from any club, at 12 singles and 4 pairs of targets per man. First honors were divided by the Dixie Gun Club (of Pensacola, Fla.) and the Greensboro (N. C.) Gun Club. The scores:

| | | |

## The Unknown Gun Club.

THE fine weather of Thursday, July 14, drew a big crowd of the members of the Unknown Gun Club to Dexter Park, L. I. It was the regular monthly shoot for the championship trophy and three extra prizes. The ties for the first divided. C. Hubbell won the second prize and W. Munch the third; C. Hubbell also won the sweepstake, miss and out prize. The scores:

Seven live birds, H. and T. traps, 80yds. boundary:

| | | | |
|---|---|---|---|

## The Keystone Annual.

NEW LONDON, Conn., July 16.—We have found it necessary to change the dates for our annual tournament in order to accommodate a number of local shooters and as the week following the dates already claimed by us have been claimed for the Des Ohree-Shos-Ka shoot, with which we do not care to conflict, we have decided to hold our shoot on Aug. 30 and 31, and Sept. 1 and 2, which we shall be pleased to have you note.

Programmes will be ready for distribution on Aug. 1, and we will send you a supply so that you will be able to furnish shooters that may write to you for same.

In addition to our regular trophy contests and diamond ring individual championship the first race between the New Jersey and Connecticut State League Teams will be shot during the tournament and also the team race between the East and West. We are also getting up a very attractive programme of regular events. One event will be shot under our novelty rule, open to all, nobody barred; then an event under the Interstate Association handicap, alternating, first one and then the other through the entire programme. This is quite novel and is bound to draw. In shooting the novelty rule we use 16 traps instead of 10. Six traps are placed in the field 60yds. from the score and throw right and left quartering and straight incomers. Unknown traps, unknown angles and different distances. This will make intensely interesting shooting and we believe that the amateurs will, at least at this first shoot, make nearly as good scores as the experts. The surplus money will, however, be added to the Interstate Association handicapped events, so that in case the amateurs do not shoot as well in the novelty rule events they will not lose the opportunity of getting their averages in the amateur class. We have made a study of this novelty rule, and made a practical test of it, and have come to the conclusion that it is the coming rule and will give entire satisfaction. The management reserves the right to modify the rules governing the shoot to please the majority of shooters present, and every shooter that attends will get all the shooting he could wish for and to his own liking.

Hotel accommodations will be first class, reduced railroad fares will be obtainable, and everything will be done to provide for the comfort and pleasure of visiting sportsmen. We have the finest located grounds in America, right on the banks of the famous New London Harbor, and they are being laid out with tournament fixtures that will make them second to none in the world. The tents will be arranged the same as at the Interstate Association tournaments, and will present a living mass of canvas, while the entire score will be covered with a canvas screen which will protect the shooter from the sun. H. A. PENROSE,

(Standard Keystone Target and Trap Co.).

## Oneida County Sportsmen's Association.

At the monthly shoot of the Oneida County Sportsmen's Association at Utica, N. Y., on July 7, the members shot at bluerock targets thrown from expert traps by Paul North's electric pull, shooting at unknown angles, nevertheless the scores were as high as usual. Elliott made a straight in the shoot for the club prizes. The scores:

## The Hamilton Gun Club.

HAMILTON, Ont., July 11.—The Hamilton Gun Club held its monthly shoot on the East Hamilton grounds to-day. The extremely hot weather accounted for the meagre attendance. Wm. Stroud succeeded in winning the challenge medal from J. W. Bowman with the close score of 18 to 16. The match as usual was at 15 singles and 5 pairs. For the club medals Mr. J. Smyth won with the magnificent score of 24 in first class and Frank Kaiser won in second class. The new constitution and by-laws of the club are now in the hands of the members, who feel proud of the new edition.

Challenge medal, 15 singles and 5 pairs, unknown angles:

WILSON.

## Parkway Gun Club.

THERE was a good attendance at the Parkway Gun Club's regular monthly shoot at Dexter Park, L. I., on Wednesday, the 13th inst. The competition was for the prizes in Classes A, B and C, together with the president's medal. J. Ochs was the only member to kill 7 straight and took the medal with Class B prize; J. Bennett won in Class A and M. Meyer in Class C. The birds were good, a light breeze with a cloudy sky made shooting very pleasant. The scores:

Shoot for medal and class prizes, at 7 live birds, 5 traps, unknown angles:

Class A.

| | | | |
|---|---|---|---|
| T Short | 1212012—6 | A Andrews | 1101100—4 |

First sweep—Ties div. Second sweep—Bramwell, Botty and Link div. first; Helgans, Selover, Moeller and Bennett div. second. Referee, W. Mills.

## At Los Angeles.

THE East Los Angeles (Cal.) Gun Club held its first shoot July 4 and great interest attached to the meet. The birds were bluerocks, 13 to a man, at 18 dollars. The scores were: Gibbs 9, Houser 8, Lewis 5, Menasco 8, Plummer 4, Weidenman 5, Lee 9, Whittaker 5, Welfare 2, Gircles 5, Brigham 6, Dewald 5, Merry 7. As will be seen Gibbs and Lee made a tie, which being shot off, was won by Lee. Gibbs and Lee then chose sides and a team shoot was held, which was won by Gibbs' side by a single bird.

## The Fourth at Portland.

THE Consolidated Rod and Gun Club held its third annual shooting tournament at Woodstock, July 4. The attendance was very good, and the event was characterized by much excellent work. Hoxie won the first prize for general average.

The first match resulted in a tie between Messrs. Wheeler, Hoxie, Hughes, Bial and Riley.

Match No 2: First prize won by Thorn, 20; second prize won by Beal, 19; third prize won by Hoxie, 18; fourth prize, tie by Story and Kropke, 17; fifth prize, tie by Caraher and Parker, 19; seventh prize won by Knzel, 15; eighth prize, tie by Hoxie, Powell, Riley, Lawrence, 14; ninth prize, tie by Pittock and Wheeler, 14; tenth prize, Hughes and Erlinger.

Match No. 3: First prize, Thorn, 19; second prize, tie, Barroll and Beal, 9; third prize, tie, Hughes, Hagie, Millard, Laise, Hudson, 8; fourth prize, tie, Riley, Lawrence, Krufete, Krufete, Kunzel, 7; fifth prize, tie, Parker and Powell 6; sixth prize, tie, Jacobson, Rubb and Inman, 5.

Match No. 4 was the Selby medal contest. Each team was composed of three men. Riley, Beal and Krophie won with a score of 65.

Match No. 5, two handsome gold medals, one to go to the man making the highest score who had never won a medal. Hoxie and Beal were the leaders, each 14. Hoxie won in the shoot off, 20 to Beals's 19.

The Dudley diamond medal was the first prize in match No 6. Story won the medal, 25. Then entrance money was divided into four parts and was won by L. Lyng, 26, Kropke, Hughes and Hoxie 24, Beal, Powell and Millard 22, Wheeler 21.

Match No. 7: First prize, Long, 15; second, Hoxie and Wheeler, 14; third, Kinzel, Riley and Evans, 13; fourth, D. Hart and Parker, 12; fifth, Millard, Pittock, Beal and Lawlor, 11; sixth, Krokke, Bubb, Hughes and Creighton, 10; seventh, Story, Honeyman, Barrel and Caraher, 9; eighth, Bubb, Seed, Jones, Greenwald and Guist, 8; ninth, Bowles and Honeyman.

Match No. 8: First money by Long and Evans, 21; second, Hoxie and Bottler, 21; third, Kinzel, Riley and Beal 20; fourth, Palmer, Wheeler, Story and Kropke, 19; fifth, Millard, Honeyman and Caraher, 18.

Match No 9, consolation shoot, prize Winchester repeating shotgun. Bowles and Edgar, 9.

Hoxie won the first prize for the general average shoot. The prize was a black onyx watch charm.

## Coney Island Rod and Gun Club.

THE members of the Coney Island Rod and Gun Club turned out very strong on Wednesday, July 13 at Woodlawn Park, Gravesend, L. I. The day was favorable for shooting, a light breeze and slightly cloudy. The principal contest was for the Eppig diamond badge and six extra prizes. A good race took place between A. Eppig, the donor of the badge, and F. Pfaender; the latter won by killing 26 birds straight. J. E. Orr dropped out on the 23d round. The birds were a fair lot. The scores:

Shoot for Eppig badge and six extra prizes, at 10 live birds:

| | | |
|---|---|---|
| A Eppig (50yds) | 1112111111—10 | 2111122221222.0 |

# Rifle Range and Gallery.

## Walnut Hill.

BOSTON, July 16.—The Massachusetts Rifle Association held its regular weekly shoot at its range to-day with a good attendance of shooters, but the conditions were very unfavorable for high scores, there being a very strong 9 o'clock wind. Mr. Crowninshield won the bronze and silver pistol medals, Mr. Merville the bronze seal medal and Mr. Avoy the bronze and silver pistol medal, distance 200yds., Standard American targets, all re-entry matches:

All-Comers' Off-Hand Match.

| | | | |
|---|---|---|---|
| E H Comey | 77 | C W Holmes | 72 O Moore 67 |
| B E Hunter | 73 | L Ames | 70 B C Snow 63 |

All-Comers' Rest Match.

| | | | |
|---|---|---|---|
| J Francis | 107 | O Moore | 103 E H Comey 91 |
| S Wilder | 105 | J B Hobbs | 100 D N Winn 89 |
| H L Willard | 104 | B E Hunter | 97 |

Eagle Bridge Pistol Match 50yds.

| | | | |
|---|---|---|---|
| Crowninshield | 95 | L Bell | 89 L R Avay 83 |
| M T Day | 93 | D Martin | 88 J B Hobbs 82 |
| O Moore | 91 | | |

Pistol Medal Match—50yds.

| | | | |
|---|---|---|---|
| L Bell | 94 | O M ore | 90 D Martin 87 |
| M T Day | 92 | J B Hobbs | 89 E H Comey 84 |

Bronze eagle badge with pistol—Won on 10 scores of 80 or better by F. B. Crowninshield, 87, 92, 88, 92, 93, 91, 91, 89, 82, 94.

Silver eagle badge with pistol—Won on 10 scores of 88 or better by F. B. Crowninshield, 90, 88, 88, 90, 93, 91, 93, 95, 91, 95.

Bronze and silver pistol medal—Won on 10 scores of 81 or better by L. R. Avay 84, 81, 83, 85, 85, 82, 84, 85, 83 83.

## Rensselaerwyck.

ALBANY, N. Y., July 14.—The following scores were made today by the Third Brigade Rifle Association, shooting at 200yds. off-hand, standard American target:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Wm C Gomph | 6 | 9 | 3 | 6 | 9 | 9 | 7 | 6 | 9 | 4 | —68 |
| | 7 | 10 | 8 | 9 | 6 | 6 | 8 | 6 | 8 | 8 | —76 |
| | 9 | 10 | 10 | 7 | 9 | 9 | 9 | 9 | 10 | 8 | 90 |
| Major Chas H Gaus | 7 | 5 | 8 | 5 | 6 | 2 | 8 | 7 | 9 | 10 | —67 |
| | 8 | 6 | 5 | 9 | 6 | 7 | 5 | 10 | 10 | 8 | —74 |
| | 9 | 9 | 7 | 7 | 7 | 9 | 6 | 6 | 8 | 8 | —76 |
| Col Wm E Fitch | 8 | 5 | 9 | 5 | 8 | 7 | 6 | 7 | 5 | 7 | —67 |
| | 10 | 8 | 8 | 9 | 7 | 7 | 6 | 8 | 8 | 7 | —76 |

| Chas P Frey | 5 | 10 | 5 | 4 | 9 | 9 | 7 | 8 | 8 | 6 | —66 |
| | 8 | 5 | 5 | 8 | 8 | 7 | 7 | 6 | 9 | 5 | —63 |
| | 8 | 5 | 4 | 6 | 6 | 10 | 7 | 5 | 6 | 6 | —63 |

## The Miller Rifle Club Team.

BELOW will be found a general description of the shooting careers of the men who helped win the FOREST AND STREAM'S handsome trophy emblematic of the New Jersey rifle championship, for the Miller Rifle Club, with a most handsome record, although several clubs were dangerously near. That the Millers are entitled to the trophy is conceded by every club entered in the tournament, as they met many good clubs with very strong teams. The first man whose career we will present is

CHARLES JUDSON.

In 1848 Charles Judson, then a boy of 12 years, was a drummer boy with a company of regulars stationed in Texas. One day during a stroll he stopped at a brook for a drink of water. He was about to arise when several Indians, members of a band who were known to be in the neighborhood, leaped upon him and made him prisoner. For two years he was compelled to stay with them. They endeavored to induce him to remain with them. They gave him a small rifle and a few rounds of ammunition and they taught him how to shoot game. He made it appear that he liked the Indians' life, but was ever on the lookout for the least chance for escape. At last his opportunity came. Every evening he would be sent out to bring in the horses of the band of savages. He took a liking to a horse, which he knew possessed endurance and speed. The latter equine he mounted, and just as soon as he reached a safe distance from the wigwam he let the horse out. His ideas of the horse's speed were verified. Upon reaching the neighboring hills he looked around him and saw that a score of the braves were in pursuit. Upon seeing this he gave the horse his head with the result that they stumbled upon a camp of United States scouts. As he was attired in Indian garb they were about to fire upon him when he hurriedly cried, "The Indians are coming." As the latter reached the scouts' camping place they turned to retreat but were fired upon with the result that quite a number were killed and wounded. After remaining with the men a few days he joined them, enlisting as a scout. He remained with them until 1866, then being 30 years old. In all that time he had never heard from his father or mother. He returned to New York, when, upon the organization of the Zittler Rifle Club, he became one of its members. In all he has shot 125 matches with them, they never meeting defeat. In the Newark Bundesfest five years ago he and two others divided the first, second and third prizes, amounting to $500. He was a member of the Knickerbocker Rifle Club and captain of the Seppenfeldt Rifle Club, of New York. He is also one of the organizers of the Miller Club. At present he is giving his "Wild Western" show in Rockaway. Although he is now 56 years old, Dave Miller believes himself to be the equal of any marksmen in the United States for all around shooting, including the rifle, pistol, gun and revolver. Unfortunately Charley Judson could not be over to be photographed, therefore he is left out of the group.

DAVID MILLER.

At 14 years of age, back in '57, Dave Miller, after taking a little preliminary practice joined the Christian Musketeers in Long Island, and at their target shoot he took his first prize with an old flintlock musket of his, made in 1812. A few months later he organized the Attorney Light Guards and was considered one of their best shots. Years latre, in 1876, he, after taking quite an amount of gallery practice, helped to organize the Zettler Rifle Club. He has shot 125 team matches with them. He has the record for the highest score ever made in prize shooting, 74 out of a possible 75, at the Union Hill Schuetzen Park, in 1878, distance 200yds. In that year he made 75 out of a possible 75, at a festival of the Seppenfeldt Rifle Club, at a distance of 200ft. In Cook's Park, Brooklyn, he made 74 out of 75 at the same distance. He was a member of the Knickerbocker and Seppenfeldt rifle clubs. During the war he served in the quartermaster department before City Point and Petersburg, re-enlisted and went to Nashville, Tenn. In 1871 he joined the Ninth Regiment, serving until 1879. He became a member of the Jersey Schuetzen Corps in 1878 and the Independent Schuetzen Corps, of New York, with whom he made the trip abroad a year or two ago. While there he won the urn presented by the North German Lloyd Steamship Company at the tenth annual Bundesfest at Berlin to the best American marksmen in attendance. The urn is valued at 2,200 marks. His score was 58 out of a possible 60 at a distance of 1,050ft. He also won two candelabras given by the City of Berlin and valued at 1,500 marks. To mention all prizes won by Dave Miller on that trip would be taking up too much space. On Feb. 13, with six others, he organized the Miller Rifle Club, which was named after him.

L. VOGEL.

L. Vogel, who is better known to his intimates as "Birdie," commenced shooting in 1861, taking in numerous target companies affairs. He has been connected with the Helvetia, Helwig, Zettler and Miller Rifle Clubs. Birdie holds the record for the highest score ever made on the target of honor, made in the Union Hill Schuetzen Park, in 1878, 73 out of a possible 75. During a tournament on the Helwig's club gallery in 1877 he beat the twenty shot record for 100ft. by getting them 67/16in. from center. The previous record made by a Mr. Hamilton measured 7 5/16. Birdie has won numberless prizes, but it is difficult to get him to talk of what big shooting he has done. He has shot in numerous matches with the Zettler Club of New York.

GEORGE SCHLICHT.

George Schlicht is now about thirty-four years old. When a boy in Guttenberg, he while with target companies as loader of the rifles, would now and then during a lull fire a few shots. This practicing at last brought good results, as to day George Schlicht is one of the best 200yds. shooters in the vicinity. He has been a member of the Miller Club for the past few years, and his boast is that he has never missed a match that the Millers shot in the tournament. He is well thought of in the Germania Schuetzen Bund of which he is a member.

AUGUST MEYNS.

August Meyns did his first shooting in '76 with the Atlantic Rifle Club of Hoboken. In '79 he became a member of the Hoboken Schuetzen Corps. Three times he became their king, that is making the highest score on the target of honor at the Corps' annual festival. He was one of the organizers of the Miller Rifle Club.

LOUIS FLACH.

Louis Flach has been shooting for the past fifteen years. In 1879 he became a member of the Zettler Rifle Club, New York. He has shot in fifty matches with them and is always considered for a first-class score. His record is nearly equal to that of all the well-known cracks. He became a Miller man in 1890. He is one of the most popular marksmen to-day. He is about 32 or 33 years of age.

ERNEST FISCHER.

Ernest Fischer is a comparatively new shooter, he only being in the "biz" for the past five years. His first shooting was done as a member of the Miller Rifle Club. He is a most enthusiastic marksman, he fairly being in love with rifle shooting. He accompanied the Independent Schuetzen Corps of New York on their trip to Europe. Among other prizes he won a handsome and valuable cup at Bingen on Rhine. He holds the position of treasurer in the Miller Rifle Club. He is 33 years of age.

FREDERICK BRANDT.

Frederick Brandt has been shooting for the past seven years. In 1887 he became a member of the Miller Rifle Club. In justice to him it can be said that he is one of the Miller Rifle Club's best members, he never missing a shooting or meeting night. He has won numerous prizes and trophies, as he is a clever marksman. He is 35 years old.

FREDERICK LIELL.

Frederick Liell commenced shooting ten years ago, when a member of the Hudson Amateurs. His popularity and efficiency in the holding of his rifle gained him the position of captain three years latter, '85 to '90 inclusive. Two years ago he became a member of the Miller Rifle Club. He is about 32 years of age.

LOUIS SOHL.

Louis Sohl started in shooting with Fred Liell ten years ago, and proved an adept at once. He has won many prizes in club tournaments and those of other clubs. He became a member of the Miller Club two years ago. He is about 30 years old.

FRED K. BRANDT. CAPT. R. W. DEWEY. AUG. MEYERS.
LOUIS FLACH. GEO. SCHLICHT. FREDK. LIELL. L. VOGEL.
ERNEST FISHER. D. MILLER. LOUIS SOHL.

CAPTAIN RICHARD W. DEWEY.

Captain Richard W. Dewey was one of the organizers of the Miller Rifle Club, and at the first meeting was elected their captain. This position he has held ever since, as his ability as a hustler has never been questioned. The genial captain becomes really enthusiastic when talking Miller Rifle Club. In credit to him it must be said that he leaves no stone unturned to improve the club's affairs.

J. H. KRUSE.

## Cincinnati Rifle Association.

THE regular shoot of the Cincinnati Rifle Association took place on its range to-day (July 17) and the following scores were made. Conditions: 200yds., off-hand, at the standard target. The shooting was not quite up to the standard, as a strong and fitful 12 o'clock wind, varying from 10 to 2 o'clock, was blowing:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Gindele | 7 | 8 | 9 | 9 | 8 | 10 | 9 | 8 | 8 | 10 | 85 |
| | 9 | 6 | 10 | 6 | 9 | 9 | 10 | 10 | 8 | 7 | 84 |
| | 7 | 9 | 8 | 9 | 7 | 7 | 8 | 8 | 8 | 10 | 81 |
| Best | 7 | 9 | 10 | 7 | 7 | 8 | 10 | 8 | 5 | 8 | 79 |
| | 8 | 7 | 8 | 9 | 7 | 8 | 7 | 7 | 8 | 8 | 77 |
| | 10 | 9 | 8 | 7 | 6 | 10 | 7 | 6 | 6 | 6 | 75 |
| Weinheimer | 9 | 10 | 7 | 10 | 5 | 8 | 6 | 10 | 7 | 6 | 78 |
| | 10 | 6 | 5 | 7 | 7 | 7 | 9 | 10 | 7 | 9 | 77 |
| | 8 | 6 | 8 | 9 | 6 | 4 | 5 | 10 | 6 | 7 | 68 |
| Houck | 7 | 7 | 2 | 5 | 5 | 8 | 9 | 10 | 8 | 9 | 70 |
| | 7 | 10 | 9 | 4 | 10 | 8 | 10 | 5 | 5 | 0 | 68 |
| | 5 | 8 | 8 | 2 | 4 | 9 | 6 | 4 | 6 | 10 | 62 |
| Stegner | 3 | 4 | 10 | 4 | 9 | 7 | 6 | 10 | 6 | 4 | 63 |
| | 9 | 6 | 5 | 9 | 7 | 5 | 9 | 2 | 5 | 6 | 63 |
| | 7 | 6 | 6 | 4 | 5 | 9 | 6 | 6 | 8 | 6 | 63 |
| Topf | 6 | 8 | 4 | 4 | 5 | 8 | 7 | 6 | 5 | 6 | 59 |
| | 4 | 9 | 6 | 4 | 10 | 5 | 7 | 5 | 5 | 4 | 59 |
| | 6 | 3 | 5 | 10 | 3 | 7 | 4 | 5 | 9 | 3 | 55 |
| Payne | 10 | 9 | 7 | 5 | 10 | 7 | 8 | 6 | 8 | 10 | 80 |
| | 9 | 9 | 8 | 7 | 9 | 10 | 6 | 9 | 5 | 5 | 77 |
| | 6 | 6 | 7 | 7 | 6 | 7 | 6 | 9 | 10 | 9 | 76 |
| Speth | 7 | 10 | 8 | 10 | 8 | 7 | 7 | 9 | 5 | 10 | 81 |
| | 6 | 7 | 8 | 7 | 8 | 9 | 5 | 8 | 10 | 9 | 75 |
| | 7 | 10 | 5 | 6 | 6 | 6 | 9 | 8 | 9 | 7 | 73 |

## The Elcho Shield.

LONDON, July 16.—The shooting at the Bisley meeting, which began on Tuesday last, was continued to-day. The number of qualified competitors for the Queen's prize amounted to nearly 3,000, as against 2,050 last year, while that for the St. George's prize was about 2,000. In the contest for the Elcho Shield, which took place to-day, only four points separated the two leading teams when the shooting closed. The shield was captured by Scotland, the scores being as follows: Scotland, 1,096; England, 1,692; Ireland 1,665. In the shooting for the Kolapore Cup the team representing England secured the trophy, leading the Canadian team, the next highest competitor, by 22 points. The score was as follows: England 684, Canada 662, Guernsey 659, Jersey 658.

## New Jersey Rifle Shooting.

*[Specially Reported for Forest and Stream.]*

MILLER RIFLE CLUB, Hoboken, N. J., Captain Richard W. Dewey. Wednesday, July 13.—The scores of to-night are appended below. The conditions were: 10 shots, off-hand, 25-ring target, possible 250:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| D Miller | 25 | 25 | 25 | 25 | 24 | 24 | 24 | 23 | 22 | 22 | 239 |
| J H Kruse | 25 | 25 | 24 | 24 | 24 | 24 | 23 | 23 | 22 | 22 | 236 |
| F Kloepping | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 22 | 20 | 234 |
| A Meyns | 25 | 25 | 24 | 24 | 23 | 23 | 22 | 22 | 22 | 22 | 232 |
| W Forkel | 25 | 25 | 25 | 25 | 24 | 23 | 22 | 22 | 22 | 18 | 231 |
| H F Meyer | 25 | 25 | 24 | 24 | 24 | 23 | 22 | 22 | 21 | 20 | 230 |
| H Seltenreich | 25 | 25 | 24 | 23 | 23 | 23 | 23 | 23 | 20 | 18 | 227 |
| G A Demerest | 25 | 24 | 24 | 23 | 23 | 23 | 23 | 23 | 19 | 19 | 226 |
| R Roch | 25 | 24 | 23 | 23 | 22 | 22 | 22 | 22 | 21 | 20 | 224 |
| H Vanderheyden | 25 | 25 | 24 | 25 | 23 | 21 | 21 | 20 | 20 | 20 | 222 |
| F Kammel | 25 | 25 | 25 | 23 | 22 | 21 | 20 | 20 | 20 | 19 | 220 |
| G Dunsteadt | 24 | 24 | 23 | 23 | 23 | 21 | 20 | 20 | 17 | 16 | 212 |

The club has a fair attendance at its weekly shoots, considering the extremely warm weather, a time when it is a most difficult matter to get a man to do any rifle shooting.

Through a local paper, J. H. Kruse was challenged by Frederick W. Kroeger of the Hoboken Rifle Club, in fact a club member, to what the latter calls a "trick, fancy and difficult shooting match." The former has never dabbled in this sort of shooting, and was therefore surprised. He was, however, induced to accept by several friends, and the event takes place Aug. 7 in headquarters, Wisch's Hall, Third and Adams streets, Hoboken. Now Jay H. is busily engaging his spare time in learning all the looking glass and other shots possible. Fred. W. a year ago did quite some shooting in local amateur entertainments, letting the audience down easy with the *nom de plume* of Captain Fred. Leroy. It is not yet known who is training Mr. Kroeger, but he could not find a better one than Gus Thurk, a Miller man and proprietor of a shooting gallery on Washington street, Hoboken.

The Miller Rifle Club, of Hoboken, has received and accepted a challenge to a 5-men team match at 200yds. on Sunday, the 21st inst., with a team named after a Secaucus, N. J., hostelry, known as Tammany Hall. The proprietor of the latter place, Geo. B. Bergkamp, has lately fitted up a long range and he took this means of letting the shooting people of up this way know he is open for business. The Miller team will consist of Dave Miller, Louis Flach, Ernest Fischer, George Schlicht and either August Meyns, William Forkel or Frederick Brandt. They will take a stage, leaving the Hoboken ferry entrance, opposite the D. L. & W. depot, at 1 o'clock in the afternoon, the match starting at 3.

The Hoboken and Hansa Rifle clubs have agreed to put the five best men of each club in a team match, which takes place Friday evening, July 29, at the headquarters of both clubs, Third and Adams streets, Hoboken. The teams will be: Hoboken—J. H. Kruse, W. F. Dilger, Fred Kloepping, Capt. John Yeck and Charles Paasch. Hansa—Otto Schmidt, A. Selter, F. Hepke, L. Wangersheim and Max Klammer. This contest, it is guaranteed, will be for blood, as there is much friendly rivalry between the clubs. Come down and referee Henry E. B.

The annual shoot, picnic and summer-night's festival of the Hudson City Schuetzen Company No. 1, Capt. Peter Bluemel, took place at Berg's Park, Jersey City Heights, Monday the 11th inst. First Lieutenant Fuller was crowned King of the Festival, he making the highest score on the target of honor. Frederick Freitag made the second highest score. On the ring target the winners were: A. Schmidt, A. Malz, C. Buck, A. Mulheisen and G. Rotthmann. The winners in the bowling contests were: Henry Peters, Henry Keiser and Adolph Rapp. During the evening dancing was a feature. The floor was under the direction of Adolph Rossy. The company made quite a neat sum of money through the indefatigable efforts of the officers and men to make the affair a success.

Lady Miller Rifle Club, Hoboken, N. J., President, Mrs. Alson Stadler, Thursday evening, July 14. To-night's scores are appended below. Conditions, 10 shots, rest, 25 ring target; possible 250:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Miss K Born | 25 | 25 | 25 | 25 | 24 | 24 | 24 | 24 | 25 | 23 | 243 |
| Mrs J Vogel | 25 | 25 | 25 | 25 | 25 | 24 | 24 | 24 | 23 | 21 | 241 |
| Miss L Prien | 25 | 25 | 25 | 25 | 25 | 24 | 24 | 24 | 22 | 21 | 240 |
| Miss L Miller | 25 | 25 | 25 | 25 | 24 | 24 | 24 | 23 | 23 | 22 | 240 |
| Miss M Miller | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 22 | 239 |
| Mrs Stadler | 25 | 25 | 25 | 24 | 24 | 24 | 24 | 24 | 22 | 22 | 239 |
| Mrs A Cordts | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 21 | 238 |
| Mrs D Miller | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 22 | 22 | 236 |
| Mrs Meyer | 25 | 25 | 25 | 25 | 24 | 23 | 23 | 23 | 22 | 21 | 236 |

The interest in the shoot for the handsome silver card basket is still unabated. At present Mrs. Stadler, the president of the organization, leads by a narrow margin.

Hoboken Rifle Club, Capt. John Yeck, Monday, July 18.—To-night's scores follow, the conditions being 10 shots off-hand, 25-ring target, possible 250:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Capt Yeck | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 18 | 17 | 227 |
| J H Kruse | 25 | 24 | 23 | 23 | 22 | 22 | 22 | 22 | 18 | 18 | 219 |
| W F Dilger | 25 | 25 | 24 | 23 | 22 | 22 | 21 | 21 | 18 | 18 | 219 |
| F Kloepping | 25 | 25 | 24 | 24 | 23 | 21 | 20 | 20 | 18 | 17 | 217 |
| Chas Paasch | 25 | 25 | 24 | 23 | 23 | 21 | 20 | 19 | 18 | 18 | 216 |
| F W Kroeger | 25 | 23 | 23 | 22 | 22 | 21 | 21 | 20 | 20 | 19 | 216 |
| M Raedeger | 25 | 24 | 24 | 24 | 23 | 20 | 20 | 20 | 18 | 16 | 214 |
| A Dahl | 25 | 24 | 23 | 23 | 22 | 22 | 21 | 21 | 16 | 15 | 212 |
| J Schneider | 25 | 23 | 23 | 23 | 22 | 22 | 21 | 18 | 18 | 17 | 212 |

As a glance above will suffice, it will be noticed that poor scores were the rule this evening. This was due to the poor light, which will be attended to at once. The club will soon inaugurate a medal shoot among the members after the club has been divided into several classes.

The Palisade Rifle Club recently had an outing to Schaefer's Park, West Hoboken. The members enjoyed themselves hugely, as an unusually efficient committee had the arrangements in hand. George W. Graf captured first prize in the target of honor shoot.

August Meyn's shooting range, 423 Washington street, Hoboken, now has four rifle clubs who make it their headquarters, as follows: Wednesday, Miller; Thursday, Lady Miller; Friday, Friday Night and Saturday, the shooting club of the Sixth Battalion, Germania Schuetzen Bund. The ranges are models of neatness.

SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.

ABBEY & IMBRIE,

Manufacturers of All Grades of Fishing Tackle.

18 Vesey Street, New York.

WHERE THERE ARE SPORTSMEN,

TO SELL THE

Quickest Selling Sporting Book

IN THE COUNTRY.

The Sportsman's Directory & Year Book

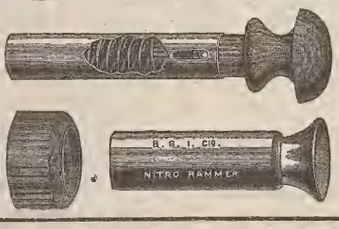
(1892.)

COMPILED BY WILL WILDWOOD.

Contains 250 pages brimful of statistics, records, biographies, fish and game laws, field trial winners, sporting terms, hunting and fishing resorts, lists of rod, gun, kennel, athletic, canoe, etc., clubs; manufacturers and dealers in guns, fishing tackle, sporting, athletic, kennel, bicycle goods, etc., etc. Superbly illustrated with full-page portraits of prominent sportsmen, famous trotters, athletes, bicyclists, dogs, yachts, etc. Board covers, gilt embossed.

It sells on sight. Price $1.00.

See prize list. Address POND & GOLDEY, Milwaukee, Wis.



MEPHISTO

Popularly known from the Atlantic to the Pacific, from Maine to Mexico, as the highest standard New York made cigar and *fully equal in quality and style to the finest imported article.* For sale by first-class dealers.

D. HIRSCH & COMPANY, 331-333 Bowery, New York.

The New Nitro Powder Loader.

It has met with such a success that we advise sportsmen who load their own shells with these powders to send for one without delay. It gives a uniform and steady pressure in loading high grade paper shells with Nitro Powders, and is the only rammer from which the most satisfactory results can be obtained. The wads are all seated properly, and it is so constructed that a pressure equal to 19lbs. is required for every shell loaded. Send 60 cents for sample. Our catalogue mailed to any address on receipt of 6 cents in stamps.

For sale by all dealers.

THE BRIDGPORT GUN IMPLEMENT CO.,

## *OUR AMATEUR PHOTOGRAPHS AT THE WORLDS FAIR.*

PROVISION has been made for an adequate FOREST AND STREAM representation at the World's Fair; and among other exhibits will be shown, in part or in whole, the collection of amateur photographs received by us in the amateur competition. It may safely be predicted that the series will set forth in most effective manner the outdoor life of the American sportsman.

## *FAMILIAR ACQUAINTANCES.*

VIII.—THE GOLDEN-WINGED WOODPECKER.

THE migrant woodpecker whose cheery cackle assures us of the certainty of spring is rich in names that well befit him. If you take to high-sounding titles for your humble friends, you will accept *Colaptes auratus* as he flies above you, borrowing more gold of the sunbeams that shine through his yellow pinions, or will be content to call him simply golden-winged.

When he flashes his wings in straight away flight before you, or sounds his sharp, single note of alarm, or peers down at you from the door of his lofty tower, or clings to its wooden wall, or clinging to a fence stake displays his mottled back, you recognize the fitness of each name the country folk have given him—flicker, yellow-hammer, yarrup, and what Thoreau often termed him, partridge-woodpecker.

It is a wonder that the joyous cackle wherewith he announces his return from his winter sojourn in the South has not gained him another, and that love-note, so like the slow whetting of a knife upon a steel, still another. Perhaps it is because they are especially sounds of spring and seldom if ever heard after the season of joyful arrival and love-making.

During the same season you frequently hear him attuning his harsh sharp voice to its softest note of endearment, a long-drawn and modulated variation of his cackle.

When household cares begin, the lord and lady of the wooden tower, like too many greater and wiser two-legged folk, give over singing and soft words. At home and abroad, their deportment is sober and business-like, and except for an occasional alarm-cry, they are mostly silent.

As you wander through the orchard of an early midsummer day and pause beside an old apple tree to listen to the cuckoo's flute or admire the airy fabric of the wood pewee's nest, a larger scale of lichen on the lichened boughs, you hear a smothered vibrant murmur close beside you, as if the heart of the old tree was pulsating with audible life.

It is startlingly suggestive of disturbed yellow-jackets, but when you move around the trunk in cautious reconnoisance, you discover the round portal of a flicker's home and the sound resolves itself into harmlessness. It is only the callow young clamoring for food, or complaining of their circumscribed quarters.

Not many days hence they will be out in the wide world of air and sunshine of which they now know as little as when they chipped the shell. Lusty fellows they will be then, with much of their parents' beauty already displayed in their bright new plumage and capable of an outcry that will hold a bird-eating cat at bay.

A little later they will be, as their parents are, helpful allies against the borers, the insidious enemies of our apple trees. It is a warfare which the groundling habits of the golden-wings make them more ready to engage in than any other of the woodpecker clans.

In sultry August weather, when the shrill cry of the cicada pierces the hot air like a hotter needle of sound, and the dry husky beat of his wings emphasizes the apparent fact of drouth as you walk on the desiccated slippery herbage of meadow and pasture, the golden-wings with all their grown-up family fly up before you from their feast on the ant hills and go flashing and flickering away like rockets shot aslant, into the green tent of the wild cherry trees to their dessert of juicy black fruit.

Early in the dreariness of November, they have vanished with all the horde of summer residents who have made the season of leaf, flower and fruit the brighter by their presence.

The desolate leafless months go by, till at last comes the promise of spring and you are aware of a half unconscious listening for the golden-wings.

Presently the loud long joyous iteration breaks upon your ear and you hail the fulfilment of the promise and the blithe newcomer, a golden link in the lengthening chain that is encircling the earth.

## *THE WAY OF THE TRANSGRESSOR.*

Two full-grown men in Clinton county, this State, on a recent Sunday, lugged a .44cal. Winchester rifle into the woods at Fern Lake for a hunt. In the evening two other men, alarmed at their failure to return, went out to look for them. When the searchers saw the hunters coming, one said to the other, "Let's scare them;" and the two hid in the bushes. Then one of the searchers, we are told, "began to imitate the roars of wild animals." The hunter who had the rifle promptly fired at the roaring, and the roarer lived an hour and then died.

At about the same time another catastrophe to a July hunter happened in the Maine woods. A young Bostonian went from Parmachenee to Rump Pond, near the Canadian border, on a hunting expedition. He was shot in the thigh, and the Phillips (Me.) *Phonograph* tells this story of what it means to "go for the doctor" when a man is wounded in the wilderness:

A guide was at once despatched for Dr. Palmer at Phillips, sixty miles away. The guide started about 6 P. M. He reached the falls on Cupsuptic River at half past nine. There was no boat there and he constructed a raft on which he hoped to reach Pleasant Island, but in the darkness he soon ran upon a snag which precipitated him into the river. He succeeded in getting safely ashore and remained there during the night. At daybreak he went to the upper landing and found a boat, which he dragged around the falls, a distance of half a mile. In this he reached Billy Soule's camp, and he accompanied him to Rangeley, where they summoned the doctor by telephone. The doctor left Phillips at quarter past ten A. M. by special train. From Rangeley he went by team to Haines's Landing, where a steamer was in waiting to carry him to the falls of the Cupsuptic. Above this he was conveyed by a rowboat for six miles to Camp Parmachenee. From that point they proceeded on foot across the "carry," six and one-half miles, to Parmachenee Lake, and then two and one-half miles by boat to Camp Caribou, which was reached at 8 P.M. The young man was found with the bullet in his thigh. The doctor removed it and the patient was taken to Boston in a comfortable condition.

It would be ungracious to point out to these victims of their own folly and carelessness—although the reflection naturally suggests itself—that had they not been breaking the game laws they would not have brought woe on others and themselves. A person who blazes away when he hears a roaring in the bushes may not be credited with intelligence enough to know that there are such limitations as game laws in existence. As for the Boston man, he cannot plead ignorance, and presumably is of that large class, hailing from other States than Maine, who go into the woods year after year bent on killing game out of season, in defiance of the statutes, of decency and of the rights of their law-abiding fellows. The list of their catastrophes and fatalities warrants the belief that a rigid enforcement of game laws would effect a saving of human limbs and human lives, as well as of the game. If, in the case of some of the visitors, the statute, which now prescribes imprisonment after violation of the law, could be applied to effect a preventive imprisonment before contemplated violation, there would be fewer unfortunates carried out of the woods on stretchers.

## *MEMORY.*

How magic is the sportsman's memory, and how potent the story of another's field experiences to renew the recollection of one's own days with dog and gun. It is one of the never failing charms of a sportsman's journal that, reading its pages, one may in fond fancy see again, as in the mirror of the Arabian tale, the fields and the woods and the streams and the skies and the comrades of years long gone by. Such a graphic sketch as the story of "A Day with the Grouse," by Dr. Morris, in a recent number, not only pictures the scenes described, but brings vividly to the minds of the reader his own days with the birds, and musing he lives over again each particular incident of the hunt.

By the way, if any one happens to require a fit reply to the carpers who can find no savor in shooting, we commend as something fully covering the case the concluding paragraphs of Mr. Hampton's sketch of grouse shooting, to be found on another page.

## *MASSACHUSETTS GAME BIRD IMPORTATION.*

THE report of progress sent us by the Acclimatization Committee of the Massachusetts Fish and Game Protective Association abundantly justifies their appeal to the sportsmen of the State for contributions of funds to extend the enterprise. The response should be prompt and generous. The results sought are for the common good of all Massachusetts sportsmen. In thus stocking public covers for public benefit, the Massachusetts Association is displaying a rarely disinterested spirit. In these days of private game preserves and the absorption of public hunting territory by individuals and clubs, a society which intelligently strives to better free shooting privileges is deserving of much honor and substantial support.

## *SNAP SHOTS.*

FOR the very interesting amateur photographs of a nesting woodcock, reproduced in our Natural History columns, we are indebted to the courtesy of Mr. G. Hills, of Hudson, N. Y., who discovered the nest and suggested the photographing. Mr. Jaquins tells us that after he had taken two photographs of the bird sitting on the nest, the bird was lifted from the nest by Mr. Hills; and the third plate, of the eggs as shown, was then made. We have also a set of photographs of a nesting woodcock taken by Mr. T. M. Aldrich in North Carolina last spring. Mr. Aldrich at one time set up his camera, then going to the nest crouched behind it, and pulling a string snapped the shutter and succeeded in securing a picture which shows not only the bird on the nest but his own portrait as well. His experience and that of Messrs. Jaquins and Hills illustrate the well known fact that nesting birds lose much of their wildness and exhibit at times surprising fearlessness in the presence of man.

---

Dr. Louis Bell, the holder of the Winans Trophy and the champion revolver shot of the United States, is now in the Eastern States on professional business. On several recent shoots he has been present at the Walnut Hill range, and at 50yds. outdoor work has shown that he is worthy of the leading place he holds in revolver endeavor. He is hard at work keeping in proper form for his defense of the trophy. The first and present challenger is Mr. Geo. F. Jantzer, of the New York Pistol Club. Mr. Jantzer stood third in the list of contestants at the opening shoot, and is ambitious to have the honor of holding the trophy. The men will have an early meeting, and if careful practice can secure them, some very close records are promised.

---

Mr. Walter Winans, the donor of the American revolver championship emblem, is worthily maintaining his place as the leading revolver shot of the world. At the meeting of the British National Rifle Association, at Bisley, which closed on Saturday last, a special cable informs us, Mr. Winans is credited as the winner of nine in the twelve varieties of revolver matches provided, while in the other three he tied the winners but was not himself credited as a winner under the conditions.

## CAMPS OF THE KINGFISHERS.—VI.

### CARP LAKE, MICHIGAN.

#### The Carp Lake Camp.

IN the morning Sam and Charley and Kelpie were satisfied to use the wooden boats again, while the Colonel and I put the ironclad together for a cruise up the east shore of the lake to Fouch's landing, about 3 miles, and thence across for a visit to Uncle Jimmy Nolan, "the rare ould Irish gentleman," and as good a neighbor as we ever had in all the years of our camping out.

We borrowed a few minnows out of old Sam's bucket "onbeknownst" to him, and throwing an old grain sack in the boat in which to bring back some potatoes, took our way up shore with a stiff wind abeam from across the lake that gave the ironclad a chance to show her best points. A half mile or more from camp I took my first bass, a small one, guessed at a trifle under a pound weight, which was returned to the water to grow larger if some wretch without a conscience didn't happen along in the near future and yank him out to glorify himself in the eyes of his friends of the same ilk as a count fisher.

He was a vigorous fighter, however, for his size, and for a minute or so the arch of the old rod came near fooling us into the belief that it was battling with a 3-pounder, but as he was the first bass I had felt for a year we charged the error of judgment to the old wrist, which was too much out of practice for a close guess at the size of a fish by the strain on the muscles, and to a "sneakin' hope" that overcomes us all at times that the fish at the other end of the line may turn out larger than he feels on the rod.

The little fellow must have slipped around ahead of us and told all the bass and other fish that he came across on the way that a couple of dangerous old fish cranks in a torpedo boat were coming, loaded, and to give them a wide berth or they might run against a "live wire" trailing after the boat and come to grief through the alluring antics of a harmless-looking shiner, for we fished all the way up to the point across the little bay from Fouch's landing without getting another bite, save from one bold and reckless goggle-eye who failed to heed the warning and fell a victim to his curiosity in trying to find out what was the matter with the erratic shiner.

We stopped around the point and caught a few good minnows with hook and line, still-fished awhile without success, and then pulled across the bay to the landing to stretch our legs ashore and slake our thirst at a pool in a clear, cold little spring branch that came stealthily out of the tangle to the right of the road and lost itself a few rods down to the left in the grass and lily pads lining the shore of the bay.

(It may be noted for any one desiring the information, that this landing is the place to where "summer resorters" for the Fountain Point House are conveyed from Traverse City by vehicle—there will soon be a railroad—to take the little steam launch Rambler for the house, twelve miles below.)

After a good rest and a smoke we got back in the boat, and shipping both pair of oars settled down to a pull of two good miles and a half across the lake almost in the eye of the wind and against a white-capped sea that slapped an occasional half pint of water in over the bows, but we had got used to the ironclad's ways and snaky manner of climbing a sea and didn't mind it much.

We forced the boat through a dense belt of bulrushes growing a couple of rods from the shore, to the landing we had made in front of our last year's camp, and got out to look around for reminders of the pleasant days spent there in sun, and rain, and storm, for even the rainy and stormy days have their pleasures in a well-balanced camp.

First, was the Colonel's famous camp-fire, or rather the reminder of it in the shape of a weather-beaten pile of ashes and a few sodden, partly burned roots of a great stump that he had spent many hours, far into the nights, in reducing by piling around it a half a cord or more of logs and limbs and touching it off with certain prefatory bibulous festivities and ceremonies, which would shoot up into a blaze of flame and sparks that could be seen for miles down the lake. Around this we had nightly gathered and smoked and told fish lies, and took solid comfort till drowsiness drove us one by one to bed, except the Colonel, leaving him to sit and weave fancies in the embers till the last flickering flame died out.

Two or three rods up shore was the "sign" of another old stump that had shared the same fate, and a little further on still another, which had moved the Colonel to call it "Three Stump Camp."

Of a verity, "The Kurnel is a main hand at buildin' a camp-fire."

Next came a smaller lot of ashes, flattened and beaten into the ground by the rains and snows of many moons, and a few charred ends of chunks and sticks, which denoted the spot on which many an appetizing meal had been prepared to the accompaniment of more or less variegated profanity, notably when it was raining and the fire wouldn't burn well.

Near it still stood the two posts on which had rested one end of the "kitchen" table, the other supported by a handy stump, on which the camp-fire fiend had not been allowed to operate for a display of his fireworks.

A rod from this were yet standing three of the six posts on which had rested the dining table, and off to the right were four well-defined squares where the tents had stood, with here and there the weather-beaten head of a tent pin sticking out of the ground as we had left them when we broke camp.

While we stood talking over the pleasant days we had spent on the familiar spot, a lot of cattle and some horses grazing in the field caught sight of us and came hurrying up to within a few yards, where they stood with necks outstretched and bursting with curiosity, staring at us in open-eyed wonder, with trouble brewing for us, as we knew, if the inspection did not turn out to their satisfaction.

We were in some doubt as to their intentions, and made a hasty mental calculation how long it would take us, with a sudden and pressing impulse for a starter, to reach a division fence a few rods back of us; but our fears were quieted by an old brindle cow with a clanging bell hung to her neck, who seemed to recognize in us old friends, by a low *moo-oo*, which the others appeared to understand as a signal that we were all right and not to be molested, and somewhat to our relief they turned lazily and began feeding again, as though nothing had happened to disturb the quiet of their humdrum life.

One mild-eyed young filly, however, seemed to wish a better acquaintance, and stood eyeing us curiously, afraid, or too timid to make the first advance, but when I snapped my fingers at her she came confidingly up and stood quietly to have her nose rubbed, making an occasional playful snip the while at the grain sack hanging over my shoulder.

It was a pleasant "episode," as old Sam would have called it, but when we had rubbed noses to our mutual satisfaction, and got quite well acquainted, the Colonel and I—having in mind the cream and buttermilk in Mother Nolan's spring house—started for the house, 60 or 70 rods back on the side hill, with her ladyship following demurely behind to the fence at the lane, where she stood looking after us with wistful, reproachful eyes, "cogitatin'" doubtless on the uncertainty of human friendship.

Truly, it is a comfort to make friends with the dumb animals—big, savage pups and "ornery curs" omitted.

At the house we found uncle Jimmy sitting out on the porch with a neighbor and Johnny, a lad of seventeen and the baby of the family, all three doing nothing and apparently enjoying it. He welcomed us cordially and boisterously as is his wont, shaking hands vigorously the while, and called in at the open door. "Mother, mother, come out; here's Colonel Culbertson and ould Hickory, two o' thim Kingfishers that wur camped down beyant by the lake last summer, d'ye mind!" "Gintlemen I'm glad to see ye, so I am: sit ye down an' have chairs an' rest yerselves; where's ould Sam and Charley, an' little Ed.—ah, but that Ed. was the bye for mischief an' pranks, an' makin' the fun, so he was; where is the botherin' bye, I'd like to see him—isn't he along with ye? An' Dick Marris [he remembered all the names of the party]; him that presinted mother with the illegant bottle o' the crather for midical purposes—be the same token the milary gi' me a bad twisht soon after ye left us," with a wink at the Colonel, "an' Mister Foulds, the rale gintleman that he is, an' Harry an' Mister Gooder as I mind him with the shiny sthandin' collar that 'ud make the side boards of a wagon—an' where ar' ye campin' now, for I know yer campin' or ye wouldn't be here, d'ye *see*?" All this without an intermission, in a high, strained voice that might have been heard half way across the lake, as the wind was, but his honest old heart was in it all and we let him run down without interruption for a fresh start.

Meantime gentle Mother Nolan had come out on the porch and we had a good handshake all around, and when Johnny brought up a crock of cold, sweet cream from the springhouse the Colonel made himself at home with it, while I preferred to go down to the springhouse and sample the buttermilk of the morning's churning in the big churn.

The first dipper went down so slick that I hardly got a good taste of it, and I tried another with better success, but it took the third one to get at the exact flavor, and then I wished brother "Wawayanda" was there to compare it with the nectar he drank once upon a time in a stone-lined cellar somewhere in Canada, and then telling about it afterwards in FOREST AND STREAM for the sole purpose, as I figured it out, of making my mouth water.

When I returned to the porch Johnny and the neighbor had slipped off somewhere, and as the two older boys, Dan and Mike, were out in the fields, and Mary too timid and shy to be coaxed from the back room, whither she had fled at the first sound of her father's greeting as we stepped on the porch, we spent near an hour in pleasant chat with the old folks.

When about ready to take our leave Johnny and the neighbor came up the hill to the porch with a sheepish expression on their faces that meant they had been in mischief of some kind, and it soon developed that they had gone down to the lake to have a look at our canvas boat, the first they had ever seen, and the temptation to try it was too strong, and they had been overcome.

Getting in, they raced up and down the shore awhile, having great fun, when they concluded to land at a sandy beach a hundred yards below that looked to them a better place than where we had left it. Alas! for their good intentions.

When within 10yds. of the shore they struck a sharp, unnoticed snag sticking up out of the sand, and ripped a hole in the canvas that started the boat to filling rapidly, but as the water was less than a foot deep they jumped out on either side and snaked it ashore before it had taken more than a few gallons.

Then they sneaked up to the house to break the news of the catastrophe.

When Johnny had, with much trepidation, told his tale Uncle Jimmy nearly exploded with wrath, and gave the boys such a scoring for their "schylarkin' an' meddlin' ways" that they were glad to take refuge in the house under the protection of Mother Nolan till the storm abated.

Uncle Jimmy insisted on "settlin' all the damiges," but we lifted a load from Johnny's mind by assuring him that we looked on it as purely an accident and he need not worry about it; that the damage done was so insignificant that it could be repaired in a few minutes when we got to camp.

After the Colonel and I had consoled ourselves at the springhouse with a last dipper of buttermilk, we started in a body for the scene of the wreck, stopping in the potato field on the way to "grabble" a half bushel or more potatoes to take to camp in the grain sack. However, we did not know how we were going to get them there, as our boat was useless and the camp on the opposite side of the lake three miles or more away. We found the boat dragged up half her length on the sand, with an L-shaped slit in the canvas about 2in. long on the starboard side near the forward stool and five or six gallons of water in the stern.

The water was scooped out with the tin cup brought along, aided by the big sponge, the boat carried out on the beach and taken apart, and then we stood looking at each other in a vacant sort of way, in a —— of a category as to how to get it back to camp.

"Shipwrecked b'gosh," old Sam would have said, but we were on a hospitable shore, which does not always fall to the lot of castaway mariners.

The neighbor came to our relief by saying he had a big new skiff a short distance down the shore which we could use to get to camp and keep till he needed it; and in half an hour we had the collapsed ironclad loaded into the bow of the big skiff and headed down the lake in the direction of the camp, much to Johnny's pleasement no doubt, for it was plain the boy had been greatly worried over the mishap and did not expect to come out of the scrape so easily.

A few hundred yards down shore we beached the skiff at the mouth of a little stream, out of which we had taken sixty or seventy good trout the year before, but after fishing it carefully up to an old deserted mill at the road without a bite—the only part of the stream we had found any fish in—we took a short cut back to the boat, convinced that it was either a poor day for trout or that the youngsters of the neighborhood had cleaned it out.

I tried it another day some time afterward, but got nothing, only the information from a boy that it had been fished industriously nearly every day for a month or more, and what fish they had failed to catch were doubtless scared to death.

Off the mouth of the little stream a hundred yards was a stake sticking up in about 12ft. of water, where with his boat tied to it, the Colonel had spent a fair part of his time the previous year "inveiglin' of bluegills" with a barnyard hackle for a tail fly and a couple of gaudy "other" flies for droppers, the heft of the pleasure and comfort being furnished by a light split-bamboo Leonard fly-rod. The immediate vicinity around the stake had been christened "the bluegill hole," for on almost any day or hour of the day a string of them could be had for the trouble of pulling a boat down from the camp to the "hole" after them.

The Colonel's weakness for bluegills, and the recollections called up by the sight of the old weather-worn stake overcame him, and we pulled out, and taking a couple of half-hitches around it with the painter, settled down for an hour's sport with "them little fellers that kin knock the spots off'n a trout a-hustlin' an' a-cavortin'," according to old Sam, and Sam's estimate of their fighting qualities is not far wrong.

After taking and stringing 25 or 30 big ones—enough for a couple of fries for the whole camp, and returning to the water as many more smaller ones, we had enough, and once more took our way down the lake—first changing snells and hooks for bass—but we got nothing but a pickerel in two miles' fishing, and gave it up and crossed over to camp about 5 o'clock, well satisfied with our day out, even though the ironclad had a hole in her bottom and had to go in dock for repairs.

When we climbed the bank near Barney's table we were greeted by two raw recruits from Cincinnati, sitting under the big fly, whom the Colonel had telegraphed to come up while in Traverse City, and they had been in camp an hour or more waiting for some of us to come in and do honor to their arrival.

They were father and son; the former a man of the sawed-off variety, the son a spindlin' shrub of 18 years from the sturdier parent stem, who had sprained his eyes by over-study so such an extent that he was afflicted with short sight—and glasses, but he was a good, jolly sort of boy, and we took a liking to him.

What the paternal parent lacked in stature he made up in other accomplishments, among which was a burning desire to impart his knowledge of angling to his son—who knew more about it than he did—and he could hold up his end, too, equally well with the Colonel or the Kentuckians when it came to a question of "O. F. C." or "Old Crow."

I will not inflict the whole of his name on the reader lest he get as tired hunting for the end of it as we did of his unappreciated wit, the old wormy chestnuts he sprung on us at all hours, seasonable and unseasonable, his very funny (to him) but pointless (to us) play on words and his irritating sarcasms directed chiefly at his friend, the Colonel, who we sometimes wished would pick him up by the slack of his breeches and pitch him into the lake. But he was a good fellow, with capabilities but little tact, and we finally got used to his "everlastin' smartness" and looked for it as a part of our daily fare, to be taken, however, like castor oil, with fortitude, if not with a relish, and thereafter the camp run along with less friction than might have been expected.

There may be a moral to this, if the reader has a mind to hunt it up.

We called them Johnny No. 1 and Johnny No. 2 to distinguish one from the other, but it was only a day or two till old Sam departed from the usual Kentucky custom and dubbed No. 1 "Perfessor" instead of Colonel, and thereafter it was "Perfessor" and "Johnny."

We carried the ironclad up in the shade of one of the oaks and sewed on a neat patch of canvas over the rent and waterproofed it with boiled oil, mixed with the preparation sent with the boat, and in the morning it was as good as new and ready for another cruise.

When the boys came in a little before sundown and climbed the bank old Sam's "barometer" indicated "not bitin' very well; toler'ble pore luck," but they brought in four or five bass and some pickerel, which, with the bluegills were more than enough for our needs, and some of us, at least, were satisfied.

## THE MUNGOOSE IN JAMAICA.

*Editor Forest and Stream:*

I have read "Arefar's" letter in your issue of May 26, and would have replied to your request somewhat earlier but that an accident placed me *hors de combat* for nearly three weeks.

If "Arefar" and his Californian friends will take what I may term experienced advice, he and they will let well alone, and keep at as great a distance as possible that to us ubiquitous pest, *Herpestes ichneumon*.

The mungoose was introduced into this island for the ostensible purpose of destroying the large, gray, white-bellied rat, that played havoc with the growing canes on the sugar-making plantations. That they fairly achieved the object for which they were imported cannot be gainsaid, but that they would ever become the universal pest that they are at the present day, and have been for the last ten years, was never anticipated. So long as they kept to the cane-growing plantations and ate the planter's poultry, eggs and all young and available animal life within a reasonable distance, all went well; but with its rapid and prolific powers of reproduction, and its vagabond and roaming disposition, it in a very short time—a few years—was to be found in every part of the island, from the sea shore to the tops of our loftiest range of mountains, the highest peak of which runs up to 7,360ft. above sea level.

I have had a long and intimate acquaintance with the mungoose, that is since its first introduction, just about twenty years ago. In a brochure written some six or seven years since on agricultural matters, at the instance of a leading local society, that on Commerce and Agriculture, I drew attention to the mungoose, its greatly increased numbers, area covered, and the devastation it was accomplishing, not only to young animal life alone, but to vegetation. Toward the end of 1889, at the request of the editor of one of our foremost metropolitan dailies, I again drew attention to the mungoose question. This article served the purpose in view, and brought to our newspapers letters from all parts of the island, all of which complained most bitterly of the mungoose and the damage it was causing everywhere. The general wail had the desired effect, and a commission was appointed by the local government to inquire into and report upon *Herpestes*. When the commission sat I was the first summoned, and I stated what I knew of the animal, its habits, life, food, etc. Very many gentlemen were called and gave evidence, and with one solitary exception—a cane cultivator and sugar boiler—their voices were raised against this new and introduced pest. I have not a report of the mungoose commission, but if one is to be had it shall be sent on.

The mungoose, as I have said, was introduced to destroy the cane rat. It has by no manner of means destroyed these rats, but it has lessened their number in the cane fields, and saved the sugar planters a lot of money. It was not introduced to destroy, but it has most effectually nearly exterminated all our ground laying and feeding birds, our poultry, eggs of all kinds on the ground and in trees, including those of the land turtle; it kills young pigs, lambs, kids; eats fruits of all kinds; canes, ground provisions, fish, wildfowl, snakes (ours are, or rather were, harmless), lizards, crabs, etc. All young and tender life, animal and vegetable, is included in its menu of daily fare.

It has been said, when folks here knew but little of its habits, that the mungoose does not climb, and that he is only a day forager. Neither assertion is correct, for the animal will climb into a tree that would try the agility and pluck of a young descendent of Ethiopia, and during the beautiful moonlit nights, that one only experiences in the tropics, the mungoose will take his walks abroad intent on destruction of some kind. When up a tree he will destroy the eggs or young of birds, taking them from the nest, or eat the fruit that may be ripe. He does not kill our domestic or dark-furred rat, and I am aware of an instance in which a mungoose and two of these rats found a common home or lodging place in the hollow trunk of a fallen tree. This, however, must be taken as a rare exception.

We had in this island a beautiful and indigenous snake, a friend to the agriculturist, the *Chilobothrus inornatus*, commonly called the yellow snake, and growing to a length of 6 and 7ft. It is gone; love or money cannot procure an individual, at least I have not been able to obtain a specimen for a snake fancier friend living across the big water, although I have been trying for the last three or four years. Another friend of the land cultivator, the ground lizard (*Ameiva dorsalis*), is gone. I have seen but one individual during the last five years; formerly they might be seen by the hundred in every mile of ground covered.

When he has cleared off the animal life and the fruit in a district, the mungoose turns his attention to the ground provisions, and here again he shows the variety of his taste and the power of his jaws. He will grovel away with his paws until he lays bare yams, cocoas (*Alocasia*) sweet potatoes, cassava, bitter and sweet (the former, *Manibot utilissima*, poisonous in its raw and unprepared state), and other ground food bulbs. Of fruit he has a partiality for the banana, the various *Anonas*, the mango and others, as well as for some of our tree vegetables, for instance the delicious akee (*Cupania edulis*) and pear (*Pias cauliflora*) *et hoc genus omne*.

The mungoose will destroy fish, and when our irrigation canals are drawn off for cleaning, he will seize the fish and make off with them.

Beside the destruction to animal and vegetable life, not the least harm it has done has been by the destruction of insectivorous birds and lizards, and the great increase of another nuisance, the tick. Here is a subject that our local government is bound to take up in the near future, and there is or will be found only one remedy, the introduction, propagation and protection of insect-eating birds. (Would that we could exchange with you the mungoose for the sparrow).

*Herpestes* breeds about six to eight times in each year, and I have never known of more than five young at one time, but upon this point opinions differ, one eminent local doctor of medicine (and a naturalist) stated before the commission that the young numbered ten to eleven. The mungoose lives in the hollows of dead trees, dry walls and other such places. His activity is wonderful, and it is a treat to see him leap at and secure a young fowl; he very seldom misses the quarry, which, when secured, he proceeds to mutilate in the groin, first of all drinking the warm blood, then devouring the liver, etc. With all his activity and pluck—and he is plucky—he is no match against a good terrier, and those who wish to rear a few chickens must and do keep two or more terriers. The mungoose is cunning and sagacious; in fact he is highly educated. I have seen one abstract an egg from a hen's nest, take it up with the forepaws, hug it to its heart and walk off on its hind legs. Here is an instance in proof of its intelligence and reasoning power. The narrative comes to me first hand from a gentleman holding the commission of the peace and not given to Munchhausenism. My friend, who is the owner of one of our principal coastal wharves, and his own wharfinger, told me that his premises are overrun with mungoose, against which he wages a perpetual war. He had noticed for a considerable time, as he sat in his office, an old buck constantly traveling to and fro between a log wood heap and the large warehouse. His constant perambulations had worn a distinct track on the sandy soil. Afraid to have recourse to his gun in such a place, he provided a new spring trap, upon the lever platform of which he tied, as well as he could, an egg, and when the employees had drawn off for the midday meal he excavated a hole in the track, placed therein the trap, which he covered over with loose sand, leaving only the egg exposed, and after making all smooth retired to his office to watch. Ere long out came *Herpestes*, who commenced a series of maneuvers as comical as they were cunning. After reconnoitering by some half dozen circular evolutions he gradually approached the egg, and with his fore paws commenced to scratch the sand away about 6 or 7in. from the egg. A part of the trap soon became exposed, when a few runs round doubtless expressed his satisfaction at outwitting the wharfinger. The excavating and circular perambulations continued until the trap was undermined on the one side, when, losing its equilibrium, it fell into the miniature pit, the egg rolled off and was immediately carried away by the intelligent but destructive little animal.

The mungoose is easily trapped, and it is a strange circumstance connected with its capture that very few females are taken or killed, perhaps one in twenty. This would lead to the conclusion that either the males are greatly in excess of the females, or that the latter stay at home to superintend the domestic arrangements and the family.

However interesting the mungoose may be from a natural history point of view, the fact remains that it has overrun every part of Jamaica, has done and is doing incalculable damage in every direction.

The question may be asked, "Is it not possible to exterminate them?" The answer is handy in the negative. On the plains and in cultivated districts they may be partially kept down; in the hills, in the rocky, inaccessible and uncultivated districts, never. Here they are and here they are going to remain until the last trump sounds.

I have written no exaggerated account of the life of *Herpestes ichneumon* in Jamaica, but the facts experience has brought to my notice and note book. "Arefar" and his friends had better leave their gophers, squirrels, quail and poultry, and the mungoose alone.

## CALIFORNIA SONG BIRDS.

OAKLAND, Cal., July 10.—*Editor Forest and Stream:* To the native son of this State, to one who believes in California first and himself second, nothing is more soul-inspiring, nothing more nearly approaches the sublime in literature than an adverse criticism of the climate of this glorious commonwealth by the man who lives where he dare not go out of his house in winter without gloves on his hands, flaps on his ears and a 50 pound overcoat on his back; and dare not go out in summer without a sunshade over his hat and a piece of ice under it.

Thus "Didymus," of Summit, N. J., in FOREST AND STREAM for Oct. 1, 1891: "During certain seasons" in California "every spear of grass, every weed dries up for want of water, and every insect dies for want of grass and weeds; and how, under such conditions, little birds can live I can't imagine. They require water very often, and Californians expect too much if they suppose the little musicians are going to entertain them with no grain, grass seeds or insects to live on and not a drop of water to wet their whistles with."

Shades of the Argonauts! Does man say this and live unhaunted? "Not a drop of water to wet their whistle with!" What, Mr. "Didymus," do you think we wet our whistles with—whisky? In this city, only a month ago, two temperance advocates secured total abstinence pledges from 4,000 people. Poor, ignorant fools; what will NOT be their sufferings before next rainy season! True, there are a few desert spots in California. But gather them all in one piece, place it at one end of the State, and cut that end off. Why, it would never be missed from the map; it would not be so much as a dog's ear on a quarto page. It might be a little larger than New Jersey, but would be considerably smaller than a reasonable-sized wheat farm. And who ever thought of distributing song-birds in a desert? Who would there hear the music but an occasional lost prospector who would give all the singing of all the birds that ever existed from the beginning of time until now for one small drop of water?

Mr. "Didymus," you err. Have you ever visited this State, or do you rely upon the vague hearsay of somebody who was told by somebody, who also was told by somebody, *ad infinitum*, that such is the case? Take your map of California, "Didymus," and I will give you a lesson in geography. Do you see that line of mountains near the ocean? That is the Coast Range. And do you see that other line parallel to the first, but further east? That is the Sierra Nevada Range. Here you will find many peaks perpetually covered with snow. Between these two ridges are the Sacramento and San Joaquin valleys, through which flow two large navigable rivers. These rivers are fed by innumerable smaller streams, which drain nearly the whole interior of the State. Now, when a bird, no matter where he may be (except in a cage), feels in a convivial mood and asks his neighbor to smile, within a few minutes' flight the two can always find flowing water with which to drink each other's health. Again, "the birds that wanton in the air" can here riot on luscious, juicy fruits of many varieties the whole year through, which, Mr. "Didymus," is more than you can do in New Jersey. Further, as the combined efforts of the population of all the planets can not make free birds stay where there is neither food nor water, your warning is unnecessary.

As to the seeds and insects dying, we have not so good luck. If such were the fact, and the injurious weeds and bugs would die, then indeed would this be Paradise.

But one word more and I shall be through. The irrigation district, when compared to the size of California, is very small; and while the conditions of plant life and in consequence insect life have been materially changed, the State as a whole has been unaffected. N. S. G. W.

## STOCKING MASSACHUSETTS COVERS.

*To the Sportsmen of Massachusetts:*

The undersigned, a committee appointed by the Massachusetts Fish and Game Protective Association for the purpose of increasing the game supply in this State, present these facts to you. We have loosed alive in Massachusetts during the three years of our work the following:

349 pinnated grouse (*Cupidonia cupido*).
146 sharp-tail grouse (*Pediœcetes phasianellus*, var. *columbianus*).
1 020 Bob White quail (*Ortyx virginianus*).
320 Gambel's partridge (*Lophortyx gambeli*).
20 plumed partridge (*Oreortyx pictus*).
87 Northern hares (*Lepus americanus*, var. *virginianus*).
A total of 1,948 head of game.

Evidence in abundance shows conclusively that the undertaking is already successful, and from the Berkshire Hills to Provincetown, from Haverhill to Fairhaven, we hear that the game loosed has survived our winters, has bred and has increased.

The work has been done and paid for (save by the aid of a few donations from other generous and public-spirited gentlemen) by the members of the Massachusetts Fish and Game Protective Association—a private club of sportsmen, for the public good alone. We are now at the opening of another season's work, having learned how and where to procure game valuable to our State and how to care for it when procured; and it is our purpose to loose in different parts of the State during the coming season some 2,000 head of hardy game birds, three-fourths of which are already ordered and will soon begin to arrive. We have some money left; this we shall use, and we want much more for the same good purpose, and it seems to us that there are many sportsmen who would gladly embrace this opportunity to add their contributions for increasing the order (as funds are provided for those already ordered).

Ours is a labor of love, for we pay no salaries, no office rent, neither is it merged with other moneys nor used for paying club expenses; all money at the command of this committee is spent for game, and the more money the greater the result may be. The opportunity is beyond our means, and we ask that every Massachusetts sportsman make our cause his and help us in this work.

Each year witnesses the retreat still further west of the pinnated and the sharp tail grouse, and every year brings more Western sportsmen to our Eastern country for the deer and moose formerly to be found near their own home. The deer and moose have gone, the grouse are going fast. Pinnated grouse were found when the Pilgrims landed in the old Bay State, and it may be no idle dream that an hundred years hence pilgrims from the West may come to find them here again.

Massachusetts is the only State east of the Alleghanies where it can be said the pinnated and sharp-tail grouse exist. Now, they do exist here, they thrive and may become a common game bird if sportsmen do their part to help.

*Now is the time. Help us now!* A few years hence will be too late, and the time will be past when it may be possible to do the work we are now accomplishing. Some have given to the cause a single dollar, some one hundred. Give us what you can, and join with the moral aid already proffered the financial help which will bring full success.

Edward E. Hardy, Sears Building, Boston, is treasurer of the committee, and due acknowledgment will be made to each contribution.

JOHN FOTTLER, JR.,
EDWARD E. HARDY,
HENRY J. THAYER,
EDWARD BROOKS,
OUTRAM BANGS,
Committee on Acclimatization.

Mr. Richard O. Harding, well known to the readers of the FOREST AND STREAM as the secretary of the Massachusetts Fish and Game Protective Association, has just returned from spending a most delightful day at the extensive game preserve of Mr. B. C. Corey, of Hyanis. As everybody acquainted with the place is aware, the game preserve of this gentleman is on an island, connected with the mainland by a bridge. Mr. Harding says that the center of the island is a perfect forest, where even deer can find sufficient cover to flourish in and remain as wild as the deer of Maine or the Adirondacks. Around the woods and on the borders of the sea the ground is cultivated with several varieties of grain in order to furnish the game birds with good and sufficient food. In the winter considerable fodder is supplied to the deer in the case of very deep and continued snows. The deer are prevented from leaving the island on the sides next to the mainland by a high fence. Even to Mr. Corey these deer are very wild and almost unnumbered. One day last winter he put out food that he was aware that the deer would come to, and then by climbing a high tree, he was able to count ninety-three of these beautiful creatures or to satisfy himself that there were that number in the preserve.

As for quail, he has a great abundance, the result of stocking, some of the stock for which he obtained through the Fish and Game Protective Association. Mr. Corey and Mr. Harding drove and walked over a part of the preserve. They became aware that they were near to a body of quail, when by a detour near the covey they were able to see nearly half a hundred of them as they flew away. The chicks were evidently two-thirds grown as they flew with the old birds without difficulty so far as seen. Mr. Corey is satisfied with his success in restocking with quail, but with pinnated grouse he is not at all satisfied. He put out last year all the birds of this variety he obtained from the Association. These birds he saw for a while but soon they all disappeared, and no signs of them have been discovered since, unless, indeed, a very long-distance sign is to be counted. It will be remembered that a pinnated grouse, in an exhausted condition, was found in the vicinity of Saguin Island, near the mouth of the Kennebec River, in Maine, last winter. It is suggested that this may have been one of Mr. Corey's birds, or at least it must have been from the birds put out somewhere in Massachusetts, since there are no pinnated grouse in Maine. Mr. Harding expresses the opinion, coming from Mr. Corey, that the pinnated grouse is too migratory in its habits to ever be a success in restocking the game resorts of Massachusetts. Mr. Corey has two or three golden pheasants at his preserve, but with these beautiful birds he has not made a success in general stocking. Some chicks have been hatched either artificially or by the old birds in confinement, but they have not done well, and have scarcely reached maturity in a semi wild state.

The quail put out in Franklin Park, Boston's great pleasure ground, are evidently there still, and in all probability they have bred. They have been out over one winter, and one of the drivers of the public carriages tells me that he has seen and heard them many times. As to what numbers he is not quite sure, but he is inclined to think that there is quite a covey in the vicinity of Scarborough Hill.

The open season on shore birds is at hand in Massachusetts, but what with the intensely hot weather and the flood of other summer attractions the gunners have not given them much attention yet. SPECIAL.

## ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

## ANOTHER DAY WITH THE GROUSE.

WILLIAMSBURG, Ind., July 17.—Among the mail received this morning was the FOREST AND STREAM, containing Dr. Morris's "A Day with the Grouse." As usual, FOREST AND STREAM received the first notice, and the doctor's article happened to be the first one read, and the last one for to-day, too, for I felt it to be a sufficient feast for one day. So graphic and so true are his descriptions that one who has been there felt that he was there again, and living over again, one of those happy days. Before a fourth of the article was read I forgot that I was only reading, and became one of the doctor's party and as full of enjoyment as any of them. When, at last, the day was over, the paper dropped from my hands and I sat a while, living over the days when a favorite brother (now gone to join the silent majority) and I with strong limbs that laughed at the idea of getting tired; well trained dogs who only lived to serve us, and good guns that we knew how to use, tramped the gray fields and the brown carpeted woods. There were many of those days, many of them, too, that did not bring heavy bags, but none that did not bring keen enjoyment, both at the time and when remembered. One day in particular was brought to view by the doctor's "day," and as it is the day of days in my shooting memories, perhaps it may be worth relating.

It was late in November when Brother Dave returned from the West, and we were reunited after a long parting. He had great stories to tell of shooting and fishing in the wildest parts of the Rockies. "But," said he, "there was none of it so good as the old times with you, and I now suggest that we have just one more day with the Jay county 'pheasants.' We will go on this afternoon's train, have Dick drive us to the west end of the big woods early in the morning, and then we will hunt back toward town."

A forty-mile ride landed us at Briant, just at dark, Dick was at the station, and gave us a hearty welcome, and said he had a hot supper waiting for us. After supper we told him we wanted to be set down at the west end of the big woods a little before sun-up. Next morning at 5 o'clock he announced that breakfast was ready and the team harnessed, and in thirty minuter more we were on the road. A faint gray tinged the eastern sky. The dead weeds and grass and the rail fences were silvered with frost. From a weed field near by came the plaintive calls of a covey of quail, scattered during the night by some owl or mink. Two or three owls were hooting in the woods, and a belated rabbit hopped across the road. In the south was a bank of fog, and all the air was hazy with smoke and tinged with the smell of burning brush and smoldering logs.

The sun was just in sight when we climbed the fence into a pasture lot dotted with clumps of hazel brush and littered with logs and piles of brush. The dogs jumped over the fence, but did not take a step. Both pointed the instant they struck the ground. "Must be quail," said Dave. "It isn't likely pheasants would be out here so early."

Just then five grouse thundered out from the further side of a clump of hazel brush. Four shots that woke the echoes far and wide—one bird down, another going off hard hit and the other three out of sight in the woods; all in a very few seconds.

The next performance was by a man who mounted a stump a hundred yards away and launched at us a string of expletives that showed long practice in that line. The expletives were sandwiched with commands to "get out of there," threats of prosecution, death to the dogs and personal violence to ourselves. Dave remarked that "that fellow must be feeling pretty lively, but was too talky to do anything else. At any rate he will have to come over here before we pay any attention to him. I marked the crippled bird, did you mark any of the others?" "Yes," said I, "two of them." Dan proposed that we get the crippled one and then hunt for the others. The bird was found without any trouble. It was able to fly but an easy shot finished it. We next went to the place the birds flew from and I got the bearings by which the two birds had been marked. One of them was found after thirty minutes' search and got away, followed by two loads of shot. We concluded that the other one must have gone into a tree, and as it is next to impossible to find one of these birds in a tree, unless the exact tree is known, we gave it up.

The next find was four birds that were wallowing in the dust on the sunny side of a log. They flushed wild from me but one dropped to my second barrel. Dave was forty years away but got a shot at one flying past him. It towered straight up above the tall trees, but recovered and flew away. We followed and it got up wild from the dogs. A second time it rose wild but did not fly so far. This time the dogs pointed in an open place, with nothing on the ground but dead leaves, beaten flat by the rains.

"Now he is our bird," said Dave. "We will get him sure. The bird is not 20ft. from old Dick's nose." Slowly we approached the dogs, every inch of us on the alert, at every step expecting the swift flight that would try our quickness. Step by step, till we reached the dogs, No bird flew. There was nothing to hide a humming bird, much less a grouse. I said I didn't think there was any bird there. "Yes, there is," said Dave. "Old Dick don't do that way for nothing. Catch it, Dick." D ck walked 10ft. further and stopped. "There it is," said Dave, "3ft. from Dick's nose." It was dead; lying breast down and wings outspread, its plumage harmonizing so closely with the dead brown leaves that it seemed a part of them. We found that but one shot had hit it, but that was in the neck at the base of the bill, breaking no bones but cutting a vein that bled it to death.

From here we crossed an open space grown up with weeds and bushes, the dogs flushing one bird that went into the woods, flying along a place that had been cleared of timber and a rail fence built. As I was some distance nearer to the fence than Dave, I went after the bird, and presently looking back saw him following. Forty rods down the fence I walked almost right on the bird. It rose within 4ft. of me and flew back between me and a tree, so close that I struck at it with my gun. This delayed my shooting, and by the time I had turned and was about to pull the trigger I remembered that Dave was back there, but immediately noted that the bird was 12ft. high and Dave would be safe. By this time the bird was under full headway, but the shot was a good one. The bird folded its wing and fell dead without a struggle. Dave stepped out of a fence corner and said, "When your gun

pointed this way I got into that fence corner pretty quick. Just as the bird was opposite me I saw the feathers knocked out of it. Look where it lies, and it was not over 12ft. high when it was hit." It was thirty-five steps to where it hit the ground. It seems incredible that a bird can fly so swiftly and safely through such thick brush, but they do do it, and have often done it in the night, too.

We next went into a tract of several hundred acres that had borne many large white oak trees. They had been cut down the year before when the leaves were on. The bodies of the trees had been hauled away, but the leafy tops still dotted the ground and were excellent cover for the birds. Wild rose berries, black haws and the seeds of various weeds furnished abundant food. One of the dogs pointed at the edge of a thicket and I saw the bird standing on a log not ten feet away.

"Come over here, Dave," said I, "there's one on that log."

"Why don't you shoot his head off?" said Dave.

"Oh, I'll kill him with a club;" said I, "look out now!" And I tossed a stick that flushed the bird. We shot three times at him, but for all I know he is a good bird yet.

The next find was in one of the big oak tops. We stationed ourselves on each side and urged the dog to go in, but he did not like to and stood looking alternately at us and at the leafy top that hid the bird. After a good deal of urging he ran to the butt end of the top, got on a big limb six feet above the ground, walked out on it till he got directly above the bird and pointed again, partly crouched on the limb, his head hanging down at one side of it. In spite of our urging he stood this way several minutes, but finally sprang at the spot he thought held the bird. Out came two in a mighty hurry. There were two shots, two clouds of feathers floating in the air and two birds fluttering on the dead leaves. The dog came out of the top and looked as though he had very grave doubts about that being the proper way to do it and wondering whether he would be switched or praised. He was patted on the head and told to fetch the dead birds, and after that was fully satisfied that it was all right, because we said it was. He had also got the idea that the birds were all in these tops and put in the rest of the day running from one top to another, always going on the lee side, generally running right by if there was nothing there, but would occasionally stop and take a sniff or two to make sure he had not overlooked a bird, and soon got very willing to go in and scarce the birds out.

At noon we lay on the dead grass in the warm sunshine and ate the lunch that our host had slipped into our shooting coats, and afterward tried to take a nap, but our minds were too full of the sport we had had and of the sport to come, and the dog wagged his tail and whined, so we were soon afield again.

At last the sun got low and the air chilly, but still we tramped the woods, and the faithful dog ran from top to top, and our guns cracked and the birds flew away or were killed, till at last the dark came on and the woods were left to the owls and the coons and the foxes. If the day had been longer the sport would have lasted longer, but we felt that we had had enough.

A review of the day's incidents showed that we had flushed sixty-five birds, shot at forty-two of them and had bagged twenty-one. Of course, we did not see sixty-five different birds, as quite a number were flushed more than once, and more than fifty shots were fired, as both of us frequently shot at the same bird.

Did the day's enjoyment end with the day? By no means. It was enjoyment to see the interest of wife and children as they unpacked the birds and counted them, and admired their plumage, and asked how they lived and how we got them. It was enjoyment to sit down to the luscious feast they made, to eat them and to see the loved ones eat them. It was enjoyment to lay one nice young bird in the hands of an invalid friend, and to be told how he had been longing for just one pheasant's breast. It was enjoyment to read the letter from a city friend to whom some of the birds were sent—a letter that said the birds made him smell the autumn leaves and see the smoky Indian summer, and ended by complimenting the skill that bagged so many of such wary and swift-winged birds. Neither was all this the end of that day's enjoyment, for the day had been lived over again in memory a hundred times, and will be a hundred times again. And further yet, that day and others like it have kept my body strong and my mind clear from many weary cares, and made warm friends for me.

O. H. HAMPTON.

### A Deer Floating Incident.

MR. ELLIOTT SMITH, president of the American Wood Powder Company, though an enthusiast at trap and field-shooting, does not think much of the sport of deer hunting—at least, by the method of water butchery so common in the North Woods.

Several years ago he was initiated into the mysteries of "floating," and killed a fine deer the first night. He had been out the best part of the night and had fallen asleep, when he was suddenly awakened by the boat stopping. He had heard his guide whisper to shoot, but though he looked carefully on all sides, he could see nothing at which to aim. Though only a few feet away, the deer the guide had located was hidden from view. Presently, however, it made a sudden leap for the safety of the woods, and he caught a glimpse of its tawny form. It was only a glimpse, but it gave him the opportunity he needed, and he bowled it over with a neat snap shot.

Several days later the guide he had on this expedition approached Mr. Smith and asked if he did not want to try for another deer. He agreed, and that night they went out jacking a second time, when the guide succeeded in paddling him up to a fawn that was neck deep in the water in search of the succulent lily bulbs, of which deer are so fond, and brought the boat so close that Mr. Smith was enabled to reach out his rifle and tap the frightened innocent on the head. This last experience was enough for him. The sport savored too much of barnyard butchery, and he made up his mind to give up deer hunting till he could find some better method.

## THE OLD MUSKET.

YEARS ago, in the dreamy days of my early childhood, there stood, in the corner of the kitchen entry, one of those fearfully and wonderfully made firearms known to our grandfathers as a Queen's Arm musket. How well I remember the old gun, with its long barrel, heavily stocked full length, its rusty but still formidable bayonet, the iron ramrod and massive lock. How strong and safe seemed the great bands which strapped the barrel to the stock, and how suggestive was the heavy black leather sling which dangled about the piece from the big swivels. Proud indeed must have been its first possessor, as he shouldered the musket and hurried to the Assembly on General Muster Day. How at "ground arms" its glittering bayonet must have towered above my tall ancestor's head, as if to smell the battle afar off; and how handsome its carefully polished stock, redder than the blushing cheek of the maiden who stole admiring glances at his sinewy form, as the "Right shoulder arms, march," compelled him to go from near her.

It had in its youthful days been a noted weapon. Stories were told around the fire to eager, childish ears, of how the British had recoiled from its muzzle when my great-grandsire had pointed it in their direction at the battle of Oswego; and well they might, for its huge iron bore and mighty barrel seemed capable of annihilating a small army if it were only loaded to its full capacity. I, at least, never doubted that it had slain its dozens on that momentous occasion. That was half a century before I saw the light. Yet when I made its acquaintance it lacked none of those chief attributes which had made it formidable to invaders. The great brown barrel, the long red stock, the iron ramrod and the heavy bayonet which had lost its glitter, were all there. One great change, however, had taken place in its mechanism; when it no longer became necessary to hurl huge leaden bullets from its angry mouth at public enemies or dangerous beasts, it had been put away until the time came for grandfather to learn the use of firearms. Then it had been taken to a smithy and transformed into a percussion musket. What a lock that was! It yawned open when at full cock, like a bear-trap; and when the hammer fell something had to go.

It was during this period of its existence that its fame as a game destroyer became established, and traditionary tales of marvelous shots at vast distances and close range, performed by the old gun, have come down to the writer through generations of truthful men. Thirty-five pigeons at one discharge; a wild goose "at 30 rods;" a black squirrel at "90 paces," with bird-shot, and a man's leg at 10ft., with buckshot, are only a part of the wonderful record of this lead-slinging machine.

In the course of nature my grandfather laid the gun away, and my father, then a sturdy farmer's boy of fourteen years, became its possessor. Many times have I hung about his chair in breathless interest, listening to the story of when he went muskrat hunting. He used to tell it something like this: "When I was a lad I lived in the country on a big farm, which was a little boy's paradise. There was small game of all kinds to be had in the fields and woods, and through the back end a small brook ran, where I used to catch some nice fish. One day I was hoeing corn near the brook, and being thirsty went to it for a drink. As I clambered over the fence, to my delight I saw a number of muskrats swimming about in the water. I ran at once to the house for the old gun, which I knew how to use; stopping only long enough to hammer down a good big load, I went back to the creek and stole quietly up behind the fence. There were the long-tailed, sleek rats still sporting in the water, at least six of them. Carefully poking the gun through the rails, I took good aim, and shutting both eyes, I fired.

"There was a stunning report, a crash against my face as though a mule had kicked me, and for the next two or three minutes I didn't know anything. Then I got my senses, and began to look around me for the wreckage. My nose was bleeding a stream; there lay my hat a rod away; there lay the musket smoking like a volcano, I picked it up, got my hat and staggered home, with a fearfully blacked eye, an aching head, and a shoulder that was useless for a week. The gun was already loaded when I put in that second generous charge."

Just here I always asked, "Pa, how many muskrats did you kill?" But he never would tell.

The time finally came when my older brother must learn how to shoot, and to that end, the venerable Queen's arm was taken to the town and thoroughly cleaned. One day, a great flock of crows settled in the wheat field near the house, and began business on an extended scale. My brother saw them, and came flying into the kitchen, caught up the musket, loaded it heavily, and ran out. Stealing up behind the lilacs, he took aim and pulled the trigger; the cap only snapped. A fresh one was tried, with the same result. Then another was put on, the gun was cocked, and he was about to try again, when the thought came into his head to prime the nipple. Running back to the house, he leaned the gun against the side of the woodshed, and went in for the powder horn. Scarcely had he secured this, when a cannon-like roar and a crashing sound, as if the building was collapsing, broke the stillness. Rushing out, the cause of all the uproar was apparent; in some manner, possibly by slipping a trifle, the gun had been fired, and the entire upper corner of the wood shed had travelled off into the supernal empyrean, along with the charge of big shot.

Before I grew large enough to put in a claim to the use of the old musket, it had begun to show signs of dilapidation. In the first place, the bayonet was missing. Only two people in the whole world know, or ever knew, where or how it went; those are my brother and myself. He had been shelling corn in the time-honored way of rubbing two ears together, when the brilliant idea occurred to him of fastening that bayonet into the edge of the tub, and ripping the kernels off the cob on the point. The scheme was speedily put into operation, and worked splendidly for a time: but growing careless, he made a luckless motion, the point of the bayonet entered his wrist, and laid his hand open to the bone, an ugly gash 3in. in length.

Never shall I forget the ominous silence which succeeded his first yell of pain; then he seized the bayonet, wrenched it loose from the tub, and rushing out of the barn threw it a mile and a half into the next township. It was never seen again, unless some one has since plowed it up and put it carefully away under glass as a memento of some ancient conflict fought in that neighborhood.

Then the ramrod went; I suppose I was accountable for that. Down the road a piece, where the creek had been bridged, a deep pool, thronging with big yellow sun fish, used to tempt small boys like me to dally on their way to school. One morning I rigged the long, springy ramrod with line, hook and sinker, and started for school, intending to spend a few minutes in fishing at the bridge. I had pretty good success, and was hauling out the yellow beauties very freely, when suddenly I was startled at hearing the recess bell ringing from the school window. Forgetting that I had the ramrod and not a switch for a pole, I dropped it into the deep water and started for the seat of learning on a run. Then the horror of what I had done flashed upon me. I stood still, almost paralyzed. School was forgotten, fish were disregarded, and I spent the rest of the morning trying to recover the lost ramrod. I never did.

But the last and greatest catastrophe which befel the old musket, overtook it at the hands of my mother. We moved from the old home into town, and the days of its usefulness would thus naturally have been over, but it might, in its last days, still have adorned the wall of my bed-room, had it not been altogether shorn of its true proportions. One day after the kitchen stove had been put into place, mother wanted to insert a piece of oil-cloth beneath it. She was just then alone in the house; the stove was heavy, and would have offered an insurmountable obstacle to almost anybody else, but not to her. First she tried removing the legs, one at a time, but nearly brought the whole apparatus down, pipe and all. Then she thought of a lever, and casting about for a good one, discovered the musket in a corner of the store room. Eureka! The gun was brought in, and set to the task. As on every other occasion, it did its full duty, but when the job was over, what a gun it was! Had it been loaded and fired at the top of the church steeple, the charge would surely have blown a hole through the door. It was too bad, for four generations had loved, prized and revered the old Queen's Arm, and that it should meet its fate in that unromantic manner was hard. After its ruin, however, it was put away in the cellar with all its record and associations, and its history ceased to be told. I found it there the other day, in a search for something else, and there it still lies, rusty, worm-eaten, and almost nothing but a memory.

## MAJOR MERRILL'S "BLACK WARRIOR."

THE story of the late Maj. Merrill's horse, "Black Warrior," which we copy from a New York *Herald* of November, 1857, is interesting, not only because it is the record of a noble war horse, but also because it shows an admirable feeling on the part of Black Warrior's master—a regard for the faithful comrade of march and scout, which proved a warm heart and fidelity to friends. The *Herald* said: "This remarkable war horse died in this city last week at the advanced age of 28 years. He was raised in Tennessee, and branded U. S. D. (United States Dragoons) on the opening of the war in Florida, where he served in the swamps and everglades to the close of that inglorious campaign; after which, for several years he was used in the chase of wild Indians, horse thieves, border ruffians and at odd spells of foxes, deer and buffalo, at the various military posts on the prairies west of Arkansas.

"Having marched all over the country, and swam all the principal rivers between St. Augustine, Fla., and Mexico, he was in the whole of the Mexican war, and took an active part in nine general battles, having been wounded by a musket ball at Molino del Rey, and again by a piece of shell at Chepultapec. Peace being restored, Maj. Merrill was unwilling to part with his faithful companion in arms, who had borne him successfully through two wars, from the grade of second lieutenant to brevet major, or to break him down with more service, and so he brought him North and placed him on a 'retired list' for life in this city with full rations, where he has been cared for at the stables of Disbrow, the equestrian professor.

"He was ridden by Kossuth, and also by President Pierce, on occasion of their triumphant entries into the city of New York a few years since, and was usually ridden by Gen. Sanford on the Fourth of July, and often by Col. Duryea, at the head of his famous Seventh Regiment.

"He was never in harness, but was unequaled for discipline and grace of movement under the saddle; very fond of music, knowing his place and the word of command, and the bugle call quite like an old soldier, was never sick or lame for a day, or known to fall or stumble; and was remarkable for his great powers of endurance, keeping fat on prairie grass on long marches; a fine blooded animal, of medium height and weight, perfectly symmetrical and beautiful in form, clean limbed, small head well formed, bright, quick, handsome eyes, large thin nostrils, red as fire when distended; very spirited, yet kind and gentle and very knowing, and possessing a greater number of good points than any other of his contemporaries in the long line of his service, all of whom, perhaps, he outlived.

"Black Warrior may well be classed along with the Bucephalus, Copenhagen, Old Whitney and other celebrated chargers that have 'said among the trumpets, ha, ha, and smelt the battle afar off the thunder of captains, and the shouting.'"

### Freaks of Bullets.

IF "Podgers" does not answer S. J. Norris's query I shall be very happy to do so, as I have often noticed this "freak." Every rifle has two points, at which the bullet and the line of sight strike the same point, viz., the near and far point-blank, your rifle being sighted for 75ft., would have its near point-blank at about 25ft.; and since the lines of sight and fire converge at only 25 and 75ft., the rifle would shoot low at 15ft., the line of sight being above the bullet. The flatter a rifle shoots the less will be the difference in elevation of the two point-blanks. This difference is also modified by thickness of barrel and height of front sight.

L. D. VON IFFLAND.

### "Chained to Business."

OFFICE OF "THE WORKMAN," Pittsburg, Pa., July 14.—*Publishers Forest and Stream: Gentlemen:* Enclosed please find 10 cents for the pictures of the grizzly bear's head, etc., which you offer in the last number of your paper. To those of us who cannot get away your journal is an ever recurring source of pleasure and joy, and in imagination we can live over again all the former delights of outings brought so vividly to our minds by the graphic and readable accounts of your correspondents. Yours truly,

D. L. PASSAVANT.

## YELLOWSTONE PARK NOTES.

YELLOWSTONE NATIONAL PARK, July 18.—*Editor Forest and Stream:* The weather here is very hot during the day, flies and mosquitos, dust and heat add to the tourist's discomfort, but the nights are cool and refreshing. It has not been hot long enough yet to dry out the forest, no fires have been reported, neither is there any smoke drifting in from fires outside the Park.

Owing to the late spring the snow did not begin to melt rapidly until about June 15, when our hot weather began in earnest, sending down the snow so fast that all the streams rose as high as ever before known. The bridge across Lamar River and one across the Yellowstone was carried off. Only one person was drowned in the Park so far as known; that was a stranger on his way to Cooke City; his body was seen going down the river below Gardiner.

While on a trip with Scout Burgess and three soldiers in June, we found that the buffalo had moved but a short distance from their winter range. As late as June 20 their summer range was under from 2 to 10ft. of snow. They had not crossed to the west side of the Madison River and only a few had moved as far south as the west bay of the Yellowstone Lake. They are not in the least danger from poachers as long as they keep on their present range.

All the ice did not go out of Yellowstone Lake until June 15. Even at that date the shore for miles along the south side was lined with immense drifts of snow. All the higher plateaus were covered with a very heavy body of snow which in places reached as low down as the lake shore. We found the roads in very bad condition owing to the late season. Now they are all open and tourists make the round trip.

Camping parties are very numerous, nearly all traveling with wagons, some of them coming from States as distant as Colorado, Iowa and Oregon. On July 2 Capt. George Anderson, superintendent of the Park, was called East on business. Capt. George L. Scott is acting superintendent during Capt. Anderson's absence.

Charles Pendelton, who was ordered to keep out of the Park for catching young buffalo, was arrested on Slough Creek. He is held in the guard house at Fort Yellowstone by the commanding officer, who is awaiting instructions from Washington. Pendelton had permission to travel the wagon road between Gardiner and Cooke City, but not to leave it. He was arrested three or four miles from the road.

The "tramp" bears that usually hang around the hotels during the summer, living on waste from the kitchens are back, some bringing their friends. The guests find it quite an attraction of an evening to walk out and see them feeding around the pig pens and corrals. So far they have been amusing scavengers. H.

## THAT GAME POCKET.

KEARNEY, Nebraska. — *Editor Forest and Stream:* Your correspondent, "O. O. S." in your issue of June 30 is very enthusiastic for such a little thing as an offer to assist brother sportsmen in finding good locations for fall shooting. Indeed, I had no idea that my simple offer would be estimated "sublime" and was inclined to look on the letter from friend "O. O. S." as sarcasm. On second reading I believe that he means it, so "shake, old man."

Now, my experience has been that none but the "whitest kind of men" take up with such invitations as I issued, and that the true lover of field sport, the dog and gun is invariably a "white man." Once in a while one runs across a grumbler or a chronic kicker, but when the circumstances arise to show him in his true color, he always pans out what "O. O. S." calls "the whitest kind of a man." I have no fears but that the gentlemen who work out my game pocket this fall will be courteous to the farmers who kindly give their consent to hunting on their farms, equally as courteous and polite to those who deny their consent. That they will carefully close gates, damage no fences or live stock, drive over no grain or hay fields, and in case of accidental damage that they will call upon owner and settle for it. Upon their good behavior depends the continuance of the friendly feeling at present existing between the farmers and myself, and furthermore, it remains for them whether the parting words shall be "Come again next year," or a simple, polite, "good-by."

I have letters from the following gentlemen, some of whom have already signified their intention of coming here: Mr. A. C. Peterson, Homestead, Pa.; Mr. Wm. W. Tracy, Pittsfield, Mass.; Mr. R. C. Ferguson, Knoxville, Iowa; Mr. P. Moeller, Nyack, N. Y.; Mr. Wm. H. Wild, Jersey City, N. J.; Mr. D. R. Anthony, Leavenworth, Kan.; Mr. F. C. Hand, Atlanta, Ga. Most of those who come will bring friends with them.

Last week I found nine coveys of chickens within a half mile of each other. On an eighteen-mile drive I scared up six coveys along the road. Quail are more plentiful than ever before, and November will be the grandest month for sport this section has ever seen.

C. P. HUBBARD.

### Some Eddying Oddities.

THE Portland *Argus* tells of a Maine genius who captures seals by hooking them. He takes a pole several feet in length, to which is attached a number of common codfish hooks with lanyards several feet in length. The hooks are baited with herring. This contrivance is anchored and buoyed, the hooks being just below the surface. The seals in swallowing the herring become hooked and are caught.

The steamer Henry Dumois, which arrived at Boston from Port Antonion, Jamaica, on July 13, 9 A. M., when about forty miles southeast of South Shoal Lightship, picked up a fisherman in a dory that had gone astray from his vessel. He had been sword-fishing and was towed several miles to sea by a swordfish, which he harpooned about 7 o'clock on the morning of the 12th. He was towed until dusk. He managed to hang on to the fish, which weighed about 300lbs., and on the arrival of the Dumois at Boston he disposed of it to the market men.—*New York Times.*

Asimus has on exhibition a monster bear trap, which is interesting on account of its proportions. Billy Clark and his father, who was then blacksmithing at Olympia, constructed it about twenty-five years ago for an Indian named Mowitch Man, who was unable to pay for it. Clark afterwards loaned it to a hunter named Tucker, who lived at the head of the bay, and there it has remained until recently, when Asimus learned of it and had it brought to Shelton. The trap is enlarged on the scale of the common steel trap, but is nearly 5ft. long, and is all one man can carry. Every part is made of heavy iron and the springs of the best steel, which makes the cost; the pedal is big enough for an elephant's foot and the trap strong enough to be used in trapping elephants.—*Shelton (Wash.) Journal.*

# Sea and River Fishing.

## DAYS AT MOOSEHEAD LAKE.

KINEO, Me., July 15.—*Editor Forest and Stream:* Since June 18, when I arrived here, fly-fishing has not been as good as usual. I am told it was good in May. But few trout are now being taken with fly in the lake. I have killed a few large brook trout with fly, but I have had to work hard for it. Much rain has fallen and the water in the lake is high. The weather has been cool, but on the whole pleasant. Lake trout, a very fine fish, have been taken lately in abundance. Fishing for lakers, as they are called, is usually done here in nearly the same places year after year. These places are near the hotel, near the middle of the lake, where the water is 50 to 60ft. deep. The fish are found on the hard bottom, or among rocks there. Drop lines and minnows are used. Their weight usually is from 2 to 4lbs. One was lately taken which weighed 13½lbs. Occasionally one may be taken very much heavier. On all pleasant days several small boats and canoes are seen anchored out engaged in this, the most usual way for guests to fish. A good many parties for camping out make their start from here. They usually go on further north, where lakes and streams and wilderness abound.

A party of six married couples from New York lately left here to camp on Indian Lake, some 60 miles north. They took with them 23 guides and 23 canoes. They are expected to return here not long hence.

Moosehead is a beautiful lake. It is the largest in Maine, near forty miles long north and south, and one to four miles wide, very irregular in its shape, and it appears to be about half filled up with islands and peninsulas. Its margin is everywhere covered with dense woods of dark wildwood green. Back of this margin are high ridges, and still back of these are knobs and quite high mountain tops, a dozen or more of these, of ornamental cone-like shape, may be seen at one view in every direction, except Mt. Kineo near the hotel masks the distant northern view. The lake is on high ground, a thousand feet or so above Portland, and lies about 150 miles north of that salt-water city. The lake has not that sunken look that lakes frequently have. This, to me, adds much to its beauty. The air here is very invigorating. The water is cold and good. The neat lawn around the hotel is now covered with the sweetest white clover. Dust and mud and hay fever are unknown here. So are roads and plowed fields.

The great original growth of pine in this part of Maine was mostly cut off forty to sixty years ago. Now much spruce and a dense growth of more than half grown Northern trees make the forests everywhere around as dense and wild as they ever were.

When the State of Maine was first invaded by speculators in pine, somewhere about fifty years ago, not a single deer, I am told by an old resident, could be found anywhere. A vast number of wolves had then kept them out or destroyed them. Soon afterward the State gave large bounties on dead wolves. The wolves soon disappeared entirely, with the aid (mainly) of poison applied to the carcass of a moose or the like. Now deer abound everywhere in the wild woods, by thousands and thousands and thousands. Dogs that can chase a deer are now not allowed by law, as you know. Dogs have not been seen by me in Maine. A gentleman, while camping out from here a few weeks last year saw and counted 104 deer. They appeared mostly at the water's edge for drink or for water protection from flies. Last week two small deer were taken (for taming) in the lake not far from this hotel. An angler for trout when a little way north of the hotel last week pushed his canoe so near to a swimming deer that (angler like) he cast for it, and hooked it, but he hooked it foul—by the tail—and it broke away, as trout often do (you know) when hooked foul by the tail. [This story was told by the angler's guide.] Some moose and some caribou are yet in the Maine woods. Much pains has been taken by Maine to preserve by law her game and fish. It may be stated (I think) that hunting and fishing in season in Maine are generally good.

At the water's edge only a score of rods over the lawn in front of my window stand three stately pine trees. They seem to have been left to live as samples of the original growth here or to show what good pine trees are, as some men are said to "live to show what good men are."

Only a short time ago, amid clouds and rain and thunder, lightning struck the top of the tallest one and ruthlessly made bare a large bleeding wound, reaching from its top all the way down its aged body to its very root. The "good man of the house" here feared it would pine away (no pun intended) and die. A few mornings since I saw from my window two fearless men in the very top of that pine. They were nearly hidden from my view by its dense foliage. I first saw a movement, and then I saw a man, and then another man there. I wondered and looked, and wondered more, not seeing any person about the tree or in that direction. I could not make out what it all meant. My first thought was of that thrilling historical event about an Indian in a pine tree top, which occurred near Saratoga long ago, and at about the same time and not far from the same locality (if I remember right) when that other thrilling historical event occurred connected with Jane McCrea. The Indian event was this: It was war time. An Indian enemy had hidden himself with his rifle during the night in the top of a large pine tree which overlooked his enemy's military fort. Shot after shot was faintly heard at long distance in the fort and at long intervals, when every time a soldier would fall. For a long time no one in the fort could tell where the bullets came from, but it was finally discovered that the Indian did the firing, when of course his time to fall came.

You will pardon me (I know, Mr. Editor) for alluding to this Indian story when I declare to you that ever since the time of my boy-reading, now long ago, I have never seen a lone pine with a large top anywhere in any of my travels but I have instantly thought of that Indian story. But I must also, as a truthful chronicler, declare to you now, that with the Indian story again youthfully in my mind, and seeing, too, that this pine directly overlooked my window, I was not frightened.

I went out to investigate.

The two men were silent but active, and carefully at work. They were near together. The lower man with a broad chisel was very carefully cleaning the wound, as if preparing for some other's treatment. The upper man, with a large pail on his arm and a large brush in his hand, was applying coat after coat of healing tar over the wound.

I watched their silent working for a long time as they slowly worked their way downward among the limbs until they reached the lowest one, which was yet near fifty feet from the ground, when they used a dangerous-looking ladder leading them to the ground. That venerable old pine now appears to be cured of its fearful stroke.

Shall we not soon have among us Doctors of Trees or Doctors of Lightning as professionals emanating from colleges? Who knows! And the good they might do! For here we see that two fearless, astute citizens of the Pine Tree State have used the best Southern blood of the pine of North Carolina to heal an elemental wound of its Northern kindred. N. M.

## MAINE TROUTING.

THE recent very high water has begun to fall in the New England trout and salmon lakes and streams, and the result is better fishing. Several reports speak of remarkably good fly-fishing in the Maine lakes since the water began to subside. Mr. J. A. French writes from the Upper Dam, Richardson Lake, that the fly-fishing for the past week has been the best for the season. Several of his guests have been having excellent success. Dr. Buckland and his wife have been taking from twenty to thirty trout a day in the pool below the dam. Good success is also reported from the Middle Dam. Mr. Edgar W. Curtis, of Meriden, Conn., has been having his usual good sport there. He is credited with a string of twenty-eight trout in a day, with one or two weighing 4lbs. and over. Mr. Curtis has long been a regular visitor to the same lake, and he is an expert fly-fisherman. The fact that he has taken trout always signifies that they were taken with the fly.

Reports of late have made His Excellency, Gov. Russell, of Massachusetts, go down to Maine fishing again, and he is located by gossip at the beautiful camps of the Messrs. Thayer—Birch Lodge—at the head of Richardson Lake. Well, the Governor did not tell everybody where he was going, and it is more than probable that he has really joined Mr. Joseph Jefferson, the renowned actor, and Mr. A. H. Wood, of Wood, Pollard & Co., at Mr. Jefferson's salmon preserve, on the Miramichi. Mr. Jefferson left Gray Gables, the summer home of ex-President Cleveland, last week for his salmon pool, with Mr. Pollard, and Mr. C. W. Walker, the celebrated scenic artist, as guest. It was also understood that the Governor was to accompany them. But His Excellency did not leave the State House till several days after.

Mr. Leroy S. Brown, of Blaney, Brown & Co., is a prominent member of the Inglewood Club, the extensive preserves of which are located in New Brunswick. Mr. Brown is much interested in the success of this club. He is a very active member of the house committee, having been secretary for several years. He left Boston last Wednesday evening for the home of the club. His wife is to accompany him on this trip, the club houses and privileges being open to ladies and children during July and August. Mr. Brown received a letter just before leaving Boston that there were some thirty guests at the club houses, and it bethought him that his attention might be desirable, and especially some ten or fifteen more were to follow him on Friday. The letter also so stated that a bear weighing 600lbs. had just been killed on the club's preserve.

Mr Eugene E. Patridge, of the North American Insurance Co., has gone bass fishing to Lake Annebessecook. (I am not at all sure about the spelling of this name.) It is the lake below the village of Winthrop, Me., and is perhaps better known as the Lower or Long Pond. Mr. Patridge is a part owner of the island in the lake, and he expects good sport.

That there is actually good trout fishing in the near vicinity of the celebrated Bar Harbor may be news to the many. But such is the case, to those who are fishermen and are acquainted with the locality. Mr. A. S. Haskell, of Waltham, Mass., with his friend "Skipper" Somes (everybody calls him Skipper or Skip), have been spending their vacation at Somesville, very near to Bar Harbor. Mr. Somes comes from Somes' Sound, or Somesville; in fact the place was named for his ancestors. His father kept a hotel there for years, and indeed I believe that his mother is there in the hotel to-day. At all events, Skip is a great lover of the rod and line, though he is now a machinist in the Waltham watch factories. He told his friends, when he left the Hub, that he should take some 4lb. trout, but they were inclined to laugh at him. On Saturday evening Mr. Al Tompkins, of the firm of Foster, Weeks & Co., received a dispatch that there would be a box of trout on the Bangor steamer for him on Sunday morning. Mr. Tompkins went to the steamer and the box was there, but the steamer people informed him that the box came by express and that they could not deliver it. The express people would not have an open office till Monday morning, and in the meantime the trout would not be growing any better. Mr. Tompkins told the officer in charge what was in the box, and he also added that the box he was going to take. After some palaver and taking of names he obtained the coveted box and took it home. It contained two trout that weighed about 4lbs. each and two that weighed 2lbs. each. Skipper had kept his word. The trout were laken in Long Pond, or a tributary of that pond, in Somesville. SPECIAL.

### Lake Champlain Fishing.

ALBANY, N. Y., July 20.—Fishing on Champlain at the present writing affords poor returns. The water is higher than ever before in the memory of the residents thereabouts, and so roily that the only places worth trying are the bays and setbacks. Even here only perch, rock bass and an occasional black bass are taken. The pike and pickerel are beyond the reach of spoon or fly among the weeds close to the banks. A party of us who had intended spending some days there returned after a couple of days' stay, convinced of the uselessness of remaining longer. Good sport is expected with the falling of the water, and parties contemplating a trip to the lake would do well to defer it until that time. NATURA.

## DOC.

WHAT rare fortune it is to meet a kindred spirit on your trip to the woods—one who loves nature and all her children and is as keen after sport as yourself, and who counts the day not a total failure if the game bag be light and the creel contains more ferns than fish. Such a one was Doc, and moreover Doc was a woman.

The first time I saw Doc—that is after she had been reconstructed, so to speak—he came walking into the dining room of a small house in a big wilderness in Pennsylvania. His curly head, which had a pronounced sunset tone, was covered by a little blue cap. Rubber boots, a black negligé shirt, and my pair of best Sunday trousers constituted his make up. He was rigged out for trouting on one of the wildest streams of the State, where the underbrush, drifts and tangles would discourage the average man before he had traveled 100yds. It was trying work for the aforesaid trousers, and it is safe to say that I selected the most open paths for them.

Ten minutes previous to Doc's appearance I had hung my offering of the trousers upon the doorknob of Miss ——'s bedroom. She desired to go trouting and skirts were simply out of the question on such a brook. I christened her Doc after a most beloved chum. How could I say Miss to a pair of trousers. So, with two lunches stowed away in the pockets of my hunting coat and an ample supply of worms, Doc and I started for the stream. I did not think Doc would stick to it long, and insisted on a very small lunch for myself. That's where I made a most serious mistake, as I discovered later. But at lunch time Doc caught me eyeing his piece of cake so wistfully, "just like a hungry dog," as he remarked afterward, that he insisted on dividing with me. How could I resist?

We slid into the brook from a bridge a mile below the house and fished for nearly two hours without a nibble. We floated worms 20 or 30ft. ahead under bushes, by the sides of half submerged logs, and let the strong black eddy at the head of drifts suck them under, but all to no purpose. Doc was making excellent progress for a beginner, much better than some men I have seen at the work, and developing an amount of patience and perseverance that really astonished me. Sometimes he waded the stream and again walked the bank, or at my suggestion (as I thought of those trousers) made a short detour to avoid the top of a fallen tree or a clump of thick bushes. Once when my line got badly tangled on a limb Doc heard me running the scale on a few choice cuss words that I use only on that particular stream, and wanted to know what I was saying. "Nothing much," said I, "it's only a habit I have of talking to myself." But Doc, who had met with much of the same aggravating experience, smiled sympathetically, as though he had himself felt the need of something a trifle stronger than "goodness gracious."

My first fish was a pickerel. I promptly broke his neck and threw him away. They have a wonderful appetite for young trout. A few yards further down I took a trout, and then two more before we reached the clearing. Doc's head began to ache and I was afraid he would say "let's play something else" if he didn't catch a trout very soon. At the edge of the meadow I selected a likely spot and told Doc to run his line through it. He did so and pulled out a fish in short order. As he sat admiring his first wild trout, with such thoughts as any old fisherman can recall, I asked about the headache. "It is much better," says Doc, and so it was. It was not the first ache a fish or head of game has cured. Another trout soon fell a victim to Doc's rod, who was improving with success, but no more until we reached the end of the meadow, where he missed a nice one that rushed out from under a log, by pulling too quick.

We stopped in the edge of the woods and partook of lunch seated upon the trunk of a fallen tree. After lunch Doc walked back to try again for the one under the log, but could not induce him to take hold. Here was where I made my only bad break. I pulled out a little rainbow trout about 3in. long, and wishing to show it to my companion before returning it to the water, I called out, "Look here, Miss ——, I've caught a rainbow." Just at that moment a woman walked down from a barn above the bank, and from the sharp glance she bestowed on Doc I knew she smelled a mouse. But what cared we.

Before we quit Doc caught two more trout and I took one—just four apiece—making our total eight. Not a record-breaking event by any means, but Doc had obtained the experience he sought and we were not returning empty handed. On the way home I stopped at a bridge, saying I thought there was a trout under it, just to test Doc's gameness. He promptly demanded bait and began fishing. It was a hot day and we had been out nearly five hours tramping over the roughest kind of ground, so you must not wonder that I felt inclined to slap Doc on the back and say "Good boy." The experiment had proved a brilliant success all around. Doc was charmed with his outfit, and several times that day had I noted the smile of triumph light up his face as he straddled the trunk of some fallen tree, or rested for a moment upon the top rail of a fence, just like a sure enough man.

Trouting was not the only fishing Doc and I tried. We wet many a line together after the black bass in the lake near by, and some right interesting arguments we had with that noble fish. On these occasions Doc wore skirts, and it was always Miss —— from me, except in moments of intense excitement, as when a bass was doing the circus act on the other end of the line. However, I shall continue to call her Doc on paper, and when she reads this issue of FOREST AND STREAM I shall be too far out of the woods to be snubbed for my temerity.

Doc was a very fair hand at the paddle and could lay as straight a course as any man, provided the wind was not too strong, and could do good casting with the minnow, both accomplishments having been acquired during her stay at the lake this summer.

Even as late as the middle of July, spinning or casting with shiners was more effective than any other method. We tried trolling and still-fishing with shiners, sunfish, perch and frogs, but with poor success. We made a rule of these strikes and out, or one fish and out; that is, the fellow who got three strikes in succession, or boated one fish, whatever size, species or previous condition, had to yield up the rod and do the paddling. Often it was an 8 or 10-inch bass or a perch or small pickerel that made a fellow sit down just when some favorite spot was almost within reach. In such an emergency I have known Doc, I am pained to say, to be mighty slow in taking up slack line on a small bass. Every bass under 10in. was thrown back unless too badly injured.

One afternoon while fishing a piece of the lake where we seldom struck anything but pickerel, Doc landed his shiner within a foot or two of the shore and right alongside of a bunch of grass. The minnow had scarcely touched the water before a bass grabbed it with a rush that meant business. He made a break toward the boat for deep water and I yelled to Doc to take in the slack. Out of the water he came with a shake of his head that sent the spray flying and made me groan, for I expected to see the rod straighten up when he fell back. But no, down he went, and the rod curved and bent until Doc cried out, "Oh! it will break: I know it will." It was a light fly-rod and Doc was hanging on with both hands, but I knew its quality and feared not. Out he came again with another spiteful shake and then a dive that took more line. Doc began to recover some of the line and at the third break I was feeling that we had a mortgage on him. A few more curves and twists and his broad sides were showing, a sure sign of distress. The net was soon under him and he was safe in the boat. Doc sat down and chewed furiously on his wad of gum, actually too happy to speak. I weighed him by the "eye scales" for at least two pounds, and was very much surprised when reaching the house to find that one and three-quarters was his exact weight.

On another occasion Doc fastened to a bass, and at the same moment a red ant made his debut on the end of Doc's nose and started up to investigate her bangs. Examine a red ant and you will observe that he has very small feet, but when one is walking over your nose it feels as though he wore No. 13 shoes filled with spikes. Both of Doc's hands were on the rod. She would make a claw at the ant and the bass would pull down her hands. Another claw that fell short by half an inch, and then Doc tried to wobble her nose, but it was such a small nose that it wouldn't wobble, and the ant fell off after biting her under the starboard bang. Doc was not one of your summer girls, else I should have had to fish that rod out of the bottom of the lake. What's more she landed that bass and then squelched me for daring to laugh.

CHAINED to Business? Can't Go Fishing? Make the Best of it. Read FOREST AND STREAM.

## EXPERIENCE WITH RAINBOW TROUT.

I HAVE previously mentioned some points of interest in regard to the so-called California or rainbow trout, but now, after six years' experience with these fish, I am in a position to say with some positiveness what may be of special interest to the readers of FOREST AND STREAM.

Six years ago I procured some fingerlings from the U. S. Fish Commission, and planted a hundred, all the survivors of a thousand which were sent to me, at Highlands, N. C. This locality is the highest inhabited locality east of the Rocky Mountains, and its climate and its abundant cold, sparkling water that pours down the mountain sides, renders it a most favorable home for the trout. The common brook trout has existed abundantly there for many years, some of the natives say they were always there, and others say the streams were stocked artificially. This may be so, for all the water that flows from the mountains goes either to the Gulf of Mexico or to the Atlantic below Cape Hatteras. The rainbow trout therefore had a good chance to show all their best qualities.

The fingerlings were put in the water in one of my ponds near Highlands in the summer of 1885. The next spring one was taken 10in long, and he made a gallant struggle for his freedom. He was at once returned to the water. But I heard of others being taken by poachers and sold in the village that summer, half a pound weight. The next year one of 2lbs. was taken and garnished the table. I need not describe its beauty, or its gameful resistance to capture, but only say that its flesh was all that could be wished by the piscatorial epicure. The color of it is a deep red, almost as deep as that of the salmon when fresh from the water. It is firm, and full of flavor equal to the best brook trout.

The next year one was hooked by a young lady in one of my ponds, in which it was placed three years before. There was an exciting battle between the lady and the fish, in which the issue was very doubtful for some time. But the fish was landed, and coming loose from the book, the fight was renewed on land for fifteen minutes longer, before the biggest fish ever taken in North Carolina waters was finally secured. The lady was, of course, as all young ladies are now, an amateur photographer, and transferred the fish and her own intensely pleased countenance to a film, a copy of which is laid before the editor in proof that it (the fish, not the countenance) was 22in. long and weighed over 3lbs. The lady's name is not Victoria, although her face has a victorious expression.

The same year other fish were taken down the river, where they had migrated from the pond and stocked another pond five miles lower down, but as the lower pond also belongs to me I was able to protect the fish to some extent. But a large number were taken from the stream by poachers in spite of all my efforts. Some of the original one hundred, however, still remain, probably more than half of them, and it is probable will remain, for those who have been hooked smash the tackle, and showing their tails insultingly, leave the fisherman without saying good bye. Some of my friends who have experienced this bitter disappointment aver that the fish are over 3ft. long and must weigh at least 7lbs., which is quite a reasonable conclusion considering the early growth which is safely known. The big fish are mostly in the deep holes under the waterfalls or between the rocks, or in the deepest parts of the ponds. The increase is enormous. In the early summer the little shallow pools near the banks of the stream are black with the young fish, and many fish of a pound, or two pounds, and less, are taken. They breed well and grow fast, and are more gamy than the common *fontinalis*.

I have the best reasons to believe that the two breeds have met and crossed. Three years ago I saw a male rainbow on a spawning bed with the brook trout, and his pugnacity against the waiting brook males was ridiculous. When one of these approached, its rival darted at it and drove it off, and like a flash returned to his duty again. I saw him two days in succession, and since then some fish having every appearance of being hybrids have been taken. The iridescent scales are plain upon them as is also the darker back, but they are not pure rainbows. Last year I tried to get a specimen for examination, but

failed, the first that is taken however will be sent to the FOREST AND STREAM to settle this interesting point.

From the foregoing it will appear very conclusively that this fish is a valuable addition to our Eastern waters, and that it will live peaceably, and perhaps usefully, with the native kind. I have never seen any indication that it preys on his relations, but one I saw take a good sized frog, as it jumped off a limb as I was slowly drifting down stream, and disturbed the frog's meditations. The fish met it in mid air, springing out of the water, and going under with a splash that indicated a large fish. It takes the water newts, crawfish and rises at a fly as freely as the common trout. The white miller in the evening when the shades are getting too dark to see anything, is the most killing bait, and the most prolific time for this fish. HENRY STEWART.

HIGHLANDS PARK, N. C.

## SALE OF TROUT IN CLOSE SEASON.

*Editor Forest and Stream:*

I notice in your issue of June 30 that Mr. A. N. Cheney says that I fix the spawning time for trout. I was not aware that I was endowed with supernatural power, so as to cause trout to spawn at my command. I notice he has found a place way up on the boundary line of Canada where trout are spawning as late as Dec. 23, eight days later than my date of the closing of the spawning season. He does not say whether there was any ripe male trout to fertilize the eggs, a very important subject to be considered in trout raising. Every trout raiser has probably experienced the difficulty of finding ripe males enough to fertilize the eggs taken the latter part of the spawning season, and for this season we are often compelled to stop taking eggs even while there are many ripe females yet to spawn. It is also well known that these very late eggs are of poor quality and hardly worth taking. My statement that trout are through spawning in New England and southeastern New York on Dec. 15 is practically correct, and is only owing to some abnormal condition that a few individual trout spawn after that time.

I think that the trout culturists who take millions of trout eggs annually ought to know as much about the spawning season as guides, whose only experience has been in catching trout, and know nothing about their habits. I will say, however, that my neighbor, Mr. Nath. Hoxie, was at the Parmachenee Lakes one year in September, and found trout on their spawning beds in great numbers at that time, which goes far to corroborate my statement. I am aware that the trout in Caledonia Creek spawn in January and February, and even into early March, but Caledonia Creek is in Western New York, while I confined my statement to New England and southeastern New York. I am also aware that the European brown trout spawn in December and January, but there are none of them to my knowledge in any public waters of this State. I imported the first lot of brown trout eggs in this country in January, 1881, and I now have them of all sizes from the fry up to 7lbs. in weight.

Mr. Livingston Stone in his work ("Domesticated Trout") says his trout begin to spawn Oct. 12 and finish the first week in December. Mr. E. B. Hodge, superintendent of the Plymouth, N. H., hatchery, says some of his trout spawned last year in July and August, but as there were no ripe males the eggs were lost. He says the first eggs were placed in the hatchery Sept. 3 and on Dec. 1 there were over 1,000,000 eggs laid down, and as that was about the extent of his taking we must conclude the spawning season was practically over at that time. On Nov. 24, 1874, I received 75,000 eyed brook trout eggs from Moosehead Lake, Maine, and to be eyed they must have been taken at least four weeks. The trout in Mr. J. W. Hoxie's ponds, at Carolina, R. I., are all through spawning early in December, also Mr. Furman's, at Maspeth, L. I. My trout begin to spawn about Oct. 20 and are all through before Dec. 15. I think with all this testimony it must be accepted that the spawning season is practically over by Dec. 15. Col. Theodore Lyman is authority for the statement that trout are done spawning in Marshpee River, Cape Cod, on Dec. 1.

It is evidently the intention of some few sportsmen to prejudice the public against the trout raisers as trying to destroy trout, when they are actually doing more toward stocking the streams than all the sportsmen in the country (the Old Colony trout ponds alone having furnished nearly 10,000,000 eggs and young fry for this purpose since 1881) and are as much interested in the passage and enforcement of laws for the protection of trout during the spawning season and development of eggs. The trout raiser could not be induced to sell his trout at such times. It would be like killing the goose that lays the golden egg. He does, however, want to sell his trout for food as soon as they can be brought into a good condition after the spawning season has passed, and no good reason has been advanced why it should not be done. The ever increasing demand for fish, consequent upon the increasing population and increased facilities for transportation is such that the time is not far distant when artificial culture must be resorted to. Nature is doing her best, but she cannot long stand the drain which is upon her without assistance. China has long since recognized this necessity, and fishculture is there carried on so extensively that the late Mr. Burlingame once stated that we had much to learn of those so-called barbarians, and among other things the cultivation of fish; that in China an acre of water is many times more productive than an acre of land.

Therefore, the best interests of the country demand that trout culture should be encouraged, and all legislation should be to promote rather than to cripple the industry. It will come in its own good time. The people only need to be educated on this subject and they will demand it. Then will trout culture receive its rights, the business be stimulated to a great extent, a food product of the highest class furnished in large quantities and at a season when most needed. W. L. GILBERT.

PLYMOUTH, July 23.

### Anglers' Association of the St. Lawrence.

THE ninth annual meeting of the Anglers' Association of the St. Lawrence will be held at the Hubbard House, Clayton, N. Y., Aug. 3.

## POTOMAC NOTES.

WASHINGTON CITY anglers can now rejoice, and the knowing ones are all smiles. Fishing is good in every direction; fresh water, brackish water and salt water is giving up its inhabitants in great shape, and from the source of the Potomac to Norfolk, Va., and line fishing is extra good. In the bay, trout (weakfish) weighing from 1 to 6lbs. are caught in good numbers; about Fortress Monroe the fishing is exceptionally good. Bluefish, trout, sheepshead and tautog or blackfish are taken in quantity. H. C. Huggett, of Messick, York county, Va., has been very successful taking sheepshead and "chub" (what do you think of the name chub for blackfish or tautog), and it just puts one on needles to be there fishing. This place is about eight miles above the fort. Very few rods are to be seen on Chesapeake Bay; hand-line fishing is the rule. Mannanose clams are the principal bait, of course shedder crabs are choice, but the fishermen say they are too easily lost off the hooks.

One is never through learning; they call the blackfish chub, the black or gray drumfish sage drum or pale drum, the large-mouthed black bass in the fresh waters chub or mill-pond chub, the menhaden ol'wiv, the weakfish plain trout, the bluefish taylor or snapping mackerel, and what startled me most was to hear that the old Virginia name for the pompano is "sunfish." Some very fine pompano and lots of Spanish mackerel are taken in the bay, but they are seldom hooked. A pretty large fleet of fishing smacks are in the bay after bluefish for the New York market. They are taking rather small-sized fish, about 2½lbs. each, and during the middle of the month fish were a little scarce. Five thousand fish are considered a good fare, so the half dozen men to each smack have plenty of fishing, as it is all done with hook and line. The fish are kept in the well during the fishing and then packed away in barrels of ice and so preserved fresh until the boat reaches New York. A trip is made in from two to three weeks.

The black bass fishing in the Potomac and its tributaries is improving daily. Mr. Frank Libby has just returned from the South Branch and he is all over enthusiasm about the fine fishing at Wappocomo, Hampshire county, West Virginia, where Mrs. C. C. Parsons acted as hostess in a most satisfactory manner. John Bush is a guide at this point and a good one. The usual black bass baits were used, but the very best bait is the grasshopper; more large fish are taken there with the grasshopper than with any other. Mr. Libby had sixteen days of clear water and says that the fishing is the easiest he has ever come across. All done from boats; expenses of living and fishing merely nominal. Quite a number of clubs resort yearly to the South Branch. Mr. F. F. Davidson, Dr. McCann, Dr. King and Dr. Lang, all of Pittsburgh, Pa., were found there in July.

The Mignon Club of Washington will have the following members on the Potomac for two weeks: Tauber Schmidt (the well known woman-hater), A. Stanley, J. Brockingier, C. Mills, F. Schafhirt and C. Zange. These gentleman intend to camp out at different points along the river from Point of Rocks to Seneca or the Great Falls, leaving here Aug. 15. Myron A. is a very busy man nowadays—he keeps a tackle store. BON.

WASHINGTON, D. C., July 25.

## PLANTING SALMON AND TRAPPING BEARS.

LOWELL, Me.—I have just finished transporting and planting landlocked salmon at Nicatowas Lakes. Those fish were hatched at Enfield, in charge of A. J. Darling, and he estimated the amount that I had taken away from the hatchery to be 100,000. I put some of them in the stream at the foot of the falls. There were some good-sized rocks where I put them in, and a slime had collected on the rocks: and soon as the little fish were turned in some of them commenced to feed on the slime that had gathered on the rocks. I took one of them in my hand that was feeding and put him in a foot from the rock, and he darted for the rock again. I remember some few years ago watching some pollywogs feeding on slime or a substance that had collected on the sticks that were under water, and those little salmon reminded me of the young bullfrogs. Those small fish when being transported require a great deal of care. It does not do to let them stop on the road without keeping the water in motion to let in the fresh air, and the water must be kept the right temperature.

I had a young lad to help me beside the teamster. We had to make two trips from Enfield to the lake, and a shift of horses so to keep them moving. The last load to the lake I took six cans of them to the head of the lake, some eight miles to the inlet from Gasabeas Lake. I had a large canoe. The cans would weigh some 200lbs. each. I put the teamster in the bow to help me paddle, and the boy to keep taking out water from the cans and pouring in fresh water. A head wind sprang up and there was quite a heavy sea at times, but I worked along the shore until near the head of the lake, then we had to cross in a side wind, and occasionally a sea would break in. The boy of 14 years would look up to me and say, "I can't swim." I could tell about what the canoe could stand, and I intended if it looked to me dangerous to pour the water and fish into the lake; but we reached the inlet all right and put our young fry overboard and returned to the foot of the lake.

There was a party of fishermen there who had caught five nice ones, averaging 3lbs. Another party camping a short distance away that were said to be salting trout and salmon, and they are professors of high standing, too.

It has been but six years since the first young salmon were put into these waters and they have had good success with their own spawn, as many young yearlings have been seen to go through the dam to the lake this season; and it now looks as though this is going to be one of the best fishing resorts in Maine. It always has been good trout and white perch fishing.

The next morning we loaded the cans on the team and the boy and myself went down the stream, to the head of the falls and then to join the team again. On our way we saw a large doe feeding on the meadow. We got quite near her before she saw us. Then she gave a snort and bounded to the woods, and then halted and kept up the blowing until we were out of hearing. She had fawn without any doubt. When doe leaves its fawn and goes to the water or meadows to feed it is more attentive to feeding than other deer that have no young, and is not on the lookout half as sharp as are the bucks.

I had a trap set for bears near the head of the falls and we landed to look at it. The boy suddenly stopped and said, "Hark, I thought I heard a chain rattle." And sure he did. Bruin was in the trap sure and fast, and had been in but a short time. The log that the trap was fastened to had brought up on his first start; and he was digging and biting fearfully. I had no gun and I looked the business over and found that he could not get away or reach me if I did not get too near. I got a club about six feet long and two inches in diameter, and as I advanced on him he backed between two trees as far as the trap would let him. When I struck at him he dodged his head to one side and back, and I missed him. The boy laughed and remembered that the bear understood boxing. I then made several false motions and gave him one blow which felled him. I thought he might come to again and I took my knife and bled him.

We set the trap again and carried the bear to the road to join the team. We put the bear by the side of the road. The teamster had a very saucy dog with him and he came in advance of the team. I told the boy to watch the dog. When the dog got scent of the bear he wheeled as quickly as his legs could turn him and dropped his tail. Most dogs will give a bear a wide berth.

I had the bad luck to lose a bear in another trap; he had been in about a week and died and spoiled.

J. DARLING.

## ANGLING IN CANADA.

SINCE the date of my last letter several other parties of anglers have returned from the salmon streams. The largest fish reported to have been taken this season was a beauty of 53lbs, killed a week or two back on the Cascapedia by the Hon. Victor Stanley, a son of the Governor-General of Canada. This magnificent trophy was sent by the fortunate angler to his messmates, of H. M. S. Canada, upon which he is a lieutenant. With two exceptions the north shore salmon streams have yielded but little luck to anglers this season. Messrs. J. L. Pike, of New York, and J. G. Creamer, and F. S. Hodges, of Boston, however, enjoyed splendid sport on the Natashquan and left for home yesterday. The fishing on the Moisie has, too, been an exception to the general rule. It has been fished from the middle of June by Messrs. D. G. Yates, B. P. Moulton, Dr. F. H. Getchell and E. P. Borden, of Philadelphia, who arrived upon Sunday. The fishing only commenced to be good about June 24, and few fish were taken after July 9. Between these dates the above mentioned party killed 305 fish, averaging 22.71lbs. Mr. Yates was the most successful of the party, killing 94 salmon, which weighed 2,154½lbs., the largest turning the scales at 37lbs. Mr. Yates has come to the conclusion that it is the 25lbs. salmon that makes the gamest fight.

On the Trinity, the Mingan and the Marguerite, the fishing has so far been exceedingly indifferent.

Far less uncertainty has so far attended the fishing of our inland waters. Among ouananiche fishermen the season of 1892 promises to be long remembered as the most successful that has been experienced since the opening of the Lake St. John region to civilization by the construction of the Quebec and Lake St. John railway. This is doubtless due in some measure to the precautions taken during the last few years for the preservation of the fish, and to the prohibition of netting. But there is also a noted change in the manners and habitat of many of the fish at the Grande Discharge this season. A fortnight ago I mentioned the fact that the fish were exceedingly plentiful in Mr. Griffith's waters, and that in order to take them in the hotel preserves, it would probably be necessary to descend below Scott's Camp. But whether it be due to the higher water than usual or otherwise, certain it is that in addition to their ordinary haunts at this season of the year, the ouananiche are remaining in large numbers in and about the immediate outlet of the lake itself, above the first of the rapids of the Discharge and between and among the first small islands at the narrowing of the lake. Some excellent fishing has been done there by Captain and Lady Cecilia Rose of London, who are indefinitely prolonging their stay at the lake, by Dr. Lundy of Philadelphia and by Eugene McCarthy of Syracuse. The two latter mentioned gentlemen have also been working great havoc among the trout in the streams flowing into Lake St. John. In both the headquarters of the Ouiatchouaniche, which flows into the lake from the west, and in the Ouiatchouan, between the falls and Lake Bouchette, they managed to take nearly 200 fish in a day, the average weight being from ¾lb. to 1½lbs., though several fish were taken between 2 and 3lbs. each.

Some of the largest red trout, outside of a few from Lake Edward, that have been brought to town this season, come from the preserves of the Montmorency Fish and Game Club. Dr. Ivers brought to town yesterday, as the result of two days' fishing, a trout weighing 4¾lbs., one of 3¾lbs., two of 3¼lbs., two of 3lbs., one of 2¾lbs., two of 2½lbs., two of 2lbs., and two of 1½lbs. Besides these he claims to have returned to the water nearly fifty fish weighing 1lb. each and under. I hope soon to be in a position to speak more fully of the fishing in the Montmorency River. E. T. D. CHAMBERS.

QUEBEC CITY, July 20.

### The Bluefish.

NEW YORK, July 25.—Bluefishing seems to be the best at the present time off Sandy Hook. We followed them last week from Perth Amboy, where we caught a large number; and on Saturday, July 23, Mr. Frank Dawson, our boatman, engaged Capt. Walter's sloop Metgser, of Perth Amboy. We started at 6 A. M. and anchored off Sandy Hook about 12 o'clock, after a tedious drift more than half way. We started fishing with shedder crabs for bait, and soon discovered it was absolutely necessary to have bunkers. We hailed a dory fisherman and purchased for $2.50 all the bunkers he had, which gave to us just three-quarters of a pail of chum. We used this in one and one-half hours' time and catching twenty of the largest and most gamy bluefish that ever we caught. We were anchored part of the time about 400ft. east of the Southwest Spit.

Mr. Wm. Pitman, Mr. Wm. Barnett and myself never fish for bluefish except with rod and reel, and from the way we are questioned by fishermen we are led to believe that it is considered a new departure. I should advise al-

to try it and see for themselves and stick to the way by which they can receive the most enjoyment. I do not deny one can catch more fish in the usual way, but to take one of these bulldogs with a long line out gives to one the genuine sensation of having a fish on one end and a fisherman at the other end.

I do wish our brother sportsmen would write more frequently to the FOREST AND STREAM telling us of their fishing trips; in this way we could locate where the fish are. H. C. W.

## ANGLING NOTES.

IF one should ask where the greatest variety of game fishes could be found in water that is open to the general public for fishing I should say in Sunapee Lake, New Hampshire, for of all the waters of the globe there is none to equal it in this respect. There are Sunapee trout or saibling, landlocked salmon, common brook trout, Loch Leven trout and black bass. Smelt are also found in abundance, and rainbow trout and blue-black trout have been planted. The best season for angling is soon after the ice goes out and when the salmon tribe is at the surface where they will take a fly, but the fishing is good now. An extract from a letter from Prof. J. D. Quackenbos will give an idea of the fishing: "Bickford" (this is Sidney Bickford, the artist, who has painted the best picture of the Sunapee trout that I ever saw, and I am very glad to say that it hangs on my wall, a present from Prof. Quackenbos) "caught a 9lb. salmon on his hand line yesterday off the banks; on Wednesday I took Prof. Dunning, a green hand with a greenheart, over to Hedge Hog; he had three bites on his greenheart, lost the first fish, then killed a 2¼lbs. *alpinus*, and then one of a pound. We had the refrigerator full of usual small fry at night. Two salmon were lost on smelt lines that afternoon. Jake Hutchinson was pulling in an immature trout when a monster salmon grabbed it and leaped from the water with a splash that turned everybody in that direction. But that was the last of him. I went out for the first time with Payn, my tip went down with a snap, and I hooked and killed a 3½-pound *alpinus*, which Payn netted with consummate skill. I longed for your presence that you might see the glory of his symmetry and July coloration. Large black bass nose around our pier; but since these disturbances in the weather, accompanied with a rise of some 8in. in the water of the lake, the bass have in the main left the shores and the fly-fishing for the moment is over." In explanation of the catching of salmon on smelt lines I may say that hand lines with small hooks baited with worms are used to catch smelt for the purpose of baiting the rod lines for salmon and trout, and the smelt fishing is done where salmon are found, so that it sometimes happens that after a smelt is hooked a salmon takes it instead of waiting until it is prepared for him on the rod. While smelt are most desirable for bait, I saw a salmon of 14¾lbs. caught at Sunapee last year on a common minnow or chub. Any one desiring a small map of Sunapee Lake, the pamphlet containing it also containing reproductions of Sunapee trout and black bass by Bickford, can obtain it at the expense of a postage stamp by writing to F. H. Davis, New London, N. H.

Of the salmon fishing in New Brunswick Mr. John Mowatt, of Campbellton, writes: "This has, on the whole, been a fair angling season on the Restigouche, and fully as good on the lower as on the upper waters. The reason of this is not far to seek. The early fish rise well, the rods are numerous and they have the first chance at the fish. Consequently so many rising salmon do not reach the head-waters as usual. Twenty years ago a salmon was not looked for until you got away up about 30 miles, and the famous pools of Indian House, Cross Point, Patapedia, Red Bank, Devil's Half-Acre and others were supposed to be *ne plus ultra*. Now the first 20 or 30 miles of water is equal to the best of them, particularly in the month of June. The catches run from 30 to, say 70 fish, for parties of two and three rods, and some single scores of 30 to 32 fish. I hear of no single rod that has done as well as our mutual friend, Mr. Archibald Mitchell. Many anglers have left for home and others have taken their places, but unless good rains come to freshen the waters the best of the season is past, as July is hot, unpleasant, and mosquitoes, black flies and midges rule the roost. From all I can hear none of the Bay Chaleur rivers have come up to the Restigouche. The Big Cascapedia brags of a 53½lb. fish, and our largest is 45½lbs.

In Answers to Correspondents you say the largest small-mouth on record is Boynton's bass of 8lbs. 10oz. That was the largest at the time, but last year one of 10lbs. was taken from Glen Lake. When I weighed it the fish weighed 9¼lbs., but when first taken it weighed ¾lb. more. A. N. CHENEY.

### State Stocking of Private Waters.

A correspondent asks why the *Telegram* does not condemn the posting of private lands under the game laws, it having condemned the stocking of private waters in this and other States and in foreign countries with fish fry hatched and reared at the expense of the State. The answer is a simple one. Private lands, woods, are stocked by private expense, and the State does not contribute one cent to that end. If private clubs, the same as the Monroe County Sportsmen's Association, at large expense, import quail and other game birds, they are justified in inducing farmers and owners of property to post their lands for the purpose of furthering the objects of the clubs. But the State is out of its legitimate sphere when it expends money to raise fish fry to stock private streams and premises, which are closed at all times to the public. That this has been done to a great extent is true. Under the present system of fish propagation and fish food supply, we cannot see that the public is greatly benefitted. The public waters stocked are netted to such an extent that the efforts of the State are nugatory. Several inland bodies of water have been stocked so that the line fishing was good at one time. But poachers and netters soon despoiled the waters, and the money expended went to support the pirates. The stocking of Lake Ontario and other great lakes with whitefish by the United States Government is a feasible project, one that would yield great benefit to the people, and these efforts should have the encouragement and assistance of the State of New York. It is an open question whether our fish commission is not a political junketing body, and of no earthly use or benefit to the people.—*Elmira Telegram.*

# Fisheulture.

## REARING FISH FOR DISTRIBUTION.

*Editor Forest and Stream:*

I wish to thank you for publishing my paper on "Planting Fry or Yearlings," in your issue of July 21. You have been so unjust to our side that we are glad to have you present one of our arguments in favor of fry. In your issue of July 14 you treat the question as if I was one lone crank, by saying that you wished "merely to show how an earnest but prejudiced advocate of a certain disappointing system of stocking may let his fancy outrun his judgment," etc.

True, I am earnest and perhaps prejudiced, but I do not know of a single State Fish Commission that is not of my opinion, hence the injustice of your remark. The system of fry planting is not disappointing, but is perfectly satisfactory to Michigan, Pennsylvania, Wisconsin and New York, the States that do the most trout planting.

I cannot go over my arguments again, and will only say it is a strange thing that our side should be expected to prove our position. A new theory is advanced and the burden of proof should rest on those who advance it.

Evidently Mr. Page did not have a copy of my paper when he wrote on the subject, for I leave out railway fares, and counting time of men and hotel bills the expense of planting yearlings is greater than their alleged worth. Who can say that the loss of fry in suitable streams so far exceeds the loss on artificial food as to make a yearling worth a large number of fry? Two of the gentlemen quoted by Mr. Page have long been connected with the South Side Sportsmen's Club of Long Island, and have raised many millions of trout, but for their own ponds mainly, and have not sent men on long journeys with yearlings, and therefore they come within the list of those with whom Mr. Page sympathizes.

My old angling friend, Mr. D. H. Fitzhugh, of Bay City, Mich., who has helped plant thousands of trout in years past, writes me as follows: "I have noticed your articles *in re* planting fry *vs.* more mature fish, and from our experience most heartily agree with you. Our State Commission, which has always been the most able one, has planted millions of fry, and now there is hardly a stream in the State which is suitable for trout that does not furnish good fishing. About six years ago I sent Babbit, whom you remember as one of our best guides (now, alas! in heaven) 5,000 fry from the commission, which were quietly placed in a stream which has not since been generally known to contain trout. I was on that stream five days ago, and it swarms with trout. In a few hours I took 86 fish going down a few miles, and I understand that the whole stream, about 30 miles long, gives as good a showing."

My time does not permit me, nor does inclination incline to further discussion of this subject at present, and only on account of what I consider to be a slighting of our side of the question and an assumption that the assertions of the yearling men are correct and that they are a majority of practical fishculturists, which is not true, I have been forced to intrude. The very able article by Hon. Herschel Whitaker, President of the Michigan Fish Commission, would, if published in your columns, give another view of our side, to which in all fairness we are entitled. FRED MATHER.

## THE LAKE ONTARIO WHITEFISH SUPPLY.

*Editor Forest and Stream:*

Your journal deserves credit for its efforts in arousing public sentiment for better laws to protect game birds and fish, but I would suggest a larger and more useful field for your efforts, food fish.

I am one of the very large majority of wage-earners (with a fair-sized family to support) who only once in a while can afford to knock off and go fishing. Of course, I get the recreation and possibly a mess of fish, but the cost of the latter comes pretty high. Now our State, I find, by the published reports, is expending nearly $40,000 yearly on the fish business, and I have been trying to make out how I derive any benefit from this large expenditure. This money seems to be wholly spent on trout, a fish that I have never seen and could not catch even if I had the time, for nearly all trout streams are now under control of wealthy individuals or clubs, and the few that reach the market sell at 75 cents a pound, which is beyond my reech, so that I must, for my family use, depend on the public fish market for fish diet. We are all fond of fresh fish and would like to have them twice or three times a week, but I find that good fish, and in fact all fish, have of late years gone up in price, so that it is, as a matter of sustenance, more costly than meat.

Whitefish now cost a shilling a pound, and as they come from Canada and Michigan they are seldom ever fresh—not in the least like our old time Lake Ontario whitefish. Why, I can remember, only a few years ago, when this fine fish, caught the night before, was brought to our very door and sold at five cents per pound. A great many people along the shore of Lake Ontario made a good living catching and peddling these fish; now there is no such industry and we poor people have to pay almost triple for the same fish, of a poorer quality.

Why should the Commissioners of the State of New York, with lots of the people's money, allow such a state of things to exist? Why have they not protected and fostered the fishing interest of Lake Ontario, instead of devoting their entire attention and expenditures to the raising of fish for the few rich to enjoy exclusively, while the poor man's fish have been entirely neglected?

Will you kindly take an interest in this matter? You may, if you wish, publish this, for possibly it may provoke a reply from the commissioners or their friends; they may have a good defense, and if so I would like to hear it.

A WORKINGMAN OF WESTERN NEW YORK.

### Chained to Business?

Can't go fishing? Make the best of it. Read FOREST AND STREAM.

Among the many enterprises in southwest Missouri there are probably none that attract more attention than does the snake farm located three-fourths of a mile due west of Chadwick. The farm proper consists of about five acres, half inclosed by a natural stone wall or a ledge. On one side of this inclosure is a natural rock cave, and out of this cave runs an everlasting stream of the purest water. This spring being on the highest spot of land on the farm, it is easily conveyed to all places where needed. Mr. Childs, the owner, has been dealing in snakes and manufacturing rattlesnake oil for over ten years and finds it quite profitable, as he supplies all species of snakes for exhibition purposes, all kinds of snake curiosities, rattlesnake oil to the drug trade and charges an admission fee of ten cents to all visitors who come to the farm. He is now fixing up the place for the summer trade, and will have large pens built for the snakes with a living pond of water in each one, and a platform on the outside where visitors may stand out of danger looking at the hundred different species, all in their natural state, eating, drinking, playing, swimming, fighting, sleeping, etc. Mr. Childs also proposes to pay cash for all live snakes of any species measuring over 3ft. in length. He proposes to ship all the snakes out of this part of the country and bring back cash in their stead.—*Ozark (Mo.) News.*

# The Kennel.

## REPORTERS, CRITICS, ETC.

*Editor Forest and Stream:*

The communication of "Observer" in your number for July 7 must have met with general approval, and the hot weather must alone explain why no one has written to support the position take by this writer. Lest, however, he shoul feel that he is alone in his opinions I wish to state that I have thought much as "Observer" has for a long time.

I think the judges' report in full would give more satisfaction to readers of all classes than any other, and it would probably be a popular thing for the journals to have the judges to write such a report, which might be furnished to all the papers, when the expense to each would be light, while the remuneration to the judge for his labor, which is not pleasant to all, would be considerable.

A judge who has to write a report is more likely to be careful and examine his dogs well.

The work of the critic might then be confined in pointing out those details in which he differs from the judge, for subsequent publication. Editorial or reporter's comments or statements would still be in place, and might be of the nature of encouragement, censure, etc., on the management of the show, and especially suggestions for the future.

In all cases reports, criticisms, etc., to be signed by the writer's own name.

If the FOREST AND STREAM and every other paper of standing were to announce that in future only those articles signed by the writer's name, or some well-known *nom de plume*, would be published, probably not a dozen valuable contributions would be missed in a year, while those who fling their mud from behind a ditch would find their occupation gone, greatly to the benefit of the kennel world as a whole.

Will the FOREST AND STREAM be the first paper to make the experiment? I confidently predict success for the journal that will do it; and were I about to establish a kennel paper to-morrow I should stand or fall on this platform, and would rigidly exclude all writing that was offensively personal no matter from what source it came. The latter is practically done by some papers in England now. But a very curious thing is seen in the case of one paper which, while doing this as regards Englishmen to a very large degree, seems to make an exception to abuse and misstatements which come from this side.

Do you not agree with my views, Mr. Editor? From your love of peace and fair play I think you are the very man to initiate the proposed changes. WESLEY MILLS, M.D.

MONTREAL.

[The FOREST AND STREAM has made it a point for some time past to have all important show reports and reports of field trials signed by the writers.]

## GORDON SETTER CLUB MEETING.

*Editor Forest and Stream:*

At a meeting of the executive committee of the Gordon Setter Club of America, held on Wednesday evening, July 20, several new members were elected and various matters acted upon.

After considerable discussion it was resolved that the Gordon Setter Club offer a special prize of $50 for the Gordon setter showing the best field work at the New England field trials at Assonet, Mass., commencing Nov. 8, 1892—provided there are at least three starters.

This amount is likely to be increased soon, and it is earnestly requested that owners of Gordons send in their contributions early, so that a goodly number of Gordon setters can be attracted to these trials.

There are many Gordons, good in the field, in use for private shooting in the Middle and Eastern States, and as these can be shown at Assonet without the long and expensive journey to the North Carolina field trials, it is thought that they can be drawn out, as the kind of country calls for the manner of field work that our Northern sportsmen have been accustomed to.

As soon as details can be arranged, notice will be sent to the weekly journals. L. A. VAN ZANDT, Sec'y.

NEW YORK CITY, July 23.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—During a chat with Mr. A. Murdoch, of Hamilton, a day or two ago, I learned that Rugby Norah, the crack Irish terrier bitch recently imported by Mr. Murdoch and his partners in the kennel, had whelped six fine puppies (three dogs), and that three, two dogs and a bitch, had already been bespoken to go to three different cities across the line. The others will be retained. The kennel has been named the Rugby Kennel, in honor of Norah, and puppies bred here will be registered with this prefix.

It is likely that the Toronto Kennel Club will hold a coursing meeting this fall, and beagle trials are also mooted. There is a difficulty in getting jacks to run on, and the little gray rabbit offers no sport.

Mr. Geddes' letter, in last issue, lets me out and should convince Mr. Mercer.

Mr. Kirk left on Thursday to fill his engagement at Winnipeg, Manitoba, show. H. B. DONOVAN.

## THE PACIFIC FOX-TERRIER CLUB.

*Editor Forest and Stream:*

The Pacific Fox-Terrier Club held its regular meeting July 18, J. E. Watson in the chair. The following gentlemen were elected members: G. D. Shearer, Dr. Thos. Bowhill and D. J. McCarthy. The treasurer made his report, showing $50 on hand, but this amount will be increased to $150 by next bench show season, and the money will be used in purchasing special prizes to be competed for by dogs owned by members only at the shows of the Southern California and Pacific Kennel clubs.

The club is doing a lot of good for this breed on the coast, and expect to encourage the breeding of good specimens and educate the people up to the proper idea of just what a show terrier should be. J. B. MARTIN, Secretary.

SAN FRANCISCO, Cal.

## DOGMATICS OF DOGDOM.

THE versatility of the dog is shown in having three or four different breeds of dogs in one litter. The versatility of man is shown in selling the litter as being of three or four different breeds, or more, if occasion arises.

—§—

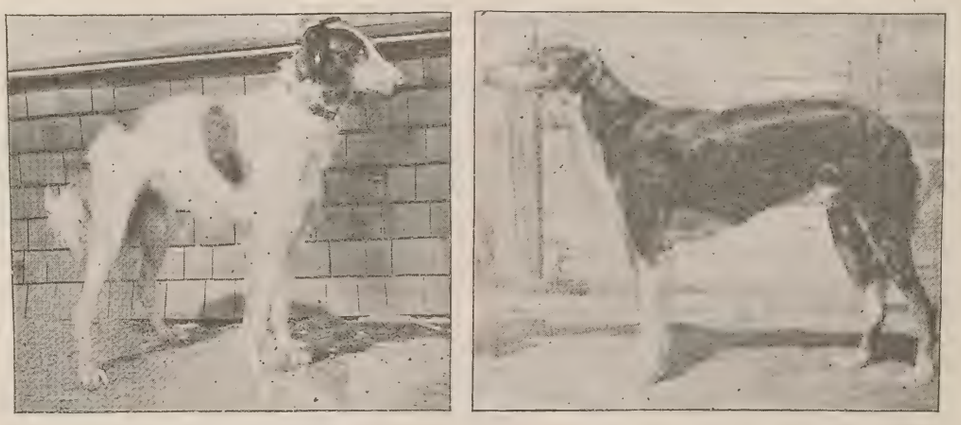
To listen to many dogmen talk you would think that the whole world was their enemy. Go out in the world and you will seldom hear of them. When you do hear of them it will be in terms of indifference.

—§—

Specialty clubs are so, in fact, but specially for the advantage of the members and not for the dogs.

# DOG CHAT.

### A Dog Show at Nashville.



The executive committee which has in hand the pigeon, chicken and dog show to be held in Nashville, Tenn., Nov. 22 to 25, held a meeting last Saturday. The show is given in aid of the Day Home for Children of Working Women, to be established by the Flower Mission of the Relief Society. Mr. A. R. Gray, of Nashville, was elected superintendent of the dog department, and Mr. O. T. Ambrose secretary. The chicken part of the show is attracting a good deal of attention, but the time of year is unfortunate for the dog show, as many of the dogs and people that make Tennessee famous in dogdom will be busy at the trials. It is expected that a great many special prizes will be donated by the towns people.

### Psovois.

We publish this week an interesting series of pictures of two of the leading dogs of this breed in America, Mr. H. W. Huntington's Argoss and Mr. C. Stedman Hank's Leekhoi. There are many of our readers, too many, we fear, who not having attended a dog show, have been in the dark regarding the correct form of these animals. We are all familiar with the desultory discussion which has been carried on over the rival merits of the two dogs Argoss and Leekhoi. The former is known and has won over the other from the fact that he more nearly approaches the greyhound in build and general conformation than the latter, and in the present undefined state of the standard our judges have perhaps pursued the safest course, at any rate a tangible one. The fact remains, however, that according to a standard that has been more or less circulated in the kennel press, Leekhoi, with his "fish side," fills this standard better than Argoss. The standard also calls for a sickle-back in the dog, and Leekhoi shows this to a much greater extent than the other dog. The purpose of these pictures is to show these different points, also the wide difference between the two in formation of loin and spread of quarters. In the smaller pictures the apparent difference in size is not so in reality, as in taking the pictures we "focussed" Argoss somewhat nearer than the other dog. The question now resolves itself into this: Which type must our breeders follow? There is almost as much to be said on one side as the other. Let it be said.

ARGOSS. LEEKHOI. ARGOSS. LEEKHOI.

MR. C. S. HANK'S LEEKHOI. MR. H. W. HUNTINGTON'S ARGOSS.

DIFFERENT TYPES OF THE LEADING PSOVOIS IN AMERICA.

### A Dog Hospital.

The dog hospital now in process of erection in connection with the University of Pennsylvania, promises to be the most elaborate in the world. We have already given a description of the proposed building, which will be the first of the kind in America. The finish of the principal wards and bath-rooms will be elegant and tasty, and all the latest appliances for the amelioration of canine suffering will be found therein. The idea is to afford the students an opportunity to gain an insight into canine pathology, or in other words serve as a nursery for the qualified "vets" of the A. K. C. of the future.

### California Kennel Club Meeting.

The following account of the California Kennel Club meeting, which was held July 13, in San Francisco, Cal., with J. B. Lewis in the chair, was received too late for publication last week: The club passed a vote of thanks to A. B. Truman for his management of the last bench show. E. P. Shell's resignation was laid on the table, as his office had been declared vacant at the meeting previous to the receipt of his letter. The names of members who had joined the Pacific Club were not stricken from the roll as reported, but all officers of the club who joined a rival organization were expelled from office. The club decided to give $10 as first prize and $5 as second prize to the winners at its next bench show, and the secretary was instructed to notify the American Kennel Club accordingly. The reports of Mr. Truman, as manager of the recent bench show, were approved by the finance and executive committees and the club. The books handled by him are open for inspection by any member of the club who desires to review them. The treasurer has been notified to give a bond of $2,000. The meeting was very enthusiastic, and the members appear well pleased with the club's management up to the present time.

### A Valuable Collie.

Mr. Megson, the well known English collie breeder, has been giving another long price for a collie. This time it is Scotland's Prince, a noted winner of valuable prizes, including the challenge Collie Club trophy. Fifteen hundred dollars was the value given for Prince, Westwood Wonder being part of the deal. During eighteen months as a stud dog, Prince has served 111 bitches, which only shows what a little gold mine a man has in England when he possesses a good and well bred collie.

### Mad Dog Scares.

Scarcely a day passes in New York and vicinity or in fact any of our large towns, but that some dramatic incident is chronicled in the daily press with a "mad" dog as the heavy vilain in the cast. Though in many of these cases, we might say in nearly all of them, the dog is no more mad than its persecutors, still as so many injuries arise from these scares the matter should seriously command the attention of our city authorities. It has been shown that the existing regulations and mode of doing away with the curs of the street are well nigh useless. The situation calls for larger safeguards to protect the public. We would remind those who should know better, that human beings treated as many dogs are treated would generally lose their mental balance and be liable to become dangerous. Torturing muzzles, constant chaining, neglect in feeding, thirst and many other acts of carelessness on the part of owners, all contribute to put the dog in an unnatural condition. If the dog is a denizen of the street its peculiar actions attract an excited crowd and the dog driven to extremities loses all control of its passions and finding every man's hand against it, uses the only weapon nature has given it to defend itself with. The carelessness and ignorance of how much there is in common between the nature of man and brute is largely responsible for the increase of these seemingly rabid dogs. It is the neglected, half starved and persecuted dog who is in special danger of becoming wild. In all this great city it is a matter of comment that there are so few drinking troughs for horses, and it is a most exceptional case when a trough is low enough to allow any but the largest dog to drink from. There is a wide scope for philanthropy in this respect.

### Bribing a Judge.

It does seem absurd that a man with sufficient intelligence to form the idea of bribing a judge at a dog show, should be capable of carrying it out. Mr. J. F. Smith, the St. Bernard breeder, was to judge at Leeds show, and a man called Booth wrote to Mr. Smith, and after telling him that his dog was a rough-coated St. Bernard, class 9, bench No. 55, remarks: "Kindly accept this small present ($2.50) from me for good judgment. Will see you at the show, etc." The case was brought to the Kennel Club's notice, and though Booth was repeatedly written to for an explanation he did not reply, and a registered letter came back marked "refused." Sentence of the K. C. Court that Mr. Booth be deprived of the privilege of showing at K. C. shows during the term of his natural life.

### Central Field Trials Derby.

Col. C. H. Odell, the secretary of the Central Feld Trial Club, asks us to draw attention to the fact that the second forfeit of $10 for entries in the Derby is due and payable Aug. 15.

### American Field Trial Club Stakes.

The entries in the American Field Trial Club's Derby close Sept. 1, the All-Age Oct. 1, and the Puppy Stake Nov. 1. The membership fee of $5 must accompany the nomination. Mr. W. J. Beck, Columbus, Ind., is the secretary.

### A Peculiar Case.

Mr. A. C. Wilmerding's spaniel bitch High Rock Jet whelped July 25, three pups. This in itself would scarcely be matter for special comment, but it seems that she is peculiar in her nature and somewhat decided in her opinions. On April 27 and May 1 she was served by Mr. J. P. Willey's champion Jersey, and in less than a month afterward she came in season again, and not showing in whelp by the previous services was bred to Mr. Wilmerding's own dog Rollo on May 27, with the result as stated above. Rollo is a black, white and tan dog, and the pups are also parti-colored. The bitch is black and so is champion Jersey.

### A Dog's Long Fast.

A mastiff dog, weighing 100lbs. was inadvertently locked in a vacant store in Toronto, on June 18, and was not discovered until July 20. The dog was still alive after its twenty-nine days' fast, but weighed only 24lbs. A veterinary surgeon thinks he can save the animal's life.

### Valuable Terrier Stolen.

Some weeks since we drew attention to the fact that one of Mr. Brooks's importation of Dandie Dinmonts had been stolen from the ship when she reached her dock. It seems Mr. Frank Dole, who purchased for Mr. Edward Brooks, of Boston, Mass., the noted Dandies, King of the Heather and Heather Madge, last summer while in England, was also commissioned to buy another pair and bought a pup called Laird o' the Heather and its mother. They arrived all right, but on Mr. Dole inquiring for them he found the pup was missing. He, however, shipped the mother to Mr. Brooks, and then put a detective on the trail of the missing pup, which was a valuable one, $250 having been given for him. The detective found a clue and thought it better to keep quiet till the vessel returned from England. On Monday, July 15, the vessel arrived in New York and the steward of the vessel was immediately arrested. He turned State's evidence and said that a saloon keeper close by the pier was the person in possession of the animal. This was found to be true and the officers took charge of both the pup and the saloon keeper. The pup was shipped at once to Mr. Dole, who in turn forwarded it to Mr. Brooks, who writes the former that the dog arrived safe and sound July 20. The saloon keeper has been placed under $1,000 bonds, and the trial will be in the United States court. Perhaps it would be to Mr. C. S. Hank's interest to apply such corrective measures, for we are told that several of his wolfhound pups were stolen on their arrival the other day.

### Sale of Noted Pointers.

Mr. W. B. McCloud, manager of the Liberty Training Kennels, Hyattville, O., writes that as the result of a recent purchase the well-known pointers Spot Dash and Nadjy of Naso, lately owned by Mr. "Bob" Leslie, Lynn, Mass., have become their property. Spot Dash, who has been before the public very acceptably for some time, having won five firsts, four seconds, etc., will be used as their stud dog. Nadjy, who is also a winner, counting two firsts to her credit, will join the matrons. Mr. McCloud expresses himself as well pleased with the bargain, and infers that friend Leslie's modesty has not led him to say too much.

### Cuffing Echo at Kingston.

We should very much like to see this discussion brought to a close. Mr. Wade simplifies matters by the following: "My informants as to the above were Mr. Geo. Bell (who has repeated the same in *Turf, Field and Farm*), Mr. C. S. Wixom and a third that I decline to name. I dare Dr. Mills to deny my assertion. So sure as Dr. Mills ever figures as plaintiff in any suit over this matter so sure will he figure as defendant in another suit. I propose to 'take notice' of everything Dr. Mills writes and do not propose to keep silence about it either. I never propose to 'annoy,' I 'expose.'"

### Spratts Patent and World's Fair Show.

Spratts Patent on this side received by the steamship England, Saturday last, a pug consigned to a Mr. Gamble, of Louisville, Ky., and a Psovoi from D. Sewell consigned to a gentleman in this city. Spratts Co. will, it is expected, have charge of the German exhibits at the World's Fair, taking them out to their kennels when they land, fixing them up for the show and see that they reach Chicago and are properly shown. This is a good plan, and, by the way, is it not time to see about arrangements for the reception of English exhibitors and dogs? All this sort of thing must not be left to the last moment. It would be well to appoint Spratts Co. in England as secretary to receive English entries for the World's Fair show.

### English Shows.

English Kennel papers must have a hard task before them to keep abreast with the numerous dog shows that are held

in the tight little island during the summer. Fancy seven shows in one day! This is what occurs August 1. No wonder the secretaries have to send out hurry calls for entries, for the average exhibitor with such a selection before him will hardly hurry himself in deciding which to send his dogs to. The funny part of it all is that although England is such a "fancier" country, the work of judging seems to fall on the shoulders of some half dozen professionals, several of whom are also exhibitors, and we remark that the annual kick by the amateurs has commenced, they complaining, and justly, of the judges at certain shows being also exhibitors; in other classes, of course, than those they judge. Still this cause for complaint should not exist.

### Mount Holly Dog Show.

Those who do not care to take the long journey to Toronto show can make it worth their while to attend the Mount Holly, N. J., show, Sept. 12 to 16. The prizes for every breed are: Challenge, dogs and bitches, gold medal, value $10, sexes divided. Open classes, dogs and bitches, $10 silver medal and diploma; classes will be divided by sex when there are five or more enteries. Dogs will be received Sept. 13, but judging does not commence till the next day. The entry fee is $3, and entries close Sept. 1.

### Important Beagle Sale.

An important sale has just been made in the beagle world. Mr. O. W. Brooking, proprietor of the Forest Beagle Kennels, has sold his kennel and good will to Mr. H. V. Jamieson, Melrose, Mass. The dogs included in the deal are Forest Hunter, Gypsy Forest, June Rose, Forest Queen, Daisy S., Lady Lee and Vick R., all registered. Mr. Jamieson is to be congratulated on such a purchase, but we are sorry to hear of it, if this means the retirement of Mr. Brooking from active work among the beagles.

### Deerhounds in England.

Mr. W. Arkwright, in his report in English *Kennel Gazette* of his classes at the Kennel Club show remarks about deerhounds: "There was a large show of these dogs, but I cannot say the classes were very distinguished. There has evidently been of late a straining after excessive size among the breeders, to the prejudice of workmanlike qualities, and soft, woolly coats with poor movement and lumpy shoulders are some of the general results."

### A White St. Bernard.

Staten Island prides itself on having a pure white St. Bernard. He is a large, handsome dog, and has filled out nicely. He is called the white bear in St. George, S. I., where he is owned by Mr. Julius Smith, who we believe was the owner of Kingston Regent before Mr. Reick bought him. White Friar took vhc. at the last New York show. He is by Plinlimmon, Jr., out of Lady Tatton.

### Skye Terrier Importation.

Miss Sparks, of Philadelphia, Pa., has purchased from Mrs. Freeman, of Wandsworth, England, the drop-eared Skye terrier Sir Bevys (E.K.C.S.B. 30,001). This dog is very well bred, as he is by Kidd's Lochiel out of Mrs. Freeman's Lady, Rob Roy being the grandsire on both sides. Sir Bevys has won three first and several minor prizes.

---

"Brockenhurst," whom every one knows as the genial and sunny-tempered son of Albion, Harry Twyford, intends the coming month to take his family to England. Leaving his better half and that eldest one with the "literary turn" at home, "Brockenhurst" will return with renewed energy and a "single" purpose to smother "Espan" before the "Bystanders" can interfere.

---

Mr. Geo. R. Krehl underwent a new experience the other day, as judge of the cattle drovers' dog show at the Cattle Market, Islington, London. We are told that the tykes brought forward were hardly up to show form but that is not what was expected. The idea that is instilled into these men, by such a gathering, to give a second thought to the intelligent animals without whom they would get along but poorly in their daily work among the sheep and bullocks, is something gained, and from little causes like these oft come great effects. It is interesting to know that a "bob tail" won the special for best in the show. The drovers seemed to take great interest in the proceedings and especially when several well-known show winners were led into the ring as object lessons, among them being old Eclipse, the property of the judge.

---

Mr. Nutt, the well-known beagle man of England, took several whippets to a show in Holland, where he gave exhibition races, incidentally sold his dogs and at the same time started a craze for the sport. Given a nice stretch of ground, about 200yds. long, which can be secured on any Fair grounds, there is no sport that would pay our Fair managers better to introduce.

---

At this same show, Scheveningen, Holland, Mr. Freeman Lloyd, who is well known as "Thames Tattler," lost his Psovoi, Young Krilutt, after it had won in the novice class, through an acute attack of inflammation of the lungs.

---

Mr. J. E. Fisher, the owner of the Riverside Kennels, Riverside, Ind., has remodeled his kennels and now has a house 50x80 and is fully equipped for boarding and training dogs. With the trials of the U. S. F. T. C. and American Field Trials Club to prepare for, Mr. Fisher should experience no difficulty in having both his hands and his kennels full in a very short time.

---

The Oak Grove Kennels have sold Bonnie Sarsfield, in whelp to champion Kildare, to Mr. Paul H. Reilly, Oakland, Cal. Such breeding as this litter will have should make them a valuable acquisition to our California fanciers of the red dog.

---

The black and tan terrier Beaconsfield has been having an easy time of it lately at English shows, scooping in challenge prizes here and there. At Belper, however, he came against the new aspirant for honors, Prince Eric, and the old dog went down.

---

Any one who knows Mr. Kreuder, the beagle owner, will not be surprised to see that instead of resorting to the reading columns of a paper to exploit the merits of his dogs he does it at so much a word. At the same time Mr. Kreuder's dogs are so well known that he could have claimed that indulgence at our hands which is all too freely given by some journals until the continual and blatant bleating becomes a bore. Mr. Kreuder's challenge sounds like business from every point of view and we commend it to the attention of the beagle men.

---

Although this is the hot and quiet season in dogdom our patrons find that the results of a FOREST AND STREAM advertisement are cold facts. Among the new ones this week we notice that J. J. Scanlan has Inchiquin pups for sale; W. Loeffler, well-bred dachshund pups; Seminole Kennels, several high class pugs, bitches and dog; C. E. Bunn, four mastiff pups; W. H. Gordon, well-bred liver and white pointers; L. L. Martin, broken and unbroken English setters; Wapsie Kennels, two black pointer bitches; A. E. B., English setter bitch; Box 77, beagle pups; H. L. Jeffrey, well-bred collie pups; C. A. Paetzel, pointer pups; Geo. W. Lovell, trained pointers and setters; Robert Leslie, two excellently well-bred pointer pups; L. N. Edwards, trained foxhounds. In the stud: J. J. Scanlan's Irish setter Inchiquin, Liberty Kennels' pointer Spot Dash, W. Loeffler's dachshund Hundesport's Bergmann, C. A. Paetzel's Nutwood. Training Kennels: Riverside Kennels. Wants: Frank A. Ward, a mastiff skin. We also draw attention to H. L. Kreuder's beagle challenge and J. E. Larmer's mange cure.

---

We understand from Mr. Waters, who was so informed by the secretary of the Manitoba Field Trials, that Mr. J. M. Tracy has been chosen to judge those trials.

---

It is a difficult matter to put much enthusiasm into any one these hot days, not to mention a dogman, unless one jumps on his dog. This cricket match, or excuse for general re-union, progresses but slowly; we have received just two names, and one of those from Philadelphia, outside of those who are directly interested in getting it up. We would like to have the names of those who would take part on the day selected, Aug. 11, to send in their names by Aug. 5.

---

Mrs. Nicholson is having a good deal of trouble in getting her new St. Bernard off the steamship Circassia of the Anchor line. She has the certificates all right, but the shipper neglected to send the bill of lading, and consequently the dog stays on the ship till it turns up. The new bitch is Grizella, by Prince Regent out of Moss Rose. She won first in the puppy class at the late Scottish K. C. show at Glasgow.

---

The judges for the Brooklyn dog show have been nearly all chosen but we cannot break confidence by giving their names. One, however, we will give, even if we incur the displeasure of every one concerned. Mr. W. Wade will judge mastiffs. At last.

---

The National Greyhound Club should have held a meeting last Monday but there was no quorum and the meeting was adjourned for a fortnight, as Mr. Mortimer may be home by that time.

---

Mr. Harry L. Goodman has given up his kennel at Auburn, Ill., to take the management of the Cumberland Kennel Club, with headquarters at Nashville, Tenn. The club has a fine farm of 140 acres three miles from the city, and everything is well fixed for the dogs. The Mohawk Kennels' pugs will form part of the kennel, which will include also great Danes and Italian greyhounds. We wish Mr. Goodman every success in his new undertaking. His letter will be published next week.

## POINTS AND FLUSHES.

CHICAGO, July 23.—The following, taken from one of the great Chicago dailies, will be of interest to owners of Psovois and wolves: "The stockmen of South Dakota have recently imported from Tennessee a number of Russian wolfhounds to help in the extermination of wolves, which have of late been killing a number of calves and colts." Tennessee is not famous as a producer of Psovois, still there may be some owned there unbeknown to the owners. There are no gray wolves in South Dakota worth mentioning; but independent of all these matters, this item serves very well and with average truthfulness for news in a daily paper. This wolfhound and wolf business bobs up with cheerful frequency, and if the wolf supply were only larger there is no doubt but what the demand for the Russian dogs would be larger.

### The Pearl of Pekin—Chicopee Lass Matter.

I had a pleasant call a few days since from Mr. Page, who is a member of the executive committee of the American Coursing Club. The matter of Mr. Bartels's protest was incidentally discussed, and Mr. Page explained that the question of late hung on a proposition made by Mr. Bartels at the time of the meeting last year, namely, that if Mr. Edmunds would make an affidavit that he did not run over the dog, he (Mr. Bartels) would withdraw his protest. There now appears to be some misunderstanding or something as to what Mr. Bartels actually said concerning the matter.

Mr. Page is earnest and conscientious in this matter, as all who have the pleasure of his acquaintance know without any assurance being necessary. As for Mr. Lowe's action and effort in the matter, they appear to have been directed more to accomplish two purposes, one other than the main one.

With all respect for the acts of the executive committee, I think it has been following a wholly irrelevant matter for some months. To make my meaning clearer, I will quote the rule governing the matter, and which was adopted by the club at its meeting in October last year. It is as follows:

"RIDING OVER A GREYHOUND.—If any subscriber or his representative shall ride over his opponent's greyhound while running a course, the owner of the dog so ridden over shall (although the course be given against him) be deemed the winner of it, or shall have the option of allowing the other dog to remain and run out the stake, and in such case shall be entitled to half its winnings."

Briefly, in the course between Chicopee Lass and Pearl of Pekin the judge decided in favor of the former. The question then was raised that the owner of Chicopee Lass had ridden over Pearl of Pekin while running the course. The judge could not take cognizance of the matter, for in one place it is ruled that * * * "and shall not recall or reverse his decision on any pretext whatever, after it has been declared," and again, * * * "but the decision of the judge, once given, shall not be reversed for any cause."

That some provision was intended in case of a dispute is shown by the following clause of Rule 1, pertaining to the executive committee: "The management of the meeting shall be entrusted to this committee. The committee alone shall decide any disputed question by a majority of those present, subject to an appeal to the National Greyhound Club."

Thus it will be seen that the question could be decided only by the executive committee alone, and not by the club, and also that the question could be settled by a majority of those of the committee present. Therefore the committee was wrong in evading it and in referring it to the club proper, and the club was wrong both in taking cognizance of the matter and referring it to the National Greyhound Club before any decision had been reached by the executive committee, and appeal taken by the parties interested. The whole matter, under the club's laws, was in the hands of the executive committee.

The plea has been advanced that one of the members of the committee left Great Bend before the protest was considered, and that this hindered the committee's action. This is simply an evasion, for the rule states specifically that a majority of the committee present can act.

At the time the question came before the committee it was very simple and only concerned a matter of fact, namely, whether Mr. Edmunds did or did not ride over Pearl of Pekin. If he did do so, the rule was plain, and it was equally explicit if he did not do so. This matter could have been settled easily on the same day that it occurred, and it was the only matter in that connection for the committee to consider.

But the real issue has been abandoned. The committee has been considering a proposition which Mr. Bartels made, or is alleged to have made, to the end that if Mr. Edmunds would make an affidavit that he did not run over Pearl, Mr. Bartels would withdraw his protest. The committee accepted Mr. Bartels's proposition as the real issue, a matter entirely foreign and irrelevant to the real issue. It is plain that if Mr. Bartels by an agreement can settle a matter in a manner different from what the rule requires, John Smith or Tom Jones can agree to settle a matter differently from the requirements of some other rule, or the same rule, or all rules.

I doubt whether the withdrawal of the protest would have any effect whatever on the matter, for there is nothing said in the rules about a protest being necessary. The rule specifies "disputed questions." The committee once having charge of it, it was entirely and permanently out of the hands of the disputants. The simple fact that there was a dispute brought it under the jurisdiction of the committee. That anything the interested parties agreed upon would be irrelevant is shown by the wording of the rule: "The committee alone shall decide any disputed question," etc.

After nearly a year of inefficient action, the question now resolves itself into the same matter of fact which existed at the time the matter occurred, and it is wholly free, when properly considered, from the irrelevant matter and sophistries which have been tacked to it. There was no reason why it should not have been dealt with firmly and promptly on its real merits at the time it occurred. At all events it is precisely the same matter now, and it is not so easy generally to decide a matter of fact a year after it occurs as it is at the time of its occurrence.

The true reason is that the committee, as a committee, shirked the responsibility of deciding it. There is a lamentable want of "sand" displayed in dealing with the whole matter, and there was an absence of knowledge of the committee's powers and duties in considering every irrelevant and frivolous circumstance presented in connection with the affair.

### Coursing.

In a letter from the genial secretary of the American Coursing Club, Mr. Ira D. Brougher, he mentions that the prospects for a successful meeting in October are excellent.

The jack rabbits are more plentiful than ever, and a big meeting is expected. His cordial invitation to a staff representative of FOREST AND STREAM to be with them again is appreciated, and will be one of the things sure to happen in October.

### Dog Taxes in Australia.

The following, taken from *The Australasian*, shows that the doggy troubles have extended to the continent of Australia: "It is high time some revision was made in the dog act. At present Victoria is almost overrun with the cross-bred animal usually termed mongrel, for which most owners pay the sum of 5s. per head annually as registration fee. I would simply suggest, in order to decrease the number of mongrel canines, and restrict ourselves to pure breeds, to levy a tax of £1 per head on bitches, and all our dogs go free. Under such restrictions any person keeping a bitch in his possession would keep a good one, and in order to recoup his outlay would see that she was suitably mated, as the progeny would bring better prices."

---

Gypsie, a toy black and tan terrier (Jack—Fancy), owned by Mr. L. F. Whitman of Chicago, died a few days' ago in her seventeenth year, an extremely old age for that breed, or for any breed nowadays. She was a winner on the bench in 1884 and 1885, and was well known to show goers.

---

Owing to the energetic measures taken by the Chicago city authorities, the dog owners are observing the ordinances, pertaining to dogs, quite closely. The number of licenses issued have averaged 600 a day for several days. One issued yesterday bore the number 31,343.

B. WATERS.

## NOTES AND NOTIONS.

SUCH incidents as the cat nursing puppies, noted in your July 21 number, are always interesting, but it must be remembered that they are nothing new. In fact I think a recent chapter of the excellent notes in the London *Stock-Keeper*, headed "Hints to Beginners," mentions the use of cats as foster mothers for puppies. The Onlooker has seen even this fosterhood exceeded in a case of a cat suckling a young flying squirrel, her natural prey. Whether from race antagonism or from some other cause, the cat's milk evidently did not agree with the young squirrel, as it lost flesh steadily and died in about ten days after its strange adoption. That excellent English publication, *Chatterbox*, has cited at least one case of a cat suckling a young rat. The simple explanation of such unnatural associations, points the way to inducing any foster mother to adopt strange young. She is oppressed with accumulated secretion of milk, and the relief by suckling is grateful, therefore always allow the foster mother to go a considerable time without being suckled, and when her milk receptacles are distended put the strangers to her, she will take much more note of the relief afforded than of the kind of animals effecting it. Certainly the oddest association of this sort The Onlooker ever saw was a nanny goat suckling a donkey foal, which was kept up until the foal was considerably taller than the goat, and the nanny was induced to accept the foal by unusual retention of milk in her udder. Of course this method of securing acceptance of strangers is as old as dog breeding, but like many another old and most excellent idea, it has become forgotten more than it should.

---

The course of FOREST AND STREAM as to a certain personal quarrel, apparently underlaid by bitter personal enmities, seems to the writer to be about the wisest course that can be adopted in such cases. We dislike them, would infinitely prefer not to know of them, but so we would also wish to avoid the pain of the surgeon's lance when a deep abscess afflicts us. About the only course for a wise editor is to let the wranglers write their fiery shot at each other, cutting down such as the public should not be inflicted with, and thereby giving the over-loaded boilers of the disputant's wrath a safety valve, for the mere writing of angry epithets let off a portion of the super-heated steam, even if the editor does not print it.

"Let dogs delight
To bark and bite"

and allow their owners and admirers a little of the same amusement. I fear "for 'tis their nature to" applies to owners as well as dogs.

THE ONLOOKER.

### Toronto Dog Show.

THE English Setter Club of America has donated the club's medal to the breeder of the best English setter dog or bitch without regard to ownerspip, and to the best English setter dog or bitch with a public field trial record. The Cincinnati, Dayton and Ohio R. R., will carry dogs free over their lines, and the Dominion Express will return dogs free on usual terms.

## Canoeing.

# WESTERN CANOE ASSOCIATION.

### Eighth Annual Meet.

CAMP, POINT LINDENWALD, Oskosh, Wis., July 20.—Good weather has continued to bless the little ship sailors fairly well throughout the meet. Only one day, last Friday, has been too rough for work. The wind on this sheet of water, however, proves streaky and capricious, and part of the time there has not been enough air to invite a journey on the scarcely rippled lake. It has been good loafing weather and this is probably the laziest crowd that ever got together. Com. Gardner, whose regatta committee has sedulously left him to run things, has hard work to get decent entries for the events. The records do not represent the canoes on hands fully as could be wished.

It takes an hour or two to persuade anybody to move after a race is called. The boys are growing fat. Mr. Kitchen, of Chicago has been obliged to send home for a pair of trousers with a gore in them, and even "Feather" Ware is exulting in the fact that he has gained a pound. For these reasons the racing has dragged along into the second week. There is talk of reducing the number of races next year, but it might be just as well to increase the number of sailors with a little more ginger in 'em.

G. HARRY GARDNER, RETIRING COMMODORE W. C. A.

### THE REGATTA.

Thursday last afforded a little working weather and some progress was made.

Race No. 1, paddling, class 1, ¼ mile (estimated).—Five entries, Messrs. F. B. Huntington, R. Merrill, Emil Hansen, O. A. Woodruff and E. H. Holmes. A pretty start was made at 9:45 and the boats came well bunched till the last 100yds., when a grave suspicion appeared that Woodruff was not paddling as hard as ever he might. Huntington crossed first, Merrill second. Time, 3m. 36s. and 3m. 39s., Woodruff next.

#### GARDNER CUP, FINAL HEAT.

The third heat of the Gardner cup was sailed in a breeze so light that the boats barely succeeded in keeping within the time limit. The start was at 10:41, wind in east. There appeared at the line the following: Charles White, sailing A. W. Friese's canoe Electra, C class; O. A. Woodruff, canoe Wood, B class; F. B. Huntington, canoe Lilla, B class; F. W. Dickens, canoe Skyver, C class; Emil Hansen, canoe Avis, B class; Hugo Hansen, canoe Bon Ami, C class; Nat H. Cook, canoe Lotus, C class; E. H. Holmes, canoe Dixie, B class. A. S. Comstock, canoe Bluebeard, B class. The start was scattered, the order at the line being Huntington, Comstock, Woodruff, Nat Cook, Holmes, White, the others back.

Emil Hansen was next to the last, and the lead over him was very considerable, but before the half mile stake was reached he had changed all that, and was next to first. This he accomplished by the well-known "pumping" antics, rocking or sawing his boat into the light wind, and gradually drawing by one after the other of his rivals. Cook also used these tactics at the latter part of the leg, as he saw Emil drawing on him. Catching a slight puff, Comstock went about, but although he crossed Emil's bow, he could not reach the stake, in spite of the fine new fin keel he had screwed on his canvas boat Bluebeard the day before. Time at the half: Nat Cook 23m. 35s., Emil Hansen 27m. 30s., Huntington 27m. 45s., White 28m., Comstock 29m., Woodruff 29m. 30s.

The fleet now got the wind on the quarter, but it was only a breath, and the time was a crawling sort. Time at the mile stake: Nat Cook 38m., Huntington 42m. 57s., Emil Hansen 43m 3s., White 43m. 12s., Comstock and Dickens 44m. 57s. Hugo Hansen and Holmes were now just rounding the half mile stake.

At the mile and a half home stake the crawling match showed little alteration, the times being: Nat Cook 51m. 25s., Emil Hansen 54m. 24s., Woodruff 54m. 46s., Huntington 55m. 2s., Comstock 56m. 19s.

The breeze now freshened a trifle. Woodruff pointed up strong on the reach for the two-mile stake. The birch model lateen Electra showed her nose in it also. The time at two miles for Nat Cook was 1h. 25s., Emil Hansen 1h. 1m. 2s. Electra, Wood and Dixie were close up.

At the 2½-mile turn the wind had freshened and the interest had increased. Time: Nat Cook 1h. 8m. 1s., Woodruff 1h. 9m. 30s., Emil Hansen 1h 9m. 42s., White 1h. 10m., Huntington 1h. 11m. 23s.

Still the breeze freshened, and the finish was exciting to a degree. The last leg of the second round was full of tacks as a carpet at spring house cleaning, and for moments at the close it was anybody's race. Just around the 2½ miles buoy Enid collared Nat for first, got to his windward, and on what both meant for the final tack Enid led, and was laying out on his board to a puffy wind, eating well up into the wind. Here he appeared rattled, went into stays by mistake and lost ten lengths. Both he and Nat now set another course for the stake, and Enid, thinking a good thing always good, began to "pump" again, though he soon dropped that. Nat skated across Enid's stern to blanket him, but threw himself out by doing so, as they were now close to the stake. To the surprise of every one who had been watching the fight between Nat and Enid, Huntington now bustled up, having laid up into the wind, and came near taking the place from both of them. The three boats were now lapped, and their bows did not differ by 6ft. The wind was provokingly irregular, but slowly they forged up, just grazing the stake. Inch by inch, as all held their breaths, the nose of the "finnan haddie" boat showed ahead, and at the gun a wild yell arose for the blonde young Mahn-a-wauk viking from Milwaukee. Finish time: Emil Hansen, first, 1h. 24m. 50s.; Nat Cook, second, 1h. 24m. 57s.; F. B. Huntington, 1h. 25m. 00s.; O. A. Woodruff, 1h. 25m. 46s. Others not timed.

Mr. Emil Hansen, canoe Avis, won the Gardner cup for 1892. Previous winners have been: 1886, Regina, C. J. Bousfield; 1887, Carrier Pigeon, N. B. Cook; 1888, If, G. A. Warder; 1889, Dixie, O. A. Woodruff; 1890, Wood, O. A. Woodruff; 1891, Nereid, J. R. Bartlett.

In the afternoon two races were sailed at once, the second heat of the trophy and the first heat of the Longworth cup, the start in the latter event being ten minutes later than the trophy gun. The records follow:

#### W. C. A. TROPHY, SECOND HEAT.

The wind was puffy and light. Start 2:01 P. M., the order at the line of the five starters being E. H. Holmes, A. S. Comstock, Emil Hansen, F. B. Huntington, N. B. Cook. Emil Hansen sailed only for a record, not being eligible for the cup, he having won the Gardner cup. Holmes went off with a tidy lead, which he got by a swift gybe almost at the stake. N. B. Cook, the veteran crew of the lovely little craft Carrier Pigeon, was delayed 2½ minutes at the line by fouling his gear, but this seemed to trouble him little. The light wind was just the sort for the Pigeon, and she drew away to windward of the fleet and calmly passed the first buoy in the lead. Time at the half mile, N. B. Cook 10m. 18s., Holmes 10m. 23s., Huntington 10m. 30s., Hansen 12m. 30s, Comstock 13m.

On the one-mile leg Holmes and Huntington blanketed the Pigeon and both drew by. Time at the one mile, Holmes 19m., Huntington 19m. 2s., N. B. Cook 19m. 5s., Hansen 21m. 20s, Comstock 23m.

The one and one-half mile stretch was closed in the following order, N. B. Cook having returned the compliment to Messrs. Holmes and Huntington: N. B. Cook 25m. 33s, Holmes 25m. 50s., Huntington 26m. 21s., Hansen 27m. 50s., Comstock 30m. 25s. Hansen fouled the buoy in passing.

At the two miles Cook had bettered his lead only a few seconds. Time, N. B. Cook 33m., Holmes 33m. 35s., Hansen 37m. 30s., Huntington 38m., Comstock 39m.

At the 2½ miles, Cook had just held his own with Holmes, who stuck close to him in "Sliver" Woodruff's old canoe Dixie. Time, N. B. Cook 40m. 25s., Holmes 41m. The others were out of it.

Coming down for the home stake, it being a case of windward work again, the Pigeon got the better of it, and the finish was: N. B. Cook 47m. 27s., Holmes 49m. 37s. Huntington, Hansen and Comstock followed in order.

This placed Mr. N. B. Cook winner of the trophy. Emil Hansen and Holmes having each taken a second, tossed for it. Hansen won.

N. B. Cook, canoe Carrier Pigeon, won W. C. A. trophy for 1892. Previous winners were: 1887, Pluck, C. J. Bousfield; 1888, Notus, R. W. Bailey; 1889, Wood, B. W. Wood; 1890, Ah There, G. H. Gardner; 1891, Wood, O. A. Woodruff.

#### THE LONGWORTH CHALLENGE CUP.

Race No. 10.—For the Longworth Challenge Cup (first heat). Presented to the Association by the late Judge Nicholas Longworth, and first sailed for at the meet of 1889.

Rules and Conditions.—1. The cup shall be known as the "Longworth Challenge Cup," to be competed for by Class C canoes only.

2. It shall be sailed for at each annual meet.

3. Only active members of the W. C. A. in good standing can enter.

4. At least five canoes must start to make a race.

5. The course to be triangular, distance not less than 3 miles, and the course must be completed in less than 1½ hours or no race.

6. The cup can be held by the winner, who must give bonds for its safe return, for one year, when it is to be returned to the Regatta Committee, in good order, to be raced for again. At the end of ten years the person winning it the greatest number of times shall become its owner. In case of a tie, the ownership shall be decided by another race at the same meet.

7. These rules may be changed or amended, if it is thought advisable by the Executive Committee, at any annual meeting, by a vote of two-thirds of the members present.

The entries for this C class event were as follows: F. W. Dickens, of Milwaukee, canoe Skyver; G. H. Gardner, Cleveland, canoe Ah There; Hugo Hansen, Milwaukee, canoe Bon Ami; Chas. White (for Mr. Friese), Milwaukee, canoe Electra; Nat Cook, Dayton, O., canoe Notus; D. H. Crane, Chicago, canoe Perhaps.

The start was made at 2:11 P. M., in the following order: Gardner, Dickens, White, Cook, Hugo Hansen, Crane. The lateen rigged Electra was in this race for third, otherwise it was much a question of Nat Cook and Commodore Gardner. The sailing time was as follows:

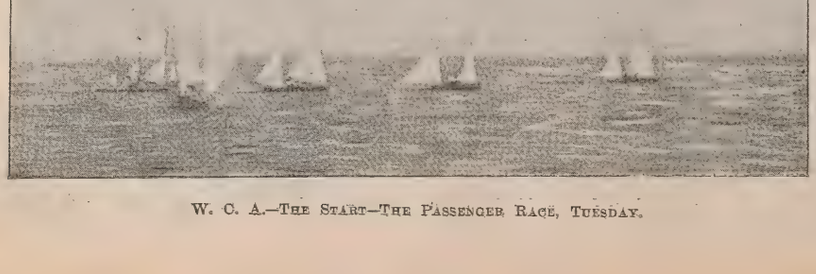
At the ½ mile: Gardner 7m. 10s., Nat Cook 7m. 22s., Dickens 8m. 8s., White 8m. 22s., Crane 8m 40s., Hugo Hansen 19m. 22s.

At the 1 mile: Nat Cook 16m. 31s., Gardner 16m. 37s., White 17m. 32s., Dickens 18m., Crane 18m. 55s., Hugo Hansen 9m. 45s.

At the 1½ miles: Nat Cook 22m. 53s., Gardner 23m., White 24m. 16s., Dickens (fouled buoy) 24m. 33s., Crane 25m. 30s., Hugo Hansen 27m. 52m.

At the 2 miles: Nat Cook 29m. 30s., Gardner 29m. 46s., White 31m. 52s., Crane 32m. 38s., Dickens 34m. 55s.

At the 2½ miles: Nat Cook 37m. 48s., Gardner 38m. 13s., White 39m. 33s., Crane 41m. 6s.



At the finish stake: Nat Cook 44m. 35s., Gardner 45m. 12s., White 46m. 45s., Crane 48m 17s. At the finish the remaining boats were about a half a mile astern bunched.

Race No. 13, Sailing maneuvering.—Conditions: Free for all. At the minute gun all sails will be lowered; at the starting signal sails will be hoisted and canoes got under way, sailing to first buoy; after turning first buoy all sails will be reefed, canoes continuing to second buoy under reef; after turning second buoy reefs will be shaken out, canoes continuing under full sail across the line; distance one turn of the course.

The start for this race was made at 3:5[illegible] P. M. with 7 entries, who crossed the line under canvas in the following order: Holmes, Dickens, Gardner, Woodruff, Crane, "Grandpa" Gates and N. B. Cook. "Grandpa" Gates has his canoe Isabel very nicely rigged, but at the minute gun he got into trouble with his halliards, and after that the others went too fast for him, or he might have been in a better place. As it was he was an easy last. Time at the half: Holmes 18m. 50s., Gardner 21m. 30s., Woodruff 21m 47s., Dickens 22m., Crane 22m. 15s., N. B. Cook 23m. 23s., Grandpa Gates 26m 30s.

At the 1 mile everybody was bunched, but Grandpa, who wasn't bunching. Time: Holmes 30m. 2s., Woodruff 33m., N. B. Cook 33m. 35s., Crane 34m., Dickens 34m. 7s., Gardner 34m. 15s., Grandpa 39m. 28s. At the last turn Holmes shook out his canvas away ahead, gave no one a chance to look at him, and came in easily first. Time: Holmes 37m. 30s., Woodruff 40m. 30s., N. B. Cook 41m. 2s., Dickens 41m. 57s., Gardner 42m. 13s., Crane 42m. 02s., Grandpa 58m. 31½s. Grandpa also got a gun as he crossed the line, but his bronzed and grizzled countenance was placid as ever.

START OF THE TROPHY RACE, WEDNESDAY.

W. C. A.—THE START—THE PASSENGER RACE, TUESDAY.

THE TIMING STAND.

Holmes won first, Woodruff second.

The camp has all the time attracted more or less visitors from neighboring points, and Thursday saw a great many of these on hand, the steam yacht Jessie bringing a goodly quota. In the evening the flyer Carrie Morgan, Capt. J. B. Harshaw commanding, brought down a pleasant little party from Oshkosh, including Mayor Dichman, and a highly enjoyable camp-fire was held, at which hosts vied with guests in entertaining. Messrs. Cole and Bass, of Oshkosh, did a song and dance, and Mr. Herbert Cornish sang popular airs. Mayor Dichman made a speech of welcome, apologized for the action of the noble Duke Casey, and assured the boys that if they should

DIXIE—E. H. HOLMES.

From photo by Fly.

come to town again there wouldn't be a second case of Caseyism. Commodore Dodd, of Fond du Lac, made a pleasant address also. Dave Crane, of the Chicago tent, recited a humorous selection, and all the boys joined in with the customary canoeing airs. It was late when the Carrie Morgan spread her big mainsail for home. It was a great Mahn-a-wauk night, that club feeling moved to celebrate the victory of their man, Emil Hansen. It is not of record that the winner of a cup should receive a shampoo, but it was decided to shampoo Emil, and there being no sea foam handy, a substitute was found in a mixture of mashed potatoes and tomato ketchup, which did very well.

On Friday morning it was very cold, with a northwest wind blowing a gale. The white-capped rollers broke on the beach with a violence that forbade all thought of boating. The yacht Molly, flagship of the Oshkosh squadron, with Com. Chas. W. Felker on board, was weather-bound in the bay by the head wind, and the Commodore had more time to visit at the camp. Minerva, of Fond du Lac, ex-Com. Dodd in command, also lay at anchor, making rather bad weather of it and threatening to go ashore. Dione, of Racine, was backed into the creek mouth, and Idle Hour, of Milwaukee, lay near by. Queen, of Oshkosh, with a party of ladies on board, came flying down into the bay early in the morning, but left her anchorage again later and went back. The Carrie Morgan and Marguerite, of Menasha, also hove to in the bay. The camp lay idle and watched the yachts. No canoeist put out except Nat Cook, who did a little interesting surf work with a paddling canoe. It is astonishing how much one of them sturdy little boats will do in rough water.

On Friday night the camp was strengthened by the arrival of Messrs. C. W. Lee, J. B. Keogh, Burt Gardner and Dr. C. F. Matteson, of Chicago, and G. Gregg, of Milwaukee. These with their guides arrived about midnight. They promptly began to burn red fire and sing sweet, joyful music. The whole camp was aroused, and sleep was forgotten until 2 o'clock in the morning.

Saturday morning dawned bright, and a light breeze had replaced the gale of the day before. A gallant mast was planted on the extreme end of the point and hereon was hoisted the black burgee of the Occident, showing a pleasant stove-polish sun in the act of sinking beneath the wave. After this declaration of possession, the Commodore ordered out the crews for a little business.

THE LONGWORTH CUP, SECOND HEAT.

Entries: Dickens, Gardner, White, Nat Cook, Crane and Keogh. At the gun, 9.37, Crane got off first, Gardner close behind, White and Dickens together. Cook went over the line too soon and fouled the buoy, but returned. Keogh, sailing Louise, also got over before the gun, but thinking he was all right, sailed on. His time is given,

AVIS—FINKEEL CANOE—EMIL HANSEN.

Winner of Gardner Cup. From photo by Ely.

but it is not of record. Had he gone about and made the line as Cook did she would have won the heat with ease.

At the half-mile: Keogh 6m. 56s., Crane 7m. 20s., Gardner 7m. 27s. Cook 7m. 40s., Dickens 8m. 4s, White 8m. 55s.

Rounding the first stake, the wind being light and from the northwest, it was slow work, with plenty of chance for different ideas in seamanship. Keogh and Crane stood on longest. Gardner came away in, apparently heading for the starting point. Twice his canvas fluttered, and he seemed in trouble, but explained later that it was the puffy nature of the wind which brought him up. When he laid over on the other tack he made a grand run, passed Nat Cook, who had stood in with him, and drew by the others nearer the buoy. Time at the mile: Keogh 20m. 20s., Gardner 22m. 5s., Crane 23m. 18s., White 22m. 41, Dickens 23m. 30s., Nat Cook, 25m. 40s.

Keogh kept on sailing around, sailing a faultless race and maintaining an easy lead. Time at the half mile: Keogh 25m. 50s., Gardner 29m., White 29m. 13s., Crane 29m. 28s., Dickens 29m. 36s., Nat Cook 30m. 57s.

White, in Electra, slipped the jaw of his boom as he went about the stake, but lost little headway, and held his place to the 2 miles. Time, Keogh 31m. 43s., Gardner 34m. 56s., White 35m. 31s., Crane 34m. 56s., Dickens 36m. 48s., Nat Cook 37m. 14s.

Gardner gybed close at the two-mile stake, but shaved around, and coming far in on his old tactics, maintained his place nicely. The divergent ideas appeared again on this windward leg. Electra stood away off and fell out of her place. Nat Cook followed Gardner's course and made up a little of the time he had lost so largely in the becalmed streaks of the freaky lake. Nat passed Crane, but the latter exchanged courtesies later. Time 2½ miles, Keogh 46m 21s., Gardner 49m. 21s., Crane 50m 12s., White 50m. 55s., Nat Cook 50m. 58s. Dickens quit and sailed home.

The finish was made in a very shifty, puffy wind. Keogh raced in away ahead. Nat Cook bettered himself a little. Electra fell back. Finish, sailing time, Keogh 52m. 10s., Gardner 55m. 45s., Crane 56m. 37s., Nat Cook 57m. 10s., White 57m. 43s.

G. H. Gardner won this heat. Keogh disqualified. Nat Cook having won the first heat, it became necessary to sail the third. All the others withdrawing, the commodore and Nat sailed this off together after luncheon.

LONGWORTH CUP, THIRD HEAT.

The start was at 2:25, with a puffy wind from the N.W. on the quarter. Gardner's bow showed past the line first to windward. Both boats made the half-mile in close company, Nat in 11m. 23s., Gardner in 11m. 38s. On the next leg, to windward, Gardner abandoned the tactics which had won for him before, and stood off, Nat coming well in and getting a substantial lead on the run to the one mile after he went over on the other tack. Time at the mile, Nat Cook 16m. 57s., Gardner 18m. 06s. The wind was now nearly astern, and on the free run Nat made the mile and a half at 23m. 03s., Gardner 24m. 31s.

At the two miles, Gardner was still losing slowly, the time being Cook 28m. 41s., Gardner 30m. 19s., but the race was close and apparently one of pure luck, as the puffs of air would send first one boat and then another spinning along. On the beat to windward, Gardner pointed up the closer, and made up some of his distance, but had to go about for Nat's right of way as they closed. Both reached for the stake. The wind headed Nat off, and he fell away, a seesaw now taking place in the flawing wind. Nat at length got around ahead, time 49m. 37s., Gardner 50m. 17s. On the run home, Gardner continued a very seamanly race, and gained but could not close. Time at the finish Nat Cook 55m. 48s., G. H. Gardner 56m 18s.

Nat Cook, canoe Lotus, won the Longworth cup, G. H. Gardner, canoe Ah There, second. Previous winners were: 1889, Dorothy, D. H. Crane; 1890, Nereid, J. R. Bartlett; 1891, Lotus, N. H. Cook.

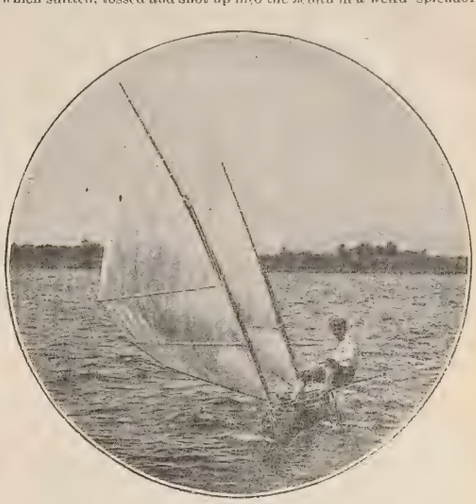
THE BUSINESS MEETING.

At the business meeting, held Saturday, the following members

LOTUS—NAT COOK—WINNER OF LONGWORTH CUP.

From photo by Ely.

were present: Messrs. W. H. Crawford and O. A. Woodruff, Ruckawa C. C., of Dayton, O.; F. H. Gary, N. G. Cook, G. A. Backstoff, R. P. Finney, W. H. Huntington, R. B. Pratt, R. Braud, Jr., of Oshkosh Why C. C.; F. W. Dickens, E. Hansen, H. Hansen, A. R. McLinegan, Wm. A. Dawson, Geo. P. Mathes, F. B. Huntington, A. W. Friese, R. Merrill, E. Holmes, G. F. Gregg, Chas. White, Mahnawauk C. C., of Milwaukee; Herbert F. Johnson, W. J. Reynolds, A. Arthur Guilbert, Racine C. C., Racine, Wis. Thos. S. Gates, of Columbus, O.; D. H. Crane, J. Herbert Ware, A. W. Kitchen, J. B. Keogh, P. F. Munger, B. M. Gardner, C. W. Lee, Dr. C. F. Matteson, Chicago C. C., Chicago; N. B. Cook and Nat Cook, Kenwood C. C. Chicago; G. H. Gardner, Cleveland C. C., Cleveland, O.; A. S. Comstock, Evanston C. C., Evanston, Ill.; G. M. Munger, of Eureka, Kan., Marcius D. Smith, Irrawadi C. C., Davenport, Ia.; Peter D. Krobb, Menasha, Wis.; W. H. Yardley, Minnesota Boat Club, St. Paul, Minn. This constitutes the largest meeting ever held by the W. C. A. Six States were represented. Had the promises directly and recently made to the secretary been fulfilled there would have been 25 more men on hand. This was disappointing, but not discouraging.



Commodore Gardner in the chair and Secretary Woodruff at the table, the minutes of the last meeting were read, election of followed. The officers chosen for 1892-3 are: Com., G. M. Munger, of Eureka, Kan.; Vice-Com., F. W. Dickens, of Milwaukee, Wis.; Rear-Com., F. H. Gary, of Oshkosh, Wis.; Sec'y-Treas., F. B. Huntington, of Milwaukee. Executive Committee, G. H. Gardner, of Cleveland, O.; W. H. Crawford, of Dayton, O.; Hon. S. N. Maxwell, of Cincinnati, O. After the meeting the regatta committee for the ensuing year was announced to be Geo. P. Mathes, of Milwaukee; J. Herbert Ware, of Chicago; Gaylord G. Case, of Jackson, Mich, and Marcius D. Smith, of Davenport, Ia.

Nat Cook moved that the executive committee at their next meeting abolish the pumping or sculling a boat to windward by rocking her, calling attention to the fact that the A. C. A. had abolished this. Referred. Votes of thanks were passed to Secretary Woodruff and other officers for the labor of establishing the new camp, and to the owners of the grounds. Thanks were also extended to Mayor Dichman and to Frank Gary, whose unselfish labor as the "committee on terminal facilities" has lightened the cares of many non-resident members. Mr. Gary was later presented with a fine pair of marine glasses in token of his services.

It is probable the next meeting will go back to Ballast Island, though the Madison Lakes of this State are mentioned. This meet has been pleasant in many ways, but there have been drawbacks. The city of Oshkosh wished the canoeists well, but such local men as could have skinned the boys at every opportunity. The livery man who ran the club 'bus charged the boys 5 cents for every letter he carried out to camp, although he was getting plenty of chance to rob on passengers and freight. Such picayunish greed needs rebuke. Oshkosh can spare a citizen like that and may remember that he did his best to drive the meet away for next year.

On Saturday evening a pleasant *fête aux lanternes* was held at the council ground. About 200 Japanese lanterns were strung about the trees, a lantern was run up on the flagstaff, and a booming fire was built. A large crowd of members and visitors assembled, and music and merriment were prolonged until long past midnight. Indeed, the dawn was breaking and the birds were singing when a few of the best seasoned stayers ate the last of the Wiener-wursts and sought a couch more restful than the dancing platform by the fire. In these festivities Grandpa Gates shone well, and also Mr. Crane of Chicago, and "Three Times" Pratt of Oshkosh. No one knows why "Three Times" is called "Three Times." Billy Friese's camp name of "32" is easy of solution, because 32 is always freezing-point. "Sliver" Woodruff's common name, in view of his present portly frame, is not in evidence, but they do say he was once so slim they called him Sliver. Sliver Woodruff has a great head. Some friends of his came out to the camp, and he took them out fishing. His method of taking friends out fishing is to let one friend row and the other look after the bait, while he himself handles the rod.

A beautiful display of the Northern Lights took place Saturday night. The whole heavens seemed full of the lambent blue flames, which shifted, tossed and shot up into the zenith in a weird splendor

LILLA—F. B. HUNTINGTON.

From photo by Ely.

all their own. The apex of the display lay directly above the camp, and the whole effect was most impressive, all the sky being a glitter. No such display is remembered here, and it was something long to be borne in mind.

Saturday night developed the musical ability of Messrs. Ware, Yardly, P. F. Munger, Burt Gardner and others, who performed upon the guitar, banjo and mandolin, or led the cheerful vocal efforts of the happy band.

Sunday was passed in rest or in entertaining visitors. A few boats put out; among these Grandpa Gates, who went over out in the middle of the lake, but sustained only a slight wetting and no damage. Comstock started for home in the afternoon, cruising up the lake to Oshkosh, receiving the customary two guns salute as he set out.

On Monday the tank drama proceeded, under a wind south and very stiff. The boats were ordered out at 10 A. M. for the "man-overboard" race, but the weather looked so squally that only three crossed the line, Woodruff in Wood, Nat Cook in Lotus and Hugo Hansen in Bon Ami.

Race No. 11, sailing, free for all classes.—At signal, crew to throw a paddle to leeward, pick it up and continue course about half-mile buoy and return. Hugo Hansen went about first, but failed to collect his paddle, and his later efforts at this so delayed him that he was not a factor. A blue squall came up as the boats crossed the line, and it was very risky looking business, but the race itself was the prettiest thing in the whole regatta, Woodruff's run after he squared for the buoy being the most remarkable flight of a canoe ever seen by the oldest present. He got square into a squall of wind, and stayed in for a quarter of a mile, sitting out on his balcony as far as he could get. His boat never yawed, and his boom never lifted, but as if frozen rigid the boat slid across the rough water, carrying a spit of white water as high as her crew's head, clear across to the turn at the stake. The boat was probably going 15 to 20 miles an hour, and only the Sliver's substantial avoirdupois and his able seamanship kept her up in such weather. He started with mainsail and dandy reefed, but the wind blew out his mainsail reef, and he could not better matters with the broken gear. He said later that he was all of a tremble throughout the run, by reason of the excitement and the muscular strain. He certainly showed the capabilities of a well-handled canoe. At the turn he went about carefully and came back again, with centerboard almost out, and won amid hearty cheers, which latter expressed relief as well as applause. Had his boat not stood up she would have dived, and no one could have told where she would have stopped. The start was at 10:20, and the finish 10:36:02, but the time for the mile, 16m. 2s., does not indicate its speed, as much time was lost in the start to the line and the coming about for the man overboard.

BLUEBEARD—CANVAS CANOE—A. S. COMSTOCK.

Evanston C. C.

Nat Cook sailed the course without reefing, but did not have Woodruff's squall, though he caught plenty to make him go and to keep folks anxious for him. His sailing time was 19m. 47s.

Rain began to fall shortly after this event, and the weather being unfit for sailing, the greater number of the boys piled into the 'bus and went to town. Mr. N. B. Cook tried a spoon near the dock in the evening, and caught a little pike, which served as a basis for an out-of-door supper which was cooked on the beach back of the Chicago tent by the more staid members who had kept at home. From fish it was an easy step to coffee, and from coffee to the camp luxury, Wiener wursts, and from that to crackers and cheese. The impromptu meal developed all sorts of neat cooking outfits among these Corinthian men, and the night advanced well as Grandpa Gates, Mr. N. B. Cook, Sliver Woodruff and several others sat about the fire and talked about cooking outfits, cooking, canoes, tents, and all sorts of that kind of things. This was one of the quietest and also one of the pleasantest evenings of the meet.

Tuesday dawned fair and pleasant, with a working wind in the west, and the Commodore resolved to finish the racing in short order.

Race No. 7, sailing and paddling, Classes A and B, one and a half miles, finish under sail; record event.—It was resolved to sail this on starboard tack, so that the paddling leg would be nearer ahead of the wind. The starters were Geo. P. Mathes, canoe Nagawicka, B;

O. A. Woodruff, Wood, B; Emil Hansen, Avis, B; Grandpa Gates, Isabel, B; N. B. Cook, Carrier Pigeon, B; E. H. Holmes, Dixie, B; Chas. White, Electra, B; W. H. Yardley, Porcupine, A. They got off at 9:47 in the following order: Carrier Pigeon, Nagawicka, Wood, Dixie, Electra, Isabel, Avis. Porcupine broke her halliards, but came ashore, repaired, and pulled into the race only two minutes late.

At the half mile the order was as follows: Carrier Pigeon, Dixie, Avis, Electra, Isabel, Wood, Nagawicka, Porcupine. All now hauled down their canvas, but at this N B. Cook fell around in the wind and Holmes in Dixie got a good lead. Suddenly out of the ruck shot White in Electra, paddling a regular walking-beam stroke, passing everybody and going on Holmes, who went about the stake only 46s. ahead. The order here was Dixie, Electra, Wood, Avis, Isabel, Carrier Pigeon, Porcupine, Nagawicka. Holmes was 2m. ahead of Woodruff and 3½m. ahead of the fleet Carrier Pigeon, and it seemed his race.

To the surprise of every one now the Wood forged across to the lead, outpointing Dixie on the beat in to windward, and the Pigeon also, by a long reach in, appeared willing to make trouble. At the turn White had the misfortune to tear loose his deck pulley, and his mainsail came down with a run, putting him out of it. Half way in, all were about, and the fleet presented a pretty view spread out in profile. Holmes came about too soon on his home tack and his sails were flapping as the Wood came down, straining full. All this time the Pigeon was holding her course away to windward on a long leg, and when her veteran crew threw her over for his reach for the line she came down fairly boiling. Cries of "Cook! Holmes! Woodruff!" arose, and for a few moments it belonged to either of them. At the finish, however, the stratagem of the veteran sailor proved itself and the Pigeon won, Woodruff evidently giving second to Holmes. Time total, 1½ miles: N. B. Cook, 35m. 37s.; Holmes, 36m. 51s; Woodruff, 37m. 41s.; Emil Hansen, 39m. 36s.; Grandpa Gates, 40m. 47 2-5s. Maggie and Porkie were having a sociable time further back. After the race was finished it was discovered that the winner had gone the entire distance without dropping his rudder. His race therefore was fairly to be called a mixture of good judgment and good luck.

Race No. 14. Consolation Race, for non-winners. Sailing, one mile. —Three starters, Dickens in Skyver, White in Electra, Grandpa Gates in Isabel. Start at 12:25, Dickens first, Grandpa next, Electra, that exuberant example of what monkey shines a canoe can cut up at times, affording a good deal of pleasure to everybody but her rider, who sat on his porch in the cool morning air. If he had let off his mizen, he might have gybed easier. All the way across to the half mile Electra rolled and acted nasty, and later on broke the step of her mast. It wasn't her day. Dickens winged out, and the big Skyver made the half in 7m. 50s., Electra 8m. 30s., Isabel 8m. 50s. It took two tacks for the next buoy, and the time was: Dickens 17m. 40s., Electra 18m. 10s., Isabel 19m. 20s. On the run home, wind abeam, White had to crawl out to keep Electra up. Dickens took it easy and crossed winner. Time: Skyver 23m. 13s., Electra 23m. 30s. Grandpa was making one of his famous finishes by himself and came in at 26m. 10⅘s.

Race No. 2. Paddling, Class II., ¼ mile, estimated, record event.—Three entries. Emil Hansen, canoe Kitch; Hugo Hansen, canoe La Gitana; E. H. Holmes, canoe Huh. Start 1:07:10. Emil Hansen wanted this for his record string and worked like a beaver, winning in 2m. 20s., Hugo next 2m. 25s., Holmes 3m. 3s.

Race No. 3. Paddling, Class III., ¼ mile, estimated, record event. Four entries. J. Turrill in Kich, White in Mudhen, Nat Cook in Sunmaid, Grandpa Gates in Isabel. Start at 1:24:45. Time, White 1m. 50s., Turrill 1m. 51s., Nat. Cook 1m. 55s, Grandpa 2m. 2⅘s. White won.

Race No. 4. Tandem, all classes, ½ mile, estimated.—The boys stripped for this, and three boats came out, manned as follows: Dick Merrill and Hugo Hansen, canoe Kitch; G. M. Munger and Nat Cook, canoe La Gitana; Chas. White and Emil Hansen, canoe Go Slowly. Start at 1:25. A foul between Go Slowly and Gitana occurred directly after the start, for which each blamed the other. Go Slowly slowed up and didn't finish, and Gitana didn't git any. Meantime Dick and Hugo, bare to the waist and yelling like Indians, came on down and won in 52s.

This finished the long drawn out programme. After lunch a scratch race was sailed for a pair of shoes offered by Mr. Atkins. There was a good entry, the main interest centering about Mathes and Youlley. At the finish leg of the mile and a half course, Mathes was the favorite and won handily in 34m.

At the close of the racing all these husky youths let go a long sigh of relief as the last possible restraint on earth was taken away, and forthwith began to disport themselves. A most discordant band of diabolical instruments was organized, and the familiar air of "Boom-de-ay" was heard in the land, while the famous dialogue of Johnnie Turrill and Dickie Merrill was perpetrated over and over again.

Johnnie (in deep, gruff voice)—"Any ice to day, lady?"

Dickie (in fine, soft voice)—"No, thanks."

Johnnie—"Well, if the lady don't want no ice, git up, Bill!"

Dickie—"Oh my, what a heavy load that poor man has!"

One must come to a W. C. A. meet to fully appreciate this dialogue or many others he may hear. For sheer frolicsome fun and high spirits, a canoe meet seems to surpass any sporting gathering yet devised, just as in its picturesque features it is unapproachable. It shows at its best the prettiest form of sport indulged in by lovers of the outdoor air.

Last night the camp was nearly deserted, the boys going en masse to a ball over at Stony Beach. To day most of them will be out

THE GARDNER CHALLENGE (SAILING) CUP.

cruising. A two-days' trip through Lake Butte des Nortes will be made by a good number. The Mahn-a-wauk ice box is now nearly empty. Gone are the succulent Wiener wursts, the pumpernickel, the fonnyguegel, and other cherished dishes which have attained popularity in this tent of Milwaukee enthusiasts. Soon a change of base will be necessary, and the candle which was one morning found burning in the Mahn-a-wauk ice box may burn on unhindered. By Saturday the meet will be over, and all be looking forward to 1893.

SUMMARY.

The following brief statement will show the winners and their winnings:

Race No. 1, paddling.—F. B. Huntington, first, an umbrella; R. Merrill, second, a Swedish knife.

Race No. 2, paddling; record event.—Emil Hansen, first, a medal; Hugo Hansen, second, a tobacco pouch.

Race No. 3, paddling; record event.—Charles White, first, a silver match-box; J. Turril, second, a Tam O'Shanter.

Race No. 4, tandem paddling.—R. Merrill and Hugo Hansen, first, a pouch and a corkscrew; G. M. Munger and Nat Cook, second, two Tams.

Race No. 5, upset, paddling.—O. A. Woodruff, first, silver camping service; Nat Cook, second, silver flask.

Race No. 6, hurry-scurry.—Woodruff, first, a boat sponge; Nat Cook, second, a match-box.

Race No. 7, sailing and paddling; record event.—N. B. Cook, first, a jersey; E. H. Holmes, second, a camp knife.

Race No. 8, the Gardner cup; record event.—Emil Hansen, first, the cup; Nat Cook, second, camp knife.

Race No. 9, the W. C. A. trophy; record event.—N. C. Cook, first, the cup; Emil Hansen, second, silver camp service.

Race No. 10, the Longworth cup, second event.—Nat Cook first, the cup; W. H. Gardner second, silver flask.

Race No. 11, man overboard.—Woodruff first, an oil painting; Nat Cook second, a single blade paddle.

Race No. 12, passenger race.—Gardner and Woodruff first, two silk blankets; Nat Cook and J. Turrill second, two Oshkosh spoons, souvenirs of policeman Casey.

Race No. 13, maneuvering.—E. H. Holmes first, silver smoking set; O. A. Woodruff second, silver flask.

Race No. 14, consolation.—J. W. Dickens first, silver soap case; Chas. White second, a briar pipe.

Scratch race, for silver cup offered by Idle Hour Club of Milwaukee, won by O. A. Woodruff.

Special prize, a handsome Japanese doll, for last place in race No. 13, won by Grandpa Gates.

The W. C. A. 1892 record was won by Emil Hansen, Mahn-a-wauk C. C., Milwaukee, with two firsts, one second and one fourth in record races, a total of 160 points. The next in record were E. H. Holmes, 110 points; N. B. Cook, 100 points (2 starts and 2 wins); Nat Cook and O. A. Woodruff, 70 points tie; Chas. White, 50 points; F. B. Huntington, J. F. Turrill and Hugo Hansen, 40 points tie; Thos. S. Gates, 10 points.

The W. C. A. is all right. There is nothing the matter with it. It has 243 members, and has money to lend.

BELIEVE IT, FOR THEY TOLD IT SO.

*Com. G. M. Munger.*—I have been in Kansas 6 years. It is too dry there, and I am glad to be back among the sailors. I was one of the early Chicago canoeists.

*Ex-Com. G. H. Gardner.*—I will probably have a nice new little red

N. B. COOK'S CARRIER PIGEON.
Winner of the W. C. A. Trophy Race.

canoe when we meet next at Ballast. Why will my boat be like the other canoe papers? Because it is little red. I can't help it.

*Ex-Com. D. H. Crane.*—The only reason why I don't like knicker bockers is that the flies eat my legs. (Smack.) If this keeps up I shall have to stay covered up in bed all day. (Biff.)

*Sec'y Huntington.*—There appears to be no insurmountable trouble with Milwaukee this year.

*Ex-Sec'y Sliver Woodruff.*—When I lean out on my boat, she has to come. I carry my ballast right along with me, so it's always handy. That's a good thing.

*Ex-Sec'y J. Herbert Ware.*—In canoeing it is always best to part your name in the middle, so as to trim ship. Why don't I race this year? I'm resting. Yes, the report is true that I have gained a pound.

*Mr. Kitchin.*—Will you walk into the parlor? The key of the Chicago tent is always hanging out.

*Emil Hansen.*—I think we ought to have had more fonny-gugel in the ice-box.

*Hugo Hansen.*—I think we ought to have a Wiener-grab every night.

*Dickie Merrill.*—I never left the candle in the ice-box. It was Billy Friese.

*Billy Friese.*—I boil at 212°. When I look at that crazy boat of mine I boil.

*N. B. Cook.*—I didn't quite like the way centerboards were arranged, so I fixed mine to slide forward after dropping in the well. I didn't just like the rudders, so I fixed mine with a slot, so it drops and folds both. I didn't altogether like deck seats I saw, so I put springs under mine. You see, when the gunwale goes under this spring throws the seat board up clear from the resistance of the water. I didn't build the Carrier Pigeon on any creed. Her lines and rig are all my own.

*Nat H Cook.*—Maybe you think I didn't want to win the Gardner cup. I was awfully sorry when I found I couldn't make the stake. Say, why don't you have a lot of Western canoe news?

*Vice-Commodore F. W. Dickens.*—The maker of my ship Skyver only charged me $38 for the hull. I laid the lines myself, but I believe I would have done better to leave that to him. She's too high and round, and that makes her roll. Still, she skyves some.

*Charlie Lee.*—The regatta committee for 1892 was a pronounced success. I didn't mix up with it much because I don't like to push myself.

*Grandpa.*—You see, I had an idea there were a few prizes for last place, and so I played for last. That's a great deal easier than first. Did you see the handsome prize I won by this?

*Terminal Facilities Gary.*—Many happy days.

*Johnnie Turrill.*—Lady, lady, is there to be no ice to-day? No? Git up, Bill!

*The Bus Man.*—Youse fellers don't come often, see?

*The Mess-tent Man.*—We're 'way losers. Eat? Say—*eat!*

*Policeman Casey.*—G'wan, G'wan!

*The W. A. C.*—Many happy days.

*All.*—Many happy days.

*The Good-Bye.*—Many happy days.

E. HOUGH.

175 MONROE STREET, Chicago.

---

MODERN canoeing originated with Capt. John MacGregor, a traveler and explorer familiar with nearly all the waters and boats of the world, who in his search for novel and attractive means of travel took up the crude and primitive form of decked paddling canoe once used to a small extent on English rivers, and set to work to produce from it a craft suitable for his purpose of solitary voyages on strange waters. The result was the Rob Roy canoe, in which his notable cruises on the Rhine, the Baltic and the Jordan were made, a craft so nearly perfect that after twenty-five years of development and improvement it still stands alone as a distinct type of modern canoe. General types by the score and special models by the hundred have been produced, filling in the whole scale from the 10lb. paddler to the small cruising yacht, but the Rob Roy of Capt. MacGregor, in the condition in which he left it, is still recognized by canoeists as one of the three or four distinctive types of cruising canoe.

From this little craft and from the voyages made in it has grown up a pleasure fleet of thousands of canoes; while the sport of canoeing has expanded and developed into the several distinct branches of cruising, pleasure-paddling and sailing, and racing.—*W. P. Stephens in July Lippencott's.*

---

THE cable brings the news of the death last week of John MacGregor, the founder of canoeing, at the age of 67.

# AMERICAN CANOE ASSOCIATION.

## Northern Division Meet.

LAKE COUCHICHING, ONTARIO, CANADA.

THE distance from Canada to Lake George or even Lake Champlain has prevented the general attendance of the members of the Northern Division, with the natural result that the home meets have been much more successful and largely attended than in either the Eastern, Central or Atlantic divisions. The meets thus far held by the Northern Division have been: 1887, Stony Lake; 1888, Lake Couchiching, Horseshoe Island; 1890, St. Lawrence River, Lake of the Two Mountains, Montreal; 1891, Pigeon Lake, Big Island. In 1889 the general meet of the Association was held by the Northern Division, no local meet being held, as will be the case next year.

This year for the second time the Division goes to Lake Couchiching, to Geneva Park, the property of Mr. Thomson, of Orillia and Longford (a member of the Division), which he has kindly offered the use of to the members; a point running out into the beautiful waters of Lake Couchiching. To the east of the point lies a bay well sheltered, except from a south wind, which is not the prevailing wind; to the west and south lies the body of the lake. Standing on the southern end of the point can be seen the town of Orillia, 6½ miles distant, the narrows opening into Lake Simcoe, and the Indian village of Rama, also some islands, among them the site of the '88 meet. The park is well wooded with maples and other trees, and the ground even and admirably suited for tents. Around to the southwestern part of the park is a cleared spot which the committee in viewing in April thought would make an ideal ladies' camp. There is a good beach for bathing, and on the point is erected a bathing house which is at the pleasure of the Association, also a platform on which those who are so inclined may trip the light fantastic in the cool of the evening.

The date set for the meet was July 14 to 31, the second week being largely given up to the following programme of races:

RECORD EVENTS.

No. 1. Paddling—One-half mile straightaway.

No. 2. Combined Sailing and Paddling—Half mile alternately, three miles in all.

No. 3. Sailing—Four and one-half miles. No limit to rig or ballast.

OTHER EVENTS.

No. 4. Free for all Sailing—Four and one-half miles; to be first sailing race called.

No. 5. Northern Division Trophy, Sailing—Seven and one-half miles. Open to members of Division only.

No. 6. Paddling—Open canoes, single blades, Class III., one-half mile straightaway.

No. 7. Paddling Tandem—Class IV., single blades, one-half mile straightaway.

No 8. Paddling Upset—Classes III. and IV., 200yds., canoe must be completely turned over and paddled across finish line with crew inside.

No. 9. Hurry-Scurry—Run, swim, paddle.

No. 10. Sailing Upset—No special appliances allowed, canoe to carry two sails, no limit to rig or ballast, half mile, at signal canoe must be tipped over till top of mainmast touches the water, canoe to be righted and cross finishing line under sail.

No. 11. Sailing Club Race—To windward and return, two miles, first two members of any club to count.

No. 12. Sailing Open Canoes—Three miles.

No. 13. Gymnastics.

The novice race, open only to members who have never sailed a canoe before September, 1891, will be awarded on the result of the first round in race No. 3.

The most important of the above races is that for the Orillia cup, presented to the Northern Division as a perpetual challenge trophy by Mr. Thomson, of Orillia, in 1888, and won thus far as follows: 1888, Lake Couchiching, by A. H. Mason, canoe Cecebe; 1889, Stave Island, St. Lawrence River, Colin Fraser, canoe Una; 1890, Lake Two Mountains, C. E. Archibald, canoe Mab; 1891, Pigeon Lake, D. B. Jacques, present holder, canoe Waif.

The officers and committees for the present year are as follows: Vice-Com., D. B. Jacques, Toronto; Rear Com., W. Sweny, Kingston; Sec'y-Treas., J. W. Sparrow, Toronto; Executive Committee, R. Easton Burns, Kingston; Regatta Committee, F. Minns, Geo. Hatton, J. G. Edwards; Executive Committee, D. B. Jacques, W. Sweny, J. W. Sparrow, R. Easton Burns; Committee on Camp Arrangements, W. J. Read, Arthur O'Malley; Transportation Committee, J. N. McKendrick, C. E. Archbald, J. W. Fairweather.

The first contingent, consisting of Vice-Com. D. B. Jacques, H. F. McKendrick, W. A. Fraser and Robert Tyson arrived at camp on Friday afternoon on a steam yacht kindly loaned by Mr. Thomson, of Orillia. On arrival they were greeted by a lively thunder storm and a heavy downpour of rain, but nothing daunted, they inspected the camp site, and found it very much improved since their former visit in April. The rain continuing, very little was done that day, but Saturday morning saw them up bright and early, and before that evening had set in they had headquarters tent pitched, docks erected and the camp assuming a presentable appearance. The same evening saw the purser and a party of ladies and gentlemen from Toronto arrive. Sunday was quietly spent in camp with no arrivals, the members enjoying themselves with short paddles and in viewing the scenery of the beautiful lake from headquarters. On Monday morn-

W. C. A. SAILING TROPHY.

ing the officers were up early and hard at work making further preparations for future arrivals, and were also anxiously awaiting the arrival of Mr. Jackman, the camp carpenter, who had been unfortunately detained by the death of his son. The afternoon boat arriving brought in a second party of ladies and also Mr. Jackman, who was soon at work, and with his long experience in many past camps soon had flag-poles up and tent floors laid, etc.

Tuesday and Wednesday saw a number of other arrivals, including a member of the regatta committee who soon had buoys made and placed in position, so that the sailing members, who had been anxiously waiting to try their speed, had their first opportunity to do so. Thursday morning broke bright with a light breeze, and soon the sailors were seen hurrying through their breakfasts, anxious to have some friendly brushes on the triangle. Among the arrivals that day were ex-Com. Edwards and his brother, J. G. Edwards, chairman of the regatta committee, who were delighted with the appearance of the camp site chosen by the committee and expressed the opinion of it being the finest ever held by the Association.

In the afternoon Vice-Com. Jacques offered a prize for a handicap sailing race with the following entries: Una, Colin Fraser; Goose I., W. A. Fraser; Eel, J. W. Sparrow; these men were placed at the scratch. H. F. McKendrick, who started in an old canoe loaned by one of the members, being given 200yds. start, Mr. John Agnew in Mr. Tyson's Proa being given 350yds., and Mr. Harry Ford in an open canoe given half a mile. Great speculation was indulged in as to the probable winner, every contestant having a number of backers in camp. The start was made in a light but steady wind, the first leg of the triangle being to windward, and here the three scratch men soon started to gain on the leaders, and on the beat to windward on second round they had passed them and the race was virtually in

their hands from that out. They finished in the following manner: W. A. Fraser first, Colin Fraser second with Sparrow lapping him about six feet.

Com. Winne will visit the camp during the present week.

### A. C. A. Transportation Committee Circular.

FOR the general information of canoeists who contemplate attending the annual meet of the American Canoe Association, at Willsborough Point, N. Y., Lake Champlain, Aug. 4 to 25, 1892.

FROM THE EAST.

The Fitchburg Railroad Co will grant reduced rates to the meet on the basis of fare and one-third for the round trip, on certificate plan, either to Burlington or Port Kent. Canoeists will have to make their own arrangements for the transportation of their canoes, either as freight or by expeess, as this road will be unable to take canoes on their passenger trains.

The steamer Chateaugay will leave Burlington for camp 8:30 A. M. and 6 P. M. daily, except Sunday.

FROM THE NORTH.

The D. & H. will have a platform and small station, with a telegraph operator in charge, opposite the camp.

The following is time table to let off and take on passengers:

Leave Montreal 7:15 A. M., Rouse's Point 9:10 A. M.; arrive at camp 11 A. M.

Leave Montreal *4:30 P. M., Rouse's Point 6:20 P. M.; arrive at camp 8:30 P. M.

Fare from Montreal to camp and return, $4.55; Rouse's Point and return, $2, certificate plan.

*Runs daily.

FROM SOUTH AND WEST.

Leaves New York *7 P. M., Albany 11:15 P. M.; arrives at camp 5:30 A. M.

Leaves New York 9:10 A. M., Albany 1 P. M.; arrives at camp 7:24 P. M.

Leaves New York 11:59 P. M., Albany 6:50 A. M.; arrives at camp 11:30 A. M.

*Runs daily.

FERRY BETWEEN STATION AND CAMP.

The new steam launch Ruth, Capt. Charles Piepenbrink, will meet all trains stopping at the station opposite camp.

The night boat leaving New York at 6 P. M (fare $1.50) connects at Albany with 6:50 A. M. train on D. & H. for camp.

The Lake Champlain steamer leaves Ticonderoga on arrival of the D. & H. 8:30 A. M. trains from Albany, reaching camp 6:30 P. M. by connection with steamer Chateaugay at Burlington, giving the canoeist a delightful sail through Lake Champlain. Railroad certificate tickets will be received for passage.

IRVING V DORLAND, Chairman,
DR. SIDNEY M. BISHOP,
WM. STUART SMITH,
J. W. SPARROW. } Committee.

### A. C. A. Membership.

THE following gentlemen have applied for membership in the A. C. A.: Eastern Division—Philip A. Warner, West Newton, Mass.; Edmund B. Walbridge, Boston, Mass.; Clarence H. Kendrick, Barre, Vt., and F. P. Webster, Boston, Mass.; Geo. W. Conlie, Lawrence, Mass. Atlantic Division—Charles A. Deshon, New York. Northern Division—Fred H. Bratt, Toronto.

### FIXTURES.

JULY.

29. Beverly, 30ft. Class and under, Marblehead.
30. Hull, Classes 3, 4, 5, Hull.
30. Dorchester, Ladies' Day, Dorchester.
30. Indian Harbor, Ann., Greenwich.
30. Corinthian, Marblehead.
30. Savin Hill, 2d Cham.
30. Mos. Fleet, Open, Boston.
30. Beverly, Monument Beach
30. Buffalo, Cruising, Sweeps.
30. Roy. N.S., Wenonah Cup, Hal.

The regatta committee of the New York Y. C. has done the graceful and proper thing in changing the date of the schooner sweepstakes so as to avoid all interference with the Eastern Y. C. The date originally chosen was Sept. 8, but the race will be sailed on Sept. 15, thus giving time for yachts to reach New York after the Eastern Y. C. regatta of Sept. 10.

### Cherry Diamond Y. C., July 23.

LARCHMONT—LONG ISLAND SOUND.

THE annual regatta of the Cherry Diamond Y. C. on Saturday was spoiled by lack of wind, the start at 2 P. M. being made almost in a calm, though a light S. W. breeze came up later. The times were:

CLASS F—SCHOONERS.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Viator | 2 00 00 | Withdrew. | | |

CLASS 11—CABIN CATS AND YAWLS

| | | | | |
|---|---|---|---|---|
| Roi | 1 58 59 | 7 24 23 | 5 25 24 | Not meas. |
| Nellie | 2 00 00 | Withdrew. | | |
| Oconee | 1 59 32 | 7 25 30 | 5 26 29 | . . . . |
| Almira | 2 00 00 | Withdrew. | | |
| Kittie (yawl) | 2 00 00 | Withdrew. | | |

CLASS 12—OPEN JIB AND MAINSAIL.

| | | | | |
|---|---|---|---|---|
| Jennie A. Willis | 1 59 31 | 6 16 40 | 4 17 09 | 4 17 09 |

CLASS 15—MAINSAIL YACHTS, 23FT. AND OVER.

| | | | | |
|---|---|---|---|---|
| Elvira | 1 58 13 | 6 36 47 | 4 38 54 | 4 38 34 |

CLASS 16 OPEN CATS, 20FT. AND OVER 15.

| | | | | |
|---|---|---|---|---|
| Phyllis | 1 54 15 | 6 12 50 | 4 18 35 | 4 18 35 |
| Sadie | 2 00 00 | 6 38 03 | 4 38 03 | 4 38 03 |
| Zelda | 1 59 30 | 6 46 30 | 4 54 00 | 5 54 00 |
| Martha | 1 58 16 | Withdrew. | | |
| Dawn | 2 00 00 | Withdrew. | | |

The winners are Viator first, Roi first and Oconee second, Jennie A. Willis first, Elmira first, Phyllis first, Sadie third. Vamoose acted as judges' boat for Com. Summers, who had charge of the race, the steamer Bay Queen carrying the club's guests. Phyllis wins Com. Summer's pennant for best corrected time, held by her from last year. The Tyson cup goes to the winner in class 11, presumably Roi, though she has not yet been measured.

### West Hampton Country Club, July 23.

WEST HAMPTON CENTRE, L. I.—MORICHES BAY.

THE first yacht race of the West Hampton Country Club, for the season of 1892, was sailed over the club course in the eastern end of Moriches Bay, on Saturday, in a moderate southwest wind. The principal interest in this race was centered in the performance of the new boats—Ann T., Maisie and Vitka, the two former built by Gilbert Smith of Patchogue, and Vitka, by Thomas Clapham of Roslyn. The opponents of these boats included the cup winners in each class last year and two other crack boats by Smith.

As will be seen from the annexed table, Maisie, though the smallest boat in her class, won with ease, beating her nearest competitor by over 4m. elapsed time.

The Clapham boat finished third in her class, making a much closer race than had been predicted by all the local experts. She came in for second prize owing to the disqualification of Enigma:

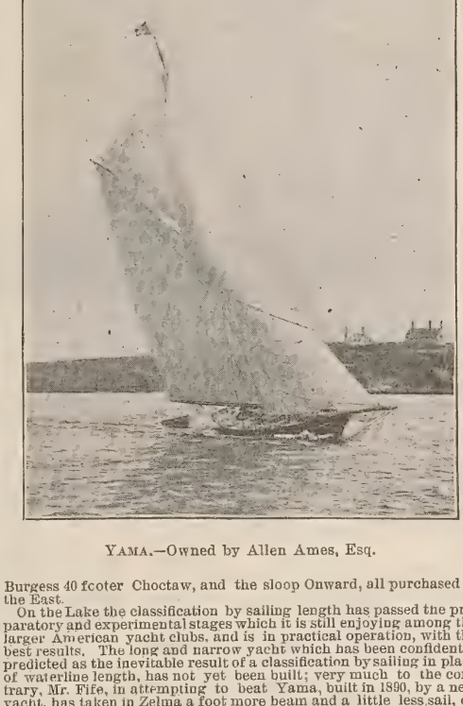
SECOND CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Comet, G. Penniman | 21.08 | withdrew. | |
| Siren, H. Maddocks | 19.11½ | withdrew. | |
| Ouija, W. Laimbeer | 19.11 | 2 02 53 | 2 00 54 |
| Princess, O. Zabriskie | 20.02 | 2 02 37 | 2 00 56 |
| Ann T., J. L. Delafield | 20.00½ | 2 07 32 | 2 05 53 |
| Maisie, J. T. Horn | 19.04 | 1 58 30 | 1 55 38 |

THIRD CLASS.

| | | | |
|---|---|---|---|
| Enigma, M. Fitzgibbon | 19.02 | 2 05 00 | disqualified. |
| Betsy, D. Hare | 17.10 | 3 07 08 | 3 05 20 |
| Vitka, Thomas & Blagdon | 16.11 | 2 08 42 | 2 05 32 |
| Lady Margaret, C. E. Pellew | 18.09 | withdrew. | |

### Lake Yacht Racing Association, 1892.



LAKE ONTARIO.

THIS week and last the yachtsmen of Lake Ontario, from Niagara to the St. Lawrence, have been enjoying their grand annual vacation on the ninth round of the lake by the Association of American and Canadian Clubs formed in 1884. The programme arranged at the spring meeting was as follows: Rendezvous and first race, Belleville, Ontario, July 15; Oswego, July 18; Rochester (Charlotte), July 22; Hamilton, July 25; Toronto, Royal Canadian, July 27; Queen City, July 28. The programme was later changed to bring the Rochester Y. C. regatta on July 22, while some of the yachts arranged to stop at Cobourg on the way to the rendezvous for a special regatta on July 12. The amount of work involved in the two weeks' cruise including seven races is shown in the following table of the distances around the lake:

| | Miles. |
|---|---|
| Hamilton to Toronto | 30 |
| Toronto to Cobourg | 65 |
| Cobourg to Kingston | 95 |
| Kingston to Oswego | 54 |
| Oswego to Charlotte | 57 |
| Charlotte to Hamilton | 112 |
| Total | 413 |
| Toronto to Oswego | 145 |
| Cobourg to Oswego | 90 |
| Cobourge to Charlott | 55 |

As the fleet is not made up of large schooners and steam yachts, but of the smaller sailing yachts from 25ft. to 45ft. waterline, and as the two weeks of the cruise almost always include one respectable summer gale, such as the blow of 1884 at Oswego, that of 1885 following the Toronto regattas and scattering the fleet, and that of 1890 at Kingston, in which several yachts were badly damaged, the cruise calls for hard work and skillful sailorizing, a demand which the hardy Corinthians of the Lake are always ready to meet.

The Lake fleet this year is far ahead of anything yet seen on fresh water, to the older craft, the Smith schooner Oriole, the two Watson boats Vreda and Aileen, the new Fife Yama and the old but renowned Cyprus and the Cuthbert White Wings, having been added three new Fife boats built on the lake, Zelma, 40ft. class, Vedette, 30ft. class, and Nox, 25ft. class, with the Smith sloop Cinderella, the

YAMA.—Owned by Allen Ames, Esq.

Burgess 40 footer Choctaw, and the sloop Onward, all purchased in the East.

On the Lake the classification by sailing length has passed the preparatory and experimental stages which it is still enjoying among the larger American yacht clubs, and is in practical operation, with the best results. The long and narrow yacht which has been confidently predicted as the inevitable result of a classification by sailing in place of waterline length, has not yet been built; very much to the contrary, Mr. Fife, in attempting to beat Yama, built in 1890, by a new yacht, has taken in Zelma a foot more beam and a little less sail, on the same draft, from all appearances thus far with good results.

The experiment of placing all the details of the timing and management of the races in the hands of one man proved so successful last year that it was repeated this season, the official timekeeper of the entire round being Mr. Wm. Q. Phillips, Royal Canadian Y. C.

### Cobourg Regatta, July 12.

COBOURG, ONTARIO—LAKE ONTARIO.

THERE was no wind on Monday, and after waiting until the afternoon, all attempts at a race were abandoned. On Tuesday there was still a calm, but a start was made at 10:15, the course being from a starting buoy moored about 100yds. south of the harbor to a buoy about five miles west of south buoy in a line with Gull Island lighthouse and thence back to starting buoy, leaving all buoys on the starboard tack. The first round was timed: Condor 2:15:55, Vreda 2:17:51, White Wings 2:21:28, Oriole 2:24:07, Dinah 2:09:40, Zelma 2:12:45, Yama 2:12:50; Iolanthe 2:27.14. Whitewings won in the first class, Condor and Oriole giving up. The 40ft. class was timed as follows at the finish: Dinah 4:19:18, Zelma 4:20:27, Yama 4:21:50. Dinah, the winner, is a sister to the little Nancy, whose victory we recently noted. In the 30ft. class Erma beat Vedette, and in the 25ft. class Salola won, the starters being: Mona, of Hamilton; Kelpie, of Toronto; Quickstep, of Toronto; Nox, of Rochester; Java, of Toronto; Odie, of Trenton, and Salola, of Hamilton. The race was a drift throughout. In the evening a ball was given at the Arlington.

### Bay of Quinte Y. C., July 15.

BELLEVILLE, ONT.—BAY OF QUINTE.

THE programme arranged by the Bay of Quinte Y. C. was as follows, the fleet being divided into but three classes:

First Race.—For $100; for all yachts over 40ft. corrected length; divided $60 to first, $40 to second.

Second Race.—For $100; for all yachts under 40ft. and over 30ft. corrected length; divided $50 to first, $30 to second, $20 to third.

Third Race.—Purse $75; open to all yachts under 30ft. corrected length; divided $40 to first, $25 to second and $10 to third.

The day was fair, with smooth water and a moderate S.W. breeze, making a beat over one leg of the triangular course, with two legs reaching. The course was a triangle of 8⅝ miles, sailed three times by the first class and twice by each of the others. Vreda went over with the gun, the one-gun start being used in all races of the L. Y. R. A. Condor and White Wings also made good starts, but Oriole was handicapped nearly 5m. The first class started at 12:30, the second at 12:45, only Zelma, Iolanthe and Dinah being present. The third class started at 1 o'clock. The first round was timed:

| | | | |
|---|---|---|---|
| Vreda | 2 01 00 | Erma | 2 43 10 |
| Oriole | 2 03 45 | Norma | 2 47 00 |
| White Wings | 2 06 30 | Nox | 2 55 15 |
| Condor | 2 15 45 | Salola | 3 01 10 |
| Zelma | 2 12 30 | Mona | 3 01 50 |
| Iolanthe | 2 20 30 | Odie | 3 07 00 |
| Vedette | 2 39 25 | Quickstep | 3 08 30 |

Dinah was very unfortunate, losing her mast at the bounds on the last leg of this round. Zelma on the same leg, to windward, sailed very fast, beating Vreda; the times of the round being:

| | | | |
|---|---|---|---|
| Oriole | 3 13 30 | White Wings | 3 31 25 |
| Vreda | 3 18 45 | Condor | Withdrew. |

The full times of the race were:

FIRST CLASS—START 12:30.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Oriole, G. Gooderham | 63.55 | 3 48 06 | 3 48 06 |
| Vreda, A. P. Boswell | 47.69 | 3 58 15 | 3 43 46 |
| White Wings, E. G. Zealand et al | 45.74 | 4 19 15 | 4 02 30 |
| Condor, C. A. B. Brown | 42.70 | Did not finish. | |

40FT. CLASS—START 12:45.

| | | | |
|---|---|---|---|
| Zelma, N. B. Dick | 39 96 | 2 50 00 | 2 50 00 |
| Iolanthe, M. H. Biggar | 37.23 | 3 04 50 | 3 01 54 |
| Dinah, Dr. Malloch | 37.66 | Disabled. | |

30FT. CLASS—START 1 P. M.

| | | | |
|---|---|---|---|
| Vedette, Gray & Reed | 29.91 | 3 04 10 | 3 04 10 |
| Erma, L. O. Percival | 29.75 | 3 12 20 | 3 12 02 |
| Norma, F. Strange | 28.95 | 3 14 05 | 3 13 40 |
| Nox, Miller Bros | 25.38 | 3 22 30 | 3 12 38 |
| Kelpie, F. J. Campbell | 24.98 | Not timed. | |
| Salola, W. J. Briggs | 24.47 | Not timed. | |
| Quickstep, J. Gardiner | 24.69 | Not timed. | |
| Mona | | Not timed. | |
| Odie | | Not timed. | |

Winners: First class, Vreda first, Oriole second; 40ft. class, Zelma first, Iolanthe second; 30ft. class, Vedette first, Erma second, Nox third.

Regatta Committee—D. B. Robertson, chairman; John A. Brazier, A. Gillen, R. E. Lazier, F. C. Clarke, D. M. Waters, Jas. Jenkins, W. N. Ponton, J. H. Starling, D. R. Leavens, J. F. Wills, W. H. Campbell, Col. Lazier, Jos. D. Clarke. Judges, R. S. Bell and W. O. Phillips, Association timekeeper.

After the race the fleet anchored off Massassaga Point, and on Saturday morning all were under way early. A stop was made off Stone Mills for an excursion ashore, and at night the fleet anchored in MacDonald's Cove. On Sunday a heavy gale swept over a part of the lake, doing damage to the shipping, and the fleet met rough water as soon as the yachts were clear of the land, the wind being west, a reefing breeze. The passage was wet and hard for the smaller yachts, but all reached Oswego safely by night, where the yachtsmen found the usual hearty welcome.

### Oswego Y. C., July 18.

OSWEGO, N. Y.—LAKE ONTARIO.

MONDAY was fair and bright, with a freshening westerly wind and a good sea on the lake. The course laid out was five miles to windward and return, the yachts over 40ft. sailing 3 rounds, or 30 miles; those of 30 to 40ft, 2 rounds and the 24ft. class 1 round. A fine fleet was present, including Yama and Cinderella, making better classes and closer racing than at Belleville, but unfortunately Vreda while on starboard tack just before the gun was in collision with Yama, on port tack, losing her bowsprit. The first round was timed:

| | | | |
|---|---|---|---|
| Cinderella | 11 31 25 | Erma | 12 14 08 |
| Oriole | 11 38 24 | Norma | 12 20 35 |
| Yama | 11 42 30 | Nox | 12 28 43 |
| Zelma | 11 42 44 | Salola | 12 47 58 |
| White Wings | 11 58 43 | Cyprus | 12 48 15 |
| Vedette | 12 07 25 | Kelpie | 12 54 30 |

Mr. Wintringham, Yama's builder, was knocked overboard in the fouling, but picked up by Kelpie, she losing some time in consequence.

On the second round Yama gained on Zelma, finally winning. A protest was made by Zelma against Yama for fouling at the outer buoy on the first round, but it was not allowed by the committee. The full times of the race were:

CLASS ONE (start 10:00).

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Oriole, Geo. Gooderham | 63.55 | 5 21 29 | 5 21 29 |
| Cinderella, R. K. Pryer | 52.90 | 5 10 03 | 5 04 43 |
| Vreda, A. R. Boswell | 47.69 | Carried away bowsprit. | |

40FT. CLASS (start 10:00).

| | | | |
|---|---|---|---|
| White Wings, E. G. Zealand et al | 45.24 | 6 09 45 | 6 09 45 |
| Aggie, Marlett & Armstrong | 40.33 | 6 23 55 | 6 19 04 |

40FT. CLASS (start 10:00).

| | | | |
|---|---|---|---|
| Yama, Allen Ames | 39.90 | 3 36 45 | 3 36 38 |
| Zelma, N. B. Dick | 39.96 | 3 38 10 | 3 38 10 |

35FT. CLASS (start 10:10).

| | | | |
|---|---|---|---|
| Cyprus, M. S. Thomson | 32.08 | 5 20 18 | 5 20 18 |
| Katie Gray, J. P. Phelps | | did not finish. | |

30FT. CLASS (start 10:10).

| | | | |
|---|---|---|---|
| Vedette, Gray & Reedy | 29.91 | 4 18 15 | 4 18 15 |
| Erma, L. V. Percival | 29.75 | 4 35 45 | 4 34 43 |
| Norma, F. Strange | 28.95 | 4 37 40 | 4 35 59 |

25FT. CLASS (start 10:10).

| | | | |
|---|---|---|---|
| Nox, Miller Bros | 24.38 | 2 18 43 | 2 17 58 |
| Salola, W. J. Brigger | 24.47 | 2 37 58 | 2 37 51 |
| Kelpie, F. J. Campbell | 24.98 | 2 44 30 | 2 44 20 |

Winner of first prizes: class one, Cinderella; 40ft. class, White Wings; 40ft class, Yama; 35ft. class, Cyprus; 30ft. class, Vedette; 25ft. class, Nox. Winner of second prizes: class one, Oriole; 30ft. class, Erma; 25ft class, Salola.

Regatta committee: A. H. Ames, R. S. Sloan, W. E. Lee, W. B. Couch, Karl Kellogg, F. D. Wheeler, L. W. Churchill. Judges: Hon. Clark Morrison, T. C. Goble. Timekeeper, W. Q. Phillips.

Yama was so badly damaged that she was obliged to haul out, and could not accompany the fleet to Charlotte. A dinner followed the regatta, the fleet sailing next day for Charlotte.

### Corinthian Y. C., July 23.

MARBLEHEAD—MASSACHUSETTS BAY.

THE first race of the championship series of the Corinthian Y. C. of Marblehead was sailed on Saturday in a light S.W. wind, there being a good lot of starters, the principal ones being Freak, the Paine fin-keel, Reaper, Herreshoff fin-keel, and Sirocco, the Stewart & Binney cutter. Tadpole was too late at the line to start in the race. The times were:

FIRST CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Hawk, Gordon Dexter | | 2 01 45 | 2 01 45 |

SECOND CLASS.

| | | | |
|---|---|---|---|

| Bob, E. Harding | 18 00 | 1 59 05 | 1 41 05 |
| Nancy, H. Taggard | 14 00 | 1 55 40 | 1 41 40 |
| Jane, C. W. Parker | 13 00 | 1 56 30 | 1 43 30 |
| Josephine, D. H. Follett | 3 00 | 1 52 06 | 1 49 06 |
| Edith, F. M. Wood | | 1 50 50 | 1 50 50 |
| Vega, C. J. Cabot | 6 00 | 1 59 15 | 53 15 |

Hawk sailed over. Susie, Freak and Typhoon each win first prizes of $10; Countess wins $15; Bob wins $10, and Nancy $7.

Typhoon is also a Stewart & Binney boat. The judges were Messrs. Appleton and Jones.

### Commonwealth Y. C., July 23.

CITY POINT—BOSTON HARBOR.

THE first championship regatta of the Commonwealth Y. C. was sailed in a light easterly breeze on Saturday, classes and courses being: First, keels 25ft. and over, 12 miles; second, keels 18ft. and less than 25ft., 9 miles; third, centerboards less than 21ft. sailing length. The times were:

FIRST CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Naiad, Macomber & Gallagher | 25.05 | 3 11 00 | 2 33 00 |
| Mamie, O. F. Justice | 25.00 | 3 09 30 | 2 34 40 |

SECOND CLASS.

| | | | |
|---|---|---|---|
| Wahneta, Smith & Cobb | 20.09 | 1 45 00 | 1 11 24 |
| Phantom, G. Haslett | 19.00 | 1 51 40 | 1 15 44 |

THIRD CLASS.

| | | | |
|---|---|---|---|
| Coot, T. Murphy | 18.07 | 1 33 00 | 1 16 28 |
| Tike, L. Leverige | 20.02 | 1 54 05 | 1 19 44 |

The prizes were: First class, $18; second class, $15; third class, $15. The regatta committee included Messrs. C. R. Lyman, J. B. Smith, C. S. Rushton, W. C. LePetrie and George Cobb. The judges were: G. R. Lyman, James W. Booth and Charles H. Heath.

**Yacht Pictures.**

FOR list of yacht pictures send your address to Forest and Stream Publishing Company, 318 Broadway, New York.

## Chesapeake Bay Y. C., July 14.

EASTON, MD.—CHESAPEAKE BAY.

THE seventh annual open regatta of the Chesapeake Bay Y. C. took place off Oxford, Md., on Thursday, July 14. The race was open to all Chesapeake canoes not over 37ft. long; boats under 30ft. must rate at that length to enter. The class for Chesapeake skiffs did not fill, but one boat entering.

The course was from a line drawn from the judge's boat to upper wharf at Oxford, thence to markboat off Plaindealing Creek, leaving it on the port hand, thence to Castle Haven Buoy, leaving it on the port hand, and return over the same course, keeping to the westward of Benoni's Point Light going and returning; 10 nautical miles.

The canoes entered were: Island Belle, 35ft. 1in.; Island Bride, 35ft. 2in.; Island Bird, 28ft., rated at 30ft.; Hazel Kirk, Sadie B., Carrie V. and Dashaway rated at 30ft.

The preparatory gun was fired at 12:17 and the second gun five minutes later. The boats crossed in the following order. Wind, a fine breeeze, N.N.E.:

| | | | |
|---|---|---|---|
| Sadie B | 12 22 15 | Island Bird | 12 22 50 |
| Island Bride | 12 22 25 | Carrie V | 12 22 50 |
| Dashaway | 12 22 30 | Hazel Kirk | 12 23 35 |
| Island Belle | 12 22 40 | | |

It was a beat to the first markboat, which was rounded as follows: Island Belle, followed by Island Bride, with Dashaway third, and the others following in close order. From this point to the Light it was a run dead off the wind, the boats setting spinakers and large square topsails. Passing the Light, Island Belle had obtained a lead of two minutes over Island Bride, who was about as far ahead of Dashaway, the others pretty well bunched. From this point the wind was on the port quarter and the boats flew for the buoy at Castle Haven, giving the fast launch in which the race committee were, all she could do to stay with them. The buoy was rounded as follows: first, Island Belle; second, Island Bride; third, Dashaway and others following in order, except Carrie V., who withdrew at the Light. The Bride gained on the Belle 30s. running from the Light to buoy, partly owing to Capt. Covington who sailed the Belle, mistaking the position of Castle Haven Buoy and running off his course.

From the buoy home it was a dead heat, wind fresh and some sea, in this work the Bride picked up the Belle in the first two tacks, but as the boats worked out of the Choptank River into the mouth of Third Haven River, the water grew smoother and the wind, though still holding, was not as fresh as outside, which seemed to suit the Belle better with her immense sails, carrying five men at times on her outrigger. After passing the Light on the return she opened the gap between herself and the Bride steadily and turned the mark at Plaindealer Creek some 4m. ahead, increasing this at the finish line to 5m. The full times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Island Belle | 12 22 40 | 2 42 00 | 2 19 20 | 2 19 15 |
| Dashaway | 12 22 30 | 2 49 30 | 2 27 00 | 2 21 55 |
| Island Bride | 12 22 25 | 2 47 00 | 2 24 35 | 2 24 35 |
| Hazel Kirke | 12 33 35 | 2 55 30 | 2 31 55 | 2 26 50 |
| Sadie B | 12 22 15 | 2 55 45 | 2 33 30 | 2 28 25 |
| Island Bird | 12 22 50 | withdrew. | | |
| Carrie V | 12 22 50 | withdrew. | | |

The time allowance was that of the club for its open races viz; 2m. to the foot for length from inside of stern to inside of stem post for twenty nautical miles. Island Belle wins first prize, and Dashaway second, as the Bride did not save her time although crossing the line second.

The fleet of the club met at Oxford on July 13, under the command of the commodore, there being present the flagship, Yawl Lulu, Com Goldsburgh; steamer Sunset, Rear-Com. Barton; Yawl Cora J G. Morris; schooner Water Lily, Capt. Thompson; steam launch Beulah, Messrs. Batemen and Leonard; Island Bride, E. L. Moodside and Peach Blossom, M. T. Goldsburgh.

A large number of the club members and their guests witnessed the race from the State steamer McLane, kindly offered to the club by the commander of the force, Gen. Seth.

## Mobile Y. C., July 16-17.

MOBILE, ALA.—MOBILE BAY.

THE Mobile Y. C. sailed two open races on July 16-17, the course in each being a 15-mile triangle on Mobile Bay. The first race was sailed in a S.W. breeze registering 20 miles an hour. the times being:

SLOOPS 25FT. AND OVER.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Carrie G., E. D. George | 33.09 | 2 13 20 | 2 12 03 |

The winners were: Class 1, 1st, Consuello; 2d, J. E. Hooper. Class 2, 1st, Ocean; 2d, Olivia. Class 3, 1st, Teaser; 2d, Maggie P. Class 4, skiffs, 1st, Toy; 2d, Lone Star. Judges, G. M. Van Liew, W. H. Sadler' Ben Coster.

## The New York Y. C. Cruise.

THE usual large fleet is likely to be present at the rendezvous at Glen Cove on Aug. 2 for the annual cruise of the New York Y. C. and everything points to a very successful cruise. The racing programme will include the annual squadron runs and the very large number of ex-racers in the fleet, including many of the 40ft. and 46ft. classes, will make these races specially interesting. In the racing fleet proper there will be Wasp and Gloriana, with the new schooners Lasca and Alcese; with Marguerite, Iroquois and possibly Volunteer. The following general orders have been issued:

FLAG-SHIP ELECTRA, New York Yacht Club, Harbor of New York, July 15. General Orders No. 1.—The commodore hereby assumes command of the squadron. Mr. Stephen Peabody is re-appointed Fleet Captain. ELBRIDGE T. GERRY, Commodore.

FLAG SHIP ELECTRA, New York Yacht Club, Harbor of New York, July 15. General Orders, No. 2.

1. The vessels of the squadron will rendezvous at Glen Cove, on Tuesday, August 2.

2. Captains will report on board the flag-ship on the same morning at 11 o'clock when future movements of the squadron will be considered. Yachts will be in readiness to start on signal from the flag-ship immediately after the meeting if so ordered.

3. The race for cups presented by Capt. Ogden Goelet, will take place at Newport, on Friday, August 5, unless otherwise ordered.

4. During the cruise, the Owl and Game Cock colors will be raced for by the four-oared gigs and double scull cutters and dingies belonging to the yachts of the squadron, and the holder will be subject to challenge at any time on one day's notice.

5. There will also be a race for the steam and naptha launches belonging to the squadron, the time, conditions, and prizes of which will be hereafter announced by the Commodore.

6. The routine and rules contained in the club manual will be observed during the cruise. Attention is especially invited to the following amendments of the Signal Code, adopted at the third general meeting of the Club; and Captains are earnestly requested to correct their club books accordingly.

General signal F to read: "F.—Wants to speak with you."
General signal G to read: "G.—Dress ship (at...)."
General signal P to read: "P.—Prepare to get under way (at...)."
Special signal CF to read: "CF.—Race will come off (at ...)."
Special signal CG to read: "CG.—Race is postponed (until....)."
Special signal CN to read: "CN.—Finish off...."

7. The time of yachts competing in squadron runs will be taken by the Judges' boat, which will carry the American ensign at the fore, previous to the start.

8. The orders for the day will be signalled by the flag-ship each morning as soon after colors as practicable.

9. Captains are requested to apply aboard the flag-ship at all times during the cruise for any information affecting the movements of the squadron.

10 Captains are further requested during the cruise to utilize as far as practicable the stations and landing-floats of this Club, instead of availing themselves of other facilities for the purpose.

11 Yachts, when in squadron will take their ships' time in striking bells from that of the flag ship and in no case anticipate it.

By order of the Commodore, STEPHEN PEABODY, Fleet Captain.

A steamer will be provided to accompany the fleet to the rendezvous, and another to follow the race for the Goelet cups.

## Hull Corinthian Y. C., July 23.

HULL, MASS.—BOSTON HARBOR.

THE Hull Corinthian Y. C. sailed a very interesting race on Saturday, the principal feature being the 21ft. class, in which Mr. Nat Herreshoff sailed his fin-keel Vanessa against his centerboard Alpha, with Catspaw, Thrush and Exile. Alpha won, with Catspaw sailed by Mr. Geo. A Stewart, second, and Thrush, sailed by Capt. Joe Turner, third, the fin-keel taking only fourth place. The wind was light southeast and the six-mile course included running, reaching and beating, R D. also started in the class, but with a handicap, finally withdrawing. The times were:

FIRST CLASS—21-FOOTERS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Alpha, Brown, Dunne & Hunt | 23.10 | 1 26 15 | 1 06 14 |
| Catspaw, C. A. Prince | 26.06 | 1 26 45 | 1 08 27 |
| Vanessa, A. Bigelow, Jr. | 24.03 | 1 29 00 | 1 09 15 |
| Thrush, John Bryant | 27.02 | 1 28 45 | . . . . |
| Exile, J. F. Small | 26.03 | 1 30 10 | 1 11 33 |
| R. D., J. F. McIntyre | | Withdrew. | |

SECOND CLASS—19 FOOTERS.

| | | | |
|---|---|---|---|
| Caprice, R. W. Bird | | 1 45 15 | Not meas |
| Jewel, C. C. Hill | | 2 09 00 | Not meas. |

THIRD CLASS—21-FOOT CATS.

| | | | |
|---|---|---|---|
| Madge, J. W. Thayer | | 1 43 30 | Not meas. |
| Marjorie, M. C. Bouve | | 1 55 00 | Not meas. |

FIFTH CLASS—15-FOOTERS,

| | | | |
|---|---|---|---|
| Phyllis, W A. Comey | | 37 45 | . . . . |
| Victor, C V. Souther | | 39 25 | . . . . |

The first yacht in each class wins a silver trophy; Catspaw also wins a cash prize for second place.

## Monatiquot Y. C., July 23.

WEYMOUTH—BOSTON HARBOR.

THE first championship regatta of the Monatiquot Y. C. was sailed over the regular club courses off Fort Point on Saturday in a light east wind. Beatrice, a new yacht, did good work against White Fawn and the other old flyers. The times were:

FIRST CLASS.

| | Elapsed. |
|---|---|
| Beatrice, John Cavanaugh | 1 43 09 |
| White Fawn, H. A. Jones | 1 45 25 |
| Posy, R G. Hunt | 1 50 50 |
| Secret, E. F. Linton | 1 58 20 |
| Folly, J. F. Sheppard | 2 00 41 |
| Moondyne, A. J. Shaw | 2 04 20 |
| Gypsy, M. F. Drinkwater | Not timed. |

SECOND CLASS.

| | |
|---|---|
| Opechee, W. P. Barker | 1 43 32 |
| Lora, D. E. Whelan | 2 02 32 |

THIRD CLASS.

| | |
|---|---|
| Imp, W. F. Mayberry | 1 47 50 |
| Primrose, H. M. Faxon | 1 49 10 |
| Mab, John Shaw | 1 49 53 |
| Dandelion, Arthur Adams | 2 33 17 |
| Don, W. H. Shaw | 2 03 42 |

The yachts are not measured, so no corrected time could be calculated. Posy protested Beatrice and White Fawn for passing on the wrong side of Pig Rocks.

The judges were Henry Gardner, Dana Smith, George B. Bicknell, Edward T. Jordan, Frank H. Cowing, and L. W. Morrison.

## White Bear Yachting Association, July 16.

DELLWOOD, Minn.—Pennant race of the White Bear Yachting Association:

CLASS I.

| | Elapsed. | Corrected. |
|---|---|---|
| Wapsie | 1 25 45 | 1 23 23 |
| Hornet | 1 28 00 | 1 24 55 |
| Kitten | 1 25 35 | 1 24 58 |
| Storm King | 1 27 15 | 1 25 41 |
| Shark | 1 27 15 | 1 26 13 |
| Fortuna | 1 30 10 | 1 28 19 |

CLASS II.

| | | |
|---|---|---|
| Secret | 1 33 40 | 1 30 00 |
| Aurelia | 1 33 43 | 1 30 52 |
| Kelpie | 1 33 45 | 1 32 36 |
| Nushka | 1 33 10 | 1 33 10 |
| Queen | 1 36 25 | 1 36 11 |

Sloops and a catboat rounded the mark within 35s. without a foul or protest after overlapping for nearly a mile.

By an amendment to the sailing rules the fleet is now divided into two classes, catboots (II.) and sloops (I.).

A. A. MCKECHNIE, Sec'y.

## The Sinking of the Alva.

THE largest and finest steam yacht of the American fleet, Alva, owned by Mr. W. K. Vanderbilt, was cut down and sunk early on the morning of July 24 in a fog off Pollock's Rip, Nantucket Shoals. On Wednesday of last week Alva, in charge of Capt. Henry Morrison, formerly commander of the American Line steamship Illinois, with a crew of 52 men, left Newport for Bar Harbor. On board with the owner were Messrs. Frederick W. Vanderbilt, George W. DeForest, Winfield Scott Hoyt, Carrick Riggs and Louis Webb.

The yacht reached Bar Harbor on Friday afternoon, sailing for Newport at 3:30 P. M. on Saturday. When she was off the Shoals at 5 A. M. on Sunday, after a pleasant trip thus far, a dense fog was encountered, and the yacht anchored near some coasting vessels close by Pollock Rip Lightship. Her passengers were still asleep, but Capt. Morrison and the crew were on deck, a sharp lookout being kept, while the ship's bell was sounded constantly.

About 8:30 A. M. the large iron freight steamer H. F. Dimock, 1,786 tons, owned by the Metropolitan Steamship Co. and commanded by Capt. Chas. G. Berry, reached the shoals, bound from New York to Boston. It is claimed that she had stopped shortly before nearing the Alva, and was running slow at the time, but when she sighted the yacht in the fog she was unable to stop, and crushed into the port bow of the Alva, cutting her down below the water.

The sleeping passengers of the yacht were at once summoned, Mr. Vanderbilt on reaching the deck springing aboard the Dimock and helping his friends aboard her. Under Captain Morrison's directions, all of the Alva's boats, including the steam launches, were lowered and manned, everyone being safely taken off and transferred to the steamer.

Alva's launch started for Newport, while the Dimock laid by the wreck. The yacht settled and sank within a few minutes after the collision, lying on her starboard side in about six fathoms, with masts and stack above water. The Dimock reached Boston in the afternoon, the rescued passengers on the yacht taking the cars for Newport. When they left the yacht they were only pajamas and night clothes, but they were supplied by Capt. Berry with such clothing as the steamer afforded. Capt. Morrison came on to New York and on Monday, at 6 P. M., the Merritt Wrecking Co. sent the steamer Rescue from Staten Island to raise the yacht. The crew were paid off and discharged, each man being liberally recompensed by Mr. Vanderbilt for the loss of his effects.

W. K. VANDERBILT'S STEAM YACHT "ALVA."

The Alva was built in 1886 by Harlan & Hollingsworth, of Wilmington, Del., from the designs of Mr. St. Clare J. Byrne, of Liverpool, her principal dimensions being:

| | Feet. |
|---|---|
| Length over all | 285 00 |
| Length for tonnage | 256 00 |
| Length on l.w.l. | 252.00 |
| Extreme beam | 32.03 |
| Moulded beam | 32.00½ |
| Depth in hold | 19.01 |
| Diameter of wheel | 13.05 |
| Extreme draught | 16.08 |

She has been in constant use since 1887, having made three trips across the Atlantic. She is reported as insured for about two-thirds of her value.

## YACHT NEWS NOTES.

On July 23 the Greenville (N. J.) Y. C. sailed a special race, the regular event, for the Harrison cup, being postponed until July 30. The race was sailed over a 7-mile course in a fresh S.W. breeze, the times being:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Anita P | 4 08 45 | 5 14 47 | 1 06 02 | 1 04 02 |
| Lizzie | 4 08 35 | 5 13 25 | 1 05 10 | 1 05 10 |
| Alida P | 4 08 15 | 5 13 45 | 1 25 30 | 1 25 30 |

On July 25 the steam yacht Allegro, Col. S. V. R. Cruger, ran on the Niggerhead Reef, Thimble Islands, at 3 P. M. Col. Cruger was at the wheel, the yacht making twenty knots, her headway carrying her entirely over the reef, to the serious damage of her screw and shaft. The steam yacht Margaret went to her aid and escorted her into New Haven, and later on to Bridgeport for repairs.

The cruise of the Atlantic Y. C. began as per programme on July 23, with a rendezvous at Cold Spring Harbor, the fleet sailing on Saturday for Black Rock, where a stop was made over Sunday. On Monday the fleet sailed far Morris Cove. The following yachts make up the fleet: Schooner Waterwitch, Com. David Banks; steam yacht Kanapaha, Vice-Com. Moore; sloop Tigress, Rear-Com. James Wier, Jr.; steam yacht Orienta, E. R. Ladew; steam yacht Neaira, S. H. Austin, Jr.; schooner Una, J. F. Ackerman; sloop Athlone, E. B. Havens; sloop Rival, P. G. Sanford; sloop Daphne, W. H. Booth; sloop Concord, H. C. Roome; sloop Annie, J. M. Tappen; sloop Desireé, P E. Camp; sloop Portia, S. H. Mason, Jr.; sloop Penguin, George E. Brightson; sloop Nimpoy, H. H. Salmon, Jr.; sloop Aglaia, E. J. Bergen; catboat Gunhilde; steam yacht Ola, Mr. Harris, and sloop Forget-Me-Not, Butler Brothers. The fleet will sail to New London and thence to Greenport, where a race will be held for a prize offered by Vice-Com. Wier.

A regular meeting of the New York Y. C. was held at Delmonico's on July 21, with Com. Gerry in the chair. Beside the routine business in connection with the coming cruise, the club decided to give a reception to the officers of the United States cruiser New York on her return to the city, at which the silver punch bowl given by the club will be formally presented. Sec'y Oddie was empowered to secure statistics and prepare a report on the inland waterways to the Lakes and Chicago, which will be published for the use of all yachtsmen. The following members were elected: G. Weaver Loper, Lloyd Aspinwall, George W. Jones, Henry D. Tiffany, Colonel David E. Austen, William R. Hearst, William P. Ward, Grant P. Schley, F. E. Gilbert, William H Taller, Oliver J. Geer, G. Creighton Webb, Eugene Kelly, Jr., George Floyd Vingut, Lieutenant J. D. J. Kelly, U. S. N., Commander F. E. Chadwick, U. S. N., Alonzo Flint, William H. Mitchell, John G. Agar, Nathan D. Bill, John C. Furmer, Chauncey Marshall, William A. Hazard, Stewart Shilito, George Austin Morrison, George Austin Morrison, Jr., Harry M. Gillig, John E. Dwight, Lieutenant James H. Bull, U. S. N., James M. Waterbury, Jr., Lawrence Waterbury, Captain J. R. de Lamar, A. E. Austin, James Edward Tolfree, U. S. N., Duncan S. Ellsworth, Thomas G. Condon, Thomas S. Rodgers, U. S. N.

On July 20 the United States Circuit Court of Appeals, Judges Lacombe, Shipman and Wallace sitting, handed down a decision in the case of the United States against the schooner yacht Miranda and

George H. B. Hill, affirming the decree rendered by Judge Benedict in the United States District Court releasing the vessels from the payment of "light money." Judge Shipman says: "We are of the opinion that the certificate issued from the Custom House, on Sept. 15, 1886, is a 'regular document,' proving the schooner Miranda to be American property within the meaning of Section 4,226, and that she is by virtue of that section exempt from liability to pay light money."

On July 20 the naphtha launch Bob, owned by Robert Soltau, of New York, was found bottom up off Long Beach Life-Saving Station, on the south shore of Long Island. Mr. Soltau, a wealthy India rubber dealer, had owned the boat for some weeks, but was not experienced in managing her. Two days before, in company with his younger brother, Ernest, he left Eighty sixth street, East River, New York, to run to Long Beach, where he intended to keep the yacht all summer. That same evening the launch was seen attempting to cross the bar at Far Rockaway Inlet, and the supposition is that she was rolled over in the heavy sea, and both men were drowned.

Our report of the Massachusetts Y. C. race of July 15 was incorrect so far as the weather is concerned, the yachts crossed the line in a heavy S.W. squall, which held its force through the whole race, the yachts lugging whole sail, there being no chance to stop and reef. Under these trying conditions the race was one of the most interesting of the season. Catspaw, sailed by Mr. Stewart, scored a most creditable win.

The latest phase of steam yacht racing is a newspaper controversy between the owners of Yankee Doodle and Norwood, which is likely to result in nothing. Thus far there are no indications of a *bona fide* race between any of the yachts, new or old, this season.

The steam yacht Sunbeam, recently sunk in Australian waters, was not the well known yacht owned by Lord Brassey, but an older craft built in 1861. She was an iron vessel and her loss was due to corrosion under the engine room flooring.

The arrangements have been made for a race for the Fisher cup between Norah, of Belleville, and Onward, of Rochester, to be sailed on July 29 or 30 on the Bay of Quinte.

On July 18 at midnight the schooner Alert went ashore on Goat Island, Newport, but was hauled off by the revenue cutter Dexter without injury.

# Rifle Range and Gallery.

## New Jersey Rifle Shooting.

[*Specially Reported for Forest and Stream.*]

HUDSON RIFLE CLUB, Marion, N. J., Capt. Henry L. Hansen.—Monday evening, July 18.—The scores made in the medal competition of the several classes are appended below. The conditions were 10 shots, off-hand, 25-ring target.

First Class.

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| C E Bird | 25 | 25 | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 23—244 |
| J Rebhan | 25 | 25 | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 23—243 |
| A Steuber | 25 | 25 | 25 | 25 | 24 | 24 | 24 | 23 | 23 | 22—238 |

Second Class.

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| J Smith | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 19—236 |
| M Hoff | 25 | 25 | 24 | 24 | 24 | 23 | 23 | 22 | 22 | 21—234 |
| T A Reynolds | 25 | 25 | 25 | 24 | 24 | 23 | 22 | 22 | 22 | 20—232 |

Third Class.

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| S A Middleton | 25 | 25 | 25 | 24 | 24 | 23 | 22 | 22 | 22 | 19—230 |
| A Heidorf | 24 | 25 | 25 | 25 | 22 | 23 | 23 | 23 | 20 | 19—229 |
| C Schleinacher | 24 | 23 | 23 | 20 | 20 | 20 | 18 | 18 | 17 | 17—201 |
| J Kneer | 25 | 23 | 23 | 22 | 17 | 16 | 16 | 15 | 12 | 11—180 |

A feature of the evening was a 50 shot match between C. E. Bird and John Rebhan, which the former succeeded in losing by these scores:

| | | | | | |
|---|---|---|---|---|---|
| C E Bird | 238 | 241 | 244 | 239 | 241—1203 |
| John Rebhan | 240 | 243 | 243 | 239 | 241—1206 |

"Jerry" Steuber still holds the "shooting" championship of the club, although hard pressed for the honors (?) by Charles E. Bird. The latter alleges that Steuber derives considerable assistance from his (Steuber's) rifle, which it is alleged pulls a little over 410lbs., for it seems to strengthen his lungs when he gets a "flinger;" in other words, a bad cartridge, or "the —— gun moved just as I pulled the trigger." It is said that Jerry's laurels will be soon taken from him, as C. E. has purchased a patent lung strengthening machine. But appropos, as a team of shooters, Jerry Steuber and C. E. Bird can't be beat, and take Jay H. Kay's word for it.

Miller Rifle Club, Hoboken, Captain Richard W. Dewey, Wednesday, July 20. To-night's scores are below. The conditions were ten shots off-hand, 25-ring target, possible 250:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Frederick Brandt | 25 | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 22 | 21—239 |
| G Schlicht | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 21—238 |
| D Miller | 25 | 25 | 25 | 24 | 24 | 24 | 24 | 23 | 22 | 21—237 |
| F Kloepping | 25 | 25 | 25 | 24 | 24 | 24 | 23 | 23 | 22 | 22—237 |
| A Meyns | 25 | 25 | 25 | 25 | 24 | 24 | 24 | 23 | 23 | 20—237 |
| L Sohl | 25 | 25 | 25 | 24 | 24 | 24 | 23 | 23 | 23 | 21—237 |
| F Liell | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 22 | 22 | 20—236 |
| J H Kruse | 25 | 25 | 25 | 24 | 24 | 24 | 23 | 22 | 22 | 21—235 |
| J Carragher | 25 | 25 | 24 | 24 | 24 | 23 | 23 | 22 | 21 | 21—232 |
| D Peters | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 23 | 21 | 21—231 |
| H D Hencken | 25 | 25 | 24 | 24 | 24 | 23 | 22 | 21 | 21 | 20—229 |
| H Seltenreich | 25 | 25 | 25 | 24 | 23 | 23 | 22 | 22 | 22 | 21 19—227 |
| H F Meyer | 25 | 25 | 24 | 24 | 23 | 23 | 22 | 22 | 22 | 18 18—223 |
| R Zoch | 25 | 24 | 23 | 23 | 23 | 23 | 21 | 20 | 20 | 20—222 |
| J J Devitt | 25 | 25 | 24 | 24 | 24 | 21 | 21 | 20 | 18 | 18—220 |
| F Kammel | 25 | 25 | 24 | 24 | 22 | 22 | 21 | 18 | 18 | 18—217 |
| F J Dunsteadt | 25 | 24 | 23 | 23 | 21 | 21 | 21 | 20 | 20 | 19—215 |

The members are greatly pleased over the fine reproduction of a photograph of their victorious team.

Lady Miller Rifle Club, Hoboken, N. J., President Mrs. H. Stadler, Thursday, July 21.—The scores made to-night in the prize competition are appended below. The conditions were 10 shots rest, 25-ring target, possible 250:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Miss M Miller | 25 | 25 | 25 | 25 | 25 | 24 | 24 | 24 | 24 | 23—244 |
| Mrs B Katenkamp | 25 | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 24—244 |
| Mrs H Stadler | 25 | 25 | 25 | 25 | 24 | 24 | 24 | 24 | 23 | 23 242 |
| Miss L Prien | 25 | 25 | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 22—241 |
| Miss K Born | 25 | 25 | 25 | 24 | 24 | 24 | 23 | 23 | 23 | 23—239 |
| Mrs D Miller | 25 | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 22 | 21—235 |
| Mrs H F Meyer | 25 | 25 | 24 | 24 | 23 | 23 | 23 | 23 | 22 | 21—238 |
| Mrs A Meyns | 25 | 25 | 24 | 24 | 24 | 23 | 23 | 23 | 21 | 21—233 |
| Miss Henckel | 25 | 24 | 23 | 21 | 20 | 20 | 17 | 16 | 15 | 14—195 |
| Mrs A Coodts | 25 | 24 | 23 | 23 | 22 | 21 | 21 | 21 | 0 | 0—180 |

The shoot arranged by the Union Athletic Club of Hoboken for members closed recently. Three prizes were offered for competition. The winners were: First prize, James Malloy, with score of 116, silver goblet; second prize, Ernest Fischer, 175, silver watch; third prize, Harry Lohman, Jr., 114, gold locket. Others who made good scores were N. Grudens, M. J. Murray, C. J. Brown, C. Brower, G. Copp, George Stein, R. J. Tolles, Geo. Naegeli.

Excelsior Rifle Club, Jersey City, Friday, July 22, Greenville Schuetzen Park.—The scores of to-day on the 200yds. range of the club are appended below. Oscar Boise with his score of 206 and 25 points added captured the medal. The conditions were 10 shots off-hand, 25-ring target, possible 250:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| L P Hansen | 25 | 24 | 23 | 23 | 21 | 21 | 21 | 20 | 20 | 20—218 |
| O Boice | 23 | 25 | 24 | 23 | 23 | 18 | 18 | 17 | 17 | 16—206 |
| W J Channing | 24 | 23 | 23 | 22 | 20 | 19 | 18 | 18 | 17 | 16—201 |
| W H Robidoux | 24 | 23 | 22 | 21 | 20 | 19 | 19 | 18 | 18 | 17—201 |
| Wm Weber | 24 | 23 | 23 | 22 | 20 | 20 | 18 | 17 | 17 | 14—198 |

The record in the medal shoot now stands L. P. Hansen won three times, Wm. Weber won three times, O. Boice won twice.

The five-men team match arranged between the Miller Rifle Club and All Secaucus, took place at Tammany Hall Range, Secaucus, N. Y., last Sunday afternoon. Only two of the All Secaucus put in an appearance. The distance was 200yds. August Meyns led the scores with the fine total of 217, George Schlicht came next with 215 and Dave Miller third with 214. The scores made were:

Miller Rifle Club.

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| D Miller | 24 | 19 | 19 | 21 | 21 | 24 | 18 | 21 | 22 | 25—214 |
| G Schlicht | 19 | 25 | 21 | 20 | 19 | 24 | 22 | 24 | 21 | 20—215 |
| E Fischer | 19 | 16 | 23 | 22 | 14 | 19 | 22 | 22 | 16 | 22—195 |
| F B andt | 16 | 16 | 23 | 23 | 12 | 22 | 15 | 20 | 21 | 20—188 |
| A Meyns | 20 | 19 | 20 | 20 | 23 | 22 | 24 | 21 | 23 | 22 23—217—1029 |

All Secaucus.

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| J Heflich | 19 | 23 | 18 | 15 | 15 | 24 | 23 | 18 | 21 | 19—195 |
| G B Bergkamp | 14 | 18 | 21 | 9 | 20 | 18 | 8 | 19 | 15 | 17—159— 354 |

Scorer, J. H. Kruse.

The stakes were $10 a side and refreshments. The absentees on the Secaucus team were several members of the Herman Rifle Club.

Hoboken Rifle Club, Hoboken, N. J., Monday evening, July 25.—The scores made this evening are appended below. The conditions were: 10 shots, off-hand, 25-ring target, possible 250;

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Wm F Dilger | 25 | 25 | 24 | 24 | 24 | 24 | 23 | 22 | 20 | 19—230 |
| J H Kruse | 25 | 24 | 24 | 24 | 24 | 23 | 23 | 22 | 20 | 19—228 |
| F W Kroeger | 25 | 24 | 23 | 23 | 23 | 22 | 22 | 20 | 20 | 18—220 |
| Chas Paasch | 25 | 25 | 24 | 23 | 23 | 22 | 22 | 2 | 18 | 18 220 |
| Jno Stein | 25 | 25 | 23 | 23 | 23 | 21 | 21 | 20 | 19 | 19—219 |
| J Schneider | 25 | 24 | 24 | 24 | 23 | 20 | 20 | 19 | 18 | 18—215 |
| M Raedeger | 25 | 25 | 25 | 23 | 21 | 20 | 20 | 18 | 18 | 17—212 |
| O Keller | 25 | 25 | 25 | 24 | 24 | 20 | 16 | 16 | 15 | 15—204 |

The members are working hard to make the trick, fancy and difficult shooting club championship affairs between F. W. Kroeger and J. H. Kruse a success. The event takes place in Wisch's Hall, Hoboken, on Aug. 7. A number of clever variety performers will also appear.

## North End vs. Schuetzen Verein.

EPHRATA, Pa., July 22.—The North End Rifle Club held its regular monthly "rest-shoot," on its new range on the grounds of the Ephrata Shooting Association, this afternoon, with the following results: the weather being very fine, distance 185yds., standard American target:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| L M Wiest | 9 | 9 | 10 | 10 | 9 | 10 | 10 | 10 | 10 | 10—97 |
| W D Winters | 10 | 8 | 8 | 9 | 10 | 10 | 10 | 9 | 8 | 10 92 |
| J A Stober | 9 | 6 | 9 | 7 | 8 | 7 | 10 | 9 | 10 | 8—83 |
| D B Lefer | 10 | 8 | 6 | 7 | 10 | 7 | 5 | 9 | 10 | 10—82 |
| J M Sheaffer | 8 | 10 | 9 | 7 | 8 | 6 | 5 | 7 | 6 | 7—73 |

The next meeting will be off-hand, Friday, Aug. 12.

Ever since the North End Rifle Club was organized it has been customary for its members to annually meet the members of the Lancaster Schuetzen-Verein in friendly contest, either on the shooting grounds of the latter or on the grounds of the former. In these contests the North End boys invariably came out the winners, and many a handsome badge they took from the Lancaster boys, and they refused to enter into a contest with the North End marksmen where a medal was to be shot for, preferring to purchase a fine gold medal and give it to the member of the Ephrata team who did the best shooting.

The contest for the present year was arranged some time ago between the captains of these two clubs and was to consist of two matches, the first to be held at Eneleside, Lancaster, the second to be held on the shooting grounds of the Ephrata Gun Club, where the North End Club has it range. No medal was to be shot for in these matches. The Lancaster boys were willing to muster as many men as the Ephrata team could furnish, and have a friendly bout, a real good time and see which team could do the best scoring. The first match came off several days ago at Lancaster and proved a "Waterloo" for the North End boys. It was not owing to poor marksmanship alone that they suffered defeat, but rather to the very excellent shooting by the Lancaster boys, whose scoring was by far the best they ever did in contest with the Ephrata team.

Each team entered 8 men, 10 shots being allowed to each man. Out of a possible 800 points the Lancaster shooters scored 596, or an average of 74½. The North End boys scored 570 points, 26 points less than their opponents, or an average of 71¼. The following is the full score of points made by each club:

Schuetzen-Verein.

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| J H Wentzel | 7 | 10 | 9 | 7 | 9 | 8 | 8 | 7 | 10 | 8—83 |
| Thos Anderson | 7 | 8 | 9 | 8 | 6 | 8 | 8 | 6 | 10 | 0—70 |
| Jacob Wolfer | 8 | 8 | 6 | 7 | 6 | 5 | 6 | 4 | 4 | 7—61 |
| Benj Biehl | 8 | 8 | 6 | 9 | 7 | 6 | 8 | 5 | 5 | 9—71 |
| D W Wentzel | 10 | 8 | 10 | 9 | 8 | 10 | 8 | 7 | 8 | 8—86 |
| Chas Franciscus | 9 | 7 | 9 | 10 | 6 | 10 | 7 | 10 | 7 | 5—80 |
| Chas Herbert | 6 | 9 | 5 | 8 | 8 | 5 | 8 | 10 | 7 | 10—76 |
| Peter Dommel | 5 | 7 | 8 | 9 | 10 | 5 | 7 | 8 | 5 | 5—69—596 |

D. B. LEFEVER, Sec'y.

## St. Louis Sharpshooters.

ST. LOUIS, July 17.—The King shoot of the South St. Louis Sharpshooters was held to-day at Creve Coeur Lake. The King medal shoot was open only to members of the South St. Louis Club, and the lucky winner was Mr. John Morf, shooting master. The other events were open to all and the following scores were made:

Ring Target.

| | | | | | | | | |

## Massachusetts Rifle Association.

BOSTON, July 23.—The Massachusetts Rifle Association held its regular weekly shoot at its range to-day.

There was a fair attendance of shooters, but no high scores were made, there being a bad fish-tail wind.

There was a large number of military marksmen in attendance. Below are the scores in detail, distance 200yds., standard American target, all being re-entry matches:

All-Comers' Off-Hand Match.

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| D N Winn | 7 | 8 | 7 | 9 | 9 | 7 | 7 | 10 | 5 | 7 77 |
| O Moore | 10 | 6 | 6 | 7 | 9 | 8 | 9 | 8 | 5 | 8—76 |
| F Daniels | 6 | 8 | 8 | 8 | 7 | 5 | 9 | 5 | 8 | 10—74 |

All-Comers' Rest Match.

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| J Francis | 12 | 12 | 11 | 12 | 10 | 8 | 11 | 10 | 12 | 11—109 |
| H L Willard | 11 | 12 | 11 | 11 | 12 | 11 | 10 | 10 | 10 | 9—107 |
| J Hurd | 8 | 12 | 11 | 11 | 10 | 9 | 8 | 8 | 12 | 12—101 |

All Comers' Military Match—Creedmoor Target.

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| G L Marshall | 4 | 5 | 5 | 4 | 4 | 4 | 4 | 4 | 5 | 4—43 |
| D Martin | 4 | 4 | 4 | 4 | 5 | 4 | 4 | 4 | 5 | 4—42 |

Pistol Medal Match—50yds.

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| L Bell | 10 | 10 | 10 | 8 | 8 | 10 | 10 | 10 | 9 | 10—95 |
| A G Stevens | 9 | 8 | 10 | 10 | 9 | 9 | 9 | 10 | 9 | 10—92 |

ON each Wednesday from July 13 to Dec. 28, inclusive, the Massachusetts Rifle Association, in addition to the usual practice and sweepstake matches, will offer the following list of prizes, open for competition to all trap-shooters, subject to these conditions: This "Gold Coin and Merchandise match" shall be shot through a series of 12 competitions; entrance fee 50 cents each day; scores—20 single birds, Keystone system, and 10 single birds, unknown angles. The medal will be delivered at the close of each day's contest to the competitor making the highest score of the day, who will hold and vouch for it, and return it to the secretary, at the range, on the day of the succeeding shoot. No competitor excepting the final receiver of the champion medal, can win more than one prize. Ties to be shot off at 20 targets. Shooting to begin at 10:30 A. M. The Gold Coin match will be shot at 2 P. M. Birds 2 cents each to non-members. Bird cards redeemed.

## Wilkesbarre Gun Club.

WILKESBARRE, Pa., July 25.—The following scores were made on the shooting grounds at the Wilkesbarre gun factory on Saturday. The day was rather warm for shooting, but all seemed to enjoy it.

First match, 25 single U. S. pigeons, known angles:

| | |
|---|---|
| Dr Warren | 0100111111111101010011011—17 |
| W K Park | 0111100111111111100011010l—17 |
| Tom Eley | 1001110101011011100110101—16 |
| R Ernest | 1000101101010000000011011—10 |

Second match, 25 bluerocks, Paul North's expert target:

| | |
|---|---|
| Dr Warren | 1111111101111111010101l1—21 |
| W K Park | 1111111101011010111111l0—21 |
| Tom Eley | 1001111111001101100111l1—18 |
| R Ernest | 0101101001001101010111l1—14 |
| J Roades | 0110000100110101010010100—10 |

We hope to send a delegation to the Pennsylvania State shoot at Reading Aug. 9 to 12. W—BARRE.

# Trap Shooting.

All ties divided unless otherwise reported.

Aug. 6-7.—Sheboygan Gun Club tournament, Sheboygan, Wis.

Aug. 9-11.—Arkansas State Sportsmen's tournament, at Hot Springs, Ark.

Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eiler, Sec'y.

## DRIVERS AND TWISTERS.

The second annual shooting tournament of the Kansas City, Kans., Gun Club will occur at Chelsea Park on Aug. 3 and 4. The committee in charge, Messrs. N. Smock, P. Larson, F. M. Soward, J. J. Rooney and W. E. Stevens, has arranged an interesting programme of 20 shoots covering the two days, the prizes being very liberal ones. Already a large number of answers have been received from the invitations sent out, and all the prominent crack shots of the two States will be present. Shooting will begin at 9 o'clock each day, and will be governed by the latest American Shooting Association rules.

* * *

Wm. Tell Mitchell, of Lynch Station, Ma., writes us that he would like to have a go with C. F. Barnes, of Wheeling, West Va., in a match at 200 live birds each, gun below the elbow until bird is on the wing. Mr. Mitchell will shoot for a reasonable stake, and will allow Mr. Barnes his railroad fare if the latter will shoot the match at Richmond, Va. If Mr. Barnes will communicate with Mr. Mitchell at the above address a match can readily be arranged.

* * *

The rivalry between the New Haven and Willimantic gun clubs, the two crack teams of Connecticut, culminated in a team match for $100, which was shot on the grounds of the local club, July 21. The New Haven men won by a handsome margin. The score: Teams of four, at 20 targets each: New Haven team—Sherman 26, Savage 24, Langdon 27, Potter 30; total 107. Willimantic—Mack 17, Edgarton 23, Webb 21, Burbridge 25; total 87.

* * *

At the shoot of the Johnstown (N. Y.) Gun Club on July 21, Pierson broke 25 out of 30 for the club medal, Chapman scored 24, Northrup 25, Partiss 25, Walrath 20, Timmons 24, Kennedy 22, E Potter 23, Hildebrandt 24. In a series of sweepstakes at 10, 15, 10 and 5 targets in the order the scores were: Pierson 10, 13, Kennedy 10, 15 10; Hildebrandt 10, 15, 10; Northrup 9, 15, 10, 5; Partiss 8, 4; Timmons 10 4; Walrath 10, 14, 8, 4.

* * *

Shooters will be pleased to learn that for five years to come they will be able to smash targets and ruffle feathers on the old Jersey City Heights Gun Club grounds at Marion. Last week a new arrangement was entered into and a five year lease signed. The grounds will be cut down about 20yds. on the Marion side, but otherwise they will not be disturbed except by moving the traps 10yds. further to the left.

* * *

The Stillwater Gun Club, of Minnesota, has elected the following officers: E. S. Brown, President; L. Manwaring, Vice-President; C. W. Merry, Secretary-Treasurer. The executive board is composed of the officers elected, Herman Jassoy and Harry Heisel. A proposition for the consolidation of the Stillwater and St. Croix clubs has been tabled for the present.

* * *

The monthly competition for the New Utrecht Rod and Gun Club's live bird trophy will be held at Woodlawn Park, on Saturday, July 30, commencing at 1:30 P. M. sharp. A clay bird shoot for gold and silver medals will take place Saturday throughout the year, at 2 P.M. sharp.

* * *

John Riggott, of Rockaway, N. J., is said to be after the scalp of Frank Class, of Morristown, who is styled the champion of New Jersey. Mr. Riggott is a cool, nervy shot and skillful withal, and a contest between the two would be worth seeing.

* * *

E. D. Miller states that the Union Gun Club will hold a tournament at Springfield, N. J. on August 17 and 18. The first day's shooting will be at Keystone targets and the second day at live birds. Mr. Miller says he will have a good supply of first class birds.

* * *

The representatives of the press were handsomely entertainrd by members of the New Jersey Shooting Club at Saturday's League shoot. The only complaint they were justified in making was on account of the poor facilities for securing scores.

* * *

The eleventh annual tournament of the Madison County Sportsmen's Association will be held at Cazenovia, N. Y., next week, and some very valuable prizes will be awarded in the open as well as the State events.

* * *

The Pennsylvania sportsmen are laboring hard for the success of their State tournament. The members of the Reading Shooting Association are all workers and are doing yeoman's service.

* * *

The fourth annual tournament of the West Point (Miss.) Gun Club to be held on August 9 to 12, inclusive is expected to be a grand affair. The program is an attractive one.

* * *

The Sheboygan Gun and Rod Club will have a tournament on the Lake front at Sheboygan, Wis. on August 6 and 7. All the shooting will be at bluerock targets.

* * *

The Baltimore and Capital City Gun Clubs should enter teams along with Connecticut, New Jersey and Massachusetts during the Keystone tournament.

* * *

Jack Parker wants to see "everybody" at the Des-chree-shos-ka Island shoot in August. And by the way, Jack is now in the employ of the bluerock people.

* * *

The "Jack rabbit" system will be used at the tournament of the Standard Gun Club to be held at Acton's Park on Aug. 2 and 3. This is very popular in Harrisburg.

* * *

What has become of the proposed team match between the old North End Club, of Frankford, Pa., and the Union Gun Club, of Springfield, N. J.?

* * *

Cincinati wants to pit a team of five of her representative marksmen against a like team from any city in Ohio at 50 targets or live birds per man.

* * *

Do not forget the shoot at Rockville, Mo., on Aug. 25 and 26. Everybody guaranteed a good time. Write for circulars to Sec'y, Jas. P. B. Veris.

* * *

The Dexter Park Team Shooting League will hold its monthly team contest at Dexter Park to-morrow. Live birds will be used.

* * *

Auburn is making great preparations for the Interstate shoot to be held there the second week in September.

* * *

The Johnstown (N. Y.) Gun Club will hold a two days' tournament early in August. Frank Northrup will be there!

* * *

The Black Bear Inn will catch a large number of visitors during the Pennsylvania State shoot.

* * *

Dr. Fort says the Baltimore Gun Club can defeat any 10-man team in the State "for $50."

* * *

The Oatka Gun Club, of LeRoy, N. Y., has elected James M. Hewitt as vice-president.

The Glenmore Rod and Gun Club has opened a summer headquarters at Canarsie.

* * *

Considerable live bird shooting will be done at Claremont this fall.

* * *

H. A. Penrose says the New London shoot will be a record breaker.

* * *

Brewer and Mitchell are to shoot a 100-bird match for $500 a side.

* * *

Billy Wagner was in great form at Tolchester Beach.

* * *

Jimmy Malone is a first-class hustler. C. H. TOWNSEND.

### The Emerald Gun Club.

Twenty-three members of the Emerald Gun Club were present at the regular monthly shoot held at Dexter Park, L. I., on Tuesday, July 19. Louis Miller had furnished a fine lot of birds for the contest for the three club medals in their respective classes. Each man shot at 10 birds, unknown traps, club handicap, Emerald Gun Club rules. There was some good shooting, four making a score of 9 out of 10. Col. J. Voss won the Class A medal, Dr. Horn that in Class B, although he tied with H. Thau; the latter having won it on two previous occasions was not eligible to take it for the third time. W. Hogan won the Class C medal for the second time with 7. The score:

| | | | |
|---|---|---|---|
| Dr Hudson | 1211010111—8 | P Butz | 1011200010—5 |
| J Voss | 2121110111—9 | J Porter | 1001200000—3 |

| J Maesel | 1012202012—7 | | |

### Rockville Rod and Gun Club.

ROCKVILLE, Md., July 17.—The Rockville Rod and Gun Club was organized here Jan. 27 last. The officers for the ensuing year are Jas. P. B. Veirs, President; Hon. Geo. Peter, Vice-President; John W. Ketchner, Secretary; David H. Warfield, Treasurer; Wm. H. Robbett, Captain, and Harry C. Hurley, Lieutenant. Our club is quite a large one considering the size of our town, it having about forty members on its roll book, and our grounds are such that any club could justly be proud of, being close up to town and being well fitted by nature for the purpose, having plenty of shade and spring water. Here in old Montgomery, the banner county of western Maryland, within sixteen miles of the National Capital, where the hand of man has made so much improvement and game has become so scarce in the last few years, our members have at last realized the fact that either the flagrant violation of the game laws throughout the county, and especially along the Potomac, must be stopped, or in only a very short time our sport at wing-shooting will become a mockery. Our sport here at fishing is most exclusively for the small-mouth black bass.

The points along the Potomac where angling is mostly indulged in are Pennyfields, Point of Rocks, Hancock and Weaverton, though Pennyfields, about twenty-five miles above Washington, is the mostly frequented point. Here at this place is where, during the past Administration, ex-President Cleveland made some good catches. We hope to have a good many sportmen with us on Aug. 25 and 26 next, when our club will give a two-days' shooting tournament. V.

### Wilson Wins the Takanassee Cup.

THE shoot for the Takanassee cup was the drawing magnet on July 21, at the west end of Long Branch. The conditions were a sweepstake at $20 each, 15 birds, handicap rise, ties at three birds. The entries were: Chauncy Floyd Jones 28yds., Mr. Williams 30yds., Fred Hoey 30yds., Captain Money 30yds., Dr. Wilson 28yds., L. S. Thompson 30yds., W. P. Thompson 27yds., N. Simpkins 28yds., Phil Daly 27yds.

Fred Hoey and Dr. Wilson tied at 14 killed birds, the former missing his 13th and Wilson his second. In the shoot off Dr. Wilson had to kill 4 out of 5 to win.

The best shooting of the day followed in a sweep, $10 each, at 5 birds, all at 26, 27 and 28yds., allowed one miss as one bird. The entries were: Floyd Jones, Williams, Fred Hoey, Captain Money, Dr. Wilson, E. G. Murphy, L. S. Thompson, W. P. Thompson, Nat Simpkins, "Phil" Daly and Sullivan.

Five stayed in with straight scores, namely: Murphy, Floyd Jones, L. S. Thompson, "Phil" Daly and Sullivan. On the shoot off Sullivan missed his 12th, Floyd Jones missed his 20th, "Phil" Daly missed his 24th, counted as no bird, and killed his allowance. Daly, Murphy and Thompson then went on and shot 35 straight, when darkness prevented the finish and the stakes were divided. This is a remarkable performance at 21yds. boundary—105 birds killed straight.

### The Linden Grove Gun Club.

THE regular monthly shoot of the Linden Grove Gun Club took place at Dexter Park, L. I., on Friday, July 22. There was a fair attendance of members, who competed at seven birds each for the best average of eight shoots during the season for the club's gold medal and extra prizes. Some good shooting was made, the birds being strong and fast. A sweepstake match and several small sweeps were shot off, the results as follows:

| | | | |
|---|---|---|---|
| P J Eppig | 0012000—2 | C Englebrecht | 1101111—6 |
| J Birmel | 2121201—6 | J Martin | 1111110—6 |
| C Horney | 1221212—7 | L New | 1021001—4 |
| J Schlieman | 1111111—7 | F Ibert | 2210120—5 |
| T Eich | 0002110—3 | C Birmel | 2212112—7 |
| A S Eppig | 2112211—7 | | |

### Shooting at Peekskill.

THE White and Peekskill gun clubs had a match at live pigeons on July 13 on the grounds of the Peekskill Club. Chas. S. Raymond and Wilbur S. Gettel are members of the Peekskill Club and were in the team. The scores made, out of a possible 25, were as follows:

| White Plains. | | Peekskill. | |
|---|---|---|---|
| Thos Ward | 22 | Wm H Pierce | 18 |
| Eugene Halpin | 21 | John B Halstead | 18 |
| Wm Ward | 18 | Wilbur G Gettel | 22 |
| Edwin Ward | 18—79 | Chas S Raymond | 20—78 |

A second shoot under the agreement is to be shot at White Plains in the near future.

### Kings County Gun Club.

ONLY seven members of the Kings County Gun Club were present at the regular monthly shoot at Dexter Park, on Wednesday July 20. H. Zirkell and F Greiner tied for the club medal with 8 out of 20, and on the shoot-off Greiner won. Several sweepstakes were shot off at 6 targets each, 3 moneys. The scores:

R Zirkell, .10101011100000000110—8 J Linstedt.0000101000001111O0016—7

### Garfield Goings-On.

CHICAGO, July 19.—The Garfield Gun Club has accepted an invitation to shoot a friendly match with the North-Western Gun Club, at Avondale, Saturday, the 23d inst. Train will leave the North-Western Depot at 1:30 P. M. There will be no shooting on our grounds on that date. Notice has also been given that a photograph of our members and shooting grounds will be taken Saturday, July 30.—GEO. H. BROWN, Sec'y.

### The West Side Trap-Shooting League.

THE third meeting of the West Side Trap-Shooting League was held on Thursday, July 21, at Woodlawn Park, Gravesend, L. I. The five clubs that compose the league sent teams of 10 men each to compete for the two subscription cups for the first and second best aggregate scoring teams at the five shoots. The Atlantic Rod and Gun Club, Fountain Gun Club, New Utrecht Rod and Gun Club, Erie Gun Club and Coney Island Rod and Gun Club were the clubs entered, and their teams shot in the same order. The shoot was started one hour late. Up to the 42d round the Erie Gun Club held a lead over the New Utrecht and Coney Island teams, the Atlantics and Fountains being last. After the said round the Coney Islands and New Utrechts alternately led up to the 91st round, when they again tied with 81 each. The Coney Island team just managed to win by one bird at the finish with a score of 89, New Utrechts second with 88, Fountains third with 83, Atlantics fourth with 82, and the Erie last with 76.

The birds were a medium lot of flyers, but the majority of those missed were strong quartering drivers. The score:

Atlantic Rod and Gun Club.

### New York German Gun Club.

THE members of the New York German Gun Club held their regular monthly shoot at Dexter Park on Monday, July 18, several days prior to their recognized date of shooting, on account of one of the members being about to take a trip to the Vaderland. The birds furnished by Bonden were fast ones and a good many were missed. There were two medals shot for at 10 birds each, H and T traps, modified Long Island rules. The ties for the best scores of six were shot off to determine the winner. J. Schlicht won the first and P. Garms, Jr., the second. Two small matches were shot off and then followed two shoots, the losing team to pay for the birds. The score: Referee, Mr. J. Carwein. Scorer, Mr. C. A. Dellar:

| | | | |
|---|---|---|---|
| P Garms | 12010010—1 | F Santer | 11100001—4 |

### Match Shooting at Utica.

UTICA, N. Y., July 22.—Henry L. Gates, of this city, defeated Charles H. Mowry, of Syracuse, to-day, after the most stubborn contest ever seen here. This was the second match between these gentlemen and was shot under expert rules from five traps. The first match was shot in Syracuse in May and Mowry won easily by the score of 85 to 76. The final match will be shot in Syracuse in September. Appended is the score:

| | |
|---|---|
| Gates | 1111011111011110111111111—22 |
| | 1111101111111111111001011—22 |

### Wauregan Gun Club.

THE members of the Wauregan Gun Club had a good day's sport at their new shooting grounds at Pelham Heights, Westchester, N. Y., on Tuesday, July 19. Eight competed for a new gold medal given by W. F. Brickner, the member making the best scores at five out of six shoots to become the owner of it. E. Bornhoeft and W. Harris tied with 8 each, and on the shoot-off the former won. Several sweepstakes and match shoots followed. The scores:

Ten live birds, 5 traps, 25yds. rise, 80yds. boundary, M. H. rules, gold medal, wind light S.W., weather fine, birds first class:

| | | | |
|---|---|---|---|

| W H Brickner | 12001—3 | 12011—4 |
| G W Silberhorn | 10110—3 | 11012—4 |
| W Harris | 10120—3 | 10101—3 |

No. 3, 3 birds, $3 entrance, won by Brickner.
Other sweepstakes followed.

### Colt Hammerless Gun Club.

HARTFORD, Conn., July 23.—The following scores were made by members of the Colt Hammerless Gun Club, at 25 bluerocks each, to-day:

| | | | |
|---|---|---|---|
| John Alger | 23 | "McGinty" | 18 |
| Fred Risley | 22 | O B Treat | 17 |
| E Decker | 21 | C W Vibberts | 16 |
| A Willey | 20 | F Olmstead | 16 |
| T P Bill | 20 | Chas Higby | 16 |
| C H Burbidge | 19 | S B Douglas | 15 |
| D S Seymour | 13 | | |
| J J Peard | 12 | | |
| S Hills | 12 | | |
| John Melrose | 11 | | |
| A C Collins | 8 | | |
| M E White | 7 | | |

Mr. John Alger won the club medal.

### The Pennsylvania State Tournament.

ONE of the most instructive as well as attractive programmes received by us this season is the decidedly unique production of the Pennsylvania State Sportsmen's Association, whose tournament will be held on the Reading Shooting Association's grounds, on Penn Mountain, on Aug. 9 to 12, inclusive. The book contains several pages of well-written matter descriptive of the past and present history of Reading; points out all the objects of interest in and about the city, and gives an original poem, in the genuine Pennsylvania Dutch dialect, the whole bearing the unmistakable imprint of that prince of good fellows, artist and journalist, "Jack Rabbit" Brelsford.

On page 28 is a list of the clubs, names of president and secretary, post office address and number of members of each, comprising the State Association. The list shows 28 clubs, with an aggregate membership of 987. The largest club is the Pottsville Game and Fish Protective Association, which has 149 members; the Reading Shooting Association has 97; Harrisburg Shooting Association 55; Fulford Gun Club, of Humnelstown, 52; Keystone Shooting League, of Frankford, and Lancaster County Shooting Association, of Mountville, 49 each. The Westchester Gun Club, with 13 members, is the smallest. The officers of the State Association are: Pres., C E. H. Brelsford; Vice-Pres., N. A. Hughes; Treas., Jas. Wolstencroft; Sec'y, J. H. Worden. Cor. Sec'y, W. D. Eller. Board of Directors: Harry Thurman, F. F. Davidson and H. C. W. Matz.

In addition to the very attractive programme of shooting events, a synopsis of which is given below, the committee has arranged for a summer-night's festival at the Black Bear Pavilion on Tuesday evening. On Wednesday evening there will be an excursion up the Neversink Mountain and on Thursday evening an excursion over the gravity road to the Tower. The annual meeting of the State Association will be held at Matz's saloon, corner of Tenth and Muhlenberg streets, at 8 o'clock on Wednesday evening.

Keystone targets and live birds will be used; shooting will begin at 9 A. M. each day; targets will be deducted from the entrance money at three cents each, and all ties in target events will be divided. The following prizes will be contested for.

American Wood Powder Co.'s silver cup, to be awarded to the club whose team designated as "No. 1" shall make highest average shooting in the following six events: Tuesday, teams of two men, match No. 1 at 10 singles, No. 2 at 15 singles; Wednesday, teams of four men, match No. 1 at 10 singles, No. 2 at 15 singles; Thursday, team of two men, match No. 1 at 10 singles and 3 pairs, No. 2 at 10 singles and 5 pairs.

Harrisburg Shooting Association's silver trophy, value $200, for team championship of the State, 6 men, 25 targets per man, to be shot on Tuesday.

Wm. Wolstencroft & Son's trophy, a medal, value $100, for individual championship of State, 50 targets per man, to be shot on Wednesday.

Reading Shooting Association's silver trophy, value $200, teams of 5 men, 25 targets per man, for championship of State, to be shot on Thursday.

Live-bird championship diamond badge, value $250, presented by citizens of Williamsport, 15 live birds, to be shot on Friday. The above prizes are to be held by the winner in trust for one year.

On each day there will be a State event at 20 Keystones, $3 entry, for 4 moneys. On Friday there will be five live bird events, open to the world. On Tuesday, Wednesday and Thursday there will be ten Keystone events, open to the world. In the 10-target events the entry will be $1, 15 targets $1.50 and $2, and 20 targets $2 and $3. All the hotels will gives special rates.

### Shooting in Kansas.

MANHATTAN, Kan., July 23.—Inclosed find scores of match between teams of six men each from the Manhattan Gun Club, of this city, and the Wamego Gun Club, 10 targets per man, shot here to-day. Sweepstake events filled in the day:

Team contest:

| Manhattan. | | Wamego. | |
|---|---|---|---|
| G K Helder | 1011010111—7 | G Jenkins | 1110110111—8 |
| C Rehfeld | 0010010000—2 | H Crane | 1011101001—6 |
| G Flagg | 1000101111—6 | S D Pardee | 1100010100—4 |
| A J McCabe | 0001101110—5 | S Deweese | 1011011011—7 |
| H M Shepherd | 1000000000—1 | H E Porter | 1101101011—7 |
| W Shepherd | 0010111111—7—28 | J T Genn | 0100110111—6—33 |

First event, 10 single bluerocks: G. Jenkins 8, H. Crane 3, A. J. McCabe 4, H. E. Porter 4, C. M. Breese 1, S. Deweese 6, G. Flagg 8, J. J. Davis 5, S. B. Lald 3, S. D. Pardee 4, J. T. Genn 6, N. S. Mayo 3, H. M. Shepherd 7, W. Tegmeir 3, B. Harrop 7, G. K. Helder 7, W. Shepherd 5, C. Davis 3.

Third event, miss and out, 25 cents entrance, one money: H. Crane 1, S. D. Pardee 4, S. Deweese 8, H. M. Shepherd 0, J. T. Genn 1, H. E. Porter 4, W. Shepherd 0, G. K. Helder 4, G. Flagg 0, A. J. McCabe 1, G. Jenkins 2.

Fourth event, 10 singles, unknown angles, 50 cents entrance, four moneys: A. J. McCabe 4, G. Flagg 6, B. Harrop 1, G. K. Helder 6, H. E. Porter 4, S. Deweese 5, S. D. Pardee 6, J. G. Jenking 7, H. Crane 5, J. J. Davis 4, J. T. Genn 5, H. M. Shepherd 2.

Fifth event, 4 pairs double, G. Jenkins 7, H. Crane 5, G. Flagg 6, A. J. McCabe 2, O. McCormick 3, S. D. Pardee 3, S. B. Lard 4, W. Shephern 1, H. E. Porter 3. S. Deweese 5, W. Tegmeier 2, J. T. Genn 4, B. Harrop 3.

Sixth event, team contest, 5 bluerocks, per man, two men choose sides, losing side to pay for bluerocks: G. Flagg 2, S. Deweese 4, H. E Porter 1, G. K. Helder 2, W. Shepherd 1, H. M. Shepherd 5, O. McCormick, E. McDonald 0, S. B. Lard 0; total 19. G. Jenkins 5, J. T. Genn 4, A. J. McCabe 2, S. D. Pardee 0, J. J. Davis 2, W. W. Mills 3, C. Rehfeld 4, W. Tegmeier 2, H. Crane 2; total 25.

### North Star Gun Club.

MINNEAPOLIS, Minn., July 23.—The following scores were made at the North Star Gun Club's weekly shoot yesterday:

Twenty-five singles: Marshall 24, Nicholson 23, Warwick 22, Hobbs 21, Pike 20, George 19. Marshall won the "Sports and Amusements" badge.

Fifteen singles and 5 pairs: Smith 24, Marshall 23, Pike 22, Nicholson 22, Warwick 19, Hobbs 15, George 14. Smith won the *Journal* badge and Hernlund the junior badge.

There are but four more shoots to decide the ownership of the *Journal* badge, and the race is a neck and neck one between Smith, Marshall, Whitcomb and Carriel, and the winner cannot be picked until the last bird is shot at.

### The Boston Trap Shooters.

WELLINGTON, Mass., July 23.—"Dan" Melcher did the best shooting in the merchandise match under the auspices of the Boston Shooting Association to-Tay, and it was the first time that a clean score has been made in the series.

The match is at 15 singles and 5 pairs and he broke them all.

Gale was a good second with 24, and there were several who broke 23, making the best scores that have thus far been made in the match.

The scores made in this match follow: Class A—Perry, Stanton and Sanborn 23, Stone 22, Bradbury 20. Class B—Melcher 25, Gale 24, Warren 23, Gore 21.

### Falcon Gun Club.

THE members of the Falcon Gun Club still adhere to the old Long Island rules. H. and T. traps, the bird if killed with second barrel to count a half bird. Only five competed on Thursday July 21, at 10 birds each, 25yds. rise for the club's gold medal. John Bohling killed 10 straight with his first barrel and won. The birds were first class. The score:

| | |
|---|---|
| J H Moeller | 1 0 1 1 1 1 1 1½ 1 1½— 8 |
| J Bohling | 1 1 1 1 1 1 1 1 1 1—10 |
| J A Herkmam | 1 1 1 1½ 0 1½ 1 1— 8 |
| J F Laeger | 1 1 1 1 1 1 0 1 1 1— 9 |
| J Meyer | 1 1 0 1 1½ 1½ 0 1 1 1— 7 |

### The Erie Gun Club.

THE Erie Gun Club, for the first time in the past three months, held its regular monthly shoot on the date of fixture, the Wednesday succeeding the shoot of the Con-y Island Rod and Gun Club, which was last week, July 20, at Woodlawn Park, Gravesend, L. I. Each member shot at seven birds, club handicap, modified Hurlingham rules. J. Plate won the medal and first prize, C. Plate the second; the third was divided. Owing to the poor quality of the birds no other event was shot off. The score:

| | | | |
|---|---|---|---|
| H Dohrman | 1112112—7 | D Lynch | 0111012—5 |
| C Plate | 2111011—6 | J Schmadeke | 1222110—6 |
| J Plate | 1111111—7 | C Mohrman | 1112020—5 |
| F Graff | 2020121—5 | M Elssasser | 1122011—6 |
| H Janskowski | 1121110—6 | H Plate | 1112110—6 |

## On the Chesapeake's Shore.

ONE of the most popular summer resorts for the people of Baltimore is Tolchester Beach, situated on the west shore of Chesapeake Bay, twenty-nine miles below the Monumental City. The sail from the city on the three-decker Louise is a delightful one, leading past Fort McHenry, Fort Carroll and other points of interest. The attractions at the beach are of the character to attract the young people, who flock there in hundreds every day and enjoy the delights of the carrousel, "Pike's Peak" gravity road, toboggan shoot, swings and a hundred and one other things. The place is a strictly temperate one, nothing stronger than soda water having been sold there for fourteen years. The outfit comprises an extensive grove, a base ball diamond, quarter mile driving track, boat houses, bathing houses, and a well-managed hotel. Scattered here and there are tables and benches to be used for lunching. There is also a moderate-sized dancing pavilion. Over a score of saddle horses are kept in connection with the track, and for a nickel the boys and girls are allowed to take a mile ride. All the amusements are of an innocent character and there are to be found none of the usual fake games for fleecing the unwary. The fishing in the vicinity is excellent, and while the young people are disporting on the green or under the shady trees, the fathers and brothers take a hand in trying to fill their creels. Taken altogether it is one of the best adapted places in the country for family excursions, and every day from June 1 to Oct. 1 the grounds are crowded.

The grounds proper are about 30ft. above the level of the Chesapeake, and just across the hotel lawn, on a level field just on the edge of the bluff, occurred on July 18, 19 and 20 one of the most enjoyable trap-shooting tournaments of the season. This was the eighth annual tournament of the Baltimore Gun Club, one of the oldest organizations in the State, and the one which met with such shabby treatment from the weather bureau in March when it gave a tournament at Acton's Park in connection with the Interstate Association. But last week the clerk of the weather was in a more amiable mood, and excepting for a couple of hours on the 19th the weather was all that could be desired.

The shooting began shortly after 11 A. M. on the 18th, at which hour the sky was clear as a crystal, Old Sol was sending down warm, very warm rays; there was scarcely breeze enough to produce a ripple on the face of the placid Chesapeake; a quarter of a hundred shooters were on hand; the great and only "Jack" Parker from Detroit was hustling hither and thither arranging to start the sport; General Manager James Malone was casting his weather eye about and looking pleased at the promising outlook; "Ned" Hall was seated in the cashier's chair "scooping" in the shekels, and various other club members were assisting in various capacities. Beside all this there was the jolly, good-natured, steady-nerved old veteran from Washington, "Billy" Wagner, with the same old "90 per cent. glasses;" Henry Gulick, and crack of the Capital City and president of the Capital City Gun Club; tall John P. Miller and his club mate, George W. Haddox, all the way from Winchester, Va., "just for fun, you know;" Dr. Fort ("Pierce"), from Ellicott City, Md., where he alternately practices medicine and and revolver shooting, and John A. Hartner, from Orangeville, Md., who holds the position of recording secretary of the local club.

This place is not the regular stamping ground of the club, and consequently there is no club house, but still there was good provision made for the comfort of the shooters. The traps, ten in number, were all of the "expert style, with North's electric pulling attachment. In rear of the score line was a big duck fly, 50ft. long and 15ft. wide, which provided shelter from the rays of the hot sun. In rear of this was another fly, 30x25, under which the boys also took their ease. To the left of the first mentioned fly was the cashier's and secretary's tent, and in front of this the blackboard.

Under the orders of the officers of this club it must be stated that on the opening day and to the close of the tournament every one of them was on the ground, and what is more, each one assumed his share of the work and also shot in the majority of the events. This is an exception to the general rule, and is worthy of note. The officers are E. C. Hall, President; J. P. Jones, Vice-President; Dr. Heber Smith, Secretary; John A. Hartner, Recording Secretary; J. R. Malone, Treasurer and Tournament Manager; J. A. Williar, Captain. Every one of these officers is not only a good shot, but an untiring worker as well.

The shooting was under the American Shooting Association rules, bluerock targets being used. The purses were divided into 40, 30, 20 and 10 per cent., and the sliding handicap devised by John Parker was used. This handicap, which has been adopted by the Michigan State Trap Shooters' League, was fully explained in FOREST AND STREAM of July 14. It seemed to catch the fancy of all the shooters present and not a complaint was heard. When shooting as experts one of three traps only are sprung for each man. Each alternate event on the programme was at fifteen targets, for merchandise prizes, the others being the usual sweepstake events. In No. 1, a sweepstake, and No. 2, a merchandise event, all the contestants shot as amateurs (known angles and traps). The handicap was not carried forward through the events in regular succession, but No. 1 handicapped No. 3, No. 3 handicapped No. 5, No. 2 handicapped No. 4, No. 4 handicapped No. 6, and so on. The targets were thrown 50 yards. The shooting throughout was first-class, that of Wagner being an exceptional feature as he broke 141 out of 145 shot at, getting 97 out of his first hundred. His first 25 were shot under the amateur rule; at 45 he shot from known traps, unknown angles, and at the others under the three-trap expert rules. Franklin also had his "shooting clothes on," as his average of 95.17 will show. Cantler with 92.41 and Hartner with 90 were also "out for blood." Ducker was only one bird short of 90. The events were as follows: No. 1, 10 singles, $1 entry; No. 3, 15 singles, $1.50; No. 5, 20 singles, $2; No. 7, 10 singles, $1; No. 9, 15 singles, $1.50. Nos. 3, 4, 6, 8 and 10 were merchandise events at 15 singles, 75 cents entry.

The following table shows the result of each match, along with the average of those who shot in five or more events. An asterisk (*) before the score shows that the contestant shot under expert rules; a dagger (†) under the North expert rule, all others being amateurs:

The majority of the shooters took the two-hour boat ride to Baltimore in the evening, but some dozen of them remained at the Tolchester Hotel over night, when they were lulled to sleep by the swash of the water on the shore, this being about the only sound heard after 9 P. M. There were some half-dozen guests besides, but at the hour named all had retired. While an extremely pleasant place during the day it is dull enough to please the most fastidious after the evening boat steams away. There is positively no way of passing away the time during the evening, not even a drink of soda water being procurable.

*Tuesday, the Second Day.*

opened with a portentous haze in the air, which gave notice that either rain or intense heat might be expected. When the Louise cast off her fastenings from the Light street wharf a light sprinkle set in, but this lasted only a few moments. At 11 o'clock, when she was made fast to the Tolchester pier, the sun was shining, but the before-mentioned haze was still hovering about, and before 12 o'clock the rain began to fall again. This was another short-lived shower, however, as the sun soon reappeared, only to disappear at intervals, during each of which there was a shower. None of these bursts, however, interfered with the sport of the day.

This was expected to be the big day of the meeting, the premier attraction being the match for teams of ten men each at 25 bluerock targets per man, $10 entry per team for cash prizes of $50, $25 and $10 respectively to first, second and third best teams. This was a much talked of event for which teams were entered by the Capital City Gun Club of Washington, D. C.; Standard Gun Club of Baltimore and the Baltimore Gun Club. These teams had met in the arena before, and so evenly were they matched that the odds in favor of any one of them were very light. The shoot was called about 1:30 P. M., and I am fain to confess that it was one of the most hotly contested affairs held for many a day. The work of the Capital City team, who won first prize, was away above the average, their score of 232 out of 250 targets being so far as I can learn the highest on record. The first man on the list breaking only 19 out of his 25 targets seemed to have no effect on his team mates other than to stimulate them to more careful work, not a man going below 22. While the average of the team was 92.80, the last nine men averaged 94.66. Mattingly who was first on the list has recently passed through a severe illness, otherwise he would have rolled the aggregate up still higher.

The team of the Standard Gun Club was also in fine fettle, as its total of 227 breaks will show, this being an average of 90.80. The Baltimore Gun Club, which up to this time had a clean record of wins for all matches shot, was away below its usual form, beside being short of some of its regular team members. There is a great deal of allowance to be made for Malone, who made the low total of 14 breaks. All day on Monday and up to the time the team match was called on Tuesday "Jimmy" had been bustling hither and thither looking after the general running of affairs, beside taking part in the various events. The result was that when called upon to shoot on the team his nerves, which had been on a taut tension all along, failed him, as was perfectly natural. To play the part of "chief hustler" at a two days' shoot, with the mercury well up in the 90's is not the best thing in the world to fit a man to undergo the strain of a team contest. The Standard team claimed to be short one or two good men, while the Capital Citys were minus the great and only Joe Hunter.

Previous to the team shoot the programme events were being hustled off, the opening contest having thirty-three entries. About noon the party was called upon to welcome Wm. F. Summerson, of Staunton, Va., who can be depended upon to be on hand whenever he is able to find a chance to pursue his favorite pastime. The shooters all gave him a hearty greeting. The work thoughout the day was of a high order as a look over the table of averages will show. Wagner was in magnificent form, rolling up an average of 98.26 and making a run of 67 straight before losing a target. Cantler with 95.20, Jack Parker with 93.60, Ducker with 92.22, Buckbee with 91.24, and Mills and Evans with 90.43 each also showed to good advantage. In event No. 2 at 15 singles with thirty-three entries the average was 88.88, and in No. 5 at 25 singles with twenty-four entries the average was 88. This is a fine showing under any conditions. The events were as follows: No. 1, 10 targets, $1 entry; No. 2, 15 targets, 75 cents entry, for merchandise prizes; No. 3, 15 targets, $1.50 entry; No. 4, team match, ten-men teams, 25 targets per man, $10 entry per team; No. 5, 25 targets, $5 entry; No. 6, 15 targets, $2 entry; No. 7, 5 pairs, $1 entry; No. 8, 10 singles, $1 entry. Results and averages:

It was about 6 o'clock when the tournament was brought to a close, and twenty minutes later a tremendous thunder shower came up, the rain falling in torrents for nearly an hour. Such a hurrying and scurrying to escape the elements is seldom seen. Scattered about the grounds were nearly 2,000 excursionists, abot three-fourths of whom were children dressed in the lightest of summer clothes. These all made a mad rush for the Louise, as though that was their only safety. Once on board it was found that owing to the fact that the heavy blow had sent a large portion of the water off the flats the steamer was hard aground, and it was only by driving about one-half the people to the shore that she was floated. Before the boat reached the Monumental City the shower passed by, the sky was clear and the rest of the night was intensely warm.

From start to finish the tournament was a very pleasant affair, with good management and the best of good feeling prevailing. The attendance was equal to the average tournament of the day, and in fact was considerably above some of them. The officers and members of the home club did all in their power to cater to the comfort of their guests. The targets and traps worked well and the merchandise prizes were of sufficient value to put vim into the contests. The club was satisfied with its venture despite the fact that on Tuesday evening some vandal stole about $30 worth of prizes, including a gold-headed silk umbrella. These prizes were made good by the management. C. H. TOWNSEND.

## Oneida County Sportsmen's Association.

UTICA, N. Y., July 22.—The regular shoot of the Oneida County Sportsmen's Association took place here to-day, the weather conditions being fine. A light westerly wind was blowing. The conditions were 25 kingbird targets per man, thrown from 5 kingbird traps, A. S. A. rules. Contest No 1 was the regular club prize shoot and No. 2 was for the club medal. The results:

## Passaic City vs. Boiling Springs.

THE members of the Boiling Springs Fish and Gun Club journeyed from Rutherford to Passaic on July 16, and shot a match against the Passaic City Gun Club, on the latter's grounds. The weather was delightful and the members of the home club exerted themselves to make the visitors feel at home. The grounds were in splendid condition, and the traps and targets worked perfectly, as they invariably do at this place. The match was for teams of 10 men each, at 25 targets per man, the scores being appended;

## The Peoria Shooting Club.

PEORIA, Ill., July 16.—The annual tournament of the Peoria Shooting Club was opened on July 12 and closed to-night. The shoot was held at Tonty Park, about four miles north of Peoria. The weather on the opening day was extremely warm and in consequence the attendance was light. Among those who were present was the Hon. Thos. A. Marshall, of Keithsburg; Rexroat, of Virginia; Penns, of Decatur; Thos. Taylor and Wm. Dunn, of Jacksonville; Chas. Williard, of the Colt Gun Company, and Ed Bingham, of Montgomery, Ward & Co., Chicago; Pendergrast, Mead, Haggerty and Redman, of St. Louis; Soloman, of Springfield; and Budd, of Des Moines.

On Thursday the heat made the shooting anything but pleasant and most of the shooters decided to start for home. Under the rapid-firing system a three-days' shoot will give all the shooting one desires. There is really no pleasure in this style of shooting and the majority of Americans will gladly welcome a return to the old style, under the old National rules, when they can do away with the machine work of shooting from known traps at known angles. The sooner we return to old times the better.

Below are the results of the various events:

No. 1, 15 singles, $1.50 entrance:

## Maplewoods and Independents Tie.

THE seventh monthly shoot of the New Jersey Trap Shooters' League, which was held on the grounds of the New Jersey Shooting Club, at Claremont, on Saturday, July 23, reminded one of the old-time tournament days when Claremont was in the Jersey circuit and when the tournaments there used to draw such well-known experts as Budd, Courtney, McMurchy, Heikes, Whitney, Albee, Mosher, Luther, Kleinz, Brewer, Carter, J. E. Miller, McAlpin, Skinner and dozens of others of like ilk. Those were the days when a man handed out his cash and took his chances on an even mark with all others and never thought of calling a winner a "shark." The opening shoot on these grounds was on Oct. 23 to 26, 1888, the first two days being at Keystones and the last two days at live pigeons. On the first day was seen the first exhibition for this section of the working of the Keystone rapid-firing system, with which the Jerseymen at once fell in love. The management of the grounds was at that time in the hands of the New York Suburban Shooting Grounds Association, of which Charles Richards was president. The grounds are situated on the main line of the Central Railroad of New Jersey about seven minutes' ride from the ferry. The grounds have a frontage of 1,000ft. on the railroad, and run back 530ft. along Caven Point road on the east and 500ft. along the canal on the west, being narrowed down to 300ft. in width at the northern boundary along Pacific avenue. At the junction of the railroad and Caven Point road is a station where all except express trains stop. After running the grounds with varying fortune for some time the old association ceased to exist and about a year ago they came into the possession of the New Jersey Shooting Club, the majority of the original members of the club having been members of the shooting contingent of the New Jersey Athletic Club of Bergen Point. The original club house still remains but the "grand stand" which was on the roof has been removed. Otherwise the building presents the same old appearance, except that it is considerably weather-beaten.

On the day of the League shoot it was fearfully hot on the shooting side of the building where the sun poured down in merciless fashion on the heads of the enthusiasts. Here what little air one could catch felt as though it blew through a furnace. On the railroad side of the house, where there is a 3ft. verandah, there was a decided change for the better, it being shady and cool. The interior of the house was like an oven.

The shoot was fairly well attended, there being nine clubs represented in the team match. Altogether, in the sweepstake events 50 shooters took a hand, although the highest number of entries in any one event was 33. The traps were in position at 8:30, but it was considerably before a crowd gathered. The prime hustlers in the affair were Messrs. Moore, Virden and Richmond. The team match was supervised by Neaf Apgar and W. R. Hobart. The shooting was from 5 traps, under the rapid-firing system. Two sets of traps were in use. The shooting was not kept up at as lively a rate as would have been the case on a cooler day, but nevertheless a fair number of targets were thrown, the aggregate being close to 5,000. With the facilities at hand and a day when the shooters were not in fear of being converted into grease spots these grounds should readily get away with 10,000 in a day's shoot.

In connection with this shoot there is just cause for complaint by the newspaper men, as not a single sweepstake score was kept in duplicate, nor was any effort made to see that duplicates were furnished. The majority of clubs when running a tournament seem to take it for granted that newspaper representatives have nothing to do but sit down and copy scores, not seeming to think that their employers may object to paying men for what is really the work of a boy. As has before been stated, clubs are ever ready to avail themselves of the use of the columns of the sporting press in order to advertise their shoots and attract a crowd, this advertising being cheerfully given them. Once they get the crowd on their grounds, however, the usefulness of the papers is supposed to be ended. This is not as it should be. Carbon paper costs but 50 cents per dozen sheets and every club should have a supply on hand in order that duplicates may be made of all scores shot. It requires as much work to make one as four copies, one good turn deserves another, and if the papers accord free puffing the clubs should reciprocate by furnishing carefully written duplicates of all scores. The team scores at the League shoots are always made in duplicate.

It was 2 P. M. when the team shoot was called, and during this contest W. R. Hobart and Al. Heritage acted as referees; Wm. Sigler and W. S. Simpson being the official scorers. The conditions were five men to a team, 25 targets per man. The clubs entered were the Passaic City Gun Club, of Passaic; Woodside Gun Club, of Newark; Boiling Springs Fish and Gun Club, of Rutherford; South Side Gun Club, of Newark; Independent Gun Club, of Plainfield; East Side-Mutual Gun Club, of Newark; Maplewood Gun Club, of Maplewood; New Jersey Shooting Club, of Claremont, and the East Orange Gun Club, of Harrison. Each club was supposed to have out a rattling good team, and some sharp work was expected. When the contest closed it was found that the Maplewood and Independent teams had tied for first honors on 110 breaks each, the South Sides scoring 103 and the New Jersey Shooting Club 102. In five out of six previous contests the Independent team had won first place alone. E. D. Miller, Independent, was high man, with 24; Soper, Independent, Deam, Sickley, and Drake, Maplewood; Phillips, South Side; Purdy, New Jersey; Post, Boiling Springs, and T. Dukes, East Orange, making 23 each. It is very rarely that a party of this caliber gets together without some clean scores being recorded. The tie in the team match was not shot off nor is it likely to be, as the Independents have already won first place, and the shooting-off of the tie cannot benefit the Maplewoods. Below are detailed scores of the team contest:

Passaic City Gun Club.

Seventh, 15 targets, 3 entries: Apgar 14, Everingham 12, Moore 11.

C. H. TOWNSEND.

## Shooting at Hyde's Park.

THE Independent Gun Club, of Plainfield, N. J., had splendid weather for its tournament, held at Hyde's Park, on July 21 and 22. While the sun was hot on the opening day, a pleasant breeze came over the mountains. The grounds were in elegant shape and the arrangement of the traps, etc., was satisfactory to all. Under the shade of the big trees "Dutchy" Smith served an appetizing chowder and fixings, to which full justice was done.

The attendance on the opening day while not as large as was anticipated was still heavy enough to make a very interesting affair. Among the shooters was Hon. J. Lewis Bumgardner, of the Penrose Gun Club, of Staunton, Va., who was recently elected commonwealth attorney of Augusta county and who has been recuperating at Long Branch, N. J., for a couple of weeks; Harry Hartlove and Charles Febrenbach, of the Wilmington (Del.) Gun Club; F. R. Bissell, of Chicago, Ill.; W. Fred Quimby, Charles M. Hedden and Ferd Van Dyke, of Newark; Eddy Collins, of West Hoboken; R. M. Manning, of the North Side Gun Club, of Maspeth, L. I.; E. D. Miller, of Springfield; and "Uncle Billy" Sigler, of Montclair.

"Tee Kay" Keller and "Dutchy" Smith played the part of chief hustlers during the day and managed to keep everbody in a jovial humor as usual. The great and only Sam Wilbur officiated in his old-time style at the cashier's window. All the shooting was at blue rock targets thrown from blue rock traps, one set of five and one set of three traps being used. All purses were divided into 40, 30, 20 and 10 per cent. Targets were charged for at the rate of three cents each and half a cent was deducted for each target thrown for the purpose of creating a fund to be awarded at the close of the day to those making the first to fifth best averages in order in the known angle events. The programme was as follows: No. 1, 10 bluerocks, $1 entry; No. 2, 10 bluerocks, $1 entry; No. 3, 15 bluerocks, $1.50 entry; No. 4, 15 bluerocks, $1.50 entry; No. 5, 15 bluerocks, $1.50 entry; No. 6, 10 bluerocks, $1.50 entry; No. 7, 20 bluerocks, $2 entry; No. 8, 10 bluerocks, $1.50 entry; No. 9, 15 bluerocks, $1.50 entry; No. 10, 15 bluerocks, $1.50 entry; No. 11, 15 bluerocks, $1.50 entry; No. 12, 15 bluerocks, $1.50 entry. Nos. 1, 3, 5, 7, 9 and 11 were shot under the rapid-firing system, known angles; the others were shot from known traps at known angles. Below is a tabulated account of the day's work:

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | Average. |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Sigler | 10 | 9 | 15 | 14 | 15 | 10 | 19 | 10 | 15 | 14 | 13 | 14 | 95.75 |

Extra No. 1, 10 singles, $1 entry: Apgar and Miller 10 each; Sigler, Smith, Manning, Van Dyke and Collins 9 each; Brantingham 8; Keller 7; Bumgardner and Hedden 6 each; Febrenbach and Hartlove 4 each.

Extra No. 2, same as before: Miller and Sigler 10 each; Apgar and Manning 9 each; Smith 8; Keller and Brantingham 7 each.

Extra No. 3, another of the same style: Hedden, Quimby, Apgar and Sigler 10 each. Miller, Collins, Keller and Hartlove 9 each Van Dyke and Soper 8 each, Manning and Smith 6 each, Febrenbach and Scott 6 each.

Extra No. 4, a wind-up at 10 singles: Smith and Apgar 9 each, Collins 7, Hedden, Hartlove and Keller 6 each.

*On the Second Day*

the weather conditions were fully as favorable as on Thursday, but the attendance was considerably lighter, a number of the visitors having left for their homes. Among the new-comers was "Father Time" Thurman from Germantown, Pa., and Milton F. Lindsley, of the American Wood Powder Co., of New York. With the consent of the contestants the regular programme was abandoned and a series of ten target events, $1 entry, filled in the day. During the afternoon there was a little excitement caused by a couple of picked team races, the results of which were as shown below:

First match:

| | |
|---|---|
| Apgar | 1111111011—9 |
| Hartlove | 1100011110—7 |
| Squier | 1111111110—9—25 |
| Smith | 1001110011—6 |
| Keller | 1111111111—10 |
| Febrenbach | 1110100110—6—22 |

Second match:

| | |
|---|---|
| Apgar | 1100011011—6 |
| Hartlove | 1101110101—7 |
| Squier | 1101111111—9 |
| Lindsley | 1101111111—9—31 |
| Smith | 1111011111—9 |
| Keller | 0011111111—8 |
| Febrenbach | 1111111011—9 |
| Thurman | 1111101101—8—34 |

Third match, 25 singles:

| | |
|---|---|
| Lindsley | 0111111111111011111111—23 |
| Hartlove | 1011101101111010000111111—18 |

| Voehl | .. | .. | .. | .. | .. | .. | .. | .. | .. | 3 | ..... |

Of the above events No. 4 was for both barrels, gun below the elbow until target was thrown. No. 5 was at unknown angles, shooter standing at center score. No. 6 was a walking match. No. 8 was from unknown traps.

C. H. TOWNSEND.

## Williamsport Rifle and Gun Club.

WILLIAMSPORT, Pa., July 16.—Our club has been quite inactive this summer, many of our members having been absent on business, some away to the resorts, etc., and our regular shooting days have found but a few of the boys present. Live birds always call out the boys, however, if they are in town, so I quietly collected a couple of hundred birds and on Thursday last notified all whom I knew were in town that we would have our regular club shoot on Friday afternoon, at inanimate and live birds. The day was rather too warm for comfort, but a fair turnout was present to enjoy the sport, and a lively shoot we had. We first tackled the inanimates, just to get our guns warmed up, with the following result:

No. 1, 10 single bluerocks: Smith 7, Hughes 9, Armstrong 3, Byrne 2, Millspaugh 7.

No. 2, 15 single bluerocks: Smith 13, Hughes 14, Byrne 2, Millspaugh 14, Armstrong 5.

No. 3, 15 single bluerocks: Smith 14, Hughes 14, Byrne 7, Millspaugh 13, Armstrong 5.

No. 4, 25 single bluerocks:

| | |
|---|---|
| Smith | 1111111111111111101110—21 |
| Hughes | 1111111111111011110111111—23 |
| Byrne | 0000011000010001000100000— 5 |
| Millspaugh | 0111011010111111101111111—20 |
| Armstrong | 1001011100001110100001111—13 |

No. 5, 15 single bluerocks: Smith 12, Hughes 12, Byrne 6, Millspaugh 11, Armstrong 6.

Many were anxious for the live-bird events, so at them we went, and a lively lot of birds we had, in fact I never saw a better lot of flyers for this season of the year; out of 190 trapped only three or four refused flight the moment the trap was sprung. They astonished many, as some of the goose eggs will attest.

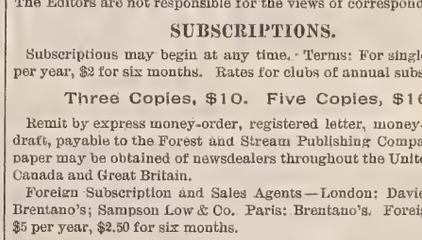
No. 1, 5 live birds, American Association rules, $3 entrance, 3 moneys:

| | | | |
|---|---|---|---|
| F Warfield | 22222—5 | Hughes | 20102—3 |
| Runk | 23111—5 | Millspaugh | 10101—3 |
| Smith | 10111—4 | Rothrock | 00112—3 |
| Armstrong | 22112—5 | | |

Ties on first carried forward in next event, others div.

No. 2, 10 live birds, $5 entrance, same conditions:

| | | | |
|---|---|---|---|
| F Warfield | 0011'12000—5 | Rothrock | 1101202120—8 |
| Millspaugh | 1101121011—8 | Hughes | 0222221211—9 |
| Runk | 1212110112—9 | Smith | 1111100022—7 |
| Armstrong | 1002012202—7 | | |



Runk won the tie in first match. All ties div.

No. 3, 15 live birds, $7 entrance:

| | | | |
|---|---|---|---|
| F Warfield | 101021010100222— 9 | Hughes | 1020111122210—12 |

BESSIMER.

## CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

## SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

**Three Copies, $10. Five Copies, $16.**

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

## ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

**Address all communications:**

**FOREST AND STREAM PUBLISHING CO.,**
**No. 318 Broadway, New York City**

## SAVE YOUR TROPHIES.

Write for Our Illustrated Catalogue

## "HEADS AND HORNS."

It gives directions for preparing and preserving Skins, Antlers, etc. Also prices for Heads and Rugs, Birds and Fish, and all kinds of work in Taxidermy.

**WARD'S NATURAL SCIENCE ESTABLISHMENT,**
ROCHESTER, N. Y.

## THE SALMON FISHER.

BY

**CHARLES HALLOCK.**

**CONTENTS:** Distribution of the Salmon. Life History of the Salmon. Technology of Salmon Fishing. Salmon Fishing in the Abstract. Luxury of Salmon Waters. Itinerary of the Salmon Rivers.

A book to read *now*; and to be put in one's pocket for reading again in camp.
Cloth, 126 pages. Price $1.00.
FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

**SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.**

**ABBEY & IMBRIE,**
**Manufacturers of All Grades of Fishing Tackle,**
**18 Vesey Street, New York.**

## Notice to Fishermen! Cut Prices for 1892!

I am with you again with lower prices for Fishing Tackle. I find by experience that putting down the prices and not decreasing the quality, it increases my business every year.

One lot of Split Bamboo Fly and Bass Rods will be sold at $1.88 until all are sold. These rods are all nickel mounted, solid reel seats, silk wound, and will give satisfaction.
Length and weight of the Fly Rods are: 9ft., 6oz.; 9½ft. 6½oz.; 10ft., 7oz.; 10½ft., 7¾oz.; 11ft., 8oz. Reel seats below hand.
Length and weight of the bass rods are: 8½ft., 9oz.; 9ft., 10oz.; 9½ft., 11oz.; 10ft., 12oz., 10½ft., 14oz. Reel seats above hand.
A special lot of Hard Rubber and Nickel, Raised Pillar, Multiplying Reels with Balance Handle and Side Spring Click, 40yds., 88 cts.; 60yds., 94 cts.; 80yds., 98 cents.; 100yds., $1.05.
Any of the above reels sent by mail for price and 10 cts. extra for postage.
Brass Click Reels, 40, 60, 80 or 100yds., 28 cts. each; 5 cts. extra for postage.
One lot of Multiplying Raised Pillar Reels with Balance Handles and Lifting Drag: 40yds., 38 cts.; 60yds., 48 cts.; 80yds., 58 cts.; 100yds., 68 cts.; 150 yds., 78 cts.
Best quality imported metal center Trout Fly Lines at 4½ cts. per yard in lengths of 25, 50 or 100yds., sent by mail, 2 cts. extra for postage.
A special lot of Trout Flies at 30 cents per dozen assorted, sent by mail 1 cent per dozen extra for postage.
A special lot of Bass and Pickerel Spoons at 5 cents each sent by mail, 1 cent extra for postage.
All kinds of Hollow Point best quality Hooks snelled to single gut 10 cts. doz.; double gut, 15cts. doz.; treble, 20 cts. doz.; four ply, 25 cts. doz. 1 cent extra per dozen for postage.
300ft. Braided Linen Reel Line on Block, 41 cts.; 300ft. of Hand-Made Linen Reel Lines on Block, 9 thread, 38 cts., sent by mail 3 cts. extra for postage.
Brass Box Swivels, all sizes No. 1 to No. 12., 15 cts. per dozen, sent by mail 1 cent per dozen extra for postage.
Single Gut Leaders, 3ft., 4 cts., 45 cts. per dozen. Double Gut Leaders, 40in., 6 cts. each. Treble Gut Leaders, 32in., 6 cts. each. Four-ply Leaders, 32in., 8cts.
Special lot of best quality 100ft. Linen Reel Lines, 8 cts., 200ft., 15 cts.; 300ft., 22 cts.; 3 cts. extra for postage.
**Send 2-cent stamp for Illustrated Catalogue and Special List No. 2.**

**Open Evenings until 9 o'clock.**
**Saturday Evenings 11 o'clock.**

WHERE THERE ARE SPORTSMEN,
TO SELL THE

## Quickest Selling Sporting Book

IN THE COUNTRY.

## The Sportsman's Directory & Year Book

**(1892.)**

**COMPILED BY WILL WILDWOOD.**

Contains 250 pages brimful of statistics, records, biographies, fish and game laws, field trial winners, sporting terms, hunting and fishing resorts, lists of rod, gun, kennel, athletic, canoe, etc., clubs; manufacturers and dealers in guns, fishing tackle, sporting, athletic, kennel, bicycle goods, etc., etc. Superbly illustrated with full-page portraits of prominent sportsmen, famous trotters, athletes, bicyclists, dogs, yachts, etc. Board covers, gilt embossed.

It sells on sight. Price $1.00.

See prize list. Address **POND & GOLDEY, Milwaukee, Wis.**

## LOG CABINS;

BY WILLIAM S. WICKS.

**FOREST AND STREAM PUB. CO., 318 Broadway, N. Y.**

DAVIES & CO. London, England.

## Fly-Fishing & Fly-Making

FOR TROUT, BASS, SALMON, Etc.

**By J. HARRINGTON KEENE.**

With plates of the actual material for making flies of forty-eight varieties. Illustrated, second edition. Revised and enlarged. Price, $1.50.

This is a new edition of a work that has already proved a great success. It is first of all practical; the instructions are plain and full. Numerous illustrations make every step clear. The actual specimens of materials show precisely what the fly-tyer requires.

FOREST AND STREAM PUBLISHING COMPANY,
318 Broadway, New York.

## BOGARDUS'S BOOK.

## Field, Cover and Trap Shooting.

**By CAPT. A. H. BOGARDUS.**

This is a third edition. That means, not a mere reprint, but that the chapters needing change have been re-written to bring the work up to date. It is a book of practical instruction for beginners in the art of shooting, and of entertaining reading for the older hands.

CONTENTS.

General Introductory Remarks.
Guns and their Proper Charges.
Golden Plover, Curlew, Gray Plover.
Wild Ducks and Western Duck Shooting.
Wild Geese, Cranes and Swans.
Wild Turkey and Deer Shooting.
The Art of Shooting on the Wing.
Shooting Dogs—Breeding and Breaking.
Pigeon Shooting.
Trap Shooting Rules.

Cloth, 493 pages, illustrated. Price $2.00.

**FOREST AND STREAM PUBLISHING CO. 318 Broadway, N. Y.**

## Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 98 pages. Price $1.00.

## *THE LONE TREE.*

THE last of its kind it stands alone in the midst of the wide, flat prairie. Immediately at its foot the cut bank breaks away, and beyond is the bed of the river, a broad expanse of white sand, interrupted here and there by narrow channels, through which the water flows. From the tree's top can be seen for miles east and west this verdureless bed of sand, and under the light of the morning and the evening sun its channels gleam and shine as if crooked bars of silver were laid across the colorless waste.

Here, many many years ago, stood a great grove of these trees, this one the furthest from the river. As time went by the course of the stream changed, and as it changed, the rushing waters, swollen by the melting snows which lay deep on the distant mountains, eat away the soil from beneath this grove, and one by one the tall trees bowed their lofty heads and fell into the stream. There they were rolled over and over and borne away by the current toward the Gulf, or were buried in the sands carried along by the hurrying torrent. Now there is left only this single survivor, a solitary sentinel overlooking the plain.

How long has it stood there? What has it seen since the time, when as a tender sapling it first pushed its pale green leaves above the grass toward the light? The deer and elk have brushed it as they passed, and birds have built their nests in its branches while they were still soft and green. As it increased in stature, it got to know all the animals of the plain and all the birds of the air. Each day it saw the buffalo come stringing in to water, and it watched them from the time when the herd first appeared a long way off, as a little dot against the distant sky, and then grew and became longer and longer, but still only a black line, until at last it could see that they were animals following one after another. Soon the herd reached the water, and drinking and climbing up the bank fed a little and then lay down. Ragged old bulls and little yellow calves alike rubbed their sides against the tree's rough gray bark, and after a while this bark near the ground was no longer rough and gray, but smooth and brown and shining, and in its crevices were left tufts of brown hair and wool, which the lark bunting and the white-winged blackbird and oriole found and snatched away to make soft beds in which their delicate eggs and their feeble, tender young should lie.

It learned to know the Indians, too, those wild rovers of the plains, who sometimes raced across the river bottom, piercing the fat cows with their feathered shafts, or rode slowly at the head of a great camp, with women and children and dogs and travois, and halted in its shade to make their camp. It had looked down on the women, hard at work dressing hides or drying meat, while black-eyed babies lashed to their boards stared about with solemn, unwinking eyes, and boys romped and shot arrows and chased each other about, and men reclined in the shade of the lodges and smoked and talked.

It had stood there long and had grown to be a great tree, still green and vigorous to its top, while such of its older fellows as were still standing were wind-swept and dead above, and each had only one or two living branches. And these its old-time comrades were growing few in number now, for each year the bed of the river was creeping nearer and nearer, and each spring those that stood nearest the bank were undermined by the waters. So at last it stood alone, a sentry keeping watch over the plain.

All the sights and sounds of the prairie it had seen and heard, but one day the tree saw a new thing. Far off on the horizon dark objects were coming as of old, but with them other objects which were white. Nothing like this had ever appeared before. As the shapes drew nearer and nearer they seemed still more wonderful, Indians on foot, but with white faces and beards, spotted long-horned buffalo followed by great white ill-shaped lodges —a train of wagons. These people called this the Lone Tree and camped under its shade, and the next day passed on, but that day and for many days after this the tree wondered at what it had seen. Afterward it saw many such comers, and travelers came to know the lone tree, and were glad when far off they saw it standing like a slender spire against the sky.

## *VERSATILITY.*

THE versatility of the typical American is admirably illustrated in his recreation as well as in his work; and an instance is afforded by the description Mr. Brelsford sends us of his gun camera, and the interesting specimen of work accomplished with it. The sportsman of Washington's day was taught to shoot, to ride, to cast the fly and speak the truth, in these later times a wider versatility and more varied accomplishments are demanded—among them the knack of photographing. That this accomplishment is possessed by a goodly number is abundantly demonstrated by the collection of pictures already received in the FOREST AND STREAM'S Amateur Photography Competition. The ingenuity of the sportsman of to-day is shown in Mr. Brelsford's gun camera, devised by himself, and the capital specimen of work done with it is something which is creditable not alone to the individual who accomplished the feat, but to the American sportsmanship of the day. The pictures already received by us in the amateur contest give promise that the completed series will be a pleasing presentation of outdoor life with rod and gun as reflected by the camera; and the FOREST AND STREAM'S sportsmen's photograph exhibit at the World's Fair will deserve study and win appreciation.

## *IS THE SNIPE A "WATER FOWL"?*

THE question whether a snipe is or is not a water fowl, which is now agitating Chicago sportsmen, is not likely to be decided except by the courts.

The Illinois law of 1877 designated "any wild goose, duck, snipe, brant or other water fowl," in a subsequent section referring to these as "any of the wild animals, wild fowls or birds mentioned in section one."

In 1879 the law was amended to read, "any wild goose, duck, brant or other water fowl," also using in another section the term "wild fowl" as synonymous with "water fowl." The present law retains in Sec. 1 the reading "wild goose, duck, brant or other water fowl;" forbids snaring "any wild goose, brant, duck, rail or other water fowl," and forbids the sale at certain seasons of "the animals, wild fowl or birds mentioned in Sec. 1." Evidently the law of 1878 included snipe among "water fowl," and the law of 1889 includes rail among "water fowl."

Manifestly the question is as to the intent of the legislature; the difficulty of determining this lies in the fact that the term "water fowl" is not susceptible of exact scientific definition. The lexicographers give us no help. It is quite certain, however, that the systematists in ornithology, who make the artificial classification into land and water birds, do recognize the snipe as belonging in the latter class. Nuttall many years ago, and more recently Baird, Brown and Ridgway in their great work on North American birds include the snipe among "water birds." If we use synonymous terms the snipe may fairly be called an "aquatic fowl." To this of course it may be objected that the term "water fowl" is used in this case in a special sense. Is a "water bird" of the systematists a "water fowl" within the Illinois law?

Many of our terms used in sport are hundreds of years old and come to us from England, and in English books on sport we may find hints on this somewhat obscure point. As Col. Bond and Mr. Bortree are bringing up old authorities, we offer them this from a work printed in 1792, 'The Sportsman's Dictionary; or, the Gentleman's Companion for Town and Country;" we find under the head, Fowl, the following definition:

"Of water fowls there are two kinds, fuch as live off the water and fuch as live on the water without fwimming in it, but wading and diving for it with their long legs: the other webfooted and fwim as the fwan, goofe, mallard, &c."

In describing the manner by which "waterfowl" are to be taken with "fnares and fprings," "woodcocks, plovers and fnipes" are mentioned. This doubtless will count on Mr. Bortree's side, although Col. Bond may well enough claim that the including of "woodcocks" shows the 1792 classification to be antiquated and not "a late authority."

## *SNAP SHOTS.*

It has been officially determined anew that one may not camp out in the wilds of New York city. There are inviting and umbrageous woods, running brooks and stretches of old farms run to waste, where the catbird calls in the hedges and Bob White pipes on the stone walls; but the would-be outer, who yields to these enticements and pitches his camp is destined to cruel interference. An oyster opener, out of work because oysters are out of season, and unable to pay rent, took to these woods with his family last week, and pitched his tent in the wilderness. At the end of a three days' outing the police captured them, and the children were turned over to the Aid Society to be cared for until the return of the oyster season shall provide work and wages for the father. "Nessmuk" once told us of an amusing attempt he made years ago to camp out for the night in Central Park, a project to which the police put a speedy and ignominous end.

"The pen is mightier than the sword," and than the shotgun and rifle and bowie knife and revolver. Armed with all of these, many a bold and courageous man would fail to "reduce to possession" the mighty and ferocious game he so comfortably and so expeditiously slays with his pen, when he sits down in the shade to work up an animal story for a Sunday newspaper.

A NOVEL fishing news item was given in the press dispatches last week, reporting the capture by fly-fishing of four salmon in the Hudson at Mechanicsville, July 29. Three of the fish were killed by Mr. Chas. Vandenburgh and the fourth by Mr. John Dyer, both of Ballston Spa. The weights were 8, 9, 11½ and 13lbs.

Newspaper publicity makes strange bedfellows. Two items in juxtaposition in one of the dailies last week recorded the heroism of a father who rescued his son, who had fallen into the water while fishing, and the fining of a Beaverkill (N.Y.) trout spearer who had speared a 5¾lbs. trout.

The Fort Myers (Fla.) tarpon record for the season from Jan. 1 to June 28, 1892, as printed in the *Press* of that town, shows a recorded catch of 200 fish, ranging from 4ft. 5in. to 7ft., and from 58lbs. to 184lbs.; 108 were over 6ft., and only six were under 5ft.

"Kingfisher" might be said to belong to the "realistic school" if that term were not applied to writers of fiction, and the "Kingfisher" chronicles are understood to be faithful relations of actual experiences. There is no disputing their claims to realism.

Dr. Tarleton H. Bean, of the United States Fish Commission, and angling editor of FOREST AND STREAM, has just been appointed to the charge of the Division of Fish-Culture, a position which will give him larger opportunities in a chosen field.

The Amateur Revolver Championship now rests with Mr. Geo. A. Jantzer, who yesterday won it from Dr. Louis Bell. Mr. Jantzer must do better work the next time, however, or he cannot hold it.

"The Camp Keeper," which appeared in our issue of July 7, it should have been stated at the time, was drawn from an amateur photograph by Mr. A. Ames Howlett, of Syracuse.

# The Sportsman' Tourist.

## CAMPS OF THE KINGFISHERS.—VIII.

### CARP LAKE, MICHIGAN.

#### The Carp Lake Camp.

ABOUT this time our "trout tooth" began to bother us, each and severally, and Sam and I laid out a trip that night after the camp fire was built that promised to give us relief and some sport at the same time.

Something over a mile below on the opposite side of the lake was Alexander's Creek, out of which I took a 17in. trout in 1884, and we had taken a mess or two of good ones out of it the previous summer.

Thither we took our way in the ironclad next morning, Sam and I, with a big lunch wrapped in a paper, for we intended to be out all day for trout and bass. We stopped at Alexander's Point, across the lake, and caught a couple of dozen good big shiners with hook and line for bass bait, as we were going to cross over to "Cattail Point"—a noted place for bass—and fish along for maybe a mile or two below before turning back for camp. But we would fish the trout stream first, before the noon-day heat made the trout too lazy to bite.

We pulled down to the mouth of the stream and rowed carefully into a smooth, sandy beach, and when within 6 or 8ft. of the shore, with the boat at a standstill, I leaned over the side to scan the bottom for snags, when I heard a sw-i-s-h, and looking down near the stool on which I sat, there was a stream of water gushing up through another rip in that cussed canvas, this time on the larboard side nearly opposite the other one.

The water was not more than 4in. deep under us, and we stepped out with scant ceremony and pulled the boat up on the sand, and then I waded back to look far the cause of the calamity—like that would do any good after the damage was done.

There, sticking up out of the sand and barely discernible, was a snag an inch long of a broken-off limb on a log that the washing sand had covered out of sight except the little sharp point, and when I leaned over my weight had settled the boat squarely on it, from which only one thing could result—a hole in the canvas. Had we pulled in 4in. further to the north the boat would have gone clear.

Old Sam stood looking at the hole with an air of utter prostration, but he at last managed to give expression to his feelings with, "Shipwrecked agin, by the great gosh! I wouldn't give a nickel with a hole in it for a whole fleet o' sich boats, I wouldn't b'gosh."

We had seen an old skiff lying on the bank at the point as we came down and we decided to fish the stream up through the fields as far as the woods and then go to neighbor Schaub, living near the point, and borrow the boat to get back to camp in, first going back after the ironclad. We sunk the bucket of minnows under a root at the mouth of the stream, hid our coats and lunch in some tall grass near by and took our way up the stream, not very much discouraged over the mishap, but I won't chronicle the remarks we made about Brother Osgood, and canvas boats in general, lest it prejudice the reader a trifle against that species of water craft, and yet it was an accident that might not have been avoided, even with more vigilance in making the landing.

Next time we would maybe have "hoss sense" enough to bring along a needle and thread and piece of canvas, or at least needle and thread, in which case we could make shift with a piece of doubled shirt-tail till we got to camp.

We fished along quietly up into the last field next the woods pasture without any special happenings, taking a dozen or more good trout on the way, and it was open, comfortable fishing, too, for there was no tangle to bother us and make us warp a certain commandment, albeit old Sam always left it to "Jeems Mackerel" to do the "warping" when occasion required. When near the upper fence I had just picked out a finely-colored 9in. trout from under a big stump under which the water had scooped a deep hole, when I heard a bellow behind me, and looking over by shoulder I saw a big black bull coming toward me not 20yds. away, with a lot of other cattle following to see the fun, as I hastily figured it out. I knew there must be a couple more good trout under that stump, but I hadn't time to stay and have it out with them; the loss of a minute might complicate matters with the bull.

I jumped across the stream with an agility that would have made Old Sam smile had he seen the performance, without a thought of the hitch in the rheumatic old starboard knee joint, and before the bull was through with his little preliminary practice in the shape of pawing, bellowing, goring his horns into the soft ground and tossing a handful or two of earth over his back—as he was going to do me—I was on the further side of the fence, rod, trout and bait box, with a rent in the rear of my breeches made by an unfriendly knot on a fence rail as I slid over, shouting to Sam, who was coming up a hundred yards below, to "look out for the bull, and make a wide 'come around' to the left and climb the fence at his earliest convenience, or he might run into trouble."

When the bull had plowed up a yard or two of ground with his sharp horns, he straightened up and took a brief intermission to look in the direction where I had been, but I wasn't there, and I took comfort to myself for my absence, not counting the rent in my breeches.

He soon spied me shaking my fist at him, which I felt safe in doing as there was a good fence between us, and started with a warlike bellow straight for the fence, but stopped when he got to the stream.

He eyed me sullenly for maybe a minute, and then started to tear up the ground again with his horns right at the banks of the stream.

There must have been a friendly root in sympathy with me near the bank, for as I watched him he sunk a horn in the earth, and giving a great surge of his powerful neck the horn did not come up—it had caught under a root, and he threw himself flat of his back and rolled into the stream, at which I rejoiced vehemently and laughed till my sides ached; nor could I help shouting at him, "Goody, you black devil; I only wish you had broken your cussed neck." The water was less than a foot deep where he rolled in, and he was directly on his feet again, the most crestfallen-looking bull I reckon in the whole State of Michigan.

He shook his head in a dazed sort of way, gave a couple of snorts without once looking in the direction of the cause of his discomfiture and started slowly back to the other cattle, who not having perhaps enjoyed the turn of affairs as well as I, had quietly resumed cropping the short grass.

That hidden root was something that he could'nt quite understand, and it had knocked the conceit and "big injun me" air entirely out of him and he went to feeding with the other cattle with a look of humility that moved me to another fit of hilarity.

I left him to his grass and reflections and turned to the stream again, better satisfied doubtless with the outcome of the "episode" than the black bull.

Just above the fence was a mass of drift lodged against the bottom rail where the stream ran under it, and above this I dropped in the freshly baited hook, letting the current carry it under the drift, and in less time than it takes to mention it, I swung a trout out over the low bank that was about equal in size to the one taken at the stump where the black bull came to grief.

By this time Sam had climbed the fence 50yds. away and came up to "jine me" in another laugh over "gittin' one on the bull," and then he rasped out the introductory lines of old Bill Schroll's favorite ditty—

> "The old black bull came down from the mountains,
> Long time ago;
> He pawed up the ground an' then he bellered,
> Long time ago."

We felt under the drift for another trout, but not finding one crossed the lane and climbed another fence, to fish the stream up to the woods a hundred yards or more to the last hole, a deep pool under the roots of a great elm where I fooled the 17in. trout some years before 1884.

Two years before, little Ed. Vedder—my boy chum—and I had been chased away from this pool and out of the field "a whoopin'" by a red bull, and when I related the episode to old Sam he said we ought to call the stream "bull crick."

Fortunately there were no cattle in the field and we had a chance to fish the pool in quiet.

When within three or four rods of it we tied our fish in the water and laid our plans for fooling a big trout, for I had found in the three seasons I had fished it that there was always at least one big fellow in it that was boss of the hole, besides some lesser ones that were too big, however, for him to swallow.

I stood back a few yards and let Sam do the fishing, for I wanted him to have a taste of glory if it was in the pool. He crawled up on hands and knees till he could poke his rod over the water and let the carefully baited hook suck under the tree, when it was instantly seized by an 8in. trout and the victim of the wiles of a seductive Kentucky fisherman was as instantly and quietly swung out back on the grass, where I released the hook, adjusted the bait and Sam dropped it in again without changing a muscle or his position.

Before I had time to put him on the stringer, Sam hoisted out another of about the same size, and he kept repeating the performance till he had yanked out six in twice as many minutes, when they quit biting, and still the big fellow had not made a sign that he was there. Sam laid on his belly for half an hour trying all his arts to coax the big one to take the bait—we were of course certain that there was a big one in the pool—but to no avail, and he at last gave it up with the sage observation, "When trout quit bitin', they quit bitin', an' I reckon there's not nary 'nother one in that hole, nohow."

We went over to neighbor Schaub's and related our tale of shipwreck to him, and borrowed his boat without any trouble and went down to the beach and put it in the water, when we found it leaked about a gallon a minute, but we consoled ourselves with the thought that it would swell up after awhile and we could make out to get to camp in it by one bailing with an old basin while the other rowed. The oars, too, were a marvel in their way, handy almost as a pair of fence rails, but the outfit was the best at hand and we felt thankful for it. The wind had risen while we were on the trout stream, blowing down the lake—was it ever known to blow in the right direction when you want to get back to camp?—and the water was rough and choppy. It was no trouble to go with the wind, and we were soon at the sandy beach and had the ironclad apart and loaded in the clumsy skiff.

While Sam went for the minnow bucket I went for our coats and lunch where we had concealed them in the tall grass. The coats were all right, but some torn scraps of paper scattered around and a "passel o' hogs" grunting and rooting lazily a few rods up the shore told the tale of the lunch. Then it was in order to give the commandment another violent "warpin'," while old Sam stood and looked a complacent approval.

The "warpin'" finished to Sam's satisfaction, we pushed off again and began the real work of getting back to camp. We got along fairly well till we rounded the point, where we got the wind dead ahead in its full force, and then with our utmost exertions the headway was barely perceptible, and sometimes an energetic gust of wind would give us a backset of a few feet.

I unshipped one of the oars, and standing up in the stern used it as a pole, hugging the shore in shoal water where I could reach bottom, and with Sam alternately bailing and pulling at the other oar, we managed to keep the old tub moving. We labored slowly and sweatingly along up the shore till a quarter of a mile or more above, where we could see the old flag whipping straight out in the wind and slanted across with the wind on the quarter to camp, worn out, hungry, out of humor and the commandment badly warped, but with trout enough to satisfy the trout tooth of the whole camp and make up for some of our misfortunes besides.

The ironclad was again carried up in the shade of the oak, and when we had cleared the table of the lunch Barney set for us, we patched and waterproofed over the slit, and then old Sam made a big vow that he would "never set his foot in another one o' them confounded no 'count tissue paper boats as long as he lived."

The others had been in camp all day except a while in the morning on account of the high wind which made the lake too rough to handle a boat and fish, but they had caught more bass than we could use, a fact attested by three or four on a stringer tied to a log lying partly in the water, where they had been left hanging till the surf beat the life out of them against the bottom.

The sight of the trout Sam and I brought in had "het up" old Kelpie's blood to a point that gave him no rest, and that night around the camp-fire he fidgeted and squirmed around in his chair, and swapped legs so often that we knew there was something serious on his mind, and at last it came out. He must go trout fishing in the morning, and he wanted Johnny to go along and row the boat up to Fonch's landing, from where they would walk to the stream running through Fonch's land and fish it till they got trout enough to "take the conceit out of old Sam and Hickory," as he expressed it.

Johnny snapped eagerly at the chance of a day out with Brother Kelpie, and from that on till bedtime they became intimate as two old chums as they discussed their plans for the next day's fishing—beardless boy and grizzled veteran, they were drawn together by the same cord that binds the brotherhood the world over.

They were off in the morning early and when they returned in the evening "Sam and Hickory had the conceit knocked out of them" with thirty good trout as they were counted and laid on the table with a great flourish by Johnny, who spent the better part of the next three days, and the nights around the camp-fire, telling us just where each trout was taken and just how it was all done.

The same morning Sam and Charley had taken the big white skiff and started for Maybert's Creek, three miles below on the same side of the lake as the camp for trout, but they somehow misunderstood the directions I gave them about finding it, and wandered around through the woods two or three hours, sometimes within 50yds. of it, as I learned a few days after when Charley and I made a trip to it, when tired out and disgusted, and pestered to the verge of profanity by "skeeters," they went back to their boat and spent the rest of the day after bass and pickerel.

The day Charley and I fished it we took back to camp seventeen that were little over the 6in. limit, and put back in the water nearly twice as many more that were 3, 4 and 5in. long. A farmer whom we met told us there had been not less than 1,200 fish taken out of the stream before our arrival. No wonder the good ones were scarce; the count fisher and the trout hog had "got in their work."

Ever since we had been in camp we had been getting minnows with hook and line, and although there was "lots o' fun" flipping them out, the process was sometimes tedious when in a hurry to get to fishing. The Colonel and I determined to lay in a supply that would last two or three days or more, by setting the glass trap and filling all the spare buckets around the camp, which would please the boys and gratify our desire to "see the thing work."

Leaving the "Perfessor" in camp writing some letters, we pulled down to the break of the bar off the birch point, and drove a small, trimmed sapling in the bottom at the edge of the grass, to which we hung the trap a couple of feet under the surface, baited with pieces of broken cracker, and then anchored our boat 20 or 30yds. above to fish for bass awhile and await developments.

There were hundreds of good minnows along in the grass around near the trap, and we had no doubt but we could go back in half an hour or so and find it so full that their tails would be sticking out of the hourglass-shaped entrance hole. But we didn't.

We went back after awhile and saw plenty of them swimming unconcernedly around it, but "nary a one" in it. We moved it down the lake a few rods where the minnows were "thicker'n skeeters in a cedar swamp," caught a few good shiners with hook and line and went back to our bass fishing.

At the end of another hour we paid it another visit and found it full—of water and broken cracker, and nothing else. We began to think the contrivance a fraud, or maybe the bait didn't remind them of anything, and we caught five small shiners and put them in it, thinking that when the others saw them in there they would go in to get a share of the broken cracker.

This scheme promised so well that we did not stay long at our fishing but went back to see how it had panned out, ready to shout like a couple of boys at the success of our ruse. But the best laid schemes o' mice an' men, etc. There was a barred perch that could little more than turn around in the trap, who had crowded in through the hole, and one of the five shiners was missing. We were both amused and surprised and made a few remarks to suit the occasion. Here was a new way to catch perch, and we felt duly thankful and passed a vote of thanks to whoever invented the trap.

While we sat in the boat a few feet away, studying the case over, the big perch gave his tail a sudden flirt, closed his jaws on another of the helpless minnows and proceeded to swallow it with the greatest complacency, and then we were convinced that the first one had not made his escape by the entrance hole of the trap.

In the next ten minutes that cannibal deliberately swallowed the remaining three right before our eyes and then turned lazily two or three times in the narrow confines of the trap looking for more.

As we had not set out to catch minnows to feed a big lazy perch that was too shiftless to skirmish for them in a legitimate way, we raised the trap, and taking his pot-bellied smartness out, pitched him 10yds. out into the lake, for which he doubtless thanked us, for with all his cunning in getting in he hadn't sense enough to find his way out of the hole through which he went in.

We set the trap again and did not return to it till toward evening, when we found three small perch in it, but no minnows.

We had heard and read a good deal about the merits of this trap as a minnow catcher; some of our friends had used them of the same pattern with success, but our efforts with it resulted in total failure; none entered it only the five little ones we put in—to furnish a square meal for the big, lazy perch.

A day or two after we took it across the lake to Alexander's Point, where there were always hundreds of good minnows along the edge of the bulrushes and grass, but it remained empty from day to day, although we could sit in a boat a few feet away and catch with hook and line all around it as many good big shiners as we wanted, sometimes within a few inches of the entrance.

We lost faith in it altogether, but it may have been our own fault in not knowing how to manage it, and some of the brethren who have used them may be able to tell us the reason of our failure.

At any rate we got no minnows with it, and if it per-

forms no better when the next camp is made it will find a final resting place on the bottom in the deepest water to be found in the lake.

We burned a good many logs and limbs that night, for each one had his story to tell about the happenings of the day, and the hour was late before the camp-fire gave its last dying flicker, warning us to seek the tents and bed; even the Colonel had run out of warp and woof for the fancies he had been weaving for the last half hour in the glowing embers, the ashes were knocked from his fireless pipe and he was ready for once to turn in with the rest of us. KINGFISHER.

# Natural History.

## NOTES ON THE SANDHILL CRANE.

ON the top of the rush-built mound or house of the muskrat near the shore of lake or slough, and just far enough from the bank to be safe from the marauding coyote, the sandhill crane scooped out a nest and raised her young in safety, in the old days when Minnesota and northern Iowa formed the finest trapping ground on earth.

I once found such a nest, and although the mother bird laid her head down close to the side of the rat-house to escape observation, she was driven from her treasures, and a glance into the nest revealed two eggs about the size of those of the turkey, brown in color, mottled and spotted with darker brown. The sight of the nest and its embryo occupants was enough to repay the discomfort of wading in the icy water to reach them.

Who among the readers of our dear old journal has seen the weird dance of a flock of sandhills? Once only in a lifetime of more than half a century have I seen this strange performance in its perfection, when each member of the flock of fifteen or twenty long legs entered into the sport with the evident intention of getting as much square fun as possible out of this "all promenade" of nature.

It was on the prairies of Iowa nearly forty years ago, and for half an hour I faced the northwest wind of early springtime to watch the awkward hops and fantastic posturing of this merry group of untaught dancers, as with wings half outspread the strange "hop, skip and jump" went on, so very like the awkward, stiff-legged dances of the Indian braves that it really seems as though the Indian dances were first suggested by observations of the wild gyrations of the sandhill crane. Certain it is that the Indian is not so very much the more stiff legged and ungainly performer of the two.

Courageous, too, is this wary bird of the wilderness, and in extremity can fight with the energy of desperation. On a well-remembered day "lang syne," when dear old Jim Morehead followed the same trail across the prairies with me, a pair of cranes was approached within 200yds., and as Jim was the rifleman par excellence, the old muzzleloader was quickly passed to him, and the bullet broke the wing of a stately bird, which flopped and fell awkwardly as its mate rose in the air; and at the sight of the struggling bird Jim's old dog Coaly sprang forward to retrieve it.

Courageous and active as he was, for once he reckoned without the host. The brave old bird drew himself grandly up and met the reckless charge of the dog with a veritable lance thrust of the long neck and spear-pointed beak, so fierce and deep that with a howl of pain the dog recoiled, and tried by actively springing from side to side to catch his prey unawares. But ever the fiery eye and lance-pointed beak fronted his attack, and another fruitless effort or two soon taught him the value of discretion, and he was forced to await with impatience the help of his master to put his foe *hors de combat*.

I once had a fine exhibition of the courage of this bird when not half grown. I was looking for deer one evening an hour before sunset when, at a distance, I saw an old crane closely followed by two little ones nearly large enough to fly. As I approached the little ones disappeared and the old one took wing. Carefully marking the spot and keeping my eye fixed steadily upon it I walked directly to them as they crouched in the grass.

I lifted the little creatures in my arms, being careful meanwhile to protect my eyes, but as the little female appeared almost overcome with terror and refused to be comforted I put her carefully down again, when with drooping head and outstretched neck she scudded away through the grass for a few rods and dropped from sight again. Not so the male. He was for war immediately if not sooner, had got his "dander riz," and proposed to prove that he was from Bitter Creek direct.

After amusing myself with him for a few minutes, during which I kept hold of his neck to protect my eyes which he appeared viciously inclined to strike, I put him down and offered him his liberty. Not a bit of it! Liberty was nothing to the fierce joys of the warpath with this fiery young savage of the prairie.

The brightly shining heads of the brass rifle shells protruding from my cartridge belt seemed to arouse all his wrath, and a dozen times he amused me and no doubt gratified himself by stalking up in front of me and spearing those offending shell heads with rage insatiable. I really had quite a difficult job shaking him off as he followed me through the long grass for quite a distance, all the while muttering his little impotent wrath and daring me back to the fight.

But it was not until within a very few years since that I saw what I very much doubt if any half dozen readers of FOREST AND STREAM ever saw—a mother crane hovering her young. Again I was looking for venison, and having reached a point of rocks nearly a hundred feet above the swampy bottomland of the Colville River, almost directly beneath me, and as this was a favorite point of observation with me, from which I had killed a dozen or so deer at other times, I sat down on the gnarled root of an upturned tree, and as the sun sank behind the mountains far off toward the Columbia River I watched the open swamp for the coming of a deer. Not a deer appeared. Half an hour after sunset came three cranes instead—two old ones and a little bird half grown.

Flying slowly around to survey the ground, they alighted at length within 100yds. of the base of the cliff on which I sat. Taking a careful look at all his surroundings, but seeing nothing of me perched high on the rock above him, the male bird walked slowly forward toward the cliff, talking in a low note to the others behind him, while the mother bird stepped forward to a little point of dry land at the edge of the marsh, and there threw herself forward flat upon her breast, spread her long head and neck on the ground in front and lay still. Soon the little one walked up, and, poking his head under his mother's wing, squatted down and wriggled forward under her wing close to her side, and soon the little head and slender neck came twisting up through her feathers, and there he was housed perfectly from the cold of the approaching night. I watched them for an hour or more, as long indeed as I could distinguish my rifle sights, and when at last I crept away homeward I was careful to make no disturbance, and giving no alarm to the watchful creatures resting peacefully below.

What other reader of FOREST AND STREAM has ever seen the mother sandhill crane hover her young? Don't all speak at once. ORIN BELKNAP

### Is it a New Humming Bird?

I HAVE seen it stated that there is but one species of humming bird native to New England, namely the ruby-throat. This may be correct, though observers here in Cummington assert that they are visited very often in mid-summer by two kinds, which vary not only in color of plumage, but in form and figure. Every day at this season the ruby-throat visits the flower beds, very tame and often seen at rest on the stems of annuals and small woody plants. Last year and the year before there came frequently in company with the ruby-throats, two pairs of humming birds noticeable for their stouter bodies and shorter tails, with black heads and green reflections all over the body and wing coverts. One flew into a window and was caught; so that upon examination the difference became strikingly apparent. This year, however, none have been seen.

Is it possible that these birds with green plumage were mere casual visitors? or have they come to stay?

## CHICAGO AND THE WEST.

[*By a Staff Correspondent.*]

CHICAGO, Ill., July 20.—In regard to the suggestion of a test case in the much vexed question whether or not a jacksnipe is a waterfowl, my contentious friend, Col. Bond, has the following to say in regard to Warden Bortree's position:

"RAVENSWOOD, Ill., July 14.—I send you my reply to Mr. Bortree. It may worry him some. The sportsmen should contribute and have a test case, as they are as much interested as any one. But I do not expect a penny from them, as I never knew them to give anything for game protection, though they always stand nearby to share the benefits secured at the expense of others.

E S. BOND.

The article prepared by Col. Bond is as follows:

ARE SNIPE WATERFOWL?

"Sickness has prevented my answering Mr. Bortree's reply to my letter in the *Tribune*. Both have been published in the FOREST AND STREAM, and have been read with interest by sportsmen generally. Mr. Bortree appears to depend greatly on dictionary definitions to find out what a snipe is. They are poor authorities at the best, as compilers of dictionaries are not supposed to know much about birds, and probably would not know a snipe should they see one. Webster's definition of snipe is 'A bird of the genus *Scolopax*, that frequents the banks of rivers and the borders of fens.' In this he is correct. He does not say that they are waterfowl, or even go into the water. The Century Dictionary gives no definition of waterfowl; its definition of 'water bird' is 'an aquatic as distinguished from a terrestrial or aerial bird,' otherwise, water as distinguished from a land bird. Worcester's Dictionary is so old it is no authority. Mr. Bortree must be hard up for authorities to go as far back as Belonin in 1555. No one disputes that some old writers had a class called waders, but this classification has been abandoned by all modern ornithologists. The same can be said of Rev. Hick's catalogue. So far as Mr. Henry Breton, State geologist, is concerned, he may know something about rocks and stones, but is not supposed to know much about birds.

"Mr. Bortree says he does not find any authority to support my statement that "Any bird that makes its home on the land is not a waterfowl." The authority is the exercise of plain, common sense. If Mr. Bortree will read Coues's "Key to North American Birds" and Jasper's "Birds of North America," he will know more about birds than he does at present. The game warden's personal attacks I care nothing about, and do not consider them worthy of any attention. The question is "Are snipe waterfowl?" Mr. Bortree labors hard in defending Justice White, and his absurd decision as to what is a "wild buck." The inconsistency of his decision can best be illustrated by taking a mountain sheep. The male would be a wild buck and protected by law, but the female being a ewe, would not be protected. This would be hard on the ewe, as the game warden says as to snipe. I offer the following letters in support of my position that snipe are not waterfowl. Dr. N. Rowe writes:

CHICAGO, June 10, 1892.—Col. E. S. Bond: There is one thing that everybody is off on in regard to snipe. It was I who, in order to harmonize matters proposed to remove all protection from snipe, and it was thoroughly and positively understood that snipe should not be protected. Moreover, the snipe is not a waterfowl; that I stated in the *American Field* several times. In regard to this very question you can state positively what I have written you. That it was I who proposed to throw the protection off from snipe in order to get better protection on some other game birds. Yours truly, (Signed) N. ROWE

ALMOST EQUALLY GOOD.

"Prof. Elliott Coues, the author to Coues's 'Key to North American Birds,' a professor in the Smithsonian Institution, and the best living authority on birds, writes:

SMITHSONIAN INSTITUTION, June 3.—E. S. Bond: Dear Sir—You are right. Snipe are not waterfowl in any usual, proper or recognized sense of the word. By waterfowl is understood ducks, geese and swan, and such is always the intent of the laws concerning game. You can rest assured of this, and you will do good if you make it clearly understood whenever the question comes up. Yours truly (Signed) ELLIOTT COUES.

"Prof. R. A. Turtle, the well known taxidermist, writes:

CHICAGO, July 7.—Col. E. S. Bond: Dear Sir—You ask if I thought snipe came under the head of waterfowl. My answer is a decisive no. When you show me a snipe starting out from shore and swimming of his own free will, then I will say they are classified as such. "Waterfowl" includes ducks, geese, swan, pelicans and any bird that alights in the water. Yours truly,

(Signed) R. A. TURTLE.

"John Watson, the veteran sportsman and snipe shooter, who knows as much about snipe as any one, writes:

CHICAGO, July 7.—Col. E. S. Bond: As to the question 'Are snipe waterfowls?' my answer is: Clip a snipe's wings and throw it into the water 200yds. from shore, and it would drown before reaching land. The claim is unmitigated rot. Yours truly,

(Signed) JOHN WATSON.

"Prof. Packard, of Brown University, in his elementary course in zoölogy, says there are four different types of birds, viz., the running, walking, swimming and the perching. Baird, Jasper and Coues follow this classification nearly. Among old ornithologists are Bonaparte and Wilson, about the beginning of this century, whose works are out of date and out of print. Audubon comes next as to habits and description of birds. He will always be authority, but great as he is, he has ceased to be authority on classification. Baird, Jasper and Coues's works have been published within the last fifteen or twenty years or later. I ask Mr. Bortree to produce some late authorities, or even the opinion of five men, who know anything about the matter, who say snipe are waterfowl. I do not believe he can find one in the State besides himself. In the whole range of my acquaintance I have not found one who takes his side of the question. The game warden thinks it very wrong and almost wicked for me to advise the dealers to make a test case, and appears to be very much aggrieved. He cannot tolerate an honest difference of opinion, but thinks it our duty to submit to his dictation. I will have to lacerate his feelings further by repeating my advice to dealers to test the law, and I now call on the sportsmen to contribute and make common cause against the dictation of one man, who probably never read a modern work on ornithology.

"In any event, where authorities conflict the courts will be governed by the intentions and understanding of the framers of the law, and this can be easily established. I have several letters from prominent sportsmen concerning the stand I have taken. The game warden's construction of the law means very little snipe shooting. It will not make much difference in the spring, but the best shooting in the fall comes before the 15th of September, and the best I ever knew opened on the 12th of August. This ends all I have to say on the snipe question.

"E S. BOND."

A TEST CASE NEEDED.

Col. Bond puts up a rather rugged case to handle, that is sure. As to the original intention of the law there is no question. Neither has there been any case, to my knowledge at least, with decision counter to this original intention. The general impression and belief of Chicago shooters is alike unmistakable. They do not class snipe shooting with duck shooting, nor snipe with ducks. One of the heaviest bags of snipe ever reported here was made by shooters who took off their rubber boots, walked in their thin sheepskin inside moccasins, and shot snipe on ground where the walkers kicked up dust at every step. The snipe shooter is not an expert who sticks to the marsh when the snipe are missing. He must try the high knolls miles back from the marsh, and perhaps even the willows or brush in rough weather.

This much, snipe hunting will teach any one, but it does not settle the question of classification, and it does not settle the point at law as raised by Warden Bortree. I hardly think the sportsmen will or should follow the shiftful advice of our friend the Colonel, and contribute toward the expense of a test suit. Should they do this, they would appear to rebuke Warden Bortree, and so might lose his services, which are altogether too valuable to be dispensed with. We can't afford to spare the first real, actual, active and in earnest warden we ever had here. Knowing so well that Mr. Bortree is sincere, even if he grows extra-zealous, I have some hesitancy in saying anything which he might take to be opposition, and I know a great many of our sportsmen feel the same way. It seems to me now, as it did at first, that we need a test case to live up by. The sportsmen will back the decision. They want to back the warden. We don't want a weak-backed warden. It is all right for Mr. Bortree to pluckily stand up for his position, and not to give it up easily. In this case, however, should he smile good-naturedly and say, "Well, boys, back me the better on the chickens and ducks and we'll let the snipe question rest for awhile," I don't suppose he would lose much dignity or prestige. The confession is nevertheless extorted that a compromise is not desirable to the warden, and not often desirable at all in a question of this kind. The right and the wrong of it should be determined actually and definitely. We may as well admit it; until the test case we are all at sea, and don't know what to think. Our personal beliefs or preferences ought not to weigh. We want a case. By courtesy the sportsmen can not start it. Has Col. Bond's right hand lost its cunning? He has retired from the street, but has he not his old influence among the dealers? In a half day can he not raise all the small money needed for a case? Come, Colonel; this would be only another chance at thine ancient enemies. For the game dealers, consider: Suppose the warden seizes 500 snipe some day, and makes his case hold. A case by consent might be cheaper. Let us have it.

CHICAGO, Ill., July 30.—Mr Percy Stone, of this city, relates a little incident of his late visit to the old homestead near Oconomowoc, Wis., which may offer to Prof. Garner a new field for the study of language. Mr. Stone was looking out toward the wood in front of the house when he saw an old fox squirrel and five young ones coming toward him along the top of the fence.

"It looked just like one big squirrel, about 5ft. long," said he, "for they were all running along one close after another, and every time the one in front would come to a post in the fence over he would go and each one behind right after him. They kept right along on top the fence

for a number of rods, taking all the inequalities in line and never breaking rank. I stood and watched them and they were not afraid, for no squirrels are allowed to be shot on the old farm. At last they came to the wagon gate in front of the house, and here there was trouble. There was a high post, boxed up and with a board cap to it, that projected high above the level of the fence. The old squirrel took this right in her stride and so did the next four young ones, all going down on the opposite side of the post and running on across on the top of the gate. The last squirrel was a little one, apparently the last of the lot, and he balked at the post. He wouldn't try it, but seemed afraid. He put his paws up against the post and set up a dreadful chattering. The other squirrels all stopped and began to chatter too, but the little fellow wouldn't move. He just sat and hollered. All the other squirrels came on back across the gate, to the other side of the post, and then such a chattering you never heard. The little one didn't take any advice, however, and the upshot of it was that after a while he skinned down the post to the ground, ran up it on the other side and got into line behind again. Then away they went as far as I could see them, bobbing along like a long red snake on top the fence. It was easy to see that those squirrels had some sort of language, though I couldn't make out whether they were coaxing the little fellow or swearing at him."

Mr. Stone, it may be remembered, is active in the management of Diana Club, of the Horicon marsh. He says that this year there is plenty of water all over the marsh, so that there will be no difficulty such as there was last fall in getting about with the boats. In fact the second rise of water may have been damaging to the ducks, as it may have caught many on their nests. The mallards this year are nesting away back where it was dry and dusty last year.

Just what the effect of the wet spring has been upon the chicken crop it is still too early to learn with any accuracy, though the general impression seems to be that in this State the birds did not suffer so very much. Compared with the terribly dry season of last year, the shooting in Minnesota and South Dakota may be very satisfactory after all this year.

Messrs. M. R. Bortree and F. S. Baird will leave in August for their annual chicken hunt near Huron, in the Jim River country, Dakota. Here they get fair shooting, all the birds they care to eat at the farm where they stop.

The first of August is now at hand, and many are making plans for a little chicken-shooting campaign. He is very fortunate who can count with any certainty upon finding a chicken country where he can get good shooting. In accordance with my promise, made earlier in these columns, I shall on Aug. 1 privately notify all inquirers after the whereabouts of the "game pocket" over which we had a little writing last winter. There are several gentlemen who have inquired personally or by letter after this, and to all these the same reply will be made, viz.: The name and address will be given of the gentleman who gave me the information, and his terms for board, etc. I have no late information from this locality, but have written for it. There is every reason to think the chicken shooting good. I could not, and cannot now give this locality out publicly, for the informant does not want the market shooters down on him. To any gentleman of references the information is free as the air, of course, and gladly given, and I only hope that, difficult and usually thankless as it is to direct any one to a locality for a sportiug trip, this "game pocket" may prove itself not over-estimated, and may be the means of affording pleasure to some gentlemen who may in their time have gone further and fared worse. This year and next the market shooters will about clean up the chickens in northwestern Nebraska, which for the past few years has been the best chicken country left in the West. The Indian Nations country is pretty well shot down now. After this corner of Nebraska goes, there will not be any real chicken country left. The shooter will have to pick his shooting here and there, as he can find it, and "game pockets" like the one in question here will be of still greater value. I must add that I cannot testify to the actual value of this "pocket" out of any personal experience, though gentlemen who shot there last fall write me that it was all that could be asked as a chicken country.

The hot weather here has stifled all aspirations for sport for the present, and most of our shooters and fishers are absent at the country clubs trying to keep cool. Messrs. C. G. Page and N. C. Wheeler went this week up to Potter's Lake, near Mukwanago, Wis., after bass, but unless there comes a cooler time they will hardly get any bass. The Kankakee club houses are about all full now, but the chief amusement is sucking straws.

That pleasant summer club, the Grand Calumet Heights, has put in about $1,500 in improvements, and now has a pleasant lawn and improved buildings. The fishing for game fish is next to nothing, but the location on the lake shore is pleasant and restful, apart from the city, as it is by only a short remove. So far as can be learned, our friend Alex. T. Loyd, lately mysteriously disappeared, has been living down at Grand Calumet Heights Club all the time. I think some of organizing a relief expedition and going down after him. Mr. Loyd is a great explorer. It will be remembered that he discovered the sources of the mysterious Little Calumet in a country never before trod by the foot of civilized man.

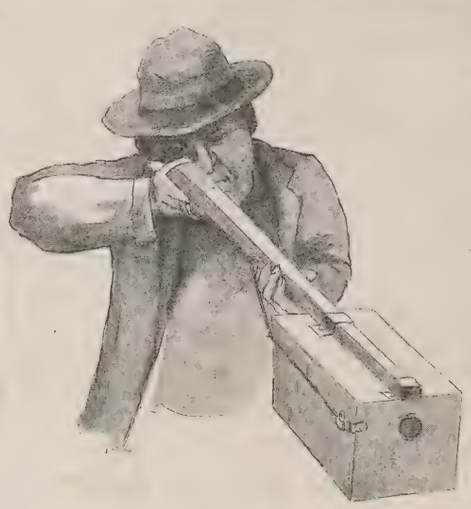
E. HOUGH.

No. 175 MONROE STREET, Chicago.

### What is the Interpretation?

THE Utah law on California quail is found in Act of March 13, 1890, as follows: "SEC. 4. Any person who shall kill, ensnare, net or trap any quail, partridge, pheasant, prairie chicken, sage hen or grouse within the Territory of Utah between March 15 and Aug. 15 of each year, or who shall kill, ensnare, net or trap at any time any lark, whippoorwill, thrush, swallow, snowbird, bobolink, woodpecker, or other insectivorous birds, not being birds of prey, except English sparrows, and the bird commonly known as the California quail, shall be guilty of a misdemeanor." According to this, what is the law on California quail? May they be killed at no time or all the year around?

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*,



## A GUN CAMERA.

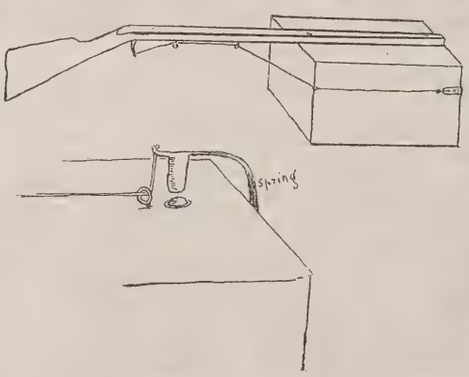
HARRISBURG, PA.—As I understand the photographic competition in the FOREST AND STREAM, it is the desire to get not only good pictures, but photographs of game, incidents, etc., out of the usual channels.

The ordinary tripod arrangements is hardly adequate to meet sudden emergencies (taking too long to set up). The hand cameras are good, but as used with the ordinary finder on top or sides, a small moving object, like a bird flying or hare or dogs running, is difficult to keep "in" the finder.

It has been my ambition to get a photograph of a bird in the air the moment it was struck by a charge of shot, and I have tried to accomplish this end by attaching a hand camera to a piece of wood shaped like a gun.

Instead of looking into my finder when a bird arises I

A POT SHOT.



(Not a portrait of "Pizarth.")

throw my "gun camera" to the shoulder, and when on the bird "pull" the button.

It looks easy, and it is, to get the bird just before being shot (by your assistant) or just after, but frankly confess I have never caught it just at the right moment.

You don't get very good "pictures" by this method, but you will get some very queer photographs, although I have secured some pretty pictures by pointing the camera about half-way between the shooter and the game. One easily learns the angle of his lens and the camera, being on the under side of what correspond to the barrels of a gun, is bound to hang level. But it is not "pictures" you are hunting with this arrangement, but odd photographs, and with a little practice you will get them much better than by the usual way.

The accompanying rule drawing will give a fair idea

THE GUN CAMERA.

of the "rig" and any one can fix their hand cameras without injury to them. The method of pressing the button is easily arranged. The simplest being an old guitar string which has all the stretch taken out of it, running from the trigger on the stock to a spring near the button. By pulling the trigger you press the button.

Some of the results are rather astonishing.

PIGARTH.

On the opposite page is a reproduction of one of Mr. Brelsford's "gun camera" photographs, and though he did not succeed in getting the bird just at the instant desired he certainly did secure a most artistic and effective picture. In reply to an inquiry Mr. Brelsford writes:

Yours of the 24th at hand and noted regarding the picture of the duck rising at the water's edge.

I wish to state that it is bona-fide and taken while the bird was in the air. The negative was retouched and print spotted of course to give the necessary sharpness. The flight of the duck was a trifle fast for the speed of shutter. A second later I would have caught the discharge of the gun and the duck falling. I suppose I have wasted over a hundred—yes two hundred plates trying to get a picture of a bird the instant the shot struck it. I have several immediately before and lots just after. They don't make good pictures, as generally they are either all sky or all ground. When the dogs stand I endeavor to locate the bird on the ground, and telling my assistant who does the shooting to yell "now" just as he pulled the trigger, snap the shutter and by having my "gun camera" pointed about half-way between the shooter and the bird get the whole scene about once in twenty-five times, but have never gotten the supreme moment yet. But still we might just happen to strike it some day, and that would be our reward.

### Wooly Venison.

A $5,000 damage suit was instituted in the district court yesterday by William A. Peers, a minor, through his brother, Robert A. Peers, who, by order of the court, was on Tuesday appointed guardian in order that suit might be commenced. The action to recover is against Deputy Game Warden Charles A. Nichols, and behind the whole affair is a story that would be extremely ludicrous were it not for the serious consequences entailed. The ground for suit is alleged false imprisonment.

On Saturday evening last, according to the allegations of the plantiff, he was engaged in his occupation as driver of a meat wagon. About 8 o'clock in the evening he carried into the Ideal restaurant, on Superior street, a leg of mutton which had been ordered. Nichols was standing near the desk when the meat was delivered, and whether owing to defective eye-sight or ignorance of the real quality of the meat, he declared it was a leg of venison.

"You're mistaken," was young Peers' reply.

"Well, I guess I know my business," retorted Nichols; "I know venison meat when I see it. I guess I'll run you in for violation of the state game laws." The butcher boy did not take kindly to the threatened deprivation of his liberty and the aid of a policeman was invoked. He was finally taken to the central station and locked up.

After seeing his prisoner safely behind the bars, Deputy Game Warden Nichols returned to the restaurant and took possession of the piece of meat, about the "shank" of which clustered several large mats of wool. He took the meat and repaired to a butcher shop near by with his prize. He asked the man in charge to be allowed to place the meat in the ice box until Monday and was given permission, a receipt being given him for "one leg of mutton."

"That ain't mutton" said the game warden knowingly, "it's venison."

Notwithstanding the butcher declared it mutton and refused to give a receipt for venison. The warden sought out another shop but he was given a reception that led him to reflect. After consultation with several of the leading butchers in this city Mr. Nichols finally came to the conclusion that he had made a mistake and hurried to the jail and ordered the release of the boy. The latter had been imprisoned three hours and hence the suit.—*Duluth Tribune, July 14.*

### Here's a Programme.

A CORRESPONDENT writes: "I intend to shoot woodcock, ruffed grouse, etc., in the East during the autumn months; then spend the winter South, among turkeys and quail; then another summer in the northern Rockies and upper Pacific coast."

# Sea and River Fishing.

## POTOMAC NOTES.

FOR fine white perch fishing seek the estuaries of Chesapeake Bay. The fish run exceptionally large in the brackish water, and are as plentiful as mosquitoes on the Jersey coast. Then, too, the grounds are easily reached by railroad or steamboat, guides and boats are readily secured, and proper baits occur in the water at hand and along the sandy beaches. Messrs. O. C. Hine, George Scharf and Jake Scharf have just returned from a week's outing on the Chesapeake, about ten miles from Bengies, Md. The route from Washington is via Baltimore to Middle River Station on the P. W. & B. From this point they proceeded to their camping place, ten miles away, where they pitched their tent and had a very enjoyable time. Two of the party hooked 68 perch, none of which were less than 8in. long, in one hour and a half. The fish were taken on a spreader, two at a time, and being provided with rod, line and reel the sport was thoroughly interesting. The baits used were sand fleas, which proved superior to crabs and other baits. The fleas were caught at night by means of lights, around which they would gather in large numbers, when they were easily scooped up with the hands.

Although out of season, the boys took on the 20th of July seven fine rockfish, averaging about 2lbs. each. Yellow perch were very plentiful, but returned to the water as fast as they were taken; like your humble servant, the party had no use for that unjustly celebrated fish. Plenty of catfish are found in these waters also. Parties living at this point say that the prospect for rock and pike (pickerel) fishing next fall is all that could be desired. Bengies has furnished good duck shooting in the past, and President Harrison has made frequent trips there during his administration. There is ten miles of beach, which furnishes good sport in the fall, although the gunning has been poor for the past two years; whether the President has had anything to do with this or not is hard to say, but from the fact that the county is a Democratic stronghold, there is likely something in what this sentence is intended to suggest. These grounds are resorted to by hundreds of lovers of fishing from Baltimore.

The other day I approached one of our well-known anglers with the question as to how he had fared bass fishing on the Potomac during the present week. He replied that it was entirely too hot to fish, and so have many others. There has been a wonderful cleaning up of Secretarial and Senatorial outfits of fishing tackle during the past few weeks, and now throughout the mountain regions of the country, along every wooded stream is to be heard the term "Mr. Secretary," or "Senator," "what luck?" Secretary Noble has departed, and with him a very complete sportsman's outfit. Ex-Attorney General Garland is another enthusiast with the rod and gun, especially the latter, and has gone to his Arkansas home well supplied with guns and ammunition.

FOREST AND STREAM'S "Chained to business? Can't go a fishing?" is fully appreciated here by a lot of poor, sweltering cusses. Ye happy mortals, who can get away, go and let us hear from you and your enjoyments through this great, full medium.

BON.

### Shrewd.

Mrs. Barry—Our guide is a very shrewd fellow.

Mrs. Strange—Yes?

Mrs. Barry—He always makes out his bill on birch bark and it is so charmingly quaint that one can't help paying him.—*New York Herald.*

## DAYS WITH CANADIAN TROUT.

I HAD long been anticipating a trout fishing expedition to the Canadian lakes and rivers north of Quebec, when on the fifteenth of June last I received a note from my good friend and fellow sportsman, Mr. A. L , of Quebec, saying that he had learned from parties just in from the woods that the trout were taking the fly well and were of large size, and that I had better join him at once. I immediately made my plans to leave New York on the following Saturday, overhaul my fly-book, rods and tackle, and on Saturday evening took the night train for Montreal.

Monday was clear and beautiful, and as I had never seen the quaint old city of Quebec, L. insisted that I must remain there that day, at least, which was spent in driving about the most unique city on the Western Continent, completing our preparations for our trip and in conferring with N. Taché, the Commissioner of Crown Lands for the Province of Quebec, regarding the large number of lease-hold properties acquired by Americans during the past few years in the Province of Quebec for shooting and fishing purposes. N. Taché, who has held his present position for many years and whom I found a most courteous and cultivated gentleman, informed me that it was the policy of the Canadian Government to encourage the formation of sportsmen's clubs in northeastern Canada, that the Government were convinced these clubs protected the game, and brought a desirable class of people into the territory, many of whom became investors, and that while no long leases could be granted, those that are now in force would always be renewed or payment made for all improvements that the clubs had made during their term of occupancy. A delightful lunch at the Garrison Club was also one of the features of the day.

Monday morning dawned cold and gloomy with a strong northeast wind and every sign of rain, but we started off gaily at 8 A. M. on the day train on the Quebec & Lake St. John Railway. We had with us two tents, an abundance, as we thought, of provisions, including an assortment of selected fresh meat and a small retriever spaniel. Our objective point was a little spot known as "The Bakery," on the railroad, about a hundred miles north of Quebec, and the four hours' ride to this point was one of the most beautiful railway rides I have ever taken. We passed the village of Indian Lorette, where a hundred descendants of the Huron tribe live, and it was interesting to see the numerous moose and caribou skins, which these Indians tan, hung out in rows on poles around each little house. At the French-Canadian village of St. Raymond, forty-five miles from Quebec, we took on the train one of our guides—Martel. From this point the railroad runs almost due north along the bank of the Batiscan River, one of the wildest and most picturesque of mountain streams imaginable, and although the long-threatening rain had now begun to descend in torrents, we enjoyed the scenery, wild beyond expression, to the fullest extent. Suddenly the train stopped. I could see nothing but woods around and an abandoned log hut on one side of the track.

"Here we are at the Bakery," said L., and we alighted, our traps were put off, and with calls of farewell from passengers and train crew the train moved off and left us in the wilderness. An old French Canadian and a young boy now came up and greeted us. These were Jean Marasse, known through the country side as one of the best bush cooks and an expert guide, and little Abelard, the fourteen-year-old son of Martel, who had joined us at St. Raymond. The rain had now ceased for awhile, and shouldering our traps we plunged into the woods, and after a short walk of a quarter of a mile reached the bank of the Batiscan River, where we found two birch-bark canoes and where we had intended starting at once in these canoes for the great lakes Des Passes and Batiscan, about ten miles to the eastward, and which are the largest in L.'s preserve, although it contains altogether about 100 lakes. But, "Man proposes, etc.," the rain again began, and on overhauling our traps we found, as we supposed, that the fresh meat had gone on in the train to Lake St John, sixty or seventy miles away. There was nothing to do but pitch the tent, send Martel on a long and weary tramp of fourteen miles up the railroad to the nearest telegraph station, at Lake Edward, where he could wire to Lake St. John and have the meat brought back on the train when it returned that night.

While old Marasse pitched the tent and kindled the fire, L. and I covered our faces and hands with a good glaze of tar and pennyroyal, for the rain made the flies troublesome, and taking my light rod I put on a cast especially prepared for L. by our good friend Wakeman Holberton, a yellow fly whose name I do not know, a Parmachenee-belle and a silver doctor, and despite the rain I stood on the bank of the river which just below our camp flowed quietly by after a long rapid, and made a cast. My flies had no sooner touched the water than I had a fine strike, and brought in two half-pound trout, one on the silver doctor and one on the yellow fly. I fished the remainder of the afternoon right in the same spot, and rarely if ever failed to bring in one trout and more often two at each cast. Toward the sunset hour, although it was still raining heavily, I had Jean Marasse paddle me in a canoe to the foot of the rapids above mentioned, where, although I was wet to the skin in the almost tropical rain, I forgot it all in the excitement of the sport, as I killed at least ten or twelve large trout. Returning to camp I found L. awaiting me with a steaming cup of tea, some good salt pork and some of the trout I had caught in the afternoon.

The night was a dreary one; as it rained constantly we were glad when the morning dawned, although it only brought gray skies and Martel, who had returned to say that the meat was not on the train. After breakfast I fished a rapid lower down the Batiscan with good success, but as the rain still continued, and as we knew it would take half a day to reach the Big Lakes, and I had to be back to New York on Saturday, we struck camp at 3, and returning to the railroad boarded a freight train which took us, traps, canoes and all, three miles further north to the little station known as Skroder's Mill, where we found a neat little frame house, clean as wax, and a thrifty little housekeeper, the wife of Section Master Colombe, who gave us good cheer and good beds. Thursday, the last day of my stay, dawned clear and beautiful, and at 4.30 A. M. I started with Martel and Abelard to portage over the mountain opposite Skroder's to the almost unknown Lac des Cotaux. A short paddle across the river to the opposite bank from Skroder's, a carry of half a mile up the mountain on one side and half a mile down on the other, brought us to the lake—one of the most beautiful sheets of water I ever saw. It was about five miles long by an average of half a mile in breadth, surrounded by hills, thickly covered with hemlock and studded with little islands, and best evidence of its remoteness, these islands were covered with the nests of wild ducks and sea gulls, who flew shrilly calling around our heads, fearful lest we should disturb their setting mates. We paddled the whole length of the lake and back, but the morning was too hot, and the trout would not rise to my casts, nor would they take trolling a small piece of pork cut in shape of a minnow. Two lovely twin islands at the head of the lake I named Abelard and Heloise, for my young companion.

Carrying over the portages again to Skroder's we found that L. had left two hours earlier for the waters of Lac de la Croix, where he expected us to join him. After a short rest we started, and after two short portages and a long, delightful paddle up the Batiscan River, through the Lac du Rivière into the Lac de la Croix, we reached its upper end and found L. awaiting us. The day was superb, Great masses of white, fleecy clouds rolled over the intensely blue sky and moderated the excessive heat of the sun. The lakes seemed like emeralds set in still darker emerald frames, and there was no sound save the mocking laugh of the loon. As the sun was too hot for fishing on the lakes, we camped for an hour or more on a grassy point, while Marasse cooked us a delightful lunch. This over, an hour's paddling brought us to the beautiful rapids where the Lake of the Three Caribou and the Lac du Biscuit discharged into Lac de la Croix. Here I left the canoe, and putting on a small piece of pork in the place of the silver-doctor, but retaining the Parmachenee and yellow-fly, I cast in the roughest part of the rapids. A three-quarter-pounder rewarded my first cast, and for an hour I had superb sport. L., seated in his canoe on the opposite side of the rapids, looked on approvingly, every now and then reeling in a large fish himself while Martel and Abelard handled the landing-net for me, and old Marasse and his companion, for a new guide, Pierre Jean, had joined us, looked on with suppressed excitement. The lengthening shadows at last told us we must start for home, but we found we had over 30 magnificent fish, and this compensated us for the disappointments of the preceding days.

The paddle home of fifteen miles was simply delightful. Long reaches of river and crystal lakes succeeded each other. We shot the rapids that we had portaged over in going up and reached Skroder's at nine o'clock P. M., wearied in body but joyful in spirit. At midnight we took the train for Quebec, reaching there early Friday morning, Saturday morning saw me in Montreal and Saturday night in New York, making a week filled with delightful incidents and one which will ever dwell in my memory from the sport it afforded me and the delightful hospitality that I received.

My experience and my trip showed me conclusively these lakes and streams between Quebec and the head waters of the Saguenay at Lake St. John are the Adirondacks of the future. The soil of the country does not permit of successful cultivation, and all the section for hundreds of miles is now taken up by clubs, who are obliged, under their leases, to properly protect their holdings from poachers. The tract belonging to L., which I fished and which is called the Grande Batiscan, is for instance, twenty-five miles long by thirty wide, and is a virgin wilderness. As can be seen from my experience, its waters team with large brook trout (*Salmo fontinalis*) only, while in its pathless woods the moose and caribou roam in good numbers. I can see no reason why the ouaniniche or landlocked salmon of Lake St. John, only sixty miles north, cannot be propagated in the rapid waters of this and the other tracts surrounding it, and Mr. Greenough, of Boston, who has made a study of the matter, tells me that they can. To the west of the Batiscan lies the St. Maurice Club, at Lake Edward on its northwestern boundary is the Paradise Fin and Feather Club, while the Metabetchuan Club bounds it on the east. This whole region, through the new Quebec and Lake St. John railway can now be reached within from twenty-four to twenty-six hours from New York city, and I advise any of my fellow readers of FOREST AND STREAM who are fond of and want to be sure of good trout fishing and deer shooting, to get into one of these clubs of the Province of Quebec as soon as possible. As I have before said, the territory is the Adirondacks of the future, and I may add, in my opinion, of the near future.

JAMES B. TOWNSEND.

"STEADY!"

### A Lobster of Record.

A LOBSTER said to weigh 48lbs. was exhibited at Campobello, New Brunswick, July 21.

Shad have been very abundant in Bass River, Nova Scotia; 2,800 were caught on a single tide.

## SALMON FEEDING IN FRESH WATER.

*Editor Forest and Stream:*

In your issue of July 7 is a very interesting article from Judge S. H. Greene, of Portland, Oregon, on the question of salmon feeding in fresh water. In this article a very complimentary reference is made to my studies on the salmon of the Northwest, together with a challenge for the proof of certain statements connected with my publication.

First, the statement which has been several times made, originally, I believe, by Livingston Stone and afterwards by myself, that while the salmon of the Columbia River will more or less readily take the fly or a baited hook, they have never been known to feed while in the river. The basis of this generalization lies in the fact that neither Mr. Stone, nor Dr. Bean, nor Dr. Gilbert, nor myself, nor any one else whose observations have been placed on record, have ever found any food of any kind in the stomach of an adult running salmon. This absence of food and ultimately the absence of any room for food in the stomach has been taken as negative evidence to show that the salmon does not feed. The fact that the running salmon become in time excessively lean, besides their sexual distortion and the fact of the gradual consumption of the oil which fills their flesh when they leave the sea, may be taken as collateral evidence in this matter. In taking the fly or baited hook it is apparently uncertain whether these running salmon take it as food or whether they simply snap at an object which happens to be in their neighborhood with no intention of actually devouring or swallowing it.

All these data on which our opinion is based seem to be accepted by Judge Greene. The question is, Are these data sufficient? And in this matter, as in all others, I trust, I am open to conviction. If any food can be found in the stomach of any salmon which has run any considerable time in the river, I shall certainly believe that the salmon feeds in the river. At present the balance of probability seems to be on the side that it does not feed. It may, however, be true that this early run of salmon feeds upon insect larvæ and other soft, nutritious, substances which leave little or no trace in the stomach, and I quite agree with Judge Greene that much is yet to be learned of the habits of the salmon in fresh water.

As to the second point, of the adult salmon which ascend the rivers in the spring and are therefore able to go some six or eight hundred miles before the spawning season overtakes them, it is certain that a very large and unknown percentage die before they reach the ocean. Of the young salmon which spawn before the age of four years is reached and of the salmon which enter the rivers late in the fall and can therefore go no great distance before the spawning season arrives, an unknown and doubtless large percentage survive. Considering the distortion, leanness, weakness and disease of those salmon which have started early in the spring and gone to great distances in the river, I think that the percentage of those which reach the ocean must be extremely small; perhaps none of them return. Of those whose run is a short one and who have gone but a little way, there is no doubt that there are many survivors. In regard to both these kinds of salmon we have absolutely no way of ascertaining the exact percentage. The great majority, I think, of the salmon running in the river are about four years old, and the average weight of these is or should be about 22lbs. I have no doubt that the occasional 50lb. salmon are fishes which have spawned more than once; but what percentage of the 22lb. salmon have had a previous experience in the river it is impossible to say.

Among all our fishes there is none the life history of which is so difficult to trace as that of the salmon. I have felt gratified that so much of the work which I have done on this subject has stood the test of time, and I have felt still more gratified at the general agreement of the conclusions which I have reached with those of Stone, Bean, Gilbert and others who have been at work on the same problems. But all conclusions of this kind are open to revision with more evidence. Biology is always an inexact science because it is never possible for one man or one generation to get together all the data necessary for an absolute settlement of any great question. DAVID STARR JORDAN.

PALO ALTO, Cal., July 20.

## "DOC" REPLIES TO "OLD MAN."

MAY the woman dubbed as "Doc" in your last issue venture into the columns of your paper, columns that are decidedly masculine: but then, having once worn trousers, and "Sunday ones" at that, I make the venture.

"Old Man," blessings on him, can never tell of the keen enjoyment of this vacation of mine. I, who never caught a trout or bass before in my life, surely appreciate this wild Pike county home. Here are worn the "old duds" and an immense straw hat, the only trimming being a shoestring to tie under one's chin when the wind blows. Here come the roses to one's cheeks in the shape of sunburn and here also come the freckles, which I give a flower-like name to, too. "Bachelor buttons" I call my freckles, for any man in beholding them would remain a bachelor all his days were I the only choice.

That trouting expedition will ever be as a poem in my memory. How I wished I was an artist with a box of water-colors, for oils would seem too gross for those tender shades. How soft those tones of green, with here and there patches of gold in them from "old Sol;" how tangled the ferns and vines running over some fallen tree of that wilderness!

I enjoyed that tramp, and the cool, rushing water was soothing to my feet, clad in hot rubber boots, and then—my first trout. Surely no trout ever before had such pretty specks on him, none ever so supple, and when his neck was broken I was downright sorry; but was soon busy with a fresh, fat, pink worm.

After such days are long past and we are back in the busy city once more, we can sit and muse or tell prodigious yarns about our sport. We are more charitable toward our fellow men, for we have been in communion with nature and she teaches us gentleness, patience and steadfastness of purpose.

I pore over the advertisements of FOREST AND STREAM with a very knowing air which I think would amuse my friends. I discuss light-weight rods, fishing tackle and boats in a manner that has the "courage of its convictions." My life will know content when I own a hunting coat such as I see advertised. "Old Man" carried worms, frogs, snelled hooks, leaders and book of flies, lunch, pipe, tobacco, reels and even small snakes in those blessed pockets, while I, with envy in my soul, trudged along, a handkerchief thrust in my belt and one poor useless pocket, the whereabouts known only to my modiste.

"Old Man" is modest and tells not of the frog he manufactured of pork, the legs of which dangled in the water in a most comical manner, causing us many a hearty laugh and many a loss when we attempted to strike. It was "Old Man" who taught me how to cast and how to coax the bass from "the shadows of great rocks" and to have patience with the fastidious pickerel and give him time when he chews with dainty nibbles your choicest perch bait. "Doc" blesses "Old Man" and forgives him that libel, that gum gossip.

"DOC" (M. K.).

## ANGLING NOTES.

### Photograph of Dr. Bethune.

WHEN Rev. Dr. A. J. Upson, vice-chancellor of the University of the State of New York, told me a few days ago that he had something to show me that I would be pleased to see, it was not long before I called upon him to find what the something was. I found it to be a photograph from life of Rev. G. W. Bethune, the editor of the American edition of "Walton's Compleat Angler." This photograph had but recently come into Dr. Upson's possession, having been presented to him by one to whom Dr. Bethune gave it, and it was taken under the following circumstances: The officers of the Piseco Trout Club were Mr. Henry Vail, President; Dr. Bethune, Vice-President; Mr. Alfred Brooks, Secretary. On one occasion Dr. Francis Vinton, of New York, entered Dr. Bethune's study, and noting the surroundings of books, fishing rods, creels and other angling paraphernalia, asked for a photograph of him for the club, as he saw him there. Consent was finally granted upon condition that after a few prints were made for members of the club and a few intimates the negative should be destroyed. The photograph represents him sitting in his study with morning gown and cap, spectacles on nose, pen in hand, and a ponderous volume on the desk before him. Leaning against the desk is a long-stemmed pipe—his "orthodox pipe," and on the wall are rods and fishing creel. A friend said: "We owe many a fervid page, and many a burst of eloquence to that same creel and rod, for they kept his heart young and his body manageable." I shall not attempt to give a description of Dr. Bethune's personal appearance from this photograph. I imagined him to have been tall and spare, but Dr. Upson, who knew him long and well, tells me that he was, as the photograph bears witness, rather short and quite stout. Dr. Upson relates that once Dr. Bethune was detained at the home of a fisherman all night by a storm: "Who are you?" said the man. "You have been with me in my boat all day fishing, skillfully, not swearing once, and now you have sung like an angel and prayed like a saint. Who are you?" One who was brought into the closest relation with Dr. Bethune by their common love of angling and forest life is a contributor to the columns of angling and shooting journals of to-day, but his identity is concealed under a pen name. He prepared a sketch of Dr. Bethune as an angler, but the copy was lost in a newspaper office before it was printed, and it is not probable that the sketch will be rewritten.

### False Cuff for Waterproof Coat.

A friend, Mr. Wm. W. Ladd, Jr., told me of a false cuff for a waterproof coat, and I asked him to describe it, which he does in a letter as follows: "The false or inner cuff about which I wrote you came to my notice in an English-made waterproof coat which I obtained last year. It is very simple in construction, and I have tested it last season and again this, and found it to answer its purpose admirably. Picture to yourself a cuff made of the same material as the coat placed inside the sleeve so that the lower edge is about one-half inch up from the end of the sleeve. The edge of the cuff nearest the elbow is attached to the inside of the sleeve so as to exclude water in the same way that the sleeve is joined to the body of the coat. The lower edge of the cuff is turned in over an elastic band which keeps it close to the wrist and prevents the water running along the arm. The cuff does not show below the sleeve, and is a neat, and as I have said, an efficient protection from that nuisance in wading or boat fishing—wet arms. I have never seen anything of the kind on waterproofs made in this country, but I am sure that it could be copied to the comfort of anglers and sportsmen in general." Wet arms and wet knees are to be avoided by anglers if possible, for as a rule these parts of the body add more to one's discomfort than any other when they get wet. I fought against wet knees unsuccessfully until I got a waterproof coat in Scotland with skirts that came to my heels, and with room enough to permit one to sit down. With false cuffs added to a long skirt, boat-fishing in the rain may be a pleasure, provided the fish bite, and in stream-fishing the skirts might be turned up and buttoned to the body of the coat.

### Open Season for Black Bass.

Just eight years ago, in a column letter in FOREST AND STREAM, I said: "For several years the impression has been gaining ground, from personal experience, that the close season for black bass in the State of New York is altogether wrong, and at no distant day will result in depleting our waters of this game fish, unless there is a change made in existing laws. From the examination of local waters, interviews with professional fishermen, and correspondence with anglers in different parts of the State, the impression has resolved itself into a fact as to the present, and the fulfilling of the prophecy must follow as a consequence."

In commenting on this letter editorially you were good enough to say that the subject was one upon which I was competent to speak, and added, among other things: "In the State of New York, the date at which all law-abiding bass should have finished spawning and protecting their young has been fixed at June 1, but we regret to say that the majority of bass are so depraved and have so little regard for law as to delay their family arrangements for a month later, and the question is, Shall the fish be compelled to change their habits to comply with the wisdom of our legislators or shall we acknowledge that they know best when they want to spawn and accommodate ourselves to them? * * * The main opposition to such a change would come from summer resorts and country hotels which look for black bass fishers in June. With them it is a question of dollars, in which we and unselfish anglers like Mr. Cheney are not at all interested. The law needs changing."

The law was changed and made to open May 30, Decoration Day, which is a holiday. The sole reason given for this change was to afford anglers the opportunity to avail themselves of the holiday to catch black bass in Greenwood Lake. Then those who were actually interested in keeping up the supply of bass, and who realized that June fishing promised to destroy them, procured special legislation to protect black bass in a dozen different waters until July 1 or later. The new law of '92 wiped out the special laws, and again the destruction goes on legally, for the season opens everywhere, except in Lake George, on May 30. I know that it is an old story, but I shall harp upon it as long as the abominable law remains on the books. In a recent letter from that prince of writers, the author of "Sam Lovel's Camps," occurs this reference to the black bass law:

"So far I have wet a hook but once this year, when the boy and I went to the Slang for bullpouts, and didn't get 'em. We fished opposite Sam's and Antoine's camping-place, very much changed since they and I first knew it, when it was surrounded by the primeval forest. What laws we have, and how they are enforced! What an absurdity to extend the close time for pike-perch months beyond their spawning time, and open the black bass season in the very height of their spawning. Such idiotic enactments disgust law-abiding people with protective legislation, and makes them lukewarm concerning the disregard of it by the lawless. I hope for more intelligent legislation." I think I have nothing to add to those sentiments. A. N. CHENEY.

## SALMON OF THE GRAND CASCAPEDIA.

The following letters explain themselves. The action of Mr. Davis is most commendable; and every one interested in salmon fishing will hope that no impediment may stand in the way of his completing the proposed arrangement.

NARRAGANSETT PIER, R. I., July 22 —*To the Hon. C. H. Tupper, Minister of Marine and Fisheries, Ottawa, Can.:* DEAR SIR—The net-fishermen at the mouth of the Grand Cascapedia River, five in number, have agreed to take up their nets for five years if I pay a certain sum to each, and if the Government will not revoke their licenses at the end of said term, providing the law remains the same as it is now, allowing them to fish by paying so much to the Government. They seem to think by taking up the nets they will forfeit their rights, which I sincerely hope is to the contrary. I am very anxious to preserve the salmon in the river, and by taking up the nets for five years it will be the means of restocking it.

Will you kindly tell me at once if the Government will grant their licenses as usual? so that I may assure them that by leasing to me they will not be deprived of their rights at the end of the five years, if net fishing is then allowed. They of course will pay for their licenses each year, but will not put their nets out.

We are hoping to have a boundary placed at the head of the river to protect the salmon on their spawning ground and where fly-fishing will not be allowed.

I trust that you will please give this your immediate attention, so I may notify the men and make arrangements for the coming year. Respectfully yours,

E. W. DAVIS.

NARRAGANSETT PIER, R. I., July 22,—*To the Hon. Edmund J. Flynn:* DEAR SIR—For the past two years I have been trying to get the net fishermen, at the mouth of the Grand Cascapedia River, to take up their nets and have at last made terms with them for five years, providing the government will not revoke their licenses at the end of said term, if licenses are then issued as now. They will take out their licenses yearly and I am to pay them not to fish. It will help the river greatly, but to preserve the salmon a boundary should be made at some point on the river and no fly-fishing allowed above that point.

I have looked into the matter thoroughly and consulted with the oldest fishermen on the river—I refer to the natives—men who have speared and know the habits of the fish; they all tell me that no fishing should be allowed above Indian Falls, this giving a stretch of water thirty miles above the township line for fly-fishing. Some of the men think the boundary should be at the forks; if the boundary is made there parties can fish Lazy Bogan, which it is absolutely necessary to protect. Lazy Bogan is a stretch of pools where the salmon collect before starting up the forks, and any number of fish could be killed there, formerly, late in the season. It is their spawning ground as well as the forks and should by all means be protected.

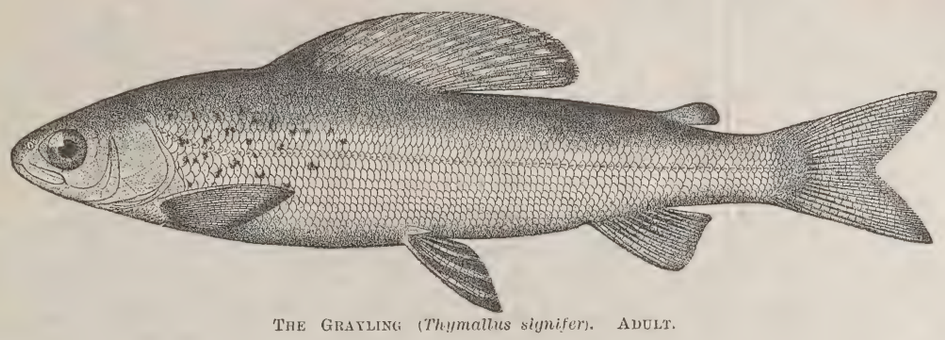
If I am allowed by the government to pay the net fishermen not to fish for five years and you will help us in protecting the salmon at the head waters, it will take but a short time to get the salmon back by protecting the river as I have advised. The government, should it decide to lease some of the fishing, would receive a good round sum for the privilege.

A petition will be sent you and I sincerely hope you will give it your consideration, as by so doing you will be helping us to protect the gamest fish in the world, in their most beautiful river, the Grand Cascapedia, and at the same time you will have the good wishes of all true sportsmen throughout the Dominion, as well as yours respectfully, E. W. DAVIS.

### Tobogganing for Fish.

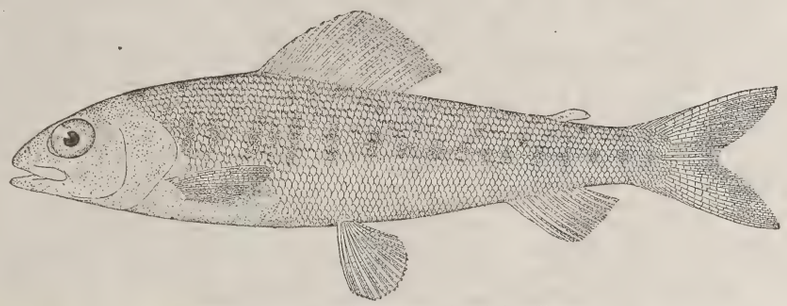
ERIE, Pa., July 24.—As I believe that catching fish with a toboggan is not a very general practice, I send you this account. A young gentleman using the marine toboggan slide at Massassauga Point (the summer resort at the head of our bay) experienced the queer sensation of some large slippery body gliding between his legs Saturday last. Suddenly remembering the reports which were circulated a few years ago, to the effect that some men when closing an exhibition at the Point had freed several good-sized alligators in the bay, the frightened young man scrambled to the shore and called the bystanders to the scene. The animal proved to be a huge sturgeon, which had probably wandered in from the lake to catch some spawn. Men set upon the fish with clubs, a gun not doing the work, and soon had him landed. The prize measured 4ft. 9in. and brought the scales down to 42lbs. MALLARD.

## WHITEFISH AND GRAYLING.



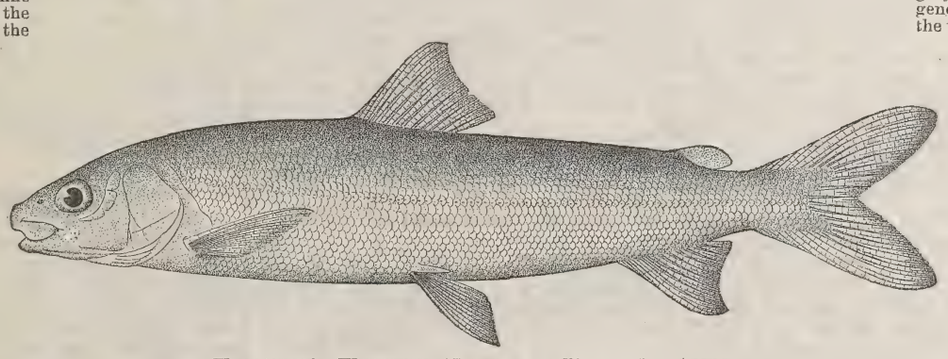
THE illustration of Williamson's whitefish will be welcomed by many anglers who have found it difficult to recognize at sight the differences between the grayling and the whitefish of the Rocky Mountain region. The whitefish has no teeth, but the grayling has well developed teeth in the jaws. The large back fin of the whitefish has about twelve rays; that of the grayling has about twenty; the color of the adult whitefish is bluish above, silvery below; the grayling has many small black spots on the front of the body and the back fin is gorgeous with rose-colored lines and green spots.

Williamson's whitefish inhabits clear streams and lakes from the Rocky Mountains to the Pacific; it is common also in tributaries of the Saskatchewan. The figures accompanying these notes were copied from Commissioner McDonald's report on the establishment of fishcultural stations in the Rocky Mountain region and Gulf States. The presence of parr marks in the young whitefish was made known by Prof. Evermann and is of the highest interest.



Judge L. B. France, who has given a graphic account of fishing for the whitefish in "Mr. Dide; His Vacation in Colorado," stated in FOREST AND STREAM, July 30, 1891, that he has seen fish of this kind weighing 3lbs. Our illustration is one-half the length of an adult specimen. The whitefish, according to Judge France, has an odor similar to that of the grayling. He says it "is an excellent food fish, rises readily to the fly and makes a good fight, although it keeps below the surface as long as possible when hooked." It spawns in the fall.

"Livingston," in FOREST AND STREAM, Aug. 6, 1891, describes the whitefish as lying sluggish with heads up stream, agreeing with the observation of "Big Horn." He found an abundance of whitefish in the Gallatin, one of the forks of the Missouri, in Montana. "H. L.," in our columns Aug. 13, 1891, mentions "a fine place for taking whitefish in the Madison, at the upper end of the Upper Madison Cañon." With grasshoppers for bait his party caught about a bushel in about an hour's time. They found horseflies a killing bait also, taking a fish as soon as the fly struck the water.



The food of the whitefish consists of small crustaceans and insects. As a table fish it is considered equal to trout and grayling. As a fighter "H. L." found it as strong as the trout, if not stronger, and inclined to hang to the bottom of the stream.

WILLIAMSON'S WHITEFISH (*Coregonus williamsoni*). YOUNG.

### The Graylings.

About six nominal kinds of grayling have been recorded from the temperate and Arctic parts of the northern hemisphere. Perhaps these really represent only three well-defined species, and of these we are concerned only with the common form of the British Islands and Continental Europe, the grayling of Michigan, and the wing-finned or Back's grayling of far northwest America.

*Thymallus*, the generic name of the graylings, was given because of a fancied resemblance of the odor of the fish to that of the water-thyme; although some authors trace a still stronger resemblance to that of the whirl-a-gig (*Gyrinus natator*). Grayling, probably a corruption of gray lin or line, relates to the horizontal lines along the body. The Esquimau name for the northern species, *Hewlookpowak*, denotes wing-like fin.

The European grayling inhabits the fresh waters of central and northern Europe, in England it lives in streams and does not enter the sea, but in Scandinavia it occurs in lakes; it is found also in the North Sea, Cattegat and Baltic. Our American species are known from Michigan, the headwaters of the Missouri, and from the region northward to the Arctic Circle in British America and Alaska. Richardson found it abundant in rocky streams of the primitive country north of the 62d parallel of latitude, between Mackenzie's River and the Welcome. According to "Kelpie" it frequents the Hersey, Pine, Manistee, Pigeon, Sturgeon, Au Sable, Maple, Black and other streams of Michigan. In Montana it is common in the Gallatin, and occurs also in the Jefferson and Madison. Prof. Evermann took it in Red Rock River, Beaverhead River, and in the Gibbon at its junction with the Firehole, also in the stream formed by Horsethief Springs.

Writing of the English fish, Dr. Day states: "It prefers clear streams, in which there are a succession of sluggish pools and shallows, with sandy, gravelly, or loamy beds, rocky or stony bottoms being unsuitable. The larger ones seem to resort more to the deeper and quiet spots, the moderately-sized and small ones to the shallows, taking their post behind a rock or a bunch of weeds. Although clear streams are preferred, still a moderate or cold temperature of the water seems to be of more consequence, but too much cold or too much heat are asserted to be equally fatal to it."

The Michigan grayling frequents spring-fed rivers with sandy bottoms of about 52°. In Montana and Alaska it abounds in rapid, rocky rivers and in lakes. In the Gallatin the temperature often rises to 60°. In northern America, according to Richardson, "it is found only in clear waters, and seems to delight in the most rapid parts of the mountain streams. In the autumn of 1820 we obtained many by angling in a rapid of Winter River, opposite to Fort Enterprise."

The graylings eat insects and their larvæ, small mollusks, also water fleas. The larva of the caddis fly is a favorite food of the English grayling, and it takes along with the larva pieces of stick and stone attached to it. Beetles and spiders are also eagerly sought for, while in the West grasshoppers and crickets form part of the food.

The spawning season and spawning habits of the American and European species are so nearly alike that I quote from Dr. Day the following account of the English species:

"It generally spawns on the shallows in April or May, or even earlier, while at a little distance the eggs somewhat resemble frog-spawn. Fish under half a pound weight do not appear, as a rule, to spawn, rendering it probable that they do not commence to do so until their third season, or possibly the fourth. The ova are smaller than those of the trout [*Salmo fario*], and transparent, while the interior may be white, opalescent, cornelian color, or even deep orange. The eggs are deposited on the gravel near the tails of shallows, and in shallow nests or redds, like the salmon, trout, or char, but not to so great a depth. Neither do these fish attempt to pass up to the heads of streams for breeding purposes, but select shallow localities near where they usually reside, and where females may be seen waited on by two or even three males. The ova are more delicate than those of the trout or char, and it has been remarked in Herefordshire that should a severe frost occur during their spawning season, the succeeding year's supply of young fish appears to be deleteriously affected. The body of the embryo is visible in the egg on the ninth day, and usually hatches from about the twelfth to the twenty-fifth day; few days elapse between the appearance of the eyes of the embryo and the eggs hatching. The young, when hatched must be kept in very pure water, for that which is sufficiently good for a trout alevin is not always suitable for grayling. At the hatching time the egg shells should be at once removed, as they are found to be very deleterious. About the end of July or commencement of August the fry are about 4 or 5in. long. In aquaria it has been observed that young salmon or trout will readily eat young grayling."

The graylings are capricious in their movements, but are bolder than trout, and on account of their tender mouths it is difficult to land them. The habit of boring with head up stream when hooked in order to get to the bottom has been observed by all who have fished for them. The rise is often unexpected, and when the natural fly is being taken freely, the artificial fly will often be refused. The fish will often rise repeatedly at the same fly unless touched by the hook. Richardson, in his early account of fly-fishing for grayling, said: "This grayling generally springs entirely out of the water when first struck with the hook, and tugs strongly at the line, requiring as much dexterity to land it safely as would secure a trout of six times the size." Pennell wrote: "Grayling seldom take the minnow, either natural or artificial, or the worm." "Kelpie" tells that he has seen it caught with worms and even with pork. In American streams the fish rises well to the black, brown, gray and red hackles. "Kelpie" found brown or gray gnats taking in early summer. Among the favorite grayling flies are the Abbey, Montreal, professor, royal-coachman, Lord-Baltimore, grizzly-king, green and yellow grasshoppers, and yellow-sally. There is no coyness about the fish, for it rushes at the bait and returns until hooked.

The characteristic black spots on the sides vary greatly in number. Prof. Evermann found twenty-five on one side and eighteen on the other side of the same fish. He has called attention also to the presence in young examples about 3in. long, of numerous steel-blue blotches along the sides resembling the parr marks of young trout, salmon and whitefish. These are clearly shown in the figure of the young accompanying this description.

The writer has continued to write of the American graylings as representing two well-marked kinds. With this, however, Dr. Jordan disagrees and he considers the Alaskan form identical with that of Michigan. My reasons for using distinguishing names have been previously stated in FOREST AND STREAM, and I have nothing new to add now. The Alaskan fish appears to have a much higher dorsal fin, a wider space between the eyes, a shorter lower jaw and fewer gill-rakers. By comparing our first figure with that of the Arctic grayling in Goode's "American Fishes," page 485, the reader will observe some of these points of difference. One of the greatest difficulties in the way of studying these fishes is the lack of large series of specimens of the Alaskan grayling; perhaps intergradation may be shown when sufficient material is at hand. With the present specimens, however, the characters noted should receive due consideration. T. H. B.

SEND us a postal card news note of fishing, where to fish, or fishing incident.

## LAKE BUELL.

How blithely might the bugle horn
Chide, on the lake, the lingering morn!
How sweet, at eve, the lover's lute
Chime, when the groves are still and mute:
And, when the midnight moon should lave
Her forehead in the silver wave,
How solemn on the ear would come
The holy matin's distant hum.
* * * * * * *
And bugle, lute and bell, and all
Should each bewildered stranger call
To friendly feast and lighted hall.
—*Scott's "Lady of the Lake."*

NESTLED among the wooded heights of Berkshire, Mass., like a beautiful diamond in a green casket lies the lovely sheet of water called Lake Buell, three miles long and one-half mile in width.

Our good old uncle had welcomed us in his heartiest manner to Fern Cottage, on the western shore of the lake, and though great sport had been promised, and though we had skittered with minnows, fished with worms, grasshoppers and crickets, thrown flies of every hue and varied combination, trolled with rubber frogs and fishes, yet, so far, but a few small black bass and perch had rewarded us for our efforts. Something must be done on this the 22d day of July, as we must return to our business the day following, and when the day dawned so gloriously, with a light breeze raising a catspaw on the surface of the waters, a trolling programme was at once laid out and agreed upon. Our enterprising and lively little Cousin Carrie had unearthed from some nook a perforated live-bait pail left by some fisherman, and from its depths extracted a troll line and spoon apparently in good order, and the rubber frog and fish were laid aside at once and declared "no good" forthwith.

What a morning it was—at first a mere glimmer of the sun was faintly discernible through a thick mist that covered the eastern shore and blended with the waters of the lake shutting out the wooded heights beyond. As the mist dissolved, the rays glared with fierce intensity and the waters glowed as a fiery furnace of molten metal. Troll lines and spoons were looked to and tested, boats slipped their moorings, anchors were hoisted, and amid the rattling of chains, oars and oarlocks, "good lucks" and farewells of our aunt, cousin and lady friends, we were off for a mile away, where black bass of large dimensions waited to be caught by lucky fishermen; Chapin rowed my boat, what a fisherman he was and how he wanted to hold the troll line himself, I knew only too well, but he is one of those magnanimous men who wants the other fellow to have a good time too, and so, though seventy-one years old, he insisted on doing the rowing while I handled the line and spoon. Out by the borders of the eel grass and pickerel weed we went, and he knew the course to take full well and he kept it too, with deep green waters on the one hand, clean and free from obstructions; and the lily pads and eel grass (under which lay bass and pickerel) on the other. Up and down we trolled, once, twice, three times, not a rise. Was I at fault? could a more experienced fisherman handle the troll in a more alluring and fascinating manner? I thought there might be something in it and taking my seat in the bow we allowed the boy to row awhile, and Chapin took his place in the stern with the troll. I had risen too early, the sun was pouring its beams with unstinted severity upon my head and I lay on the bow seat with my feet crossed lazily on the boat side, the motion was delightful and closing my eyes I listened with calm content to the ripple of the waters about the keel as it pushed its way through. I fancy that I lost myself for a moment: the waters sang me a lullaby and soothed me with their siren voices. I heard Chapin say in a far away tone "I've got him," but in the moment it took me to collect my scattered senses the best of the sight was over. I saw the troll line deftly brought in hand over hand, a wake of foam out for 50ft., and the stalwart form of the troller erect and vibrating with fiery excitement, but the magnificent jumps of the hooked fish I had lost; on it came, and with a deft toss was landed in safety, and a 2lb. bass splashed the water in the boat with the vim and velocity of a lawn sprinkler. With all our wooing no more would rise that forenoon, and as the wind died away about 10 o'clock, still-fishing was resorted to and a few good sized perch rewarded our efforts.

At noon our fair-haired cousin blew the dinner horn, its brazen notes roused the echoes of the sleeping hills and back it came, once, twice and thrice; we paused to listen and again the notes came from the fair musician's horn, and soft and softer came the echo back and forth across the lake. A row home to a good dinner and then we were ready for another troll. A strong breeze had now sprung up and light caps sat upon the waves which promised us sport, and seemed daring us to test their strength in another row, so not to be dared out we went again, Chapin at the oars, the undersigned at the troll. Up once and down part way—ah, a strike!—and a tingle through my hand and arm, every drop of blood flows madly through every vein. Way out in the waste of waters—at least 400ft.—a dark form shoots wildly in the air. "Keep him taut," you've got him," shouts my companion, and I wonder if it is possible that that fish way out there is mine, and pull madly on the line, the bass disputing and contesting every inch of the way. On he comes, fighting as I pull in, and now he darts this side and the other, and my best endeavor is not to let him get the advantage he is striving for. Suddenly I feel a slackening of the line, a sickening feeling comes over me; a complete let down. Have I lost him? No, he has made a rush for the boat, and when within 50ft. out he goes again 4ft. into the air, his sides gleaming like dusky, burnished bronze in the bright sunlight. Where am I? For a time I certainly lose sight of myself and all sublunary things except that fish. I call loudly for Chapin to help me at the finale. We have no landing net and I feel unequal to the emergency, but the end is near at hand. On comes the fish in a wake of foam, and we brace ourselves for the grand effort, and now he is close to the boat and I see his coppery, tawny sides gleaming in the green waters. I know he will do something entirely unexpected at the last moment; will he rush under the boat or jump? It's a jump, I feel the slackening; before my blurred vision springs a graceful form in a shower of watery diamonds, and just in the nick of time Chapin grabs the line and with a dexterous twist and flirt lands the fish safely in the boat.

"Over two pounds," says my friend. "Yes, and he pulled like a four-pounder. I am well paid now for all the waiting. Now my blood is up." "More and better ones where he comes from," says C., and we try it again. A few times more we run up and down without success, except for two good perch, and then we change to the west side of the lake. A sudden rush and strike and I have another fast. Hand over hand I haul him in; no breaks along the line, not a ripple on the surface except such as the line makes as it curves through the waters. "Seaweed," says C. "Eel grass," say I, and pull in with a mighty strain, as one would tug a refractory cow to the butcher. "Mighty heavy eel grass" I think, but not a quiver on the line, only a steady strain, but when within ten feet of the boat I see a glimmer too large for that of the spoon, and down to the bottom of the lake sullenly plunges a large pickerel, and now all is excitement; we didn't expect this, and up he comes to the surface. Now the fight begins in earnest; the water is foaming as though on a boil; I can hardly discern the fish though a glimmer as of a rapidly-revolving wheel of green dazes and bewilders me; I give him a flirt as he helps himself to a rise. Up he comes almost in the boat. I hold him in air a moment; a four-pounder at least. Down he comes. I do not give him line enough, his full weight bears on the slim hook, it breaks and the parting waters close over my prey. I gaze wildly in the direction he has gone.

But we must catch fish while we can, and up we go again, and the spoon is soon playing merrily in the lake waters. Ah! another strike and I have him hooked. Out of the water he goes high in air, "another bass and a bigger than the first." What a monster! He pulls until the line gets fairly hot in my hands and I am getting tired of pulling him in. You can trace him by the jumps and rushes he makes, and he keeps the water churning. Chapin is ready to help me, and I pull steadily and keep a tight line on the bass. Suddenly on he comes with a rush and the line is slackening rapidly. "Look out or he will rush the other way, or sulk suddenly and tear out." "Yes, I know it, but what can I do better than I am doing?" And now he comes straight toward the boat and rushes madly along until within fifteen feet, and then he turns and rushes fiercely for the center of the lake. Over my head goes the line, and I play it out until he stops and I feel it slacken; then I pull him in again. What rushes and thrills and throbs and pulsations! Up he comes. I lift him. We see him plainly, his broad back fin flared and pointed. Chapin cries, "He'll weigh 4 to 5lbs. sure." Again a broken hook, and the fish drops so closely to the boat as to graze its side. Lost, lost! Softly upon the breeze floats the melancholy plaint of two despairing and saddened mortals.

With chastened countenance and hope born of misfortune we prepare for battle again and mend our troll with new hooks, but "the day is far spent and night's coming on," and though we try our luck again nothing rewards our toil; and talking and sighing over the fish we have lost we row dejectedly to the cottage just as the sun is sinking over the blue hill in clouds of amber and red gold. Up through the narrows the waters reflect with vividness the high lights of a glorious departing day.

A church bell slowly tolls at Hartsville, its notes mellowed by distance chime in with the scene and fall on our ears as a benediction, soothing and quieting our ruffled spirits. Insensibly I close my eyes and the images of the "Angelus" shape themselves to my inward vision. I am worshipping at the shrine of which this sweet-toned bell is a reminder, and I trust I am better for the inspection.

A hot fish supper with tea, and a sing on the broad piazza in the gathering twilight close the day's sport.

A rumble of thunder with vivid flashes of lightning announce a coming storm and we sing until the rain pelts sharply on the piazza roof. Up from the cottage a quarter of a mile below comes a round of applause as a compliment to our singing, and with a good-night song to the appreciative cottagers we retire to sleep the sleep of the just and happy, and Lake Buell out in the storm receives the raindrops on its breast and reflects the vivid lightning from its darkened sullen surface, and the hills around echo and re-echo the booming thunder.

ALBERT LEWIS.

## NEW ENGLAND ANGLERS.

THE summer catches of trout that have followed the remarkably high water of the month of June and early in July are a surprise to all the fishermen who have been so fortunate as to have had the opportunity to try for them. Mr. Charles E. Sanborn, of the noted tea and coffee firm of Chase, Sanborn & Co., has been passing a few weeks at the celebrated stock farm and country residence of Mr. James Sanborn, of the same firm, near Poland Springs, Me. Mr. Henry Savage, the Boston agent of the New York coffee firm of Hard & Rand, has been with the Sanborns for a short vacation. Mr. Charles F. Nason, well known as a riflemaker at Lewiston, Me., for a number of years, but now foreman for Chas. Sanborn & Co., also took his vacation at the same time. It has long been understood in the vicinity of Lewiston that if anybody could get fish and game it was Charlie Nason. The above-mentioned gentlemen made several trouting trips to the streams with fair success, but it remained for Mr. Chas. Sanborn and Mr. Chas. Nason to cap the climax and surprise the country boys. They made an excursion to a stream that flows into Cobbosseecontee Lake. Here they expected some big trout. They had heard that some of the Lewiston market fishermen had been getting some remarkably fine trout somewhere. Indeed some of their catches had been displayed in the shop windows of that city. The stream was very high. The banks were also ornamented with a beaten path, made by the numbers of fishermen who had been there before them. They came to one of the best pools, as Mr. Nason well knew. They did not try the trout till after sundown. Then they carefully threw in well-baited hooks. They had previously tried flies without success. Almost the instant the bait struck the water there was a great swirl and a 2¼lb. trout was brought to the net. Still the fun continued, till they had taken 15 trout. Mr. Nason himself was much surprised. Eight of the string weighed 30lbs. Two of the truly splendid specimens of perfect *Salmo fontinalis* have been the town's talk ever since, though the sportsmen have not yet explained to the Poland Springs visitors where the string was obtained. One of these two weighed 4lbs. 8oz., and the other 4lbs. 10oz. There were a number of trout that were over 2lbs., and no small ones in the string. The big ones were brought to Boston. Mr. Nason says that he has thought over the catch a good deal. He has come to the conclusion that the high water had started the trout upstream and th t they had congregated in the pool. He also thinks that the low water of the fall, winter and spring previous had prevented their migration till the June rains had started them.

THE FOREST AND STREAM was entirely correct about the whereabouts of Gov. Russell, of Massachusetts, in its account last week. The fact is the Governor tried to elude the reporters and the usual bores of his office and escape to a haven of actual rest for a few days. He could scarcely have selected a better place than the camps of Joseph Jefferson, the actor, on the Miramichi, in New Brunswick. When he left home it was understood by his private secretary that his location should be kept a profound secret till his return. He followed Mr. Jefferson, his son Willie Jefferson and Dr. Swan, of Cambridge. He was too wily to depart with them; that would have been giving away the whole story. They have had a glorious time: even Mrs. Russell admitted this when called upon by the ubiquitous newspaper reporter, but as to his present address she really did not positively know. The party made an excursion to a celebrated trout lake in the woods, a tributary, through its outlet, to the Miramichi. They went several miles through the woods, by compass, instead of going the regulay way suggested by the guides, and were lost in the woods, in fact, being nearly the whole of one day in getting straightened out and getting to the fishing ground at the inlet of the lake. There were four in the party to make the excursion; Gov. Russell, Dr. Swan, Willie Jefferson and Mr. Walker. They had six or eight guides to do the lugging, construct rafts to fish from and make the camps. The first fishing was done toward nightfall, and they had wonderful sport, till a thunder shower drove them under their partly-constructed lean-to. The shower was soon over, when again the sport was excellent, lasting till after dark. The Governor hooked and landed doubles, and Dr. Swan landed a 2-pounder. The trout would rise close to the rafts and all about the fishermen. The guides were kept busy unhooking the trout and handling the landing nets. The Governor's raft, with Willie Jefferson, had a score of 42, while the other raft made a score of 62. All the small trout were thrown back as soon as unhooked. One of the party thinks that they must have put back at least 150 trout.

The party remained in camp that night, under the lean-to and before the camp-fires. The next morning they were up very early and expected to renew the sport of the evening previous. But alas, for the fickle nature of the trout! Not a single trout would rise, however hard they might try. By 10 o'clock they gave up in disgust, and having all the trout they could possibly take care of they concluded to break camp and go back to the salmon river. The way back was taken by a detour through the woods by the old route, and then by canoes down the river to camp. No trail by compass was attempted. They had had enough of such traveling. But the Governor, as he usually does, took the lead, even in threading the almost impassable swamps of the compass trail of the day before. The Governor is to be back in Boston again this week, and at his position in the State House. From the salmon camp the party have made other excursions, some of them lasting two or three days. They have seen the tracks of caribou and deer, and numerous signs of bears. Who wouldn't be a governor and make such outings! Who wouldn't be a Joseph Jefferson, get rich through playing RipVan Winkle, and then own a salmon right on the Miramichi? SPECIAL.

## CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., July 23.—This is the sort of weather that wears whiskers and talks in a deep bass tone of voice. The fish are out in the woods hunting shade. The frogs wear sponges on their heads and carry fans. It is an easy guess that the tepid waters afford but little sport, that the trout are hunting the little creeks, and the bass the deep sleeping holes. Worst of all, there now comes on the drying up of the many overflow ponds left by the unusually high waters of the spring, and the funeral baked meats of the little fishes in the mud.

It has been, for this section of the country, an exceptionally good year for the breeding of fish, barring the above inevitable attendant upon high water. The rivers literally swarm with fry of all sorts. Along the Fox River I noticed this especially. Another thing was noticeable as a result of the high water, and that was the distance fish will go out into shallow water, away from the main body, while in search of food. While hunting for frogs along the Fox River meadows I twice stepped on bass which were away out in the grass, where no one would have thought of finding them, and where the water was not ankle deep on my boots. Yet they gave a great flop and always headed right for deep water, though they could not swim direct to it, but had to follow the wetter places of the meadow. It was never clear to my mind whether these bass were after frogs or were out picking strawberries. The ground was not right for spawning beds.

Lake Winnebago, where the highly enjoyable and pleasant meeting was held of the Western Canoe Association, is nearly 10ft. above its usual level. The bay west of the canoe camp is ordinarily nearly cut off by a sand bar, but no trace of this bar was visible last week. The lake is also of an unusually brown stain this year, by reason of the heavy outpour of the northern Fox and its lumbering tributaries.

Neenah, on the north end of Winnebago, is a lovely place, and in the house kept by Roberts and his son I found one of the few summer resort places of which I could conscientiously approve from the standpoint of an angler and loafer alike. The grounds here slope right down to the mouth, or rather, the source of the Neenah River. The stream is so bold and wide that you can hardly think of it as running out of, not into, the lake, which rolls just beyond the two promontories a rifle shot from the docks. A boat left without anchor, however, would soon discover the error, for the current sets down very strong.

THE "MOONEYE" OF NEENAH.

It is in the Neenah River, and indeed generally right near this head of the river, or along a space less than

quarter of a mile in extent, that the now famous "mooneyes"or "mooneyed shad," or so-called "fresh-water shad," are taken. There has been much discussion over this fish in the columns of FOREST AND STREAM, which has been the only paper to locate and name the fish. It had never been my fortune to see one of these fish, and being now upon the lake I was glad to find opportunity to accept Mr. J. P. Roberts's repeated invitations to come up and catch one. I did catch one, and just one; for although the run has been very large and has lasted very late, it is now long past time for the disappearance of these fish, and when they leave the river no one knows where they go. Their biting time rarely runs over thirty days, and usually depends upon the supply of a large ephemera, locally known as the "Green Bay fly." It is like the "sand fly," which sometimas deluges Chicago, though I think larger. The gray drake artificial fly is in its imitation, though a No. 3 bass fly would not be larger than the actual insect. Early in the season the fly deposits eggs on rushes or other water plants. These hatch and the larvæ fall into the water, and in the first stage of their life become water insects. Shortly the shell-like chrysalis is abandoned and left floating upon the water to make the ignorant wonder why so many young crawfish have shed their thin and tender skins. The delicate fly now takes to the shrubs and trees. All day long you will not see it unless the weather be very cool and cloudy. At evening, not at sundown even, perhaps, but half an hour or an hour later, and most just as the darkness thickens, you will see the fly come out. Then, if you be fortunate, you will in this restricted bit of water be indebted to it for a few moments at least of rare and keenly interesting sport.

In company with the best guide upon the lake, Chet Halsey (I wonder why the best guide and boatman on any water is always named Chet? I know a dozen of them), I went out from the hotel dock at about half-past 7 in the evening, and made for the bank opposite, near the inlet of the river.

"I don't expect we'll get a fish," said Chet; "they're working out pretty fast now. Few days ago you could see them rising, hundreds at a time, all over here. Look! There's a rise now."

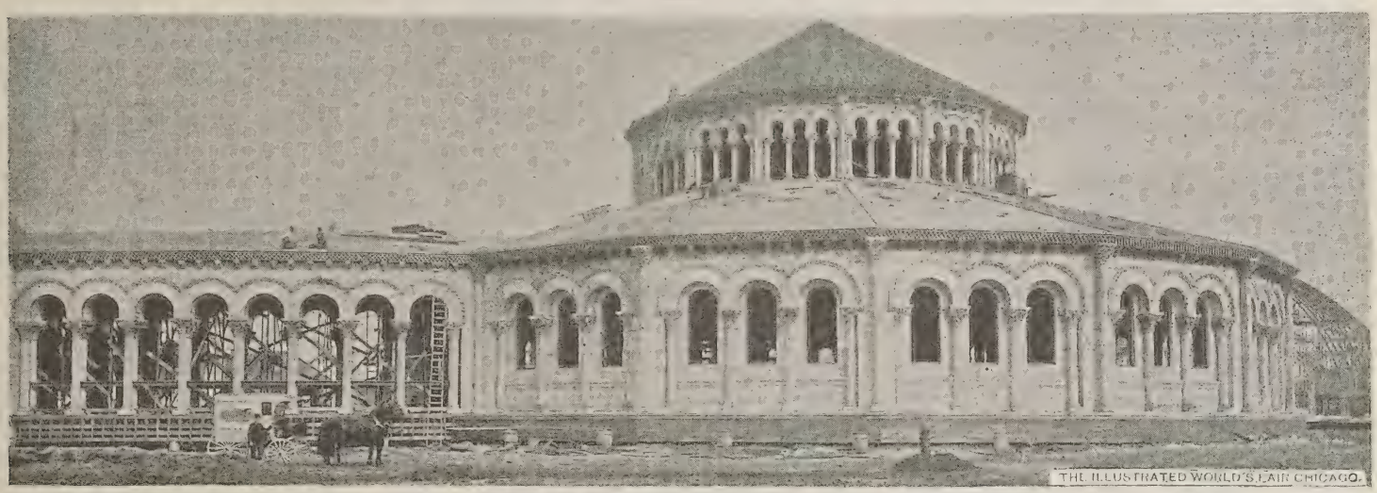
A faint circle of the water showed where the fish had broken.

"There goes a fly now," said Chet, "watch it. There's another. Here they come. We're going to have a few flies after all. Look out now. Get ready. See 'em—there they rise!"

The dusky air now began to fill with the flight of large, gray-winged flies, and as these fell upon the water, splash, splash! the "shad" began to take them, all around the boat, and everywhere, sometimes with a faint ripple, sometimes with a big boiling splash. No man ever saw a scene like that on a trout stream.

I thought I was going to catch about a hundred fish in four minutes, for they were taking the fly within ten feet of the boat, but I soon found that they knew the difference between my No. 8 gray-drakes and the big natural insects, though I cast scores of times directly over the swirls made by feeding fish. At length I felt a sharp tug in the dark, and had a fish hung, all by accident. A prettier little fight I never had. The mooneye played fair, and did not take to the weeds. He ran long and sharp, and kept on running, and three times he came out high and shook himself like a little tarpon. I don't see that a trout of the same weight has much the advantage of a mooneye. This fish was not large, weighing only about a pound and a half. In shape and color it was quite like a shad. The great round eye was the distinguishing mark of it. The mouth was smallish, but not at all a sucker mouth. The roof of the mouth was very hard and covered with sharp teeth, which proclaimed it a minnow feeder beyond doubt. Some of the heaviest catches of these fish have been made on small minnows.

They speak of the mooneye being a very "tender-mouthed" fish, and needing very careful playing. I think this is only half true. The lower jaw is softer, but I believe most of the mooneyes are lost because they are so hard-mouthed. It must be hard to set a hook into that bony roof of the mouth.



Out of 500 rises I saw, and seemingly twice that many casts, I only hooked one other mooneye, which escaped at once. The following night I did not get even one. I had a heavy strike, and after a long fight discovered that we had on two fish, a wall-eyed pike and a mooneye. In landing them the mooneye broke away, as Chet took the top fish, the wall-eye, into the net first, and the eader parted below the net at once. On that night the fishing lasted only about ten minutes. It was over in half an hour the night before. No one in the past week has caught over two on any evening. I have mentioned Mr. Earle's catch of eight a couple of weeks ago. A few years ago a boat could catch 40 or more in an evening. There were thousands of the fish. The dredging in the Neenah River seems to have disturbed the mooneyes, for they are not half so abundant as formerly. At no other point about the lake, neither in the Northern Fox River, nor in Lake Butte des Morts, or in Little Butte des Morts, nor in any of the other connecting waters, are these singular fish to be found. At least that is what I heard on my too brief trip.

WINNEBAGO BASS.

In early July the black bass were in schools and chasing minnows in shore. Chet told me that two weeks ago he saw one school of bass along the beach, which he thought was over a mile long. Heavy catches can be made on such occasions. We had very dull hot weather, and no really lively bass fishing, but we caught 21 black bass in our boat in the part of a day we fished. And on what sort of bait does one suppose? Worms. Plain worms and nothing else. Nothing else would do. Minnows, frog, fly, crawfish—none of these would my lord *Dolomieu* have. Just now the best of all bass baits on Winnebago, even for big bass, is the plain, red, wriggling worm, and plenty of him. This was the first time I ever still-fished with a casting outfit and got bass out from under the boat. We caught 4 good big bass, 2½lbs. each, on worm, but also caught a great many so small that I was ashamed to keep them. Thinking to give them a show for their white alley, I rigged up my fly-rod for worm, but the bass quit biting after I had lost half a dozen strikes by waiting too long. When you are fishing black bass with worms, it seems, you must strike as soon as you feel a touch at the hook. Chet says they take in the whole bunch of worms at the first motion, and will spit it out if you are not careful. When I was a boy and fished for minnows this way we used to "let them run with it," but this will not do on bass. So much for another chunk of experience.

Our friend the big-mouth bass seems in disrepute on Winnebago. Even Chet did not know where to find them. "I don't hunt after any sort of fish but the regular black bass," said he. This hunting after the bass in a big water like this, where they have full swing for all their capricious habits, is a course of study where it takes time to reach a degree. I took pleasure in listening to Chet, who is one of the men we don't hear talk about their skill and knowledge, but who do actually know something of what they talk about in black bass habits.

"No man can learn 'em," concluded he, "and it makes me tired to hear of anybody knowing all their habits so as to tell what they are going to do. You can't tell when they are going to bite, or what they are going to bite, or why they are going to bite. They are liable to take just the bait you don't expect, in just the sort of weather when you weren't expecting it. You can't figure 'em out, and all you can do is to learn their runways and keep on a trying. I've studied 'em for years and I vow they're too deep for me." E. HOUGH.

THE FISHERIES BUILDING OF THE WORLD'S FAIR.

By courtesy of the "Illustrated World's Fair."

### New Tarpon Grounds.

*Editor Forest and Stream:*

It is generally conceded that good tarpon fishing is to be had at only three or four localities in the United States and those on the Mexican Gulf coast. Of these probably the best are Punta Gorda and Fort Myers, Fla. But I saw last winter many tarpon at Tampico, Mexico; so plentiful were they that at times one could see several breaking the surface of the river at once. But the reader says Tampico is out of the world. Not at all. It is a pleasant ocean voyage from New York via Havana, and doubly so in winter. Tampico in winter is quite warm. The only drawback is the hotel accommodations, but better are promised soon. Tampico can also be reached by rail from Laredo, Texas, to Monterey, and by Monterey & Mexican Gulf Railroad to Tampico. Aside from the chief attraction, game of all kinds is abundant and the country and people odd, strange and picturesque. J. B. BURRIS.

CLOVERDALE, Ind., July 27.

### The Big Fish.

First Fish—Say, I came mighty near getting caught by an angler this morning.

Second Ditto—Well, you're in luck. I'll bet you've got the reputation of being the biggest fish in the sea now.—*N. Y. Herald*

## Forest and Stream's Fishing Postals.

*"DROP US A LINE" ON A POSTAL CARD.*

*Fishing News, Place to Catch Fish, Fish Caught, Fishing Incidents.*

CAPE VINCENT, Thousand Islands, N. Y., Aug. 1.—The following veritable record of a half day's sport by some of the guests of the Algonquin Hotel may interest the readers of FOREST AND STREAM:

| | | | | |
|---|---|---|---|---|
| G. W. Weeks | 97 | bass, | 71 | lbs. weight. |
| O. T. Mackey | 98 | " | 87 | " " |
| Clarence Fahnestock | 101 | " | 68 | " " |
| W. P. Esterbrook | 92 | " | 73 | " " |
| John Baldwin | 48 | " | 34 | " " |

The above gentlemen are all New Yorkers, who frequent the upper St. Lawrence River, and who know where the best bass fishing in America is to be found. Now that the illegal netting is well nigh under control, this is the most attractive spot in all the United States for those who love to "fight it out on that line" with the gamy bass or the fierce muskallonge. CARLETON.

◆

GLEN EYRE, Pike county, Pa , July 29.—The black bass fishing in the lakes and ponds of Pike county is the best for years, and the lover of this sport cannot complain of poor results. Not since 1888, then the best year for some time, have the average catches in numbers or size been equal to this season. This applies to all waters of Pike county. The waters near Milford are easy of access, and Jones Lake near Hawley offers ample sport. Trout fishing closing this month has been poor of late owing to severe drouth. Y.

◆

BOSTON, July 30.—I have just returned from an eighteen-day trip from Belgrade Mills, Me., after black bass. The largest bass caught while I was there weighed 3¼lbs., taken in Long Pond. They state that the fishing is not as good as last summer. H.

◆

FRANKENMUTH, Mich., July 26.—Perch and bass fishing is fine in Saginaw Bay at present. Some fine fish are caught here. K.

### Just What Was to be Expected.

DR. S. T. DAVIS, of Lancaster, Pa , who has been advertising his anti-friction tip in the FOREST AND STREAM and elsewhere, writes us: "I have had calls for the tip from all parts of the United States, and cheering words from nine-tenths of my customers. **I have received one-third more orders through the FOREST AND STREAM than from all the other sources combined.**" That was to be expected. There is no other medium in the land that goes to so many anglers as does the FOREST AND STREAM; none other of such value to anglers; none other so carefully read; none other that can pay so well the advertiser of anglers' goods.

### Three Harvest Excursions.

HALF RATES VIA THE ILLINOIS CENTRAL. AUG. 30TH, SEPT. 27TH AND OCT. 25TH, 1892.

THE Central Route will sell excursion tickets to the agricultural regions of the West, Southwest and South, at one fare for the round trip, from stations on its lines north of Cairo, on Aug. 30 and Sept. 27. A third excursion will be run to the South and Southwest on Oct. 25. Your local ticket agent will give you full particulars in regard to these Harvest Excursions. Arrangements can also be made in this connection to visit the desirable railroad lands for sale by the Illinois Central in Southern Illinois, on obtaining special permission to do so by addressing the Company's Land Commissioner at Chicago, Mr. E. P. Skene. In addition, a few weeks before the first Excursion date, your local ticket agent will be able to furnish you with a special folder, issued by the Illinois Central, which will give you particulars of these Harvest Excursions in such forms as will enable you to plan your journey at home. Should you not be within call of a railroad ticket office, address A. H. HANSON, G. P. A., Illinois Central R. R., Chicago, Ill.—*Adv.*

COPY FOR ADVERTISEMENTS MUST REACH THIS OFFICE NOT LATER THAN TUESDAY MORNING, AND SHOULD BE RECEIVED AS MUCH EARLIER AS PRACTICABLE.

# Fishculture.

## IMPREGNATING EGGS OF THE RAINBOW TROUT

[A paper read before the American Fisheries Society.]

THE object of this paper is to bring to the notice of this Society and through it to the notice of fishculturists in general a subject which has not received that degree of attention its importance would warrant; the wish is to arouse interest sufficient to lead to a correct, and if possible a practical, solution of the difficulty of impregnating the eggs of the rainbow trout.

On page 819 of the Report of the U. S. Commission of Fish and Fisheries for 1882, under the report of Mr. Frank N. Clark, is the earliest record of a peculiar incident occurring in the work of impregnating the eggs of the rainbow trout. This peculiarity cannot be better described than by quoting Mr. Clark's report:

"Our facilities being first-class and having been uniformly successful in the propagation of trout, not excepting the preliminary experiments with rainbow trout for four seasons, I had confidently expected to embryonize from one to two hundred thousand eggs from the stock of *irideus* hatched and grown at this station; but we succeeded in getting only 45,000 eggs (many of the females failing to mature their spawn) and in fertilizing but 15 per cent. of these, resulting in a hatch of 6,400 fish. The parent fish of both sexes were and still are perfectly normal, so far as conduct and appearances would indicate. The trouble, however, seems to have been entirely with the females, as the quantity and quality of the male principle was all that could be desired. Whatever the cause of the difficulty, the effect was at once apparent in the abnormal character of the fluid surrounding the eggs. From most of the females the eggs would fall into the receiving pan like shot, accompanied by one-half to one fluid ounce of watery substance, sufficient of which had been absorbed to prevent fertilization. If there was any doubt that absorption of water by a large percentage of the eggs had taken place before leaving the fish, it was dispelled by the fact that they were quite full and hard when taken and refused afterward to take up any more water. Moreover, the eggs from six females were found to be enveloped in the natural viscous fluid, and these were successfully fecundated."

The record above set forth refers to the spring work of 1883 at the Northville Station of the U. S. Fish Commission. Succeeding reports from this station, including the season of 1888, give varying degrees of success, ranging from 15 per cent. to 69 per cent., and averaging but 39 per cent. of impregnation during a period of six years.

When we consider the large experience and high degree of success attained by Mr. Clark as a fishculturist, we cannot help but be struck most forcibly by the seeming failure of this branch of work at Northville. But the report quoted by Mr. Clark shows us where to search for the cause. It is to be found in those hard, distended eggs which fall into the receiving pan like shot, and are frequently accompanied by an abnormal fluid. If this trouble were confined to the Northville Station solely, it might not be considered of sufficient importance to bring to the attention of this Society; but it is more widespread and destructive in its perniciousness than is generally known or supposed.

There is, in fact, just reason to believe that during the past twelve years there has been a loss of fully ten million rainbow trout eggs to the fishculturists of the United States. Had it been possible to impregnate these ten million eggs they would have had, all things considered, a value of $18,000 to $20,000.

While the trouble has proven insurmountable in Michigan, it has been serious in New York, alarming in Arkansas, and felt in no small measure in Virginia and Missouri. In Wisconsin the hard, distended eggs are not strangers (though Mr. Nevin is able to hatch 80 per cent.). And following it westward it shows its hydra head in Colorado and even in California.

In his original report of this trouble Mr. Clark says: "Without attempting to account for the failure I am inclined to think that the fish were overfed and that the inflow into their pond gave them a current quite too slow and feeble, resulting, for the most part, in a great inactivity and in their being in good condition for market at spawning time. I propose to reduce their food allowance to a minimum and place them in a good current of water."

Future reports do not show that these remedies were tried, though it is fair to presume they were. But in the U. S. Fish Commission report for 1885, page 126, this statement from Mr. Clark occurs: "It would seem that the species (*irideus*) will not acclimatize to the waters of this station (Northville, Mich.)."

These views of Mr. Clark are here given to call to your attention two theories which have been advanced and partially tried. Based on data which will follow, I believe the first two theories, "over-feeding" and "insufficient current," to be erroneous.

Messrs. Annin, at Caledonia, N. Y.; Monroe Green, at Mumford, N. Y.; Mather, at Cold Spring Harbor, N. Y.; Dean, at Leadville, Col.; Robinson, at Mammoth Spring, Ark., and Fitzpatrick, at Chabot Lake, Cal., in common with Mr. Clark, at Northville, Mich., have not averaged above fifty per cent. of impregnation with the rainbow-trout eggs.

Mr. Seagle, of Wytheville, Va., concedes 20 per cent. of his average take to be "hard, glassy eggs," and Mr. Nevin, of Madison, Wis., acknowledges "we get a number of hard, glassy eggs." At the Neosho Station during the season just passed 66 per cent. of our rainbow trout eggs failed to fertilize. Summarizing the statements from these different sources, I am forced to the conclusion that of the whole number of rainbow trout eggs artificially spawned from domesticated fish, less than 50 per cent. are impregnated, because of the impotency of the eggs to receive the fertilizing principle, at some places, in some seasons, the percentage will run higher, while as has been shown, on other occasions it will fall much lower. This average of 50 per cent. is based on the work of ten hatcheries in eight States, embracing all the climatological and hydrographical conditions of the United States, except the Far South, and may be modified by the accession of additional information; but I feel pretty sure that upon fuller investigation the statement will be confirmed rather than disproved.

During the season just passed, when studying this matter, it seemed to me unreasonable to suppose that at all of these stations an error had been made as to the proper feeding and watering of the parent stock of trout. Therefore I discarded the theory first advanced by Mr. Clark and began to cast about for some other ground.

During January, 1892, Hon. Marshall McDonald, U. S. Commissioner of Fish and Fisheries, at my earnest request, sent Prof. Chas. Edw. Riley, of Drury College, Springfield, Missouri, to the Neosho Station to make a microscopic examination of the eggs and milt at the time of their extrusion. Prof. Riley made several examinations of the hard, glassy eggs, and also of the accompanying abnormal fluid. By the aid of the highest power lenses, he discovered a tape-worm-like parasite in the hard eggs and also in the accompanying abnormal fluid—no parasites whatever were found in any of the normal eggs, either dead or alive. He concludes his report of this investigation in these words: "From a careful consideration of these facts, I should say that some parasite had infested the trout. It breeds on this peculiar fluid before described, and is absorbed with the fluid before spawning; thus causing the eggs to swell up and sound hard when they strike the pan. I am strengthened in this belief since apparently the same thing was found in the 'peculiar fluid,' in the eggs, and in the water after passing over the eggs; while the water at the supply pipe was practically pure. I cannot name the parasite, or account for its presence."

Later in the season a series of eggs, normal and abnormal, was carefully prepared and forwarded to Prof. Riley, at Springfield, for further examination. Under date of March 24, he wrote: "I have carefully examined these specimens, and in each case simply corroborated what I found at Neosho."

Another series of specimens preserved at the same time were forwarded to Washington, D. C., but unfortunately were so long delayed before reaching Dr. Gurley, of the U. S. Fish Commission, as to be in most cases in an advanced stage of decomposition, and unserviceable for examination.

I stated above that the hard, shotlike eggs and accompanying fluid were the cause of the imperfect impregnation, but if Prof. Riley is correct they are but an effect, and the true cause is yet deeper. A study of these parasites with a view of their possible eradication opens a field which but few if any fishculturists are prepared to tread. If further investigation confirms the impression that these parasites are present and that to their presence is due the loss of one-half of the possible efficiency of our work with the *irideus*, we have a serious and delicate problem, one which probably only the skilled bacteriologist can handle.

Dr. Gurley has happily suggested that a simple though heroic cure may be found in the progressive elimination of those females producing abnormal eggs. The only practical solution may yet be found to lie in this direction. In the meantime it would be of value if any of our spawn-takers could positively state that the female rainbow trout which yield normal eggs in one season do not yield the abnormal hard eggs in subsequent seasons. The converse of this proposition would be of equal value.

It has been suggested as a possible solution of this difficulty that it arises from inflammation of the ovaries, established by improper and rough handling at the time of artificial spawning. From my own experience I can state that though this suggestion may be true in some isolated cases, it is scarcely applicable to the case in general.

At the Neosho Station during the season of 1891-92 we spawned 1,000 twenty months old *irideus*. Many of the females when handled for the very first time readily gave down these hard, shot-like eggs without the least pressure, showing conclusively, to my mind at least, that inflammation of the ovaries, if existing, had not been occasioned by improper handling. I might here state that it is poor workmanship to use any pressure on the abdomen of a trout in taking eggs. If the fish be ripe, and she be held in proper position, she will, by her own exertion, extrude her eggs. It is true that a gentle assistance will sometimes be necessary to enable her to pass the eggs from the anterior portion of the ovary to the vent; but the exercise of enough pressure to set up inflammation would be inexcusable. Such an amount of pressure may be and is employed on fish caught and destined for immediate marketing, such as shad, whitefish, etc., and again it is unreasonable to suppose that the exercise of pressure at one spawning sufficient to occasion inflammation of the ovaries would not result in the death of the female before the occurrence of another spawning period, or, if not in her death, at least in such a disordered condition as would be indicated by some outward symptom?

After reading the report of Prof. Riley, as above set forth, as to the presence of parasites, I thought that they (the parasites) might have been introduced into the domesticated rainbow trout by the use of beef liver, the almost universal fish food, somewhat in the way that trichinæ are introduced into the human system by the use of raw pork. Working in a preliminary amateur fashion along this line, I addressed a number of letters to prominent fishculturists. Some used raw liver, others a mixture of raw and cooked liver, and others a mixture of raw liver and mush. But the answer which upset my theory came from my old preceptor, Mr. Fred Mather, who had experienced the trouble of hard, glassy eggs from rainbow trout which had never been feed on any beef liver, raw or cooked. Following on the heels of this came a letter from Mr. James Richardson, Superintendent of the California State Hatchery at Sisson. His communication contained a statement of a fact which I had never dreamed. He says: "Yes, I have observed to a small extent the hard, glassy eggs from wild trout caught from the streams of the Pacific slope." This, so far as I am able to ascertain, is the first intimation that the hard eggs are found in these fish in their native home. It is true that Mr. Richardson says that under his observation it occurs to a small extent. Mr. Richardson's statement may be taken as a further argument against the theory of inflammation being established by rough handling. But its true significance is this: The origin of this abnormality of the *irideus* is not attributable to domestication. It exists to-day among these fish in their native State. But it seems that in domesticating them we have aggravated this abnormality. That is to say: we have, in some occult manner, given prominence to environments that increase the propagation of the parasite discovered by Prof. Riley, and which appears to exist, to a limited extent, in the female trout in her native habitat; while, on the other hand, we are omitting something which would tend to suppress its reproduction. This being true, the remedy for the trouble might be found in a condition of food and life approximating those of nature. Such may not be attainable at all points. No method seems so feasible as that employed by Mr. Gremaz, of France, in his ponds for the self-reproduction of natural fish food. It would, of course, be necessary in such an undertaking to stock the ponds with proper natural food from streams on the Pacific slope; for, otherwise, that particular element which tends to maintain a healthy condition of the reproductive organs of the *irideus* might be omitted.

In conclusion, I beg to quote the following significant clause from the Report of Wisconsin for 1882: "In producing and raising from helpless infancy some of the fish tribe, art may surpass nature; but only by a return to the ways of nature at a period when helpfulness succeeds helplessness can the best development come." WM. F. PAGE.

**Chained to Business?**

Can't go fishing? Make the best of it. Read FOREST AND STREAM.

**Low Rate Harvest Excursions.**

THE announcement that the North-Western Line, comprising over 8 000 miles of thoroughly equipped railway, has arranged to run two low rate Harvest Excursions during the months of August and September, will be gladly received by those who are interested in the development of the great West and Northwest, as well as by those who desire to visit this wonderfully productive region at a season of the year when exact demonstration can be made of the merits and advantages it offers to home seekers and those in search of safe and profitable investments. These excursions will leave Chicago on Aug. 30 and Sept. 27, and tickets can be purchased at the very low rate of one fare for the round trip to points in Iowa, Minnesota, North and South Dakota, Nebraska, Wyoming, Colorado, Utah, Idaho and Montana. They will be strictly first-class in every particular, and will be good for return passage at any time within twenty days from date of purchase. Full information concerning rates and arrangements for these excursions can be obtained upon application to any coupon ticket agent, or to W. A. THRALL, G. P. T. A., Chicago & North-Western Railway, Chicago.—*Adv.*

## FIXTURES.

### DOG SHOWS.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A. Stone, Sec'y.

Sept. 19 to 22.—Third Annual Dog Show of the Kingston Kennel Club, at Kingston, Canada. H. C. Bates, Sec'y.

Sept. 20 to 23.—Western Michigan Kennel Club, at Grand Rapids Mich. H. Dale Adams, Galesburg, Mich., Superintendent.

Sept. 27 to 30.—Dog Show at Ottawa, Can. Alfred Geddes, Sec'y.

Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.

### FIELD TRIALS.

Sept. 5.—Manitoba Field Trials, at Morris, Man. A. Holloway, Winnipeg, Man., Sec'y.

Oct. 25.—Third Annual Field Trials of the National Beagle Club, at Nanuet, N. Y. Bench show of the club Oct. 24. H. V. Jamieson, Sec'y.

Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.

Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 8.—New England Field Trials, at Assonet, Mass. E. Knight Sperry, New Haven, Conn., Sec'y.

Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.

Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck, Sec'y.

Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.

Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.

Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

## POINTS AND FLUSHES.

CHICAGO, July 30.—In a letter recently received from an eminent field trial handler and trainer, one whose large experience and accurate knowledge entitles his views to careful consideration, I noted some comments on the subject of ranging which impressed me as being particularly interesting and instructive. He said, in regard to field trials: "I consider that ranging is the weak point, one which is not sufficiently studied. At present there seem to be two classes of rangers, one kind which will not go out far enough, and the other kind which bolts or does not hunt to the gun at all."

I claim that a dog should range very wide, any distance in fact that we want him to. But he should not just skim the ground out, taking the very best looking places and missing lots of ground quite likely enough to hold birds. It is easy enough to accustom high-class dogs to hunt in the latter way; and when they do that, provided that they will point and back, the average judge seems quite satisfied and gives such dogs great credit for bird sense.

"A trouble in this connection is that the judges always hurry on following the leading dog, when perhaps the other dog is working out some hard ground in good shape, knowing that birds are near at hand. Many a time have I been left behind in that way, and my dog found the birds when there was no judge to see him."

The points in the foregoing are well taken, and are of general interest. At every field trial one or more incidents of this kind occur, and every field trial handler has suffered a loss from them many times. In the greater number of instances the error arises from a lack of judgment on the part of the judges, or from not having any system in conducting the running. It is, nevertheless, one of the popular delusions on field trial matters that a man who has shot a great deal over pointers and setters must therefore be a good judge for field trials. As a matter of fact a man may have shot during every season of a long lifetime and not know what qualities constituted a good dog, or what constituted the first principles of a competition. The field shooter's sole test of a dog's performance is whether it affords a shot or not. Many setters and pointers of inferior capabilities afford good sport if they work intelligently. For instance, a dog may have a poor nose, yet, by his intelligence and caution, he may get quite close to the birds and point or flush them, in either case affording a shot. What was considered a success by the shooter might be an error in a field trial. An experienced field shooter, with no field trial experience, is a most helpless and incompetent judge.

Experienced judges even make many errors during a trial, the most common one being that mentioned in the foregoing quotation. One dog gets far ahead of the other, and all three judges become absorbed in watching and following him, thus leaving one dog without a judge to watch his work. There is no excuse or justification for this when three judges are acting. The presiding judge should always detail one judge to remain with one dog if separated from the other. It is unjust to do otherwise, aside from its unskilfulness and bad management.

Experienced judges should be so expert and vigilant that no circumstance could arise but what would be met by them promptly and effectively. But such is not the case. Many errors occur in all the large trials, due to the slowness, awkwardness or indolence of some one of the three judges; for it almost always happens that one judge has one or more of these qualities.

The most common fault is that of riding too far behind the handlers. From fifteen to twenty yards behind them is a good distance for the judges to ride when performing their duties in the open fields. It is a common fault for some one judge to get into a trance and ride dreamily many yards behind the other judges. He trusts to the others seeing any work which he may miss himself. In the thickets he lags behind in much the same manner as in the open, and is an endless nuisance to reporters who are striving conscientiously to get a full report of all the work, for they hesitate to go ahead of him. Nearly every judge feels more or less irritated if a reporter gets ahead of him, however far he may be behind himself. By their disinclination to any active exertion, many judges miss seeing about half the work done in cover, lagging behind just far enough to miss a great deal. One judge out of the three, in most instances, is active and alert, is up with all the work done, and the other judges seem satisfied to have him do so.

Another source of error is when the judges ride closely in a group in the open, chat pleasantly together and become inattentive to the work. Where the ground is irregular the judges when grouped cannot possibly see all the details. They should spread a proper distance apart so that each would secure a different view, and thus have as full knowledge of every detail of work as can possibly be secured.

Another error witnessed at times, one bordering on the ridiculous, is for a judge to ride furiously after a dog which is lost sight of for a few moments. It commonly breaks up the range of both dogs, and is a useless act. The matter could be handled much better in a less demonstrative manner.

The judge who gets left far behind every time a fence, ditch or gully is crossed, is another annoyance. He will ride gingerly to the edge of a ditch, his face expressing his misgivings. He will hold his horse in at the edge, at the same

time urging him forward. The horse soon becomes afraid or irritated, and refuses to cross. In the meantime, dogs, handlers and other judges are far in the lead. The timid judge takes a long detour to avoid the ditch and comes straggling in later on. At every obstruction he repeats his timid act.

One of the first requisites in a judge is that he should see the work. If he is too timid or such a poor horseman that he cannot ride over an ordinary ditch which everybody else rides over, or if he is too indolent to exert himself afoot to see the work in the thickets, or if his clothes and footgear are too pretty and new to go into briers and mud, he is not a good judge, however great his knowledge of field trials may be. He must have energy and intuition to be in the right place at the right time.

Then there is the judge who is ordering the handlers what to do at every turn till both handlers and dogs, by constant balking become confused and disgusted, losing all idea of what they should do. The moment a judge assumes to control the handling of the dogs he begins to injure and delay the running. He will soon get dogs and handlers into pockets and corners, will repeatedly be forced to make new starts, and will end in a broken, irregular and unsatisfactory heat. Aside from instructing the handlers in the beginning of the heat and at such other times during it as are necessary, old judges assume no supervision of a handler excepting when there is some matter necessary under the rules needing attention, such as to bring his dog in to back, etc. Under a judge who leaves the handling to the handlers everything generally goes smoothly and satisfactorily. I have always doubted the right of a judge to dictate to a handler where he should work his dog at every turn, although I never doubted its impropriety. The judge then not only judges the dog, but assumes his handling also. The trainer pays his entry fee to exhibit his dog, or the owner does so, and he should be permitted to handle in his own way, as is his right Of course the judge should point out the course to be followed, but the manner of working the dog is the handler's prerogative.

Ranging is an important matter, and has not been given proper consideration. It requires experience and thought to discriminate between a dog which will go over large tracts of country, working for his own pleasure and one working for the advantage of the gun. Some dogs will work steadily for the gun for a while, then self-hunt a while. Some will range wide and work to the gun, but have no intelligent plans. And there are other variations too numerous to mention.

In fact, field trial judging is susceptible of many improvements in its practice, not in the way of new rules, but in the judg s' attainments. It should not be inferred that there are no judges free from these faults. Some are very expert. The faults are confined to the minority, and it is only necessary I believe to point them out, to secure their correction.

B. Waters.

## NOTES AND NOTIONS.

Some time since The Onlooker pointed out the solidity to which breeding dogs for sale had attained, as shown by the names of some of our leading kennels appearing in such a class business publication as the Seeger & Guernsey Encyclopedia, a work whereby a buyer may learn where any known article can be bought, from "cowboy boots" to "crab apple cider." This was reaffirmed in The Onlooker's mind quite recently by coming across the advertisement of one of our leading kennels in some high-class family journal, one of our monthlies, or *Harper's Weekly* or *Bazar*.

That a seller of dogs finds it remunerative to advertise in such a periodical, and that such careful compilers as the Seeger & Guernsey Company include sellers of dogs in their encyclopedia demonstrates better than dozens of dog shows, the widespread, practical interest our people take in dogs.

In connection with this matter of breeding and selling dogs as a business, a most misleading remark recently appeared in the correspondence of a contemporary, that the man who ran a kennel as he would a business was no fancier. This is absurdly incorrect, both in practice and in the abstract. Mastiffs and pugs, for instance, have been made what they are in this country by two breeders of the former and one of the latter, who always conducted their business *strictly as business*, just as they would have run a grocery store, and this truth applies to breeders of many other breeds. As a philosophical abstraction, it would seem evident that the man who breeds dogs with the view of making money thereby, will accomplish greater success as a fancier than the man who breeds for amusement, the incentive to success being greater. That this rule is not constantly evident is due to the fact that the vast majority of such breeders devote themselves to the popular fancy of the day, devoting themselves at different times to different breeds and thus do not make as shining marks as fanciers, but their general averages will show the great practical work they accomplish. The Yorkshire owes his existence and the wonderful development of his coat to the wives and daughters of English workingmen, who have devoted many fold the care and attention to the dogs that their children received.

Another evidence of how widespread the interest in dogs has become is in the excellence of canine illustrations in our periodicals not specially given up to kennel matters. The August number of *St. Nicholas* has an admirable picture of a mastiff on page 744, and on page 745 a very good one of a dachshund, neither accompanying an article on dogs, apparently merely put in "to look pretty," and neither artist is known in connection with canine portraiture.

The "Onlooker" notes a regrettable dissension in our Beagle Club, and while most distinctively disavowing any partisanship in the dispute, dissents most strongly from the statement put forth in the dispute that there are acts as to the affairs of a club that the club itself may not lawfully do, but must be done by the board of management. This is utterly untenable. A board of managers, executive committee or whatever the working arm of the club may be called, is entirely the creature of the club at large; it is appointed by the club to do the executive work of the club, which by reason of the impracticability of convening the club members frequently, must be done by a smaller, more compact body, but it is utterly unreasonable to say that the creature is greater than the creator, and no inference as to powers being delegated to a board of managers to do what the club as a whole may not do, can be admitted. To support such a contention there must be an absolute, unmistakable statement of this intent, from the club itself, properly passed and recorded. It is important that this be carefully thought over and always borne in mind, as this very mischievous view has arisen in clubs in previous instances.

The Onlooker.

## A STRANGE GAIT.

*Editor Forest and Stream:*

I have often noticed that some dogs that are perfectly well formed, always when they go at a walk or jog trot or canter, move sideways or diagonally. Can you account for it? When they gallop fast they go straight enough. Probably some of our anatomists can explain this. Tar Heel.

Lexington, N. C.

## NORTHWESTERN FIELD TRIAL CLUB'S DERBY

The entries for the Northwestern Field Trial Club's Derby closed July 21 with the following entry, consisting of 22 English setters, 16 pointers and 2 Irish setters. The All-Age Stake entries closed Aug. 1. The trials will be at Morris, Manitoba, Sept. 5.

ENGLISH SETTERS.

Cleopatra (W. B. Wells), bitch (Mungo—Cambriana).
Swab (H. A. Greeley), dog (Manitoba Toss—Pitti Sing).
Bessie June (Frank Richards), bitch (Chance—Bessie Avent).
Queen Noble II. (A. J. Kolflanda), bitch (Romeo—Queen Noble.
Ronair (Avent & Thayer's Kennels), black and white dog (Roderigo—Juno A.), Jan 3.
Lochinvar (Avent & Thayer's Kennels), black, white and tan dog (Chance—Bessie Avent), May 30.
Kingston (Avent & Thayer's Kennels), black, white and tan dog (Chance—Bessie Avent), May 30.
Shadow (Avent & Thayer's Kennels), black, white and tan bitch (Jean Val Jean—Lucy Avent), Jan. 7
Rill (Thos Shelton), (Manitoba Toss—Pitti Sing).
Jem Gladstone (J. M. Sneed) dog (Paul Gladstone—Katonia).
Duff (W. T. Hunter), dog (Manitoba Toss—Pitti Sing).
Fan Chatham (C. W. Smith), bitch (Chatham—Babali).
Winnipeg (Thos. Johnson), dog (Manitoba Toss—Pitti Sing)
Psyche (Thos. Johnson), bitch (Manitoba Toss—Pitti Sing).
Sut (Thos. Johnson), dog (Manitoba Toss—Pitti Sing).
Cash Noble (H. K. Devereux), bitch (Breeze Gladstone—Katie Noble).
Spot Cash (H. K. Devereux), dog (Vanguard—Georgia Belle).
Varo (Thos. A. Montgomery), bitch (Bruce M.—Frost III.).
Borneo Rare (Geo. E. Grey), dog (Count Roderigo—Bonnie).
Nun of Furness (P. H. Gotzian), bitch (Monk of Furness—Merry Girl)
Eagle Monk (S. J. Gottschammer), dog (Monk of Furness—Quail).
Gath C. (Jos. Crugon), dog (Gath's Hope—Paxie Maid).

POINTERS.

David C. (Jas. Cugron), dog (Duke of Hessen—Marguerite).
Princess Dolly (Jas. Cugron), bitch (Duke of Hessen—Princess Marguerite).
Conscript (Charlottesville Field Trial Kennels), black and white dog (King of Kent—Hops) June 26.
Jingo (Charlottesville Field Trial Kennels). liver and white dog (Mainspring—Queeny II ).
Biz (W. H. Smith), dog (King of Kent—Lass of Bloomo).
Manitoba Shot (Thos. Stone), dog (Coton—Psyche).
Manitoba Sal (Thos. Stone), bitch (Coton—Psyche).
Diamond (Thos. Shelton), dog (Upton—Blythe).
Victor (J. B. Kelly), dog (Coton—Psyche)
King of Manitoba (Thos. Johnson), dog (Upton—Blythe).
Gem of the West (Thos. Johnson), bitch (Upton—Blythe).
Topsy Pape (George E. Grey), bitch (Joe Pape—Topsy M.)
Lonsdale (Joe Philips), dog (Coton—Psyche).
Alberta Joe (John Sharples), dog (Upton—Blythe).
Alberta Ruby (John Sharples), bitch (Upton—Blythe).
Sam (Thos. Stone), dog (Coton—Psyche).

IRISH SETTERS.

Claremont Clare (Messrs. Perry & Bowen), bitch (Claremont Patsy—Nellie Glencho).
Hawkeye Queen (Messrs. Perry & Swetzer), bitch (Claremont Patsy—Nora of Claremont).

## DEFORMITIES IN ST. BERNARDS.

Several letters have appeared lately in *Stock-Keeper* on this subject. Mr. Hughes-Hughes maintained that the large size, etc., that St. Bernards have been brought to is responsible for the crooked forelegs and cowhocks so often met with, and seeks to prove this by asserting that the monks of the Hospice St. Bernard never had dogs over 31in. in height at shoulder. This may be so, but we have met with about as many crooked-legged small ones as the large ones. A correspondent answering Mr. Hughes-Hughes contends that inbreeding is responsible for the deformities, but admits that nearly all their largest St. Bernards, and weeds too, are sadly crippled. He makes a startling suggestion to counteract this inbreeding, and start afresh, as it were. He proposes that a class shall be set apart at large shows for the best St. Bernard bitch the product of a mastiff and St Bernard. He remarks whether we like it or not that sooner or later this problem will have to be faced. We heard a whisper some time since that something of this sort had already been done with some celebrated mastiff as the sire.

Mr. Hughes-Hughes in a later letter says that he does not wish to make any dogmatic assertions, but his idea resulted from observation at shows and the results of his own breeding. Regarding cowhocks, he thinks they are caused to a great extent by dewclaws, and that he has for a long time past had these "hideous appendages" removed from all his puppies as soon as they could walk. Another writer this week thinks that the cause of crookedness is worms during puppyhood, a fat, heavy puppy being quite as likely to have them as a lean one, and that the requisites sought in a St. Bernard, big head, heavy, deep bodies, are the very things bearing the wormy puppy down, while the light collie-looking St. Bernard skips round with small leg bones that never go wrong. He thinks that if a puppy's legs go on right till it is 6mos. old, only distemper or some disease will affect them, and therefore he does not see why the puppy should be blamed for what occurred to it long before it was 31in. high. He also makes a plea for the cripples, asking that some definite number of points be deducted from a dog afflicted with cowhocks or crooked legs, but if he is good otherwise not to be thrown out at one show for that cause and win at another. We should think the standard provides for that.

## NEW KENNELS AT NASHVILLE, TENN.

*Editor Forest and Stream:*

It is now a little over twelve years ago that I established the Mohawk Kennels at Auburn Park, a beautiful suburb of Chicago. During this time I have devoted almost my entire time and attention to the breeding and keeping of dogs, and there has never been a time when the kennels have not been filled to their full capacity, from the big mastiffs, St. Bernards and Great Danes down to the tiny toy terrier. During all these years I have managed the kennel with a profit to myself and satisfaction to my patrons. In many cases the same dogs have found a pleasant retreat here during the season for many years, but the time has at last come when such a thing as successfully conducting a kennel at Auburn Park must cease to exist. The reason for this is that Auburn Park is now nothing more than part and parcel of the great city, and a city is a poor place for a large kennel. Were it not for the fact that I was here first and that I own a good deal of ground I should have been compelled to move long ago. But the time has at last come, and after Sept. 1 the welcome bark of my many canine friends will be a thing of the past. But I am not going out of the business. I shall be in it bigger than ever after the above date. I have just completed arrangements with what hereafter will be known as the Cumberland Kennel Club. The club will be located at Nashville, Tenn., and is organized by a few of its best citizens and business men, every one a great lover of dogs. As to the terms of my arrangement the public is not interested, and it is therefore not necessary to give details. Suffice it to say that I stand on equal terms with the members in the profits of the business, and hold the position as manager. The club will breed great Danes, pugs, and Italian greyhounds, and hereafter the celebrated pugs of the Mohawk Kennels will be the property of the Cumberland Kennel Club.

To carry on the business successfully, the club have secured a most beautiful and lovely place of 140 acres, three miles from Nashville, eighty acres of this is timber. Here the kennels and yards will be located, there will be a commodious club house with office and reception room for visitors and the residence of the manager. The club will also have a city office which will be connected by telephone with the club house; but what strikes me most of all is the great beauty of the place, the land lies on the top of a gentle sloping hill, it is well drained in every direction, has several delightful springs, the water of which will be utilized in the way of a constant supply through the kennel yards. Commodious kennels will be fitted up, and with an unrestricted range for exercising, plenty of shade, abundance of pure water, a climate that cannot be excelled, this should be a perfect heaven for dogs. The country around and about Nashville is famous for its beauty and this place of all others is one of the most beautiful. It is on the same road that leads a visitor to the famous Belle Mead Stock Farm, three miles beyond, where 3,500 acres are inclosed by twenty-two miles of stone fencing and the sires of some of the most noted thoroughbred horses have their home. In conclusion I beg to extend a cordial welcome to all my friends and lovers of fine dogs, and let me assure you that the twenty minutes drive from the city over a perfect road will pay you for your trouble. The club besides keeping their own dogs will also keep those of others; dogs sent for the season will be returned free. The city office for the present will be at 428 Church street, Nashville, Tenn. Harry L. Goodman.

Auburn Park, Ill.

## PROF. WESLEY MILLS AND HIS TRADUCERS.

*Editor Forest and Stream:*

Canadians as a class feel very bitterly in regard to the persecution that is being carried on against the eminent scientist, Dr. Wesley Mills. If this crusade were warranted in the slightest degree nothing could be said, and even now I should not feel it necessary to write in defense of my friend, if it were not for the fact that some men who are not personally acquainted with the Doctor are becoming prejudiced as a result of reading so much that is malicious and untrue. It is the old story of those who wish to do wrong fighting against the man who fearlessly upholds right. Few of those who have been fathering this persecution have dared to put their names to their productions, and the only thing that has been openly said against Dr. Mills is a foolish charge of cruelty to Elcho during the judging at Kingston. To those who know the man and his efforts on behalf of the dog and other domestic animals, and to those who have seen the affection he has for his pets, such a charge is absurd. The incident that gave rise to the charge was too trivial even to refer to, and as no less than three of the bench show committee—viz., Mr. Corbett, Mr. Oldrieve and myself—were present during the judging of greyhounds, there can be no mistake about the matter. If there is any one who practices what he preaches Dr. Mills is that man.

I am sorry that Mr. Wade should have listened to those who have said unkind things of Dr. Mills, for I feel satisfied that if Mr. Wade knew Dr. Mills as well as I do he would at once see how earnestly and deeply the man is devoted to the solving of problems that are of the most intense interest to dog breeders. We must have practical men of course, and it is wonderful how much they can add to scientific lore, but at the same time we cannot expect the most difficult scientific problems to be solved without the highest kind of scientific training. Mr. Wade and Dr. Mills are just the men who should be friends rather than at enmity, and it is unfortunate that such discussions as that over the Mercer difficulty have arisen. If Mr. Mercer should not have been disqualified there is something wrong in the constitution of the C.K.C. and the A.K.C Most of us think the rule that disqualified Mr. Mercer had a reason for existence, and although we are sorry to see any man get into trouble, feel satisfied that Mr. Mercer received a fair and impartial trial and just punishment.

I fancy that Mr. Wade did not "pour oil on the troubled waters" when he attempted to school Dr. Mills on the previous sire question and said that Dr. Mills's views had been "swept away" by Mr. Millais, an enthusiast in dog show hygiene (for which he deserves all praise), but a mere novice in biology. Dr. Mills is an investigator of the highest order and, like Darwin and men of that type, gives nothing to the world that is not founded on facts arrived at only after the most patient and careful investigation.

Possibly Dr. Mills may not thank me for writing of his standing in the scientific world, but an antidote for the venom that is defiling the columns of a contemporary must be provided if the best interests of cynology are to be protected.

Here are a few facts worthy of consideration: Dr. Mills is over forty years of age, and is neither a youth nor a novice as regards dogs. He is a graduate in arts of Toronto University, a member of the College of Physicians and Surgeons, Ontario; a graduate of Human and Comparative Medicine of McGill University; and a member of the Royal Society of Canada, etc. He practiced human medicine for years, but does not practice either human or veterinary medicine for a livelihood, but devotes his time to the duties of his chairs as Professor of Physiology in the Faculty of Human Medicine, McGill University, and of Comparative Medicine and Veterinary Science in the Veterinary Department of the same university. He has for years conducted a public clinic for dogs in connection with the Faculty of Comparative Medicine. His students are very enthusiastic admirers of their professor, and there is a strong feeling of indignation among them at the abuse heaped upon him by anonymous literary assasins who are bound to triumph in the cause of wrong.

Dr. Mills is the author of many works of high order, and his books on physiology are standards. He has written two excellent works on the dog, is an original investigator and an accomplished lecturer. He has been a breeder of dogs and other animals nearly all his life, and is about the oldest breeder of some varieties in America. His knowledge, which is derived from observation, has been gained in Europe and Britain as well as in America. Probably no one associated with dogs in America or Britain is prepared to discuss them more profoundly.

As a judge at Kingston last year he showed his characteristic independence and progressiveness and put into practice his belief that dogs should be so handled that onlookers can see the reasons for the awards. No one could be more careful than he was, and the ju ging was made most interesting to the general public.

Such a man as Dr. Mills should be welcomed by the kennel world, as he has no interest to serve beyond that of putting things on a higher level. The anonymous scribblings of a clique should not be allowed to prejudice good men who are interested in dog breeding. I feel satisfied that in the end this view must prevail; however, if it turns out that the kennel world is not ready for such a man, so much the worse for the kennel world.

Kingston, July 28. C. K. Clarke, M.D.

## MR. MIDDLETON'S RESIGNATION.

*Editor Forest and Stream:*

After reading the copy of Mr. Middleton's letter of resignation as a committeeman of the Ottawa dog show, which appears in Forest and Stream for July 21, the only course left me is to retract my charges against Mr. H. B. Donovan and the Ottawa Committee. I also wish to express my regret for having made them. There has been quite a bit of misunderstanding over this matter; but the only inference to be drawn from this published letter was that taken by your Canadian correspondent and the Ottawa Committee.

F. H. F. Mercer.

Ottawa, Canada, July 25.

### Business.

Lynn, Mass., July 26.—*Editor Forest and Stream:* I take pleasure in stating I received "more" in Forest and Stream have made five sales to-day from all other sources combined, and think the Forest and Stream the best advertising medium for kennel business in the United States.—O. W. Brooking.

# DOG CHAT.

### Dog Law in Pennsylvania.

In the case of "Commonwealth vs. Deputy," the Supreme Court of Pennsylvania has decided that dogs may be stolen. Not, however, with impunity. On the contrary, a majority of the bench has ruled that there is such a thing as property in four-footed beasts of the canine kind, and that the law passed to bring about this condition in 1889 does not offend against the constitution of Pennsylvania. It seems that one, Deputy, made off with a spaniel dog of the value of $20, and when branded as a thief claimed that there was no law in the State making dogs personal property. The decision of the Supreme Court is here given: "We need not discuss the rule of the common law upon this subject, nor its wisdom. This case turns upon the act of May 15, 1889, P. L. 222, entitled 'An act for the taxation of dogs and the protection of sheep,' the sixth section of which provides, 'That all dogs in this Commonwealth shall hereafter be personal property, and subject of larceny,' etc. It is urged that this act was unconstitutional, for the reason that the said provision of Section 6 is not fully expressed in the title of the act. We cannot assent to this proposition. One of the objects of the act, as expressed in the title, is the taxation of dogs. Hence when the Legislature seeks to lay a tax upon what was not property at the common law, we think it entirely germane to the object of the act to declare that the property taxed shall hereafter be personal property, and subject of larceny."

### The Same Dogs in Different Classes.

A writer in *Stock-Keeper* raises a point in connection with shows that is of interest. He wants to know if his brother exhibitors think it right for the judge, when a dog is entered in several classes, to ask the exhibitor if the dog has been in before and what his previous number was so that he could refer back and give the dog the "same again." The writer in question thinks, and properly so, that the dog should be judged on his merits each time he appears. This is right, though the judge's reputation may suffer afterward. As a dog may not show himself in the open class, but get him among a lot of puppies and more used to the noise, or have his own handler and he will be altogether a different dog and might easily, in the case of a fox-terrier, Irish terrier or collie, mislead the judge, who, not knowing the dog would probably place it higher comparatively than before, and the dog receive its due, whereas if the judge knows its number and refers back in his book and finds he against it in the other class, that dog's fate is sealed and he won't rise, but the judge has saved his reputation. Some of our judges are very careful in this respect, and we know one well-known judge who scanned his novice class awards very carefully when the open class was on, the novice class having come on first, and we can hardly blame him.

### Areca Nut Sometimes Fatal.

We are told from time to time that areca nut is a dangerous medicine to give dogs as a vermifuge. Probably it is, and like many another medicine if given in excess will cause death. We have used it extensively for worms in dogs and never had reason to regret it. Our plan is always to give it in two half-dram doses, with an interval of an hour between each dose, for ordinary sized dogs. Mr. Treman, a well known coursing man in California, has just lost one of his fine young greyhounds by giving it an overdose of areca nut. The powder one buys at the drug stores is rarely of much good. It should be freshly grated from the nut as required, and given in that way a small quantity will be found quite violent enough in its action and will generally move the toughest tœnia. As the action of this medicine is rather rugged, if we may use the term, it is always well to feed "soothingly" for a day or two afterward, giving soups, milk and soft food till the digestive apparatus gets into good working order again.

### More New Dogs.

Mr. Mortimer's visit to England is bearing fruit, for Spratts Patent Co. in this city advise us that on the steamship Canada their London house shipped three fox-terrier bitches, Refuge, Eggersford Safety and Eggersford Sapphire, and a black retriever, consigned to Mr. J. C. Hull, Jr., 51 Liberty street, New York city. Also by the same vessel come three fox-terrier bitches for Mr. J. C. Grainger, 54 Broad street, New York city. On the steamship France two more retrievers are coming for Mr. Hull. We are pleased to see the interest which is being taken in the useful retriever; provided they are good ones they are handsome and intelligent enough to become a favorite breed with sportsmen, especially along the shores, for though they probably are no better than the Chesapeake Bay dog for duck work, still they have this advantage, they do not come in all manner of shapes, sizes and shades. They are a distinct breed.

### Formation of Dogs' Feet.

Mr. D. F. Zambaco, the noted Psovoi breeder, says that in his short experience the barefoot is the best in the straight line, and the cat foot in turning. He says also that "Borzois" are wolfhounds, not rabbiters, and must therefore have hare feet. "Any Russian will tell you that." Further he remarks in *Stock-Keeper*, "That the ground dogs have to run upon has much to do with the conformation of their feet, and climate with texture of the coat. So no rule can be given in these matters," and he is about right. In regard to the theory that a light, flat-boned dog has always a hare foot, we can produce a fox-terrier with that sort of bone but standing on a very good sample of cat foot. Is not the flat, light-boned leg generally accompanied by a splay foot, long-toed and open? which is a very different thing to the tight, springy hare foot.

### Pointer Importation.

It may interest Eastern pointer men to know that Mr. Huber's, of San Francisco, Cal., pointer Sally Brass II. whelped July 13 nine puppies, all nicely marked, by his no less well-known Duke of Vernon. Four have since died, but Mr. Huber has still two dogs and three bitches. Mr. Huber seems determined to put his kennel in the front. When Mr. Mortimer went to Europe he had a commission from the Californian sportsman to buy the best pointer he could find, both for field and bench. Mr. Mortimer has just secured for him the noted field pointer dog Glenbeigh, by Grouse V. out of Rita, whelped February, 1890. This pointer won several stakes during the English spring trials and has also won on the bench, a third at Birmingham last year is one of his prizes.

### Gordon Setters and the N. E. F. T. C.

The action of the Gordon Setter Club in donating a handsome special to the New England Field Trials for the best Gordon running at their meeting this fall should provoke competition in this rather neglected breed from a field trial view. The owners of Gordons will not be able to complain of the pace being too fast for them, and the nature of the country should just suit them. Take time by the forelock and have them properly prepared this time, in the same way that the pointer and setter men treat their candidates.

### Duchess Kennels.

The Empress of Contoocock's one pup is coming along nicely and is now five weeks old—a most old-fashioned little piece of dog flesh. It was taken from its mother when ten days old and has been fed by hand since. At the age when most pups are being weaned this youngster can tackle a crust or a biscuit with the greatest vigor and relish. Col. Ruppert's Baroness Cardiff whelped July 27 to Aristocrat; and a peculiar fact is that three pups came first, live and strong and marked like the dam, with a good deal of white, then came five dead ones, all beautifully marked with solid orange bodies like the sire. Mr. Booth blames the inbreeding. This reminds us that a good St. Bernard stud dog with blood a long way removed from Plinlimmon is badly needed in this country just now. There is too much Plinlimmon blood about on both sides.

### Champion Plinlimmon, Jr.

The St. Bernard fancy is constantly receiving fresh recruits so that there is hardly any cause for the fear that interest in the breed will deteriorate, at least not at present. Mr. Geo. Fox, of Cincinati, O., is the latest aspirant for show honors, and in purchasing champion Plinlimmon, Jr., he has started with a good dog. Mr. Sears bought this well known dog in England as a puppy in arms as it were, and it was the nucleus of a kennel that has become widely known. There is no dog on the bench to-day that can surpass Plinlimmon in body, legs, feet and action. Mr. Fox is the proprietor of the Eden Park Kennels, and intends going in for St. Bernards. Mr. Al Eberhart will handle Plinlimmon, Jr., at Toronto and Grand Rapids, Mich., shows this fall. Plinlimmon, Jr., arrived at Cincinnati July 24 in charge of one of Mr. Sears's men.

### Pointer Devonshire Nero.

It is reported by *Stock-Keeper* that this well known pointer is booked for America. As the manager of the Hempstead Farm Kennels has been spending some time in Devonshire, and Devonshire Nero is or was owned by Messrs. Lee, Bulled & Turner, of Witheridge, Devon, we may be allowed to draw our own conclusions in lieu of definite information. This dog is by Molton Baron out of The Village Star, and was whelped January, 1888. He is a noted field dog, and can count several wins at important shows to his credit. He won a second in the Irish Setter Club's pointer puppy Derby Stake, and was fourth in the Kennel Club's All-Age Stake.

### Greyhounds and Coursing.

The greyhound Miss Kitten, one of the bitches presented by Col. North to Col. Cody (Buffalo Bill), whelped June 22 eleven puppies, five dogs and six bitches. They are sired by Dingwall, runner up for the Waterloo Plate in 1889. These puppies will be just the right age to run in the Great Bend Derby of 1893, and ought to give a good account of themselves if raised well. Col. Cody has quite a kennel of greyhounds at his ranch in Nebraska. H. S. Boal has the entire charge during the absence of Col. Cody.

### Beagle Trials Judges.

The meeting of the N. B. C. last Thursday night was a protracted one. We have not received full particulars of the meeting, but understand that, commencing about 9 P. M. on Thursday evening, it did not break up till about 5 A. M. Friday morning. The judges selected for the trials are Messrs. W. S. Clarke and "Joe" Lewis, an excellent pair to draw to and one that will command confidence. The bench show judge is H. W. Lacy. The meeting though protracted, ended harmoniously, and we trust matters will move smoothly henefcorth.

---

There are a lot of new dogs advertised for sale this week. Among them we notice that Wyoming Kennels have brood bitches and puppies for sale; George W. Lovell, four well-bred pointer pups; W. H. Hyland, pointer pups; Fred. Schmitt, St. Bernard pups; Clay Gaitskill, foxhound puppies; C. J. Gayler, well-bred English setter pups; R. G. Overton, St. Bernard Kentucky Rex; A. E. Brown, English and Gordon setters and pointers; O. F. Conelly, some well-bred St. Bernard pups and Newfoundlands; F. R. Page, pointer pups. In the stud: W. H. Hyland's champion Pommery Sec and champion Ossining. George Thomas will handle dogs at Canadian shows, and those who know him are satisfied of his ability in this direction.

---

Mr. H. W. Huntington is in ecstasies over a fine litter of Psovois whish his noted Princess Irma whelped, July 27, to his well-known Argoss. This blending of color should make some very handsome looking animals.

---

We were in error in saying that Mr. Black imported his new dog Flash, as this dog was shown at the last New York show by Mr. Cushman.

---

The Rochester *Democrat and Chronicle* says that there is a probability of the Rochester Kennel Club holding their show with the Western New York Fair at Rochester, commencing Sept. 26.

---

The well known beagle man, W. F. Rutter, Jr., of Lawrence, Mass., called upon us last Tuesday. He had been spending a couple of days with Mr. Phoebus, at Bernardsville, N. J., and the two beagle enthusiasts had a glorious time among such a crowd of the little hounds—there are about sixty at the kennel and Mr. Phoebus has about thirty more at Tuxedo Park. We are pleased to hear that friend Phoebus is enjoying better health, but is still not strong enough to take part in the coming beagle trials.

---

Harry Jennings, Mr. Reick's kennelman has been "asked to resign" for sufficient reasons, and Mr. Reick next week will offer most of his dogs for sale. This does not mean, however, that Mr. Reick is going out of the breed by any means.

---

Mr. Megson, the well-known collie man, has just bought Hadfield Monarch, by Metchley Wonder, for $2,000.

---

The bull-terrier Autocrat Victor will find a home in Boston, having been purchased from Mr. J. J. Sturgess, and sailed from England July 16 per steamship Durham City.

---

A writer in the Chicago *Inter-Ocean*, who "does" a kennel column, gravely tells us that Mr. Belmont cabled an offer of $10,000 for the fox-terrier champion Result, but the offer was promptly refused, the dog being more valuable as a prize winner and stock getter. The only comment that need be made on this is, if the above sum was divided by five Mr. Belmont would still be guilty of reckless extravagance.

---

Last week we made mention of the Drovers' show in London, but omitted to allude to the rather novel way of judging collies as to their ability to work. It seems every drover making an entry for the best working collie prizes, was requested to name the dog, of course not his own, which, in his estimation was the best worker. In this way the committee was able to find out which dog in the popular estimation was a good performer among the sheep and bullocks, and as these men are generally pretty practical in their ideas there is little fear but that the best dog got his deserts.

---

The Swiss Mountain Kennels have sold the rough-coated St. Bernard, Duke of Loraine (19,118) (Marquis of Stafford—Loraine) to Mr. F. E. Hege, Wachovia Kennels, Salem, N. C. This dog is well marked and nicely grown, and his blood should make him a valuable acquisition to the Southern kennel. Mrs. Smyth some time since purchased from Mr. Cobb, Wilmington, Del., the St. Bernard bitch Duchess of Arlington, by Lord Bute—Margharita. This is the bitch that struck Miss Whitney's fancy at Washington. The Duchess won in the novice class. Her infusion of Lord Bute blood should make her a good brood bitch for Mrs. Smyth's kennel.

---

There is a movement on foot to organize another coursing club, to hold annual coursing meets. The meetings are to be held in October, near Kearney, Nebraska, where the jacks are nearly all "white tails," and plenty of them. It is to be hoped that such a club will be organized and the dates of their meets so arranged as not to conflict with the Great Bend meeting.

---

We hear that Edgewood Fancy, the noted bull-terrier, has whelped a splendid litter at Mr. Huntington's kennels, by Mr. Dole's Gully the Great.

---

The Psovoi we mentioned as coming over recently was Mr. Huntington's Zerry, who has been in England under Dr. Sewell's care for some months past. The English papers criticised her in a show report as a bitch of intense quality but small. She is really only a shade less than Argoss and Argoss is a pretty big sort of a dog.

---

While the trouble caused by the peculiar actions of the Rochester Kennel Club is much to be deplored, we see no reason why Hamilton cannot step back to its original dates and hold a show. The sympathy of the exhibiting public is with the Hamilton Club in this business, and they would probably get a good entry. A little hustling may do it yet.

---

Mr. Robert Leslie has shipped his two pointers, King and Cora of Lynn to Mr. McCloud's Liberty Kennels, Hyattsville, O., to be prepared for the field trials. His King of Kent—Belle Randolph litter is doing well. There were two dogs and five bitches, but one of the dogs has unfortunately died.

---

Mr. O. W. Brooking has sold his noted beagle Tom Boy (Rattler—Actress II.), but the purchaser's name is not given.

---

Mr. De Fashion—"I see an Englishwoman has been fined for having her two dogs pull the baby carriage." Mrs. De Fashion—"She ought to be, the cruel thing. Why didn't she make the baby pull the dogs?"—*Ex.*

---

St. Bernarddom has evidently lost a wonder in the death of Messrs. Smith & Baker's Premier. When such a paper as *Stock-Keeper* says that he is "the best and biggest dog we have ever seen * * * and could beat and beat well any St. Bernard before the public," there must be fire with this smoke. The dog's only fault was hardly a deep enough stop. He stood 36in. high, and weighed 198lbs. at 18 months old. This is certified by the above journal, and besides his limbs were sound and straight. Inflammation of the lungs after an attack of distemper carried him off. He had not yet been shown, and was by Scottish Prince, whose death is still more to be regretted, out of Lady Melrose, and was bred by Mr. Docksey. It is a long time to wait for the next one now.

---

Mr. James Mortimer, who has had quite a busy time of it in England, was to sail last Saturday, but in case he could not arrange his affairs to do so will sail for America Aug. 5.

---

### DOGMATICS OF DOGDOM.

Nature always maintains an equilibrium of forces. Men wear shirts without collars and dogs wear collars without shirts.

—§—

Sometimes a dog's happiest moments are when he is lost, for then his master is absent.

—§—

The man who wrote that any stick was good enough to beat a dog with, had a depraved heart.

—§—

The most sheepish dogs are the collies. THE CYNIC.

---

## HAMILTON AND ROCHESTER SHOW DATES.

ROCHESTER, July 22.—A. D. Stewart, Esq., Hamilton: Dear Sir—As I have been out of town, have been unable to keep posted about the affairs of our kennel club. Having just met our secretary, Dr. Bamber, he informs me that you returned his last letter unopened. I desire to say personally and as treasurer of the Rochester Kennel Club, that we have decided to withdraw our dates for the fall show and not conflict with Hamilton. If this notification is not all that is necessary, our secretary will be pleased to forward you official notice of our withdrawal upon application from you. Very truly yours, HARRY YATES.

HAMILTON, Canada, July 25.—Harry Yates, Esq., Treasurer Rochester Kennel Club: Dear Sir—I have to acknowledge receipt of your note of July 22, in which you tell me that the Rochester Kennel Club has decided to withdraw its dates for the fall show "in order that it should not conflict with Hamilton." The members of your committee evidently dearly love a joke and must be themselves a most jovial and hilariously inclined body of gentlemen. Permit me, however, to say that your club has already conflicted with Hamilton, and that so seriously and deliberately as to knock our club completely out of the Canadian circuit. Our fall show is now an impossibility, and whether your club goes on with its show or gives it up, is a matter of no moment to my committee. You will bear in mind that our club has never desired that you should give up your show, on the contrary we offered to withdraw voluntarily ourselves from the field, if no amicable arrangement could be arrived at, and an impartial board of arbitrators should decide against us. With your club on the contrary the cry was "no surrender" on any terms, no courtesy, no fair play, no give or take, nothing that was generous or sportsmanlike or manly, and as that style of doing things is not in vogue here we let your club have its own way, and it can go on just as it pleases without further reference to us. I am dear sir,
A. D. STEWART, Hon. Sec'y H. K. C.

---

## KENNEL NOTES.

**Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.**

### NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

*Yankee Gladstone.* By Dr. C. E Stanley, Middletown, Conn., for black, white and tan English setter dog, whelped June 5, 1891, by Breeze Gladstone (champion Gladstone—champion Sue) out of Fanny Flake (Chief Justice—Nancy Lee).

### BRED.

☞ **Prepared Blanks sent free on application.**

*Edna H.—Duke Elcho.* Oak Grove Kennels' (Moodus, Conn.) Irish setter bitch Edna H. (champion Elcho, Jr.—Romaine) to their Duke Elcho (champion Elcho, Jr.—Maid), July 8.

*Kildare Jessie—Duke Elcho.* Oak Grove Kennels' (Moodus, Conn.) Irish setter bitch Kildare Jessie to their Duke Elcho (Elcho, Jr.—Maid), July 17.

*Bonny Bell—Duke Elcho.* Oak Grove Kennels' (Moodus, Conn.) Irish setter bitch Bonny Bell to their Duke Elcho (Elcho, Jr.—Maid), July 15.

*Avondale—Duke Elcho.* Oak Grove Kennels' (Moodus, Conn.) Irish setter bitch Avondale (Inchiquin—Jess) to their Duke Elcho (Elcho, Jr.—Maid), July 12.

*Belle—Dash.* J. A. Smether's (Berwick, Pa.) English setter bitch Belle to C. C. Evans's Dash, July 18.

WHELPS.

☞ **Prepared Blanks sent free on application.**

*Lady Alma.* Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Lady Alma (Eberhart's Cashier—Mable E.), July 23, six (two dogs), by their Happy Toby (Spokane—Lalla Rookh).

*Norma.* Oak Grove Kennels' (Moodus, Conn.) Irish setter bitch Norma (Grab—Flora), July 11, nine (six dogs), by their Duke Elcho (champion Elcho, Jr.—Maid).

*Wave II.* A. C. Sill's (Harriman, Tenn.) Chesapeake Bay bitch Wave II. (Gowrie II.—Wave), July 13, ten (six dogs), by H. H. Smith's champion Barnum.

*Mack's Juno.* T. T. Ashford's (Birmingham, Ala.) pointer bitch Mack's Juno (Rex Morgan—Fleet), July 17, thirteen (five dogs), by his Clip Graphic (champion Bracket—champion Sally Brass II.).

*Carrie R.* F. C. Rochester's (Logan, O.) pointer bitch Carrie R. Meteor II.—Carrie), June 23, eight dags, by T. T. Ashford's Kent Elgin (King of Kent—Vera Bang).

SALES.

☞ **Prepared Blanks sent free on application.**

*Bonny Sarsfield.* Red Irish setter bitch, by Oak Grove Kennels, Moodus, Conn., to Paul H. Reilly, Oakland, Cal.

## ANSWERS TO CORRESPONDENTS.

W. G. S., Pittsburgh, Pa.—Messrs. Jos. H. and J. A. Hunter, Bloomington, Monroe county, Ind., own a good strain of black pointers.

W. S., Cortland, N. Y.—1, Yes, if the pedigree is all right. 2. If the bitch can show a pedigree for three generations back. 3. A bitch can be bred at once after she has stopped bleeding.

H. L. J., Stratford.—The only greyhound called Prince is No. 7,808, Vol. V., and there is a Belle, No. 9,989, Vol. V., but they are bred and owned by Western people and do not correspond to those you mention.

A SUBSCRIBER, Medford, Mass.—The article you refer to about bloodhounds is a most sensible one and we quite agree with the writer. The bloodhound proper is a dog of good disposition and a noble animal, entirely different from the "Uncle Tom's Cabin" mongrels.

R. A. R., New York City.—Please give pedigree of pointer Rustic, shown in New York, 1887 or 1888. Ans. Rustic was shown by D. S. Gregory, 14 West Sixteenth street, New York city, whelped July 19, 1886, and was by Bracket out of Lucia. Shown at New York, 1887.

CHITTENANGO.—Are there any Irish pointers that you know of? If so give description. Ans. There is no breed called Irish pointers. Probably your dog is a cross between a red Irish setter and a pointer. There are liver-colored pointers, perhaps yours is a very light colored one. You cannot do anything for the tail. The best books are Modern Training, etc., by B. Waters, price $2, and Dog Training by S. T. Hammond, price 50 cents.

A. E. DAVIS, Worcester, Mass.—Give the pedigree for four generations, with numbers, of the English setter bitch Fedora Laverack, owned by O. H. Clapp, of Brockton. She is the dam of Draco Kent (24,825). Ans. Fedora Laverack (A.K.C.S.B. 17,202, Vol. VII.) by Gun (1,618, Vol. I.) out of Victoria Laverack (2,591, Vol. V.), by Tempest (1,793, Vol. II.) out of Lilly (2,070, Vol. II.), by Carlowitz (45, Vol. I.) out of Princess Nelly (——); Tempest, by Pontiac (——) out of Fairy II. (354, Vol. I.); Gun, by Gladstone (113, Vol. I.) out of May B. (——), by Rake (212, Vol. I.) out of Fanny (359, Vol. I.); Gladstone, by Llewellin's Dan (——) out of Petrel (472, Vol. I.). This is as far as we can go.

T. T. A., Birmingham, Ala.—How many years back is traceable the authentic pedigree of setters, also of pointers? Through which strains? Ans. Mr. Laverack, at the time he wrote his book on the setter in 1872, claimed that Old Moll and Ponto, from whom he derived his celebrated strain, were descended from pure blood in the kennels of Rev. A. Harrison Carlisle, England, from whom he purchased them in 1825, and for 35 years before that an authentic pedigree had been kept. But Old Moll and Ponto are the starting points of the breed in the records. The earliest public records of traceable pedigrees of pointers is that of the English Kennel Club's stud-book for 1859 to 1874. We can hardly be expected to trace out the different strains, it would take too much time. If there is any particular strain you would like to have traced we will do what we can for you.

X. Y. Z., Oakland, Cal.—1. A neighbor of ours has a dog, a cross between a Newfoundland and a mastiff, eight months old, which is suffering from an affection of the mouth. The symptoms are fetid breath and gray spots about the size of a pea on the lips and margin of the tongue. On the upper lip these are isolated and firm, while on the lower lip they are soft and appear to coalesce. There are also two wart-like growths on the top of his neck, one of which, on becoming partly detached, exuded a watery fluid. We are treating for blain as recommended by "Ashmont," but owing to the absence of ulcers or abscesses and the freshness of the floor of the mouth, although the disease is running two months, we are not sure of our diagnosis. 2. Also tell us if breeding from the two dogs, whose pedigrees are inclosed, is scientific. Ans. 1. Treat for worms. Wash the mouth out twice daily with the following: Boracic acid two drachms, chlorate of potash one drachm and a half, tr. of myrrh four drachms, water eight ounces. Touch the soft spots with nitrate of silver. Give five grains of salicylate of bismuth. 2. What do you mean?

J. P. W., Boston, Mass.—My pointer dog, not yet one year old, is in a bad condition due to the distemper. His left leg and shoulder is almost useless to him; they are twitching violently day and night, either awake or asleep. If he starts to run for a short distance the leg gives way and he falls prostrate. His nose is dry and crusty for a number of weeks past. I have used all methods that I know of to bring him around, but all of no avail. I am treating him after Dr. Mills's method, but I think I shall finally be compelled to hasten his exit to the happy hunting grounds. Do you think I can make anything out of him? Will he be able to stand a day's hunt if he gets well? He has not eaten anything for two days. He moans and cries at odd intervals during the day and night. He has been reduced to a shadow during the past week. I had him out one week ago and he had five fits inside of one hour. Ans. Give the following mixture:

| | |
|---|---|
| Syr. hypophos. co. | ʒ iii |
| Tr. cinchon co. | ʒ iss |
| Liq. arsenicalis pot. | mxxxvi |
| Aq. ad. | ʒ vi |

Mix. Give one tablespoonful three times a day. Also give three or four times a tablet triturate containing one hundredth of a grain of hyoseine hydrobromate. Along the spine apply compound turpentine liniment. If fits come on insert a seaton at the poll. Feed on raw meat minced, eggs and milk, beef tea and cod liver oil. Give a little whisky two or three time a day if necessary. Write again next week.

## ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitted to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

# Yachting.

## FIXTURES.

AUGUST.

5. Winthrop, Moonlight Sail.
5. Corinthian, Atlantic City.
5. Goelet Cups, Newport.
6. Douglaston, Ladies' Day, Little Neck Bay.
6. Sippican, 2d Open Sw., Marion
6. Cape Cod, Town Cove.
6. Corinthian, Marblehead.
6. Great South Bay, Ann., Islip, Long Island.
6. Roy. N. S., Ladies' Prizes, Hal.
8. Royal Nova Scotia, Halifax.
8. Buffalo, Annual Cruise.
9. Miramichi, Stewart Pen., Black Brook.
9. Jersey City, Ladies' Day, New York Bay.
10. Corinthian Mosquito Fleet.
11. Rochester, Ladies' Day.
13. Dorchester, Dorchester.
13. Monatiquot, 2d Cham., Ft. Pt.
13. Chelsea.
13. Savin Hill, Second Cup.
13. Mos. Fleet, Cham., Boston.
13. Winthrop, Ladies' Day.

IF any of the New York yacht clubs desires to have some good racing and awaken a serious interest in the smaller classes, it cannot do better than to offer some substantial prizes for all yachts not over 21ft. l.w.l., prizes sufficient in amount to induce some of the Boston flyers to come around the cape, as they would undoubtedly do. Boston has learned a great deal since Mr. Alley took the old Cruiser around from New York in 1884, and in the new fleet she has undoubtedly the largest class of the fastest boats of their length afloat. A series of races near New York would attract a very large attendance of yachtsmen.

THE races of all the 21ft. class in the East derive a special interest from the fact that a number of the yachts are sailed by their designers, amateur and professional. Catspaw is sailed by Mr. George A. Stewart, Tadpole by Mr. W. E. Waterhouse, Freak by John B. Paine, Exile by J. F. Small, Gaddy by Mr. Sidney Burgess, and Mr. A. G. McVey is the most active and enthusiastic of Thrush's crew.

### New York Y. C. Cruise.

THE forty-eighth annual cruise of the New York Y. C. began on Tuesday, with a rendezvous at Glen Cove, Hempstead Bay, as last year, a large fleet being present on the arrival of Com. Gerry in the flagship Electra at 11 A. M. The principal yachts were: Ituna, Vice-Com. E. D. Morgan; Huron, Rear-Com. W. Butler Duncan. Steam yachts Conqueror, Sultana, Jean, Radha, Magnolia, Nomad, Helvetia, Allegro, Corsair, Halcyon, Emu, Avenel, Clermont, Ladoga, Vivienne, Neiera, Sapphire, Evelyn, Nooya, Oneida, Vidette, Daring, Lucille and Nydia. Schooners: Agnes, Gevalia, Magic, Montauk, Meteor, Nirvana, Constellation, Dauntless, Coronet, Fortuna, Viator, Merlin, Alceæ, Lasca, Iroquois, Viking, Lancer, Comanche, Fleetwing, Fenella, Miranda, Phantom, Azalea, Marguerite, Atlantic, Alert, Ramona, Quickstep, Columbia and Shamrock. Sloops and cutters: Katrina, Gracie, Wasp, Liris, Gloriana, Clara, Wizard, Forget-me-not, Whitby, Sayonara, Peri, Eleanor, Idlewild, Nymph, Athlon, Desire, Fanny, Pocahontas, Ventura and Sagitta. A number of outside yachts were present, while, by the courtesy of Mr. Hearst, the swift Vamoose accompanied the fleet and carried the representatives of the New York and Boston papers.

Immediately on the arrival of the flagship a meeting of captains was held, at which it was decided to sail at 1 P. M. for Morris Cove. New Haven, the run being an informal one, no times being taken; the regular squadron runs of the cruise to begin with the run from New Haven to New London on Wednesday.

The start was consequently very uneven, some yachts getting away far in the lead, but as the weather conditions were favorable for racing, the fleet broke up into little groups of yachts racing together.

The morning was cool and cloudy, with a moderate wind E. by S., a little rain falling at the start. There was a very strong flood tide against the fleet, but the breeze increased by 3 P. M., being then due east.

Wasp and Gracie were among the first away, so that Gloriana had no chance to try her rival, Wasp leading the entire fleet. The two new schooners, Lascar and Alceæ, naturally made a match, being anchored near together and getting an even start. They were close together all the afternoon, but with Lasca ahead.

At 4 P. M. Wasp was well in the lead in Smithtown Bay, with Gracie perhaps a mile astern. Constellation was over a mile astern of her, while next came Gloriana, Katrina and Viator, the latter having held a good place after an early start. On the other shore of the Sound, in by the Norwalk Islands, the other division of the fleet was led by Fanny and Marguerite, the latter having for the time distanced Merlin after a long brush. The order of the division was: Fanny, Marguerite, Quickstep, Shamrock, Lasca, Alceæ, Clara, Liris, Pocahontas, Iroquois, Fortuna and Miranda, with a large fleet scattered astern of them. A light rain was falling and the wind was moderate from the east, while the strong tide kept the fleet back.

### Eastern Y. C., July 28.

MARBLEHEAD—MASSACHUSETTS BAY.

THE special race of the Eastern Y. C, was the occasion of some very interesting racing off Marblehead last week, as two other clubs, the Beverly and the Corinthian, arranged to follow the Eastern with races for the same class. The original idea was to bring together the Boston 21-footers, built under a length classification, and the yachts of the 25ft. sailing length class established in New York last year, with a view to ascertaining the relative merits of the two classes. So far as this comparison goes, the experiment has hardly been successful, as but one of the New York yachts made the voyage to Marblehead; and she, almost as a matter of course, was badly defeated in the very light weather that prevailed in the three races.

The small attendance of the New York yachts was due to the distance and to the very few boats in the class, which really includes only the four Gardner boats (Smuggler, Nameless and Needle, built last year, and the new Pyxie) and the Herreshoff fin-keel El Chico. Of these, Smuggler and Needle are not racing this season, leaving three boats in the class.

A single look at the sail plans of the Boston craft is enough to convince one that the 25-footers have no possible chance beside them in weather that the smaller ones can carry their whole sail plan; the smaller boats measuring from 20 to 28ft. sailing length, as compared with the 25ft. to which the larger New York craft are limited. The smallest of the Boston boats, Alpha, the Herreshoff centerboard, carries on 21ft. l.w.l. about the same sail as Pyxie does on 23ft. 9in., while the other 21 footers carry from 150 to 300ft. more. Under such different conditions it is hardly to be expected that a test will afford any useful information, as the shorter hulls and larger rigs will win in light weather, the larger and snugly rigged boat having her turn as soon as the others are forced to reef.

The fleet of small boats that Boston turns out, not merely once or twice a year, but for every race, sometimes three or four a week, is calculated to awaken the envy of New York yachtsmen accustomed to seeing three or four boats in each of the small classes. Being limited to one class, the fleet of the Eastern Y. C. was much smaller than that of the following day, but even it was a sight well worth seeing, eleven yachts, all new and built to the class this year, the list being: Alpha, centerboard splasher, Brown, Dunne & Hunt; Thrush, centerboard splasher, John Bryant; Catspaw, centerboard splasher, C. A. Prince; Exile, centerboard splasher, J. F. Small; Koorali, centerboard Cape cat, R. C. Robbins; Sirrocco, keel cutter, W. P. Fowle; Vanessa, bulb-fin fin-keel, A. S. Bigelow, Jr.; Reaper, bulb-fin fin-keel, H. P. Benson; Freak, bulb-fin fin-keel, J. B. Paine; Pyxie, fin-keel cutter, Oswald Sanderson.

The exact classification of all the new types is a difficult matter, but a distinction seems necessary between such a boat as Pyxie, in which the lines of the middle body are those of a cutter, although the dead wood is so cut away everywhere as to make the keel a mere fin; and such of the still newer type in which the hull is of very shoal draft, almost a canoe in model, while the fin is of thin metal, carrying a cylinder of lead. Alpha, Catspaw, Exile and Thrush are more or less closely allied to the old skimming dish, or the Boston "splasher," but with longer ends; their beam varying from 9 to 12ft. and their sail area from 700 to 1,000 sq. ft. Koorali is of the common Cape cat type, carrying a jib in this race, but at times sailing without it, as a catboat. Sirocco is a cruising cutter, built for the 21ft. class early last fall, before the present development of the class was foreseen. The fin-keels have been so frequently described that no further mention is necessary.

Freak has undergone a number of alterations since her first trials, and is much improved, the wire grass-catcher that ran from her stem to the fore end of the lead bulb has been removed and a small well built through the keel and up to the deck, through which a pole may be used to clear the fin of weeds, lobster-pots and other impediments which it may collect on its vertical fore-edge. The hull is a very handsome bit of joiner-work, mahogany throughout, but for this race it was defaced by being roughly smeared with pot-lead and white paint after the fashion set by Mayflower in the international races.

So far as beauty goes, Pyxie was generally conceded to be far ahead of the others by the local critics, with her graceful ends, polished black top-sides and gold stripe and scroll. The 21ft. class, however, was built for performance and not appearance, and little has been wasted in merely ornamental features; but taken altogether the boats are far ahead of anything yet seen in workmanship, both of hull and rigging. Most of the boats are double-skinned, the outer skin of Spanish cedar or mahogany, the fins (and in one, Alpha, the centerboard) are of Tobin bronze, the spars are hollow, the rigging carefully fitted to turnbuckles and metal work of special design, and the sails by the best makers.

The extreme heat that has oppressed the entire coast during the past week was tempered by a light easterly breeze about Boston, making the weather comparatively endurable, but not promising much in the way of racing. About 10 A. M. the regatta committee on the large tug Dudley Pray ran out of the harbor and anchored off Marblehead Rock, the course being approximately an equilateral triangle of 7½ miles, the first side of 2½ being marked by a buoy set by the tug S.E. by S. of the Rock, the second mark being the whistling buoy on the Pigs. The course was sailed twice, making 15 miles.

The preparatory whistle was given at 10:55, the start being from the gun at 11 A. M. The wind was E.S.E., very light, making a beat to the first mark. Koorali was in doubt as to which way she should cross the line, coming up from the wrong side just before the whistle, and lying near the weather end of the line without steerage-way. As the other ten crowded for the line she lay directly in the way, being unable to recross. Catspaw, steered by Mr. George A. Stewart, her designer, was first over, near the middle of the line, followed by Thrush, with Mr. McVey, her designer, on board, and Tadpole, steered by Mr. Waterhouse, her designer.

The rest of the fleet rushed down in a bunch, crowding as close as possible to the tug, regardless of rules and overlaps, the best man over first. Freak, steered by Mr. John Paine, her designer, was in close company with Alpha and Pyxie, the latter steered by Mr. Sanderson. All came out of the scrimmage safely, and as they settled down to the windward work, all on port tack, the order was: Freak and Alpha together in the lead, Reaper and Tadpole to leeward of them, Catspaw, Vanessa and Pyxie next, the others scattered astern.

The leaders held on port tack for the first half hour, Freak showing well in the light airs; Reaper, to leeward, was holding a good pace; astern the rear of the fleet had tried to tack to the eastward. When Freak came for the mark, Reaper was a long way to leeward, but after tacking she caught a little breeze that brought her up very quickly, so that she rounded with Alpha, who had hunted Freak closely thus far. The elapsed times over the first leg were as follows:

| | | | |
|---|---|---|---|
| Freak | 50 36 | Exile | 59 37 |
| Alpha | 53 07 | Tadpole | 1 02 32 |
| Reaper | 53 52 | Pyxie | 1 02 46 |
| Vanessa | 57 07 | Thrush | 1 03 50 |
| Catspaw | 58 43 | Sirocco | 1 06 14 |

The second leg was down wind, booms to starboard, headsails boomed out to port, and all spinakers barred. The majority of the Boston boats, those which have sailed in all the races thus far, set their large jibs; Pyxie set her silk balloon jib made for this race. Freak in addition kept her working jib set and shifted to leeward, the ballooner being boomed out to windward. The order was changed on the run, Catspaw passing Reaper and Vanessa, while Alpha cut down Freak's lead. The elapsed time to the Pigs mark was:

| | | | |
|---|---|---|---|
| Freak | 1 38 31 | Vanessa | 1 44 47 |
| Alpha | 1 39 48 | Thrush | 1 51 03 |
| Catspaw | 1 42 23 | Tadpole | 1 53 45 |
| Reaper | 1 43 25 | Sirocco | 1 54 46 |
| Exile | 1 43 42 | Pyxie | 1 57 14 |

After a jibe all started on starboard tack for the starting line, the elapsed times again being:

| | | | |
|---|---|---|---|
| Freak | 2 12 48 | Vanessa | 2 20 38 |
| Alpha | 2 14 48 | Thrush | 2 21 23 |
| Catspaw | 2 16 32 | Tadpole | 2 28 24 |
| Reaper | 2 18 43 | Sirocco | 2 28 52 |
| Exile | 2 19 50 | Pyxie | 2 32 36 |

On the first leg Catspaw had sailed poorly, but later on she began to pick up, finishing the round in the third place with a gain of 4m. Pixey had fallen into the last place, her small sail plan being of no use in so light a wind.

The second round was a repetition of the first, the elapsed times at the first mark being:

| | | | |
|---|---|---|---|
| Freak | 2 56 08 | Thrush | 3 10 20 |
| Alpha | 2 57 37 | Exile | 3 10 31 |
| Catspaw | 3 01 48 | Sirocco | 3 21 06 |
| Reaper | 3 05 24 | Tadpole | 3 22 16 |
| Vanessa | 3 07 54 | Pyxie | 3 25 21 |

After the second run the order at the Pigs stood:

| | | | |
|---|---|---|---|
| Freak | 3 44 32 | Vanessa | 3 58 08 |
| Alpha | 3 45 49 | Exile | 3 58 22 |
| Catspaw | 3 48 36 | Sirocco | 4 12 40 |
| Reaper | 3 54 02 | Tadpole | 4 13 17 |
| Thrush | 3 55 42 | Pyxie | 4 16 49 |

The last leg, the reach from the Pigs to Marblehead Rock, was quite exciting, as Freak threatened to break Alpha's straight record of ten firsts to the same number of starts. Catspaw, by a fortunate puff, passed Alpha and came in between the two, but stood for nothing better than third prize after she had given her allowances. The finish was timed:

| | Finish. | Elapsed |
|---|---|---|
| Freak, John B. Paine | 3 16 54 | 4 16 54 |
| Catspaw, Gordon Prince | 3 19 10 | 4 19 10 |
| Alpha, Brown, Dunne & Hunt | 3 19 59 | 4 19 59 |
| Reaper, H. P. Benson | 3 24 36 | 4 24 36 |
| Thrush, Dr. John Bryant | 3 24 50 | 4 24 50 |
| Exile, John F. Small | 3 28 16 | 4 28 16 |
| Vanessa, A. Bigelow, Jr. | 3 28 31 | 4 28 31 |
| Sirocco, W. P. Fowle | 3 44 54 | 4 44 54 |
| Tadpole, W. E. Waterhouse | 3 45 34 | 4 45 34 |
| Pyxie, Oswald Sanderson | 3 50 43 | 4 50 43 |

The carrying of the large sails on Freak, Tadpole and Pyxie caused quite a commotion among the vanquished, and the news that the regatta committee had summarily disqualified both Freak and Pyxie was hailed with glee. Mr. Paine however decided to make a fight for the prize, and demanded a hearing in appeal from the decision, at the same time making a protest against every boat save Sirocco on the ground that each had violated the rule in booming out headsails. He also demanded a remeasurement of Freak and Alpha, which was made at once, the times being but slightly altered thereby. No corrected times were made up, but under the allowance, $^{6}/_{10}$s. per mile for each tenth of a foot of sailing length, Freak would take first prize, Alpha second and Catspaw third; the amount being $50, $25 and $15, the first boat winning in addition a handsome bronze medal given this year by the Eastern Y. C. as a trophy with each first prize. The final ownership of the prizes has not yet been determined in view of the appeals and protests, but Freak sailed a good race, being the first of the class to defeat Alpha. Catspaw's sailing was very uneven, as she was very slow at the start but picked up wonderfully after sailing for an hour. From all appearances it was splasher day, and the two Herreshoff fins bore out this idea, being well astern of the leaders, which makes the performance of Freak the more notable. While the wind was very light, it was as fairly steady as such breezes usually are, and though one boat or another was specially favored by a puff at times, the race could not be called a fluky one. The regatta committee included Messrs. Wm. S. Eaton, Jr., H. H. Buck and P. T. Jackson, Jr.

## Indian Harbor Y. C., July 30.

GREENWICH, CONN.—LONG ISLAND SOUND.

THE annual regatta of the Indian Harbor Y. C., of Greenwich, Conn., was sailed Saturday under most unfavorable conditions. The start was called for 11 o'clock, but the wind was so light that the yachts could not work up to the starting line off Little Captain's Island, and it was nearly 2 o'clock before the preparatory signal could be given. Even then most of the larger boats were handicapped on account of not being able to cross the line inside of the time limit.

There was a light air from the southwest at the start, which died out shortly afterward and left the fleet becalmed for nearly three hours, when a light wind sprang up from the northeast which enabled such of the boats as had not been discouraged and given up the race to make the first mark, the buoy off Matinicock Point. Shortly after the leaders had rounded the buoy the wind began to freshen, and before the yachts had reached the second mark, the buoy off Center Island, it was blowing half a gale and the small fellows had a hard time of it on the run in to the finish.

There were 61 entries and 44 starters in the various classes, and but for the unfavorable weather the race would have been a great success. The fleet was the largest that has started in any regatta on the Sound this year, and comprised some very fast boats in the smaller classes.

The course for all yachts over 30ft l.w.l. was from the starting line to the buoy off Matinicock, to the buoy off Center Island, back to the Matinicock buoy, thence home, 20 nautical miles. The course for all yachts 30ft. l.w.l. and under was to the buoy off Matinicock, to the Center Island buoy, thence home, 15 nautical miles. The course for the little jib and mainsail boats and catboats was twice around Captain's Island, 10 nautical miles.

Gold Dust and Phyllis drew ahead of the fleet shortly after the start and retained the lead throughout the race. Volusia kept ahead of Daffodil and Kathleen passed Estela during the drift to the first mark. It was nip and tuck between the big Forget-me-not and the Nirvana all the way over to the buoy, Nirvana rounding the mark ahead. When the wind freshened up, however, Forget-me-not passed Nirvana and finally finished an easy winner.

The times of the leading yachts around Matinicock buoy were taken as follows:

| | | | |
|---|---|---|---|
| Gold Dust | 5 16 10 | Kathleen | 5 51 15 |
| Phyllis | 5 20 59 | Oconee | 5 53 59 |
| Effie | 5 31 35 | Myrtle | 6 00 50 |
| Commodore | 5 34 59 | Daffodil | 6 02 35 |
| Romona | 5 35 00 | Nirvana | 6 04 48 |
| Senorita | 5 38 15 | Nahma | 6 05 29 |
| Jewel | 5 38 55 | Elvira | 6 05 29 |
| Chippewa | 5 42 05 | Roi | 6 05 40 |
| Alcedo | 5 50 35 | Forget-me-not | 6 05 50 |

The yachts finished in the following order: Gold Dust, Phyllis, Commodore, Vite se, Chippewa, Jewel, Kathleen, Roi, Myrtle, Elvira, Almira, Evelyn, Forget me-not, Senorita.

The full summary of the race is as follows:

SLOOPS AND CUTTERS.—53FT. CLASS.

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Forget-me-not, G. P. & W. H Butler | ... | 6 21 00 | 6 21 00 |

| Sadie, Benjamin M. Wallace | 19.92 | Withdrew. | |
| Zelda, Charles E. McManus | 19.42 | Withdrew. | |

SPECIAL 15FT. CLASS.

| | | |
|---|---|---|
| Presto, Harry Watson | 15.00 | Disabled. |
| Vitesse, Percy Hicks | 14.83 | 7 07 05 | 5 49 35 |
| Coot, A. D. Prince | 15.00 | Disabled. |

The steamer Wm. Fletcher accommodated the members and their guests and the launch Diana was used as committee boat. The regatta committee were F. S. Doremus, chairman, E. D Cowman, D. H. Winne and F. B. Jones. F. S. DOREMUS, Chairman Reg. Com.

## Two New Chicago Yachts.

CHICAGO, Ill., July 26.—There arrived in Chicago two days ago the new steam yacht, unnamed and known as "No. 12," property of A. V. Armour, of this city. This boat was built in Poughkeepsie, N. Y., after design of Dr. D. C. Miller, the yachting dentist who designed the Dagmar, later purchased by the U. S. Government for use as a despatch boat. This boat is 81ft. long, 10ft. beam, draft 5ft., fitted with triple expansion engines, 9in stroke, approximate horse power 200. On her trip through the lakes she steamed 14 knots easily. Mr. Armour expects 18 miles per hour. Mr. W. J. White's Say When, of Cleveland, is capable of making 25 miles an hour. Outside of this boat, or perhaps Mr S. C. Reynold's steam yacht Signal, of Toledo, No. 12 should be as fast as any craft on the Lakes. The latter boat will be at Detroit and possibly at Chicago this week on a cruise now in progress.

Mr. W. F. Steffens, owner of Bonito, steam yacht, is building a handsome new boat of the same class at North avenue, and expects to have it launched within a short time.

Lately I saw the ill-fated Countess of Dufferin, known later in her career as the Countess, lying idle and abandoned in a slip down in the lumber district near the mouth of the river. The Countess, like many another lady of high title and high claims, has had hard luck, and has also failed to substantiate all her claims. She was a good cruising boat, but she never got a good owner in late years, though she tried a good many. E. HOUGH.

## Yachting on the Miramichi.

The Miramichi river, besides being famous for its salmon and smelt fisheries, is noted as a splendid yachting water. The inner bay, which is protected from the outer bay by a line of sand dunes 15 miles long, is a beautiful sheet of sheltered water, varying from 10 to 60ft. deep, and there are passages from it into broad and shallow stretches of sheltered water, called gullies, whose channels are navigable for light draught vessels. The outer bay can be reached through these gullies or through the ship channel, and then the yachtsman has the Gulf of St. Lawrence before him, and may coast north or south, or stand across the Straits of Northumberland for Prince Edward Island. The first yachting association formed in New Brunswick was the Miramichi Yacht Club, which was organized in 1866, and still lives and flourishes. The membership is not large, but the leading spirits are enthusiastic and endowed with good staying qualities. John C. Miller, manager of the Miller Tanning Extract Company's works, has been commodore, and J. L. Stewart, editor of The Chatham World, vice-commodore, ever since the club was formed. It has held an opening meet every 24th of May and half a dozen races every season, besides club cruises to the lower bay. The fleet includes several small steamers. Improvements and additions are being made this season. The commodore has sold the flag-ship Kilbride, which has won most of the races so far, and is building a new one with larger cabin accommodation. She will have long overhang fore and aft, a lead keel and all the latest improvements regardless of cost. Vice-Commodore Stewart has a design for a center-board yacht which he and Surveyor General Tweedie are to build from. It was drawn by H. C. McLeod, agent of the Bank of Nova Scotia at Minneapolis, who has had great success as an amateur designer, his boats having been victors at Halifax, N. S., and Lake Minnetonka, Minn., on many occasions. Mr. Stewart explained its strong points to a visiting correspondent, and is confident that his new yacht will defeat all comers. The design embodies the very latest ideas in yacht architecture. There is nothing, unless it may be the boats now building by the Herreshoffs, showing a more radical departure from stereotyped form. This yacht, unlike them, has no abnormal features, like a lead cigar bung by a metal plate beneath her; but is nautical all over. She will be of moderate beam, draft and power, will be easily handled, will be non-sinkable and non-capsizable, and will be fast on every point of sailing. Her lines are all easy and she will sail as fast with her covering board under as on her bottom. The native builders are making very wry faces at the design and predict failure, but Mr. Stewart is confident of its great superiority. The first meeting of the two new yachts this season will be an interesting event.—*Exchange.*

## Sippican Y. C., First Championship, July 23.

MARION—BUZZARD'S BAY.

THE course for first and second classes was from judges' yacht, leaving Nye's Ledge and S. E. Ledge buoys on port and return, 15 miles. For third and fourth classes, from judges' yacht, leaving Bow Bells and S. E. Ledge buoys on port and return, 8 miles. Wind S.W., lightening toward finish:

FIRST CLASS CATS.

| | Length. | Start. | Finish. | Elapsed. | Cor. |
|---|---|---|---|---|---|
| Flight, I. Hiller | 30.00 | 1 39 06 | 4 14 03 | 2 34 57 | 2 24 21 |
| Hector, E. C. Stetson | 28.10 | 1 36 20 | 4 15 40 | 2 38 54 | 2 26 19 |

SECOND CLASS CATS.

| | | | | | |
|---|---|---|---|---|---|
| Venture, J. D. Jenney | 27.04 | 1 41 59 | 4 21 31 | 2 39 32 | 2 25 17 |
| Gymnote, W. E. C. Eustis | 27.03 | 1 44 24 | Disabled. | | |

THIRD CLASS CATS.

| | | | | | |
|---|---|---|---|---|---|
| Tycoon, J. L. Stackpole, Jr. | 23 01 | 1 47 37 | 3 22 49 | 1 35 12 | 1 23 50 |
| Sippican, W. H. Davis | 22.10 | 1 46 22 | 3 21 59 | 1 35 37 | 1 24 05 |
| Doric, John Parkinson | 23.02 | 1 49 42 | 3 26 47 | 1 37 05 | 1 25 52 |
| Hermione, R. L. Barstow | 23.00 | 1 46 57 | 3 25 07 | 1 38 10 | 1 26 48 |
| Phenomenon, D. L. Whittemore | 22.08 | 1 48 30 | Withdrew. | | |

FOURTH CLASS CATS.

| | | | | | |
|---|---|---|---|---|---|
| Edith, G. G. Van Rensselaer | 19.04 | 1 51 41 | 3 38 46 | 1 47 05 | 1 31 41 |
| Cat, Bruce Clark | 19.03 | 1 51 10 | 3 48 27 | 1 57 17 | 1 41 47 |
| Squall, J. G. Palfrey | 19.11 | 1 51 18 | Withdrew. | | |

Gymnote broke her rudder soon after the start. Squall had too much sail and withdrew. Flight, Venture, Tycoon and Edith win legs for the championship. Regatta committee, J. G. Palfrey, W. H. Davis and G. G. Van Rensselaer. Judges, Messrs. T. H. Yardley, J. H. Congdon and Dr. J. S. Whiting.

## White Bear Yachting Association, July 23.

DELLWOOD—WHITE BEAR LAKE.

SECOND championship, course, 5 mile arrow head course, twice around to go 10 miles, weather fair and bright, wind 12 to 15 miles west, distance 10 miles:

FIRST CLASS.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Wapsie, Stickney & Bigelow | 3 40 44 | 5 17 42 | 1 36 58 | 1 29 41 |
| Kitten, Stickney & McKechnie | 3 42 04 | 5 16 57 | 1 34 53 | 1 31 16 |
| Shark, L. E Newport | 3 40 35 | 5 17 24 | 1 36 49 | 1 32 11 |
| Hornet, P. N. Gotzian | 3 41 26 | 5 22 55 | 1 41 29 | 1 32 45 |
| Manitou, E. J. Ramaley | 3 40 59 | 5 18 12 | 1 37 13 | 1 34 17 |
| Storm King, J. W. Taylor | 3 41 40 | Did not finish. | | |
| Fortuna, J. M. Welch | 3 41 15 | Broke down. | | |
| Later On, C. M. Griggs | 3 40 59 | Lost her rudder. | | |

SECOND CLASS.

| | | | | |
|---|---|---|---|---|
| Nushka, Elmer Cordway | 3 47 15 | 5 22 02 | 1 34 47 | 1 32 14 |
| Albatross, W. J. Murray | 3 46 10 | 5 25 42 | 1 39 32 | 1 32 21 |
| Aurelia, A. McLaren | 3 47 05 | 5 29 09 | 1 42 04 | 1 33 49 |
| Mary Ann, L. Corning | 3 46 12 | 5 33 10 | 1 46 58 | Not meas. |

Our l.w.l. is taken at 2in. above the waterline. The Wapsie, Shark and Hornet are new boats with overhang fore and aft. It seems as though they "steal" something in time allowance on our measurement basis from the older boats whose sterns are straight. Regatta committee, S. C. Stickney, L. P. Ordway, W. S. Morton. Judges, R. B. C. Bement and A. Petersen.

## Eight Chicago Yachts.

CHICAGO, Ill., July 26.—Eight Chicago yachts sailed a brisk little race last Saturday in a stiff wind, which brought all the seamanship their skippers had. The yacht Lois could not stand up and was swamped early in the race, though she declined help from the judges' boat, and was towed in by a tug. The course was from opposite the foot of Randolph street viaduct to the intermediate and four-mile cribs to the waterworks crib and back to the stakeboat for the second class. For the third and fourth classes, from the same starting point to the intermediate and thence to the waterworks crib and return. The judges were Justice Brad well, Dr. Wallace Blanchard and George W. Rogers. H. F. Grusehow and M. J. Steffens acted as timekeepers. The times were:

SECOND CLASS.

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Hattie B | 3 08 29 | 4 50 24 | 1 41 45 | 1 41 45 |
| Zephyr | 3 08 10 | 5 07 21 | 1 59 11 | 1 57 17 |
| Pinta | 3 08 52 | 5 20 44 | 2 11 52 | 2 10 56 |

THIRD CLASS

| | | | | |

| Growler | 3 07 45 | 5 02 11 | 1 54 26 | 1 50 16 |
| Eileen | 3 11 06 | 5 13 04 | 2 01 58 | 2 01 02 |
| Blade | 3 07 50 | 5 21 58 | 2 14 08 | 2 12 41 |

## Mosquito Fleet Y. C., July 30.

CITY POINT—BOSTON HARBOR.

THE tenth annual open regatta of the Mosquito Fleet Y. C. was sailed on Saturday, starting in a fresh S.E. breeze and finishing in a calm, the times being:

FIRST CLASS

| | Length. | Elapsed. | Corrected. |
|---|---|---|---|
| Ustane, S. M Hall | 21 07 | 2 34 09 | 1 57 58 |
| Good Luck, J. B. Farrell | 21.08 | 2 35 15 | 1 59 10 |
| Wapiti, J. Bertram | 23 04 | 2 38 31 | 2 04 32 |
| Strideaway, Snow & Allen | 24.10 | 2 42 10 | 2 10 04 |

SECOND CLASS.

| | | | |
|---|---|---|---|
| Caprice, R. W. Bird | 19 04 | 2 37 10 | 1 57 45 |
| Scamp, H. N. Nute | 18.01 | 2 56 40 | 2 15 14 |
| Trifle, J. F. Casbia | 18.05 | 3 06 25 | 2 25 32 |
| Saraphin, Niles & Richardson | 19.02 | 3 06 40 | 2 27 00 |
| Memento, Young & Co | 20.05 | 3 08 40 | 2 31 20 |
| Coot, T. Murphy | 18.07 | 3 11 22 | 2 30 46 |
| Wraith, J. F. Berrigan | 18.00 | 3 18 15 | 2 36 40 |

THIRD CLASS.

| | | | |
|---|---|---|---|
| Flora Lee, C. D. Lanning | 16.10 | 2 59 30 | 2 15 52 |
| Escort, W. H. Ranson | 15.01 | 3 07 10 | 2 20 03 |
| Elsie, Keating & Bailey | 16 02 | 3 36 35 | 2 51 40 |
| Cadet, C. L. Smith | 16.04 | Withdrew. | |
| Magnet, Turner & Narnock | 15.04 | Withdrew. | |
| Annie, E H. Rich | 15 00 | Withdrew. | |

The winners and prizes were: First class, first prize, $12, Ustane; second prize, $8, Good Luck, third prize, $3, Wapiti. Second class, first prize, $10, Caprice; second prize, $5, Scamp; third prize, $3, Trifle. Third class, first prize, $8, Flora Lee; second prize, $5, Escort; third prize, $3, Elsie.

The judges were E. J. Powers, T. A Maguire, J. F. Barry and W. O. Elliot. Messrs. J. T. Powers, G. L. Paget, W. O. Elliot, S. C. Higgins and L. P. Keiser made up the regatta committee.

## Bellport Regatta, July 29.

THE annual regatta of the yachts of Bellport, Long Island, was sailed on Friday, the times being:

| | Start. | Finish. | Elapsed. |
|---|---|---|---|
| The Duchess | 3 01 19 | 5 30 22 | 2 29 03 |
| Red Cedar | 3 01 35 | 5 33 16 | 2 31 41 |
| Idler | 3 02 08 | 5 37 04 | 2 34 56 |
| Ben Russell | 3 02 28 | 5 39 27 | 2 36 59 |

The winner, the Duchess, is a new yacht with modern overhangs, built by Gilbert M. Smith, of Patchogue, for Miss Helen Barry, the actress.

## Lake Yacht Racing Association, 1892.

## Rochester Y. C., July 22.

CHARLOTTE, N. Y.—LAKE ONTARIO.

THE regatta of the Rochester Y. C. was sailed July 22, the day being warm and fair with a moderate S.W. wind and smooth water. The course was a triangle with four-mile sides, sailed twice by all over 25ft., and once by the 25 and 18ft. classes. Yama was not present, being out at Oswego for repairs. Cinderella lost her topmast on the first round, and Dinah parted her bobstay and withdrew. The full times were:

FIRST CLASS, START 10:40.

| | Length. | First round. | Finished. | Elapsed. | Corrected. |

| Alliance | | 2 46 40 | 3 16 40 | |
| Rustler | | 2 48 44 | | |

Winners—Class one, Vreda, $40; 46ft. class, Aggie, $40; 40ft class, Zelma, $30; Dinah, $20; 35ft. class, Vision, $30; 30ft. class, Erma, $30, Volante, $15, Vedette, $10; 25ft. class, Maud B., $25, Salola, $15, Nox, $5; 21ft. class, Gwendoline, $20; Canuck, $10, I'll Away, $5.

Regatta committee: F. H. Ambrose, chairman; J. F. Monck, R. A. Mathesius, T. L. Stephens, F. R. Waddill, J. B. Young. Judges: E. H. Ambrose and W. O. Phillips, Association timekeeper.

In the evening the Royal Hamilton Y. C. entertained the visiting yachtsmen at dinner in their handsome club house on the beach.

## Royal Canadian Y. C., July 28.

TORONTO, ONT.—LAKE ONTARIO.

THE final regatta of the circuit was that of the Royal Canadian Y. C., at Toronto, the proposed regatta of the Queen City Y. C. being abandoned. The day was cool and fair, with a light S.W. wind, freshening during the race. The course was a triangle on the lake, five miles to a side, the starting buoy being off the Exhibition Wharf, another off Mimico, and the other out in the lake, making a beat to the Mimico buoy, a reach to the lake buoy, and a run back. The times were:

FIRST CLASS, START 10, 30 MILES.

| | Length. | 1st round. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|---|
| Oriole | 57.90 | 12 16 05 | 2 15 10 | 4 15 10 | 4 15 10 |

| Canuck | | 4 03 13 | 2 03 13 | 1 59 04 |

Winners—Class one, Oriole, $100; 46ft. class, Aggie, $80; White Wings, $50; 40ft. class, Zelma, $60; Dinah, $40; 35ft. class, Vision, $50; Alert, $30; 30ft class, Vidette, $50; Erma, $35; 25ft. class, Maud B., $40; Nox, $25; Salola, $15; 21ft. class, Ethel, $25; Gwendoline, $15; I'll Away, $10.

Sailing Committee—C. A. B. Brown, chairman; N. B. Dick, A. E. Gooderham, T. J. Campbell, Æ. Jarvis, L. V. Percival, Wm. Armstrong, Thomas McGaw, C. W. Postlethwaite, W. O. Phillips, Association timekeeper. Judge and starter—Mr. Jeffrey Foot.

The cruise throughout was a success, the weather being moderate and pleasant, though two of the races were spoiled by calms. The absence of Yama, after her mishap at Oswego, was a disappointment to all, as the racing between her and Zelma promised to be very close.

## Beverly Y. C., July 29.

MARBLEHEAD—MASSACHUSETTS BAY.

THE 188th regatta of the Beverly Y. C. on Friday was open to yachts of any recognized club not over 30ft. waterline, the conditions being:

Yachts over 23ft. and not over 30ft. waterline to form first class; over 21ft. and not over 25ft. the second class; over 18ft. and not over 21ft. the third class; 18ft. and under the fourth class.

The third class will be divided into sloops and cats, separate prizes being given in each division.

In order to give a race to New York yachts which may be present a special class was arranged open to sloops which are either not over 24ft. waterline or not over 25ft. sailing length (Beverly Y. C. rules). This class will start with third class sloops and sail the same course.

Crews may include one man for every 5ft. waterline and fraction thereof, and special and third class sloops may carry five men. Corinthian rule will be waived for this race.

At 11:45 white flags with numbers of the courses will be hoisted on the judges' boat.

The race must be made by one boat in first and second classes respectively at the rate of 3¾ miles an hour; in third, special and fourth classes at the rate of 2½ miles an hour.

No restrictions as to sails in first and second classes; in third, special and fourth classes sloops may carry mainsail, forestaysail and jib; catboats, mainsail only. Jibs may be boomed out in third, special and fourth classes, but must be kept on the stay or in their usual position, if set flying.

The prizes are: First class, first prize $40, second $15; second class, first prize $30, second $10; third class sloops, first prize $30, second $5, third $10; special class, first prize $50, second $15, third $10; third class cats, first prize $40, second $15; fourth class, first prize $20, second $10.

No second prize will be awarded unless at least four boats start; no third prize unless six boats start; no fourth prize unless eight boats start.

The course for first class was from starting point, leaving E. Y. C. turning buoy on starboard, Graves whistling buoy on starboard, Pig Rock buoys, Roaring Bull, Tinker's Island and Tom Moore's Rock on port and return, about 24 miles. For second, third and special classes from starting point, leaving mark (buoy and red flag) anchored 2½ miles S. E. by S. of Marblehead Rock on starboard, S. E. Pig breaker buoy (bell) on starboard, Roaring Bull, Tinker's Island and Tom Moore's Rock on port; markboat on starting line on starboard; course to be sailed twice round, 15 miles. For fourth class, same as above, except course is to be sailed over but once, 7½ miles.

The race brought out the following large entry list, the majority of the yachts starting in the race, though some were absent through the very light weather. In the 21ft. class was Spurt, a new splasher from Newburyport, and R. D., the latter being entered for the E. Y. C. race, but only reaching the harbor on Thursday as the race ended.

| | Sailing Length. | | Sailing Length. |
|---|---|---|---|
| **FIRST CLASS.** | | | |
| Hawk, Gordon Dexter | | Handsel, J. R. Hooper | 33.05 |
| Chapoquoit, C. H. Jones | 37.10 | Climax, M. F. Kelly | |
| **SECOND CLASS.** | | | |
| Beatrice, J. Cavanagh | | Ustane, S. N. Small | 27.00 |
| Susie, W. W. Keith | | Korban, E. M. Herton | 23.08 |
| Ione, J. S. Poyen | | Seabird, C. L. Joy | 30.04 |

| **THIRD CLASS—SLOOPS AND SPECIAL.** | | | |
| Kraken, Percy Chase | | Freak, J. B. Paine | 25.10 |
| Nixie, F. D. Cochrane | | Catspaw, Walter Abbott | 26.10 |
| Thrush, A. G. McVey | 27.00 | Alpha, J. F. Brown | 23.05 |
| Tadpole, W. E. Waterhouse | 25.04 | Caprice, R. W. Bird | |
| Sirocco, W. P. Fowle | 26.09 | R. D., R. McIntyre | |
| Pyxie, Oswald Sanderson | 24.11 | Spurt, D. B. Pierce | |
| Vanessa, A. B. Bigelow, 2d | 24.00 | Exile, J. F. Small | |
| Reaper, H. P. Benson | 24.00 | | |
| **THIRD CLASS—CATS.** | | | |
| Typhoon, J. I. Taylor | 23.09 | Magpie, H. G. Otis | 22.04 |
| Vision, George Crane | 22.06 | Madge, W. H. Thayer | 22.04 |
| Koorali, R. C. Robbins | 23.01 | Arab, W. F. Scott | 21.08 |
| Opechee, W. B. Barker | | | |
| **FOURTH CLASS.** | | | |
| Alpine, C. J. Blethen | 20.10 | Modoc, O. G. Allen | |
| Pearl, P. H. Kemble | | Marchioness, C. E. Hodges | |
| Scamp, B. Y. Nute | 20.03 | Imogen, M. B. Wendell, Jr. | 18.10 |

There was an interesting fleet in Marblehead Harbor on Thursday evening and Friday morning, including the majority of the new Eastern boats, all under 30ft. in length, but none the less interesting and instructive on that account. There is no use of talking of cruising accommodations or of desirable types so far as the 21ft. class is concerned, speed, and speed only, is the sole consideration there, and such craft as Hornet and Kraken, of 1890, or Sirocco, the new Fowle boat, which may be classed as all-around boats, designed for speed, but giving such accommodation as may be had on 21ft., are clearly out of the racing beside the new fins and splashers.

In the 30ft. class the same extreme has not yet been reached and the two new boats must be classed as legitimate cruisers so far as build and accommodations go. Handsel, the Herreshoff fin-keel, is a very different craft from her 21ft. sisters, being designed for general use, including the winning of prizes, but her useful features have been by no means sacrificed. The main cabin is roomy and most comfortable, with a reasonable amount of headroom, over 5ft., under a low house, while the stowage room fore and aft is pratically unlimited, space for berths, lockers, pantries and galley, as well as for anchors, gear, etc. The cockpit is roomy and quite deep, the owner carrying his children with him in cruising; the deck room is ample, clean and unobstructed, the rig is light and compact, and though 7ft. 8in. is a heavy draft in many places, in other respects the yacht makes a handy and roomy craft.

The other new 30, Chapoquoit, is a Cape cat, an improved Harbinger, but quite different from the usual build. Her bows have been run out to a shovel, she carries a permanent bowsprit, and she is rigged as a pole-masted sloop, although the mast is stepped at the end of the waterline. Her dimensions are: Length over all 41ft. 6in., l.w.l. 28ft. 10in., beam 14ft. 4in., draft 2ft. 8in. A low cabin house gives over 5ft. headroom, with good width of floor on each side of the long centerboard trunk. The cockpit is quite large, and there is ample room for galley, stores, water, etc. Unlike Handsel, she carries a club and jibtopsail on her high pole mast.

Friday morning was warm and calm, but by noon there was a light S.E. breeze, with a haze over the water. The steam yacht Corona, with her owner, Mr. J. P. Cushing, and his fellow members of the regatta committee, Messrs. Walter Lloyd Jeffries, N. H. Emmons and F. Elliott Cabot, was at the line in good season, but owing to the light wind the start was delayed as long as possible, the signal for first class being blown at 12:15. Hawk and Chapoquoit were to windward of Handsel, her rig being dwarfed by their clubtopsails; while Climax was to leeward. Chapoquoit was moving faster than the others, and she and Hawk were soon clear of Handsel, the latter luffing up and lying on the line for a moment before filling away again and starting. By the time the four were fairly under way a thick fog was rolling in from the sea, and within five minutes they were lost to sight from the judges' boat. The nine starters in the 25ft. class made a good start, all carrying topsails, but the fun began when the 21-footers came for the line five minutes later, a baker's dozen of them, all on the same tack and crowding for the weather end. The only rule recognized was the unwritten one, "Push your bowsprit in where you can and push your boat in anywhere that your bowsprit can enter." Such trivial details as overlaps and right of way were entirely disregarded, and there was a general scrimmage throughout the fleet. The yachts were bumped together, one pushing the other, and some were actually turned round by the crews of rival craft, who seized them by bowsprit or boom end and endeavored to push their own craft ahead. The third class cats started at 12:30 and the fourth class at 12:35, after which nothing was visible but the dense fog. The judges' boat ran out to the first mark and timed the small yachts as follows:

| | | | |
|---|---|---|---|
| Freak | 1 15 50 | Spurt | 1 29 46 |
| Alpha | 1 18 20 | Magpie | 1 31 52 |
| Thrush | 1 19 46 | Caprice | 1 34 26 |
| Vanessa | 1 20 36 | Kraken | 1 34 51 |
| Reaper | 1 22 06 | Moondyne | 1 35 34 |
| Exile | 1 22 27 | Typhoon | 1 35 53 |
| Catspaw | 1 22 55 | Susie | 1 35 56 |
| Pyxie | 1 24 16 | Ione | 1 36 35 |
| Beatrice | 1 25 10 | Ustane | 1 38 49 |
| Tadpole | 1 26 31 | Koorali | 1 40 09 |
| Seabird | 1 26 48 | Vision | 1 42 00 |
| Black Cloud | 1 28 50 | Alpine | 1 43 58 |
| White Fawn | 1 28 55 | | |

No times were taken at the Pigs, the steamer running to the line to guide the yachts by her whistle. The fleet was timed on the first round:

| | | | |
|---|---|---|---|
| Freak | 2 10 22 | Black Cloud | 2 31 05 |
| Alpha | 2 19 24 | Pyxie | 2 31 33 |
| Thrush | 2 20 58 | Spurt | 2 32 32 |
| Exile | 2 22 58 | Tadpole | 2 33 48 |
| Vanessa | 2 24 58 | Ione | 2 40 34 |
| Catspaw | 2 25 13 | Magpie | 2 41 05 |
| Beatrice | 2 26 00 | Susie | 2 41 14 |
| Reaper | 2 26 00 | Typhoon | 2 46 36 |
| Seabird | 2 28 47 | Koorali | 2 47 05 |
| White Fawn | 2 29 14 | | |

Thrush was holding third place well; Pyxie had again dropped to the rear, the wind, though fresher than at the start, still being very light. The 25ft. class, starting 5m. before, and with all the advantages of topsails and larger sail plans, was well astern of the 21-footers at the end of the round. Typhoon had sprung her mast below deck, and withdrew at the end of the round.

One by one the boats loomed up into view through the fog, were visible for a minute as they trimmed in sheets and luffed around the markboat, and then disappeared entirely. Not until they were close aboard the steam yacht was it possible to identify each, and the excitement was much increased by the uncertainty.

The judges' boat laid at the line sounding her whistle, and a long and tedious wait followed, broken by the appearance of Thrush, followed by Tadpole and Vanessa, from the direction in which they had last disappeared. All reported that they had failed to find the outer mark. After them came other stragglers, until half of the fleet had given up. When Alpha finally appeared, hunted closely by Freak, she made for the line and crossed it, reporting that she had found both marks. Freak at once set to work inditing a protest against Alpha for setting two jibs at the same time. Hawk, Climax and Handsel turned up late in the afternoon, having abandoned the race, and it was supposed that Chapoquoit had done the same, but she finally finished late in the afternoon, reporting that she had completed the long course. The third class cats made the course, but were over the time limit. About 4:30 the wind fell entirely, though the fog was as thick as ever, the yachts as they came in having trouble in making the harbor.

## Corinthian Y. C., July 20.

MARBLEHEAD—MASSACHUSETTS BAY.

THE race of the Corinthian Y. C. on Saturday fared even worse than the two preceding ones; the wind falling and allowing none of the fleet to finish. The race was open to the 21ft. class and the 25-footers, Pyxie alone representing the latter. The entries were:

| | Sailing length. | | Sailing length. |
|---|---|---|---|
| **CLASS A.** | | | |
| Pyxie, Oswald Sanderson | 25.00 | Reaper, H. P. Benson | 24.00 |
| Catspaw, Walter Abbott | 26.04 | Alpha, J. F. Brown | 23.06 |
| Spurt, D. B. Pierce | | *R. D., R. McIntyre | |
| Exile, J. F. Small | 26.03 | *Sirocco, W. P. Fowle | 26.05 |
| Thrush, A. G. McVey | 27.02 | Tadpole, W. E. Waterhouse | 25.04 |
| Vanessa, A. Bigelow, 2d | 24.00 | *Carl, C. O. Foster | 23.00 |
| Freak, J. B. Paine | 25.10 | | |
| **CLASS B.** | | | |
| Koorali, R. C. Robbins | 23.01 | Magpie, H. G. Otis | 22.04 |
| Madge, W. H. Thayer | 22.09 | *Modoc, O. G. Allen | 18.05 |
| *Typhoon, J. I. Taylor | 23.09 | *Arab, W. F. Scott | 21.08 |

* Did not start.
